# General Information Bulletin 1976-1977

University of Massachusetts at Amherst

The Undergraduate Catalog of the University of Massachusetts at Amherst consists of the Course and Faculty Directory and the General Information Bulletin. All students are responsible for observing the rules and regulations thus published, as well as those published in University Directions. The University reserves, for itself and its departments, the right to change its announcements or regulations whenever such action is deemed appropriate or necessary.  
APRIL 1976

The University Undergraduate Catalog for the 1976-77 academic year is part of the One Hundred and Eleventh Annual Report of the University of Massachusetts and as such is Part II of Public Document 31, Section 8, Chapter 75, of the General Laws of Massachusetts.

The University of Massachusetts at Amherst prohibits discrimination on the basis of race, color, sex, age, religion, national origin or handicap in any aspect of its employment, the recruitment, admission and treatment of students and in its policies and programs, as required by Federal and State laws and regulations. Inquiries concerning these laws and regulations or their application should be addressed to the Office of the Affirmative Action Coordinators, 375 Whitmore Administration Building.

## The Board of Trustees

### Organization of 1976

Robert M. Abrams of Holyoke  
Stephen G. Breyer of Cambridge  
Sylvia K. Burack of Brookline  
Bruce R. Carlson of Dallas, Texas  
Catherine Forbes Clark of Boston  
Theresa Conti of Boston  
Edmund J. Croce of Worcester  
Paul M. Cronin of Boston  
Daniel Dennis of Billerica  
Robert D. Gordon of Boston  
Joseph P. Healey of Arlington  
Ogretta V. McNeil of Worcester  
Ruth S. Morgenthau of Cambridge  
Gavin D. Robertson of Worcester  
Carolyn C. Rowland of Boston  
Alan Shaler of Easthampton  
Erline Shearer of Dorchester  
Robert J. Spiller of Winchester  
Frederick S. Troy of Boston

### Ex Officio

Michael S. Dukakis of Brookline,  
Governor of the Commonwealth  
Robert Wood of Lincoln,  
President of the University  
Gregory R. Anrig of Needham,  
Commissioner of Education  
Jonathan E. Fielding of Brookline  
Commissioner of Public Health  
Robert L. Okin of Cambridge,  
Commissioner of Mental Health  
Frederic Winthrop, Jr. of Ipswich,  
Commissioner of Agriculture  
Nancy B. Eddy of Amherst, Chairman,  
Board of Selectmen

### Officers of the Board

Joseph P. Healey of Arlington,  
Chairman  
Gladys Keith Hardy of Newton,  
Secretary  
Kenneth W. Johnson of Amherst,  
Treasurer  
Dorothy K. Eichel of Boston,  
Assistant Secretary

## **A Message from the Chancellor**

I am pleased that you are considering attending the University of Massachusetts at Amherst. Now in its second century of education, research and service, this publicly-supported University offers programs of excellence and diversity to the broadest possible cross-section of the citizens of this Commonwealth, to whom it remains both responsible and responsive.

Through the University's rich combination of human expertise and material resources, its students have unique opportunities to prove themselves and their concepts, and to shape and extend their capacities for knowing and caring.

I welcome student participation in and contribution to this institution's intellectual governance and growth. In the long run, experience has shown that it is student energy, commitment and questioning which most surely shape the University's future successes.

Randolph W. Bromery  
*Chancellor*

## General Information

The University of Massachusetts is the state university of the Commonwealth, founded under provisions of the 1862 Morrill Land Grant Act. Incorporated as Massachusetts Agricultural College in 1863, the institution became Massachusetts State College in 1931, and the University of Massachusetts in 1947. Rooted in the liberal arts tradition, the institution has grown steadily from four buildings at its opening in 1867 to the present state university system of three major campuses.

Situated in the Connecticut River Valley, the Amherst campus consists of approximately 1,200 acres of land and 150 buildings.

The University of Massachusetts at Boston was opened in 1965. The University's Medical School at Worcester, founded in 1962 by an Act of the Legislature, enrolled its first class in 1970.

The total resources of the University are dedicated to giving all qualified students full opportunities to develop their capabilities.

## Admissions

### Freshman

Applications for admission to the Amherst campus may be obtained from the Admissions Office. Applications for the Boston campus may be obtained from the Admissions Office in Boston. See the final page of this Bulletin for addresses. If you were or are enrolled as a full-time post-secondary student, you must apply as a Transfer student.

### How to File

Fill out the application carefully, answering all questions. Submit it to your Guidance Counselor who will complete and forward it to the University with a transcript of your grades. Do not mail the application directly to us yourself. (Older students and Veterans are exempt from this provision although they must assume the responsibility for ensuring that an "official transcript" is submitted by stated deadlines.)

### When to File

Applications should not be submitted until the first set of senior year grades are

recorded. Do NOT wait for SATs to be taken and on file, however.

### Deadlines

Applications must be RECEIVED AND COMPLETE (including SATs, transcript, and related documents) not later than:

|            | Fall Semester | Spring Semester |
|------------|---------------|-----------------|
| Mass. Res. | Mar. 1        | Oct. 15         |
| All Others | Feb. 1        | Oct. 15         |

### SAT Test Date Deadline

To be considered for the Fall Semester, SATs must be taken on or before the January test date to ensure that results will be received by the deadline unless wishing to be considered on the basis of Junior year SATs.

### If You Previously Applied for Admission

If you applied for admission to the Amherst campus in the past two years and have not been in full-time enrollment at another college, it is NOT necessary to file a new application. Write and request "Reactivation" of your previous application (by the stated deadline). In your letter, please chronologically detail what you have been doing in the interim.

### Recommendations

Although recommendations are not required, if submitted, we prefer information that will provide us insights into your academic and vocational potential.

### Application and Other Fees

There is a non-refundable Application Fee of \$10 for Massachusetts residents and \$25 for non-residents. A \$15 non-refundable Matriculation Fee is due within 15 days after notification of acceptance. Subsequently, a \$30 non-refundable Summer Counseling (orientation) fee will become due. Further information on costs is available from Financial Aid Services. For the coming academic year, single Massachusetts residents attending the University and living on campus will normally incur costs of \$2800 to \$3000 per year. This includes tuition and fees, room, board, personal expenses, books, and supplies and the fees noted above.

### Required Tests

All applicants are required to submit results of the Scholastic Aptitude Tests

(SATs) administered by the College Entrance Examination Board. Although Achievement Tests are not required of Massachusetts residents, it is strongly recommended that applicants take three, of which one should be English Composition.

College Board Test Reports must be sent directly to the University from the College Board Test Center and should also be included on the high school transcript. Applicants must ensure that they take SATs early enough to meet application deadlines. The University's Amherst campus College Board Number is 3917.

Out of-state students are required to take three Achievement Tests, one of which must be English Composition, in addition to SATs.

Foreign students are required to submit SATs and TOEFL (Test of English as a Foreign Language).

### **Optional Tests**

#### *Advanced Placement*

Advanced placement and credits towards graduation will be awarded to candidates who obtain scores of 4 and 5 on the College Entrance Examination Board Advanced Placement Test; scores of 3 are given credit on a departmental basis. Candidates seeking advanced placement and credit towards graduation in foreign languages and rhetoric are advised to take the CEEB Foreign Language Achievement Test and English Composition, respectively.

The College-Level Examination Program (CLEP) enables students to earn college credit-by-examination. Anyone may take CLEP tests to demonstrate his or her college-level competency no matter when, where, or how this knowledge has been acquired. CLEP tests are administered at more than 500 test centers and are given the third week of each month. Fall Semester applicants should plan to take the exams, if at all, not later than April of the year of entrance. Your high school guidance office will have additional details about CLEP, or you may write to CLEP, Box 592, Princeton, NJ 08540.

#### *Mathematics Requirements*

Prospective physical science or mathematics majors should, if possible, offer two years of algebra, one year of plane geometry, and one-half year of

trigonometry. Preparation in analytic or solid geometry, chemistry, physics, and introductory calculus is also strongly recommended.

Prospective engineering majors should offer two years of algebra, one year of plane geometry, and one-half year each of trigonometry and solid geometry. Chemistry and physics are also advised.

Any student deficient in the mathematics requirements should plan to make it up during the summer prior to entrance or should expect to take five years to complete the college course.

#### *Foreign Language Requirement*

The College of Arts and Sciences stipulates intermediate language proficiency as a graduation requirement. At least three years of secondary school language preparation will be advantageous. Students who receive a score of 600 or higher on a language Achievement Test will gain 6 credits in that language and will be exempt from the language requirement. Students who have completed the fourth level of one language or the third level of one language and the second level of a second language are exempt from the language requirement.

The exceptional candidate whose secondary preparation is not within the framework of the above recommendations may be considered for admission. Suitability for admission will be based on other intellectual aptitudes and achievements and readiness for the University curriculum.

### **Entrance Categories**

Again this year we expect a greater number of qualified applicants to apply than we are able to accept for regular September enrollment. Therefore, we are offering several alternative entrance possibilities to provide maximum admission opportunities.

#### *Regular Entrance*

Freshman applicants accepted for enrollment in September (Fall Semester).

#### *Delayed Entrance*

In recognition that time spent away from school can be valuable to a student in determining educational goals, applicants accepted for September ("Regular Entrance") may request to delay their date of enrollment, with subsequent guarantee of

admission, for six months to two years. If you wish to elect this option, you must do so after you have been notified of acceptance. Further information will be included with acceptance material.

#### **Candidates' Reply Date**

The University participates in the Candidates' Reply Date option which permits an accepted applicant to delay notification of intention to enroll until May 1.

#### **Interviews**

An interview is not part of the admission process since it is impossible to interview all applicants. Personal conferences will be scheduled for applicants who have questions which cannot be resolved by correspondence or printed literature. Please contact the Admissions Office for an appointment.

#### **Visits to the Campus**

We encourage applicants to visit the Amherst campus. Group information sessions are held on Friday afternoons in the Fall beginning in October. The Admissions Office is not open on Saturdays.

#### **Guided Tours**

Through the University Guide Service, ARCON, guided tours are available during the regular academic year, except during University vacations, on weekdays from 1:30 to 3:30 p.m., Saturdays from 10 a.m. to 1 p.m., and Sundays from 1 to 3 p.m. Special arrangements for campus tours during the academic year may be made by writing to ARCON, University Guide Service, Murray D. Lincoln Campus Center, University of Massachusetts, Amherst, MA 01002, or telephoning (413) 545-0012. Tours originate from the Information Desk, concourse level of the Campus Center.

#### **High School Visits**

Within budget limitations each public high school in Massachusetts and some private and parochial schools will be visited between September and mid-November by an Admissions Office staff member.

#### **Notification of Decision**

In most cases Freshman applicants will be notified by mid-April of the action taken on their application for Fall enrollment and by November 1 for Spring enrollment. Those with outstanding academic records

may receive earlier notification. If accepted at an early date, however, you are under no pressure to make a final decision in regard to choice of college before the Candidates' Reply Date.

#### **New England Regional Student Program**

Students who are legal residents of any of the other New England states may be eligible for consideration for admission under auspices of the New England Regional Student Program. The NERSP provides an opportunity to earn a degree in certain curricula not offered at the resident's own state institution at the tuition rate for Massachusetts residents. Check with high school guidance counselor.

#### **Veterans**

Veterans whose Active Duty is credited to Massachusetts, or who subsequent to release have established Massachusetts as their domicile, are high school graduates or equivalent, and who have not attended another college full-time since release from A.D., will be considered for admission primarily on the basis of SATs. Other Veterans will be considered under regular admission policies. If previously enrolled in an institution of higher education, before or after A.D., a transcript of credits attempted and earned MUST be submitted for this application to be considered complete. Credits earned prior to A.D. will not affect enrollment eligibility. Credits earned after A.D., may affect enrollment eligibility.

A DD 214 must be submitted. (If still on A.D., submit copy when available.)

The Veterans' Affairs Office is located in Room 236, Whitmore Administration Building, telephone (413) 545-1346. This office has the most current data regarding laws, policies and procedures for veterans. The Veterans' Affairs Office acts as a liaison between the individual veteran and various governmental agencies (i.e., Veterans' Administration and Veterans' Services). The Veterans' Office has a job bank, a short-term loan fund and other services to aid the veteran.

#### **Out-of-State Applicants**

To accommodate as many qualified legal residents of Massachusetts as possible, the University limits out-of-state undergraduate enrollment to 5%. This makes

freshman admission extremely competitive to non-residents. See Section on "Residence Status." Note also SAT requirements and application deadline.

### Handicapped Students

An office has been established to assist academically qualified students who have physical disabilities. Students, parents, and counselors concerned should contact Office of Handicapped Student Affairs, 227 Whitmore, telephone (413) 545-0892.

### Fields of Study NOT Offered

While the University offers nearly 100 different major fields of study, the following which are commonly requested, are not available: Aeronautical Engineering, Architecture, Business Education, Criminology, Dental Technology, Oceanography, Occupational Therapy, Photography, Physical Therapy, Recreational Therapy, Secretarial Sciences, Special Education. See Catalog for full academic listings.

### Freshman Orientation

Every student entering as a freshman must attend a two-and-one-half-day orientation program at a specified time during the summer prior to entrance. The program consists of academic placement testing, counseling, and pre-registration for courses to be taken during the coming semester and orientation to social and academic opportunities available to undergraduates. Each student is assigned a faculty adviser who will help in the selection of courses and planning of a class schedule. On the final day of each of these periods, a special program is held for parents so that they may learn more about the University. Each freshman attending the summer orientation program on the Amherst campus will pay a non-refundable fee of \$30 to cover the cost of meals, housing, testing, and counseling. (See Transfers section for information on transfer orientation.)

### Visiting Students

The University is not able to accommodate students from another institution who wish to spend only a semester or a year on this campus, except through organized exchange programs. Students who wish to take courses at the University in a visiting capacity are urged to contact the Division of Continuing Education.

### Preparatory Studies

Your secondary school preparation must indicate your capacity to handle the quality of scholastic work which the University has established as its standard of achievement. A prerequisite for admission is the satisfactory completion of a four-year high school course or its equivalent. A minimum of 16 units should be offered, distributed according to the following recommendations:

|                                       |    |
|---------------------------------------|----|
| English .....                         | 4  |
| College preparatory mathematics ..... | 3* |
| Foreign language .....                | 2  |
| U.S. History .....                    | 1  |
| Laboratory science .....              | 1  |

\*Preferably two years of algebra and one of plane geometry.

A minimum of five other units should be offered in the areas of mathematics, science, foreign language, history and social studies, or free electives (not more than four units).

### Minority and Low-Income Student Admission Programs

In cooperation with the Massachusetts Commission Against Discrimination, an Affirmative Action program has been developed to provide information and assistance to minority students in making application for admission.

"Minority" individuals are defined in Presidential Executive Order 11246 as including Afro-American, American Indian, Oriental American, and Spanish-surnamed people.

CCEBS (Committee for the Collegiate Education of Black Students) seeks to recruit and accept minority and low-income white students into the University through a special admissions process. The CCEBS student shares all the responsibilities of any other student but is offered individually focused academic, financial, and personal support services, if needed.

BCEP (Bilingual Collegiate Program) is designed primarily for Spanish-speaking individuals and is similar to the program above.

### Transfers

Any student who has been previously enrolled in an institution of higher education and completed 10 or more semester hours is considered a transfer and must file a

transfer application form. The University considers for transfer only those applicants who have completed a minimum of 54 transferable semester credits. Only in a very limited number of specialized curricula are applicants eligible for consideration with less than 54 credits.

Priority is given to transfer applicants from Massachusetts who have completed two years in a transfer program at any of the Commonwealth's state or city supported community and junior colleges. Remaining transfer vacancies are filled on a competitive basis. Transfer vacancy for the non-resident (out-of-state and foreign) is extremely limited.

A minimum of 45 semester credits must be taken in residence at the University, and all University, college, and major requirements must be completed in order to receive a bachelor's degree.

Applications must be received and complete prior to April 1 for fall semester consideration, and prior to October 15 for spring semester consideration. It is the student's responsibility to be sure that all transcripts from each college attended, including the most current, have been forwarded to the Office of Transfer Affairs before the stated deadline dates. High school record and SAT scores are not required of transfer applicants.

Decisions are made late in the semester prior to proposed entrance. A tentative evaluation of transfer credits is sent to the student shortly after acceptance.

Campus visitations and interviews with the staff of the Office of Transfer Affairs are encouraged if questions or problems arise concerning applications. During certain times in the admissions year, however, personal conferences must be limited to urgent problems.

Every student entering as a transfer is required to attend an orientation and pre-registration session during the summer prior to entrance. At this time a faculty adviser is available to each student to assist in selection of courses. Advanced placement testing also takes place at this time and a general orientation of the social and academic opportunities of the University is provided. Transfer students who enter in the spring semester will pre-register in November. A non-refundable \$15 fee is required of each transfer to cover the costs of this program.

### **Physical Exam**

Physical examination by a personal physician is required of each entering freshman, transfer, re-entering student, and student participating in athletics. Physical report forms for this examination are mailed with acceptance material and must be completed and returned to the University Health Services 10 days before the opening of the semester. Evidence of a successful smallpox vaccination and active tetanus immunization is required.

### **Proof of Residency/ Residence Status**

All applicants must submit a notarized "Proof of Residence" form included with the application for admission prior to consideration. The rules and regulations shall apply to the classification of students at the University of Massachusetts as Massachusetts or non-Massachusetts students for tuition purposes.

#### **Section 1. Definitions**

1) **ACADEMIC PERIOD** — A term or semester in an academic year or a summer session, as prescribed by the Board of Trustees or under their authority.

2) **CONTINUOUS ATTENDANCE** — Enrollment at the University for the normal academic year in each calendar year, or the appropriate portion or portions of such academic year as prescribed by the Board of Trustees or under their authority.

3) **DOMICILE** — A person's true, fixed and permanent home and place of habitation, where he intends to remain permanently or for an indefinite time.

4) **EMANCIPATED PERSON** — A person (a) who has attained the age of 18 years, or (b) if under 18 years of age, whose parents have entirely surrendered the right to the care, custody and earnings of such person and who no longer are under any legal obligation to support or maintain such person, or (c) a person who has no parent. If none of the aforesaid definitions apply, said person shall be deemed an "unemancipated person."

5) **HIS** — Personal pronouns herein shall apply to the female as well as the male gender.

6) **PARENT** — With respect to a person (in the case of an adopted person, inserting the adjective "adoptive" before the

words "father" and "mother" wherever used):

- a) the person's father;
- b) if the person's father dies, either the legal guardian or if no legal guardian is appointed, the person's mother;
- c) if neither the father nor mother is living and no legal guardian is appointed, the person who then stands *in loco parentis* to the person;
- d) if the father and mother are divorced, the person to whom legal custody of the person is awarded;
- e) if the father and mother are divorced, separated or unmarried and legal custody has not been awarded, the father or the mother, as the case may be, with whom the person lives or, if he lives with neither and the father is living, the father.

7) RESIDENCE — A place of habitation.

**Section 2. Rules for Determination of Domicile**

1) Domicile is not acquired by mere physical presence in Massachusetts while the person is carrying on a course of study at the University or while the person is engaged in employment for a specified term unless Massachusetts is otherwise the domicile of the person.

2) Domicile at birth may be changed thereafter, by action of the parent in the case of an unemancipated person or by action of the person himself in the case of an emancipated person.

3) A person claiming Massachusetts as his domicile shall furnish evidence to support such claim. The burden of proof in all cases is upon the person making the claim. The following shall be of probative value, although not necessarily conclusive, in support of a claim of domicile within Massachusetts:

- a) Birth certificate;
- b) Motor vehicle registration and/or operator's license;
- c) Voting or registration for voting;
- d) Certified copies of Federal and State Income Tax returns;
- e) Property ownership;
- f) Continuous physical presence in Massachusetts during periods when not enrolled as a student;
- g) Permanent employment in a position not normally filled by a student;

- h) Reliance on Massachusetts source for financial support;
- i) Former domicile in Massachusetts and maintenance of significant connections therein while absent;
- j) Domicile of parent within Massachusetts.

Evidence submitted in support of an assertion of domicile or of parental relationship shall be in such form as the Treasurer of the University or his designee may require. Copies of official records or documents shall be authenticated by a proper officer. Assertions of fact made other than by an authenticated copy of an official record shall be certified as to accuracy and completeness by the person submitting the same.

**Section 3. Proof of Parental Relationship**

A person asserting that he is an emancipated person shall furnish evidence to support such assertion. Such evidence may include:

- a) Birth certificate or any other legal document that shows place and date of birth;
- b) Legal guardianship papers — court appointment and termination must be submitted;
- c) Statements of the person, his parent(s), guardian(s), or others certifying no financial support;
- d) Certified copies of Federal and State Income Tax returns filed by the person and his parent(s);
- e) Where none of the foregoing can be provided, an affidavit of the emancipated person in explanation thereof and stating fully the grounds supporting the claim of emancipation.

**Section 4. Rules for Classification**

1) Every emancipated person applying for admission to the University who has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the date of his application and has established a domicile in Massachusetts shall be eligible for classification as a Massachusetts student for tuition purposes.

2) Every unemancipated person applying for admission to the University, whose

parent has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the date of application and has established a domicile in Massachusetts, shall be eligible for classification as a Massachusetts student for tuition purposes.

3) Every emancipated person seeking a change in classification who has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the beginning date of the academic period for which he registers and has established a domicile in Massachusetts shall be eligible for classification as a Massachusetts student for tuition purposes for such academic period.

4) Every unemancipated person seeking a change in classification, whose parent has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the beginning date of the academic period for which the person registers and has established a domicile in Massachusetts, shall be eligible for classification as a Massachusetts student for tuition purposes for such academic period.

5) A person having his domicile elsewhere than in Massachusetts shall not be eligible for classification as a Massachusetts student for tuition purposes except as herein provided.

6) Any person who is registered at the University as a Massachusetts student shall be eligible for continued classification as a Massachusetts student for tuition purposes (until attainment of the degree for which he is then enrolled) during continuous attendance at such institution.

7) A member of the Armed Forces of the United States and his spouse and unemancipated children shall, while he is on active duty and stationed in the Commonwealth of Massachusetts, be eligible for classification as Massachusetts students for tuition purposes.

#### **Section 5. Change in Classification**

No application for change to classification as a Massachusetts student for tuition purposes submitted later than the first day of classes shall affect a classification during the then current academic period.

#### **Section 6. Penalty for Misrepresentations**

Misrepresentation in or omission from any evidence submitted of any fact which if correctly or completely stated would be grounds to deny classification as a Massachusetts student for tuition purposes shall be cause for exclusion or expulsion from or other disciplinary action by the University.

#### **Section 7. Appeals**

Appeal from a determination denying classification as a Massachusetts student shall be initiated by filing a written request with the Treasurer of the University or his designee specifying the particular grounds for said request.

#### **Section 8. Miscellaneous**

Nothing contained herein shall be construed as limiting or prohibiting the authority of the Board of Trustees to waive or reduce tuition charges.

## **Family Educational Rights and Privacy Act**

### **Policy and Procedures**

A. On January 1, 1975, President Ford signed into law the Family Educational Rights and Privacy Act (Public Law 93-380). This law was developed to allow present or former students, at educational institutions access to educational records kept on them, as well as basic protections of privacy of their records. The law does not apply to applicants seeking admission to the University. The law applies to "educational records" defined as "records, files, documents, and other materials which ... contain information directly related to a student" and "are maintained by an educational agency or institution." The law specifically exempts personal records kept by instructional supervisory, and administrative staff, as long as those records are not accessible or revealed to any other person except a substitute; records of a law enforcement unit; records of employees of an educational institution; and records which are created or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional, and which are created, maintained or used only in con-

nection with the treatment of the student.

The law specifically grants the following rights to access:

1. The right to be provided a list of the types of educational records which are maintained by the institution and which directly relate to students;
2. The right to inspect and review the content of those records;
3. The right to obtain copies of those records, which may be at the expense of the student (but not to exceed the actual cost to the educational institution of reproducing such copies);
4. The right to a response from the institution to a reasonable request for explanations and interpretations of those records;
5. The right to an opportunity for a hearing to challenge the content of those records;
6. If the educational record of a student includes information on more than one student, the right to inspect or review only that part of the material or document which relates to such student.

B. The University develops and maintains several types and varieties of educational records on students. A list of what types of records are maintained by the University, where they are kept, what University official has major responsibility for those records, who has access to those records and why, and what it will cost to obtain a copy of those records, has been developed. A copy of the complete list is available for inspection in the following locations:

Family Educational Rights and Privacy Act guidelines are summarized annually in the University's *Undergraduate Course and Faculty Directory*, which includes information on access to student records, review of such records, challenging their content, hearing and appeal procedures, directory and public information, and other rights and requirements of the legislation. This information is also available at any of the locations listed above.

## Academic Regulations

The University's official "Undergraduate Academic Regulations" are updated and published each term in the *Schedule of Courses* distributed to every student prior to pre-registration. All students are expected to obtain a copy of these regulations and familiarize themselves with the content, since failure to be aware of a provision does not excuse a student from adhering to it. On the other hand, whenever a student feels that some special circumstance warrants an exception to a regulation, that student is encouraged to discuss the situation with his or her academic dean who can help the student work out an alternative.

Some of the more important aspects of the "Undergraduate Academic Regulations" are summarized below and are treated in more detail in the annual *Course and Faculty Directory*.

### Classification of Students

Undergraduates may enroll in one of five categories:

1) **FULL-TIME STUDENTS.** Candidates for a degree, normally designated as a member of a particular graduating class, carrying the minimum load of 12 or more credits each semester.

2) **REDUCED-LOAD STUDENTS.** Permission of the academic dean is required for exemption from the minimum load requirements. The appropriate semester and cumulative quality point requirements for retention still apply and the semester counts as one of the 10 towards graduation.

3) **PART-TIME DEGREE STUDENTS.** The category "Part-Time" is an original admissions category and is not designed as a category into which full-time students may revert for purposes of part-time study. All academic regulations and standards for full-time students, including a 2.0 cumulative average, apply, with the acceptance of the requirement to complete 12 credits per semester to retain good standing and the rule limiting students to 10 semesters in residence. There are two categories of part-time students: Non-classified and special students.

a) **Non-Classified:** Students admitted as candidates for a degree. These students are billed by the credit, with other fees assessed as appropriate.

b) **Special Students:** Limited to University employees, others affiliated with the University and selected others (such as Amherst Regional High School seniors on request).

4) **SECOND-MAJOR STUDENTS.** A student may earn a second major and have it recorded on the permanent record provided that:

a) The second major is completed within the 10 semesters allowed for the completion of all graduation requirements, including the first or declared major;

b) A student files with the Registrar a formal certification from an authorized representative of the second major that all requirements for that second major have been completed;

c) The second major lies in the same school or college as the first or declared major, or, the student obtains formal certification from the academic dean of the second college that all requirements for graduation from that college have been satisfied.

5) **SECOND-BACHELOR'S-DEGREE STUDENTS.** Students may apply for Second-Bachelor's-Degree status in one of the following two categories:

a) Students and graduates of this University who wish to earn a second bachelor's degree must complete a minimum of 30 additional credits, all of which must be in residence (i.e., students who want to work for two bachelor's degrees simultaneously

do not have to complete one and then start the other anew).

- b) Graduates of other institutions who wish to earn a second bachelor's degree at this University must complete a minimum of 45 credits in residence at the University.

Second-Bachelor's-Degree students must apply through the admissions Office and must obtain, prior to acceptance, the support of an authorized representative of a department and an academic dean in the school or college of the proposed second degree;

In order to validate the second bachelor's degree and have it recorded on the permanent record and diploma, a student must obtain a formal certification from an authorized representative of the second major, and a formal certification from the academic dean of the school or college awarding the second bachelor's degree.

#### **Graduation Requirements**

In order to be considered for a baccalaureate degree, a student must successfully attain or complete:

- 1) A minimum of 120 credits, at least 45 of which must be earned in residence. In addition, students must complete their final year in residence.
- 2) A cumulative average of at least C (2.0). The official grading system runs from A (4.0) through F (0.0) and includes such options as Incompletes, Withdrawal, Audits, and Passes. A Pass/Fail option exists.
- 3) A major, constituting intensive or specialized work in a particular department, division, school, or college and consisting of at least 15 semester hours of credit in junior-senior courses in the area of study. The University offers some 100 majors.
- 4) Core or distribution requirements, providing breadth to complement the depth of a major. At least a minimal familiarity with the theory and practice of writing and speaking, and an introduction to the humanities and fine arts, the social and behavioral sciences, and mathematics and the natural sciences.

Various special programs, such as BDIC, University Without Walls, the Honors Program, the Inquiry Program, and Con-

tinuing Education offer special variations of the graduation requirements. The Honors Program in particular offers a number of options to students, including the Commonwealth Scholar Program, for students who wish to have their transcripts identify them as Honors students, the Departmental Honors Program for students who wish to obtain an honors citation from their major department, and Graduation with Distinction for students whose cumulative average and other attainments merit one of the various *cum laude* citations.

## **Housing**

### **Policy**

Recognizing the educational advantages of both classroom instruction and extracurricular experiences, and the great extent to which residence-hall living can contribute, the Board of Trustees of the University has adopted a policy which requires undergraduates to be housed in University residence halls.

### **Exemptions**

Exempt from this policy are married students; seniors; veterans; members of fraternities and sororities who have been authorized to reside in their respective houses (within approved maximum capacities); and students who commute from the homes of their parents (within a 40-mile radius of Amherst).

A student living in a University residence who seeks permission to live off campus should submit the request to the appropriate Area Director. All others should submit similar requests to the Housing Office before appearing on campus for registration. Very few exemptions of this type are granted yearly.

### **Room Assignments**

Residence halls are opened on the day before registration. Upperclass students have the opportunity to select rooms in the spring of the preceding year. Rooms are assigned in order of receipt of proper application. Notification of assignment is made in mid-August.

### **Housing Plans**

The University offers three basic living arrangements: "Traditional" residence halls, residential colleges, and suite- or

apartment-style residence halls. All three offer opportunities for intellectual, cultural, and social activities, and all three include some coeducational units.

The Central and Northeast Residence Areas consist of 21 residence halls housing 4,000 students. A "traditional" residence hall is a house with a long-standing tradition of fellowship, unity, and loyalty, providing opportunity for meaningful friendship in a relaxed atmosphere.

The Orchard Hill Residential College, housing approximately 1,300 students in four coeducational residence halls, represents a conscious attempt to make these residences more private, more quiet, and more academic in tone.

The Southwest Residential College, which houses 5,500 students in both high-rise and low-rise buildings, operates on the assumption that a "college" within a university may function to provide more effective small-group identities and a maximum of contact between the students and members of the faculty.

Special sections of selected courses are designated for residents of both residential colleges. Music and dramatic events, special lectures, and discussions take place in residence halls.

The Sylvan Residence Area offers suite-type dormitories, affording students an opportunity to build close living relationships within small groups by sharing quarters in a suite- or apartment-style arrangement.

#### **Room Furnishings**

Most residence hall rooms are provided with beds, mattresses and mattress covers, dressers, desks, desk chairs, closets, and mirrors. In addition, most residence halls have study lounges, kitchenettes, laundry facilities, and vending machines.

Each student is expected to provide pillow, linen, and blankets.

Most residence halls are equipped with room telephones. Students who choose to live in these residence halls are charged an additional fee per semester for the basic telephone service.

#### **Residence Hall Staff**

##### **AREA DIRECTORS**

Each residence area is administered by an Area Director, to whom all staff personnel in a residence hall report; Area Directors,

in turn, report to the Director of Residential Life. Area Directors plan and direct all student personnel administrative activities for the residence halls in a given campus residential area; supervise the professional staff and student assistants in the residence halls; advise elected officers and committee chairpersons in the residence halls; and provide individual and group advising.

##### **HEADS OF RESIDENCE**

The Heads of Residence are responsible to the Area Directors. They work jointly with the counselors and Area Directors in the operation of residence halls. They provide leadership and support to the residence hall student staff, facilitate the work of elected house government officers and committee chairpersons, serving as resource persons and discussing University expectations with them and provide individual and group advisement.

##### **COUNSELORS**

Counselors receive direct supervision from the Heads of Residence and general supervision from the Area Directors. Their duties include helping to establish a climate in which students feel free to seek assistance and in which the educational goals of the University are emphasized; counseling individual students in personal, social, and academic matters; working jointly with the Heads of Residence and house government in providing for the daily operation of the residence halls; interpreting and maintaining regulations with respect to student life on campus; and assisting the Heads of Residence.

##### **Room Rent**

Residence halls are constructed, equipped, and maintained, at no cost to the taxpayers, through funding provided by bonds issued by the University of Massachusetts Building Authority. Room rents are fixed so as to provide a fund sufficient to pay building and operating costs, i.e., to amortize the bonds. This requires that a student be held financially responsible for room rent once registering for and occupying a room in a residence hall.

##### **Apartments for Married Students**

The University of Massachusetts owns and manages 395 apartments for married students in three apartment complexes: Lincoln (105 units), University (50 units),

and North Village (240 units), all unfurnished except for appliances (stove and refrigerator). Utilities are included with the rent. Assignment of apartments is made through application (earliest application date given first consideration) or according to circumstances with regard to the number of current vacancies. A tenant is expected upon commencement of the lease (one year) to pay a security deposit equal to one month's rent. Applications and specific information may be obtained from the Married Student Housing Office, Whitmore Administration Building.

#### Off-Campus Housing

A card file of off-campus house, apartment, and room rentals is maintained by the Off-Campus Housing Office. Also provided is information about local realtors, garden apartment developments, classified newspaper rentals, and persons seeking roommates. Every effort is made to assist students to obtain off-campus housing; however, a personal visit is usually necessary for the student to review rental listings because of daily changes and because all off-campus arrangements must be made by the parties involved. Brochures and other information may be obtained from the Off-Campus Housing Office, Munson Hall.

#### Insurance

It is not possible for the University to carry insurance which will compensate students or their families for losses suffered on the campus due to such hazards as fire, theft, or water damage.

#### Food Services

The University Food Services cater the food requirements of the University, except those services offered by the Campus Center Complex. Four dining commons serve students on a five- or seven-day meal ticket contract. All freshmen, sophomores, and juniors residing in University residence halls are required to purchase a meal ticket. Either a 10-, 15-, or 19-meal ticket, which is valid for either two or three meals per day, may be selected. Students who are members of fraternities or sororities may be permitted to board at their respective fraternities or sororities, upon receiving written authorization from the Director of Greek Affairs. Those not required to board on campus may eat at a

dining commons on a cash basis; they may purchase one of the regular meal tickets, or they may purchase a five-day single-meal ticket at a lower rate. Snack bar services are available at Worcester Commons and Hampden Dining Commons during regular hours of operation.

## Expenses

### Amherst Campus

Expenses are approximately \$2300 per year for the normally economical student. First-year costs are usually greater than those of the other three years, and there are fewer opportunities for earnings. Therefore, a student is advised to have a definite plan for meeting the expenses of the first year before entering. The following estimate of a year's expenses, based chiefly upon last year's costs, includes only those items which are strictly University-related and does not include amounts for clothing, laundry, travel, etc. These costs vary slightly from year to year. Tuition for residents of Massachusetts is \$345 per year; for others, \$1550.00. The University reserves the right to change any fees without advance notice.

### ESTIMATED ANNUAL EXPENSES — AMHERST (Undergraduate)

|                                                                          |           |
|--------------------------------------------------------------------------|-----------|
| Tuition (Residents of Massachusetts) .....                               | \$345.00* |

## Explanation of Fees and Payments

### IN-STATE TUITION

As a state institution, the University offers the privilege of in-state tuition to all students entering from the Commonwealth. Eligibility for admission under the low residential rate is detailed under "Residence Status."

### ATHLETIC FEE

To support comprehensive men's and women's intercollegiate programs as well as intramural programs.

### PHYSICAL EDUCATION FEE

To support the required physical education program, intramural athletics, and general recreation.

### CAMPUS CENTER FEE

To support the Student Union and the Campus Center and meet the operating costs of their various activities.

### FINE ARTS FEE

To support a varied and comprehensive program of fine arts events for the cultural enrichment and enjoyment of the undergraduate body.

### STUDENT ACTIVITIES TAX

Supports student government and an extensive and varied range of cultural and social activities for students. In addition,

payment entitles each student to admission to many campus events and includes a subscription to the daily student newspaper, the annual yearbook, the student handbook, and a student guide to the campus.

### HEALTH SERVICES FEE

To support the medical, phychiatric, and health services provided by the staff of the Health Center.

### MEDICAL/SURGICAL INSURANCE

This is an optional plan intended to supplement the care received by students at the Health Center. It provides hospital, medical and surgical care on a 12-month basis for injuries or illness during the school year, holidays, summer vacation, and other times when the student is off campus. Students who register for the fall semester have only one opportunity to enter or reject this program each year, at the time of payment of the fall semester bill. It is also offered on the spring semester bill for new spring registrants only. Married students desiring family coverage under the plan now in existence at the University are advised to contact the Student Health Services. All candidates for and members of intercollegiate athletic teams are required by the Athletic Department to subscribe to the supplementary insurance plan.

### COMMENCEMENT FEE

A commencement fee of \$10 is assessed students in September of their senior year, as commencement exercises and events are intended to be self-supporting.

### SPECIAL UNDERGRADUATE STUDENTS

The Special Student tuition rate is \$15 per credit for Massachusetts residents, up to a maximum of \$150, and \$77.50 per credit for nonresidents, up to a maximum of \$775. Every student must pay a \$1 I.D. card and a student taking three or more courses a semester must pay a Campus Center fee and a health fee. (Available only to staff and spouses of employees and full-time students).

### CREDIT BY SPECIAL EXAMINATION

Any student receiving credit by special examination must pay \$5 per credit before the examination may be taken. This fee is nonrefundable.

### SCHOLARSHIP PAYMENT

Known scholarships are shown on the fee

bills. If such items are not shown, deductions may not be made from the bill until satisfactory evidence has been presented to the Bursar's Office by the recipient.

#### **Payment Due Date**

All charges for tuition, fees, board and room rent are due and payable prior to the date of registration of each semester. Bills will be rendered in advance with due date shown and payment may best be made by mail. No student may register until all University charges are paid.

#### **Late Payment and Registration**

Any student who does not make payment of semester charges by the date specified may be required to pay a late payment fee of \$25.00.

#### **Refunds**

##### **TUITION AND FEE REFUNDS**

A student who leaves the University for any reason, except as specified below, before a semester is completed will be granted a pro rata refund of tuition and fees. A student who makes an advance payment and then for any reason does not attend any part of the next semester or term at the University will be given a full refund of tuition and fees. The \$15 matriculation payment required of new students is not refundable.

Refunds are first applied to reimburse scholarship or loan funds (up to the full amount), and any remaining amount is refunded to the student or parent. A student who is suspended or expelled from the University for disciplinary reasons forfeits all rights to a refund.

##### **Refund Schedule**

##### **Regular Term**

- a. Within the first two weeks from the beginning of semester or term (Registration Day) — 80%.
- b. During the third week — 60%.
- c. During the fourth week — 40%.
- d. During the fifth week — 20%.
- e. After the fifth week — no refund.

##### **Summer Session**

- a. During the first week — 60%.
- b. During the second week — 20%.
- c. After the second week — no refund.

##### **ROOM RENT AND BOARD REFUNDS**

A student who has made an advance payment of room rent will be granted a full refund of prepaid room rent if he or she

fails to attend any part of the next semester or term or does not reside in a residence hall or other housing. Prepaid board will be refunded on a special per diem basis.

Any student who occupies his/her assigned accommodations and subsequently leaves the University prior to the end of the first full class week shall automatically be charged a minimum of \$100 for his/her room. Any student who leaves the University during the second through fifth weeks shall be charged \$100 plus 20% of the remaining balance for each week or part thereof. No refunds will be made after the fifth week of the academic semester. Refunds will be made during the refund period only to students who officially withdraw from the University through the Registrar's Office and according to the Registrar's official withdrawal date. The Dean of Students' Office will be authorized to make exception to the above only for reasons of involuntary entry into military service or for reasons of 'extreme emergency'. Any exception made, however, shall not apply to the \$100 minimum charge which shall be levied in all cases automatically.

## **Student Personnel Services**

Student Personnel Services comprise a number of agencies concerned with non-academic activities — residence halls, health, counseling, student activities, security, admissions, records, career planning, financial aid, and related services.

The Vice Chancellor for Student Affairs is responsible for the overall direction for departments providing services which, in addition to the above, provide support services for the entire campus community.

Student Personnel Services not described elsewhere in this Bulletin include the following:

The Housing Office has responsibility for the supervision of residence hall room assignments and room changes and serves as a central source of information for off-campus housing listings.

The International Programs Office assists and coordinates international programs, including the study abroad pro-

grams of the University of Massachusetts. The office also has information on low-cost international travel, international student identity cards, financial aid for study abroad, and work opportunities overseas.

The Foreign Student Office offers assistance to foreign students, faculty, and staff and should be consulted in regard to all matters pertaining to their official immigration status while in the United States. The Foreign Student Office is part of the International Programs Office.

The Admissions and Financial Aid Office is responsible for all administrative procedures with respect to undergraduate admissions to the University, including liaison with high school guidance counselors, Community College staff personnel, and other admissions officers for transfer students; it also passes on re-admission of returning and re-entering students and admissions standards set in coordination with the Vice Chancellor for Academic Affairs and academic departments.

The Registrar's Office is responsible for registration (enrollment) and matriculation of undergraduate students; administrative procedures relating to course loads, courses of study, withdrawals, grade reports, and transcripts; and maintaining the permanent academic record cards.

The Office of Transfer Affairs is a resource center for all matters pertaining to the transition process of students entering the University from other institutions of higher education.

The Student Development Center provides personal, social, educational and career counseling services to present and past students. A credentialing service provides a place for each student to establish and maintain an up-to-date file of personal records, (including registration information), a developmental resume, letters of recommendation, and other supportive documentation. Copies are sent to prospective employers upon their request (no charge) or when initiated by the candidate (a nominal charge). The Center is an important source of information and consultation on teacher certification requirements for students planning to teach in public schools.

The Department of Public Safety com-

prises the University Police, the Security Guard Force, and the University of Massachusetts Police Training Institute. It works closely with the Town of Amherst Police Department, the Massachusetts State Police, and other state law enforcement and public service agencies.

The Campus Security Force is responsible for the security of University property, provides protection of life and liberty, parking control, emergency transportation of sick and injured, and guard services. In accordance with provisions of the Code of Student Conduct, student ID cards or other means of identification must be shown upon request to any properly identified member of the security department, to enable the officer to perform his/her assigned duties.

University police officers are responsible for the public safety of all persons and property within the physical boundaries of the University campus.

## Health Services

The University Health Services is organized to provide a high quality comprehensive health program for the University community. Each student pays a health fee which provides a wide range of prepaid services in campus facilities. In addition, a number of other services are available on a co-payment basis.

Physicians, nurse practitioners, and other health professionals work as a team to provide medical care to students at the Health Center. Complete facilities located at the Center include x-ray, laboratory, pharmacy, and physical therapy facilities, as well as an inpatient service for those in need of hospitalization. Specialty services such as allergy and eye care clinics are also provided, as are consultation in orthopedic surgery, and obstetrics and gynecology.

All students submit health data upon entrance to the University. Any student who is under medical supervision prior to entrance is urged to have his/her physician write to the Health Services, giving reports and instructions in appropriate detail. In brief, the Health Services attempts to provide each student with a coordinated and comprehensive program of

health supervision formerly provided by the family physician.

The Dental Health Division provides emergency dental care, routine oral examinations, and dental education as part of the health fee. Some services, such as cleaning and restorative care, are provided on a modified fee-for-service basis as time permits.

Recognition of the specific emotional needs of students in an educational environment is recognized by the provision of an active mental health program. The Mental Health Division provides personal and couples counseling, individual and group therapy, and community consultation.

All visits to the Health Services are treated as confidential. No information is released without the written permission of the student.

The Health Education Division offers programs aimed at the development of attitudes and behavioral patterns which promote healthful personal and community living. Programs include workshops, discussion groups, peer training programs and consumer activities in such areas as sexuality, nutrition, alcohol and first aid.

The Environmental Health and Safety staff operates to ensure a safe and healthful environment for all who live or work on campus.

The Student Advisory Board works with the Health Services staff in reviewing policy, evaluating services and initiating and developing new programs. Students are urged to participate.

A supplementary insurance plan has been developed to provide for that hospital and surgical care not available at the Health Center. This optional program can be elected in September only. The insurance provides coverage for twelve months. All candidates for and members of inter-collegiate athletic teams are required to subscribe to this supplementary insurance plan.

## **Student Activities**

### **Campus Center Complex**

The Campus Center Complex is composed of the Murray D. Lincoln Campus Center, the Student Union Building, and the Parking Garage. It houses the offices of the

Campus Center Director and his staff, the Student Activities staff, the University Ombudsman, the student government staffs, and RSO groups.

Service departments of the complex include the University Store, the Campus Assistance Center, cashier's office, U.S. Post Office, barber shop, games area, music library and listening lounge, sweet shop, print shop, media services, Campus Travel Center, and overnight accommodations with parking facilities and food services (four cafeterias and the Top of the Campus restaurant and cocktail lounge). Meeting rooms, lounges, reading rooms, and art galleries are available for student and general campus use.

The Campus Center Governing Board, comprised of undergraduate and graduate students, determines policy for the operation of the Center. The Program Council, a standing committee of the Board composed wholly of students, selects, plans, and executes all Center activities in art, music, dance, movies, special events, etc. Any student may apply for membership.

Construction and operating costs are met from student fees and income generated from general operation, particularly of the Food Service Department, the University Store, and Overnight Accommodations. This is a major factor in maintaining student fees at a reasonable rate.

The Campus Center hosts programs sponsored by the Division of Continuing Education, the alumni of the University, and many service organizations. The Complex is also used heavily for conferences, institutes, workshops, and short courses.

### **Student Activities Office**

Headquarters for Recognized Student Organizations (RSO), the Student Activities Office in the Student Union provides program resource materials, counseling on program planning, advice on program selection and procurement, and assistance on budgeting, purchasing, procurement of campus support services, contracts, and other business procedures.

The RSO staff provides to student groups a computerized banking and book-keeping service and offers advice on financial and business concerns such as bidding, insurance, budgeting and accounting. The staff also includes a Crafts

Adviser who operates, manages, and advises students in the Student Union Craft Center. Most members of the Student Activities staff are Notaries Public for the convenience of students, particularly for absentee balloting.

The University expects that no student will be excluded from membership in any club, society, fraternity, sorority, or other organization for reasons of race, creed, color, sex, or national origin except those instances wherein groups are specifically exempted by federal law. Campus groups belonging to national bodies which openly or covertly endorse such discrimination are in violation of University principles. Alleged violations are to be reported to the Dean of Students. There are over 500 student organizations ranging in interest from political, religious and cultural, to social, professional, and recreational. Some of these include:

#### **Media**

**WMUA** — The campus radio station (91.1 FM), owned and operated by students.

**Black Mass Communications** — Black students' media group designed to bring black news, current events and culture to the community.

**The Daily Collegian** — One of the largest student newspapers in the country.

**Drum** — A Black literary magazine, published two or more times per year. It features art, fiction, essays and commentaries.

**INDEX** — The University undergraduate yearbook; one of the oldest and largest in the nation.

**Spectrum** — Published about two times a year, *Spectrum* features poetry, fiction, drama, art, photography, etc.

**Shorthorn** — The Stockbridge College student newspaper, published weekly or bi-weekly.

**STOSAG** — The Stockbridge College yearbook published annually.

#### **Professional and Special Interest Clubs**

Approximately fifty professional clubs established in connection with the various major courses of study, stimulate students' professional interest in their chosen fields and afford opportunity for discussion of technical subjects of mutual interest.

Special interest groups cover an even wider range of interests, in many cases offering learning experiences in subjects not included in the academic areas of the University (e.g., religion, politics, sports, hobbies, etc.).

#### **Social Action Groups**

**Belchertown Volunteers** — Belchertown Volunteers work with the mentally retarded at the Belchertown State School.

**Northern Educational Services** — NES volunteers tutor English-speaking inner-city children, mostly in reading and math.

**Poverty Committee** — Deals with the problems of welfare, united mine and farm workers support, National Alliance Against Racism and Oppression, etc.

**The Boltwood Project** — Funded by the Student Senate, its members work with the mentally retarded at Belchertown State School.

**Room To Move** — Drug counseling drop-in center, cooperating with the Health Services.

**Coalition for Environmental Quality (CEQ)** — Works toward mobilizing constructive and informed activism on environmental matters.

**Massachusetts Public Interest Research Group (MassPIRG)** — Modeled after the Ralph Nader organization in Washington, and funded by college students.

**The University and State Communications Council** — An undergraduate student group which works extensively with the University administration, the State Legislature, and the media in an effort to open and develop channels of communication between students and the people involved in these three areas.

In addition to these groups there are other special interest professional, political, religious, social action, educational, cultural, governmental, recreational, and media groups, plus honor societies, residence hall groups, fraternities, and sororities.

#### **Non-Traditional Student Assembly and CAOS**

The Non-Traditional Student Assembly is a fairly new RSO group formed in response to the recent influx of older undergraduate students.

An older student is any person who has not come to college directly from high school. Membership in the NTSA is automatically extended.

CAOS (Counselling Assistance for Older Students) is an outreach program of the NTSA. CAOS provides counsellors for academic and personal problems ranging from pre-registration course selection to financial aid, house hunting and psychological counseling. A staff of trained volunteers and paid assistants is available Monday-Friday from 9-4 in the CAOS office, 308 Student Union.

#### **Programming Organizations**

*Distinguished Visitors Program (DVP)* — Supported by student tax funds to bring to campus nationally and internationally known persons to speak on domestic and international affairs, the sciences, the humanities, and the arts.

*Campus Center Program Council* — Responsible for major programming in the Campus Center/Student Union Complex, including concerts, lectures, films, art exhibits and acquisitions, recreational activities, crafts, etc.

#### **Student Honor Societies**

*Adelphia* — Men's non-academic honor and service society (senior and junior classes).

*Mortar Board* — National honor society for senior women.

*Scrolls-Maroon Key* — Sophomore honorary-service society.

*Revelers* — Group of upperclassmen who promote and encourage interest in campus activities.

*Alpha Phi Omega* — National service fraternity.

*Gamma Sigma Sigma* — National service sorority.

*Delta Sigma Rho* — *Tau Kappa Alpha* — National honorary forensic fraternity.

#### **Academic Honor Societies**

*Phi Beta Kappa* (arts, humanities, and sciences)

*Phi Kappa Phi* (all fields of study)

*Sigma Xi* (pure and applied science)

*Sigma Gamma Epsilon* (earth sciences)

*Omicron Nu* (home economics)

*Phi Tau Sigma* (food science)

*Phi Eto Sigma* (freshman men, all fields of study)

*Tau Beta Phi* (engineering)

*Beta Gamma Sigma* (commerce and business administration)

*Alpha Lambda Delta* (freshman women, all fields of study)

*Eta Kappa Nu* (electrical engineering)

*Alpha Zeta* (agriculture)

*Xi Sigma Pi* (forestry)

*Alpha Pi Mu* (industrial engineering)

*Kappa Delta Pi* (education)

*Phi Sigma Alpha* (political science)

#### **Student Government**

The Student Government Association (SGA) works for fundamental academic and social reform on campus while providing services to students, including a lecture-note program, book loans, bus service, course description guide, attorney for students. The SGA is working toward full student self-determination in social and academic life.

All undergraduates are members of the SGA and are eligible to join its activities. The Student Senate is the legislative arm of the SGA. The seven area governments determine policies in their respective areas.

The student role in running the University has increased greatly in recent years. Students interested in University reform should contact the SGA President.

#### **Fraternities and Sororities**

Men's social fraternities include Alpha Tau Gamma (Stockbridge School), Beta Kappa Phi, Delta Chi, Kappa Sigma, Lambda Chi Alpha, Phi Mu Delta, Alpha Epsilon Pi, Phi Delta Theta, Q.T.V., Zeta Psi, Phi Sigma Kappa, Sigma Alpha Epsilon, Sigma Phi Epsilon, Tau Epsilon Phi, Theta Chi, and Zeta Nu. Women's social fraternities include Alpha Chi Omega, Chi Omega, Iota Gamma Upsilon, Kappa Alpha Theta, Kappa Kappa Gamma, Lambda Delta Phi, Sigma Delta Tau, Sigma Kappa, and Sigma Sigma Sigma. There is one co-ed fraternity, Sigma Alpha Mu.

A Greek Council consisting of the presidents and one representative of these fraternities is the area government for this residential area. Each of the fraternities

owns its own house, and the members are responsible for the daily maintenance, financial management, meal planning, governing, and organizing of special events or programs.

#### **Music Organizations**

The University Symphony Orchestra, the bands, and the choral organizations are in the Department of Music. Membership is open to all students, faculty, alumni, and others in the community.

#### **University Theater**

The University Theater offers public performances of plays during the regular academic year winter season. Productions grow out of study projects as part of Department of Theater's curriculum, and are primarily the work of graduate and undergraduate theater majors. However, the Department welcomes non-majors and persons from the University community at large. Try-outs for all productions are announced publicly. The new Fine Arts Center includes a studio theater, a main stage proscenium theater, and fully-equipped shop and rehearsal areas.

#### **Debate**

The University Debate Union is an academic and co-curricular activity of the Department of Communication Studies. Each year, debate teams research and debate an intercollegiate proposition dealing with an important national or international problem. The debators attend tournaments at colleges and universities throughout the United States.

#### **Arts Council**

The University of Massachusetts Arts Council is composed of six undergraduate and three graduate students, six faculty members and one non-faculty staff member. Student and faculty members are appointed by their respective Senates. The staff member is appointed by the Council.

The Arts Council, together with its professional staff, develops and administers a varied series of professional entertainment for the University community including Dance, Theater, Chamber Music, Opera, Ballet, etc. The Arts Council endeavors to bring to the University some of the world's finest performing organizations and artists.

The University of Massachusetts Arts Council also supports the University Art

Gallery. The Gallery is open year round and provides exhibitions of traveling shows.

A schedule of Arts Council events may be obtained by contacting the Council office.

#### **Athletics**

The University is represented by teams in football, soccer, cross country, basketball, swimming, wrestling, indoor and outdoor track, hockey, golf, tennis, baseball, lacrosse, gymnastics, skiing, and crew. The women are represented in nine intercollegiate sports: basketball, field hockey, gymnastics, skiing, softball, swimming, tennis, volleyball, and crew.

The University also sponsors a broad program of men's and women's intramural activities. Team sports available each year include touch football, powder puff football, basketball, bowling, volleyball, soccer, badminton, softball, horseshoes, handball, bicycle racing, and tug-o-war. Individual activities include cross country, squash, paddleball, wrestling, wrist-wrestling, swimming, table tennis, weight lifting, and tennis.

The University holds membership in the: Yankee Conference, National Collegiate Athletic Association, Eastern College Athletic Conference, New England College Athletic Conference, Association of Intercollegiate Athletics for Women, Eastern Association of Intercollegiate Athletics for Women, and Massachusetts Association of Intercollegiate Athletics for Women.

#### **Alumni Association**

The Associate Alumni is the general alumni organization of the University, with headquarters at Memorial Hall. The *Alumnus* magazine is published by the University seven times a year.

#### **Religious Activities**

The University gives support to the religious life of its students by affording the use of University facilities for student groups of all faiths. It cooperates with the official agencies of the three faiths most largely represented at the University by recognizing the contributions of their privately supported chaplains and by giving them facilities and privileges for their work.

Other religious groups also meet regularly on campus.

### **Motor Vehicles**

All student, faculty, and staff motor vehicles must be registered with the Parking Office, Room 1, Munson Hall.

Any student may be permitted to have a motor vehicle on campus provided it is registered with the Parking Office and complies with published University regulations.

## **Financial Aid**

### **General Information**

Financial aid consists of scholarships and grants, self-help in the form of loans, and employment. Financial aid is offered to those students who cannot, through their own and their parents' reasonable efforts, meet the full cost of a college education.

Financial aid programs are funded from a number of sources: State and Federal appropriations, private philanthropy, University Alumni and others. Each student applicant is automatically considered for every University-administered program for which he/she may be eligible. Students desiring further description of specific financial aid programs may obtain information sheets from the Financial Aid Office, Room 243, Whitmore Administration Building.

### **Application Procedures**

An application for financial assistance consists of two forms: A University Aid Application and the Parents' Confidential Statement. (Student Financial Statement for students who meet the legal criteria for financial independence.) Both forms must be submitted before an application will be processed.

### **INSTRUCTIONS FOR HIGH SCHOOL SENIORS**

All high school seniors applying for financial assistance must file the Parents' Confidential Statement. The deadline for priority aid consideration is March 1 of their senior year. Applications received after that date are considered late and will be processed only if funds remain.

**Special Notice:** The Basic Educational Opportunity Grant Program (BEOG) is a new Federal grant program. Maximum awards under this program could be as high as \$1400 per year. The BEOG program is an entitlement program under

which all eligible applicants who demonstrate financial need according to the Federal guidelines will receive Basic Grants. Applications should be available after February 1 through your high school. (If not available through your high school contact this office.)

*Applicants for Financial Assistance from the University of Massachusetts Amherst MUST Apply for a Basic Grant.*

### **INSTRUCTIONS FOR ALL OTHER APPLICANTS**

The priority deadline for financial assistance for all other students is April 30 preceding the academic year for which aid is requested. Students who feel that they are financially independent of their parents should contact the Financial Aid Office to see if they are eligible to file a Student's Financial Statement.

### **Disbursing of Awards**

All financial assistance except employment earnings are paid in installments at the beginning of each semester in the form of a credit on the recipient's bill.

### **Types of Aid**

#### **SCHOLARSHIPS AND GRANTS**

The office of Financial Aid administers more than 20 scholarship and grant programs with differing eligibility criteria. Residency, academic average, field of study and parental income may determine eligibility for specific programs. Scholarships normally range from \$200 to \$2000.

#### **LOANS**

##### *National Direct Student Loan Program*

A student may borrow up to \$2500 per year under this program. Interest at 3 percent begins nine months after completion of the program; the loan is to be repaid within 10 years. Because of the amount available, this program is necessarily limited and selective.

##### *Higher Education Loan Plan*

The student may obtain a loan of up to \$2500 per year from the bank of his or her choice through the Higher Education Loan Plan.

#### **EMPLOYMENT**

Under the College Work-Study Program.

#### **Benefits for Veterans and Their Dependents**

Veterans or their dependents eligible for educational benefits under the Veter-

ans Bill, P.L. 358, the Disabled Veterans Bill 894, or the War Orphan Bill 634, should contact the Veterans Affairs Office at the University 30 days before their classes begin for regular enrollment or up to 120 days before classes for Advancement Payment of their checks.

Veterans whose home of record was Massachusetts when they entered the Service may be eligible to apply for a state tuition waiver.

## General Services

### University Library System

The University Library System is composed of the main University Library, a 28-story building which opened in the summer of 1973, and several branch libraries, of which the two principal ones are the Morrill Biological Sciences Library and the Physical Sciences Library. Present holdings include over 1.2-million books, periodical volumes and government documents, and over 258,000 microforms. More than 10,000 periodicals are currently received.

### The University Press

The University of Massachusetts Press, established in 1964 as the book publishing division of the University, publishes scholarly and artistic works which make substantial contributions to the community of learning.

### Language Laboratories

The James W. Butler Language Laboratories provide special study facilities to students enrolled in foreign language courses. Lesson tapes and RAL program masters are produced, transcribed, and programmed in the Recording Studio and the Transcription Center. A highly trained technical staff is available at all times.

### Office of Public Affairs

The Office of Public Affairs serves as liaison between the campus community and the general public, and as an internal information center for the benefit of faculty, students, and administration. Through its six departments — Editorial Services, Graphic Design and Production, News Bureau, Creative Services, Photographic Services and Radio Station WFCR — the office supplies information to all communications media as well as to agen-

cies of government, schools and other organizations, and individuals.

### Office of Budgeting and Institutional Studies

The Office of Budgeting and Institutional Studies is responsible for the coordination of campus fiscal planning, analysis, and information reporting.

### Other Facilities and Services

Audiovisual Center  
Cooperative Extension Service  
Cooperative Fishery Unit  
Cooperative School Service Center  
Cooperative Service Bureau  
Cooperative Wildlife Research Unit  
Institute for Man and Environment  
Institute of Agricultural and Industrial Microbiology  
Labor Relations and Research Center  
Massachusetts Agricultural Experiment Station  
Massachusetts Population Research Institute  
Northeast Regional Media Center for the deaf  
Polymer Research Institute  
Program in Urban and Regional Problems  
Technical Resource Service  
University Computing Center  
Water Resources Research Center

### Five College Courses

Amherst, Hampshire, Mount Holyoke, and Smith Colleges and the University of Massachusetts/Amherst combine their academic activities in selected areas for the purpose of extending and enriching their collective educational resources. Certain specialized courses not ordinarily available at the undergraduate level are operated jointly and are open to all. In addition, any qualified student in good standing at any of the institutions may take a course without cost at any of the others, if the course is significantly different from any available to him or her on the home campus. The course must have a bearing on the educational plan arranged between the student and the adviser. Approval by the student's adviser and Academic Dean of the College at the home institution is required. Permission of the instructor is required for students from other campuses.

Students should apply for interchange

courses at least six weeks prior to the beginning of the semester. Free bus transportation among the five institutions is available for interchange students.

Students interested in such courses will find current catalogs of the other institutions in departmental offices, the University Library, or the Office of the Registrar. Applications may be obtained from the CASIAC Office, E-22 Machmer.

#### **Regional Student Program**

The University participates in a regional cooperative program administered by the New England Board of Higher Education. This program, known as the Regional Student Program, permits qualified residents of the New England states to study with in-state tuition and admission privileges at any of the state universities, the Lowell Technological Institute, and the public two-year colleges and technical institutes in a wide variety of study areas.

The purpose of the program is to expand opportunities for higher education for New England residents by making available on an equal basis to all those courses not commonly offered at every institution.

Detailed information about this exceptional program can be obtained from any guidance counselor or from the New England Board of Higher Education, 20 Walnut Street, Wellesley, MA 02181.

#### **Pre-Law Advising Program**

The Pre-Law Advising Program provides information on the nature of legal education, admission to law school, and career opportunities in the legal profession. Interested students are urged to register with the Pre-Law Adviser, E-22 Machmer.

#### **Physically Disabled Students**

The University is becoming more and more accessible to academically qualified physically disabled students. Although some architectural barriers remain, most disabled persons can navigate the campus with little difficulty. Early registration, preferential scheduling, orientation programs, housing assistance, a reader's directory for the blind, pre- and post-admission counseling are a few of the services available. Admission to the University is based entirely on the academic qualification of the applicant. Admission procedure remains the same for all applicants, regardless of disability.

For further information, contact: Office of Handicapped Student Affairs, 229 D Whitmore Building, Tel. (413) 545-0892.

## **Special Academic Programs**

### **Bachelor's Degree With Individual Concentration**

The Bachelor's Degree with Individual Concentration (BDIC) is a four-semester program in individualized study supervised by an interdisciplinary faculty committee rather than by one of the departments, and leads to either a Bachelor of Science or Bachelor of Arts with Individual Concentration. Work for this degree, usually beginning with the junior year, takes the place of a conventional major and provides students with an opportunity to pursue an area of study not otherwise available at the University. The program must be interdisciplinary, unavailable as such through an existing undergraduate major, and make full use of existing University resources. In developing their concentrations, students may combine courses from departments or schools within the University, from among the Five Colleges, and from limited amounts of independent study and/or internship opportunities.

The course of study is developed by the individual student in conjunction with the full-time University faculty member serving as his/her sponsor, and submitted to the BDIC Supervising Committee for approval.

#### **Application to BDIC**

Students with at least four semesters remaining at the University should initiate the application process with a BDIC counselor early in the second semester of their Sophomore year.

#### **Colloquia**

Colloquia are one-credit courses which seek to augment the academic offerings of departments and schools. They meet for a minimum of 16 hours per semester and require roughly as much work as one third of an average introductory course. They are held in residence areas and are generally proposed and taught by students with faculty sponsorship and approved by the

student/faculty academic policy committees of each residential area.

### **Continuing Education**

The Division of Continuing Education helps meet the educational needs of all part-time undergraduate students; manages all conferences, institutes, workshops, short courses, and clinics on the Amherst campus and throughout the Commonwealth sponsored by the University; and designs special educational programs for citizens of the Commonwealth and the region who are not regular full-time students at the University. The Division has its own undergraduate degree program. The Bachelor of General Studies requires 120 hours of credit, up to 75 of which may be transferred from other institutions. Students may be admitted to evening courses or to day courses on a space-available basis. Inquiries may be directed to the Director of the Division, Hills House North.

### **Everywoman's Center**

The Center serves the Amherst campus and the surrounding community as a headquarters for women's issues and concerns. It operates an extensive academic, personal, and vocational counseling service; maintains a comprehensive library of books, periodicals, and other publications relating to the feminist movement; maintains listing of career opportunities for women; sponsors Project Self — non-credit workshops which explore what it means to be a woman in today's world; and conducts workshops and support groups on a wide range of topics related to women's issues.

### **Global Survival Freshman Year Program**

The Global Survival Freshman Year Program is multi-disciplinary and problem-centered, focusing on five major areas of concern: war, peace and world order; cross-cultural communication and conflict; environmental deterioration and economic development; population; and resources. The faculty is drawn from various departments on campus and works closely with students in courses, field experiences and independent study. Participants take a combination of University and Global Survival courses for a total of 15 credit hours per semester. Features of

the program include identification with a small number of freshmen; close relationship with faculty; an opportunity to explore crucial world issues in an integrated format; and an opportunity to pursue independent work in the freshman year.

### **The University Honors Program**

The Honors Program affords highly motivated students of proven ability the opportunity of taking University courses more intensively and in closer contact with professors and other students. It offers an alternative to the core requirement system and allows students more freedom in choosing their course of study.

Any student who has completed one semester's work at the University, including one Honors course, may be eligible for admission. However, since juniors and seniors are now expected to go through a departmental Honors program, evidence of their major department's willingness to accept them may be necessary. The student must obtain an application form from the Honors Office, in E-23 Machmer, must have on file in the Honors Office or obtain, an evaluation by the professor of his or her performance in the Honors course previously taken, and must obtain a copy of his or her transcript from the Records Office in Whitmore (which can be obtained free if the candidate says it is for the Honors Office). When the Honors Office has received these three items, an interview with the candidate will be arranged, and if the student and the interviewer agree that it is in the best interest of the student to join that program, the student will be admitted.

While Commonwealth Scholars are exempted from regular University core requirements, they must satisfy the requirements of their major and must take one Honors course every semester in residence and in the program, and must take a minimum of six Honors courses.

A Commonwealth Scholar must also maintain a cumulative average of at least 3.0 and follow the procedural requirements of the program.

### **DEPARTMENTAL HONORS**

Any student who wishes to be eligible to graduate with an Honors designation of *Magna Cum Laude* or *Summa Cum Laude* must pursue a Departmental Honors Pro-

gram. A student must usually have a cumulative average of 3.2 or higher to be eligible for a Departmental Honors Program. Any student interested in pursuing Departmental Honors should confer with the Honors Coordinator of his or her major field.

#### **Legal Studies Program**

The Legal Studies Program provides introductory and advanced courses about the nature and function of law, presents field work and research opportunities, conferences, practica, and special courses about law for the University community, and enables a limited number of students to major in Legal Studies. The major is individually designed around a basic core of study. This is not a "pre-law" preparatory program; it is an interdisciplinary exploration of the phenomena of law, power, and authority, as manifested in culture and society.

#### **Orchard Hill Residential College**

Orchard Hill Residential College is a unit of four residence halls offering distinctive educational and cultural programs for students seeking an alternative college experience. Orchard Hill offers a substantial number of 3-credit interdisciplinary courses each semester and an increasing percentage of these satisfy University core requirements. In addition, the Hill offers a large variety of student initiated colloquia, sponsored by faculty members and supported by the Academic Affairs Office.

The program focuses on articulation of student needs and concerns (life planning, career decisions, and the individual's own program of education). Special seminars and courses reflect major areas of social and personal concern. For more information, inquire at 103 Eugene Field House, Orchard Hill.

#### **The Center for Outreach Programs**

Outreach functions as a clearinghouse for off-campus community service. Its two chief components include: a) Student Volunteer Services, a student initiated and student administered program, which places students and other interested persons in over 75 community service organizations in western Massachusetts for five to 20 hours a week, usually without pay or academic credit; and b) a student internship program which provides students

with the opportunity to earn up to 15 credits while participating in various federal, state and local community service programs for a semester.

#### **Overseas Study**

The International Programs Office may be consulted for specific information on overseas study opportunities.

**Freiburg Program.** In cooperation with the University of Freiburg, Germany, the University of Massachusetts operates its year-long Freiburg Program. Students enrolled in the Program are regularly enrolled students of the University of Freiburg, and take courses in a wide range of social science and humanities courses. The Freiburg Program is not restricted to students concentrating in German. Enrollment is limited to graduate students and superior upper division undergraduates with fluency in German.

**Field Program in Anthropology, Europe.** A four- or seven-month field program in Europe open to advanced undergraduate students in anthropology during the spring or summer.

**Grenoble Program.** The University of Massachusetts Semester in Grenoble Program is offered in cooperation with the Comité de Patronage des Etudiants Etrangers de L'Université de Grenoble and is open to approximately 40 students. Students with little or no prior knowledge of the language may pursue studies in the French language and civilization at the elementary level. Majors and other proficient students pursue courses in language, literature, and civilization at the middle or upper level depending on placement by examination.

**Academic Year Program, Keele University, England.** Through an exchange program, several undergraduates spend their junior or senior years at Keele University, Staffordshire, England. Open to superior students concentrating in social sciences, humanities, and science.

**Academic Year Program, Chelsea College of Physical Education, England.** A junior year program for undergraduate women majoring in physical education.

**Academic Year Program, University of Victoria, British Columbia.** An undergraduate student exchange program with the University of Victoria, British Columbia, Canada, permits several under-

graduates each year to spend their junior or senior years at that university.

Other academic year programs through which undergraduates study abroad include student exchanges with the University of Helsinki, Finland; the University of Lagos, Nigeria; University College, Dublin; The University of Lancaster, the University of Sussex, North East London Polytechnic, all in England; the University of Stirling, Scotland; and the University of the West Indies at its Jamaica campus. Semester field work programs include Social Work Internships in England and practice teaching at the Bi-national Center, Bucamaranga, Colombia.

**Summer Programs.** Summer study programs concerning which information may be secured from the International Programs Office and the Summer Session Bulletin, include offerings in Bologna, Italy; Freiburg, Germany; Pau, France; Oxford, England, and St. Vincent, West Indies, the latter in anthropology.

#### **Project 10**

Project 10 is a semi-autonomous experimental program based in Pierpont House in Southwest Residential College. The Project's members are drawn from students and faculty of the University. They participate in a wide variety of seminars, workshops, and tutorials each semester, and attempt to explore different ways of learning and different options on credits and grading. The Project is an attempt to build a living-learning community which can foster and sustain individual growth and personal expression, while its members learn how to make decisions, how to measure learning, and how to accept accountability to others.

A special program option within Project 10, the Inquiry Program, offers an alternative to the general University degree requirements. It is an alternative to the ordinary approach to separate courses and credits in the freshman and sophomore years. In fact, in Project 10 there is nothing called the freshman or sophomore class. Students individually negotiate plans of study for the first 60 credits of undergraduate work. For more information contact the Project Office in Pierpont House, Southwest Residential College.

#### **Rhetoric**

The Rhetoric Program offers a flexible and

varied experience for students fulfilling the University's core requirement. The requirement states that all students (with certain exceptions for advanced placement) will take two courses in Rhetoric, one of which must be Rhetoric 100 or Rhetoric 110. Through an interdisciplinary effort, involving teachers from English and Communication Studies as well as other departments, the Program seeks to give students help and practice in many kinds of writing and oral communication. There is no undergraduate major in Rhetoric.

#### **Southwest Residential College**

Southwest Residential College, the largest residential area in the University, offers a diverse educational program open to all its students. In special cases, non-Southwest students may also enroll. These courses are offered directly in the dormitories or in one of the several educational Centers. The program consists of experimental 3-credit courses designed to meet the needs of the Southwest community and to supplement regular University offerings. It also includes special cross-listed sections of departmental offerings and 1-credit, student-taught "colloquia" offered during the semester and lasting usually for eight weeks. The course listings are published each semester in a brochure available in the Southwest Academic Affairs Office, John Adams Lobby, during the pre-registration and registration periods.

Southwest recognizes two crucial areas of concern: racism and sexism. These issues have been made the express priorities of this residential area, approached through specific courses, through counselor training and staff training, and through new programs in Urban-Community Studies and a Transitional Year Program for first-year students.

#### **Summer Session**

The Summer Session at the University is open to freshmen who wish to begin their college education immediately upon graduation from high school, to seniors completing requirements for September graduation, to other regular University undergraduates, and to special students currently enrolled in other colleges. A bulletin describing the summer program is available from the Registrar's Office in April of each year.

Students who begin their college careers in the summer are advised to plan their programs carefully with the aid of advisors.

#### **University Without Walls**

The University Without Walls program is one of 32 such units across the country developed under the sponsorship of the Union for Experimenting Colleges and Universities. The program enables students to earn a B.A. or B.S. from the University through a totally individualized learning program allowing independent study, internships, field experiences, credit for significant past learning experience, and other self-directed projects outside the classroom and campus. It welcomes participants of all ages and diverse backgrounds and interests, especially those who would not normally have access to the University but who are highly motivated and self-disciplined enough to succeed in directing their own learning projects. Upon admission to the program, students choose a faculty sponsor and advisor and prepare a learning contract outlining learning objectives, activities to meet those objectives, and evaluation procedures. Students must negotiate 120 credits in order to receive a degree, including University Core Requirements (33 credits) and residence credits (45 credits). Further information and applications may be obtained from the University Without Walls, Wysocki House.

#### **University Year for ACTION**

University Year for ACTION is a volunteer service program which offers undergraduates significant opportunities for attacking poverty in connection with community agencies while earning normal college credit. Students accepted into the program become Volunteers in ACTION (a new federal agency comprising Peace Corps and VISTA). The students work full-time or part-time, living on campus or in a local community located either in a major city or in a rural center of Western Massachusetts.

Service in a community agency may be in legal services, education, mental health, housing, consumer protection or environmental protection. Community agencies provide field direction and supervision, while the University pro-

vides instruction, academic credit, and program management.

Details concerning eligibility, application procedures, stipends, tuition, fees and other information are available at the ACTION Office, Arnold House.

#### **Upward Bound**

Upward Bound is an educational experience, motivating disadvantaged high school students to try for college. Upward Bound offers a summer academic program for 25 students on the campus and a "follow-up" program from September through May to some 95 high school sophomores, juniors, and seniors.

### **Schools, Colleges, Departments and Programs**

Undergraduate MAJOR programs are available in the following areas:

#### **College of Arts and Sciences**

##### *Faculty of Humanities and Fine Arts*

Afro-American Studies

Art

Chinese

Classics

Comparative Literature

English

Fine Arts

French

German

History

Italian

Japanese

Journalistic Studies/English

Music

Philosophy

Russian

Spanish

Theater

##### *Faculty of Natural Sciences and*

Mathematics

Astronomy

Biochemistry

Botany

Chemistry

Geography

Geology

Mathematics

Microbiology

Physics

Zoology

#### **Faculty of Social and Behavioral**

Sciences

Anthropology

Communication Studies

Economics

Political Science

Psychology

Sociology

#### **Interdisciplinary Programs**

Classics & Philosophy

Judaic Studies

Linguistics & Philosophy

Linguistics & Chinese

Linguistics & German

Linguistics & Japanese

Linguistics & Russian

Mathematics & Philosophy

Near Eastern Studies

Science

Social Thought & Political Economy

Soviet & East European Studies

#### **School of Business Administration**

Accounting

General Business & Finance

Management

Marketing

#### **School of Education**

Education

Human Development

#### **School of Engineering**

Chemical Engineering

Plant & Soil Sciences

Wildlife Biology

Wood Technology

#### **School of Health Sciences**

Communication Disorders

Community Health & Health Education

Environmental Health

Health Laboratory Science

Medical Technology

Nursing

Public Health

#### **School of Physical Education**

Leisure Studies & Services

Physical Education

Sport Studies

## **College of Arts and Sciences**

The College of Arts and Sciences has programs of study leading to four bachelor's degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. All departments offer a program leading to the B.A. degree. The B.S. degree may be earned only if the major is mathematics, science, or psychology. All the degree programs combine a study in depth in one area with supporting study in the other two of the three main divisions: 1) Humanities and Fine Arts, 2) Social and Behavioral Sciences, and 3) Natural Science and Mathematics. Courses appropriate to the distribution requirements in these three areas are noted in University catalogs by the respective codes (C), (D), and (E).

All degree programs must conform with the following five provisions. Advanced placement and transfer credits may be applied toward any or all of these qualifications, but at least half of the major program must be completed in residence.

1) A basic proficiency or experience in communicative skills must be achieved by completing six credits in rhetoric; the two rhetoric courses must include at least one of Rhetoric 100 or 110.

2) For the B.A. and B.S. degrees, a basic proficiency or experience with a foreign language must be demonstrated by a) completion of a foreign language course at the 140 level, b) score of 600 or above on a CEEB achievement test while in high school or placement test at this University,

c) satisfactory completion in high school of a fourth-level foreign language course or a third-level course in one foreign language and a second-level course in another, d) a year in high school in which English is not the basic language of instruction, or e) substitution of language-related study with proper authorization (see CASIAC).

3) Distribution is achieved by completion of courses in each of the two divisions of the College other than the one in which the major falls. With the understanding that work in the major is applicable to one or more of these divisions, this qualification is stated for all three divisions and all degrees as:

| Number of Core Courses for     |      |      |       |        |        |
|--------------------------------|------|------|-------|--------|--------|
| Division                       | Code | B.A. | B.S.* | B.F.A. | B.Mus. |
| Humanities                     |      |      |       |        |        |
| and Fine Arts                  | "C"  | 4    | 3     | 3      | 3      |
| Social and Behavioral Sciences | "D"  | 4    | 3*    | 3      | 3      |
| Natural Science & Mathematics  | "E"  | 4    | 4*    | 3      | 3      |

\*To qualify for a B.S. degree, at least 60 credits must be earned in science, mathematics, and/or psychology courses; distributional courses may be part of this minimum of 60.

4) An approved major program of the College must be completed. The traditional departmental major programs are the most common, and they are described in the following pages. A few others, including several interdepartmental majors, are specified and administered by standing committees of the faculty and are described elsewhere.

All major programs have these features in common: a) faculty guidance, b) a coherent program of study made up of at least 24 credits, at least 15 of which must be in upper division courses in this College, and c) a student has at least 12 completely free electives.

#### Advisory System:

When students elect a special major or are admitted to a specialized degree program, they may obtain a faculty advisor from that major. Faculty advisors help students choose their program of study and also serve as a communication link between students and the Registrar's Office. Students may choose a specific major on entrance or they may postpone this choice

until the fourth semester. Until choosing a specific major, students are listed as a College of Arts and Sciences major, and the College of Arts and Sciences Information and Advising Center (CASIAC) serves as a student's advisor.

A student has considerable freedom in choosing a program of study and major. However, a few of the major programs require sequences of courses which extend over seven or eight semesters. Students who do not take the right courses in their freshman year may have to use a summer session or extra semesters to accommodate these sequences if the ultimate major is Astronomy, Biochemistry, Chemistry, Mathematics or Physics, or if they are in the Bachelor of Music or Bachelor of Fine Arts program. Some standard freshman year programs are:

#### Bachelor of Fine Arts:

|                     |                           |
|---------------------|---------------------------|
| Rhetoric            | and two of the following: |
| Introduction to Art | Math or Science           |
| Studio Art          | Humanity                  |
|                     | Social Science            |

#### Social Science (B.A. or B.S.)

|                |                           |
|----------------|---------------------------|
| Rhetoric       | and two of the following: |
| Social Science | Humanity or Fine Art      |
|                | Math or Science           |
|                | Second Social Science     |
|                | Foreign Language          |

#### Mathematics (B.A. or B.S.)

|                 |                           |
|-----------------|---------------------------|
| Rhetoric        | and one of the following: |
| Math (Calculus) | Foreign Language          |
| Science         | Social Science            |
|                 | Humanity                  |

#### Bachelor of Music:

|                  |                           |
|------------------|---------------------------|
| Rhetoric         | and two of the following: |
| Music Theory     | Math or Science           |
| Music Literature | Social Science            |
|                  | Humanity,                 |
|                  | other than Music          |

#### Humanity (B.A.):

|             |                           |
|-------------|---------------------------|
| Rhetoric    | and two of the following: |
| Humanity or | Foreign Language          |
| Fine Art    | Social Science            |
|             | Math or Science           |
|             | Second Humanity           |

#### Science (B.A. or B.S.)

|                         |                           |
|-------------------------|---------------------------|
| Rhetoric                | and one of the following: |
| Chemistry               | Foreign Language          |
| or Physics*             | Humanity                  |
| Math                    | Social Science            |
| (Calculus, if prepared) | Second Science            |

\*Chemistry Majors elect Chemistry 113; Biology and Geology majors elect Chemistry 111; and Physics and Astronomy majors elect Physics 181.

## Faculty of Humanities and Fine Arts

### Department of

#### **Afro-American Studies, W.E.B. DuBois**

The W.E.B. DuBois Department of Afro-American Studies offers an undergraduate major for those students who wish to gain an in-depth knowledge of the history and culture of Black people in Africa and the New World. The course of study is interdisciplinary, and offers a variety of learning situations, both on and off the campus.

The maximum of 45 required major credits incorporates a number of disciplines in the social sciences and humanities. After taking a prescribed introductory core of 18 credits, the student may concentrate in the social sciences, history, or the humanities in which he or she is required to take 27 additional hours, including a field research project or equivalent and a senior thesis.

### **Art**

#### **ENTRANCE PROCEDURES**

Portfolios are required from all applicants except those applying for the B.A. in Art History. The portfolio should be in the form of 35mm colored slides of at least ten works. Slides must be submitted in a 9" x 11" clear plastic viewing sheet, each slide labelled with name, medium, and size. Slides should not be sent until requested by the Admissions Office. Portfolio examination for admission to the Art Department will be based on the criteria of demonstrated ability and high academic standard.

#### **PROGRAMS**

*Bachelor of Arts Degree Program* — The B.A. degree program is designed to provide an aesthetic and historic knowledge of the visual arts while affording an opportunity to develop creative ability. The B.A. degree program requires a greater involvement than the B.F.A. degree program in courses not directly within the Art Department. The B.A. degree program offers two majors: Art History and Studio.

The B.A. in Studio requires a minimum of 42 art credits (six elementary courses — 100, 102, 120, 122, 111, 113 — and eight upper division courses — numbered 200 and above, two of which must be art history electives.)

The B.A. in Art History requires a min-

imum of 30 art history credits (six credits at the introductory level — 111, 113 — and 24 upper division credits, which will include at least one seminar — 300 level course). As the declaration of the major is prerequisite to the selection of a faculty advisor, it is best to declare an Art History major within the freshman or sophomore years. Art History is taught as an area of the humanities tying in with the history, literature and philosophy of a given culture or period, and forming part of the history of ideas in general. Course offerings in the area are organized to provide three levels of instruction: a) Introductory Survey (100 level), b) Area Courses (200 level), c) Seminars (300 level).

#### *Bachelor of Fine Arts Degree (Studio) —*

During the first two years, the student experiences a foundation program of several courses in drawing, two and three dimensional design and a general history of art. Because of its contemporary nature and relevance, it is required that Modern Art 287 be taken as early as possible by B.F.A. degree program candidates. The B.F.A. program in Studio Art provides intensive coverage of one chosen medium: ceramics, printmaking, sculpture or painting, to be selected by the end of the sophomore year. The B.F.A. degree program consists of fewer core requirements to allow for concentration within the Art Department. It involves a minimum of 60 credits in studio art, 12 in art history and 48 credits in other disciplines for satisfaction of the University Core and graduation credit requirements.

*Bachelor of Fine Arts (Studio with Art Education)* — This program provides the student with the Massachusetts State Board of Education requirements for certification to teach Art in public school systems at either the elementary or secondary level. The program's minimal requirements include 39 credits in studio art, 12 in art history, 6 in art education, 15 in student teaching, 9 in education and psychology and 39 in other academic disciplines.

*Bachelor of Fine Arts (Design)* — The Design program requirements are similar to those of the other programs in the Department and lead to a B.F.A. degree in design. The Design area incorporates courses from related departments such as Environmen-

tal Design and Landscape Architecture. Individualized programs are possible through course offerings from art and design; however, the main professional sequence is structured toward Human Environment and Design, or Interior Design. The program is intended to meet professional standards set forth by the national, professional and educational associations in the field of design for accreditation and professional standing.

#### **Asian Studies**

There are majors leading to the B.A. in both Chinese and Japanese language and literature in which students may place emphasis on either modern or classical language. Students following either major receive a substantial foundation in reading, speaking and understanding the language, as well as a basic knowledge of respective literatures. Majors are encouraged to acquire a background in the history, government, society, religion, and arts of China and Japan.

In addition, various departments in the University and the Five College system offer courses dealing with specific aspects of China, Japan and other parts of Asia. Consult offerings of the Departments of Anthropology, Art, Comparative Literature, Geography, History, Political Science, and Sociology.

The program also offers, in cooperation with the Linguistics Department, two joint majors: Linguistics & Japanese and Linguistics & Chinese.

Undergraduates interested in Asian Studies may wish to enroll in the University's Asian Studies Certificate program. The program does not constitute a major and is designed to supplement the work done toward a bachelor's degree in another discipline. Requirements for the Certificate are a total of 24 credits selected from the Asian Studies course list.

#### **Classics**

Courses labeled "Classics" on the 100 and 200 levels are offered for purposes of general education. They require no knowledge of Latin or Greek; all readings are done in English translation. Courses of this type are offered in Greek and Roman civilization, ancient mythology, Greek and Roman archaeology, and Greek and Latin literature in translation.

There is also a special language skills

course in Greek and Latin elements in English designed to increase the student's knowledge and understanding of English vocabulary by study of the roots, prefixes, and suffixes incorporated into English from Greek and Latin. A full range of courses is offered in Latin language and literature.

A student who majors in Classics may choose one of the following areas of concentration: 1) Classical Civilization and Literature, 2) Greek, 3) Latin, 4) Mediterranean Archaeology, and 5) Religion. A description of each of these areas may be obtained from the Department of Classics. A separate interdepartmental major in Classics and Philosophy is available.

Classics majors may select any member of the Classics faculty as an adviser. Students with a special interest in secondary school teaching should consult Associate Professor Vincent Cleary. Those with a special interest in pre-seminarian studies should consult Assistant Professor Charles Isbell. Those interested in Mediterranean Archaeology should consult Assistant Professor Elizabeth Will.

The Department awards a scholarship of \$1,000 each spring semester to a Classics major for study at the Intercollegiate Center for Classical Studies in Rome.

Consult the Department for information about study programs in Italy and Greece during the academic year and the summer. The Department maintains a list of archaeological digs where students may receive training and experience in archaeological excavations.

#### **Comparative Literature**

Three different types of programs lead to the B.A. degree in Comparative Literature. The first involves the study of literature in two languages, a major and a minor; one of these may be English. Majors must also fulfill a requirement in a third language, preferably ancient, either by taking six credits of elementary course work or by passing the appropriate proficiency examination. A student has to take 42 upper-level credits of course work, not including the work done in the third language: 15 in the literature of the major language, 12 in the literature of the minor language, and 15 in Comparative Literature (including 3 directed toward the literature of the major language).

The second type of program involves the relation of literature studied in two different languages, a major and a minor (one of which may be English) to one other discipline (e.g., art, philosophy, anthropology, psychology, linguistics, sociology). The normal program will consist of 48 upper-level credits of course work, distributed as follows: 12 in the department of the related discipline, 12 in the major literature, 9 in the minor literature, and 15 in Comparative Literature. The third program involves the study of literature equally in two languages. The normal program will consist of 45 upper-level credits of course work, distributed as follows: 15 in the literature of one language, 15 in the literature of a second language, and 15 in Comparative Literature.

### English

The English Department offers courses which attempt to cover not only British and American literature but the literatures of all English-speaking people. English majors are encouraged to study creative and expository writing, folklore, film and other related subjects such as linguistics and journalism. Students who major in English are exposed to important literary works and are expected to develop those skills necessary to understand and evaluate literature as well as to express their opinions concerning it coherently and persuasively. All undergraduate programs in English are administered in the Department's Undergraduate Studies Office in Bartlett Hall. The Program in Journalistic Studies is also administered there. The Department's Chief Adviser is Donald Cheney, and the Director of Undergraduate Studies is Walker Gibson.

There are two options for majoring in English. Option A requires students to study various approaches to literature: one course in a pre-modern period; one course in literature not written in English; three of the four following kinds of literature: a course in language, a course in Shakespeare, a course in an individual author besides Shakespeare, and a course in a literary genre such as tragedy, lyric poetry or satire. Option B requires students to complete a survey of major authors: two courses in masterpieces of Western literature, two courses in major British authors, and one course in Shakespeare. Various

members of the Department are available to help students plan programs which focus on period studies, (such as Medieval or Victorian studies), American civilization, women's studies, film studies, folklore or a number of other areas. The English major must complete 30 credits in upper level courses (i.e., courses numbered above 200). Up to six of these credits may be substituted by upper level courses in related areas such as journalistic studies, linguistics, foreign language, comparative literature, or speech courses related to literature. All questions regarding what can be substituted should be directed to the Department's Chief Adviser.

Students who wish to graduate with Honors in English must take at least four upper level courses designated as Honors English courses, have a minimum cumulative average of 3.2, and choose to either write a thesis or take an additional two Honors English courses. Students who wish to be certified to teach English in secondary schools must apply to the Chairman of the English Education Committee.

### JOURNALISTIC STUDIES

Journalistic Studies is a program of the English Department offering a joint major with that department. The student is required to earn 15 credits in Journalistic Studies and to complete the requirements of the English major with some exceptions. Students interested in the Journalistic Studies Program should contact Professor Howard M. Ziff.

### French and Italian

#### FRENCH

Students planning to major in French have access to programs ranging from language skill courses at all levels to a rich body of courses devoted to literature and civilization. To supplement the major, requirements of which are outlined in several other brief documents, students are urged to take advantage of our overseas programs in Grenoble and Pau, or to spend their entire junior year in Paris under the auspices of the University of Massachusetts — Boston. Majors will also find living in French Corridor not only a successful way of learning spoken French outside of the classroom, but also an important introduction to life in France.

Special departmental advisers deter-

mine the major's proper placement within the department, help to formulate the future program of each student, and resolve academic problems.

For complete information concerning the major in French, please consult Professor Micheline Dufau, Chairman of the Department of French and Italian.

#### ITALIAN

Students planning to major in Italian have access to programs ranging from language skill courses at all levels to a rich body of courses devoted to literature and civilization.

Special departmental advisers determine the major's proper placement within the department, help to formulate the future program of each student, and help resolve academic problems. To supplement the major, requirements of which are detailed in other brief documents, students are urged to join an approved program in Italy for at least one summer.

For complete information concerning the major in Italian, please contact Professor Anthony Terrizzi, Undergraduate Adviser for Italian Studies.

#### Germanic Languages and Literatures

To fulfill undergraduate major requirements in German, a student must take German 161 and complete 32 credits in the department's junior-senior courses. Two programs are available: Program A (language) is designed principally for those who wish to teach in elementary or secondary schools or for those whose interest is not primarily in literature; Program B (literature) is for those who are chiefly interested in continuing their studies in graduate school.

Students selecting Program A should take 161, 201, 202, 211, 221 or 222, 241, 242, 283, 284, or 285, and a minimum of two more courses in German, one of which must be in 20th-century literature (331, 332, 333, or 334). Students in Program A who are not planning to follow a teaching career may substitute another junior-senior course for 283.

Students selecting Program B should take 161, 201, 202, 211, 221, 284, 321, 391, and three courses chosen from the following: 301, 302, 303, 311, 312, 313, 331, 332, 333, and 334.

Students are urged to augment their course work with at least one summer ses-

sion at an approved summer school of German or by participating in a German program abroad, such as the University offers in Freiburg, Germany.

#### History

History majors must take as required courses in their freshman and sophomore years two year-long sequences chosen from HIST 100-101 or 110-111, 115-116, 120-121, 130-131, 140-141 or 106-107, and 150-151 or 152-153. The history major will select one of five areas of specialization (European, British, American, Latin American, or East Asian history) and take within it a minimum of 8 courses numbered 200 and above (totalling not less than 24 credits). Students specializing in European history must take at least 3 credits in ancient or medieval history and an additional 3 credits in the early modern period (from the Renaissance through the 18th century). An additional two or three courses in electives outside the area of specialization are required, for a total of at least 12 courses (totalling not less than 36 credits) in lower and upper-level history courses.

#### Linguistics

Though it is a humanistic discipline, linguistics is best described as the science of human language. Linguists study the nature of the knowledge a human being possesses when one "knows" one's native tongue.

No undergraduate major is offered in Linguistics alone, but students may major jointly in Linguistics & Philosophy, Linguistics & German, Linguistics & Russian, Linguistics & Chinese, and Linguistics & Japanese. Courses in Linguistics also are counted for major credit in several departments, and are relevant to majors in English, the Foreign languages, Anthropology, Communication Studies, Psychology, Philosophy, and Computer & Information Sciences.

#### Music and Dance

The Music and Dance Department offers programs of study leading to the Bachelor of Music and Bachelor of Arts degrees. An audition is required of all applicants.

The Bachelor of Music degree is awarded upon completion of University core requirements and a concentration in one of three areas: Theory-Composition, Performance, and Music Education (Vocal

or Instrumental)). Each area of concentration consists of specialized courses in particular fields as well as a departmental core of applied music, theory, history and literature, and piano proficiency.

The Bachelor of Arts degree may be earned by the completion of University core requirements, additional College of Arts and Sciences requirements (language, humanities, and sciences), and a concentration in Music History, Theory-Composition, Performance, and Dance. The music core requirements are identical with those of the Bachelor of Music degree.

All programs contain course sequences in theory and applied music designed as four-year programs. A student not entering as a freshman may abbreviate his or her program only by advanced placement or by appropriate transfer credit.

The audition serves to determine the selection of the area of concentration as well as the qualification for music study. Instrumental Music Education applicants presenting piano or organ as a primary instrument must also present a strong secondary band or orchestral instrument. Vocal Music Education applicants presenting piano or organ as a primary instrument are also expected to meet voice study requirements.

Students not majoring in music may select non-specialized courses in music appreciation, music history, applied music (subject to prior audition), and participation in the performing groups.

Professor Horace Boyer is chief adviser for undergraduates.

### **Philosophy**

The Philosophy Department offers courses in all areas of philosophy at all levels, from the most elementary to the most advanced. Majors in philosophy take 30 credits in departmental courses. No particular course is required, but each major has to have one semester course (3 credits) in logic, one in ethics, and four in the history of philosophy. The 100-level courses may be counted in meeting these requirements.

Students with specialized interests can arrange independent study courses; and those with a B average or better can do honors work in their senior year.

The Department also offers a Teacher

Preparation Program designed for students who wish to teach philosophy in secondary schools. Three joint major programs in which philosophy is combined with classics or linguistics or mathematics, are also available.

Professor Gareth Matthews is Director of Undergraduate Studies and chief advisor for philosophy majors.

### **Slavic Language and Literatures**

The Russian major aims at maximal proficiency in all four language skills; for this reason, language study is the most significant component of the major program. Opportunity is also provided for the student to achieve a background in the literature and history of Russia, as well as to gain some competence in related areas of economy, political science, sociology and anthropology.

Department requirements for a major are the successful completion of:

a) Six semester courses of language study at the junior-senior level (18 credits): RUSS 261, 262, 271, 272, 281, 282.

b) Two semester courses of literature study at the junior-senior level (6 credits): RUSS 291, 292.

c) At least two additional courses within the department, to be chosen in consultation with an adviser on the basis of the student's post-graduate plans.

d) Two semester courses in Russian History: HIST 214, 215.

Majors and prospective majors should consult early and often with departmental advisers. Professor J. Joseph Lake is chief adviser for the department.

### **Spanish and Portuguese**

The department offers a major in Spanish and a number of courses in Portuguese. A major in Portuguese is planned.

All the department's programs stress training in and the use of language skills. Students are provided with opportunities to combine field work and community service with their academic programs.

The undergraduate major program consists of 42 junior-senior credits, up to nine of which may be in related areas and disciplines approved by the department. Entering Spanish majors who achieve an intermediate year level in the placement tests are urged to take SPAN 146, an intensive course which will permit them to start their Spanish concentration one semester

sooner than if they were to take SPAN 130-140, the usual intermediate course.

Prerequisites to a major in Spanish are SPAN 150-151, and 180.

Students may choose one of three areas of concentration for a major in Spanish. These areas are: A) Literature, B) Linguistics, and C) Bilingual Studies. All areas of concentration have as a common requirement two introductory literature courses and three courses in Conversational Spanish: SPAN 250, 251, 252 (one credit each). The successful completion of the following programs are required for each one of the designated areas of concentration.

1) Literature

- a) One course from the Medieval Literature group.
- b) One course from the Renaissance and Golden Age Literature group.
- c) One course from the 18th- and 19th-Century Literature group.
- d) One course from the 20th Century Peninsular Literature group.
- e) One course from the Spanish-American Literature group.
- f) Five electives.

2) Linguistics

- a) One course from the Medieval Literature group.
- b) One course from the Renaissance and Golden Age Literature group.
- c) One course from the 18th-, 19-, or 20th-Century Peninsular Literature groups or from the Spanish-American Literature group.
- d) Six courses from the Language and Linguistics group.

3) Bilingual Studies

- a) Two courses in Hispanic Culture.
- b) One course in Hispanic Literature of the Caribbean.
- c) Three courses that introduce the student to Hispanic linguistics, Caribbean dialectology, and history and theory of Hispanic bilingualism.
- d) Five electives.

**Theater**

Students in the program gain expertise in all the fundamental areas of theatrical art in graduated sequences of study designed to bring into focus rigorous critical think-

ing, precise methods of research, and imaginative expression in performance.

**SEQUENCE OF STUDY**

**Introduction to Theater**

Theater Practice (1 credit; may be repeated; 3 credits are required of majors)

**Basic Techniques (3 credits each)**

(Prerequisites: Introduction to Theater and at least 1 credit of Theater Practices)

Scenography

Dramaturgy

Performance

**Intermediate Techniques (9 credits each)**

(Prerequisite: completion of all basic techniques)

Scenography

Dramaturgy

Performance

In addition, students may elect up to 18 credits of advanced course work in scenography, dramaturgy, and/or performance when intermediate-level work has been completed in the corresponding area(s).

Freshmen who think they may wish to major in theater should elect Introduction to Theater, which also satisfies one of the four course requirements in the Humanities and Fine Arts core. (C).

Basic techniques in scenography, dramaturgy, and performance are normally completed during the sophomore year.

Non-majors with appropriate qualifications are welcome to participate in the activities of the Department. Department majors are given preference in placement at all levels within the program.

With the exception of Introduction to Theater and Theater Practice, enrollment in theater courses is by permission of designated department advisers only.

## **Faculty of Natural Sciences and Mathematics**

### **Biochemistry**

The Department of Biochemistry serves both a service function to other health and environmental and natural resource units on the campus as well as a source for the training of specialists in the area of molecular and cellular sciences. In addition, the major is an important training

ground for pre-med, pre-vet, and all pre-health science professions.

A student who is a potential major should take a year of chemistry and calculus in the freshman year. A year of exposure to the basic biological sciences is also strongly recommended either from high school or in the freshman year. A sample curriculum is outlined below.

#### Freshman Year

MATH 127-128 or 135-136 or 131-132

CHEM 113-114 or 111-112

ZOOL 190 or BOTANY 100 (if exempt, select from ZOOL 221, 227 or 240, or from an approved advanced Botany course)

Language (if exempt, a C or D core)

Rhetoric (if exempt, a C or D core)

#### Sophomore Year

MATH 255

Zoology, Botany or Microbiology

CHEM 165, 166, 167, 168 or 261, 262, 263, 264

Language or C or D core

PHYSIC 141-142

#### Junior Year

CHEM 210 or 127

CHEM 281-282

BIOCHM 223-224-226 (advanced section) C or D core

Electives (may include BIOCHM 385-386)

#### Senior Year

Advanced Biochemistry or Advanced Life-science or Advanced Chemistry

BIOCHM 338

BIOCHM 385-386 or 398-399

COINS 122 or 101

Electives (or core requirements)

#### Botany

Majors who plan to take post-graduate work in botany are assured excellent training in all fields of botany, including anatomy, cytology, ecology, genetics, morphology, taxonomy and physiology.

The department offers several courses without prerequisite which are designed for non-science majors.

Students planning for the botany major with subsequent graduate training in the field are required to take the following courses:

Botany: Introductory Botany, plus 24 additional credits in botany, including at least two courses from each of the following areas: I. Ecology — Evolution, II. Physiology — Cytology — Genetics, and III. Anatomy — Morphology — Systematics.

Chemistry: General Chemistry (111-112) and at least one semester of organic chemistry, and one semester of Biochemistry of Plant Metabolism BOTANY (212).

Mathematics: Either two semesters of Calculus (127-128) or two of the following: Finite Math (112), Introductory to Statistics (231), or Introductory to Computer Science (122).

Physics: Two semesters, either 141-142 or 121-122.

Genetics: Either BOTANY 240 or ZOOL 240.

The program for students seeking qualification for teaching at the secondary level must meet the following requirements:

Botany: Introductory Botany (100 or 101), the Plant Kingdom (125), Principles of Evolution (228), plus a minimum of 15 additional credits in botany including at least one course from each of the areas: I. Ecology — Evolution, II. Physiology — Cytology — Genetics, or III. Anatomy — Morphology — Systematics.

Zoology: Vertebrate Physiology (135).

Genetics: Either BOTANY 240 or ZOOL 240.

Chemistry: General Chemistry (111-112) plus one additional course in either Chemistry or Biochemistry.

Mathematics: Two semesters of Calculus (127-128) or two of the following: Finite Math (112), Introductory to Statistics (231) or Introductory to Computer Science (122).

Physics: Two semesters, either 141-142, or 121-122.

Additional requirements for teacher certification include elementary Psychology (101) and either Educational Psychology (301) or Adolescent Psychology (263), and the required course work and practice teaching in Education.

#### Chemistry

The Department of Chemistry offers two major curricula: The B.S. (with accreditation to the American Chemical Society), and the B.A. These curricula have been considerably revised to permit greater option in the selection of upper level courses.

The B.S. program is designed for students who wish to prepare for graduate study, or for research and/or development work in chemical laboratories. A slightly modified program permits preparation for

secondary school teaching, the B.A. program provides for students who wish to combine chemistry with another major area, as business for technical sales or management, or education for teaching, or pre-professional (medical, dental).

During the first three years of the B.S. curriculum, the student completes a chemistry core which includes CHEM 113, 114 (Principles of Chemistry); CHEM 165, 166, 167, 168 (Organic Chemistry with laboratory); CHEM 241 (Inorganic); CHEM 285, 286 (Physical); CHEM 210 (Analytical); CHEM 287 (Physical Lab); MATH 131, 132, 165 (Calculus); and PHYSIC 161, 162, 163 (a Calculus approach to Physics). It is recommended that German, Russian, or Japanese be selected to satisfy the College's language requirement, and that the student elect at least one course in other sciences and in computer science. The upper level chemistry requirement is three lecture courses, representing two of three designated groupings, and four laboratory courses, representing both of two designated groupings.

The B.A. program includes a core of CHEM 113, 114, 165, 166, 167, 168, 210, 241, 281, 282, (281, 282 are Physical Chemistry); MATH 131, 132; PHYSIC 141, 142. Two upper level chemistry lecture courses and one laboratory course complete the requirement.

A number of options and permitted substitutions are noted in a detailed description of the B.S. and B.A. curricula. It is extremely important that the student get initial and continuing advice from a Chemistry faculty member. Professor Richason is the Departmental chief adviser.

#### **Computer & Information Science**

The Department of Computer & Information Science offers a wide range of undergraduate courses in the areas of Computer Systems, Theory of Computation, and Cybernetics.

An increasing number of undergraduates, irrespective of their major, are finding it useful to have the ability to program and use modern computing equipment. They will find three courses (Introduction to Problem Solving Using the Computer; Assembly Language Programming; Comparative Programming Languages) very useful in getting experi-

ence with the time-sharing system at the University and mastering many available languages.

A number of courses introduce undergraduates to the design of computers, the design of compilers for communicating with computers in high level languages, and to new techniques for reducing complex problems to computer form.

Courses in automata theory, recursive functions, complexity of computation, and related topics introduce the student with a mathematical background to the many exciting problems posed by the theoretical study of computation.

"Foundations of Cybernetics" introduces the student to the computational study of artificial intelligence and brain function and to the design of robots; "Artificial Intelligence" surveys robotics, scene analysis, theorem-proving and planning, and language understanding by robots; and "Computational Population Dynamics" shows how mathematical techniques may combine with computer simulation in solving large-scale problems of ecological interactions. Other courses develop research on vision and memory from both a neurophysiological and robotic viewpoint; explore the design of question-answering systems etc.

Basic courses are offered for non-technical majors who desire a comprehensive insight into the uses and abilities of computers, and who desire a practical "hands-on" laboratory approach to their learning experiences.

While no formal undergraduate major exists in Computer & Information Science, one is being planned. Meanwhile, it is possible for students to seek a Bachelor's Degree with Individual Concentration, the program being worked out in consultation with the COINS Director of Undergraduate Studies.

#### **Geology & Geography** **GEOGRAPHY**

The program in geography emphasizes concepts and practical skills and techniques. Thirty credit hours in geography are required and include two introductory courses (145 and 155), two skills and techniques courses (240 and 250), four upper division courses (200-399), and two seminars (396 and 397). In addition, the student is required to take five courses in

other fields that supplement the student's interests and emphasis within the framework of the geography major. The courses are determined by the student and adviser.

Prof. Terence Burke is chief adviser for Geography.

#### **GEOLOGY**

A variety of undergraduate programs are available within three degree options: the B.A. degree, the B.S. degree, Geology Option, and the B.S. degree, Earth Science Option.

The B.A. degree is the most flexible, and is particularly suited for those not planning a professional career in the field.

The B.S. Degree, Geology Option, provides a strong background for those wishing professional careers in Geology.

The B.S. degree, Earth Science Option, is recommended for students interested in secondary teaching, or for students interested in future graduate work leading to the M.A.T. or M.S. Ed. degrees. This program involves extensive course work in other sciences.

The specific requirements in Geology and supporting subjects for each degree program may be obtained from the Department of Geology and Geography, or from the College of Arts and Sciences Information and Counseling Center (CASIAC). Thomas E. Rice is Chief Adviser for Geology.

#### **Mathematics & Statistics**

##### **MATHEMATICS**

The student electing mathematics as a major will find a variety of stimulating program options. Both Bachelor of Arts and Bachelor of Science degrees are offered.

All mathematics majors are required to complete a two-year sequence in calculus and linear algebra, or the equivalent. In addition, eight upper-division courses are required. These may be chosen from the department's offerings or from certain mathematics-related courses in other departments. Five of these upper-division courses must be taken in the form of two two-semester sequences in two of the areas of algebra, analysis, applied mathematics, and geometry and topology, and a one semester elective from a third of these areas. Students who have taken calculus in high school may be entitled to ad-

vanced placement; they should consult the mathematics placement counselor during summer counseling. Further detailed information about mathematics major requirements may be found in the Mathematics Major's Information Leaflet which may be obtained from the department.

The student interested in computer and data processing would probably take courses in computer and information science, logic, linear programming and possibly probability and statistics. The student aiming for a teaching career at secondary level might elect courses in geometry and number theory. A student interested in actuarial work would take courses in analysis and probability and statistics and also computer science. The student interested in industrial work would do well to take analysis and applied mathematics.

Students interested in statistics have an opportunity to take statistics courses for credit toward a major in mathematics.

Those planning on college level teaching or research in mathematics are urged to take a number of the "pure mathematics courses such as group theory, topology, differential geometry, and set theory.

Students who have demonstrated unusual mathematical ability in calculus will be invited to enter the departmental honors program.

##### **PROBABILITY AND STATISTICS**

The curriculum in probability and statistics is intended to develop student insight into the nature of scientific method, with emphasis upon statistical models of the experiment.

Students with training in calculus should elect MATH 247 — STATIS 248 or STATIS 315-316. Students without calculus who desire a thorough grounding in the concepts underlying statistics should elect STATIS 231 and 232. Those who wish merely to obtain more familiarity with elementary statistical ideas and techniques should elect STATIS 121 and subsequently STATIS 251.

Any of the three courses STATIS 121, 231, or 315 serve as prerequisites for analysis of variance (STATIS 251), design of experiments (STATIS 261, STATIS 262), sampling theory (STATIS 271), and multivariate analysis (STATIS 281, STATIS 282).

There is at present no undergraduate major in statistics. Those who intend to study statistics at a graduate level should concentrate on mathematics and elect courses in computer science. Advanced courses in statistics require a background of at least two years of calculus and preferably MATH 225, Advanced Calculus and MATH 211-212, Abstract Algebra.

The Statistical Laboratory is open to students.

### **Microbiology**

Microbiology majors should immediately begin preparation in chemistry. Microbiology majors are required to have broad training in collateral sciences, and minimum requirements include chemistry through quantitative analysis and organic, and one year each of introductory biological science, physics, and mathematics. MICBIO 250, 251, 280, 340, senior seminar, and elective courses contributing to a total of at least 20 credits in microbiology are required of majors. Professor S. C. Holt is departmental chief adviser.

### **Physics & Astronomy**

#### **ASTRONOMY**

The Five College Department of Astronomy is administered jointly with Amherst, Hampshire, Mount Holyoke, and Smith Colleges. The elementary courses for non-majors are taught separately at each campus but all advanced courses are given on a joint basis for students from the five participating institutions. Five College courses are identified in the Undergraduate Catalog by ASTFC. The Astronomy Program at the University is also a part of the Department of Physics and Astronomy.

Students who plan to go to graduate school should obtain a firm foundation in physics and mathematics and should plan to finish satisfactorily the introductory physics and mathematics sequences and ASTRON 222-223 by the end of the Sophomore year.

More flexibility in planning courses is available to those majors for whom the B.A. or B.S. will be a terminal degree in astronomy. In some circumstances PHYSIC 142 and ASTRON 101-102 will be acceptable lower division courses. A minimum of three upper division astronomy courses and nine additional

credits of upper division astronomy or physics must be satisfactorily completed. These may include ASTRON 231 and 234 but should be chosen in consultation with the Chief Adviser.

Those students wishing a B.S. rather than a B.A. degree need a total of 60 credits of science courses. The credits required beyond those explicitly needed for the astronomy major may be chosen from any science or behavioral science.

Independent and honors work are encouraged for all majors. Opportunities for theoretical and observational work are available in cosmology, cosmogony, radio astronomy, planetary atmospheres, relativistic astrophysics, laboratory astrophysics, gravitational theory, infrared balloon astronomy, stellar astrophysics, spectroscopy, and exobiology. Facilities include the Laboratory for Infrared Astrophysics, balloon astronomy equipment (16-inch telescope, cryogenic detectors), the Five College Radio Observatory, access (under supervision) to the 120-foot NERO radio antenna, and a modern 24-inch Cassegrain reflector. Opportunities for summer research are also frequently available including an exchange program with the Observatory of Bonn University. Original publications often result from undergraduate research.

Professor J. Taylor is the Chief Adviser for Astronomy.

#### **Sample Program I —**

##### **Freshman Year:**

Rhetoric, MATH 131, 132, PHYSIC 161, Electives.

##### **Sophomore Year:**

PHYSIC 162, 163; MATH 165, 231; ASTRON 222, 223; Electives

##### **Junior Year:**

ASTRON 237, 234; PHIL 230, ASTRON 386, PHYSIC 200, Electives.

##### **Senior Year:**

ASTRON 385, PHYSIC 301, MATH 200, Ed. Psych., Elective, Ed. Block.

#### **Sample Program II —**

##### **Freshman Year:**

Rhetoric, MATH 131, 132; PHYSIC 171, 172 (162); Electives.

##### **Sophomore Year:**

MATH 165, 231; PHYSIC 173; ASTRON 222, 223, Electives.

#### Junior Year:

Mechanics, Electricity, Modern Physics, Thermodynamics, MATH 241, 242; ASTRON 238; Electives.

#### Senior Year:

ASTRON 343, 344; Electives.

#### Physics

For the liberal arts student a variety of one and two semester courses is available. PHYSIC 114 is of special interest to Communication Disorders majors, 115 to Music majors, and 130 to Elementary Education majors. PHYSIC 110, 116, 117, 118, 119 and 169 consider topics in the world beyond our senses, relativity, nuclear energy, quantum physics, contemporary applications of physics, and science for science fiction readers respectively. PHYSIC 121-122 provides a broader view of the ideas and concepts of physics for the non-science student.

PHYSIC 141-142 serves the needs of life science majors, including pre-med, physics majors. 161-162-163 provides the necessary background for majors in Engineering, Chemistry, Physics, Astronomy, and other Physical Science fields. Students with special interest and facility in Physics and Mathematics, especially prospective Physics or Astronomy majors, should elect the 170 series, the Honors version of the 160 sequence. Prospective majors with high school math deficiencies may take 100 or 116 while completing the mathematics prerequisites for the introductory sequences. They are also urged to take 185, the freshman colloquium.

All courses numbered 171 or higher are tentative, although substantial changes are not expected.

Majors are normally required to take MATH 131, 132, 165 or 127, 128, 132, 165, a year of a science outside physics, and 18 credits of upper division physics courses. These are 220 (Physical Electronics) or 222 (Intermediate Electricity and Magnetism), 221 (Mechanics) or 225 (Biophysics), 223 (Thermal Physics), 224 (Modern Physics) or 301 (Applied Modern Physics I), and two advanced lab courses. The latter may be chosen from 205 (Intermediate Laboratory), 320 (Radiation Physics), 321-322 (Electronics for Scientists), 376-377 (Advanced Lab). (ASTRON 237 or 238) may be substituted for one of these labs. PHYSIC

201 (Introductory Applied Physics) and 202 (Techniques of Theoretical Physics) are recommended but not required. These requirements may be completed in as little as two years, but the breadth obtained by taking additional courses requires additional time.

The student interested in physics as a profession will normally elect several advanced physics courses plus math courses such as 241-242 (Applied Analysis), 231 or 331 (Differential Equations) and 167 (Linear Algebra).

Students are encouraged to contact the department for further details. Professor M. M. Sternheim is the Director of Undergraduate Studies.

#### Zoology

The Zoology Department offers a variety of general interest courses in ecology, behavior, natural history, genetics, and physiology.

For students who decide to major in zoology, the curriculum provides the basic concepts and allows for individual interests. Zoology majors should complete ZOOL 240, Principles of Genetics; ZOOL 360, Cell Physiology; and one course from each of the following groups.

Vertebrate zoology: ZOOL 221, Comparative Anatomy; ZOOL 223, Histology or ZOOL 227, Embryology.

Invertebrate zoology: ZOOL 281, Biology of the Invertebrates; ZOOL 282, Biology of the Invertebrates or ZOOL 283, General Parasitology.

Ecology, Population, Behavior: ZOOL 243, Population Biology; ZOOL 335, Limnology; ZOOL 337, Ecology or ZOOL 350, Animal Behavior.

Physiology, Development: ZOOL 366, Vertebrate Physiology; ZOOL 370, Comparative Physiology or ZOOL 380, Developmental Biology.

Background knowledge aids understanding of zoological ideas; thus, additional requirements are: BOTANY 100, Introductory Botany; PHYSIC 141/142, Introductory Physics and MATH 127/128, Calculus for the Life and Social Sciences.

Students contemplating a major in zoology should also enroll in CHEM 111 their first semester in order to anticipate those zoology courses which have general chemistry (CHEM 111/112), organic

chemistry (CHEM 261/262 with laboratory), or biochemistry (BIOCHM 220 or 223) as prerequisites.

Students may substitute for MATH 127/128 either of the following sequences: STATIS 231/232; Fundamentals of Statistical Inference; or COINS 122, Introduction to Problem Solving, plus a second COINS course for which 122 is a prerequisite. Other substitutions are possible. For example, students with a strong interest in chemical biology may, with the permission of the Chemistry Department, substitute CHEM 113/114 for CHEM 111/112; those with a special interest in physics may wish to substitute PHYSIC 161/162/163 for PHYSIC 141/142. The Bachelor of Science degree requires a total of 60 credits in natural science, mathematics, or psychology. A few courses elected from these areas will bring a zoology major's program to the 60-credit level.

ZOOL 101, Introductory Zoology, is currently not required of zoology majors, but the faculty is preparing a first course in zoology (ZOOL 102) for its majors which will be required.

The curriculum for those who plan to become certified secondary school biology teachers is somewhat broader. Additional botany courses (BOTANY 125 and 126), and several psychology and education courses, as well as practice teaching, provide the needed background. Also ZOOL 135, Introductory Physiology, may be substituted for the last group of zoology courses listed above. Students are urged to contact the Science Education adviser in the School of Education early in their academic careers.

## **Faculty of Social and Behavioral Sciences**

### **Anthropology**

Anthropology majors must take ANTH 104 and one other of the following introductory courses: 102, 103 or 105. They should also take at least one other course in the social and behavioral sciences (either Sociology, Economics, Political Science or Psychology). All majors must elect a minimum of 30 credits in Anthropology, with at least 21 of these credits chosen from courses above the 100 level. The maximum acceptable credits in

Anthropology is 45. Students choosing Anthropology as a major are also required to take a course in quantitative methods selected from a list available from the department. Professor Donald Proulx is chief adviser for Anthropology.

### **Communication Studies**

Majors are required to select one of the following areas of concentration: 1) Interpersonal Communication and Rhetoric, recommended for students who plan to work as communication specialists in business, government or education, who wish to pursue careers in law, public affairs, politics and similar professions, or to prepare themselves for graduate study in Interpersonal Communication and Rhetoric; 2) Mass Communications, recommended for students who plan to pursue careers in mass media or mass media-related industries, or to prepare themselves for graduate study in Mass Communications; 3) Communication Education, required of all students who plan to earn a secondary school teacher's certificate in Speech Communication.

### **Economics**

Courses are offered in such topics as economic theory, international trade, industrial structure and regulation, labor economics and human capital, mathematical economics, economic history, lesser developed economies, comparative systems, regional and urban economics, public finance and history of economic thought.

A student who wishes a basic understanding of economics or completion of a (D) distribution requirement will probably take ECON 100, Elements of Economics. A student interested in a particular topic may take ECON 121, International Trade; ECON 131, Insecurity and Poverty; ECON 141, Labor Problems; ECON 172, The Soviet Economy; or ECON 181, Urban Problems; all of which presume no previous economics courses. A student expecting to take more than one economics course should begin with ECON 103, Microeconomics and continue with ECON 104, Macroeconomics. A student interested in developing economic tools of analysis further for a career in business or systems analysis, for example, can take ECON 203 and 204 after the two introductory courses.

Along with University and college re-

quirements the department requires majors to complete 24 credits in economics which must include 103, 104, 203, 204, and at least four other courses of the 200 or above level. The only other requirement is one of calculus such as 127, 131, or 135, or 190-290 so that students have some familiarity with the language in which so much of modern economics is conducted.

### **Political Science**

Courses in Political Science are broadly grouped into the fields of Political Theory, American Politics and Public Law, State and Local Politics and Public Administration, Comparative Politics and Area Studies, and International Relations.

The Political Science Department offers three introductory courses: 101 American Politics; 131 Comparative Politics, and 151 World Politics. Any of these courses meets the University requirement of an introductory course in social science. Political Science majors are required to take two of the above three courses.

Majors in Political Science are normally expected to complete the basic courses in their freshman or sophomore years. A minimum of nine additional courses is required. At least one course must be selected from each of the five fields: political theory, American politics and public law, state and local politics and public administration, comparative politics and area studies, and international relations. Any four additional Political Science courses will complete the Departmental distribution.

### **Psychology**

Course offerings in Psychology permit students to pursue various aspects of the subject to differing levels of depth, and to pursue programs of study which lead to either the B.A. or the B.S. degree.

Students interested in majoring in psychology should elect PSYCH 120, 130, 140, and 145.

The psychology major must elect the following: a minimum of 24 (and no more than 40) credits of advanced level courses in the Department. Included in the electives must be at least two courses from each of the following two groupings: A) 210, 220, 230, and 250; and B) 260, 270, and 280.

In addition, students interested in a

career in Psychology should plan to elect at least one laboratory course from each of the following groupings: A) 211, 221, 222, 231, and 251; and B) 261, 271, 281, and 282. These laboratory electives must be taken in proper sequence with their associated non-laboratory prerequisites or corequisites.

NOTE: Students electing the B.S. degree must fulfill the additional science requirements of the College. Students should discuss the available options with the Undergraduate Advising Office in Tobin Hall.

Professor Stanley Moss is Director of Undergraduate Studies.

### **Sociology**

The department offers a number of introductory courses at the 100-level, including: a) Contemporary American Society; b) Age, Sex, and Kinship in Contemporary Society; c) Social Problems; d) Drugs and Society; e) Sociology of Learning; Problems of Personal and Social Change; f) Urban Life and Industrial Society; g) Race, Sex and Social Class: Inequality in America; and h) Self, Society, and Interpersonal Relationships.

The sociology major requires a minimum of 27 credits or nine courses distributed as indicated below. No major is permitted to take more than a total of 36 credits or 12 courses in sociology.

Each major is required to take both SOCIOL 201 (Sociological Analysis I; Theories and Perspectives) and SOCIOL 202 (Sociological Analysis II: Data Collection and Analysis). These courses should be taken during the sophomore year. At least one sociology course, preferably at the 100-level, is a prerequisite for 201 and 202.

In addition to 201-202, each major is required to take at least one upper division course in three of the following five core areas, and no more than three courses can be taken for credit toward the major in any one core area. Core areas include: Social Organization and Institutions; Social Issues and Policies; Demography and Urban Sociology; Social Psychology; and Theory and Methods.

Professor Robert Faulkner is the departmental chief adviser. Mr. William D. Bathurst is information officer for sociology majors.

## Interdisciplinary Programs

### Classics & Philosophy

The Classics & Philosophy major is administered jointly by the two departments. It is designed for classicists with a philosophical bent and philosophers with an interest in Greek.

#### REQUIREMENTS

- 8 hours of credit in elementary and Intermediate Greek
- 6 hours of credit in Greek Readings
- 6 hours of credit in Classics
- 6 hours of credit in Philosophy
- 6 hours of credit in Ancient Philosophy
- 6 hours of credit in Special Classics and Philosophy
- seminars taken in the junior and senior years.

Questions may be directed to Professor Gareth Matthews, Philosophy Department; and to Professor Robert Dyer and Professor John Marry, Classics Department.

### Judaic Studies

Director of Judaic Studies and chairman of the committee is Professor Leonard H. Ehrlich. Student inquiries about any academic aspect of the program, such as the major, individual courses, or study abroad, may be directed to him or to the Director of Student Affairs, Professor Leora Baron.

Students who want to major in Judaic Studies must complete the following requirements:

- (a) Hebrew: One year introductory and one year intermediate Hebrew, or equivalent. Two semesters of Hebrew courses numbered 150 or above, or equivalent.
- (b) JUDAIC 100, 101 (The Jewish People, I and II).
- (c) 18 hours in courses, approved by the Judaic Studies Committee, numbered 200 or above. This requirement is in addition to (a) above.
- (d) The major student will devote no fewer than 9 of these 18 hours to an area of concentration approved by the Judaic Studies Committee. 6 approved areas are: Biblical Studies, History, Hebrew Language and Literature, Modern Literature, Religion, Area Study.

Entering freshmen who decide to take a

major in Judaic Studies are strongly advised to enroll in Hebrew in the freshman year.

### Latin American Studies

The University's Latin American Studies Program does not constitute a major and is designed to supplement the work done in another discipline. Those students who fulfill the requirements of the program are awarded the Certificate in Latin American Studies attesting to their attainment in area and language studies.

Requirements for the Certificate in Latin American Studies:

#### TRACK A

##### 1) Languages

(a) Students must demonstrate a practical working knowledge of Spanish or Portuguese.

(b) Completion of a one-year course in the other language (Spanish or Portuguese) with a grade of at least C.

##### 2) Area Studies

Successful completion (with a grade of C or better) of four courses in Latin American Studies selected from three distinct disciplines.

##### 3) Inter-disciplinary Courses

All students must take the Seminar on Latin America (LAT AM 390). They may also want to take LAT AM 392 — Bibliography for Latin American Studies.

#### TRACK B

##### 1) Languages

Students must demonstrate a practical working knowledge of Spanish or Portuguese.

##### 2) Area Studies

Successful completion of five courses in Latin American Studies selected from at least three distinct disciplines.

##### 3) Inter-disciplinary Courses

Students must complete both LAT AM 392, Bibliography for Latin American Studies, and LAT AM 390, Seminar on Latin America.

The Committee on Latin American Studies administers the program and advises interested students. Committee members for 1974-75 were:

Professor Robert A. Potash, Chairman (History)

Professor Howard A. Wiarda (Political Science)

Professor Robert Bancroft (Spanish and Portuguese)  
Associate Professor Donald A. Proulx (Anthropology)  
Associate Professor Richard W. Wilkie (Geography)  
Associate Professor Michael Best (Economics)

**INTERDISCIPLINARY MAJORS IN LINGUISTICS**

The Department of Linguistics offers five interdisciplinary majors: Linguistics & Philosophy, Linguistics & Chinese, Linguistics & German, Linguistics & Japanese, and Linguistics & Russian.

Students interested should first see the undergraduate adviser in Linguistics. Students wishing to pursue a joint major in linguistics and other disciplines (for example, Linguistics & English, Linguistics & Psychology, Linguistics & Anthropology, or Linguistics & Computer Science) should also see the undergraduate adviser in Linguistics. Joint majors in these fields have in the past been approved through the Bachelor's Degree with Individual Concentration.

Questions may be directed to Professor Donald Freeman, Linguistics Department.

**Linguistics & Philosophy**

**Prerequisites:** Two years (or equivalent) of a foreign language to be taken before the junior year, plus 42 semester hours of credit distributed between philosophy and linguistics, and including each of the above or equivalent.

**Linguistics & Chinese**

**Prerequisites:** Successful completion of four semester courses in Chinese (24 credits): CHINSE 126, 146, 226, 227 or equivalent. Thirty-five credits distributed between Linguistics and Asian Studies.

**Linguistics & German**

**Prerequisites:** Successful completion of four semester courses in German (12 credits): 110, 120, 130, 140, or equivalent. Thirty credits distributed between linguistics and German such that at least 14 credits are earned in courses bearing German numbers over 200.

Students will be encouraged to take graduate courses in the older Germanic languages for undergraduate credit and may also opt to take courses in German literature or civilization courses and/or

language courses in Danish, Dutch, Swedish.

**Linguistics & Japanese**

**Prerequisites:** Successful completion of four semester courses in Japanese (24 credits): JAPAN 126, 146, 226, 227 or equivalent. Thirty-five credits distributed between Linguistics and Asian Studies.

Other courses may be selected from the course list of the Five College Asian Studies program.

**Linguistics & Russian**

**Prerequisites:** Successful completion of four semester courses in Russian: RUSS 110, 120, 130, 140 or equivalent. Thirty credits distributed between Linguistics and Slavic Languages, and including at least 18 credits earned in courses bearing Russian catalog numbers. The language courses taken as a prerequisite to the major may be counted towards these 18 credits, which are required for state certification, but not toward the major.

Courses may be selected from the offerings of the Slavic languages departments in the Five College area.

**Mathematics & Philosophy**

**Requirements:** A minimum of 36 semester hours of credit in courses offered in the two departments. Satisfaction of the following requirements of distribution:

(a) *The Mathematics Requirement.* Satisfactory completion of MATH 136, 167, and four other courses from among 165 (or 166), and courses numbered above 200, including a two-semester sequence.

(b) *The Philosophy Requirement.* Satisfactory completion of any three courses from among PHIL 161, 162, 201, 205, 230, and 261. Satisfactory completion of PHIL 374 and one other course numbered above 200.

COINS 285 may be taken in partial fulfillment of requirement (a) or requirement (b) (but not both).

(c) *The Logic Requirement.* Satisfactory completion of MATH 381 or both of PHIL 372 and 373. (Note: These courses count toward satisfaction of requirements (a) and (b), respectively.)

For further information, see Professor Michael Jubien, co-director of the program for Philosophy, or Professor Frank Wattemberg, co-director for Mathematics.

### Near Eastern Studies

The University of Massachusetts, Amherst, offers an interdisciplinary and interdepartmental major in Near Eastern Studies. The major is administered by the following members of the Near Eastern Studies Committee, under the chairmanship of Professor Vartan Artinian of the Department of Classics (737 Herter Hall: telephone 545-0513):

Leora Baron, Department of Classics, 529 Herter Hall, 545-0543

Jack Benson, Department of Art, 323A Bartlett Hall, 545-2659

David Biddle, Department of History, 707 Herter Hall, 545-0672

Walter Denny, Department of Art, 229C Bartlett Hall, 545-2729

Charles Isbell, Department of Classics, 540 Herter Hall, 545-0543

George Kirk, Department of History, 617 Herter Hall, 545-0547

Archibald Lewis, Department of History, 604 Herter Hall, 545-0630

Leila Meo, Department of Political Science, 338 Thompson Hall, 545-0413

Edward Phinney, Department of Classics, 533 Herter Hall, 545-0514

Niki Stavrolakes, Department of Classics, 542 Herter Hall, 545-0542

Students majoring (or planning to major) in Near Eastern Studies may consult any of the above members of the Committee for help in arranging programs of study. Professor George Kirk is chief adviser for Near Eastern Studies majors. The major consists of a minimum of 24 upper level credits in courses chosen from an approved list. The complete list is published by the Five College Coordinator and may be obtained from Professor Artinian. Near Eastern Civilizations I and II, and two years or the equivalent of a Near Eastern language (Arabic, Armenian, Hebrew, Persian, Turkish) are required. Students should begin the major by taking NEAST 100 and Near Eastern language course. Those wishing to concentrate in the area of ancient Near Eastern studies may arrange to study Akkadian, Aramaic, and Ugaritic with Professor Charles Isbell. Students are urged to spend a summer, a semester, or a full academic year in the Near East (please see Professor Vartan Artinian, David Biddle, George Kirk, or Leila Meo for available programs).

### Pre-Dental, Pre-Medical, and Pre-Veterinary Programs

A student planning to enter a dental, medical, optometry, podiatry, osteopathy, or veterinary school should select a major department in the field of greatest interest. This will usually be in the College of Arts and Sciences, but may be in other colleges or schools. Pre-veterinary students frequently select a major in the College of Food and Natural Resources. Preparation for the professional schools requires relatively few specific courses beyond those necessary to obtain the bachelor's degree.

Minimum preparation for the pre-professional student must include one year of inorganic, one year of organic, and one semester of analytical chemistry, three semesters of biology, one year of college mathematics, and one year of physics. Certain additional courses in biology, chemistry, or mathematics may be required or recommended by some dental, medical, and veterinary schools. Students should consult their advisors as well as professional school catalogs in regard to specific requirements of particular schools. Freshmen who intend to include the pre-professional courses in the curriculum should discuss their plans with the summer counseling adviser, as some change in the normal course sequence may be desirable.

Students, who by their work in the first year demonstrate a potential for success, may, in their third semester, apply to the Pre-Professional Advisory Committee for entrance into the pre-medical, pre-dental, or pre-veterinary major.

A library of dental, medical, optometry, osteopathy, podiatry, and veterinary school catalogs and other pertinent material is maintained in the committee office, Room 206 Goessmann.

Individual members of the advisory committee are available for counsel to all interested students. The committee membership for 1975-76 consists of 17 faculty members from Natural Sciences, Psychology, Health Sciences and Food and Natural Resources. Dr. W. Brian O'Connor, Associate Professor/Zoology is Chairman of the Committee.

### Science Major

This is an interdepartmental major, based on courses in the departments of the Fac-

ulty of Natural Sciences and Mathematics (Biochemistry, Botany, Chemistry, Computer and Information Science, Geology, Mathematics/Statistics, Microbiology, Physics/Astronomy, and Zoology). The major is coordinated and administered by a committee composed of the chief undergraduate advisors of these departments, a representative of the Pre-Med committee, and the assistant dean of Natural Sciences & Mathematics. The major is intended for the student who has a broad interest in sciences but does not wish to specialize, and has requirements in the areas of foundational work, depth, and breadth.

In the foundations area the requirements are: (1) two courses from Math or COINS (Computer and Information Science) or Statistics; (2) two courses from each of Physics and Chemistry plus one more from Physics, Chemistry or Geology; and (3) two courses from the departments of Biochemistry, Botany, Microbiology, or Zoology.

The depth requirement consists of a primary concentration of at least six courses in one department and a secondary concentration of at least four courses in another department in NS&M, with the primary concentration including at least four upper division courses.

To complete the major, the breadth requirement calls for a total of 20 courses chosen from at least six of the nine NS&M departments. For more detailed information contact CASIAC or any member of the coordinating committee.

#### **Social Thought & Political Economy**

The Social Thought & Political Economy program is an interdisciplinary major that combines related offerings of the following departments: Anthropology, Economics, History, Philosophy, Political Science, Psychology, and Sociology.

Students choose a concentration either in Social Thought or in Political Economy.

#### **Requirements**

- (a) 12 hours of credit at the introductory level in at least three of the departments listed above;
- (b) 18 hours of credit in courses numbered 200 or above, selected in consultation with the adviser, from the offerings of the departments listed above;
- (c) 6 hours of credit in a two-semester

senior year team-taught seminar restricted to the STPEC majors.

For more information, contact Karen Warren, in the Office For Interdisciplinary Studies, housed in CASIAC, Machmer Hall.

#### **Soviet and East European Studies**

This program provides an opportunity to study the Soviet and East European area from the perspective of several academic disciplines. Requirements for a major are:

1) Proficiency in a relevant language (usually Russian) at a level adequate to enable the student to conduct research in that language;

2) Successful completion of 10 courses dealing with the area in a minimum of three disciplines to be chosen from Anthropology, Economics, History, Political Science, Slavic Languages and Literatures, and Sociology;

3) Two courses in modern European history.

The Committee on Soviet and East European Studies administers the program. Members are: Zdenek Salzmann (Anthropology); Paul Hollander (Sociology); Robert Jones (History); Maurice I. Levin (Slavic); Stanley Radosh (Slavic Bibliographer); Karl Ryavec (Political Science) and J. Joseph Lake, Chairman. Questions regarding the details of this program may be obtained from the Department of Slavic Languages and Literatures, Herter Hall 438, or from Professor Karl Ryavec, Department of Political Science, Thompson Hall.

#### **Western European Area Studies**

The Western European Area Studies Program is an informal "minor" which complements a wide variety of departmental majors.

The requirements for the Western European Studies (WEST) Certificate are: 1) a minimum of one upper-level course in each of three disciplines relating to Western Europe beyond the designated major; 2) at least one interdisciplinary seminar given under the auspices of the WEST program (WEST 291 or 391); 3) a working knowledge of one modern Western European language (normally 18 credits) in addition to English (a reading knowledge of a second foreign language is recommended). These requirements may be met by courses taken at the University, at one

of the four institutions in the Five College system, or in one of the overseas programs.

Students should design their programs in consultation with their departmental advisor.

WEST Executive Committee, 1975-76: Eric Einhorn (Political Science), Director; Paul Mankin (French), and Marvin Swartz (History).

## **School of Business Administration**

The first two years emphasize general education by providing fundamental courses in the humanities, communication skills, mathematics, and the social sciences. In addition, basic courses in accounting, economics, computer science, and business law prepare the student for further work in the School of Business Administration. The junior and senior years emphasize a greater degree of specialization. The "core" consists of introductory courses in Finance, Marketing, and Management. Each course of study leads to a degree of Bachelor of Business Administration.

Students who intend to transfer from junior or community colleges should complete the program in liberal arts and not register for courses in Business Administration, except Principles of Economics and Elementary Accounting.

The School of Business Administration is a member of the American Association of Collegiate Schools of Business.

**Freshman Year:**

**First Semester:**

RHET 100(C), MATH 120, ECON 103, Non-Business Elective, Humanities Elective (C)

**Second Semester:**

RHET 110 (C), MATH 121, ECON 104, Non-Business Elective, Elective.

### **Accounting**

Students majoring in accounting may concentrate their study in one of several career areas:

- a. public accounting
- b. information systems
- c. management accounting and
- d. a general program which provides

flexibility for students to meet specific individual career goals.

### **General Business and Finance**

The department offers five programs of study and other specifically designed programs for those students who wish to combine Business Administration with a related field of study outside the School of Business Administration. The five are in Financial Management, General Business, Business Economics, Management Science, and Urban and Regional Studies.

### **Management**

Courses normally include such topics as management practices, personnel policies, manpower planning, social responsibilities of business, labor and industrial relations, the uses of computers in organizations, and theories of organizational behavior.

### **Marketing**

The department's objective is to provide a specialized and comprehensive understanding of today's managerial marketing problems, whether they pertain to the business sector or marketing-conscious nonprofit organizations.

## **School of Education**

The School of Education is committed to developing alternative educational programs to address significant educational issues in contemporary American society. The undergraduate program focuses on teacher education for both elementary and secondary certification.

Clusters are the basic academic unit of the School, operating as focal points for the various teacher education programs. Presently the clusters are: Designs for Effective Learning, Division of Educational Planning and Management, Division of Humanistic Applications of Social and Behavioral Sciences in Education, Educational Policy Studies, and Transdisciplinary Education.

An integral part of the academic program is the administrative/instructional procedure called Flexible Curriculum, based on the philosophy that alternative instructional formats provide an improved potential in the effectiveness and responsiveness of a total curricular program.

Each Learning Experience carries an agreed-upon number of modules of credit on an accumulating basis. One hundred modules is equivalent to 1 University credit. There also exists significant opportunity for individualized study, including independent studies and practica.

All teacher education programs leading to certification are coordinated and approved through the Teacher Education Council (TEC). There are over a dozen alternative programs currently available for candidates in elementary or secondary teacher education, many of which have inservice as well as preservice components. Placements for field work are available in a wide variety of locations ranging from areas in Western Massachusetts to international locations.

All students seeking certification must enroll in a TEC program. Those students majoring in Education but whose career plans do not include teaching, may develop a non-teaching major within the School.

Students are encouraged to inquire at the Education Advising Office, 125B School of Education.

## CLUSTERS

### **Designs For Effective Learning (DEL)**

The students, staff and faculty of this cluster share the following commitments:

- 1) Learning through experience — to create institutional means for a reality-based education.
- 2) Learning throughout life — to create models for open-ended education for all involved in the education process.
- 3) Learning to change — to enable schools, programs, and institutions to adapt through continuous self-renewal.
- 4) Learning through diversity — combating institutional and personal racism.
- 5) Creating a new design for higher education — to evolve an institutional model.

### **Division of Educational Planning and Management (DEPM)**

The Division of Educational Planning and Management cluster is comprised of six academically oriented sub-units. These are the Center for Curriculum and Organization (CCO), the Center for Educational Research (CER), the Clinic to Improve

University Teaching (CIUT), the Center for Leadership and Administrative (CLA), the Center for Occupational Education (COE), and the Academic Disciplines Program: Science and Social Studies.

To confront problems in schooling at a fundamental level, the Center for Curriculum and Organization prepares its members to focus on the teacher-learner encounter in schools.

The Center for Educational Research specializes in research, development, dissemination, and evaluation work within the context of professional education.

The Clinic to Improve University Teaching assists faculty members in improving the quality of instruction offered.

The Center for Leadership and Administration seeks to provide opportunities for each student to enhance his/her qualifications to assume important leadership positions in education.

The focus of the Center for Occupational Education is to instill quality and professionalism into teaching in occupational education; to thoroughly equip and train teachers in specific occupational areas, to develop leadership and administrative abilities in occupational educators; and, through related research, to develop new and relevant occupational programs.

The Academic Disciplines Program (Science and Social Studies) prepares students from other academic departments for careers as secondary science or social studies teachers.

### **Division of Humanistic Applications of Social and Behavioral Sciences in Education (HAPPS)**

This cluster seeks to assist people in their historical and ontological vocation of becoming more fully human by applying the social and behavioral sciences directly to the education of individuals and to the transformation of the institutions that facilitate or impede human development. Change methods vary from individual counseling and therapy to group methods for deliberate psychological education to organizational development strategies for changing larger social systems. The settings in which these methods are applied also vary widely from schools, mental hospitals and prisons to detention centers, half way houses, community mental health centers, drug education units.

### **Educational Policy Studies (EPS)**

The major focus is on attaining greater understanding of the educational process.

EPS operates via systematic, theory-based investigation and action. Experiments which test a theory, action projects which apply theory, and conceptual investigations which develop and combine theories are highly encouraged. Ultimately the concern of EPS is to bring systematic knowledge to bear on matters of public policy and particularly those aspects of public policy which effect the formulation and modification of educational policy.

### **Transdisciplinary Education (TD)**

The Transdisciplinary Education cluster offers study of transdisciplinary topics such as perception, rhetoric, and movement. This cluster concentrates on training in the fields of bilingual/bicultural education, communication arts (arts and humanities, reading and media), special education, and transdisciplinary education/alternative schools. Participants in Transdisciplinary Education cluster programs often utilize the resources in the four other clusters in the School of Education.

### **Human Development**

Students interested in Human Development should contact the Early Childhood Education Program in the Educational Policy Studies cluster.

## **School of Engineering**

The School of Engineering offers curricula in Chemical Engineering, Civil Engineering, Industrial Engineering and Operations Research, Electrical and Computer Systems Engineering, and Mechanical Engineering. Each of the curricula leads to the Bachelor of Science degree. All curricula are accredited by the Engineers Council for Professional Development.

The curricula in engineering offer sound training in mathematics and basic chemistry and physics. About 20 percent of class time is devoted to studies in the social science and humanistic area. Some opportunity is provided to elect courses from both the technical and humanistic-social fields. The curriculum of the freshman year is the same for all.

The School contains five administrative departments, and there are a variety of optional programs available to upper-class students in each of these departments. Many of these are interdisciplinary in nature. Thus, for example, students may concentrate in areas such as Materials, Systems, the Environment, Bioengineering, Food Engineering, Pre-Medical, Transportation, Urban Systems, and Energy.

Although the curricula within the School of Engineering are shown as eight semester (normally four years), they require up to 130 semester hours credit for satisfactory completion. This is well above the University minimum of 120 semester hours for a degree.

### **Freshman Engineering**

All new students in engineering are enrolled in the Freshman Engineering Program until qualified to enter into a degree program, normally on satisfactory conclusion of the uniform freshman year.

### **COURSE REQUIREMENTS —**

#### **Freshman Year:**

#### **First Semester:**

RHET 100, MATH 131 (4 cr.), CHEM 100 (4 cr.), ENGIN 103 or 104, Social Science/Humanities Elective.

#### **Second Semester:**

Rhetoric Elective, MATH 132 (4 cr.), Hum., Soc. Sci. or Science Elective, ENGIN 103, PHYSIC 161 (4 cr.).

### **Chemical Engineering**

The Chemical Engineering Department, has introduced several innovations in career preparation in addition to its traditional program. These new developments offer much flexibility and provide the opportunity for a student to concentrate in career-oriented and interdisciplinary programs culminating in the award of an accredited B.S. degree in Chemical Engineering with emphasis in one of several chosen interdisciplinary fields of specialization. These include environmental engineering, bioengineering, food science and business administration.

Most recently added is the new Pre-Medical Option in chemical engineering. With minor modifications in the basic chemical engineering program, a student can also satisfy the course requirements for admission to medical school.

**Civil Engineering**

Civil engineering programs are offered emphasizing construction, transportation, water supplies, pollution control, ocean engineering, hydraulic engineering and fluid mechanics, soil mechanics and foundations engineering, surveying and mapping, structural engineering and materials engineering.

**Electrical and Computer Engineering**

As continued study after graduation is essential in this rapidly growing field, basic physical and systems principles are emphasized in the undergraduate program.

A program leading to a degree of Bachelor of Science in Computer Systems Engineering is also available. This program gives broad coverage to the various aspects of computer systems engineering and its underlying mathematics. However, there is much freedom for a student to explore in depth any area of particular interest including mathematics and theory of computation, machine organization, communications, electronics and device technology, numerical analysis, and theory of programming languages and syntactic analysis.

Further information on these programs may be obtained from the Department of Electrical and Computer Systems Engineering.

**Industrial Engineering and Operations Research**

In view of the wide variety of potential careers for IE/OR people, the curriculum is flexible. The 11 required courses in the Department (33 credit hours) sketch the central concepts of the profession and provide the core of its quantitative methods. Since the areas of application (and potential careers) are so varied, a block of nine courses (27 credit hours) is set aside so that each student may design an individual curriculum in conjunction with the adviser.

**Mechanical Engineering**

Students majoring in mechanical engineering may choose from alternative options emphasizing mechanical, or materials studies. Extensive offerings exist in energy, manufacturing and design. Mechanical engineers design and analyze a wide variety of systems in fields such as manufacturing, energy conversion, and

transportation. Materials engineers study the atomic structure of materials, polymers, materials processing, and materials analysis.

**College of Food and Natural Resources**

Undergraduate students in the College of Food and Natural Resources are exposed to an interdisciplinary, systems-oriented, problem-solving atmosphere.

A unique feature of the College of Food and Natural Resources is that the faculty for all the major programs is drawn from the three divisions of the College — research, resident teaching and extension, thereby bringing depth of teaching to every student.

**INTERNATIONAL AGRICULTURAL STUDIES (Interdepartmental Program)**

Students in this major choose a program from among those offered in the College of Food and Natural Resources and carry a specialty of International Studies within the chosen major. Supplementing major requirements are selected courses in Sociology, Anthropology, Geography, Economics, and Political Science. Students are urged to volunteer for two years of service in the Peace Corps or a similar organization upon completion of their B.S. degree.

**STOCKBRIDGE SCHOOL OF AGRICULTURE**

The Stockbridge School, an academic sub-unit of the College, offers two-year technically oriented programs in the food and agricultural sciences which lead to an Associate Degree. A separate bulletin describes these offerings in detail.

**Entomology**

Freshman Year:

First Semester:

CHEM 111 General, MATH 127 Calculus, Rhetoric elective, Humanities or Social Science elective, Elective.

Second Semester:

CHEM 112 General, MATH 128 Calculus, ZOOL 101 Introductory, Rhetoric elective, Humanities or Social Science elective.

**Environmental Sciences**

The following four courses are required of

all Environmental Sciences majors: ENVSCI 201 (Introductory Environmental Biology), 203 (Methods of Pollution Measurement), 390 (Perspectives of Environmental Sciences), and 391 or 392 (Seminar; Options in Environmental Management). In addition, students elect four more courses from the upper level offerings of the department. The 24 credit Department of Environmental Sciences requirement plus the 44 credit math/science requirement will more than satisfy the 60 credit science/math requirement for a B.S. degree.

The Environmental Sciences major will have an outside the department requirement. With the aid of an adviser, the student will choose and plan an integrated and individualized 12-credit course of study.

**Sample Program:**

**Freshman Year:**

BOTANY 100 (4 cr.), CHEM 111, F&R EC 177, RHET 100, Humanities or Social Science Elective, ZOOL 101, CHEM 112, Rhetoric (B), Humanities (C) and Social Science (D) Electives.

**Sophomore Year:**

CHEM 261 or 263 (4 cr.), MATH 127, ENVSCI 201, Social Science (D), Humanities (C), CHEM 262 or 264 (4 cr.), MATH 128, ENVSCI 203, ENVSCI Elective, Conjugate Area Electives.

**Junior Year:**

PHYSIC 141 (4 cr.), MICBIO 250, ENVSCI 390, Humanities (C) or Social Science (C), PHYSIC 142 (4 cr.), MICBIO 251, ENVSCI Elective, Conjugate Area Electives.

**Senior Year:**

ENVSCI Elective, Electives, ENVSCI 391 or 392, Conjugate Area Elective, ENVSCI Elective, Electives.

**Food & Agricultural Engineering**

The program emphasizes the integration of mathematics and the physical sciences into the interpretation and solution of biological production and processing problems.

**Freshman Year:**

**First Semester:**

RHET 100, Language & Writing, CHEM 111, MATH 135 Anal. Geom. & Calculus I, Social Science Elective, ENGIN 103 Graphics.

**Second Semester:**

Humanities Elective, CHEM 112, MATH 136 Anal. Geom. & Calculus II, PHYSIC 161 General (4 cr.), ENGIN 104 Problems (2 cr.)

**Food & Resource Economics  
AGRICULTURAL ECONOMICS**

**Freshman Year:**

**First Semester:**

RHET 100, or 110 (B), Humanities (C), Social Science (D), MATH 110 El. Tech. of Math (E), F&R EC 110 World Food (D).

**Second Semester:**

Rhetoric (B), Humanities (C), Social Science (D), Math or Natural Science (E), F&R EC — 206 Agricultural Economics.

**FOOD MARKETING ECONOMICS**

**Freshman Year:**

**First Semester:**

RHET 100, or 110 (B), Humanities (C), Social Science (D), MATH 110 El. Tech. of Math (E), F&R EC 110 World Food (D).

**Second Semester:**

Rhetoric (B), Humanities (C), Social Science (D), Math or Natural Science (E), F&R EC 206 Agricultural Economics.

**RESOURCE ECONOMICS**

**First Semester:**

RHET 100, or 110 (B), Humanities (C), Social Science (D), MATH 110 El. Tech. of Math (E), F&R EC 110 World Food (D).

**Second Semester:**

Rhetoric (B), Humanities (C), Social Science (D), Math or Natural Science (E), F&R EC 206 Agricultural Economics.

**Food Science & Nutrition**

Two majors are available in the Department: Food Science and Human Nutrition. Six options are available in the food Science major: 1) Nutrition, 2) Business, 3) Processing and Engineering, 4) Chemistry, 5) Microbiology, 6) Independent Concentration.

Four options are available in the Human Nutrition major: 1) Community and Public Health Dietetics, 2) Dietetics, 3) Computerization, 4) Independent Concentration.

**Freshman Year:**

**First Semester:**

RHET 100 or 110, CHEM 111, MATH 127, Electives (C) or (D).

**Second Semester:**

Rhetoric, CHEM 112, MATH 128, FS&N 251, Electives (C) or (D).

**Forestry & Wildlife Management  
FISHERIES BIOLOGY**

**Freshman Year:**

**First Semester:**

RHET 100 Language and Writing, MATH 127 Calculus, BOTANY 100 Intro., CHEM 111 Inorganic, NAREST 100 Cons. of Natural Resources.

**Second Semester:**

RHET 110 Language and Speaking, MATH 128 Calculus, ZOOL 101 Introductory, CHEM 112 Inorganic, Social Science Elective.

**FORESTRY**

Six curricular options are offered: General Forestry, Environmental-Urban Forestry, Forest-Business Management, Forest Hydrology, Forest Recreation, and Forest Science.

**Freshman Year:**

**First Semester:**

RHET 100 Language and Writing, MATH 127 Calculus, CHEM 111 Inorganic, BOTANY 100 Intro., NAREST 100 Cons. of Natural Resources.

**Second Semester:**

Rhetoric Elective, MATH 128 Calculus, CHEM 112 Inorganic, Humanities, Social Science.

**NATURAL RESOURCE STUDIES**

A non-professional curriculum designed for students who wish to become generalists in the area of natural resource management and conservation.

**Freshman Year:**

**First Semester:**

RHET 100 or 110, NAREST 100 Cons. of Natural Resources, BOTANY 100 or ZOOL 101, MATH (on basis of tests), Humanities or Social Science.

**Second Semester:**

Rhetoric Elective, Natural Resource Elective, BOTANY 100 or ZOOL 101, CHEM 110 (or higher) (4 cr.), Humanities or Social Science.

**WILDLIFE BIOLOGY**

Study toward the Bachelor of Science in Wildlife Biology should be regarded as pre-professional.

**Freshman Year:**

**First Semester:**

RHET 100 or 110, MATH 127 Calculus, CHEM 111 General, BOTANY 100 Intro. (4 cr.), NAREST 100.

**Second Semester:**

Rhetoric (B), MATH 128 Calculus, CHEM 112 General, ZOOL 101 Introductory, ECON 103.

**WOOD SCIENCE & TECHNOLOGY**

**Freshman Year:**

**First Semester:**

RHET 100 Language and Writing, MATH 123 Calculus, BOTANY 100 Intro., CHEM 111 Inorganic, ENGIN 103 Introductory.

**Second Semester:**

RHET 110 Language and Speaking, MATH 124 Calculus, FOREST 112 Dendrology, CHEM 112 Inorganic, ENGIN 104 Introductory (2 cr.)

**Home Economics**

The professional options in the Division of Home Economics include the following:

Home Economics Education, Fashion Marketing, Home Economics Cooperative Extension, Consumer Economics, and Community Services.

Individualized interdisciplinary programs may be pursued.

Programs for majors in the Division of Home Economics for the Freshman year:

**HOME ECONOMICS EDUCATION OR  
FASHION MARKETING**

**First Semester:**

RHET 100, PSYCH 101 or SOCIOL 101 or ECON 100, Math or Science, HEEd. Majors elect: HOM EC 259, Quality Analysis of Apparel, HOM EC 240, Textiles for Consmr. I, Fashion Mktg. Majors elect: HOM EC 170, Fashion Marketing, HOM EC 240, Textiles for the Consumer I.

**Second Semester:**

RHET 110, PSYCH 101 or SOCIOL 101 or ECON 100, Math or Science, HEEd. Majors elect: HOM EC 125, Basic Design, HOM EC 255, Man & Clothing; Fashion Mktg. Majors elect: HOM EC 255, Man & Clothing; HOM EC 276, Product Analysis: Non-Textiles.

**CONSUMER ECONOMICS,  
COOPERATIVE EXTENSION OR  
COMMUNITY SERVICES**

First Semester:

RHET 100, PSYCH 101 or SOCIOL 101,  
ECON 100, Math or Science, Elective.

Second Semester:

RHET 110, PSYCH 101 or SOCIOL 101,  
HOM EC 211, Economic Problems of the  
Family, Electives.

#### **Hotel, Restaurant & Travel Administration**

In addition to required core curriculum courses, students take courses in accounting and control; personnel and management; food planning, purchasing, preparation, and service; promotion, merchandising and sales; kitchen planning and maintenance, travel and tourism. Emphasis is on principles, analysis, computer application, and decision-making.

Freshman Year:

First Semester:

RHET 100 Language and Writing, MATH 120, HRTA 100 Introduction, Science Requirement (E), PSYCH 101 or SOC 101, HRTA 203 Guest Lecturers (1 cr.).

Second Semester:

RHET 110 Language and Speaking, HRTA 156 Food Prod. Mang. I, Science Requirement (E), Humanities Requirement (C), STATIS 121 or F&R EC 177.

#### **Landscape Architecture & Regional Planning**

##### **ENVIRONMENTAL DESIGN**

Students who are interested in Planning and/or a general introduction to problems of the Physical/visual environment should select courses under the parent major: Environmental Design; those interested in Landscape Architecture should select courses under the Option in Design Studio, which has limited enrollment.

A 2.0 cumulative quality point average is required for admission as a major. Admission to the Design Studio Option and to the senior year studio courses is based on the following criteria: 1) Demonstrated aptitude in design; 2) an overall cumulative average of not less than 2.50; 3) a cumulative average in departmental courses of not less than 3.00; and 4) permission of the design faculty.

Aptitude in design is measured through a one-day testing program taken at the end of the Sophomore year.

Freshmen and sophomores should con-

centrate on fulfilling University core requirements. Some recommended courses are:

for Env. Des. majors: HIST 150, 151  
ECON 103; POL SCI 220; PSYCH 101  
SOCIOL 103; BOTANY 100; GEOL 101  
STATIS 231, 232.

for Design Studio Opt.: ART 100, 111, 113  
ANTH 104; SOCIOL 103; PSYCH 101  
BOTANY 100 or 121; GEOL 101.

#### **PARK ADMINISTRATION**

A 2.0 cumulative quality point average is required for admission as a major. Freshmen and Sophomores should concentrate on fulfilling University core requirements. Certain core courses are required for this major and others are recommended as follows:

Required: PSYCH 101; SOCIOL 101;  
BOTANY 100 or 121; STATIS 231

Recommended: HIST 150, 333; POL SCI 219 or 220; BOTANY 221; GEOL 101; STATIS 232.

#### **Plant Pathology**

Freshman Year:

First Semester:

Mathematics, CHEM 111 General,  
BOTANY 100 General, Foreign Lang. or  
F&R EC 110 World Food & Nat. Res., RHET 100.

Second Semester:

PLPATH 100, CHEM 112 General, ZOOL 101 General, Elective, Rhetoric.

#### **Plant & Soil Science**

The Department of Plant & Soil Science offers three options for major students:

Plant Industry — (Agronomy, Floriculture & Ornamental Horticulture, Pomology, Vegetable Crops, and Turf Management.)

Freshman Year:

First Semester:

RHET 100, Lang. & Writing, or RHET 110, Lang. & Speaking, BOTANY 100, Intro. Botany (4 cr.), Mathematics, PLSOIL 110, Plant Propagation, "D" Elective.

Second Semester

Rhetoric, "D" Elective, CHEM 110, Gen. Inorganic (4 cr.), PLSOIL 100, Basic Plt. Sci., "C" Elective.

#### **Plant Science**

Freshman Year:

**First Semester:**

RHET 100, Lang. & Writing or RHET 110, Lang. & Speaking, BOTANY 100, Intro. Botany (4 cr.), Mathematics, PLSOIL 110 Plant Propagation, "D" Elective.

**Second Semester**

Rhetoric, "D" Elective, Mathematics, PLSOIL 100, Basic Plt. Sci., "C" Elective.

**Soil Science**

**Freshman Year:**

**First Semester:**

RHET 100, Lang. & Writing or RHET 110, Lang. & Speaking, BOTANY 100, Intro. Botany (4 cr.), Mathematics, PLSOIL 100 Plant Propagation, "D" Elective.

**Second Semester:**

Rhetoric, "C" Elective, Mathematics, PLSOIL 100, Basic Plt. Sci., "D" Elective.

**Veterinary and Animal Sciences**

The curriculum in the Animal Sciences, including poultry, provides fundamentals in the comparative nutrition, physiology, genetics, and management of various classes of livestock and the role of animal production in the national and world economy. Options emphasizing commercial animal production are supported by electives in agricultural economics, agricultural engineering, and business administration. Students interested in graduate work in such specialized areas of the animal sciences as nutrition, physiology or genetics should elect programs with stress on the sciences. Freshman pre-veterinary students in the College of Food and Natural Resources usually major in Animal Sciences, but may choose other departments if appropriate.

**Freshman Year:**

**First Semester:**

AN SCI 121 Introduct., BOTANY 100 General, CHEM 111 General, MATHEMATICS, RHET 100.

**Second Semester:**

Elective, CHEM 112 General, MATHEMATICS, Social Science, Rhetoric.

**School of Health Sciences**

The School of Health Sciences includes the Division of Nursing, the Division of Public Health, and the Department of Communication Disorders.

**Division of Nursing**

The Division of Nursing offers an undergraduate program which leads to the degree of Bachelor of Science in Nursing (B.S.N.). This program is approved by the State Board of Registration in Nursing, and is accredited by the National League for Nursing. Enrollment in recent years has been highly competitive, and is currently limited to 200 students per class. There will be no admissions to this program for the 1977-78 academic year.

There are two components of the program: 1) lower division core and university core requirements; and 2) the upper division nursing science major. Nursing core may be completed at this University or in other colleges.

Clinical learning experiences are community based in four Satellite Learning Centers. These Centers are located in the following geographic areas: Amherst-Northampton, Franklin County, Springfield-North, and Model Cities-Springfield.

**Requirements for Admission and Application Procedure**

The requirements for admission to the upper division are: 1) successful completion of 60 semester hours of lower division preparation; 2) a minimum cumulative grade point average of 2.5; 3) achievement of a grade of at least "C" in each prerequisite course; and 4) a minimum grade point average of 2.5 for all core courses.

Students with a variety of academic and nursing backgrounds may apply for admission. Students may have earned credits in other colleges/universities in the Arts and Sciences or they may satisfy these requirements by satisfactorily completing CLEP (College Level Entrance Proficiency) Examinations in certain Arts and Science subjects, such as Chemistry, Microbiology, etc. (The University requires 45 semester hour credits to be taken in residence).

The National League for Nursing Comprehensive Examinations will be used for guidance and placement in the program. Students in the major will be expected to take all senior level nursing science courses.

All students seeking admission and information concerning examination details and requirements should contact the Admissions Office or the Division of Nursing.

Core requirements to the nursing major are starred (\*) below.

**Freshman Year:**

**First Semester:**

CHEM 111, Humanities, Rhetoric, \*Anthropology, \*Physics.

**Second Semester:**

CHEM 112, Rhetoric, \*Statistics (Applied), \*HUMDEV 370, \*Perspectives in Nursing and Allied Health Sciences (Interdisciplinary Approach).

**Sophomore Year:**

**First Semester:**

\*Human Anatomy and Physiology, \*MIC-BIO 140, \*PHIL 125 (Logic), \*Biochemistry, \*PSYCH 201.

**Second Semester:**

\*Human Anatomy and Physiology, SOCIOL 101, Humanities, \*Principles and Skills Basic to Professional Nursing and Health Care of People (6 cr.).

#### **Division of Public Health**

Students are expected generally to follow the course sequences outlined below during their freshman year. A minimum of 30 major credits is required of all students for the Bachelor of Science degree. Credits from other University departments are included in these major credits.

#### **ENVIRONMENTAL HEALTH**

**Freshman Year:**

**First Semester:**

RHET 100 or 110, MATH 127 Calculus, CHEM 111, ZOOL 101 (General), PSYCH 101 or SOCIOL 101.

**Second Semester:**

RHET 100 or 110, MATH 128 Calculus, CHEM 112, ZOOL 203, SOCIOL 101 or PSYCH 101.

#### **COMMUNITY HEALTH AND HEALTH EDUCATION**

**Freshman Year:**

**First Semester:**

RHET 100 or 110, MATH 127 Calculus, CHEM 111, ZOOL 101 (General), PSYCH 101 or SOCIOL 101.

**Second Semester:**

RHET 100 or 110, MATH 128 Calculus, CHEM 112, SOCIOL 101 or PSYCH 101, Humanities Elective.

#### **MEDICAL TECHNOLOGY**

The curriculum in medical technology

consists of a three-year program followed by a 12-month internship in an accredited school of medical technology affiliated with the University.

After successful completion of the 12-month internship and after satisfying the requirements of the Division, a student will receive a Bachelor of Science degree in medical technology. A total of 130 academic credits is necessary for graduation with this option.

Students are not to be admitted to the medical technology program until they have:

1) Completed a minimum of 48 credits including the course outlined below in the freshman year in the health laboratory sciences curriculum.

2) Registered for an additional 16 specified credits for the second semester of the sophomore year.

3) Submitted an application for admission to the Director of the medical technology program prior to March 1 of the year they wish to enter the program. (Applications are available from the Director of the medical technology program in the School of Health Sciences).

Students are eligible for a major in medical technology in their junior year. Entering freshmen who express an interest in medical technology will be accepted in the Division of Public Health, School of Health Sciences as majors in the health laboratory science curriculum.

**Freshman Year:**

**First Semester:**

RHET 100, CHEM 111, MAT 127, ZOOL 101, Elective.

**Second Semester:**

CHEM 112, MATH 128, RHET 110, Elective.

#### **HEALTH LABORATORY SCIENCE**

Students completing this curriculum will also complete requirements established by the American Society of Clinical Pathologists for submitting applications to approved schools of medical technology offering clinical internships.

**Freshman Year:**

**First Semester:**

RHET (110), CHEM 111, MATH 127, ZOOL 101, Elective.

Second Semester:

CHEM 112, MATH 128, RHET 110, Elective.

### **Department of Communication Disorders**

The undergraduate Communication Disorders curriculum has a pre-professional orientation. Freshman and sophomore years are devoted primarily to the completion of the general University requirements.

A minimum of 30 major credits is required of all students for the Bachelor's degree.

## **School of Physical Education**

The School of Physical Education includes the Departments of Exercise Science, Professional Preparation in Physical Education, Sport Studies and Athletics. It offers an undergraduate major in Physical Education and graduate programs in Exercise Science and Sport Studies.

### **GENERAL PHYSICAL EDUCATION PROGRAM**

This program offers instruction in sport and other forms of physical activity.

#### *Majors' Program*

Students may elect to follow either the teacher education program or the related disciplines program which includes study in exercise science or sport studies. The teacher education option offers further opportunity for specialization. A student may select a concentration in secondary education or elementary education. Similarly, concentrations available through the related disciplines program are exercise science and sport studies.

Each student is expected to select an area of concentration during the sophomore year. During the first two years of study, essentially the same for all majors, students fulfill the University core requirements and the physical education core requirements. The physical education core consists of the following courses:

EXC SCI 204 — Human Anatomy, EXC SCI 205 — Kinesiology. (Prerequisite: Exc. Sci. 204), EXC SCI 278 — Physiology of Exercise (Prerequisite: Zoology 135).

A student will select three of the following four courses:

SPORST 200 — Sociology of Sport and Physical Activity, Prerequisite: Sociol. 107, SPORST 201 — Psychology of Sport and Physical Activity (Prerequisite Psych. 101), SPORST 202 — History of Sport and Physical Activity (Prerequisite: History 100, 101, 150, or 151), SPORST 203 — Philosophy of Sport and Physical Activity (Prerequisite: Phil. 105), Activity Courses.

The recommended program for the first two years of study is as follows:

#### *Freshman Year:*

##### *First Semester:*

Electives, ZOOL 101 Intro. Zool., P.E. Activity (2 cr.), RHET 100 or 110.

##### *Second Semester:*

Electives, ZOOL 135 Intro. to Physiology, P.E. Activity (2 cr.), Rhetoric Elective.

Electives, Soc 101 (D), Psych 101 (D), Hist 100 or 101 (C), Phil. 105 (C). These are prerequisites to Physical Education Core Courses

#### *Sophomore Year:*

##### *First Semester:*

EXC SCI 204 Human Anatomy, SPORST 200, 201, 202, 203 (Select any 2), P.E. Activity (2 cr.), Elective.

##### *Second Semester:*

Elective, EXC SCI 205 Kinesiology, SPORST 200, 201, 202, 203 (Select any 1), P.E. Activity (2 cr.), EXC SCI 278 Phys. of Ex.

### **Leisure Studies and Services**

The curriculum presented below represents a core program. The student majoring in Leisure Studies and Services is also encouraged to gain as much practical non-credit experience as possible through volunteer service, as well as part-time and seasonal employment in several settings and with varied types of participants.

#### *Freshman Year:*

##### *First Semester:*

LS&S 101, Man and Leisure, RHET 100, Language and Writing, or RHET 110, Language & Speaking, Humanities & Fine Arts Elective (C), Math. or Nat. Science Elective (E), Sociol. Elective (D).

LS&S 111, Leisure Activity Analysis, Rhetoric Elective, Humanities & Fine Arts Elective (C), Math. or Nat. Science Elective (E), PSYCH 101, Elem. Psychology (D), LS&S 103 (1 cr.).

### **Athletics**

Members of the athletic department are responsible for the conduct and administration of the various phases of intercollegiate and intramural athletic programs.

## **Division of Military and Air Science**

### **Air Science**

The Department of Air Science offers courses of general interest to the University student and of specific interest to both male and female students who would like to prepare for and serve as officers on duty with the U.S. Air Force. This service may consist of either active duty with the regular forces or reserve duty with selected Air National Guard or U.S. Air Force Reserve Units. The curriculum is designed to study the need for military forces, their nature, organization, and mission (with emphasis on the Air Force), and the nature of service as a professional Air Force officer. Participation in the ROTC programs is voluntary. Uniforms and textbooks are provided. Students may register for ROTC courses at the same time they register for other University courses. No formal application is required.

The Department offers two separate programs: a four-year program for students desiring to learn more about the military, and a two-year program designed primarily for transfer students who have already decided to enter the military.

There are two major phases in the four-year program curriculum. The first phase is the General Military Course (GMC) which forms a single unit consisting of two courses offered during the freshman and sophomore years. The studies cover the nature and causes of international conflict, the functions and employment of U.S. military forces, and the historical development of air power. This first phase carries no service commitment and is an excellent way for students to study the military and decide if they want to continue on for an Air Force commission. Enrollment in the GMC confers no military status on the student. These courses meet for one classroom hour and one Corps Training hour per week.

In the summer between the sophomore and junior years, students who have de-

cided to continue the program and are selected for entry attend a four-week field training session at an Air Force installation.

The second phase of the four-year program is the Professional Officer Course (POC) taken during the junior and senior years. Enrollment depends upon academic and medical qualification and selection by the department. In the POC, academic concentration is on preparation for service as an Air Force officer, and deals with defense policies in the contemporary world, civil-military relations, Air Force leadership at the junior officer level, military management, and military law. The development of communicative techniques is also an integral part of the POC curriculum. POC classes meet for 3 classroom hours and 1 Corps Training hour per week.

The two-year program requires that the student have two academic years remaining at either undergraduate or graduate level. Successful completion of a six-week program on a military installation during the summer prior to enrollment is a prerequisite for these students. Those interested should apply no later than one academic semester before enrollment, since processing for the summer training must be completed as soon as possible. The two-year program is available to transfer students and students unable to participate in the four-year program. After enrollment, the two-year student receives the same instruction as a four-year member.

Corps Training is a non-academic, cadet-planned and directed activity. It focuses on military customs and courtesies, the career environment of the Air Force officer, and practical experiences in leadership and management.

Field Training involves a practical, first-hand experience with military life on an Air Force installation. Cadets receive instruction on junior officer activities, career field orientation, Air Force base functions and environment, aircraft and aircrew orientation, survival training, and physical conditioning. Applicants for the two-year program also receive academic instruction on subjects normally covered during the GMC portion of the four-year program.

The department offers to qualified stu-

dents scholarship assistance which pays university tuition, fees, textbook allowance, and lab expenses, plus a stipend of \$100 per month. High school seniors compete on a national basis for scholarships starting in the freshman year.

Qualified students interested in becoming military pilots may participate in the Flight Instruction Program. Completion of this program leads to pilot qualification for later advancement to Air Force pilot training. In addition to actual flight instruction, students take ground instruction in weather, navigation, and FAA regulations.

Students with previous military training may have this experience credited toward all or part of the first two years of the four-year program.

Successful completion of the Air Force ROTC program results in the awarding of a commission as a Second Lieutenant in the U.S. Air Force. In their senior year, students may request a delay in reporting to active duty in order to complete graduate work or to attend professional school. Students who are interested in obtaining further information may inquire at Dickinson Hall or telephone (413) 545-2437/2451.

**Freshman Year:**

**First Semester:** Air Science 111 (1 cr.), The U.S. Air Force.

**Second Semester:**

Air Science 112 (1 cr.), U.S. Military Forces.

### **Military Science**

The Department of Military Science offers a two- and four-year Reserve Officers Training Corps (ROTC) program which is voluntary and open to eligible, regularly enrolled men and women students of the University. Enrollment in departmental courses for credit is open to all members of the University community. Students who have completed a four-year program or equivalent are eligible for a commission in the U.S. Army upon graduation.

The four-year program consists of the Basic Course (freshman and sophomore years) and the advanced course (junior and senior years). Basic Course students are taught Contemporary Military Theory and Basic Military Leadership and Management. Basic Course cadets may termi-

nate ROTC enrollment at any time in accordance with University policy without obligation to the U.S. Government or to the Army.

Following successful completion of the Basic Course, qualified cadets may enroll in the Advanced Course. Advanced Course students are taught Military Law, Contemporary Military Theory, Organization of the Department of Defense and the Armed Forces, and Advanced Leadership and Management.

Students with previous military training may receive advanced placement in the ROTC program.

In addition to classroom activities, all regularly enrolled ROTC cadets participate in a leadership laboratory comprised of two field practicums each semester, designed to allow the student to apply theory learned in the classroom. \*Following the junior year, each cadet attends a six-week Advanced ROTC Summer Camp at Fort Bragg, North Carolina, for intensive training in military leadership. Selected students may opt to attend the U.S. Army Ranger School at Fort Benning, Georgia, in lieu of attendance at the Advanced ROTC Summer Camp.

Scholarship assistance consisting of University tuition, fees, textbook allowances, lab expenses and a grant of \$100 per month are offered to qualified students for one, two and three years. Non-scholarship Advanced Course cadets receive a grant of \$100 each month during the junior and senior years.

Various extracurricular activities exist for interested cadets. Qualified students may participate in the Flight Instruction Program leading to pilot qualification in Army Aviation. Students may also participate in confidence building activities such as rappelling, rubber boat exercises, mountain climbing, orienteering and cold weather survival on a voluntary basis.

Upon completion of University degree requirements and military science requirements, cadets normally receive a Reserve Commission as Second Lieutenants in the U.S. Army and are required to serve from three months to two years on active duty. Scholarship cadets serve four years. Cadets designated as Distinguished Military Students as a result of achievements in academic and military studies may

apply for a commission in the Regular Army. An attempt is made to closely correlate the academic discipline with the Army Branch of assignment.

In their senior year, cadets may request a delay on reporting to active duty for up to two years in order to complete graduate or professional studies. Programs are available in such fields as law and medicine which lead to commissions in the Judge Advocate General or Medical Corps following professional schooling.

Students who are interested in obtaining further information may inquire at the Department of Military Science, Dickinson Hall, or telephone (413) 545-2321/2322.

\*Student health insurance is required for participation in the Leadership Laboratory.

## Graduate School

Graduate work leading to the Doctor of Philosophy degree may be taken in the following fields: Animal Science, Anthropology, Astronomy, Biochemistry, Botany, Business Administration, Chemical Engineering, Chemistry, Civil Engineering, Communication Disorders, Communication Studies, Comparative Literature, Computer & Information Science, Economics, Electrical & Computer Engineering, English, Entomology, Environmental Engineering, Food & Agricultural Engineering, Food & Resource Economics, Food Science & Nutrition, Forestry & Wood Technology, Geology, History, Human Movement, Industrial Engineering & Operations Research, Linguistics, Mathematics, Mechanical Engineering, Microbiology, Ocean Engineering, Physics, Plant Pathology, Plant Science, Political Science, Polymer Science & Engineering, Psychology, Sociology, Soil Science, Wildlife & Fisheries Biology, and Zoology.

A cooperative Ph.D. program is available in Biochemistry, Botany, Chemistry, French, Geology, Germanic Languages & Literatures, Microbiology, Philosophy, Physics, Spanish & Portuguese, and Zoology.

The School of Education offers several specialized programs leading to the Doctor of Education degree.

Master's degrees are offered in the following areas: Animal Science, Anthropology, Art, Art History, Astronomy,

Biochemistry, Botany, Business Administration, Chemical Engineering, Chemistry, Civil Engineering, Classics, Communication Disorders, Communication Studies, Comparative Literature, Computer & Information Science, Economics, Education, Electrical & Computer Engineering, English, Entomology, Environmental Engineering, Fine Arts (Art, English, or Theatre), Fisheries Biology, Food & Agricultural Engineering, Food & Resource Economics, Food Science & Nutrition, Forestry & Wood Technology, French, Geology, Germanic Languages & Literatures, History, Home Economics, Hotel, Restaurant & Travel Administration, Industrial Engineering & Operations Research, Labor Studies, Landscape Architecture, Linguistics, Manufacturing Engineering, Marine Sciences, Mathematics, Mechanical Engineering, Microbiology, Music, Nursing, Ocean Engineering, Philosophy, Physical Education, Physics, Plant & Soil Sciences, Plant Pathology, Political Science, Polymer Science & Engineering, Psychology, Public Administration, Public Health, Regional Planning, Slavic Languages & Literatures, Sociology, Theater, Wildlife Biology, and Zoology.

Holders of undergraduate degrees desiring further information may request a Graduate School Bulletin and application materials by writing to the Graduate Admissions Office, Graduate Research Center, University of Massachusetts, Amherst, MA 01002.

## Administrative Officers

### University System

Robert Wood, Ph.D. (Harvard University),  
President

Ernest A. Lynton, Ph.D. (Yale University),  
Senior Vice-President for Academic  
Affairs

Jay Janis, B.A. (Yale University), Senior  
Vice-President for Management and  
Business Affairs

Nan S. Robinson, M.A. (Radcliffe College),  
Vice-President for Planning

Gladys Hardy, B.A. (Sarah Lawrence Col-  
lege), Secretary

Kenneth W. Johnson, B.S. (University of  
Vermont), Treasurer

Adam Yarmolinski, LL.B. (Yale Univer-  
sity), Ralph Waldo Emerson Professor  
of the University

Rev. Michael P. Walsh, Ph.D. (Fordham  
University), Academic Adviser to the  
President

### Amherst Campus

#### OFFICE OF THE CHANCELLOR

Randolph W. Bromery, Ph.D. (Johns Hop-  
kins University), Chancellor

James I. DeShields, Ed.D. (University of  
Massachusetts), Assistant to the  
Chancellor

Douglas R. Forsyth, Ph.D. (Colorado State  
University), Assistant to the Chancellor

Warren W. Gulko, Ph.D. (University of  
Minnesota), Director of Budgeting and  
Institutional Studies

H. J. Littlefield, Jr., B.S. (Kings/Point), Di-  
rector of Planning

Daniel M. Melley, M.S. (Boston Univer-  
sity), Director of Public Affairs

Sidney Myers, J.D. (Boston University Law  
School), Staff Attorney

George A. Norton, B.S.M.E. (University of  
Maine), Director, Physical Plant

Charlotte Rahaim, Ed. D. (University of  
Massachusetts), Assistant to the  
Chancellor

Zina Tillona, D.M.L. (Middlebury Col-  
lege), Assistant to the Chancellor

#### OFFICE OF THE VICE CHANCELLOR FOR ACADEMIC AFFAIRS AND PROVOST

Dean Alfange, Jr., Ph.D. (Cornell Univer-  
sity), Acting Vice Chancellor for  
Academic Affairs and Provost

David C. Bischoff, Ph.D. (Pennsylvania  
State University), Associate Provost

Vere C. Chappell, Ph.D. (Yale University),  
Acting Associate Provost

Robert L. Woodbury, Ph.D. (Yale Univer-  
sity), Associate Provost for Special Pro-  
grams

#### ACADEMIC DEANS

Jeremiah M. Allen, Ph.D. (University of  
Colorado), Dean of the Faculty of  
Humanities and Fine Arts, College of  
Arts and Sciences

## THE NEW ENGLAND ASSOCIATION OF COLLEGES AND SECONDARY SCHOOLS

The University of Massachusetts at  
Amherst is accredited by the New En-  
gland Association of Colleges and Sec-  
ondary Schools. The Association ac-  
credits schools and colleges in the six  
New England states. Membership in  
one of the six regional accrediting as-  
sociations in the United States indi-  
cates that the school or college has been  
carefully evaluated and found to meet  
standards agreed upon by qualified  
educators.

**1976-1977 Undergraduate  
Course and Faculty Directory**  
University of Massachusetts at Amherst

The *Undergraduate Catalog* of the University of Massachusetts at Amherst consists of the *Course and Faculty Directory* and the *General Information Bulletin*. All students are responsible for observing the rules and regulations thus published, as well as those published in *University Directions*. The University reserves, for itself and its departments, the right to change its announcements or regulations whenever such action is deemed appropriate or necessary.

The University of Massachusetts at Amherst prohibits discrimination on the basis of race, color, sex, age, religion, national origin or handicap in any aspect of its employment, in the recruitment, admission and treatment of students and in its policies and programs, as required by Federal and State laws and regulations. Inquiries concerning these laws and regulations or their application should be addressed to the Office of the Affirmative Action Coordinator, Chancellor's Office, 375 Whitmore Administration Building.

MARCH 1976

The University *Undergraduate Catalog* for the 1976-77 academic year is part of the One Hundred and Eleventh Annual Report of the University of Massachusetts and as such is Part II of Public Document 31, Section 8, Chapter 75, of the General Laws of Massachusetts.

Dorothy K. Eichel of Boston,  
Assistant Secretary

I am pleased that you are considering attending the University of Massachusetts at Amherst. Now in its second century of education, research and service, this publicly-supported University offers programs of excellence and diversity to the broadest possible cross-section of the citizens of this Commonwealth, to whom it remains both responsible and responsive.

Through the University's rich combination of human expertise and material resources, its students have unique opportunities to prove themselves and their concepts, and to shape and extend their capacities for knowing and caring.

I welcome student participation in and contribution to this institution's intellectual governance and growth. In the long run, experience has shown that it is student energy, commitment and questioning which most surely shape the University's future successes.

Randolph W. Bromery  
Chancellor

## General Information

## Academic Calendars

The University of Massachusetts is the state university of the Commonwealth, founded under provisions of the 1862 Morrill Land Grant Act. Incorporated as Massachusetts Agricultural College in 1863, the institution became Massachusetts State College in 1931, and the University of Massachusetts in 1947. Rooted in the liberal arts tradition, the institution has grown steadily from the four teachers, four buildings, and handful of students at its opening session in 1867 to the present state university system of three major campuses.

Situated in the Connecticut River Valley, the Amherst campus consists of approximately 1,200 acres of land and 150 buildings, including classroom and laboratory facilities as well as residence halls and other units.

To augment the Commonwealth's university-level facilities, the University of Massachusetts at Boston was opened in 1965. The University's Medical School at Worcester, founded in 1962 by an Act of the Legislature, enrolled its first class in 1970.

The total resources of the University are dedicated to giving all qualified students full opportunities to develop their capabilities for service in a growing society.

### Freshman

Applications for admission to the Amherst campus may be obtained from the Admissions Office. Applications for the Boston campus may be obtained from the Admissions Office in Boston. See the final pages of this *Bulletin* for addresses. If you were or are enrolled as a full-time post-secondary student, you must apply as a Transfer student.

### How to File

Fill out the application carefully, answering all questions. *Submit it to your Guidance Counselor* who will complete and forward it to the University with a transcript of your grades. Do not mail the application directly to us yourself. (Older students and Veterans are exempt from this provision although they must assume the responsibility for ensuring that an "official transcript" is submitted by stated deadlines.)

### When to File

Applications should not be submitted until the first set of senior year grades are recorded. Do not wait for SATs to be taken and on file, however.

### Deadlines

Applications must be RECEIVED AND COMPLETE (including SATs, transcript, and related documents) not later than:

|            | Fall Semester | Spring Semester |
|------------|---------------|-----------------|
| Mass. Res. | Mar 1         | Oct 15          |
| All Others | Feb 1         | Oct 15          |

### SAT Test Date Deadline

To be considered for the Fall Semester, SATs must be taken on or before the January test date to ensure that results will be received by the deadline unless wishing to be considered on the basis of Junior year SATs.

### If You Previously Applied for Admission

If you applied for admission to the Amherst campus in the past two years and have not been in full-time enrollment at another college, it is NOT necessary to file a new application. Write and request "Reactivation" of your previous application (by the stated deadline). In your letter, please chronologically detail what you have been doing in the interim.

### Recommendations

Although recommendations are not required, if submitted, we prefer information that will provide us insights into your academic and vocational potential.

### Application and Other Fees

There is a non-refundable Application Fee of \$10 for Massachusetts residents and \$25 for non-residents. A \$15 non-refundable Matriculation Fee is due within 15 days after notification of acceptance. Subsequently, a \$30 non-refundable Summer Counseling (orientation) fee will become due. Further information on costs is available from Financial Aid Services. For the coming academic year, single Massachusetts residents attending the University and living on campus will normally incur costs of \$2200 to \$2700 per year. This includes tuition and fees, room, board, personal expenses, books, and supplies and the fees noted above.

### Required Tests

All applicants are required to submit results of the Scholastic Aptitude Tests (SATs) administered by the College Entrance Examination Board. Although Achievement Tests are not required of Massachusetts residents, it is strongly recommended that applicants take three, of which one should be English Composition.

College Board Test Reports must be sent directly to the University from the College Board Test Center and should also be included on the high school transcript. Applicants must ensure that they take SATs early enough to meet application deadlines. The University's Amherst campus College Board Number is 3917.

Out of-state students are required to take three Achievement Tests, one of which must be English Composition, in addition to SATs.

Foreign students are required to submit SATs and TOEFL (Test of English as a Foreign Language).

### Optional Tests

#### Advanced Placement

Advanced placement and credits towards graduation will be awarded to candidates who obtain scores of 4 and 5 on the College Entrance Examination Board Advanced Placement Test; scores of 3 are given credit on a departmental basis. Candidates seeking advanced placement and credit towards graduation in foreign languages and rhetoric are

advised to take the CEEB Foreign Language Achievement Test and English Composition, respectively.

The College-Level Examination Program (CLEP) enables students to earn college credit-by-examination. Anyone may take CLEP tests to demonstrate his or her college-level competency no matter when, where, or how this knowledge has been acquired; through formal study, private reading, employment experience, non-credit courses, adult classes, TV, radio, cassette courses, military, industrial, business training, or advanced work in regular high school courses. CLEP tests are administered at more than 500 test centers and are given the third week of each month. Fall Semester applicants should plan to take the exams, if at all, not later than April of the year of entrance. Your high school guidance office will have additional details about CLEP, or you may write to CLEP, Box 592, Princeton, NJ 08540.

The University recommends students take advantage of the credit opportunities provided through these two programs.

#### Mathematics Requirements

Prospective physical science or mathematics majors should, if possible, offer two years of algebra, one year of plane geometry, and one-half year of trigonometry. Preparation in analytic or solid geometry, chemistry, physics, and introductory calculus is also strongly recommended.

Prospective engineering majors should offer two years of algebra, one year of plane geometry, and one-half year each of trigonometry and solid geometry. Chemistry and physics are also advised.

Any student deficient in the mathematics requirements should plan to make it up during the summer prior to entrance or should expect to take five years to complete the college course.

#### Foreign Language Requirement

The College of Arts and Sciences stipulates intermediate language proficiency as a graduation requirement. At least three years of secondary school language preparation will be advantageous. Students who receive a score of 600 or higher on a language Achievement Test will gain 6 credits in that language and will be exempt from the language requirement. Students who have completed the fourth level of one language or the third level of one language and the second level of a

second language are exempt from the language requirement.

The exceptional candidate whose secondary preparation is not within the framework of the above recommendations may be considered for admission. Suitability for admission will be based on other intellectual aptitudes and achievements and readiness for the University curriculum.

### Entrance Categories

Again, this year we expect a greater number of qualified applicants to apply than we are able to accept for regular September enrollment. Therefore, we are offering several alternative entrance possibilities to provide maximum admission opportunities.

#### Regular Entrance

Freshman applicants accepted for enrollment in September (Fall Semester).

#### Delayed Entrance

In recognition that time spent away from school can be valuable to a student in determining educational goals, applicants accepted for September ("Regular Entrance") may request to delay their date of enrollment, with subsequent guarantee of admission, for six months to two years. If you wish to elect this option, you must do so after you have been notified of acceptance. Further information will be included with acceptance material.

### Candidates' Reply Date

The University participates in the Candidates' Reply Date option which permits an accepted applicant to delay notification of intention to enroll until May 1.

### Interviews

An interview is not part of the admission process since it is impossible to interview all applicants. Personal conferences will be scheduled for applicants who have questions which cannot be resolved by correspondence or printed literature. Please contact the Admissions Office for an appointment.

#### Visits to the Campus

Recognizing the importance of first-hand knowledge of colleges you are considering, we encourage applicants to visit the Amherst campus. Group information sessions are held on Friday afternoons in the Fall beginning in October. The Admissions Office is not open on Saturdays.

**Guided Tours**

Through the University Guide Service, ARCON, guided tours are available during the regular academic year, except during University vacations, on weekdays from 1:30 to 3:30 p.m., Saturdays from 9 a.m. to 12:30 p.m., and Sundays from 1 to 3 p.m. Special arrangements for campus tours during the academic year may be made by writing to ARCON, University Guide Service, Murray D. Lincoln Campus Center, University of Massachusetts, Amherst, MA 01002, or telephoning (413) 545-0012. Tours originate from the Information Desk, concourse level of the Campus Center.

**High School Visits**

Within budget limitations each public high school in Massachusetts and some private and parochial schools will be visited between September and mid-November by an Admissions Office staff member. These visits provide an opportunity for the staff and guidance counselors to discuss matters of mutual interest and concern and to meet, if possible, with seniors to talk about the University.

**Notification of Decision**

In most cases Freshman applicants will be notified by mid-April of the action taken on their application for Fall enrollment and by November 1 for Spring enrollment. Those with outstanding academic records may receive earlier notification. This early notification should reassure the well-qualified applicant regarding college entrance and enable the student who has selected the University to make plans. If accepted at an early date, however, you are under no pressure to make a final decision in regard to choice of college before the Candidate's Reply Date. In this way the burden of multiple applications on high school guidance counselors and college admissions officers may be lessened.

**New England Regional Student Program**

Students who are legal residents of any of the other New England states may be eligible for consideration for admission under auspices of the New England Regional Student Program. The NERSP provides an opportunity to earn a degree in certain curricula not offered at the resident's own state institution at the tuition rate for Massachusetts residents. Check with high school guidance counselor.

**Veterans**

Veterans whose Active Duty is credited to Massachusetts, or who subsequent to release have established Massachusetts as their domicile, are high school graduates or equivalent, and who have not attended another college full-time since release from A.D., will be considered for admission primarily on the basis of SATs. Other Veterans will be considered under regular admission policies. If previously enrolled in an institution of higher education, before or after A.D., a transcript of credits attempted and earned MUST be submitted for this application to be considered complete. Credits earned prior to A.D. will not affect enrollment eligibility. Credits earned after A.D. may affect enrollment eligibility.

A DD 214 must be submitted. (If still on A.D., submit copy when available.)

The Veterans' Affairs Office is located in Room 240, Whitmore Administration Building, telephone (413) 545-1346. This office has the most current data regarding laws, policies and procedures for veterans. The Veterans' Affairs Office acts as a liaison between the individual veteran and various governmental agencies (i.e., Veterans' Administration and Veterans' Services). The Veterans' Office has a job bank, a short-term loan fund and other services to aid the veteran.

**Out-of-State Applicants**

To accommodate as many qualified legal residents of Massachusetts as possible, the University limits out-of-state undergraduate enrollment to 5%. This makes freshman admission extremely competitive to non-residents. See Section on "Residence Status." Note also SAT requirements and application deadline.

**Handicapped Students**

An office has been established to assist academically qualified students who have physical disabilities. Students, parents, and counselors concerned should contact Office of Handicapped Student Affairs, 229D Whitmore, telephone (413) 545-0892.

**Fields of Study NOT Offered**

While the University offers nearly 100 different major fields of study, the following which are commonly requested, are not available: Aeronautical Engineering, Architecture, Business Education, Criminology, Dental Technology, Oceanography, Occupational Therapy, Photog-

raphy, Physical Therapy, Recreational Therapy, Secretarial Sciences. See Catalog for full academic listings.

**Freshman Orientation**

Every student entering as a freshman must attend a two-and-one-half-day orientation program at a specified time during the summer prior to entrance. The program consists of academic placement testing, counseling, and pre-registration for courses to be taken during the coming semester and orientation to social and academic opportunities available to undergraduates. Each student is assigned a faculty adviser who will help in the selection of courses and planning of a class schedule. On the final day of each of these periods, a special program is held for parents so that they may learn more about the University. Each freshman attending the summer orientation program on the Amherst campus will pay a non-refundable fee of \$30 to cover the cost of meals, housing, testing, and counseling. (See Transfers section for information on transfer orientation.)

**Visiting Students**

The University is not able to accommodate students from another institution who wish to spend only a semester or a year on this campus, except through organized exchange programs. Students who wish to take courses at the University in a visiting capacity are urged to contact the Division of Continuing Education.

**Preparatory Studies**

Your secondary school preparation must indicate your capacity to handle the quality of scholastic work which the University has established as its standard of achievement. A prerequisite for admission is the satisfactory completion of a four-year high school course or its equivalent. A minimum of 16 units should be offered, distributing according to the following recommendations:

|                                 |    |
|---------------------------------|----|
| English                         | 4  |
| College preparatory mathematics | 3* |
| Foreign language                | 2  |
| U.S. History                    | 1  |
| Laboratory science              | 1  |

\*Preferably two years of algebra and one of plane geometry

A minimum of five other units should be offered in the areas of mathematics, science, foreign language, history and social studies, or free electives (not more than four units).

### Minority and Low-Income Student Admission Programs

In cooperation with the Massachusetts Commission Against Discrimination, an Affirmative Action program has been developed to provide information and assistance to minority students in making application for admission.

"Minority" individuals are defined in Presidential Executive Order 11246 as including Afro-American, American Indian, Oriental American, and Spanish-surnamed people.

CCEBS (Committee for the Collegiate Education of Black Students) seeks to recruit and accept minority and low-income white students into the University through a special admissions process. The CCEBS student shares all the responsibilities of any other student but is offered individually focused academic, financial, and personal support services, if needed, to experience optimum progress and adjustment within the University.

BCEP (Bilingual Collegiate Program) is designed primarily for Spanish-speaking individuals and is similar to the program above.

### Transfers

Any student who has been previously enrolled in an institution of higher education and completed ten or more semester hours is considered a transfer and must file a transfer application form. The University considers for transfer only those applicants who have completed a minimum of 54 transferable semester credits. Only in a very limited number of specialized curricula are applicants eligible for consideration with less than 54 credits.

Priority is given to transfer applicants from Massachusetts who have completed two years in a transfer program at any of the Commonwealth's state or city supported community and junior colleges. Remaining transfer vacancies are filled on a competitive basis by candidates seeking transfer from other institutions. Transfer vacancy for the non-resident (out-of-state and foreign) is extremely limited.

A minimum of 45 semester credits must be taken in residence at the University, and all University, college, and major requirements must be completed in order to receive a bachelor's degree.

Applications must be received and complete prior to April 1 for fall semester

consideration, and prior to October 15 for spring semester consideration. It is the student's responsibility to be sure that all transcripts from each college attended, including the most current, have been forwarded to the Office of Transfer Affairs before the stated deadline dates. High school record and SAT scores are not required of transfer applicants.

Decisions are made late in the semester prior to proposed entrance. A tentative evaluation of transfer credits is sent to the student shortly after acceptance.

Campus visitations and interviews with the staff of the Office of Transfer Affairs are encouraged when at all possible if questions or problems arise concerning applications. During certain times in the admissions year, however, personal conferences must be limited to situations where urgent problems exist. Campus tours are available daily when school is in session from the University Guide Service in the Campus Center (545-2707).

Every student entering as a transfer is

required to attend an orientation and pre-registration session during the summer prior to entrance. At this time a faculty adviser is available to each student to assist in selection of courses. Advanced placement testing also takes place at this time and a general orientation to the social and academic opportunities of the University is provided. Transfer student who enter in the spring semester will pre-register in November. A non-refundable \$15 fee is required of each transfer to cover the costs of this program.

### Physical Exam

Physical examination by a personal physician is required of each entering freshman, transfer, re-entering student and student participating in athletics. Physical report forms for this examination will be mailed to you with your acceptance material and must be completed and returned to the University Health Services ten days before the opening of the semester. Evidence of successful smallpox vaccination and active tetanus immunization is required

# Residence Status

These rules and regulations shall apply to the classification of students at the University of Massachusetts as Massachusetts or non-Massachusetts students for tuition purposes.

## Section 1. Definitions

1) **ACADEMIC PERIOD** — A term or semester in an academic year or a summer session, as prescribed by the Board of Trustees or under their authority.

2) **CONTINUOUS ATTENDANCE** — Enrollment at the University for the normal academic year in each calendar year, or the appropriate portion or portions of such academic year as prescribed by the Board of Trustees or under their authority.

3) **DOMICILE** — A person's true, fixed and permanent home and place of habitation, where he intends to remain permanently or for an indefinite time.

4) **EMANCIPATED PERSON** — A person (a) who has attained the age of 18 years, or (b) if under 18 years of age, whose parents have entirely surrendered the right to the care, custody and earnings of such person and who no longer are under any legal obligation to support or maintain such person, or (c) a person who has no parent. If none of the foregoing definitions apply, said person shall be deemed an "unemancipated person."

5) **HIS** — Shall apply to the female as well as the male gender.

6) **PARENT** — With respect to a person (in the case of an adopted person, inserting the adjective "adoptive" before the words "father" and "mother" wherever used):

- a) the person's father;
- b) if the person's father dies, either the legal guardian or if no legal guardian is appointed, the person's mother;
- c) if neither the father nor mother is living and no legal guardian is appointed, the person who then stands *in loco parentis* to the person;
- d) if the father and mother are divorced, the person to whom legal custody of the person is awarded;
- e) if the father and mother are divorced, separated or unmarried and legal custody has not been awarded, the father or the mother, as the case may be, with whom the person lives or, if he lives with neither and the father is living, the father.

7) **RESIDENCE** — A place of habitation.

## Section 2. Rules for Determination of Domicile

1) Domicile is not acquired by mere physical presence in Massachusetts while the person is carrying on a course of study at the University or while the person is engaged in employment for a specified term unless Massachusetts is otherwise the domicile of the person.

2) Domicile at birth may be changed thereafter, by action of the parent in the case of an unemancipated person or by action of the person himself in the case of an emancipated person.

3) A person claiming Massachusetts as his domicile shall furnish evidence to support such claim. The burden of proof in all cases is upon the person making the claim. The following shall be of probative value, although not necessarily conclusive, in support of a claim of domicile within Massachusetts:

- a) Birth certificate;
- b) Motor vehicle registration and/or operator's license;
- c) Voting or registration for voting;
- d) Certified copies of Federal and State Income Tax returns;
- e) Property ownership;
- f) Continuous physical presence in Massachusetts during periods when not enrolled as a student;
- g) Permanent employment in a position not normally filled by a student;
- h) Reliance on Massachusetts sources for financial support;
- i) Former domicile in Massachusetts and maintenance of significant connections therein while absent;
- j) Domicile of parent within Massachusetts.

Evidence submitted in support of an assertion of domicile or of parental relationship shall be in such form as the Treasurer of the University or his designee may require. Copies of official records or documents shall be authenticated by a proper officer. Assertions of fact made other than by an authenticated copy of an official record shall be certified as to accuracy and completeness by the person submitting the same.

## Section 3. Proof of Parental Relationship

A person asserting that he is an emancipated person shall furnish evidence to

support such assertion. Such evidence may include:

- a) Birth certificate or any other legal document that shows place and date of birth;
- b) Legal guardianship papers — court appointment and termination must be submitted;
- c) Statements of the person, his parent(s), guardian(s), or others certifying no financial support;
- d) Certified copies of Federal and State Income Tax returns filed by the person and his parent(s);
- e) Where none of the foregoing can be provided, an affidavit of the emancipated person in explanation thereof and stating fully the grounds supporting the claim of emancipation.

## Section 4. Rules for Classification

1) Every emancipated person applying for admission to the University who has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the date of his application and has established a domicile in Massachusetts shall be eligible for classification as a Massachusetts student for tuition purposes.

2) Every unemancipated person applying for admission to the University, whose parent has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the date of application and has established a domicile in Massachusetts, shall be eligible for classification as a Massachusetts student for tuition purposes.

3) Every emancipated person seeking a change in classification who has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the beginning date of the academic period for which he registers and has established a domicile in Massachusetts shall be eligible for classification as a Massachusetts student for tuition purposes for such academic period.

4) Every unemancipated person seeking a change in classification, whose parent has maintained a residence in Massachusetts for a period of not less than one continuous calendar year next preceding the beginning date of the academic period for which the person registers and has established a domicile in Massachu-

# Family Educational Rights and Privacy Act

setts, shall be eligible for classification as a Massachusetts student for tuition purposes for such academic period.

5) A person having his domicile elsewhere than in Massachusetts shall not be eligible for classification as a Massachusetts student for tuition purposes except as herein provided.

6) Any person who is registered at the University as a Massachusetts student shall be eligible for continued classification as a Massachusetts student for tuition purposes (until attainment of the degree for which he is then enrolled) during continuous attendance at such institution.

7) A member of the Armed Forces of the United States and his spouse and unemancipated children shall, while he is on active duty and stationed in the Commonwealth of Massachusetts, be eligible for classification as Massachusetts students for tuition purposes.

## Section 5. Change in Classification

No application for change to classification as a Massachusetts student for tuition purposes submitted later than the first day of classes shall affect a classification during the then current academic period.

## Section 6. Penalty for Misrepresentations

Misrepresentation in or omission from any evidence submitted of any fact which if correctly or completely stated would be grounds to deny classification as a Massachusetts student for tuition purposes shall be cause for exclusion or expulsion from or other disciplinary action by the University.

## Section 7. Appeals

Appeal from a determination denying classification as a Massachusetts student shall be initiated by filing a written request with the Treasurer of the University or his designee specifying the particular grounds for said request.

## Section 8. Miscellaneous

Nothing contained herein shall be construed as limiting or prohibiting the authority of the Board of Trustees to waive or reduce tuition charges.

## Policy and Procedures

A. On January 1, 1975, President Ford signed into law the Family Educational Rights and Privacy Act (Public Law 93-380). This law was developed to allow present or former students, at educational institutions access to educational records kept on them, as well as basic protections of privacy of their records. The law does not apply to applicants seeking admission to the University. The law applies to "educational records" defined as "records, files, documents, and other materials which . . . contain information directly related to a student" and "are maintained by an educational agency or institution." The law specifically exempts personal records kept by instructional, supervisory, and administrative staff, as long as those records are not accessible or revealed to any other person except a substitute; records of a law enforcement unit; records of employees of an educational institution; and records which are created or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional, and which are created, maintained or used only in connection with the treatment of the student.

The law specifically grants the following rights to access:

1. The right to be provided a list of the types of educational records which are maintained by the institution and which directly relate to students;
2. The right to inspect and review the content of those records;
3. The right to obtain copies of those records, which may be at the expense of the student (but not to exceed the actual cost to the educational institution of reproducing such copies);
4. The right to a response from the institution to a reasonable request for explanations and interpretations of those records;
5. The right to an opportunity for a hearing to challenge the content of those records;
6. If the educational record of a student includes information on more than one student, the right to inspect or review only that part of

the material or document which relates to such student.

B. The University develops and maintains several types and varieties of educational records on students. A list of what types of records are maintained by the University, where they are kept, what University official has major responsibility for those records, who has access to those records and why, and what it will cost to obtain a copy of those records, has been developed. A copy of the complete list is available for inspection in the following locations:

A complete copy of the HEW regulations and the University of Massachusetts/Amherst procedures and policies regarding the Family Educational Rights and Privacy Act is available for inspection at any one of the offices listed above.

C. The institution maintains records in many mediums, including but not limited to: handwriting, print, tapes, microfilm, and microfiche.

D. Access to Records: Students can request to see any of their educational records covered and defined by the Family Educational Rights and Privacy Act. The request to see such records should be made at the specific department which maintains those records.

If possible, a student will be allowed access to the records immediately. In any case, the department must allow access to the file within 45 calendar days.

E. Procedures to Follow to Access a Record:

1. A request by a student or agency to inspect a record shall be made in writing to the institutional office

which maintains the record. Each office maintaining records has its own procedures to receive and process such requests.

2. Every office is obligated to inform the student when the requested record will be made available. (This date must be no more than 45 days after the receipt of the request.)
3. Every office is obligated to tell a student who has accessed his/her record and why.
4. Every office is obligated to maintain a record of the persons or agencies who have had access to the record.
5. Students are obligated to properly identify themselves (student I.D.) before being shown their records.
6. Students are obligated not to interfere with the operation of the office in which the record is being maintained.
7. Students are obligated to examine the record during reasonable hours at the place the record is maintained.
8. Prior to giving a student his/her record for examination all confidential data will be removed.
9. The examination of the record shall be supervised.
10. Copies of records shall be transmitted to the student upon payment of the established fee for issuing such copies.

F. Reviewing Educational Records: Educational records will be reviewed by the department head, or his/her representative, periodically, and also at the request of the student. If the student wishes something inappropriate removed from, or changed in the record, and this cannot be resolved at the department level, the student has a right to an appeal through the University's appeal process.

The academic record (transcript) of a student is maintained in perpetuity by the institution. No other record is officially designed as a permanent record and will be expunged in accordance with the laws of the State, or at the discretion of the custodian of the record.

G. Procedures for Challenging the Con-

tent of Educational Records: After reviewing a record, a student has a right to challenge the contents of the record as being inaccurate, misleading or otherwise in violation of the privacy or other rights of the student. A student may not challenge the correctness of a grade which has been assigned to his/her performance in a course but may challenge the accuracy of the recording of the grade.

1. Upon deciding that some aspect of his or her record is inappropriate, the student shall so inform the designated person in the office where his or her records are maintained and shall attempt to resolve the problem through informal discussions with such person and the person in charge of that office.
2. If no agreement is reached through informal discussions, the student may submit in writing to the institutional director of the Family Educational Rights and Privacy Act, a request for a hearing in order to challenge the contents of the record.

H. Hearing and Appeal Procedures: A request for a formal hearing must be filed in writing with the Coordinator for the implementation of the Family Educational Rights and Privacy Act on the Amherst campus:

Michael A. West, Chancellor's Office  
Whitmore Administration Building

The specific challenge to the content of the student's record should be clearly articulated in the complaint. The complaint must be filed within 45 calendar days after the student has requested a change to his/her record.

Upon receipt of a written request for a formal hearing, the Coordinator of the Family Educational Rights and Privacy Act shall within five calendar days:

1. Notify each party involved, in writing, that a request for a formal hearing has been requested; and provide to each party involved, the substance of the complaint;
2. Appoint at least three officials of the University who do not have a direct interest in the outcome of the challenge, to be hearing officers, one of whom shall be designated as

the Chairperson of the hearing panel.

3. It is the responsibility of the Chairperson of the hearing panel to:
  - a. Conduct a hearing on the challenge within 21 calendar days following the request for the hearing;
  - b. Allow the student a full and fair opportunity to present evidence relevant to the context of his/her educational records;
  - c. Report to the Family Educational Rights and Privacy Act Coordinator, a written decision of the hearing panel, within 21 calendar days of the conclusion of the hearing.

The campus Family Educational Rights and Privacy Act Coordinator shall further:

- a. Provide to the student and departmental representative involved in the challenge, a copy of the written decision of the hearing panel;
- b. Secure from a department head, when appropriate, written verification that the decision of the hearing panel has been carried out.

I. Directory and Public Information: The University defines directory information as a student's name, local address, home address, major, and local telephone number. This information may be printed annually in the student telephone directory.

The University defines public information as the above directory information, as well as date and place of birth; acknowledgment of a student's participation in officially recognized activities and sports, weight and height of members of athletic teams, date(s) of attendance, degrees, certificates, awards received, and the most recent previous educational agency or institution attended by the student, and the dollar amount of money earned on the state or state trust fund payroll.

The University will make public some or all of this information, usually in the student telephone directory, unless the student specifically requests in writing that his/her prior consent be obtained.

Requests by students to suppress from public distribution the above-mentioned information are to be made annually.

J. Other Rights and Requirements of this Legislation: In addition to the above, the law sets forth other rights and requirements regarding educational records maintained on students:

1. The University cannot require students to waive any rights granted under this legislation, as a condition of admission, receipt of financial aid, or receipt of any other services or benefits.
2. Parents' financial records and related parental financial information shall not be released to students. Any institutional office maintaining such records shall either store such records in a file separate from records subject to review or conspicuously stamp such records "CONFIDENTIAL - NOT TO BE RELEASED."

Confidential evaluations and recommendations of students placed in education records prior to January 1, 1975 need not be released to students. All other education records of a particular student shall be open for inspection by that student unless access is restricted as follows:

A student may waive his or her right of access to evaluations and recommendations submitted on or after January 1, 1975, provided however, that the student must, upon request, be notified of the name of each person who has submitted such a confidential evaluation or recommendation; such evaluations and recommendations to be used only for the purpose intended; and a waiver may not be required as a precondition of admission to the institution or receipt from the institution of financial aid or any other services or benefits.

3. The University may not permit access to or release of a student's educational records, or personally identifiable information contained therein (other than directory and public information), to third parties,

without the student's consent, except to the following:

- a. Other University officials who have a legitimate educational interest in a student's record;
  - b. Authorized representatives of the Comptroller General of the United States, the Secretary of HEW, the Commissioner of Education, the Director of the National Institute of Education, the Assistant Secretary for Education, or State Educational Authorities;
  - c. In connection with a student's application for, or receipt of financial aid;
  - d. State and local officials to which such information is specifically required under state statutes;
  - e. Organizations conducting studies for, or on behalf of, educational institutions for the purpose of developing, validating, or administering predictive tests, student aid programs, and improving instruction, provided that the identity of students is not revealed to other than representatives of such organizations;
  - f. Recognized accrediting organizations carrying out their accrediting functions;
  - g. Parents of a student who is dependent upon such parents for Federal Income Tax purposes;
  - h. In compliance with judicial order, or pursuant to any lawfully issued subpoena, upon condition that the student is notified of all such orders or subpoenas in advance of compliance therewith; and,
  - i. In connection with an emergency situation, if the knowledge of such information is necessary to protect the health or safety of a student or other persons.
4. The University must maintain a record, to be kept with the educational records of each student which will indicate all parties, other

than those specified above, which have requested or obtained access to a student's record, and the legitimate interest that such parties have in obtaining such information. This record will be available only to the student, the University personnel responsible for the maintenance of the records, and persons and organizations listed in #3 above.

5. Third parties may not receive information from student's educational records (other than directory and public information), unless and until a student requests in writing that these records be released. Record released to any organization, agency, or individual shall be transmitted with a letter informing the recipient that such information is to be used only by those individuals directly involved in the deliberations warranting the request. In addition, the recipient shall be notified in writing that if compliance

with this requirement is not acceptable all records shall be returned, unused, to the institution.

6. The University must make public notice of the categories which it determines to be directory information, and allow the student a reasonable period of time to inform the University that any or all of the information designated should not be released without the student's consent.
7. Complaints regarding violations of this act, or its regulations, may be submitted in writing to Mr. Thomas S. McFee, Room 5660, Department of HEW, 330 Independence Avenue SW, Washington, DC 20201 (202-245-7488). Complaints must be received no later than 180 days from the date of the alleged violations.

K. These guidelines will be summarized annually in a publication of the institution.

The University's official "Undergraduate Academic Regulations" are updated and published each term in the *Schedule of Courses* distributed to every student prior to pre-registration. All students are expected to obtain a copy of these regulations and familiarize themselves with the content, since failure to be aware of a provision does not excuse a student from adhering to it. On the other hand, whenever a student feels that some special circumstance warrants an exception to a regulation, that student is encouraged to discuss the situation with his or her academic dean who can help the student work out an alternative.

Some of the more important aspects of the "Undergraduate Academic Regulations" are summarized below; interested persons should, however, check the latest edition of the *Schedule of Courses* for specific details.

### Classification of Students

Undergraduates may enroll in one of five categories:

1) **FULL-TIME STUDENTS.** Students who are admitted as candidates for a degree are normally designated as a member of a particular graduating class and are expected to make normal progress toward graduating with that class by carrying the minimum load of 12 or more credits each semester.

2) **REDUCED-LOAD STUDENTS.** Students who are admitted as candidates for a degree but who wish to carry a reduced load for a given term may request permission of their academic dean for exemption from the minimum load requirements. Such exemption is not granted ordinarily except upon the basis of health or critical personal or academic problems. Although reduced-load students carry less than the minimum load, the appropriate semester and cumulative quality point requirements for retention still apply, the semester counts as one of the 10 towards graduation, and all benefits, fees, and obligations applying to full-time students apply to them. Reduced-load students bear a regular Student I.D. card and continue to be assigned to a graduating class.

3) **PART-TIME DEGREE STUDENTS.** The category "Part-Time" is an original admissions category and is not designed as a category into which full-time students may revert for purposes of part-

time study. All academic regulations and standards for full-time students, including a 2.0 cumulative average apply to part-time students, with the exception of the requirement to complete 12 credits per semester to retain good standing and the rule limiting students to 10 semesters in residence. There are two categories of part-time students: Non-classified and special students. Information may be obtained from the Admissions Office.

- a) **Non-Classified:** Students who are admitted as candidates for a degree but who cannot devote full time to the pursuit of a degree will be designated as Non-Classified students. These students are billed by the credit, with other fees assessed only as appropriate to Special Students (see below) and they bear a Special Student I.D. card. Non-Classified students are not entitled to student benefits, other than counselling support. At pre-registration a special billing card must be filled out by the student and advisor.
  - b) **Special Students:** This classification is limited to University employees, others affiliated with the University and selected others (such as Amherst Regional High School seniors on request). A Special Student may be accepted for one or two courses on a non-continuing basis (Class designation "SP"). No academic advising or evaluation of academic credentials is offered to students in this category, nor are they entitled to any student benefits. Continuance is not automatic, but may be authorized at the discretion of the Undergraduate Admissions Office. A minimum cumulative average of 2.0 is required for eligibility to continue. These students bear a Special Student I.D. card.
- 4) **SECOND-MAJOR STUDENTS.** A student may earn a second major and have it recorded on the permanent record provided that:
- a) The second major is completed within the 10 semesters allowed for the completion of all graduation requirements, including the first or declared major;
  - b) A student files with the Registrar a formal certification from an authorized representative of the

second major that all requirements for that second major have been completed;

- c) The second major lies in the same school or college as the first or declared major or, if the second major lies in a school or college other than that of the first major, the student obtains formal certification from the academic dean of the second college that all requirements for graduation from that college have been satisfied.

5) **SECOND - BACHELOR'S - DEGREE STUDENTS.** Students may apply for Second-Bachelor's-Degree status in one of the following two categories:

- a) Students and graduates of this University who wish to earn a second bachelor's degree must complete a minimum of 30 additional credits, all of which must be in residence (i.e., students who want to work for two bachelor's degrees simultaneously do not have to complete one and then start the other anew). These students must make formal application through the Admissions Office.
- b) Graduates of other institutions who wish to earn a second bachelor's degree at this University must complete a minimum of 45 credits in residence at the University of Massachusetts. (Those students who have previously attended this

University will have their residency requirement handled on an individual basis.) These students must make formal application through the Admissions Office

#### Procedure

1) Students applying through the Admissions Office must obtain, prior to acceptance, the support of an authorized representative of a department and an academic dean in the school or college of the proposed second degree;

2) In order to validate the second bachelor's degree and have it recorded on the permanent record and diploma, a student must obtain a formal certification from an authorized representative of the second major that all requirements for that major have been completed, and a formal certification from the academic dean of the school or college awarding the second bachelor's degree that all requirements for graduation from that school or college have been satisfied.

#### Graduation Requirements

In order to be considered for a baccalaureate degree, a student must successfully attain or complete:

1) A minimum of 120 credits, at least 45 of which must be earned in residence. For this purpose, residence credits are defined as being credits earned for work done while registered on the Amherst or the Boston campus of the University of Massachusetts or while enrolled in one

## Housing

of the University's formal Exchange Programs. In addition, students must complete their final year in residence, residence in this sense meaning continuous enrollment and regular attendance in classes conducted on the Amherst campus.

2) A cumulative average of at least C (2.0). The official grading system runs from A (4.0) through F (0.0) and includes such options as Incompletes, Withdrawals, Audits, and Passes. A Pass/Fail option exists to encourage students to be venturesome in their choice of courses.

3) A major, constituting intensive or specialized work in a particular department, division, school, or college and consisting of the successful completion of at least 15 semester hours of credit in junior-senior courses in the area of study. The University offers some 100 majors, including Bachelor's Degree with Individual Concentration, a major which the student creates in conjunction with a faculty sponsor.

4) Core or distribution requirements, providing breadth to complement the depth of a major. Although these requirements vary from college to college, all schools require at least a minimal familiarity with the theory and practice of writing and speaking, and an introduction to the humanities and fine arts, the social and behavioral sciences, and mathematics and the natural sciences.

Various special programs, such as BDIC, University Without Walls, the Honors Program, the Inquiry Program, and Continuing Education offer special variations of the graduation requirements. The Honors Program in particular offers a number of options to students, including the Commonwealth Scholar Program, for students who wish to have their transcripts identify them as Honors students, the Departmental Honors Program for students who wish to obtain an honors citation from their major department, and Graduation with Distinction for students whose cumulative average and other attainments merit one of the various *cum laude* citations.

### Policy

Recognizing the educational advantages of both classroom instruction and extra-curricular experiences, and the great extent to which residence-hall living can contribute, the Board of Trustees of the University has adopted a policy which requires undergraduates to be housed in University residence halls.

### Exemptions

Exempt from this policy are married students; members of fraternities and sororities who have been authorized to reside in their respective houses (within approved maximum capacities); and students who commute from the homes of their parents (within a 40-mile radius of Amherst).

A student living in a University residence who seeks permission to live off campus should submit the request to the appropriate Area Director. All others should submit similar requests to the Housing Office before appearing on campus for registration. Very few exemptions of this type are granted yearly.

### Room Assignments

Residence halls are opened on the day before registration. Upperclass students have the opportunity to select rooms in the spring of the preceding year. Rooms are assigned in order of receipt of proper application. Notification of assignment is made in mid-August.

### Housing Plans

The University recognizes the desirability of providing a variety of living arrangements; hence, it offers three basic systems: "Traditional" residence halls, residential colleges, and suite- or apartment-style residence halls. All three plans offer opportunities for intellectual, cultural, and social activities, and all three include some coeducational units.

*The Central and Northeast Residence Areas* consist of 21 residence halls housing 4,000 students. A "traditional" residence hall is a house with a long-standing tradition of fellowship, unity, and loyalty. The traditional hall, by its very nature, provides opportunity for meaningful friendship in a relaxed atmosphere.

*The Orchard Hill Residential College*, housing approximately 1,300 students in four coeducational residence halls, represents a planned and conscious attempt

to make these residences more private, more quiet, and more academic in tone than most residential units. Each of the units within the college has student personnel and faculty as advisers who provide cultural as well as academic assistance and who coordinate the collegiate aspect of the academic program.

*The Southwest Residential College*, which houses 5,500 students in both high-rise and low-rise buildings, operates on the assumption that a "college" within a university may function to provide more effective small-group identities and a maximum of contact between the students and members of the faculty.

Special sections of selected courses are designated for residents of both residential colleges. Music and dramatic events, special lectures, and discussions take place in residence halls. Faculty Fellows of the college and students participate in as many of these activities as they find to their advantage.

*The Sylvan Residence Area* offers suite-type dormitories, affording students an opportunity to build close living relationships within small groups by sharing quarters in a suite- or apartment-style arrangement.

### Room Furnishings

Most residence hall rooms are provided with beds, mattresses and mattress covers, dressers, desks, desk chairs, closets, and mirrors. In addition, most residence halls have study lounges, kitchenettes, laundry facilities, and vending machines.

Each student is expected to provide pillow, linen, and blankets.

Most residence halls are equipped with room telephones. Students who choose to live in these residence halls are charged an additional fee per semester for the basic telephone service.

### Residence Hall Staff

#### AREA DIRECTORS

Each residence area is administered by an Area Director, to whom all staff personnel in a residence hall report; Area Directors, in turn, report to the Director of Residential Life. Area Directors plan and direct all student personnel administrative activities for the residence halls in a given campus residential area; supervise the professional staff and student assistants in the residence halls; advise elected officers and committee chairper-

sons in the residence halls; and provide individual and group advising.

#### HEADS OF RESIDENCE

The Heads of Residence are responsible to the Area Directors. They work jointly with the counselors and Area Directors in the operation of residence halls. They provide leadership and support to the residence hall student staff, facilitate the work of elected house government officers and committee chairpersons, serving as resource persons and discussing University expectations with them; provide individual and group advisement out of concern for the welfare of students within the residence halls; and carry out administrative responsibilities associated with the operational aspects of residence halls.

#### COUNSELORS

Counselors receive direct supervision from the Heads of Residence and general supervision from the Area Directors. Their duties include helping to establish a climate in which students feel free to seek assistance and in which the educational goals of the University are emphasized; counseling individual students in personal, social, and academic matters; working jointly with the Heads of Residence and house government in providing for the daily operation of the residence halls; interpreting and maintaining regulations with respect to student life on campus; and assisting the Heads of Residence with administrative tasks in the residence halls.

#### Room Rent

Residence halls are constructed, equipped, and maintained, at no cost to the taxpayers, through funding provided by bonds issued by the University of Massachusetts Building Authority. Room rents are fixed so as to provide a fund sufficient to pay building and operating costs, i.e., to amortize the bonds. In order to meet payments on the various residence hall bond issues and to assure the minimum possible room rent, the University must maintain maximum occupancy of residence halls. This requires that a student be held financially responsible for room rent once registering for and occupying a room in a residence hall.

#### Apartments for Married Students

The University of Massachusetts owns and manages 395 apartments for married students in three apartment complexes: Lincoln (105 units), University (50 units), and North Village (240 units), all unfurnished except for appliances (stove and refrigerator). Utilities are included with the rent. Assignment of apartments is made through application (earliest application date given first consideration) or according to circumstances with regard to the number of current vacancies. A tenant is expected upon commencement of the lease (one year) to pay a security deposit equal to one month's rent. Applications and specific information may be obtained from the Married Student Housing Office, Whitmore Administration Building.

#### Off-Campus Housing

A card file of off-campus house, apartment, and room rentals is maintained by the Off-Campus Housing Office. Also provided is information about local realtors, garden apartment developments, classified newspaper rentals, and persons seeking roommates. Every effort is made to assist students to obtain off-campus housing; however, a personal visit is usually necessary for the student to review rental listings because of daily changes and because all off-campus arrangements must be made by the parties involved. Brochures and other information may be obtained from the Off-Campus Housing Office, Munson Hall.

#### Insurance

It is not possible for the University to carry insurance which will compensate students or their families for losses suffered on the campus due to such hazards as fire, theft, or water damage. For most families such insurance is highly desirable, either as an extension of present home insurance or as a special contract.

#### Food Services

The University Food Services cater the food requirements of the University except those services offered by the Campus Center Complex. Four dining commons serve students on a five- or seven-day meal ticket contract. All freshmen, sophomores, and juniors residing in University residence halls are required to purchase a meal ticket. Either a 10-, 15- or 19-meal ticket, which is valid for either two or three meals per day, may be selected. Students who are members of fraternities or sororities may be permitted to board at their respective fraternities or sororities, upon receiving written authorization from the Director of Greek Affairs. Those not required to board or campus may eat at a dining commons or a cash basis; they may purchase one of the regular meal tickets, or they may purchase a five-day single-meal ticket at a lower rate. Snack bar services are available at Worcester Commons and Hampden Dining Commons during regular hours of operation.

Expenses

Amherst Campus

Expenses are approximately \$2300.00 per year for the normally economical student. First-year costs are usually greater than those of the other three years, and there are fewer opportunities for earnings. Therefore, a student is advised to have a definite plan for meeting the expenses of the first year before entering. The following estimate of a year's expenses, based chiefly upon last year's costs, includes only those items which are strictly University-related and does not include amounts for clothing, laundry, travel, etc. These costs vary slightly from year to year. Tuition for residents of Massachusetts is \$345 per year; for others, \$1550.00. The University reserves the right to change any fees without advance notice.

ESTIMATED ANNUAL EXPENSES — AMHERST

|                                                                     |            |
|---------------------------------------------------------------------|------------|
| Tuition (Residents of Massachusetts)                                | \$345.00   |
| Room Rent in University Residence Halls (Approx)                    | 705.00     |
| Telephone (Where Available)                                         | 47.00      |
| Board at University Dining Halls (Five-Day Plan — Approx)           | 736.00     |
| Athletic Fee                                                        | 30.00      |
| Physical Education Fee                                              | 20.00      |
| Campus Center Fee                                                   | 64.00      |
| Fine Arts Fee                                                       | 6.00       |
| Student Activities Tax (Approx)                                     | 58.00      |
| Student Health Service Fee                                          | 92.00      |
| Student Medical/Surgical Insurance (12 Months' Coverage — Optional) | 53.00      |
| Books, Stationery, Laboratory and Other Supplies (Approx)           | 200.00     |
|                                                                     | \$2,356.00 |

INITIAL PAYMENT FOR FRESHMEN — AMHERST

|                                                           |           |

| Student Health Service Fee                                          | 46.00      |
| Student Medical/Surgical Insurance (12 Months' Coverage — Optional) | 53.00      |
| Books, Stationery, Laboratory and Other Supplies (Approx)           | 100.00     |
|                                                                     | \$1,193.00 |

Explanation of Fees and Payments

IN-STATE TUITION

As a state institution, the University offers the privilege of in-state tuition to all students entering from the Commonwealth. Eligibility for admission under the low residential rate is determined in accordance with the policy established by the Trustees and detailed under "Residence Status."

ATHLETIC FEE

Funds received from this charge are used to support comprehensive men's and women's intercollegiate programs as well as intramural programs.

PHYSICAL EDUCATION FEE

Income from this fee is used to support the required physical education program, intramural athletics, and general recreation.

CAMPUS CENTER FEE

Funds received from this charge are used to support the Student Union and the Campus Center and meet the operating costs of their various activities.

FINE ARTS FEE

Funds received from this fee are used to support a varied and comprehensive program of fine arts events for the cultural enrichment and enjoyment of the undergraduate body.

STUDENT ACTIVITIES TAX

This tax supports student government and an extensive and varied range of cultural and social activities for students. In addition, payment entitles each student to admission to many campus events and includes a subscription to the daily student newspaper, the annual yearbook, the student handbook, and a student guide to the campus.

HEALTH SERVICES FEE

Funds received from this charge are used to support the medical, psychiatric, and health services provided by the staff of the Health Center.

MEDICAL/SURGICAL INSURANCE

This is an optional plan intended to supplement the care received by students at the Health Center. It provides hospital, medical and surgical care on a 12-month basis for injuries or illness during the school year, holidays, summer vacation, and other times when the student is off campus. Students who register for the fall semester have only one opportunity to enter or reject this program each year, at the time of payment of the fall semester bill. It is also offered on the spring semester bill for new spring registrants only. Married students desiring family coverage under the plan now in existence at the University are advised to contact the Student Health Services. All candidates for and members of intercollegiate athletic teams are required by the Athletic Department to subscribe to the supplementary insurance plan.

COMMENCEMENT FEE

A commencement fee of \$10 is assessed students in September of their senior year, as commencement exercises and events are intended to be self-supporting.

SPECIAL UNDERGRADUATE STUDENTS

The Special Student tuition rate is \$15.00 per credit for Massachusetts residents, up to a maximum of \$150.00, and \$77.50 per credit for nonresidents, up to a maximum of \$775.00. Every student must pay a \$1 identification card fee yearly, and a student taking three or more courses a semester must pay a Campus Center fee and a health fee.

CREDIT BY SPECIAL EXAMINATION

Any student receiving credit by special examination must pay \$5 per credit before the examination may be taken. This fee is nonrefundable.

SCHOLARSHIP PAYMENT

Known scholarships are shown on the fee bills. If such items are not shown, deductions may not be made from the bill until satisfactory evidence has been presented to the Bursar's Office by the recipient.

Payment Due Date

In accordance with University policy, all charges for tuition, fees, board and room rent in University Residence Halls are due and payable prior to the date of registration of each semester. Bills will be rendered in advance with due date shown and payment may best be made

## Student Personnel Services

by mail. No student may register until all University charges are paid.

### Late Payment and Registration

Any student who does not make payment of his or her semester charges by the date specified may be required to pay a late payment fee of \$5.

### Refunds

#### TUITION AND FEE REFUNDS

A student who leaves the University for any reason, except as specified below, before a semester is completed will be granted a pro rata refund of tuition and fees. A student who makes an advance payment and then for any reason does not attend any part of the next semester or term at the University will be given a full refund of tuition and fees. The \$15 matriculation payment required of new students is not refundable.

Refunds are first applied to reimburse scholarship or loan funds (up to the full amount), and any remaining amount is refunded to the student or parent. A student who is suspended or expelled from the University for disciplinary reasons forfeits all rights to a refund.

#### *Refund Schedule*

##### *Regular Term*

- a. Within the first two weeks from the beginning of semester or term (Registration Day) — 80%.
- b. During the third week — 60%.
- c. During the fourth week — 40%.
- d. During the fifth week — 20%.
- e. After the fifth week — no refund.

##### *Summer Session*

- a. During the first week — 60%.
- b. During the second week — 20%.
- c. After the second week — no refund.

#### ROOM RENT AND BOARD REFUNDS

A student who has made an advance payment of room rent will be granted a full refund of prepaid room rent if he or she fails to attend any part of the next semester or term or does not reside in a residence hall or other housing. Prepaid board will be refunded on a special per diem basis.

A new policy of Room Rent Refunds was placed in effect by the Board of Trustees in Spring Semester 1973. According to the policy, "student room rent refunds shall be refundable according to the following instructions: Any student who occupies his/her assigned accommodations and subsequently

leaves the University prior to the end of the first full class week shall automatically be charged a minimum of \$100 for his/her room. Any student who leaves the University during the second through fifth weeks shall be charged \$100 plus 20% of the remaining balance for each week or part thereof. No refunds will be made after the fifth week of the academic semester. Refunds will be made during the refund period only to students who officially withdraw from the University through the Registrar's Office and according to the Registrar's official withdrawal date. The Dean of Students' Office will be authorized to make exception to the above only for reasons of involuntary entry into military service or for reasons of 'extreme emergency'. Any exception made, however, shall not apply to the \$100 minimum charge which shall be levied in all cases automatically."

Student Personnel Services comprise a number of agencies with primary concern for students' non-academic (out-of-the-classroom) activities — residence halls, health, counseling, student activities, security, admissions, records, career planning, financial aid, and related services.

The Vice Chancellor for Student Affairs is responsible for the overall direction for departments providing services which, in addition to the above, provide support services for the entire campus community.

Student Personnel Services not described elsewhere in this Bulletin include the following:

The *Housing Office* has responsibility for the supervision of residence hall room assignments and room changes and serves as a central source of information for off-campus housing listings.

The *International Programs Office* assists and coordinates international programs, including the study abroad programs of the University of Massachusetts. Students can obtain information from the Office of International Programs on a range of overseas study programs, including those operated by other American colleges and universities and by foreign institutions. The office also has information on low-cost international travel, international student identity cards, financial aid for study abroad and work opportunities overseas. Students planning to go abroad for work study, or travel should consult the Director in making these plans. The Director also coordinates Marshall and Rhodes Scholarships.

The *Foreign Student Office* offers assistance to foreign students, faculty and staff and should be consulted in regard to all matters pertaining to their official immigration status while in the United States. In addition, the Foreign Student adviser may be consulted regarding any other problems which a person from another country may encounter while at the University. These questions may include help in finding housing, help with financial matters including the authorization of foreign student loans, relations with American students and the community, and personal problems. The adviser further attempts to help in coordinating community service projects, such as speaking engagements, trips to the United Nations host families, and International Clu

activities. The Foreign Student Office is part of the International Programs Office.

The *Admissions and Financial Aid Office* is responsible for all administrative procedures with respect to undergraduate admissions to the University, including liaison with high school guidance counselors, Community College staff personnel, and other admissions officers for transfer students; it also passes on re-admission of returning and re-entering students and admissions standards set in coordination with the Vice Chancellor for Academic Affairs and academic departments.

The *Registrar's Office* is responsible for registration (enrollment) and matriculation of undergraduate students at the University; administrative procedures relating to course loads, courses of study, withdrawals, grade reports, and transcripts; and maintaining the permanent academic record cards.

The *Office of Transfer Affairs* is a resource center for all matters pertaining to the transition process of students entering the University from other institutions of higher education. (Nearly one-fourth of all newly entering students are transfers. The major portion of transfer students come from the state-supported Community Colleges.) This office also coordinates with the Community College system the mechanisms for admission, credit evaluation, financial aid, and orientation, and is concerned with the adjustment process for transfers. It works with the other Student Personnel Services at both the Community College and the University in an attempt to assist the transfer in making a smooth and comfortable adjustment to the University.

The *Student Development Center* provides personal, social, educational and career counseling services to present and past students. In an attempt to contribute to the improvement of the students' living and educational environments, the Center shares the responsibility for facilitating the students' development with residence hall staffs, instructors, and personnel in other divisions of the University.

In the past, students have utilized the Center's resources by discussing developmental concerns, personal difficulties, and decision-making career and educational matters. Others have come to consult on research design, test and ques-

tionnaire construction, human consciousness, humanistic psychology, and interpersonal communication. All are assured of confidentiality on personal matters discussed with Center staff.

The *career planning services* of the Student Development Center include vocational counseling and career development services to undergraduates, graduates, and alumni. Informal testing is used occasionally to assist students with remedial problems, to aid in the identification and development of personal and vocational goals and objectives, and to begin establishing a career. The office advises students on employment opportunities and arranges for employers, representatives from business, industry, government, schools, and other areas to visit the campus during the year to interview prospective graduates. The recruiting schedule as well as pertinent planning information appears weekly in the Center's *Career News*. A resource library in the Center provides occupational information, industrial literature, graduate school information, and self help career aids. A librarian is available to help students locate and use resource materials.

A *credentialing service* provides a place for each student to establish and maintain an up-to-date file of personal records, (including registration information), a developmental resume, letters of recommendation, and other supportive documentation. Copies are sent to prospective employers upon their request (no charge) or when initiated by the candidate (a nominal charge).

The Center is an important source of information and consultation on teacher certification requirements for students planning to teach in public schools. When in doubt, it is critical that students talk with the Center's Educational Placement Specialist. This should be done prior to the senior year to make certain that certification requirements will be met upon graduation. The Educational Placement Unit is an expert resource of information on local certification, specialized certification, and certification in states other than Massachusetts. Additional information concerning documents required, vacancies, local and regional teaching market trends and other information is also available upon request.

The *Department of Public Safety*

comprises the University Police, the Security Guard Force, and the University of Massachusetts Police Training Institute. It works closely with the Town of Amherst Police Department, the Massachusetts State Police, and other state law enforcement and public service agencies to provide high quality law enforcement, regulatory training, and public interest services for the Amherst campus of the University. It cooperates also with federal law enforcement agencies, upon specific request, to assist in the enforcement of relevant federal laws.

The Campus Security Force is responsible for the security of University property, provides protection of life and liberty, parking control, emergency transportation of sick and injured, and guard services when enforcement of certain regulations is established by the Board of Trustees. The guards are assigned to parking control duties during the day and patrol of residence hall areas at night. In accordance with provisions of the Code of Student Conduct, student ID cards or other means of identification must be shown upon request to any properly identified member of the security department, to enable the officer to perform his/her assigned duties.

University police officers are responsible for the public safety of all persons and property within the physical boundaries of the University campus.

The policies of the department, enforcement procedures and regulations are governed by federal, state and local laws and Trustee regulations. In addition, department personnel are guided by a code of ethics adopted by the International Association of College and University Security Directors.

## Health Services

The University Health Services is organized to provide a high quality comprehensive health program for the University community. Each student pays a health fee which provides a wide range of prepaid services in campus facilities. In addition, a number of other services are available on a co-payment basis.

Physicians, nurse practitioners, and other health professionals work as a team to provide medical care to students at the Health Center. Complete facilities located at the Center include x-ray, laboratory, pharmacy, and physical therapy facilities, as well as an inpatient service for those in need of hospitalization. Specialty services such as allergy and eye care clinics are also provided, as are consultation in orthopedic surgery, and obstetrics and gynecology.

All students submit health data upon entrance to the University. Any student who is under medical supervision prior to entrance is urged to have his/her physician write to the Health Services, giving reports and instructions in appropriate detail. In brief, the Health Services attempts to provide each student with a coordinated and comprehensive program of health supervision formerly provided by the family physician.

The Dental Health Division provides emergency dental care, routine oral examinations, and dental education as part of the health fee. Some services, such as cleaning and restorative care, are provided on a modified fee-for-service basis as time permits.

Recognition of the specific emotional needs of students in an educational environment is recognized by the provision

of an active mental health program. The Mental Health Division provides personal and couples counseling, individual and group therapy, and community consultation.

All visits to the Health Services are treated as confidential. No information is released without the written permission of the student.

The Health Education Division offers a variety of programs aimed at the development of attitudes and behavioral patterns which promote healthful personal and community living. Programs include workshops, discussion groups, peer training programs and consumer activities in such areas as sexuality, nutrition, alcohol and first aid.

The Environmental Health and Safety staff operates to ensure a safe and healthful environment for all who live or work on campus. Sanitation, radiation, fire protection and building and traffic safety are major areas of activity.

The Student Advisory Board works with the Health Services staff in reviewing policy, evaluating services and initiating and developing new programs. Students are urged to participate in the activities of the Board.

A supplementary insurance plan has been developed to provide for that hospital and surgical care not available at the Health Center. This optional program can be elected in September only. The insurance provides coverage for twelve months. All candidates for and members of intercollegiate athletic teams are required to subscribe to this supplementary insurance plan.

## Student Activities

### Campus Center Complex

The Campus Center Complex is composed of the Murray D. Lincoln Campus Center, the Student Union Building, and the Parking Garage. It houses the offices of the Campus Center Director and his staff, the Student Activities staff, the University Ombudsman, the student government staffs, and RSO groups.

Service departments of the complex include the University Store, the Campus Assistance Center, cashier's office, U.S. Post Office, barber shop, games area, music library and listening lounge, sweet shop, print shop, media services, Campus Travel Center, and overnight accommodations with parking facilities and food services (four cafeterias and the Top of the Campus restaurant and cocktail lounge). Meeting rooms, lounges, reading rooms, and art galleries are available for student and general campus use.

The Campus Center Governing Board, comprised of undergraduate and graduate students, determines policy for the operation of the Center. The Program Council, a standing committee of the Board composed wholly of students selects, plans, and executes all Center activities in art, music, dance, movies special events, etc. Any student may apply for membership.

Construction and operating costs are met from student fees and income generated from general operation, particularly of the Food Service Department, the University Store, and Overnight Accommodations. In effect, a portion of every dollar generated within the Complex is recycled back into the Center to benefit the student body; that is, through building services, Program Council activities and the assistance of the professional staff. Full use of income for these and other positive purposes is, of course, a major factor in maintaining student fee at a reasonable rate.

The Campus Center hosts program sponsored by the Division of Continuing Education, the alumni of the University and many service organizations. The Complex is also used heavily for conferences, institutes, workshops, and short courses.

### Student Activities Office

In addition to serving as the headquarters for Recognized Student Organizations (RSO), the Student Activities Office in the Student Union provides program resource materials, counseling

on program planning, advice on program selection and procurement, and assistance on budgeting, purchasing, procurement of campus support services, contracts, and other business procedures.

The RSO staff provides to student groups a computerized banking and bookkeeping service and offers advice on financial and business concerns such as bidding, insurance, budgeting and accounting. The staff also includes a Crafts Adviser who operates, manages, and advises students in the Student Union Craft Center. Most members of the Student Activities staff are Notaries Public for the convenience of students, particularly for absentee balloting.

Participation in extracurricular activities offers opportunities to further broaden objectives of a University experience. The knowledge, skill, and judgment developed in the classroom can be tested and refined through use in many organizational settings. The University expects that no student will be excluded from membership in any club, society, fraternity, sorority, or other organization for reasons of race, creed, color, sex, or national origin except those instances wherein groups are specifically exempted by federal law. Campus groups belonging to national bodies which openly or covertly endorse such discrimination are in violation of University principles. Alleged violations are to be reported to the Dean of Students. There are over 500 student organizations ranging in interest from political, religious and cultural, to social, professional, and recreational. Some of these include:

#### **Media**

**VMUA** - The campus radio station (91.1 FM), owned and operated by students for the University community.

**Black Moss Communications** - Black students' media group designed to bring Black news, current events and culture to the community.

**The Daily Collegian** - One of the largest student newspapers in the country.

**Spectrum** - A Black literary magazine, published two or more times per year. It features art, fiction, essays and commentaries.

**INDEX** - The University undergraduate yearbook; one of the oldest and largest yearbooks in the nation.

**Spectrum** - Published about two times a year, *Spectrum* features poetry, fiction, drama, art, photography, political and social commentary, music and book reviews and essays.

**Shorthorn** - The Stockbridge College student newspaper, *Shorthorn* is published weekly or bi-weekly.

**STOSAG** - STOSAG is the Stockbridge College yearbook published annually by a student staff.

#### **Professional and Special Interest Clubs**

Approximately fifty professional clubs established in connection with the various major courses of study, stimulate students' professional interest in their chosen fields and afford opportunity for discussion of technical subjects of mutual interest.

Special interest groups cover an even wider range of interests, in many cases offering learning experiences in subjects not included in the academic areas of the University (e.g., religion, politics, sports, hobbies, etc.). A partial list includes: Young Socialists Alliance, Amateur Radio Club, Volunteer Fire Department, Equestrian Club, Crew Club, Bike Club, Square Dance Club, Strategy Games Club, and numerous musical, film, theatre, religious, political, ethnic, cultural, and sports (including Oriental sports) organizations.

#### **Social Action Groups**

**Belchertown Volunteers** - Belchertown Volunteers work with the mentally retarded at the Belchertown State School. Volunteers sponsor numerous activities, and students often take people from the institution to campus for the day for various activities.

**Northern Educational Services** - NES volunteers tutor English-speaking inner-city children in the primary grades, mostly in reading and math. There are several programs, including a recreational one with arts and crafts, cooking, sewing, dancing, etc. and a night tutorial program for juniors and seniors in high school.

**Poverty Committee** - The committee deals with the problems of welfare, united mine and farm workers support, National Alliance Against Racism and Oppression, etc. The group sponsors educational programs with films, speakers, letter petitions, and polling.

**The Boltwood Project** - Funded by the Student Senate, its members work with the mentally retarded at Belchertown State School.

**Room To Move** - Drug counseling drop-in center, cooperating with the Health Services.

**Coalition for Environmental Quality (CEQ)** - Works toward mobilizing constructive and informed activism on environmental matters.

**Massachusetts Public Interest Research Group (MassPIRG)** - The Massachusetts Public Interest Research Group (MassPIRG) is modeled after the Ralph Nader organization in Washington, and funded by college students in Massachusetts.

**The University and State Communications Council** - The University and State Communications Council is an undergraduate student group which works extensively with the University administration, the State Legislature, and the media in an effort to open and develop channels of communication between students and the people involved in these three areas.

In addition to these groups there are other special interest professional, political, religious, social action, educational, cultural, governmental, recreational, and media groups, plus honor societies, residence hall groups, fraternities, and sororities.

#### **Non-Traditional Student Assembly and CAOS**

The Non-Traditional Student Assembly is a fairly new RSO group formed in response to the recent influx of older undergraduate students. The aim of the Assembly represents the concerns of its membership to the Student Government Association and to various academic and administrative offices on campus.

An older student is any person who has not come to college directly from high school. Membership in the NTSA is automatically extended for older students whether they are matriculated in the University degree program or taking courses through Continuing Education. Graduate students are also welcome and encouraged to participate in the NTSAs activities.

**CAOS (Counselling Assistance for Older Students)** is an outreach program of the NTSA. CAOS provides counselors for academic and personal problems

ranging from pre-registration course selection to financial aid, house hunting and psychological counseling. A staff of trained volunteers and paid assistants is available Monday-Friday from 9-4 in the CAOS office, 308 Student Union.

Other programs of the NTSA-CAOS include running workshops, classes in personal counseling and social activities geared to the interests of older students.

Non-traditional students are encouraged to become involved in both the NTSA and CAOS. Academic credit and work-study funds are available for CAOS counsellors.

### **Programming Organizations**

*Distinguished Visitors Program (DVP)*-Organization supported by student tax funds to bring to campus nationally and internationally known persons to speak on domestic and international affairs, the sciences, the humanities, and the arts.

*Campus Center Program Council* - Responsible for major programming in the Campus Center/Student Union Complex, including concerts, lectures, films, art exhibits and acquisitions, recreational activities, crafts, etc.

### **Student Honor Societies**

*Adelphia* - Men's non-academic honor and service society (senior and junior classes).

*Mortar Board* - National honor society for senior women

*Scrolls-Moroon Key* - Sophomore honorary-service society.

*Revelers* - Group of upperclassmen who promote and encourage interest in campus activities.

*Alpha Phi Omega* - National service fraternity.

*Gamma Sigma Sigma* - National service sorority.

*Delta Sigma Rho* - *Tau Kappa Alpha* -National honorary forensic fraternity.

### **Academic Honor Societies**

*Phi Beta Kappa* (arts, humanities, and sciences)

*Phi Kappa Phi* (all fields of study)

*Sigma Xi* (pure and applied science)

*Sigma Goma Epsilon* (earth sciences)

*Omicron Nu* (home economics)

*Phi Tau Sigma* (food science)

*Phi Eta Sigma* (freshman men, all fields of study)

*Tau Beta Phi* (engineering)

*Beta Gamma Sigma* (commerce and business administration)

*Alpha Lambda Delta* (freshman women, all fields of study)

*Eta Kappa Nu* (electrical engineering)

*Alpha Zeta* (agriculture)

*Xi Sigma Pi* (forestry)

*Alpha Pi Mu* (industrial engineering)

*Kappa Delta Pi* (education)

*Phi Sigma Alpha* (political science)

### **Student Government**

The Student Government Association (SGA) works for fundamental academic and social reform on campus while providing services to students, including a lecture-note program, book loans, bus service, course description guide, attorney for students, and funding for wide variety of student groups and services. The SGA is working toward full student self-determination in social and academic life.

All undergraduates are members of the SGA and are eligible to join its activities. The Student Senate is the legislative arm of the SGA. The seven area governments determine policies in their respective areas. The SGA President coordinates the activities of the SGA and represents the student body to the administration and faculty.

The student role in running the University has increased greatly in recent years. Students interested in University reform should contact the SGA President.

### **Fraternities and Sororities**

Men's social fraternities include Alpha Tau Gamma (Stockbridge School), Beta Kappa Phi, Delta Chi, Kappa Sigma, Lambda Chi Alpha, Phi Mu Delta, Alpha Epsilon Pi, Phi Delta Theta, Q.T.V., Zeta Psi, Phi Sigma Kappa, Sigma Alpha Epsilon, Sigma Phi Epsilon, Tau Epsilon Phi, Theta Chi, and Zeta Nu. Women's social fraternities include Alpha Chi Omega, Chi Omega, Iota Gamma Upsilon, Kappa Alpha Theta, Kappa Kappa Gamma, Lambda Delta Phi, Sigma Delta Tau, Sigma Kappa, and Sigma Sigma Sigma. There is one co-ed fraternity, Sigma Alpha Mu

A Greek Council consisting of the presidents and one representative of these fraternities is the area government for this residential area. The Greek Council provides service to all its member organizations, the University, and the community, as well as dealing with general matters pertaining to fraternity life. Each of the fraternities owns its own house, and the members are responsible for the daily maintenance, financial management, meal planning, governing, and organizing of special events or programs.

### **Music Organizations**

Campus music organizations provide experience in musical and allied activities for performers and technicians with various kinds of interest and ability.

The University Symphony Orchestra, the bands, and the choral organizations are in the Department of Music. Membership is open to all students, faculty, alumni, and others in the community.

### **University Theater**

The University Theater offers public performances of plays during the regular academic year winter season. Productions grow out of study projects as part of Department of Theater's curriculum, and are primarily the work of graduate and undergraduate theater majors. However the Department welcomes non-majors students from the Five Colleges, and persons from the University community at large, all of whom are eligible to participate in many aspects of these productions. Try-outs for all productions are announced publicly by the Department whose facilities in the new Fine Art Center include a studio theater, a main stage proscenium theater, and fully equipped shop and rehearsal areas.

### **Debate**

The University Debate Union is an academic and co-curricular activity of the Department of Communication Studies. Each year, debate teams research and debate an intercollegiate proposition dealing with an important national or international problem. The debaters attend tournaments at colleges and universities throughout the United States.

### **Arts Council**

The University of Massachusetts Art Council is composed of six undergraduate and three graduate students, six faculty members and one non-faculty student member. Student and faculty members

are appointed by their respective Senates. The staff member is appointed by the Council.

The Arts Council, together with its professional staff, develops and administers a varied series of professional entertainment for the University community including Dance, Theater, Chamber Music, Opera, Ballet, etc. The Arts Council endeavors to bring to the University some of the world's finest performing organizations and artists.

The University of Massachusetts Arts Council also supports the University Art Gallery. The Gallery is open year round and provides exhibitions of traveling shows.

A schedule of Arts Council events may be obtained by contacting the Council office.

### Athletics

The University recognizes the educational advantages of a well-organized intercollegiate and intramural sports program. In intercollegiate athletics for men, the University is represented by teams in football, soccer, cross country, basketball, swimming, wrestling, indoor and outdoor track, hockey, golf, tennis, baseball, lacrosse, gymnastics, skiing, and crew. The women are represented in nine intercollegiate sports: basketball, field hockey, gymnastics, skiing, softball, swimming, tennis, volleyball, and crew.

The University also sponsors a broad program of intramural activities in which both men and women students are encouraged to participate. Team sports available each year include touch football, powder puff football, basketball, bowling, volleyball, soccer, badminton, softball, horseshoes, handball, bicycle racing, and tug-o-war. Individual activities include cross country, squash, paddleball, wrestling, wrist-wrestling, swimming, table tennis, weight lifting, and tennis.

The University holds membership in the: Yankee Conference, National Collegiate Athletic Association, Eastern College Athletic Conference, New England College Athletic Conference, Association of Intercollegiate Athletics for Women, Eastern Association of Intercollegiate Athletics for Women, and Massachusetts Association of Intercollegiate Athletics for Women.

### Alumni Association

The Associate Alumni is the general alumni organization of the University,

with headquarters at Memorial Hall, erected by alumni and friends in honor of those men of the University who died in World War I. The *Alumnus* magazine is published by the University seven times a year. According to its bylaws, the association is constituted for the purpose of promoting the general usefulness of the University; of activating mutual regard among its graduates and former students; and of strengthening their attachment to their Alma Mater. Under sponsorship of the University of Massachusetts Building Authority, composed of alumni who volunteered their services, 19 residence halls, two faculty apartment centers, and a Student Union building have been constructed on the campus. Alumni also serve the University by their support of innovative academic programs through their contributions to the rapidly growing annual alumni fund and through special bequests. The governing body of the Associate Alumni consists of its officers and a board of directors. Eight directors are elected each year and serve three-year terms.

### Religious Activities

The University gives support to the religious life of its students by affording the use of University facilities for student-groups of all faiths. It cooperates with the official agencies of the three faiths most largely represented at the University by recognizing the contributions of their privately supported chaplains and by giving them facilities and privileges for their work.

On campus, the religious life of Catholic students is enriched by activities and daily and Sunday services at the Newman Center. Jewish students participate in services and activities sponsored by the B'Nai B'rith Hillel Foundation. Protestant students are served by the United Christian Foundation, an ecumenical ministry providing counseling services as well as opportunity for involvement in service and social action.

Other religious groups such as the Baha'i Club, the Christian Science Organization, the Inter-Varsity Christian Fellowship, the Lutheran Club, and the Orthodox Club also meet regularly on campus and students interested in their programs are welcome to attend. The Campus Religious Council provides a cooperative inter-relationship among the campus religious groups and serves the whole University community by spon-

soring book and clothing drives, the *Religious Handbook for Freshmen*, and ecumenical discussion and action.

The local Protestant and Catholic churches of Amherst provide opportunities for Sunday worship, and Sabbath services for Jewish students are held on Friday evenings. Several denominations sponsor active student programs centered in the local churches, and students are welcome to attend events and join groups sponsored by the denominations.

### Motor Vehicles

All student, faculty, and staff motor vehicles must be registered with the Parking Office, Room 1, Munson Hall.

Any student may be permitted to have a motor vehicle on campus provided it is registered with the Parking Office and complies with published University regulations. Copies of the University regulations concerning motor vehicles should be obtained at the Parking Office, Room 1, Munson Hall.

Visitors during regular business hours are requested to use the multi-level Campus Parking Garage or parking meters. A University bus service, free of charge, covers the campus and environs.

All parking areas are under roving security surveillance. Visitors may secure information at the Parking Control Booths or at the Security Building. Inquiries concerning parking should be directed to the Parking Coordinator, University of Massachusetts, Amherst, MA 01002.

# Financial Aid

## General Information

Financial aid consists of scholarships and grants (the awarding of money for which no repayment is expected), self-help in the form of loans (money lent to the student to be repaid after the termination of studies), and employment (guaranteed jobs to provide a certain income during the year). Financial aid is offered to those students who cannot, through their own and their parents' reasonable efforts, meet the full cost of a college education.

Financial aid programs are funded from a number of sources: State and Federal appropriations, private philanthropy, University Alumni and others. The amount of money available, academic requirements, and other eligibility criteria vary from program to program. Each student applicant is automatically considered for every University-administered program for which he/she may be eligible. Students desiring further description of specific programs may obtain information sheets from the Financial Aid Office, Room 243, Whitmore Administration Building.

## Application Procedures

An application for financial assistance consists of two forms: A University Aid Application and the Parents' Confidential Statement. (Student Financial Statement for students who meet the legal criteria for financial independence.) Both forms must be submitted before an application will be processed.

## INSTRUCTIONS FOR HIGH SCHOOL SENIORS

All high school seniors applying for financial assistance must file the Parents' Confidential Statement. The deadline for priority aid consideration is March 1 of their senior year. Applications received after that date are considered late and will be processed only if funds remain.

**Special Notice:** The Basic Educational Opportunity Grant Program (BEOG) is a new Federal grant program. Maximum awards under this program could be as high as \$1400 per year. The BEOG program is an entitlement program under which all eligible applicants who demonstrate financial need according to the Federal guidelines will receive Basic Grants. Applications should be available after February 1 through your high school. (If not available through your high school, contact this office.)

*Applicants for Financial Assistance from the University of Massachusetts-Amherst MUST Apply for a Basic Grant.*

## INSTRUCTIONS FOR ALL OTHER APPLICANTS

The priority deadline for financial assistance for all other students is April 30 preceding the academic year for which aid is requested. Students who feel that they are financially independent of their parents should contact the Financial Aid Office to see if they are eligible to file a Student's Financial Statement.

## Disbursing of Awards

All financial assistance except employment earnings are paid in installments at the beginning of each semester in the form of a credit on the recipient's bill. If the aid exceeds the bill, as it often does for students living off-campus, the remainder of the assistance is normally available to the student within two weeks after registration. If the aided student withdraws from the University, any refund of University fees or charges must first be applied to the aid fund to reimburse the fund for the full amount of the assistance received by the student for the semester.

## Types of Aid

### SCHOLARSHIPS AND GRANTS

The office of Financial Aid administers more than 20 scholarship and grant programs with differing eligibility criteria. Residency, academic average, field of study and parental income may determine eligibility for specific programs. Scholarships normally range from \$200 to \$2000.

## LOANS

### National Direct Student Loan Program

A student may borrow up to \$2500 per year under this program. Interest at 3 percent begins nine months after completion of the program; the loan is to be repaid within ten years. Because of the amount available, this program is necessarily limited and selective.

### Higher Education Loan Plan

The student may obtain a loan of up to \$2500 per year from the bank of his or her choice through the Higher Education Loan Plan. Application procedures eligibility criteria and other relevant information are available at the Financial Aid Office.

## EMPLOYMENT

Under the College Work-Study Program,

a student who meets established financial aid criteria can be assigned to a part-time job on campus or to a job with a non-profit agency in his community during the summer months.

## Benefits for Veterans and Their Dependents

Veterans or their dependents (wife or child of a deceased or 100% disabled veteran) eligible for educational benefits under the Veterans Bill, P.L. 358, the Disabled Veterans Bill 894, or the War Orphan Bill 634, should contact the Veterans Affairs Office at the University 30 days before their classes begin for regular enrollment or up to 120 days before classes for Advancement Payment of their checks. It is important that the eligible student contact the Veterans Affairs Office prior to the beginning of school so that he/she may expect the first check when classes actually begin. It takes approximately four to six weeks for payment after the veteran student has filed the proper V.A. paperwork with the Veterans Office at the University.

Veterans whose home of record was Massachusetts when they entered the Service may be eligible to apply for a state tuition waiver.

## Military Service

The Veterans Affairs Office provides information on draft status and assistance in verifying the status of any male student at the University. Through this office, students may register for the draft within 30 days before or after their 18th birthday; it is unnecessary for them to return to their Local Board to register.

# General Services

## University Library System

The University Library System is composed of the main University Library, a 28-story building which opened in the summer of 1973, and several branch libraries, of which the two principal ones are the Morrill Biological Sciences Library and the Physical Sciences Library. Present holdings include over 1.2-million books, periodical volumes and government documents, and over 258,000 microforms. The more than 10,000 periodicals currently received are housed in the main library or the branch libraries, according to subject matter. Holdings of serials and periodicals and their locations are listed in both the card catalog and the *Pioneer Valley Union List of Journal and Serial Holdings*, a computer-produced book which also includes the holdings of Amherst, Smith and Mount Holyoke Colleges, the Forbes Library, and the Hampshire Inter-Library Center. Additional information about the University Library System and Five College library cooperation is available at the Information and Reference Desks in the main library and also in the branch libraries.

## HAMPSHIRE INTER-LIBRARY CENTER

The University Library is a participating member of the Hampshire Inter-Library Center, a cooperative facility for the acquisition, storage, and servicing of research materials, especially journals, documents, and scholarly sets. Incorporated in 1951 to augment library resources in the area, HILC is jointly operated by the libraries of the four Pioneer Valley colleges: Amherst, Mount Holyoke, Hampshire and Smith, the Forbes Library of Northampton, Massachusetts, and the University Library. The collection numbers about 34,000 bound volumes, and approximately 850 journals are currently received.

## The University Press

The University of Massachusetts Press was established in 1964 as the book publishing division of the University. It is a member of the Association of American University Presses, which includes most of the university-sponsored presses in the United States, as well as affiliates abroad.

The Press publishes scholarly and artistic works which make substantial contributions to the community of learning. Manuscripts and projects are eval-

uated by the Press Committee on the basis of reports submitted by specialists in the field. Once approved for publication, works are edited, designed, produced and marketed by the Press staff. Printing, warehousing, shipping and data processing services are purchased. University students are offered the opportunity of working at the Press, as Interns, Research Assistants, Work-Study employees, to acquire academic credit and on-the-job experience in book publishing.

Since its founding approximately half the books published by the Press have involved the research of this University's faculty. The publications have won numerous awards for design and production, and achieved an outstanding reputation for excellent reviews.

## Scholarly Journals

The *Massachusetts Review* is a national and international quarterly of the arts, literature, and public affairs, published independently with the support and cooperation of Amherst, Hampshire, Mount Holyoke, and Smith Colleges, the University of Massachusetts and its Alumni Association, and others.

The English faculty also edits and publishes three scholarly journals. *English Literary Renaissance* on English literature in the age of Shakespeare and Milton (1485-1665); *Early American Literature* on the colonial and Puritan periods (1760-1880); and *RSVP*, a journal on Victorian English periodical publications. Graduate students in that department publish *MSE*, Massachusetts Studies in English. The quarterly *Polity* is published by the department of Political Science.

## Language Laboratories

The James W. Butler Language Laboratories provide special study facilities to students enrolled in foreign language courses. Three of the labs, equipped with student-controlled tape recorders and monitoring facilities, can accommodate up to 90 students in three elementary classes. Another room, with 20 booths, is available to students who make use of the Open Library Usage service for independent study.

A fifth lab was designed and equipped for intermediate and advanced language students. Its 28 booths are furnished with dialing pads which enable its users to listen to any program tape available in the banks of the Random Access Library

(RAL). It is anticipated that in the future these tape-machine banks can be reached over telephone lines.

Lesson tapes and RAL program masters are produced, transcribed, and programmed in the Recording Studio and the Transcription Center. A highly trained technical staff is available at all times.

## Office of Public Affairs

The Office of Public Affairs serves as liaison between the campus community and the general public, and as an internal information center for the benefit of faculty, students, and administration. Its primary function is to provide accurate information about the University's current and projected programs and thus to foster understanding of the institution's mission as a nationally recognized facility of higher education, research, and public service. The office assigns specific responsibilities to six departments — Editorial Services, Graphic Design and Production, News Bureau, Creative Services, Photographic Services and Radio Station WFCR. Through these departments the office supplies information to all communications media as well as to agencies of government, schools and other educational institutions and foundations, professional societies, research organizations, extension agencies, and to individuals who request data of various kinds.

## Office of Budgeting and Institutional Studies

The Office of Budgeting and Institutional Studies is responsible for the coordination of campus fiscal planning, analysis, and information reporting. The responsibility for these activities rests with three separate but interdependent groups within the office.

The Analytical Studies Office coordinates institutional studies and analysis of the cost and benefit implications of the campus operations and programs. This office also conducts research related to campus issues such as program review, resource utilization, enrollments, and program planning.

The Budget Office coordinates the development and management of the campus operating budgets. The office assists in the development and implementation of budgetary guidelines, fiscal policies, and financial plans.

The Management Systems Office provides system design and program-

ming services for the development of improved management information for the various campus administrative units. The office is responsible for establishing and maintaining systems documentation, processing procedures, data element definitions, and files for all administrative applications.

The staff of the Office of Budgeting and Institutional Studies assists members of the campus community in understanding the nature and operations of the campus, and provides services for planning, improving, and implementing campus programs and activities.

#### **Cooperative Extension Service**

The Cooperative Extension Service, affiliated with the College of Food and Natural Resources, was established by federal and state legislation to help people identify and solve their farm, home, rural, and urban community problems. It is a cooperative educational program planned, conducted, and financed jointly by the county governments, the University, and the United States Department of Agriculture.

#### **Massachusetts Agricultural Experiment Station**

The Massachusetts Agricultural Experiment Station, established by state and federal legislation, is associated with the College of Food and Natural Resources. The purpose of the Station is to conduct research bearing directly on the problems of the agricultural industry and the welfare of consumer groups. It is financed by federal appropriations and state offset funds. Research is conducted at the Cranberry Experiment Station in East Wareham, the Suburban Experiment Station at Waltham, the Horticultural Research Center in Belchertown, the College Farm in South Deerfield, and on the Amherst campus. The Environmental Forestry Research Center of the United States Forest Service has been established on the campus in cooperation with the Experiment Station.

#### **Other Facilities and Services**

Audiovisual Center  
Cooperative Fishery Unit  
Cooperative School Service Center  
Cooperative Service Bureau  
Cooperative Wildlife Research Unit  
Institute for Man and Environment  
Institute of Agricultural and Industrial Microbiology  
Labor Relations and Research Center

Massachusetts Population Research Institute  
Northeast Regional Media Center for the Deaf  
Polymer Research Institute  
Program in Urban and Regional Problems  
Technical Resource Service  
University Computing Center  
Water Resources Research Center

#### **Five College Courses**

Amherst, Hampshire, Mount Holyoke, and Smith Colleges and the University of Massachusetts/Amherst combine their academic activities in selected areas for the purpose of extending and enriching their collective educational resources. Certain specialized courses not ordinarily available at the undergraduate level are operated jointly and are open to all. In addition, any qualified student in good standing at any of the institutions may take a course without cost at any of the others, if the course is significantly different from any available to him or her on the home campus. The course must have a bearing on the educational plan arranged between the student and the adviser. Approval by the student's adviser and Academic Dean of the College at the home institution is required. Permission of the instructor is required for students from other campuses.

Students should apply for interchange courses at least six weeks prior to the

beginning of the semester since they may find some courses already filled after that time. Free bus transportation among the five institutions is available for interchange students.

Students interested in such courses will find current catalogs of the other institutions in departmental offices, the University Library, or the Office of the Registrar. Applications may be obtained from the CASIAC Office, E-22 Machmer.

#### **Regional Student Program**

The University participates in a regional cooperative program administered by the New England Board of Higher Education. This program, known as the Regional Student Program, permits qualified residents of the New England states to study with in-state tuition and admission privileges at any of the state universities, the Lowell Technological Institute and the public two-year colleges and technical institutes in a wide variety of study areas.

The purpose of the program is to expand opportunities for higher education for New England residents by making available on an equal basis to all those courses not commonly offered at every institution. This practice tends to reduce duplication of courses and thus to utilize most efficiently the higher educational facilities in each state.

Detailed information about this exceptional program can be obtained from an

## Special Academic Programs

guidance counselor or from the New England Board of Higher Education, 20 Walnut Street, Wellesley, MA 02181.

### Pre-Law Advising Program

The Pre-Law Advising Program was instituted to provide students with information on the nature of legal education, admission to law school, and career opportunities in the legal profession. Law schools do not prescribe any particular method of preparation or program of courses for admission; consequently, there is no Pre-Law major at the University. Interested students are urged to register with the Pre-Law Adviser, E-22 Machmer. Current catalogs from every accredited law school in the United States and other materials pertaining to the legal profession are available in this office.

### Physically Disabled Students

The University is becoming more and more accessible to academically qualified physically disabled students. Although some architectural barriers still remain, most disabled persons can navigate the campus with little difficulty. The campus is large and spread out. However, with proper planning, size should not pose a problem. The University Library, the Student Union, the Campus Center, most classroom buildings, and a few residence halls are wheelchair accessible.

In cooperation with Veteran's Affairs, an office has been established to assist persons with physical disabilities. Early registration, preferential scheduling, orientation programs, housing assistance, a reader's directory for the blind, pre- and post-admission counseling are a few of the services available. Admission to the University is based entirely on the academic qualification of the applicant. Admission procedure remains the same for all applicants, regardless of disability. For further information, contact: Office of Handicapped Student Affairs, 29 D Whitmore Building, tel. (413) 45-0892.

### Bachelor's Degree With Individual Concentration

The Bachelor's Degree with Individual Concentration (BDIC) is a four-semester program in individualized study supervised by an interdisciplinary faculty committee rather than by one of the departments, and leads to either a Bachelor of Science or Bachelor of Arts with Individual Concentration. Work for this degree, usually beginning with the junior year, takes the place of a conventional major and provides students with an opportunity to pursue an area of study not otherwise available at the University. The program must be interdisciplinary, unavailable as such through an existing undergraduate major, and make full use of existing University resources. In developing their concentrations, students may combine courses from departments or schools within the University, from among the Five Colleges, and from limited amounts of independent study and/or internship opportunities.

The course of study is developed by the individual student in conjunction with the full-time University faculty member serving as his/her sponsor, and submitted to the BDIC Supervising Committee for approval.

#### Application to BDIC

Students with at least four semesters remaining at the University should initiate the application process with a BDIC counselor early in the second semester of their Sophomore year, well in advance of pre-registration for the following semester (please consult the *Collegian* for exact deadlines). There are provisions for recent transfers to the University.

NOTE: 1) The degree earned will be either the B.A. or the B.S., depending upon the area in which the greater concentration of advanced work is done.

2) Students seeking a degree from BDIC must still fulfill the usual University core and distribution requirements.

3) We emphasize the importance of planning admission well in advance of application deadlines.

### Colloquia

Colloquia are one-credit courses which seek to augment the academic offerings of departments and schools. They meet for a minimum of 16 hours per semester and require roughly as much work as one third of an average introductory course. They are held in residence areas and are

generally proposed and taught by students with faculty sponsorship and approved by the student/faculty academic policy committees of each residential area. While it is somewhat difficult to categorize the variety of colloquium subjects, they generally respond to student concerns, emphasize community building, and/or experimental activities in art, music and craft areas.

### Continuing Education

The Division of Continuing Education at the University is responsible for helping to meet the educational needs of all part-time undergraduate students: for managing all conferences, institutes, workshops, short courses, and clinics on the Amherst campus and throughout the Commonwealth sponsored by the University; and for designing special educational programs for citizens of the Commonwealth and the region who are not regular full-time students at the University. The Division has its own undergraduate degree program, designed for part-time students who wish to design a curriculum more appropriate to their educational goals than those offered by the traditional undergraduate departments. The Bachelor of General Studies requires 120 hours of credit, up to 75 of which may be transferred from other institutions. Students may be admitted to evening courses or to day courses on a space-available basis after consultation with an adviser in the Division of Continuing Education. Undergraduate part-time students who meet the requirements for any standard University undergraduate degree may have this degree awarded through the Division of Continuing Education in addition.

The Division serves as an educational doorway between the University and potential clients and stands ready to assist anyone in the Commonwealth with an educational problem with which the University might assist. Inquiries may be directed to the Director of the Division, Hills House North.

### Everywoman's Center

The Center serves the Amherst campus and the surrounding community as a headquarters for women's issues and concerns. It operates an extensive academic, personal, and vocational counseling service; maintains a comprehensive library of books, periodicals, and other publications relating to the feminist movement; maintains listing of career

opportunities for women; sponsors Project Self—a series of non-credit workshops which explore what it means to be a woman in today's world; and conducts a number of additional workshops and support groups on a wide range of specific topics related to women's issues.

#### **Global Survival Freshman Year Program**

The Global Survival Freshman Year Program is multi-disciplinary and problem-centered, focusing on five major areas of concern: war, peace and world order; cross-cultural communication and conflict; environmental deterioration and economic development; population; and resources. The faculty is drawn from various departments on campus and works closely with students in courses, field experiences and independent study. Participants take a combination of University and Global Survival courses for a total of 15 credit hours per semester. Features of the program include identification with a small number of freshmen; close relationship with faculty; an opportunity to explore crucial world issues in an integrated format; and an opportunity to pursue independent work in the freshman year.

#### **The University Honors Program**

The Honors Program involves a cooperative effort among the academic departments of the University and the Honors Office that affords highly motivated students of proven ability the opportunity of taking University courses more intensively and in closer contact with professors and other students. It offers an alternative to the core requirement system that allows students more freedom in choosing their course of study. In addition, members of the program have the benefits of individualized counselling and advice, and a file of personal evaluations of the student's work in Honors courses that may be used as recommendations for graduate schools and job interviews.

Any student who has completed one semester's work at the University, including one Honors course, may be eligible for admission to the program. It must be noted, however, that since juniors and seniors are now expected to go through a departmental Honors Program, evidence of their major department's willingness to accept them may be necessary. The student must obtain an

application form from the Honors Office, in E-23 Machmer, must have on file in the Honors Office or obtain, an evaluation by the professor of his or her performance in the Honors course previously taken, and must obtain a copy of his or her transcript from the Records Office in Whitmore (which can be obtained free if the candidate says it is for the Honors Office). When the Honors Office has received these three items, an interview with the candidate will be arranged, and if the student and the interviewer agree that it is in the best interest of the student to join that program, the student will be admitted.

While Commonwealth Scholars are exempted from regular University core requirements, they must satisfy the requirements of their major and must take one Honors course every semester in residence and in the program, and must take a minimum of six Honors courses. Under this requirement, students who are accepted into the program upon completion of the first semester of their freshman year must take seven more Honors courses, one per semester, in addition to the one already taken. Students accepted into the program upon completion of the first semester of their sophomore year or anytime thereafter must take five more Honors courses, at least one per semester, in addition to the one already taken.

A Commonwealth Scholar must also maintain a cumulative average of at least 3.0. If the average drops below 3.0 for two semesters (not necessarily consecutive), or if the student receives an "F" in each of two consecutive semesters, the student may be dropped from the program. Commonwealth Scholars who do not follow the procedural requirements of the program may also be dropped. These requirements include returning a list of courses signed by the preceptor for each term, discussing academic progress or problems with the preceptor at least once a semester, responding promptly to consultation requests from the Director or Associate Directors of the Honors Program, and notifying the Honors Office of current address and telephone number or change in major or preceptor. Any student who fails to meet these standards must withdraw from the program. In addition, the Honors Council has outlined conditions under which students will be considered to be on Academic Probation in the program:

- 1) One or more "F"'s on the student's permanent record
- 2) A semester average of below 3.0
- 3) A record of more than one Incomplete

A student placed on Academic Probation for more than one term may be asked to withdraw from the program if the Director and Associate Directors concur in this decision.

#### **DEPARTMENTAL HONORS**

Starting with the class of 1977, any student who wishes to be eligible to graduate with an Honors designation of *Magna Cum Laude* or *Summa Cum Laude* must pursue a Departmental Honors Program. Since the curricula of Departmental Honors Program vary widely from department to department, any student interested in pursuing Honors in his or her major field should investigate that field's Honors curriculum. Although a student must usually have a cumulative average of 3.2 or higher to be eligible for a Departmental Honors Program, in exceptional cases students with lower averages may be admitted. Any student interested in pursuing Departmental Honors should confer with the Honors Coordinator of his or her major field.

#### **Legal Studies Program**

The Legal Studies Program provides an opportunity for students to pursue introductory and advanced courses about the nature and function of law; it presents field work and research opportunities, conferences, practica, and special courses about law for the University community; and it enables a limited number of students to major in Legal Studies. The major is individually designed around a basic core of study. This is not a "pre-law" preparatory program: it is an interdisciplinary exploration of the phenomena of law, power and authority, as these are manifested in culture and society. The emphasis is on examining the legal mode of thinking, but one of many possible world views.

LEGAL 201 and 202 are the introductory courses of the Legal Studies Program. An important dimension of these courses is the study of legal phenomena outside the formal legal system, dealing for example, with such institutions as family and school.

The Legal Studies Program is allied with a range of faculty and courses in the Five Colleges. A Five College Legal Stud

ies Catalogue lists many of the offerings available. These courses are open to anyone interested in examining the interrelationships of law and society. The Legal Studies Program also offers opportunities for practical field work experience for qualified students. In the past, these projects have included legislative drafting and research, work with the Western Massachusetts Public Interest Research Group, University Year for Action programs, research on pending litigation, work in legal services projects, juvenile court and probation, welfare, and other governmental agencies.

Admission to the major is available to a small number of undergraduates in order to preserve close contact between students and faculty. Admission is through a selection process in which a study plan is negotiated for each student by the student and major advisor according to their mutual interests.

#### **Orchard Hill Residential College**

Orchard Hill Residential College is a unit of four residence halls offering distinctive educational and cultural programs for students seeking an alternative college experience. Orchard Hill offers a substantial number of 3-credit interdisciplinary courses each semester and an increasing percentage of these satisfy University core requirements. In addition to 3-credit courses, the Hill offers a large variety of student initiated colloquia, sponsored by faculty members and supported by the Academic Affairs Office.

The program focusses on articulation of student needs and concerns (life planning, career decisions, and the individual's own program of education). Special seminars and courses reflect major areas of social and personal concern: Citizenship and Social Change; Society and the Arts; Racial Consciousness and the Third World; Science Technology and Society; Women and Society; Society and the Outcast; Education and Community.

For more information, inquire at 103 Eugene Field House, Orchard Hill.

#### **The Center for Outreach Programs**

Outreach functions as a clearinghouse or off-campus community service. Its two chief components include: a) Student Volunteer Services, a student initiated and student administered program, which places students and other interested persons in over 75 community service organizations in western Massa-

chusetts for five to 20 hours a week, usually without pay or academic credit; and b) a student internship program which provides students with the opportunity to earn up to 15 credits while participating in various federal, state and local community service programs for a semester.

#### **Overseas Study**

The Amherst campus offers a wide variety of overseas study and international exchange programs. The International Programs Office may be consulted for all specific information on these and other overseas study opportunities. Information on summer programs is given in the Bulletin of the Summer Session as well.

*Freiburg Program.* In cooperation with the University of Freiburg, Germany, the University of Massachusetts operates its year-long Freiburg Program. The University of Massachusetts has a permanent facility in Freiburg. The University of Massachusetts Freiburg Center, which serves as the headquarters of the Freiburg Program. Students enrolled in the Program are regularly enrolled students of the University of Freiburg, and take courses in a wide range of social science and humanities courses. The Freiburg Program is not restricted to students concentrating in German, but admits students in philosophy, music, English, history, comparative literature, and other fields. Enrollment is limited to graduate students and superior upper division undergraduates with fluency in German.

*Field Program in Anthropology, Europe.* A four- or seven-month field program in Anthropology in Europe is offered by the Anthropology Department to graduate and advanced undergraduate students in anthropology during the spring or spring and summer. Location of the program in Europe in any given year depends upon the selection of the faculty director. Prerequisites for participation in the program include a working knowledge of the language required for field research and prior coursework in both field methods and the culture area where research is to be conducted. A limited number of stipends are available to offset costs of international travel and maintenance while in the field.

*Grenoble Program.* The University of Massachusetts Semester in Grenoble Program is offered in cooperation with the Comité de Patronage des Etudiants

Etrangers de L'Université de Grenoble and is open to approximately 40 students. The levels of courses offered facilitate the acceptance of students of varied interests and levels of proficiency in French. Students with little or no prior knowledge of the language may pursue studies in the French language and civilization at the elementary level. Majors and other proficient students pursue courses in language, literature, and civilization at the middle or upper level depending on placement by examination upon arrival at Grenoble. Students may choose to live with French families, in "foyers," or in inexpensive hotels catering to students.

*Academic Year Program, Keele University, England.* Through an exchange program, several undergraduates may spend their junior or senior years at Keele University, Staffordshire, England. The program is open to superior students concentrating in social sciences, humanities, and science.

*Academic Year Program, Chelsea College of Physical Education, England.* This is a junior year program for undergraduate women majoring in physical education. A good academic record is required.

*Academic Year Program, University of Victoria, British Columbia.* An undergraduate student exchange program with the University of Victoria, British Columbia, Canada, permits several undergraduates each year to spend their junior or senior years at that university. Courses of study include drama, social sciences, humanities, education, and science.

Other academic year programs through which undergraduates study abroad include student exchanges with the University of Helsinki, Finland; the University of Lagos, Nigeria; University College, Dublin; The University of Lancaster, the University of Sussex, North East London Polytechnic, all in England; the University of Stirling, Scotland; and the University of the West Indies at its Jamaica campus. Semester fieldwork programs include Social Work Internships in England and practice teaching at the Bi-national Center, Bucaramanga, Colombia.

*Summer Programs.* Summer study programs concerning which information may be secured from the International

Programs Office and the *Summer Session Bulletin*, include offerings in Bologna, Italy; Freiburg, Germany; Pau, France; Oxford, England, and St. Vincent, West Indies, the latter in anthropology.

#### **Project 10**

Project 10 is a semi-autonomous experimental program based in Pierpont House in Southwest Residential College. The Project's members are drawn from students and faculty of the University. They participate in a wide variety of seminars, workshops, and tutorials each semester, and attempt to explore different ways of learning and different options on credits and grading. The Project is an attempt to build a living-learning community which can foster and sustain individual growth and personal expression, while its members learn how to make decisions, how to measure learning, and how to accept accountability to others.

A special program option within Project 10, the Inquiry Program, offers an alternative to the general University degree requirements. It is an alternative to the ordinary approach to separate courses and credits in the freshman and sophomore years. In fact, in Project 10 there is nothing called the freshman or sophomore class. Students individually negotiate plans of study for the first 60 credits of undergraduate work. The Inquiry Program seeks individuals who are ready for self-directed learning, both in the classroom and in independent studies, and who believe they can profit from collaboration with a faculty adviser in the design of a total program.

Students with as divergent personal aims as preparing for medical school or exploring communal living are finding Project 10 a human-sized program with many of the virtues of a small college—greater intimacy and intensity of education—yet able to draw upon the resources of a large university.

A wide variety of courses, seminars and workshops are offered by Project 10. For a complete listing, contact the Project Office in Pierpont House, Southwest Residential College.

#### **Rhetoric**

The Rhetoric Program offers a flexible and varied experience for students fulfilling the University's core requirement. The requirement states that all students (with certain exceptions for advanced placement) will take two courses in Rhetoric,

one of which must be Rhetoric 100 or Rhetoric 110. Through an interdisciplinary effort, involving teachers from English and Communication Studies as well as other departments, the Program seeks to give students help and practice in many kinds of writing and oral communication.

In a world where problems of reaching people through words have become crucial to us all, an effort to study and try out for oneself a number of forms of expression becomes a worthwhile educational task. At present the Program devotes attention, in its several courses, to such examples as formal and informal exposition both oral and written, imaginative literature, mass media, and film.

There is no undergraduate major in Rhetoric.

#### **Southwest Residential College**

Southwest Residential College is the largest residential area in the University, and offers a diverse educational program open to all students who live in Southwest. In special cases, non-Southwest students may also enroll. These courses are offered directly in the dormitories or in one of the several educational Centers. The program consists of experimental 3-credit courses designed to meet the needs of the Southwest community and to supplement regular University offerings. It also includes special cross-listed sections of departmental offerings and 1-credit, student-taught "colloquia" offered during the semester and lasting usually for eight weeks.

During the past year, over 70 3-credit experimental courses were offered in Southwest covering women's studies courses, courses for Third World students, courses in racial understanding and interdisciplinary courses in the environment, theatre, art and international communications. These courses included *Women and the Law*, *Women Playwrights*, *Black Psychology*, *Dynamics of White Racism*, *River Ecology*, *Environmental Concerns*, *Cable Television*, and *Theatre Improvisation*. Some courses have been cross-listed with Afro-American Studies, Psychology, Rhetoric and School of Business. The course listings are published each semester in a pre-registration and registration brochure available in the Southwest Academic Affairs Office, John Adams Lobby, during the pre-registration and registration periods.

The Colloquium Program of eight-week, 1-credit student taught courses is very flexible and directly responsive to student interests under faculty sponsorship and staff supervision. There were over 200 colloquia offered this past year, in a wide range of subject areas: arts, crafts, vocational skills; meditative and religious workshops; international communications workshops; survival skills; athletic and physical skills; study groups in criminology, and support groups for Belchertown School and Clarke School for the Deaf tutors. These student taught colloquia are listed as they are proposed and approved during the course of the semester in the Southwest Colloquium Office (John Adams Lobby, Room #1).

In attempting to determine the needs of students both in the University and in the larger community Southwest has recognized two crucial areas of concern: racism and sexism. These issues have been made the express priorities of this residential area, and Southwest's resources are being devoted specifically to these priorities. These priorities are approached in various ways—through specific courses, through counselor training and staff training, and through new programs in Urban-Community Studies and a Transitional Year Program for first-year students. The Urban-Community Studies treat the Southwest area and the University environment as a laboratory for self-study and institutional study. The Transitional Year courses deal with the initial expectations and experience of students as they move from home and high school into Southwest and the University.

Southwest promotes other kinds of interpersonal awareness through its cross-cultural workshops and human relations groups, and community action programs which take Southwest students into neighboring municipalities for service and study. Development of the educational program and the governance of Southwest is a collaborative effort between the staff and the student governing bodies—the Southwest Assembly and the Centers.

Project 10, a semi-autonomous experimental living-learning program primarily designed for students living in Pierpont House, is a distinct though not wholly separate part of Southwest Residential College and its academic program. The educational programs in Mackinmie/Humanity House, Patterson, Co-

George and John Adams are part of the overall Southwest living-learning program in the dormitories.

#### Summer Session

The Summer Session at the University is open to freshmen who wish to begin their college education immediately upon graduation from high school, to seniors completing requirements for September graduation, to other regular University undergraduates, and to special students currently enrolled in other colleges. Graduate courses are provided for area teachers and graduate students who wish to continue their work during the summer. Some courses are offered for professional workers in specialized fields. A bulletin describing the entire summer program is available from the Registrar's Office in April of each year.

Students who begin their college careers in the summer are advised to plan their programs carefully with the aid of advisors.

#### University Without Walls

The University Without Walls program at the University is one of 32 UWW units across the country developed under the sponsorship of the Union for Experimenting Colleges and Universities. The program enables students to earn a B.A. or B.S. from the University of Massachusetts

through a totally individualized learning program allowing independent study, internships, field experiences, credit for significant past learning experience, and other self-directed projects outside the classroom and campus. It welcomes participants of all ages and diverse backgrounds and interests, especially those who would not normally have access to the University but who are highly motivated and self-disciplined enough to succeed in directing their own learning projects. Upon admission to the program, students choose a faculty sponsor and adviser and prepare a learning contract outlining learning objectives, activities to meet those objectives, and evaluation procedures. Students must negotiate 120 credits in order to receive a degree, including University Core Requirements (33 credits) and residence credits (45 credits). Further information and applications may be obtained from the University Without Walls, Wysocki House.

#### University Year for ACTION

University Year for ACTION is a volunteer service program which offers undergraduates significant opportunities for attacking poverty in connection with community agencies while earning normal college credit. Students accepted into the program become Volunteers in

ACTION (a new federal agency comprising Peace Corps, VISTA, and several other federal volunteer programs). The students work full-time or part-time, living on campus or in a local community located either in a major city or in a rural center of Western Massachusetts.

Service in a community agency may be in any one of a number of given areas, including those of legal services, education, mental health, housing, consumer protection or environmental protection. Community agencies provide field direction and supervision, while the University provides instruction, academic credit, and program management.

The University Year for ACTION program represents a new model for education—a model of effective service to the larger community and of a reciprocal exchange of resources, needs and personnel. Details concerning eligibility, application procedures, stipends, tuition, fees and other information are available at the ACTION Office, Arnold House.

#### Upward Bound

Upward Bound is an educational experience, motivating disadvantaged high school students to try for college. Upward Bound offers a summer academic program for 25 students on the campus and a "Follow-up" program from September through May to some 95 high school sophomores, juniors, and seniors. Typically, Upward Bound students come from a poverty background where they often have been labeled as "non-college" potential or "troublemakers." Consequently, with the support of the Committee for the Education of Black Students (CCEBS), Upward Bound strives to offer a wide range of academic, financial, and supportive services to these Black, Puerto Rican, and white students from poverty backgrounds drawing from the total resources of the University community.

## Schools, Colleges, Departments and Programs

Sport Studies

## College of Arts and Sciences

The College of Arts and Sciences has programs of study leading to four bachelor's degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. All departments offer a program leading to the B.A. degree. The B.S. degree may be earned only if the major is mathematics, science, or psychology. The B.F.A. programs have a strong emphasis in art and the Bachelor of Music programs reflect an emphasis in music. All of the degree programs combine a study in depth in one area with supporting study in the other two of the three main divisions: a) Humanities and Fine Arts b) Social and Behavioral Sciences, and c) Natural Science and Mathematics. Courses appropriate to the distribution requirements in these three areas are noted in University catalogs by the respective codes (C), (D), and (E).

A program of study which conforms with the following five provisions qualifies a student who completes it for the appropriate degree. Advanced placement and transfer credits may be applied toward any or all of these qualifications but at least half of the major program must be completed in residence.

1) A basic proficiency or experience in communicative skills must be achieved by completing six credits in rhetoric; the two rhetoric courses must include at least one of Rhetoric 100 or 110.

2) For the B.A. and B.S. degrees, a basic proficiency or experience with a foreign language must be demonstrated by a) completion of a foreign language course at the 140 level, b) score of 600 or above on a CEEB achievement test while in high school or placement test at the University, c) satisfactory completion in high school of a fourth-level foreign language course or a third-level course in one foreign language and a second-level course in another, d) a year in high school in which English is not the basic language of instruction, e) substitution of language-related study with proper authorization (see CASIAC).

3) Distribution is achieved by completion of courses in each of the two divisions of the College other than the one in which the major falls. With the understanding that work in the major is applicable to one or more of these divisions, this qualification is stated for all three divisions and all degrees as:

| Division                       | Core Code | Number of Courses |       |               |   |
|--------------------------------|-----------|-------------------|-------|---------------|---|
|                                |           | B.A.              | B.S.* | B.F.A./B.Mus. |   |
| Humanities                     |           |                   |       |               |   |
| Bachelor of Fine Arts          | "C"       | 4                 | 3     | 3             | 3 |
| Social and Behavioral Sciences | "D"       | 4                 | 3*    | 3             | 3 |
| Natural Science                |           |                   |       |               |   |
| Bachelor of Mathematics        | "E"       | 4                 | 4*    | 3             | 3 |

\*To qualify for a B.S. degree, at least 60 credits must be earned in science, mathematics, and/or psychology courses; distributional courses may be part of this minimum of 60.

An approved major program of the college must be completed. The traditional departmental major programs are the most common, and they are described in the following pages. A few others, including several interdepartmental majors, are specified and administered by standing committees of the faculty and are described elsewhere. All major programs have these features in common: a) faculty guidance, b) coherent program of study made up of at least 24 credits, at least 15 of which must be in upper division courses in this college, and c) a student has at least 12 completely free electives.

**Advisory System:**  
When students elect a special major or are admitted to a specialized degree program, they may obtain a faculty adviser from that major. Faculty advisers help students choose their program of study and also serve as a communication link between students and the Registrar's Office. Students may choose a specific major on entrance or they may postpone this choice until the fourth semester. Until choosing a specific major, students are listed as a College of Arts and Sciences major, and the College of Arts and Sciences Information and Advising Center (CASIAC) serves as a student's adviser. Faculty members from a broad range of disciplines form the staff of CASIAC, and a student may meet with the same staff member or may talk with whomever is on duty at the time. A primary goal of the Center is to help a student choose a major which is consistent with his or her interests and potentialities.

A student has considerable freedom in choosing a program of study and major. However, a few of the major programs require sequences of courses which extend over seven or eight semesters. Students who do not take the right courses in their freshman year may have to use a summer session or extra semes-

ters to accommodate these sequences if the ultimate major is Astronomy, Biochemistry, Chemistry, Mathematics or Physics, or if they are in the Bachelor of Music or Bachelor of Fine Arts program. Some standard freshman year programs are:

**Bachelor of Fine Arts:**

|                     |                           |
|---------------------|---------------------------|
| Rhetoric            | and two of the following: |
| Introduction to Art | Math or Science           |
| Studio Art          | Humanity                  |
|                     | Social Science            |

**Social Science (B.A. or B.S.):**

|                |                           |
|----------------|---------------------------|
| Rhetoric       | and two of the following: |
| Social Science | Humanity or Fine Art      |
|                | Math or Science           |
|                | Second Social Science     |
|                | Foreign Language          |

**Mathematics (B.A. or B.S.):**

|                 |                           |
|-----------------|---------------------------|
| Rhetoric        | and one of the following: |
| Math (Calculus) | Foreign Language          |
| Science         | Social Science            |
|                 | Humanity                  |

**Bachelor of Music:**

|                  |                           |
|------------------|---------------------------|
| Rhetoric         | and two of the following: |
| Music Theory     | Math or Science           |
| Music Literature | Social Science            |
|                  | Humanity,                 |
|                  | other than Music          |

**Humanity (B.A.):**

|             |                           |
|-------------|---------------------------|
| Rhetoric    | and two of the following: |
| Humanity or | Foreign Language          |
| Fine Art    | Social Science            |
|             | Math or Science           |
|             | Second Humanity           |

**Science (B.A. or B.S.):**

|                         |                           |
|-------------------------|---------------------------|
| Rhetoric                | and one of the following: |
| Chemistry               | Foreign Language          |
| or Physics*             | Humanity                  |
| Math                    | Social Science            |
| (Calculus, if prepared) | Second Science            |

\*Chemistry Majors elect Chemistry 113; Biology and Geology majors elect Chemistry 111; and Physics and Astronomy majors elect Physics 181.

### FACULTY OF HUMANITIES AND FINE ARTS

**Afro-American Studies, W. E. B. DuBois Department of**  
The W. E. B. DuBois Department of Afro-American Studies offers an undergraduate major for those students who wish to gain an in-depth knowledge of the history and culture of Black people in Africa and the New World. The course of study is inter-disciplinary, and offers the stu-

dent an opportunity to participate in a variety of learning situations, both on and off the campus. This major provides foundations for students who have professional aspirations toward teaching or advanced scholarship in a given discipline in the social sciences or humanities. It is also suitable for students preparing for professional training in law, public administration, journalism, social work, community organizing, and other such fields. Further, this major can be of value to students interested in the creative and performing arts, in that one of its concentration areas includes music, dance, theatre, and the plastic arts.

Courses and programs are also designed for general interest and specific relevance to students in disciplines other than Afro-American Studies.

The maximum of 45 required major credits incorporates a number of disciplines in the social sciences and humanities. After taking a prescribed introductory core of 18 credits, the student may concentrate in the social sciences, history, or the humanities in which he or she is required to take 27 additional hours, including a field research project or equivalent and a senior thesis. Approved courses in other departments of the University or in other schools in the Five College consortium may be credited toward this major.

### Art ENTRANCE PROCEDURES

Portfolios are required from all applicants except those applying for the B.A. in Art History. The portfolio should be in the form of 35mm colored slides of at least ten works. Slides must be submitted in a 9" x 11" clear plastic viewing sheet, each slide labelled with name, medium, and size. Slides should not be sent until requested by the Admissions Office. Portfolio examination for admission to the Art Department will be based on the criteria of demonstrated ability and high academic standard.

### PROGRAMS

**Bachelor of Arts Degree Program**—The B.A. degree program is designed to provide an aesthetic and historic knowledge of the visual arts while affording an opportunity to develop creative ability. While all programs are subject to University requirements, the B.A. degree program requires a greater involvement than the B.F.A. degree program in courses not directly within the Art Department. The

B.A. degree program offers two majors: Art History and Studio.

The B.A. in Studio requires a minimum of 42 art credits (six elementary courses—100, 102, 120, 122, 111, 113—and eight upper division courses—numbered 200 and above, two of which must be art history electives.) The B.A. in Art History requires a minimum of 30 art history credits (six credits at the introductory level—111, 113—and 24 upper division credits, which will include at least one seminar—300 level course). As the declaration of the major is prerequisite to the selection of a faculty advisor, it is best to declare an Art History major within the freshman or sophomore years. Art History is taught as an area of the humanities tying in with the history, literature and philosophy of a given culture or period, and forming part of the history of ideas in general. Course offerings in the area are organized to provide three levels of instruction: a) Introductory Survey (100 level), b) Area Courses (200 level), c) Seminars (300 level). The student consults with the faculty, especially in the final two years, to develop the sequential program best suited to the student's needs and interests. Directed undergraduate work, including the writing of an honors thesis, may be elected by qualified students.

**Bachelor of Fine Arts Degree (Studio)**—During the first two years, the student experiences a foundation program of several courses in drawing, two and three dimensional design and a general history of art. Because of its contemporary nature and relevance, it is required that Modern Art 287 be taken as early as possible by B.F.A. degree program candidates. The B.F.A. program in Studio Art is of a professional nature and enlists the most intensive coverage of one chosen medium: ceramics, printmaking, sculpture or painting, to be selected by the end of the sophomore year. The B.F.A. degree program consists of fewer core requirements to allow for concentration within the Art Department. It involves a minimum of 60 credits in studio art, 12 in art history and 48 credits in other disciplines for satisfaction of the University Core and graduation credit requirements.

**Bachelor of Fine Arts (Studio with Art Education)**—This program provides the student with the Massachusetts State Board of Education requirements for certification to teach Art in public school

system at either the elementary or secondary level. The programs minimal requirements include 39 credits in studio art, 12 in art history, 6 in art education, 15 in student teaching, 9 in education and psychology and 39 in other academic disciplines to satisfy the University Core and graduation credit requirements.

**Bachelor of Fine Arts (Design)**—The Design program is a professional area offered as an option within the Art Department. The requirements are similar to those of the other programs in the Department and lead to a B.F.A. degree in design. The Design area is an interdisciplinary program of studies incorporating professional courses from related departments of the University such as Environmental Design and Landscape Architecture. Individualized programs are possible through course offerings from art and design; however, the main professional sequence is structured toward Human Environment and Design, or Interior Design. The program is intended to meet professional standards set forth by the national, professional and educational associations in the field of design for accreditation and professional standing. The program's educational goal aims at educating the professional designer in basic design, in communication skills, in architectural construction with emphasis on interior detailing, in planning, in related phases of environmental design, in history and general knowledge, and in planning and designing all interior spaces. Designers must learn to understand techniques of programming, analysis of spaces, and must be trained and encouraged to develop breadth and depth of design solutions both for today and tomorrow.

#### Asian Studies

There are majors leading to the B.A. in both *Chinese* and *Japanese* language and literature in which students may place emphasis on either modern or classical language. Students following either major receive a substantial foundation in reading, speaking and understanding the language, as well as a basic knowledge of the respective literatures. Majors are encouraged to acquire a background in the history, government, society, religion, and arts of China and Japan—a background essential for an understanding of the cultures and literatures of the Chinese and Japanese people.

In addition to courses offered in lan-

guage and literature in the Asian Studies Program, various departments in the University and the Five College system offer courses dealing with specific aspects of China, Japan and other part of Asia. Consult offerings of the Departments of Anthropology, Art, Comparative Literature, Geography, History, Political Science, and Sociology.

The program also offers, in cooperation with the Linguistics Department, two joint majors: Linguistics & Japanese and Linguistics & Chinese.

Undergraduates interested in Asian Studies may wish to enroll in the University's Asian Studies Certificate program. The program does not constitute a major and is designed to supplement the work done toward a bachelor's degree in a regular discipline. Students who fulfill program requirements are awarded the Certificate in Asian Studies attesting to their attainment. Requirements for the Certificate are a total of 24 credit selected from the Asian Studies course list. There are no language requirements for the Certificate; however, any student interested in the serious pursuit of Asian Studies is strongly urged to acquire competence in an Asian language.

#### Classics

The study of ancient Greek and Roman civilization and culture, the oldest of humane disciplines, occupies a position central to all the humanities and still forms a broad base for the disciplines of history, English, philosophy, art history, comparative literature, and religious studies. It can provide a meaningful core in every student's education.

Courses labeled "Classics" on the 100 and 200 levels are offered for purposes of general education. They require no knowledge of Latin or Greek; all reading is done in English translation. Courses of this type are offered in Greek and Roman civilization, ancient mythology, Greek and Roman archaeology, and Greek and Latin literature in translation.

There is also a special language skill course in Greek and Latin elements in English designed to increase the student's knowledge and understanding of English vocabulary by study of the root prefixes, and suffixes incorporated in English from Greek and Latin. A full range of courses is offered in the Latin language and its literature.

The offerings in Greek (Classical, New Testament, and Modern) may be supplied

ented with courses at the neighboring colleges.

#### THE MAJOR

A student who majors in Classics may choose one of the following areas of concentration: 1) Classical Civilization and Literature, 2) Greek, 3) Latin, 4) Mediterranean Archaeology, and 5) Religion. A description of each of these areas of concentration may be obtained from the Department of Classics. A separate interdepartmental major in Classics and Philosophy is available.

The Classics major can provide 1) a meaningful humanistic core in a liberal education, 2) preparation for graduate study in the Master of Arts in Teaching program at this University for those who wish to teach Latin and Classics on the secondary school level, 3) preparation for graduate work elsewhere leading to the Ph.D. and teaching on the college level, and 4) preparation for seminary, biblical school, or other graduate level religious studies, and 5) preparation for graduate work elsewhere in Mediterranean Archaeology, leading to careers in teaching, field work, or museum work.

#### ADVISERS

Classics majors may select any member of the Classics faculty as an adviser. Students with a special interest in secondary school teaching should consult Associate Professor Vincent Cleary. Those with a special interest in pre-seminarian studies should consult Assistant Professor Charles Isbell. Those interested in Mediterranean Archaeology should consult Assistant Professor Elizabeth Will.

#### HONORS

The Department offers Honors work in five of the concentrations listed above. For specific requirements, consult the Department.

#### PRIZES

The Department of Classics regularly awards prizes of \$50 each from the Millicent C. Davis Memorial Scholarship Fund. The prizes are awarded for 1) the highest level of attainment in Latin by an entering freshman, 2) the outstanding student in Elementary Greek, 3) the best essay on a subject in the field of Classics, and 4) the best student of the year in the Latin program. For further details about these prizes, and for application forms, consult the Department.

#### SCHOLARSHIPS AND STUDY IN ITALY AND GREECE

The Department awards a scholarship of \$1,000 each spring semester to a Classics major for study at the Intercollegiate Center for Classical Studies in Rome, Italy. Consult the Department for further information.

Consult the Department for information about study programs in Italy and Greece both during the academic year and during the summer. The Department maintains a list of archaeological digs where students may receive training and experience in archaeological excavations.

#### Comparative Literature

Three different types of programs lead to the B.A. degree in Comparative Literature. The first involves the study of literature in two languages, a major and a minor; one of these may be English. Majors must also fulfill a requirement in a third language, preferably ancient, either by taking six credits of elementary course work or by passing the appropriate proficiency examination. A student has to take 42 upper-level credits of course work, not including the work done in the third language: 15 in the literature of the major language, 12 in the literature of the minor language, and 15 in Comparative Literature (including 3 directed toward the literature of the major language).

The second type of program involves the relation of literature studied in two different languages, a major and a minor (one of which may be English) to one other discipline (e.g., art, philosophy, anthropology, psychology, linguistics, sociology). The normal program will consist of 48 upper-level credits of course work, distributed as follows: 12 in the department of the related discipline, 12 in the major literature, 9 in the minor literature, and 15 in Comparative Literature. The third program involves the study of literature equally in two languages. The normal program will consist of 45 upper-level credits of course work, distributed as follows: 15 in the literature of one language, 15 in the literature of a second language, and 15 in Comparative Literature.

Neither language department courses taught in translation nor Comparative Literature courses numbered lower than 300 may be counted toward the major. COMLIT 380 (Theories of Literature), is

required of all majors. A more detailed and fully explained statement of the Comparative Literature major may be obtained at the departmental office.

#### English

The English Department offers a wide variety of courses which attempt to cover not only British and American literature but the literatures of all English-speaking people. As a result, the opportunities for a liberal education — a broadening and deepening of awareness to values expressed by writers of our own time, of past centuries and of various nations and ethnic groups — are plentiful. Aside from studying literature, English majors are encouraged to study creative and expository writing, folklore, film and other related subjects such as linguistics and journalism. Students who major in English are exposed to important literary works and are expected to develop those skills necessary to understand and evaluate literature as well as to express their opinions concerning it coherently and persuasively. All undergraduate programs in English are administered in the Department's Undergraduate Studies Office in Bartlett Hall. The Program in Journalistic Studies is also administered there. The Department's Chief Adviser, Donald Cheney, and the Director of Undergraduate Studies, Walker Gibson, are available in that office to assist students with problems involving transfer credits in English, departmental requirements, scheduling and planning courses of study.

There are two options for majoring in English, and students are required to complete one of the options. Option A requires students to study various approaches to literature: one course in a pre-modern period; one course in literature not written in English; three of the four following kinds of literature: a course in language, a course in Shakespeare, a course in an individual author besides Shakespeare, and a course in a literary genre such as tragedy, lyric poetry or satire. Option B requires students to complete a survey of major authors: two courses in masterpieces of Western literature, two courses in major British authors, and one course in Shakespeare. Both options invite students to elect their remaining courses to form programs of study which are coherent and which accord with their own interests or needs. To assist in this planning, various mem-

bers of the Department are available to help students plan programs which focus on period studies, (such as Medieval or Victorian studies), American civilization, women's studies, film studies, folklore or a number of other areas. The English major must complete 30 credits in upper level courses (i.e., courses numbered above 200). Up to six of these credits may be substituted by upper level courses in related areas such as journalistic studies, linguistics, foreign language, comparative literature, or speech courses related to literature. All questions regarding what can be substituted should be directed to the Department's Chief Adviser.

Students who wish to graduate with Honors in English must take at least four upper level courses designated as Honors English courses, have a minimum cumulative average of 3.2, and choose to either write a thesis or take an additional two Honors English courses. Students who wish to be certified to teach English in secondary schools must apply to the Chairman of the English Education Committee; successful completion of the major requirements does not automatically ensure students a place in the English Education program.

#### JOURNALISTIC STUDIES

Journalistic Studies is a program of the English Department offering a joint major with that department. The student is required to earn 15 credits in Journalistic Studies and to complete the requirements of the English major with some exceptions. An adviser should be consulted.

The Journalistic Studies courses provide background for students interested in diverse career objectives such as newspaper work, radio and television news work, publishing and writing. Some students find Journalistic Studies valuable as a preparation for careers in law, public service, and business. Students interested in the Journalistic Studies Program should contact Professor Howard M. Ziff.

#### French and Italian

##### FRENCH

The vast richness of France's long cultural life — royal, imperial, and republican — as well as the tenacity of France's citizenry wholeheartedly bound to that life, have given the world an unforgettable gift. Apart from the natural grace and

incisiveness of its language, French literature, rarely stolid, is a continual and exhilarating plunge into intellectual and spiritual turmoils committed to an understanding of human dilemma. For that reason, the best of French literary works needs no dusting off to be appreciated today, for they either forecast or they are already the contemporary image of a questioning, vibrant civilization. Ties of language bind parts of Belgium and Switzerland to metropolitan France, but without loss of identity, while new, different, and often brilliant expressions of man's condition emerge with increasing rapidity from artists in French Canada, Africa and the Antilles.

Students planning to major in French have access to programs ranging from language skill courses at all levels to a rich body of courses devoted to literature and civilization. To supplement the major, requirements of which are outlined in several other brief documents, students are urged to take advantage of our overseas programs in Grenoble and Pau, or to spend their entire junior year in Paris under the auspices of the University of Massachusetts - Boston. Majors will also find living in the French Corridor not only a successful way of learning spoken French outside of the classroom, but also an important introduction to life in France. The department regularly invites exceptional scholars to spend a semester or year on campus to teach undergraduate courses; it also receives the annual visit of a theatrical troupe offering a varied repertoire; it makes available a film series open to the public.

Special departmental advisers determine the major's proper placement within the department, help to formulate the future program of each student, and help resolve academic problems that may arise during the major's four years on campus; other special advisers clarify overseas programs. For their part, majors may and should elect (within the limits of the 36-credit major field) related courses in other fields: philosophy, art history, English literature, French history, and so on. Advisers will always assist majors in selecting those extra-departmental courses meant to enrich and enhance the major field.

The major in French is carefully designed both in breadth and in depth to form the well educated citizen. At the same time, portions of the major program are calculated to prepare for teaching at

the secondary level and for possible careers in business, civil service or interpretation. The major can also serve as preliminary training leading to the degrees of Master of Arts, Master of Arts in Teaching, and the Doctor of Philosophy. Students may wish to discuss many additional programs leading, for example, to foreign service careers or posts requiring both a proficiency in spoken French as well as a wide knowledge of French thought and life. As a support for future professional life, the French language is used exclusively in all major courses.

For complete information concerning the major in French, please consult Professor Micheline Dufau, Chairman of the Department of French and Italian.

##### ITALIAN

Students planning to major in Italian have access to programs ranging from language skill courses at all levels to a rich body of courses devoted to literature and civilization. Apart from the beauty of its language, Italian literary works are among the most appreciated today for their probing questioning of historic events and social phenomena.

The major in Italian is carefully planned both in breadth and in depth to form the well-educated person. At the same time aspects of the major program are designed to prepare for teaching at the secondary school level and to serve as a preliminary training leading to the degrees of Master of Arts, Master of Arts in Teaching, and the Doctor of Philosophy. Students may wish to discuss many additional programs leading, for example, to foreign service careers or posts requiring both a proficiency in spoken Italian as well as a wide knowledge of Italian life and thought. As a support for future professional life, the Italian language is used exclusively in all major courses.

Special departmental advisers determine the major's proper placement within the department, help to formulate the future program of each student, and help resolve academic problems which may arise during the major's four years on campus. Majors should elect (within the limit of the 36-credit major field) related courses in other fields such as philosophy, Italian history, Italian literature, and upper division courses in other languages. Advisers will always assist the major in selecting those extra-departmental courses intended to enrich and

enhance the major field. To supplement the major, requirements of which are outlined in other brief documents, students are urged to join an approved program in Italy for at least one summer.

For complete information concerning the major in Italian, please contact Professor Anthony Terrizzi, Undergraduate Adviser for Italian Studies.

### **Germanic Languages and Literatures**

To fulfill undergraduate major requirements in German, a student must take German 161 and complete 32 credits in the department's junior-senior courses. Two programs are available: Program A (language) is designed principally for those who wish to teach in elementary or secondary schools or for those whose interest is not primarily in literature; Program B (literature) is for those who are chiefly interested in continuing their studies in graduate school.

Students selecting Program A should take 161, 201, 202, 211, 221 or 222, 241, 242, 283, 284, or 285, and a minimum of two more courses in German, one of which must be in 20th-century literature (331, 332, 333, or 334). Students in Program A who are not planning to follow a teaching career may substitute another junior-senior course for 283.

Students selecting Program B should take 161, 201, 202, 211, 221, 284, 321, 391, and three courses chosen from the following: 301, 302, 303, 311, 312, 313, 331, 332, 333, and 334.

Students are urged to augment their course work with at least one summer session at an approved summer school of German or by participating in a German program abroad, such as the University offers in Freiburg, Germany.

### **History**

Courses in history are designed to provide an understanding of man through a study of patterns of development in the past. The study should also give the student an introduction to major problems of world affairs. A major in history has value to the general student as a humanistic discipline. It has application as preparation for careers in such fields as teaching, law, government, journalism, ministry, library science and business.

History majors must take as required courses in their freshman and sophomore years two year-long sequences chosen from HIST 100-101 or 110-111, 115-116, 120-121, 130-131, 140-141 or 146-107, and 150-151 or 152-153. The his-

tory major will select one of five areas of specialization (European, British, American, Latin American, or East Asian history) and take within it a minimum of 8 courses numbered 200 and above (totalling not less than 24 credits). Students specializing in European history will be required to include in their program at least 3 credits in ancient or medieval history and an additional 3 credits in the early modern period (from the Renaissance through the 18th century). An additional two or three courses in electives outside the area of specialization are required, for a total of at least 12 courses (totalling not less than 36 credits) in lower and upper-level history courses. (A more complete statement of the requirements for the history major is available from the Department.)

### **Linguistics**

Though it is a humanistic discipline, linguistics is best described as the science of human language. Through the scientific study of the structure of language, linguists seek to understand the nature of that human mental faculty by which we produce speech from an intended meaning, understand meaning from spoken or written language, and acquire our native language. Linguists study the nature of the knowledge a human being possesses when he "knows" his native tongue.

No undergraduate major is offered in Linguistics alone, but students may major jointly in Linguistics & Philosophy, Linguistics & German, Linguistics & Russian, Linguistics & Chinese, and Linguistics & Japanese. Courses in Linguistics also are counted for major credit in several departments, and are relevant to majors in English, the foreign languages, Anthropology, Communication Studies, Psychology, Philosophy, and Computer & Information Sciences.

### **Music and Dance**

The Music and Dance Department offers programs of study leading to the Bachelor of Music and Bachelor of Arts degrees. An audition is required of all applicants.

The Bachelor of Music degree is awarded upon completion of University core requirements and a concentration in one of three areas: Theory-Composition, Performance, and Music Education (Vocal or Instrumental). Each area of concentration consists of specialized courses in particular fields as well as a

departmental core of applied music, theory, history and literature, and piano proficiency.

The Bachelor of Arts degree may be earned by the completion of University core requirements, additional College of Arts and Sciences requirements (language, humanities, and sciences), and a concentration in Music History, Theory-Composition, Performance, and Dance. The music core requirements are identical with those of the Bachelor of Music degree.

All programs contain course sequences in theory and applied music designed as four-year programs. A student not entering as a freshman may abbreviate his or her program only by advanced placement or by appropriate transfer credit.

The audition serves to determine the selection of the area of concentration as well as the qualification for music study. Instrumental Music Education applicants presenting piano or organ as a primary instrument must also present a strong secondary band or orchestral instrument. Vocal Music Education applicants presenting piano or organ as a primary instrument are also expected to meet voice study requirements.

Students not majoring in music may select non-specialized courses in music appreciation, music history, applied music (subject to prior audition), and participation in the various performing groups which are open to all University students.

Professor Horace Boyer is chief adviser for undergraduates.

The Music Department is a member of the National Association of Schools of Music.

### **Philosophy**

Philosophy deals with questions of central and perennial human concern: large questions, having to do with reasoning, or right and wrong, or man, or the world, in general terms; and small questions about the fine structure of knowledge, existence, and value. There is a special pleasure in thinking about such questions, and in learning how to think about them clearly, responsibly, and effectively. The study of philosophy acquaints one with an important part of our common intellectual heritage; it also helps develop habits and skills that serve one well in other fields and disciplines, and indeed in daily life.

The core fields in philosophy are logic, ethics, metaphysics, and theory of knowledge. There are also specialized fields, such as philosophy of science, political philosophy, aesthetics, philosophy of religion, and philosophy of language. A student may wish to develop a competence in one of the specialized fields, or in the philosophy of a certain period (e.g., ancient philosophy or the philosophy of the 17th century), or in a particular school or style of philosophy (say existentialism, or analytic philosophy).

The Philosophy Department offers courses in all areas of philosophy at all levels, from the most elementary to the most advanced. Majors in philosophy take 30 credits in departmental courses. No particular course is required, but each major has to have one semester course (3 credits) in logic, one in ethics, and four in the history of philosophy. The 100-level courses may be counted in meeting these requirements.

Students with specialized interests can arrange independent study courses; and those with a B average or better can do honors work in their senior year, in which an honors thesis, written under the supervision of a faculty tutor, is presented in lieu of 6 of the required 30 course credits.

The Department also offers a Teacher Preparation Program designed for students, who wish to teach philosophy in secondary schools. Three joint major programs in which philosophy is combined with classics or linguistics or mathematics, are also available. These are administered by Philosophy in cooperation with the other departments concerned.

Professor Gareth Matthews is Director of Undergraduate Studies and chief adviser for philosophy major.

The Department also offers three interdisciplinary majors: Classics & Philosophy, Linguistics & Philosophy, and Mathematics & Philosophy.

#### Slavic Language and Literatures

The Russian major is a relative newcomer in the curricula of most of our major educational institutions. Yet the importance of Russian, along with Chinese and English, as one of the three major world languages cannot be denied. The major role played by the Soviet Union in world affairs makes it essential to keep informed about all aspects of

Soviet life. Moreover, the Russian language is the vehicle of one of the world's great literatures, as well as the avenue of an increasing body of vital technological information.

The Russian major aims at maximal proficiency in all four language skills; for this reason, language study is the most significant component of the major program. Opportunity is also provided for the student to achieve a background in the literature and history of Russia, as well as to gain some competence in related areas of economy, political science, sociology and anthropology.

The range of career opportunities open to the Russian major includes service in the Federal government, in private business, in library work, in research institutions, in the mass media and in the teaching of Russian at all educational levels. The study of Russian also provides a rich and rewarding cultural experience and an expanded knowledge and understanding of the Russian people and their society.

Department requirements for a major are the successful completion of:

a) Six semester courses of language study at the junior-senior level (18 credits): RUSS 261, 262, 271, 272, 281, 282.

b) Two semester courses of literature study at the junior-senior level (6 credits): RUSS 291, 292.

c) At least two additional courses within the department, to be chosen in consultation with an adviser on the basis of the student's post-graduate plans.

d) Two semester courses in Russian History: HIST 214, 215.

The student is encouraged to select more than the minimum number of required courses in order to achieve the strongest possible background in the discipline. The choice of additional courses, both within and outside the department, will depend in large measure on the student's career plans. For this reason, it is essential that majors and prospective majors consult early and often with the departmental advisers. Professor J. Joseph Lake is chief adviser for the department.

#### Spanish and Portuguese

The department offers a major in Spanish and a number of courses in Portuguese. A major in Portuguese is planned.

All the department's programs stress training in and the use of language skills.

The courses in Hispanic literature are taught for their basic literary values and for the insights they provide into the cultures of Spanish- and Portuguese-speaking peoples. The department also offers courses which directly stress the use of the Spanish language and which are of particular advantage to those Spanish majors who plan to teach the language. Students are provided with opportunities to combine field work and community service with their academic programs.

The undergraduate major program consists of 42 junior-senior credits, up to nine of which may be in related areas and disciplines approved by the department. Entering Spanish majors who achieve an intermediate year level in the placement tests are urged to take SPAN 146, an intensive course which will permit them to start their Spanish concentration one semester sooner than if they were to take SPAN 130-140, the usual intermediate course.

Prerequisites to a major in Spanish are the following courses: SPAN 150-155 and 180.

Students may choose one of three areas of concentration for a major in Spanish. These areas are: A) Literature, B) Linguistics, and C) Bilingual Studies. All areas of concentration have as a common requirement two introductory literature courses and three courses in Conversational Spanish: SPAN 250, 251, 252. (one credit each). The successful completion of the following programs are required for each one of the designated areas of concentration. (Consult Department for current requirements.)

#### 1) Literature

- a) One course from the Medieval Literature group.
- b) One course from the Renaissance and Golden Age Literature group.
- c) One course from the 18th- and 19th-Century Literature group.
- d) One course from the 20th-Century Peninsular Literature group.
- e) One course from the Spanish American Literature group.
- f) Five electives.

#### 2) Linguistics

- a) One course from the Medieval Literature group.
- b) One course from the Renaissance and Golden Age Literature group.
- c) One course from the 18th-, 19th- or 20th-Century Peninsular Literature group.

ture groups or from the Spanish-American Literature group.

- d) Six courses from the Language and Linguistics group.

#### Bilingual Studies

- a) Two courses in Hispanic Culture.
- b) One course in Hispanic Literature of the Caribbean.
- c) Three courses that introduce the student to Hispanic linguistics, Caribbean dialectology, and history and theory of Hispanic bilingualism.
- d) Five electives.

#### Theater

The course of study in the Department of Theater is grounded in the belief that the performing arts draw on a unique combination of a variety of intellectual and artistic skills and talents which are most fully developed when theory and practice are integrated in the learning experience. Students in the program gain expertise in all the fundamental areas of theatrical art in graduated sequences of study designed to bring into focus rigorous critical thinking, precise methods of research, and imaginative expression in performance.

#### SEQUENCE OF STUDY

|                                                     |           |
|-----------------------------------------------------|-----------|
| Introduction to theater                             | 3 credits |
| Prerequisites: none                                 |           |
| Theater Practice                                    | 1 credit  |
| Prerequisites: none                                 |           |
| (may be repeated; 3 credits are required of majors) |           |

#### Basic Techniques

|                                                                                    |           |
|------------------------------------------------------------------------------------|-----------|
| Prerequisites: Introduction to Theater and at least 1 credit of Theater Practices) |           |
| Scenography                                                                        | 3 credits |
| Dramaturgy                                                                         | 3 credits |
| Performance                                                                        | 3 credits |

#### Intermediate Techniques

|                                                  |           |
|--------------------------------------------------|-----------|
| Prerequisite: completion of all basic techniques |           |
| Scenography                                      | 9 credits |
| Dramaturgy                                       | 9 credits |
| Performance                                      | 9 credits |

In addition, students may elect up to 18 credits of advanced course work in scenography, dramaturgy, and/or performance when intermediate-level work has been completed in the corresponding area(s).

Freshmen who think they may wish to

major in theater should elect Introduction to Theater, which also satisfies one of the four course requirements in the Humanities and Fine Arts core (C).

Basic techniques in scenography, dramaturgy, and performance are normally completed during the sophomore year. Opportunities to test out of basic techniques are provided regularly by the Department of Theater. The bulk of the 56 credits required by the College of Arts and Sciences should be earned before the beginning of the junior year. Intermediate and advanced course work is usually completed during the junior and senior years.

Non-majors with appropriate qualifications are welcome to participate in the activities of the Department of Theater. Introduction to Theater is strongly recommended before course work at the basic and intermediate levels. Enrollment of non-majors in all upper-level courses is permitted after completing (or testing out of) basic techniques in the specific area(s) of interest. Department majors are given preference in placement at all levels within the program.

With the exception of Introduction to Theater and Theater Practice, enrollment in theater courses is by permission of designated department advisers only. It is imperative, therefore, that all majors, prospective majors, and non-majors consult with a department adviser to determine eligibility for and appropriate placement within the various curricular activities.

## FACULTY OF NATURAL SCIENCES AND MATHEMATICS

### Biochemistry

*Undergraduate Advisers:*  
Class of 1977: Dr. Fuller  
Class of 1978: Dr. Schneider  
Class of 1979: Dr. Slakey  
Class of 1980: Dr. Fischer

The field of modern biochemistry has undergone an explosive development in the last ten years. Our increased understanding of the principles of energy transfer in cells, the mechanism of regulation of metabolism, the importance of the structure and function of cellular and subcellular membranes, the structure and activities of macromolecules and our new knowledge of the chemical and

molecular basis of genetics has transformed all biology. The Department of Biochemistry has as an identifiable central theme — the structure, function, regulation and reproduction of molecules, organelles, cells and organisms.

The Department of Biochemistry has undergone recent enlargement and development which represents the modern approach to the subject. The Department serves both a service function to other health and environmental and natural resource units on the campus as well as a source for the training of specialists in the area of molecular and cellular sciences. In addition, the major does and will continue to be an important training ground for pre-med, pre-vet, and all pre-health science professions. For the future, the field of biochemistry is just beginning to make important incursions and have meaningful impact on the environmental and marine sciences. For the scientist just starting his career, biochemistry may indeed provide both the background and new, meaningful approaches for research aimed towards solving a wide variety of problems in health and environmental sciences. For the professional, biochemistry and biochemists will continue to produce discoveries and existing breakthroughs in science and medicine.

The area of molecular and cellular biology are dependent on and interact with chemistry, mathematics and physics. Therefore an early exposure and thorough grounding in these hard sciences is necessary. It is essential that a student who is even a potential major take a year of chemistry and calculus in the freshman year. A year of exposure to the basic biological sciences is also strongly recommended either from high school or in the freshman year. A sample curriculum is outlined below.

#### Freshman Year

MATH 127-128 or 135-136 or 131-132  
CHEM 113-114 or 111-112  
ZOO 190 or BOTANY 100 (if exempt, select from ZOO 221, 227 or 240, or from an approved advanced Botany course)  
Language (if exempt, a C or D core)  
Rhetoric (if exempt, a C or D core)

#### Sophomore Year

MATH 255  
Zoology, Botany or Microbiology  
CHEM 165, 166, 167, 168 or 261, 262, 263, 264

Language or C or D core  
PHYSIC 141-142

#### Junior Year

CHEM 210 or 127

CHEM 281-282

BIOCHM 223-224-226 (advanced section)

C or D core

Electives (may include BIOCHM 385-386)

#### Senior Year

Advanced Biochemistry or Advanced

Life-science or Advanced Chemistry

BIOCHM 388

BIOCHM 385-386 or 398-399

COINS 122 or 101

Electives (or core requirements)

### Botany

A major function of the Department of Botany is to provide programs that assure a thorough grounding in botany and related fields to undergraduate majors who plan either post-graduate studies in botany, or who seek certification to qualify for teaching biology at the secondary school level. Another function is to provide a program of contemporary courses for the non-science oriented undergraduate student.

Majors who plan to take post-graduate work in botany are assured excellent training in all fields of botany, including anatomy, cytology, ecology, genetics, morphology, taxonomy and physiology. In addition the undergraduate program includes University and College core requirements in languages, humanities, and the social sciences. This breadth of training, together with in-depth training in the sciences, equips students for the most demanding graduate programs.

It should be noted that this program in botany is equally valuable for students in other disciplines such as Plant and Soil Sciences, Forestry and Wildlife Management, Environmental Design, etc.

Students planning to teach biology at the secondary level are offered a program that provides broad training in biology as well as in closely allied sciences, and in the psychology and education programs required for teacher certification. A modification of this curriculum, e.g., without the psychology and education programs, could provide a broad liberal arts program, with emphasis in biology, for those students interested in, but not planning a career in biology.

The department offers several courses without prerequisite which are designed for non-science majors. These courses, including General Botany (101), Natural History of Man, Plants and Environment, and Genetics and Evolution, provide a broad yet relatively detailed approach to biological principles, and each can be used to satisfy a University core science requirement.

Students planning for the botany major with subsequent graduate training in the field are required to take the following courses:

Botany: Introductory Botany, plus 24 additional credits in botany, including at least two courses from each of the following areas: I. Ecology — Evolution, II. Physiology — Cytology — Genetics, and III. Anatomy — Morphology — Systematics.

Chemistry: General Chemistry (111-112) and at least one semester of organic chemistry, and one semester of Biochemistry of Plant Metabolism BOTANY (212).

Mathematics: Either two semesters of Calculus (127-128) or two of the following: Finite Math (112), Introductory to Statistics (231), or Introductory to Computer Science (122).

Physics: Two semesters, either 141-142 or 121-122.

Genetics: Either BOTANY 240 or ZOOL 240.

The program for students seeking qualification for teaching at the secondary level must meet the following requirements:

Botany: Introductory Botany (100 or 101), the Plant Kingdom (125), Principles of Evolution (228), plus a minimum of 15 additional credits in botany including at least one course from each of the areas: I. Ecology — Evolution, II. Physiology — Cytology — Genetics, or III. Anatomy — Morphology — Systematics.

Zoology: Vertebrate Physiology (135).

Genetics: Either BOTANY 240 or ZOOL 240.

Chemistry: General Chemistry (111 - 112) plus one additional course in either Chemistry or Biochemistry.

Mathematics: Two semesters of Calculus (127-128) or two of the following: Finite Math (112), Introductory to Statistics (231) or Introductory to Computer Science (122).

Physics: Two semesters, either 141-142, or 121-122.

Additional requirements for teacher

certification include elementary Psychology (101) and either Educational Psychology (301) or Adolescent Psychology (263), and the required course work and practice teaching in Education.

### Chemistry

The Department of Chemistry offers two major curricula: The B.S. (with accreditation to the American Chemical Society) and the B.A. These curricula have been considerably revised, effective for the class of 1978. The principal change permits greater option in the selection of upper level courses. Students graduating prior to 1978 may elect to qualify under the revised curricula, or the curricula in effect at the time they started in the program.

The B.S. program is designed for students who wish to prepare for graduate study, or for research and/or development work in chemical laboratories. A slightly modified program permits preparation for secondary school teaching. The B.A. program provides for students who wish to combine chemistry with another major area, as business for technical sales or management, or education for teaching, or pre-professional (medical, dental). Either program, with appropriate related courses, prepares a student for graduate study in environmental science, food science, material science, oceanography, etc.

During the first three years of the B.S. curriculum, the student completes chemistry core which includes CHEM 113, 114 (Principles of Chemistry); CHEM 165, 166, 167, 168 (Organic Chemistry with laboratory); CHEM 241 (Inorganic); CHEM 285, 286 (Physical); CHEM 210 (Analytical); CHEM 287 (Physical Lab); MATH 131, 132, 165 (Calculus); and PHYSIC 161, 162, 163 (a Calculus approach to Physics). It is recommended that German, Russian, or Japanese be selected to satisfy the College's language requirement, and that the student elect at least one course in other sciences and in computer science. The upper level chemistry requirement is three lecture courses, representing two of three designated groupings, and four laboratory courses, representing both of two designated groupings.

The B.A. program includes a core of CHEM 113, 114, 165, 166, 167, 168, 210, 241, 281, 282 (281, 282 are Physical Chemistry); MATH 131, 132; PHYSIC 141, 142;

Two upper level chemistry lecture courses and one laboratory course complete the requirement.

A number of options and permitted substitutions are noted in a detailed description of the B.S. and B.A. curricula. It is extremely important that the student get initial and continuing advice from a chemistry faculty member.

Professor Richason is the departmental chief adviser.

### **Computer & Information Science**

The Department of Computer & Information Science offers a wide range of undergraduate courses in the areas of computer Systems, Theory of Computation, and Cybernetics.

An increasing number of undergraduates, irrespective of their major, are finding it useful to have the ability to program and use modern computing equipment. They will find three courses (Introduction to Problem Solving Using the Computer; Assembly Language Programming; Comparative Programming languages) very useful in getting experience with the time-sharing system at the University and mastering many available languages.

A number of courses introduce undergraduates to the design of computers, the design of compilers for communicating with computers in high level languages, and to new techniques for reducing complex problems to computer form.

Courses in automata theory, recursive functions, complexity of computation, and related topics introduce the student with a mathematical background to the many exciting problems posed by the theoretical study of computation.

Students from all schools of the University have expressed interest in the program in cybernetics. Of particular note are the courses "Foundations of Cybernetics" which introduces the student to the computational study of artificial intelligence and brain function and to the design of robots; "Artificial Intelligence" which surveys robotics, scene analysis, theorem-proving and planning, and language understanding by robots; and "Computational Population Dynamics" which shows how mathematical techniques may combine with computer simulation to allow man to tackle large-scale problems of ecological interactions. Other courses develop research on vision

and memory from both a neurophysiological and robotic viewpoint; explore the design of question-answering systems, etc.

Non-technical majors who desire a comprehensive insight into the uses and abilities of computers, and who desire a more practical "hands-on" laboratory approach to their learning experiences, should be interested in "Elements of Computers: Art and Science." In addition, the course "Computers and Society" helps students who want to understand the use of computers to solve social problems, and of the studies required to avoid "side effects" — including such problems as data banks, computerized voting, automated health care, and computer-aided instruction.

While no formal undergraduate major exists in Computer & Information Science, one is currently being planned. Meanwhile, it is possible for students to seek a Bachelor's Degree with Individual Concentration, the program being worked out in consultation with the COINS Director of Undergraduate Studies.

### **Geology & Geography GEOGRAPHY**

The program in geography, with its emphasis on concepts and practical skills and techniques, provides a sound preparation for majors who seek employment upon graduation as well as for majors who proceed to graduate study. For students specializing in geography there is a wide variety of possible careers at all levels in planning, industry, and government agencies.

The faculty is prepared to discuss a program of courses in geography and related fields which best fits the career intentions and interests of the individual students. Thirty credit hours in geography are required and include two introductory courses (145 and 155), two skills and techniques courses (240 and 250), four upper division courses (200-399), and two seminars (396 and 397). In addition, the student is required to take five courses in other fields that supplement the student's interests and emphasis within the framework of the geography major. The courses are determined by the student and his or her adviser.

Prof. Terence Burke is the chief adviser for Geography.

### **GEOLOGY**

Students considering Geology as a major will find a variety of undergraduate programs available. These are contained within three degree options: the B.A. degree, the B.S. degree, Geology Option, and the B.S. degree, Earth Science Option.

The B.A. degree is the most flexible, and may be used by a student to develop an individualized program. It is particularly suited for those interested in Geology but not planning a professional career in the field.

The B.S. degree, Geology Option, provides a strong background for those wishing professional careers in Geology. The program consists largely of required courses in Geology and supporting sciences that prepare students for graduate school or immediate employment. It should be noted, however, that employment as a professional geologist generally requires some graduate training.

The B.S. degree, Earth Science Option, is recommended for students interested in secondary teaching, or for students interested in future graduate work leading to the M.A.T. or M.S. Ed. degrees. As well as the necessary core Geology courses, this program involves extensive course work in other sciences needed to teach secondary Earth Science and General Science courses.

The specific requirements in Geology and supporting subjects for each degree program may be obtained from the Department of Geology and Geography, or from the College of Arts and Sciences Information and Counseling Center (CASIAC). Thomas E. Rice is the Chief Adviser for Geology. Students are expected to discuss their career plans with a faculty adviser before selecting or changing their degree programs. It is also recommended that students discuss their course elections with a faculty adviser prior to registering each semester.

### **Mathematics & Statistics MATHEMATICS**

The student electing mathematics as a major will find a variety of stimulating program options. These include preparation for a career in teaching at the secondary school level, graduate and research work in mathematics, computer programming and data processing, actuarial work, statistics, or an industrial position. Mathematics is also a good

general major for students who are uncertain of their career plans. In addition, there are many opportunities for interdisciplinary study based on mathematics. Both Bachelor of Arts and Bachelor of Science degrees are offered, and the choice between them is usually based upon the interests and intentions of the student.

All mathematics majors are required to complete a two-year sequence in calculus and linear algebra, or the equivalent. In addition, eight upper-division courses are required. These may be chosen from the department's offerings or from certain mathematics-related courses in other departments. Five of these upper-division courses must be taken in the form of 2 two-semester sequences in two of the areas of algebra, analysis, applied mathematics, and geometry and topology, and a one semester elective from a third of these areas. Students who have taken calculus in high school may be entitled to advanced placement with credit for their previous work; they should consult the mathematics placement counselor during the summer counseling period. Further detailed information about mathematics major requirements may be found in the Mathematics Major's Information Leaflet which may be obtained from the department.

The student majoring in mathematics will have ample opportunity to shape his or her major program to fit his or her interests. If he or she is interested in computer and data processing he or she would probably take courses in computer and information science, logic, linear programming and possibly probability and statistics. The student aiming for a teaching career at the secondary level might elect courses in geometry and number theory, and then spend one semester of his or her senior year practicing teaching in a public secondary school. A student interested in actuarial work would take courses in analysis and probability and statistics and also computer science. The student interested in industrial work would do well to take advantage of the department's offerings in analysis and applied mathematics.

Students interested in statistics will find a good basic preparation in the mathematics department's course offerings, and will have an opportunity to take statistics courses for credit toward a major in mathematics.

Those planning on college level teaching or research in mathematics should be thinking of graduate school and are urged to take a number of the "pure" mathematics courses such as group theory, topology, differential geometry, and set theory.

Students who have demonstrated unusual mathematical ability in either the regular or honors courses in calculus will be invited to enter the departmental honors program. To receive a degree with an honors designation above cum laude a student must in fact meet the requirements of the honors program. One of these is that either a graduate course be taken or a senior honors thesis be written. Thus, in addition to taking some more demanding undergraduate courses the honors student will have the opportunity either to see mathematics at the graduate level or to undertake a substantial independent study project.

Every student majoring in mathematics is assigned a faculty adviser. Further opportunities to meet with faculty members on an informal basis are provided by various department-sponsored activities. In the past these have included a mathematics club for undergraduates, and a junior colloquium at which special lectures for undergraduates were given by faculty members. For those who enjoy mathematical competitions, the department has entered a team in the national Putnam Prize competition for the past several years.

#### PROBABILITY AND STATISTICS

The curriculum in probability and statistics is intended to develop student insight into the nature of scientific method, with emphasis upon statistical models of its chief tool, the experiment. Distinctions between deductive and inductive methods of reasoning are explored. Statistical techniques for dealing with data in small or large quantity are developed and studied. Courses offered introduce the student to analytic devices for dealing with data that are commonly used in the social, biological, and physical sciences; business, engineering and other disciplines.

Students with training in calculus should elect MATH 247-STATIS 248 or STATIS 315-316. Students without calculus who desire a thorough grounding in the concepts underlying statistics should

elect STATIS 231 and 232. Those who wish merely to obtain some familiarity with elementary statistical ideas and techniques should elect STATIS 121 and subsequently STATIS 251.

Any of the three courses STATIS 121, 231, or 315 serve as prerequisites for analysis of variance (STATIS 251), design of experiments (STATIS 261, STATIS 262), sampling theory (STATIS 271), and multivariate analysis (STATIS 281, STATIS 282).

There is at present no undergraduate major in statistics. Those who intend to study statistics at a graduate level should concentrate on mathematics and elect courses in computer science. Statistics finds useful application in diverse fields such as animal and plant breeding, econometrics, engineering, market research, health sciences, sociology and psychology. Advanced courses in statistics require a background of at least two years of calculus and preferably MATH 225, Advanced Calculus and MATH 211-212, Abstract Algebra.

The Statistical Laboratory is open to students and staff wishing to use its facilities. Students wishing to use the calculating machines will be instructed in their proper use.

#### Microbiology

The major program in microbiology offers sound preparation for more intensive graduate study and research in microbiology, as well as basic preparation for a wide variety of positions as microbiologists in research and non-research laboratories. In addition, the curriculum in microbiology provides a strong basis for those students who elect professional training in medical, dental or veterinary school. In either event microbiology majors should immediately begin preparation in chemistry. Microbiology majors are required to have broad training in collateral sciences, and minimum requirements include chemistry through quantitative analysis and organic, and one year each of introductory biological science, physics, and mathematics. Those students contemplating graduate study or professional school will be advised to emphasize stronger training in these collateral sciences. Courses in microbiology are designed to offer fundamental training in the basic core areas and disciplines of

his field. MICBIO 250, 251, 280, 340, senior seminar, and elective courses contributing to a total of at least 20 credits in microbiology are required of majors. Professor S. C. Holt is departmental chief adviser.

## Physics & Astronomy

**ASTRONOMY**  
The Five College Department of Astronomy is administered jointly with Amherst, Hampshire, Mount Holyoke, and Smith Colleges. The elementary courses for non-majors are taught separately at each campus but all advanced courses are given on a joint basis for students from the five participating institutions. Five College courses are identified in the *Undergraduate Catalog* by ASTFC. The Astronomy Program at the University is also a part of the Department of Physics and Astronomy. The graduate program in astronomy is developed in close cooperation with the program of physics.

The Five College Astronomy Department offers undergraduate courses which furnish 1) specialization for those students planning graduate study in astronomy, 2) a more general major for students interested in careers in teaching, scientific journalism, technical editing, or similar areas for which astronomy may form the basis for a suitably broad science background, and 3) a background for all students who are interested in astronomy for its cultural and scientific value. Professor J. Taylor is the Chief Adviser for Astronomy.

Students who plan to go to graduate school should obtain a firm foundation in physics and mathematics and should plan to finish satisfactorily the introductory physics and mathematics sequences and ASTRON 222-223 by the end of the sophomore year. During the junior and senior years students should complete Mechanics, Electricity and Magnetism, Modern Physics, MATH 242, and three courses selected from ASTRON 237, 238, 343, 344, and independent study. It is also strongly recommended that the student obtain a good reading knowledge of German, French or Russian.

More flexibility in planning courses is available to those majors for whom the B.A. or B.S. will be a terminal degree in astronomy. In some circumstances PHYSIC 142 and ASTRON 101-102 will be acceptable lower division courses. A

minimum of three upper division astronomy courses and nine additional credits of upper division astronomy or physics must be satisfactorily completed. These may include ASTRON 231 and 234 but should be chosen in consultation with the Chief Adviser. In some cases advanced courses in the history or the philosophy of science may be desirable.

Those students wishing a B.S. rather than a B.A. degree need a total of 60 credits of science courses. The credits required beyond those explicitly needed for the astronomy major may be chosen from any science or behavioral science courses.

Independent and honors work are encouraged for all majors. Opportunities for theoretical and observational work are available in cosmology, cosmogony, radio astronomy, planetary atmospheres, relativistic astrophysics, laboratory astrophysics, gravitational theory, infrared balloon astronomy, stellar astrophysics, spectroscopy, and exobiology. Facilities include the Laboratory for Infrared Astrophysics, balloon astronomy equipment (16-inch telescope, cryogenic detectors), the Five College Radio Observatory, access (under supervision) to the 120-foot NEROC radio antenna, and a modern 24-inch Cassegrain reflector. Opportunities for summer research are also frequently available including an exchange program with the Observatory of Bonn University. Original publications often result from undergraduate research.

## SAMPLE PROGRAM I

### Freshman Year

|          |            |
|----------|------------|
| Rhetoric | Rhetoric   |
| MATH 131 | MATH 132   |
| Elective | PHYSIC 161 |
| Elective | Elective   |
| Elective | Elective   |

### Sophomore Year

|            |            |
|------------|------------|
| PHYSIC 162 | PHYSIC 163 |
| MATH 165   | MATH 231   |

| Physics/<br>Astron Elective | Physics/<br>Astron Elective |

Note: Electives include courses needed to satisfy college and University distribution requirements.

## PHYSICS

The Department of Physics & Astronomy offers programs of study and individual courses in physics for students in science and science-related areas and for liberal arts students.

For the liberal arts student a variety of one and two semester courses is available. PHYSIC 114 is of special interest to Communication Disorders majors, 115 to Music majors, and 130 to Elementary Education majors. PHYSIC 110, 116, 117, 118, 119 and 169 consider topics in the world beyond our senses, relativity, nuclear energy, quantum physics, contemporary applications of physics, and

science for science fiction readers respectively. PHYSIC 121-122 provides a broader view of the ideas and concepts of physics for the non-science student.

PHYSIC 141-142 serves the needs of life science majors, including pre-med/physics majors. 161-162-163 provides the necessary background for majors in Engineering, Chemistry, Physics, Astronomy, and other Physical Science fields. Students with special interest and facility in Physics and Mathematics, especially prospective Physics or Astronomy majors, should elect the 170 series, the Honors version of the 160 sequence. Prospective majors with high school math deficiencies may take 100 or 116 while completing the mathematics prerequisites for the introductory sequences. They are also urged to take 185, the freshman colloquium.

In order to provide the maximum flexibility and options, the department has recently revised all the upper division courses. This includes courses intended primarily for Physics majors and those which also appeal to students in other scientific fields. The new curriculum has not yet received final University approval. Consequently all courses numbered 171 or higher are tentative, although substantial changes are not expected. A variety of advanced and applied courses are included in this new curriculum.

Majors are normally required to take MATH 131, 132, 165 or 127, 128, 132, 165, a year of a science outside physics, and 18 credits of upper division physics courses. These are 220 (Physical Electronics) or 222 (Intermediate Electricity and Magnetism), 221 (Mechanics) or 225 (Biophysics), 223 (Thermal Physics), 224 (Modern Physics) or 301 (Applied Modern Physics I), and two advanced lab courses. The latter may be chosen from 205 (Intermediate Laboratory), 320 (Radiation Physics), 321-322 (Electronics for Scientists), 375-376 (Advanced Lab). (ASTRON 237 or 238 may be substituted for one of these labs). PHYSIC 201 (Intro. Applied Physics) and 202 (Techniques of Theoretical Physics) are recommended but not required. These requirements may be completed in as little as two years, but the breadth obtained by taking additional courses requires additional time.

The student interested in physics as a profession follows a program designed to provide a background in basic physics

which allows a continuation of studies in graduate school or permits immediate employment in a variety of technological fields. Such a student will normally elect several advanced physics courses plus math courses such as 241-242 (Applied Analysis), 231 or 331 (Differential Equations) and 167 (Linear Algebra).

Interdisciplinary work is a general category which includes preparation for science teaching in secondary schools, entrance to professional schools of law, medicine, biology, astronomy, computer science, engineering, or chemistry. Students interested in such fields will normally take physics courses in atmospheric physics, biophysics, radiation or instrumentation, or applied physics areas depending upon their needs. Since the major requirements are minimal, such students have ample time to take appropriate courses in the departments.

With the growing importance of nuclear medicine and the microscopic approach to biological systems, the pre-medical or pre-dental student can consider a physics major with a medical physics option. This includes the basic pre-medical core plus additional biophysics, radiation, and instrumentation courses which provide an excellent preparation for medical studies.

Students are encouraged to contact the department for further details concerning any of these programs and a leaflet giving sample programs and course descriptions. Professor M. M. Sternheim is the Director of Undergraduate Studies.

### Zoology

The Zoology Department offers a variety of general interest courses in ecology, behavior, natural history, genetics, and physiology. These are constructed for the enjoyment and benefit of everyone; a few are designed to fulfill the needs of specific groups of students.

For students who decide to major in zoology, the curriculum provides the basic concepts in all areas of zoology, but allows for various individual interests. Zoology majors should complete ZOOL 240, Principles of Genetics; ZOOL 360, Cell Physiology; and one course from each of the following groups:

Vertebrate zoology: ZOOL 221, Comparative Anatomy; ZOOL 223, Histology or ZOOL 227, Embryology.

Invertebrate zoology: ZOOL 281, Biology of the Invertebrates; ZOOL 282, Biol-

ogy of the Invertebrates or ZOOL 283, General Parasitology.

Ecology, Population, Behavior: ZOO 243, Population Biology; ZOOL 335, Limnology; ZOOL 337, Ecology or ZOOL 351, Animal Behavior.

Physiology, Development: ZOOL 361, Vertebrate Physiology; ZOOL 370, Comparative Physiology or ZOOL 380, Developmental Biology.

Background knowledge in allied fields aids understanding of zoological ideas; thus, additional requirements are BOTANY 100, Introductory Botany; PHYSIC 141/142, Introductory Physics; and MATH 127/128, Calculus for the Life and Social Sciences.

Students contemplating a major in zoology should also enroll in CHEM 111 during their first semester in order to anticipate those zoology courses which have general chemistry (CHEM 111/112), organic chemistry (CHEM 261/262 with laboratory), or biochemistry (BIOCHM 220 or 223) as prerequisites. No other scheduling difficulties should be encountered although the student should, of course, plan ahead with regard to all prerequisites, and fall-versus-spring scheduling of some courses.

Students may substitute for MATH 127/128 either of the following sequences: STATIS 231/232; Fundamentals of Statistical Inference; or COIN 122, Introduction to Problem Solving, plus a second COINS course for which 122 is a prerequisite. Other substitution are possible. For example, students with a strong interest in chemical biology may, with the permission of the Chemistry Department, substitute CHEM 113/114 for CHEM 111/112; those with special interest in physics may wish to substitute PHYSIC 161/162/163 for PHYSIC 141/142. The Bachelor of Science degree requires a total of 60 credits in natural science, mathematics, or psychology. A few courses elected for these areas will bring a zoology major program to the 60-credit level.

ZOOL 101, Introductory Zoology, is currently not required of zoology majors but the faculty is preparing a first course in zoology (ZOOL 102) for its major which will be required. Any student who has not studied biology in high school or who feels the need for review may, of

course elect ZOOL 101, or simply audit the lectures.

The curriculum for those who plan to become certified secondary school biology teachers is somewhat broader. Additional botany courses (BOTANY 125 and 26), and several psychology and education courses, as well as practice teaching, provide the needed background. Also ZOOL 135, Introductory Physiology, may be substituted for the last group of zoology courses listed above. Students are urged to contact the Science Education Adviser in the School of Education as early in their academic careers as possible since good course planning will expedite their very full programs. Written application to the teacher preparation program is required for student teaching placement.

The zoology faculty stands ready to assist the student in a variety of ways. Up-to-date information on course selection, the honors program for qualified students, special courses, individualized work (ZOOL 385/386), Senior Honors (ZOOL 398/399), and summer research opportunities is readily available from your adviser or other members of the faculty. It is useful to establish rapport with your adviser, and to seek as much information as possible about careers in zoology. Publications of the University and the College of Arts and Sciences Information and Advising Office (IASIAC) also provide information on procedures to ease your progress and on the vast array of courses to enrich your undergraduate education.

## ACULTY OF SOCIAL AND BEHAVIORAL SCIENCES

### Anthropology

In its study of mankind in terms of origins, ways of life, physical and cultural differentiation, and contemporary problems, anthropology bridges the social and biological sciences. Its courses are offered with the aim of providing both a foundation for specialized graduate study in all four subfields of anthropology (archaeology, physical anthropology, social and cultural anthropology and linguistic anthropology) and also the understanding of mankind that can be of value to anyone regardless of particular interests.

Anthropology majors must take ANTH 104 and one other of the following

introductory courses: 102, 103 or 105. They should also take at least one other course in the social and behavioral sciences (either Sociology, Economics, Political Science or Psychology). All majors must elect a minimum of 30 credits in Anthropology, with at least 21 of these credits chosen from courses above the 100 level. The maximum acceptable credits in Anthropology is 45. Students choosing Anthropology as a major beginning in the Fall Semester of 1975 are also required to take a course in quantitative methods selected from a list available from the department. Under special circumstances, and with the adviser's approval, an Anthropology major may be allowed to substitute as part of the departmental requirements non-duplicating Anthropology courses given at another of the Five-College Cooperative institutions. Professor Donald Proulx is chief adviser for Anthropology.

### Communication Studies

Courses in Communication Studies are designed to enrich the students' understanding of man through theoretical study of the communication process and the application of this theory to various communication forms. A major in Communication Studies prepares a student not only for a career in one of the communication disciplines, but also for a career in law, government, the arts, or business.

Majors are required to select one of the following areas of concentration: 1) Interpersonal Communication and Rhetoric, recommended for students who plan to work as communication specialists in business, government or education, who wish to pursue careers in law, public affairs, politics and similar professions, or to prepare themselves for graduate study in Interpersonal Communication and Rhetoric; 2) Mass Communications, recommended for students who plan to pursue careers in mass media or mass media-related industries, or to prepare themselves for graduate study in Mass Communications; 3) Communication Education, required of all students who plan to earn a secondary school teacher's certificate in Speech Communication.

Majors must meet the requirements of the area of major concentration. Specific information may be secured in the departmental office.

### Economics

Economics is the study of a hard fact of life, that what we as a society would like to have exceeds the capacity of our resources to provide it. We are forced, therefore, to choose—and simultaneously exclude—those goods and services we will have from the larger menu of possibilities. Economics develops the basic principles stemming from this scarcity and applies them to analyze the various aspects of human activity where such choices must be made.

The Economics Department at the University offers courses spanning a broad range of interests within economics. The courses are subject to continuous review as the findings and techniques of economic science improve. In recent years substantial numbers of new courses have been added and many existing courses revised. Special seminars on current problems are offered from time to time.

Courses are offered in such topics as economic theory, international trade, industrial structure and regulation, labor economics and human capital, mathematical economics, economic history, lesser developed economies, comparative systems, regional and urban economics, public finance and history of economic thought.

Thus the individual student is faced with a choice. The department has far more course offerings than even a major could reasonably take. A student who wishes a basic understanding of economics or completion of a (D) distribution requirement will probably take ECON 100, Elements of Economics. A student interested in a particular topic may take ECON 121, International Trade; ECON 131, Insecurity and Poverty; ECON 141, Labor Problems; ECON 172, The Soviet Economy; or ECON 181, Urban Problems; all of which presume no previous economics courses. A student expecting to take more than one economics course should begin with ECON 103, Microeconomics and continue with ECON 104, Macroeconomics. Then, if a particular subject is of interest, the student may enroll in the appropriate one from among the many other courses offered by the department. A student interested in developing economic tools of analysis further for a career in business or systems analysis, for example, can take ECON 203 and 204 after the two introductory courses.

The same freedom of choice extends to majors in economics. Graduates of the undergraduate program in economics continue in a wide variety of categories such as graduate school, law school, government, or business. The course structure is such that they are able to structure their program to their specific needs.

Along with University and college requirements the department requires majors to complete 24 credits in economics which must include 103, 104, 203, 204, and at least four other courses of the 200 or above level. The only other requirement is one of calculus such as 127, 131, or 135, or 190-290 so that students have some familiarity with the language in which so much of modern economics is conducted. Majors are assigned to a permanent adviser when they enter the department but are not required to obtain the adviser's signature on semester programs. In practice many economics majors follow an informal advising system of consulting faculty members from whom they have had courses or who are well versed in specific areas.

### Political Science

Courses in Political Science investigate the nature, functions, and problems of political systems, and of the place of politics in the modern world. These courses can be broadly grouped into the fields of Political Theory, American Politics and Public Law, State and Local Politics and Public Administration, Comparative Politics and Area Studies, and International Relations.

The degree program in Political Science provides a thorough foundation for enlightened citizenship and prepares students for a wide range of careers, such as graduate study leading to academic or research positions, public service at the federal, state or local level, political office, the study and practice of law, foreign service, business and education.

The Political Science Department offers three introductory courses: 101 American Politics; 131 Comparative Politics; and 151 World Politics. Any of these courses meets the University requirement of an introductory course in social science. Political Science majors are required to take two of the above three courses, the two selected depending upon the background, interest, and experience of the student involved.

Credit will not be awarded for more than six hours of introductory work.

Majors in Political Science are normally expected to complete the basic courses in their freshman or sophomore years. A minimum of nine additional courses is required. At least one course must be selected from each of the five fields: political theory, American politics and public law, state and local politics and public administration, comparative politics and area studies, and international relations. Any four additional Political Science courses will complete the Departmental distribution.

The curriculum is flexible enough to accommodate a wide range of career and vocational interests. Students are encouraged to develop their individual programs in consultation with Departmental advisers. Opportunities also exist for independent research (through the Senior Honors Program), for exchange programs (within the Five College area, among a number of participating universities and colleges in the United States, and with a number of universities abroad), and for various internships and training programs at the local, state, and national levels.

### Psychology

The courses in the Psychology Department are planned to impart an understanding of the basic principles, methods and data of psychology as a science and the application of this knowledge to current issues. The Department recognizes that interest in psychology is not limited to those who intend to pursue careers in the discipline. Course offerings are therefore designed so as to permit students to pursue study of various aspects of the subject to differing levels of depth. The wide range of the discipline further permits students to pursue programs of study which lead to either the B.A. or the B.S. degree, depending on the pattern of courses the student elects.

Students interested in majoring in psychology should elect PSYCH 120, 130, 140, and 145 and may then pursue a general psychology major or one designed for those preparing for graduate study and professional careers in the field. The general psychology major provides opportunities either for those seeking a general education or for those entering career fields for which psychological information is relevant.

The psychology major must elect the following: a minimum of 24 (and no more than 40) credits of advanced level courses in the Department. Included the electives must be at least two courses from each of the following two groupings: A) 210, 220, 230, and 250; and B) 260, 270, and 280. This program allows the student considerable flexibility to elect a variety of courses both within and outside the Department suited to his or her interests and needs. Students completing this major will fulfill the Department requirements for the Bachelor of Arts or the Bachelor of Science degree.

In addition, students interested in a career in Psychology should plan to elect at least one laboratory course from each of the following two groupings: A) 221, 222, 231, and 251; and B) 261, 271, 281, and 282. These laboratory electives must be taken in proper sequence with the associated non-laboratory prerequisite or corequisites. While such laboratory electives are highly recommended for students intending to apply to graduate school, they also may be of use and interest to other majors. Furthermore, students who have not taken these courses have not excluded themselves from further study or careers in the field. Students completing this major will fulfill the Departmental requirements for either the Bachelor of Arts or the Bachelor of Science degree.

NOTE: Psychology majors may elect either a B.A. or B.S. degree. If a student elects the B.S. degree, he must fulfill the additional science requirements of the College. Depending on their backgrounds, certain transfer students may have difficulty fulfilling these requirements in the time they have available. Students who are in doubt as to which degree program to follow should discuss the available options with the Undergraduate Advising Office in Tobin Hall.

Eligible students (either B.A. or B.S.) will be encouraged to participate in the honors program in their junior and senior years. Furthermore, selected majors may from time to time be invited to participate in Special Problem programs, the Department's cooperative teaching program or both.

Professor Stanley Moss is Director of Undergraduate Studies. Students should contact the Undergraduate Secretary in Tobin Hall for advising.

## **Sociology**

The courses in sociology are planned to give the student an understanding of the factors which influence the individual in his or her activities and interests as a member of society and to introduce the fundamental methods of research in sociology. The course offerings are designed so that students who desire to prepare for graduate work, as well as those who do not, will find suitable programs for study available within the department.

Career opportunities are open in a wide range of fields which include public and private welfare agencies, governmental and private research organizations, and education. Those interested in research careers should incorporate within their programs courses in statistics and methodology beyond the introductory levels and should plan on graduate training if they aspire to full professional status in the discipline. The American Association of Schools of Social Work indicates that the pre-professional subjects most closely related to professional work in that field are economics, political science, psychology and sociology.

Rather than offer a single introductory course in sociology, the department offers a number of introductory courses at the 100-level, each of which has a particular substantive referent but the shared responsibility of acquainting the student with the general principles and methods of the discipline. These courses include: a) Contemporary American Society; b) Age, Sex, and Kinship in Contemporary Society; c) Social Problems; d) Drugs and Society; e) Sociology of Learning; Problems of Personal and Social Change; f) Urban Life and Industrial Society; g) Race, Sex and Social Class: Inequality in America; and h) Self, Society, and Interpersonal Relations.

The sociology major requires a minimum of 27 credits or nine courses distributed as indicated below. No major is permitted to take more than a total of 36 credits or 12 courses in sociology.

Each major is required to take both SOCIOL 201 (Sociological Analysis I: Theories and Perspectives) and SOCIOL 202 (Sociological Analysis II: Data Collection and Analysis). These courses should be taken during the sophomore year as further preparation for the upper division courses to follow. At least one sociology course, preferably at the

100-level, is a prerequisite for 201 and 202.

In addition to 201-202, each major is required to take at least one upper division course in three of the following five core areas, and no more than three courses can be taken for credit toward the major in any one core area. Core areas include: Social Organization and Institutions; Social Issues and Policies; Demography and Urban Sociology; Social Psychology; and Theory and Methods.

It is recommended that majors with special interest in a core area take a 300-level practicum in the area during their senior year.

Professor Robert Faulkner is the departmental chief adviser. Mr. William D. Bathurst is information officer for sociology majors.

## **INTERDISCIPLINARY PROGRAMS**

### **Classics & Philosophy**

The Classics & Philosophy major is administered jointly by the two departments. It is designed for classicists with a philosophical bent and philosophers with an interest in Greek.

### **REQUIREMENTS**

8 hours of credit in Elementary and Intermediate Greek

6 hours of credit in Greek Readings

6 hours of credit in Classics

6 hours of credit in Philosophy

6 hours of credit in Ancient Philosophy

6 hours of credit in Special Classics and Philosophy seminars taken in the junior and senior years.

Questions may be directed to Prof. Gareth Matthews, Philosophy Department; and to Prof. Robert Dyer and Prof. John Marry, Classics Department.

### **Judaic Studies**

Judaic Studies is a major program supervised by a committee of faculty members from various departments. The Director of Judaic Studies and chairman of the committee is Professor Leonard H. Ehrlich. Student inquiries about any academic aspect of the program, such as the major, individual courses, or study abroad, may be directed to him or to the Director of Student Affairs, Professor Leora Baron.

Students who want to major in Judaic Studies must complete the following requirements:

- a) Hebrew: One year introductory and one year intermediate Hebrew, or equivalent. Two semesters of Hebrew courses numbered 150 or above, or equivalent.
- b) JUDAIC 100, 101 (The Jewish People, I and II).
- c) 18 hours in courses, approved by the Judaic Studies Committee, numbered 200 or above. This requirement is in addition to (a) above.
- d) The major student will devote no fewer than 9 of these 18 hours to an area of concentration approved by the Judaic Studies Committee. Six approved areas are: Biblical Studies, History, Hebrew Language and Literature, Modern Literature, Religion, Area Study. Students concentrating in any one of these areas will be assigned to an appropriate adviser. Students wishing to concentrate in an area not listed here should prepare, in consultation with one of the advisers, a proposal for the Committee's consideration.

Entering freshmen who may decide to take a major in Judaic Studies are strongly advised to enroll in Hebrew in the freshman year. This will leave them ample time to complete the required three years of Hebrew; it will also prepare them for a year's study in Israel, which is not required but desirable. In case such students decide not to take a major in Judaic Studies, two years of Hebrew will satisfy the language requirement of the College of Arts and Sciences.

### **Latin American Studies**

Undergraduates interested in Latin America may wish to enroll in the University's Latin American Studies Program. The program does not constitute a major and is designed to supplement the work done in another discipline. However, those students who fulfill the requirements of the program are awarded the Certificate in Latin American Studies attesting to their attainment in area and language studies. The requirements of the program are intended to be met partly through courses that fulfill existing requirements of the College of Arts and Sciences,

partly through the careful use of electives.

Requirements for the Certificate in Latin American Studies:

#### TRACK A

##### 1) Languages

- a) Students must demonstrate a practical working knowledge, defined as the ability to engage in ordinary conversations and to read mature but non-technical material, of Spanish or Portuguese. This knowledge may be demonstrated by examination or by satisfactory performance (with a grade of C or better) in SPAN 180-181 or PORT 181-182 for conversation and SPAN 140 or PORT 140 for reading.

- b) Completion of a one-year course in the other language (Spanish or Portuguese) with a grade of at least C. This requirement may be met by an achievement test.

##### 2) Area Studies

Successful completion (with a grade of C or better) of four courses in Latin American Studies selected from three distinct disciplines, chosen from the following list:

ANTH 237, 375, 376

ECON 267

EDUC 365

GEOG 220

POL.SCI 240, 241, 245

HIST 120, 121, 301, 302, 303, 304, 305, 306, 307, 308

SPAN 201, 350, 351, 352, 353, 355, 356, 357  
Appropriate courses listed in the Five College announcement of Latin American Studies may also be used to fulfill this requirement.

##### 3) Inter-disciplinary Courses

All students must take the Seminar on Latin America (LAT AM 390). This is normally taken in the second semester of the senior year. As an optional course they may also want to take LAT AM 392—Bibliography for Latin American Studies.

#### TRACK B

##### 1) Languages

Students must demonstrate a practical working knowledge of Spanish or Portuguese. For details see above under Track A, 1a.

##### 2) Area Studies

Successful completion of five courses in Latin American Studies selected from at

least three distinct disciplines. See above under Track A, 2 for list.

##### 3) Interdisciplinary Courses

Students must complete both LAT AM 392, Bibliography for Latin American Studies, and LAT AM 390, Seminar on Latin America.

The Committee on Latin American Studies administers the program and advises interested students. Committee members for 1974-75 are:

Professor Robert A. Potash, Chairman (History)

Professor Howard A. Wiarda (Political Science)

Professor Robert Bancroft (Spanish and Portuguese)

Associate Professor Donald A. Proulx (Anthropology)

Associate Professor Richard W. Wilkie (Geography)

Associate Professor Michael Best (Economics)

#### INTERDISCIPLINARY MAJORS IN LINGUISTICS

The Department of Linguistics offers five majors in which the study of Linguistics forms a significant part of the curricular requirements. These are:

Linguistics & Philosophy

Linguistics & Chinese

Linguistics & German

Linguistics & Japanese

Linguistics & Russian

Students interested in these majors should first see the undergraduate adviser in Linguistics. Students wishing to pursue a joint major in Linguistics and other disciplines (for example, Linguistics & English, Linguistics & Psychology, Linguistics & Anthropology, or Linguistics & Computer Science) should also see the undergraduate adviser in Linguistics. Joint majors in these fields have in the past been approved through the Bachelor's Degree with Individual Concentration.

Questions may be directed to Prof. Donald Freeman, Linguistics Department.

#### Linguistics & Philosophy

**Prerequisites:** Two years (or equivalent) of a foreign language to be taken before the junior year, plus 42 semester hours of credit distributed between philosophy and linguistics, and including each of the above or equivalent. At the discretion of the directors of undergraduate studies in each department, other senior level

courses in linguistics and philosophy may be substituted for those listed above. Seniors normally will take the cross-listed seminar LING (and PHIL) 395 Linguistics & Philosophy.

LING 201, Introduction to Linguistic Theory (3)

LING 202, Phonological Theory (3)

LING 203, Introduction to Syntax (3)

LING 209, Formal Foundations of Linguistic Theory (3)

LING 210, Introduction to Semantics (3)

LING 211, Introduction to Psycholinguistics (3)

PHIL 230, Intermediate Logic (3)

One of the following:

PHIL 371, Philosophy and Logic (3)

PHIL 372, Mathematical Logic (3)

One of the following:

PHIL 240, Philosophical Approach to Science (3)

PHIL 340, Philosophy of Science (3)

PHIL 261, Contemporary Analytic Philosophy (3)

PHIL 346, Philosophy of Language (3)

One of the following:

PHIL 344, Epistemology (3)

PHIL 345, Metaphysics (3)

#### Linguistics & Chinese

**Prerequisites:** Successful completion of four (4) semester courses in Chinese (2 credits): CHINSE 126, 146, 226, 227 (or equivalent). Thirty-five (35) credits distributed between Linguistics and Asian Studies and normally including the following:

LING 201, Introduction to Linguistic Theory (3)

LING 202, Phonological theory (3)

LING 203, Introductory Syntax (3)

One of the following:

LING 204, Field Methods (3)

LING 211, Introduction to Psycholinguistics (3)

LING 214, Phonetics for Linguists (1)

CHINSE 275, Chinese Syntax (3)

CHINSE 350, Classical Chinese I (4)

CHINSE 375, History of Chinese (3)

One of the following:

CHINSE 351, Classical Chinese II (3)

CHINSE 391, Chinese Dialectology (3)

Other courses may be selected from the course list of the Five College Asian Studies program. All seniors normal will take the cross-listed seminar 395 Linguistics and Language.

### **Linguistics & German**

**Prerequisites:** Successful completion of four (4) semester courses in German (12 credits): 110, 120, 130, 140, or equivalent. Thirty (30) credits distributed between linguistics and German such that at least 4 credits are earned in courses bearing German numbers over 200, and normally including the following:

- LING 201, Introduction to Linguistic Theory (3)
- LING 202, Phonological Theory (3)
- LING 203, Introduction to Syntax (3)
- LING 211, Introductory Psycholinguistics (3)
- LING 214, Phonetics for Linguists. (1)
- GERMAN 201, Advanced German (4), and GERMAN 202, Advanced German (4)
- GERMAN 211, Advanced Composition (3)

One of the following:

- GERMAN 284, The German Language (3)
- GERMAN 285, The Structure of German (3)

Students will be encouraged to take graduate courses in the older Germanic languages for undergraduate credit (e.g. GERMAN 701, 702, 703, 704, 710, 711, 712) and may also opt to take courses in German literature or civilization courses and/or language courses in Danish, Dutch, Swedish. All seniors normally will take the cross-listed seminar 395C: Linguistics and Language.

### **Linguistics & Japanese**

**Prerequisites:** Successful completion of four (4) semester courses in Japanese (24 credits): JAPAN 126, 146, 226, 227 or equivalent. Thirty-five (35) credits distributed between Linguistics and Asian Studies, and normally including the following:

- LING 201, Introduction to Linguistic Theory (3)
- LING 202, Phonological Theory (3)
- LING 203, Introductory Syntax (3)

One of the following:

- LING 204, Field Methods (3)
- LING 211, Introduction to Psycholinguistics (3)

- JAPAN 275, Japanese Linguistics I (3)
- JAPAN 276, Japanese Linguistics II (3)
- JAPAN 376, Topics in Japanese Linguistics (3)

Six credits from the following:

LINGUISTICS & GERMAN / JAPANESE / RUSSIAN / MATHEMATICS & PHILOSOPHY / NEAR EASTERN STUDIES

JAPAN 326, Readings In Modern Japanese I (6)

JAPAN 327, Readings in Modern Japanese II (6)

Other courses may be selected from the course list of the Five College Asian Studies program. All seniors normally will take the cross-listed seminar 395C: Linguistics and Language.

### **Linguistics & Russian**

**Prerequisites:** Successful completion of four (4) semester courses in Russian: RUSS 110, 120, 130, 140 or equivalent. Thirty credits distributed between Linguistics and Slavic Languages, and including at least 18 credits earned in courses bearing Russian catalog numbers. The language courses taken as a prerequisite to the major may be counted towards these 18 credits, which are required for state certification, but not toward the major. Courses in the major normally will include the following:

- LING 201, Introduction to Linguistic Theory (3)
- LING 202, Phonological Theory (3)
- LING 203, Introductory Syntax (3)
- LING 211, Introduction to Psycholinguistics (3)
- LING 214, Introductory Phonetics for Linguists (1)
- RUSS 261, Advanced Russian (3)
- RUSS 262, Advanced Russian (3)
- RUSS 266, Russian Phonetics (3)
- RUSS 365, Structure of Russian (3)
- RUSS 366, Contrastive Structures of Russian and English (3)

Other courses may be selected from the offerings of the Slavic languages departments in the Five College area, including language courses in Polish, although Polish language courses cannot currently count toward state certification nor can they count toward the major since they have numbers below 200. All seniors normally will take the cross-listed seminar 395C: Linguistics and Language.

### **Mathematics & Philosophy**

**Requirements:** A minimum of 36 semester hours of credit in courses offered in the two departments. Satisfaction of the following requirements of distribution:

- (a) *The Mathematics Requirement.* Satisfactory completion of MATH 136, 167, and four other courses from among 165 (or 166), and courses numbered above 200,

including a two-semester sequence.

- (b) *The Philosophy Requirement.* Satisfactory completion of any three courses from among PHIL 161, 162, 201, 205, 230, and 261. Satisfactory completion of PHIL 374 and one other course numbered above 200.

COINS 285 may be taken in partial fulfillment of requirement (a) or requirement (b) (but not both).

- (c) *The Logic Requirement.* Satisfactory completion of MATH 381 or both of PHIL 372 and 373. (Note: These courses count toward satisfaction of requirements (a) and (b), respectively.)

For further information, see Prof. Michael Jubien, co-director of the program for Philosophy, or Prof. Frank Wattenberg, co-director for Mathematics.

### **Near Eastern Studies**

The University of Massachusetts, Amherst, offers an interdisciplinary and interdepartmental major in Near Eastern Studies. The major is administered by the following members of the Near Eastern Studies Committee, under the chairmanship of Professor Vartan Artinian of the Department of Classics (737 Herter Hall; telephone 545-0513):

- Leora Baron, Department of Classics, 529 Herter Hall, 545-0543
- Jack Benson, Department of Art, 323A Bartlett Hall, 545-2659
- David Biddle, Department of History, 707 Herter Hall, 545-0672
- Walter Denny, Department of Art, 229C Bartlett Hall, 545-2729
- Charles Isbell, Department of Classics, 540 Herter Hall, 545-0543
- George Kirk, Department of History, 617 Herter Hall, 545-0547
- Archibald Lewis, Department of History, 604 Herter Hall, 545-0630
- Leila Meo, Department of Political Science, 338 Thompson Hall, 545-0413
- Edward Phinney, Department of Classics, 533 Herter Hall, 545-0514
- Niki Stavrolakes, Department of Classics, 542 Herter Hall, 545-0542

Students majoring (or planning to major) in Near Eastern Studies may consult any of the above members of the Committee for help in arranging pro-

grams of study. Students in doubt as to which member of the Committee to choose as an adviser should contact Professor George Kirk, the chief adviser for Near Eastern Studies majors. The major consists of a minimum of 24 upper level credits in courses chosen from an approved list. The complete list is published by the Five College Coordinator and may be obtained from Professor Vartan Artinian. NEAST 100, 101 (Near Eastern Civilizations I and II), and 2 years or the equivalent of a Near Eastern language (Arabic, Armenian, Hebrew, Persian, Turkish) are required. Students should begin the major by taking NEAST 100 and a Near Eastern language course. Those wishing to concentrate in the area of ancient Near Eastern studies may arrange to study Akkadian, Aramaic, and Ugaritic with Professor Charles Isbell. Students are urged to spend a summer, a semester, or a full academic year in the Near East (please see Professor Vartan Artinian, David Biddle, George Kirk, or Leila Meo for available programs). Special Problems courses may be arranged in the area of the student's particular interest with any member of the Committee. Students are strongly urged to take advantage of the offerings at the neighboring Colleges listed below. Registration in these courses is a simple matter. Forms are available in the CASIAC, E22 Machmer. The Five College bus service offers convenient and free transportation. For class meeting times, consult the schedule material issued by the separate colleges.

#### **Pre-Dental, Pre-Medical, and Pre-Veterinary Programs**

A student planning to enter a dental, medical, optometry, podiatry, osteopathy, or veterinary school should select a major department in the field of greatest interest. This will usually be in the College of Arts and Sciences, but may be in other colleges or schools. Pre-veterinary students frequently select a major in the College of Food and Natural Resources. Preparation for the professional schools requires relatively few specific courses beyond those necessary to obtain the bachelor's degree and can be completed within the four-year curriculum of most departments in the University.

A liberal education is felt to be one of the best backgrounds for entering the medical, dental or other health fields. Although many students may be inclined

to concentrate in the sciences, this will not necessarily improve the opportunity for entrance into a professional school. Rather, the field of concentration should be determined by the student's strong secondary interests; i.e., he or she should choose that area most likely to lead to a satisfying alternative career.

Minimum preparation for the pre-professional student must include one year of inorganic, one year of organic, and one semester of analytical chemistry, three semesters of biology, one year of college mathematics, and one year of physics. Certain additional courses in biology, chemistry, or mathematics may be required or recommended by some dental, medical, and veterinary schools. Students should consult their advisers as well as professional school catalogs in regard to specific requirements of particular schools. Freshmen who intend to include the pre-professional courses in the curriculum should discuss their plans with the summer counseling adviser, as some change in the normal course sequence may be desirable.

Students, who by their work in the first year demonstrate a potential for success, may, in their third semester, apply to the Pre-Professional Advisory Committee for entrance into the pre-medical, pre-dental, or pre-veterinary major. This program is designed to give qualified students the opportunity to broaden their background by providing for increased flexibility in the curriculum of the last two years. These students will have advisers specifically for this program, will be interviewed, and, upon application to professional schools, will be given a written evaluation by the pre-professional advisory committee. However, admission into a pre-medical, pre-dental, or pre-veterinary program is not a prerequisite for application to the professional schools. Many students prefer to complete a full major in an academic department; these students should also apply for entrance into the pre-professional program, and they will be interviewed and evaluated by the committee in the same manner as those who are accepted as majors.

A library of dental, medical, optometry, osteopathy, podiatry, and veterinary school catalogs and other pertinent material is maintained in the committee office, Room 206 Goessmann. Students are encouraged to visit this office for further information concerning prepara-

tions for careers in dentistry, medicine, veterinary medicine and other health areas.

Individual members of the advisory committee are available for counsel to all interested students at any stage of their program and whether or not they have been accepted into the curriculum as majors. The committee membership for 1975-76 consists of 17 faculty members from Natural Sciences, Psychology, Health Sciences and Food and Natural Resources. Dr. W. Brian O'Connor, Associate Professor/Zoology is the Chairman of the Committee.

#### **Science Major**

This is an interdepartmental major based on courses in the departments of the Faculty of Natural Sciences and Mathematics (Biochemistry, Botany, Chemistry, Computer and Information Science, Geology, Mathematics / Statistics, Microbiology, Physics / Astronomy and Zoology). The major is coordinated and administered by a committee composed of the chief undergraduate advisors of these departments, a representative of the Pre-Med committee, and the assistant dean of NS&M (Natural Sciences & Mathematics). The major is intended for the student who has a broad interest in sciences but does not wish to specialize, and has requirements in the areas of foundational work, depth, and breadth.

In the foundations area the requirements are: (1) two courses from Math or COINS (Computer and Information Science) or Statistics; (2) two courses from each of Physics and Chemistry plus one more from Physics, Chemistry or Geology; and (3) two courses from the departments of Biochemistry, Botany, Microbiology, or Zoology.

The depth requirement consists of a primary concentration of at least six courses in one department and a secondary concentration of at least four courses in another department in NS&M, with the primary concentration including at least four upper division courses.

To complete the major, the breadth requirement calls for a total of 20 courses chosen from at least six of the nine NS&M departments.

Courses for non-science majors cannot be used to satisfy any part of the Science major, nor can courses taken on a pass/fail basis. Also, courses that are acceptable in the various areas of the

requirements depend partly on the primary concentration. For more detailed information contact CASIAC or any member of the coordinating committee.

### **Social Thought & Political Economy**

The Social Thought & Political Economy program is an interdisciplinary major for students who want a challenging major that combines related elements of the offerings of the following departments: Anthropology, Economics, History, Philosophy, Political Science, Psychology, and Sociology.

Students choose a concentration either in Social Thought or in Political Economy. Each student is assigned a faculty adviser in consultation with whom he/she selects a program of courses.

### **Requirements**

- (a) 12 hours of credit at the introductory level in at least three of the departments listed above;
- (b) 18 hours of credit in courses numbered 200 or above, selected in consultation with the adviser, from the offerings of the departments listed above;
- (c) 6 hours of credit in a two-semester senior year team-taught seminar restricted to the STPEC majors.

Majors with strong academic records are encouraged to write Senior Honors theses.

For more information, contact Karen Varren, in the Office For Interdisciplinary Studies, housed in CASIAC, Machmer Hall.

### **Soviet and East European Studies**

This program provides an opportunity to study the Soviet and East European area from the perspective of several academic disciplines. Requirements for a major are:

- 1) Proficiency in a relevant language (usually Russian) at a level adequate to enable the student to conduct research in that language;
- 2) Successful completion of 10 courses dealing with the area in a minimum of three disciplines to be chosen from Anthropology, Economics, History, Political Science, Slavic Languages and Literatures, and Sociology;
- 3) Two courses in modern European history.

The major in Soviet and East European Studies was established in 1971 as

an alternative to the major in Slavic Languages and Literatures and to a major in one of the several disciplines offering courses on the Soviet and East European area. This major program is designed for those students who want to acquire a knowledge of this large and important part of the world through study across disciplinary lines. It may be particularly useful for students contemplating work in teaching, government service, journalism and other fields.

Students interested in graduate study in the area may also find the major useful, although it should be noted that most graduate programs are in a single academic discipline only. Accordingly, a student contemplating work toward an advanced degree is advised to have at least a minor in the discipline in which he or she is most interested. (It is possible to take sufficient courses to fulfill the requirements for two majors, with this fact indicated upon the official transcript of the student. This type of program may be devised by an individual student to fit specific plans for graduate study.)

The Committee on Soviet and East European Studies administers the program. Members are: Zdenek Salzmänn (Anthropology); Paul Hollander (Sociology); Robert Jones (History); Maurice L. Levin (Slavic); Stanley Radosh (Slavic Bibliographer); Karl Ryavec (Political Science) and J. Joseph Lake, Chairman. Questions regarding the details of this program may be obtained from the Department of Slavic Languages and Literatures, Herter Hall 438, or from Professor Karl Ryavec, Department of Political Science, Thompson Hall.

### **Western European Area Studies**

The Western European Area Studies Program seeks to add scope and depth to the University's liberal arts program. It is not a major concentration, but rather an informal "minor" which complements a wide variety of departmental majors and offers students additional incentive and guidance in creating a meaningful interdisciplinary undergraduate experience.

The requirements for the Western European Studies (WEST) Certificate are: 1) a minimum of one upper-level course in each of three disciplines relating to Western Europe beyond the designated major; 2) at least one interdisciplinary seminar given under the auspices of the WEST program (WEST 291 or 391); 3) a working knowledge of one modern

Western European language (normally 18 credits) in addition to English (a reading knowledge of a second foreign language is recommended). These requirements may be met by courses taken at the University, at one of the four institutions in the Five College system, or in one of the overseas programs.

Courses may be chosen from the following areas and departments:

Humanities: Art, Music, History, Philosophy

Language and Literature: Comparative Literature, English, French and Italian; Germanic Languages (includes German, Dutch, Danish, and Swedish), Spanish and Portuguese

Professional Schools: Business Administration, Education

Social Science: Anthropology, Economics, Geography, Political Science, Sociology

Students should select their courses — and design their programs — in consultation with their departmental WEST advisor, who will insure that they meet the requirements for the certificate.

WEST Executive Committee, 1975-76: Eric Einhorn (Political Science), Director; Paul Mankin (French), and Marvin Swartz (History).

## School of Business Administration

The faculty of the School of Business Administration is keenly aware of the dynamic changes taking place in our economy, the extensive shifts in occupations and professions and the consequent need for intelligent and well-educated businessmen. The continuing advancement of technology, science, and the behavioral sciences has placed upon schools of Business Administration the necessity to probe, not only into the developments of its own areas of education, but also into the relationships that exist among other areas such as mathematics, economics, psychology, sociology, and government.

The School of Business Administration prepares students to take advantage of important economic opportunities and eventually to assume positions of responsibility in business. The school's educational program is directed toward the broad aspects of business, encouraging high standards of ethical conduct, broad social responsibilities, and the development of competence in particular courses of study of the student's own interest, aptitude, and choice.

The first two years emphasize general education by providing fundamental courses in the humanities, communication skills, mathematics, and the social sciences. In addition, basic courses in accounting, economics, computer science, and business law prepare the student for further work in the School of Business Administration. The junior and senior years emphasize a greater degree of specialization and provide for this in the programs indicated below. But even in these last two years all students need to view business as a whole in so far as a "core" of courses can do this. This "core" consists of introductory courses in Finance, Marketing, and Management. A total of at least 120 credits is required for graduation. Each course of study leads to a degree of Bachelor of Business Administration.

Students transferring to the School of Business Administration from any school or college within the University shall receive junior and senior elective credit only for those courses passed with a grade of C or better.

Students who intend to transfer from junior or community colleges should complete the program in liberal arts and not register for courses in Business Administration, except Principles of Economics and Elementary Accounting.

Transfer students who complete courses in their first two years that are offered in the junior or senior years will receive transfer credit only if such courses are accepted by the department concerned. An examination for such credit may be required.

The School of Business Administration is a member of the American Association of Collegiate Schools of Business.

| Freshman Year         |         |
|-----------------------|---------|
| First Semester        | Credits |
| RHET 100(C)           | 3       |
| MATH 120              | 3       |
| ECON 103              | 3       |
| Non-Business Elective | 3       |
| *Humanities Elective  | 3       |
|                       | 15      |
| Second Semester       | Credits |
| RHET 110(C)           | 3       |
| MATH 121              | 3       |
| ECON 104              | 3       |
| Non-Business Elective | 3       |
| Elective              | 3       |
|                       | 15      |

\*Any course identified by the letter (C) in the catalog.

### Accounting

Accounting is often referred to as "the language of business." Accounting is concerned with a wide range of activities, including the processes of recording, sorting, and summarizing data resulting from business transactions and events. It is also involved with the preparation of reports and interpretation of the data. Accounting has been broadly defined as: "... the process of identifying, measuring, and communicating economic information to permit informed judgements and decisions by users of the information."

The accountant is the individual who develops and maintains a system of components and methods which not only perform the data processing operations but precedes the external and internal reporting needs of an organization. As a member of the management team the accountant provides information to management for planning, controlling, and decision making.

Students majoring in accounting may concentrate their study in one of several different career areas. Students may, with the guidance of a faculty adviser, design their program to meet specific individual career goals. Programs of

study are possible for preparation for careers in:

- public accounting
- information systems
- management accounting and
- a general program which provide flexibility for students to meet specific individual career goals.

### General Business and Finance

The department offers five programs of study and other specifically designed programs for those students who wish to combine Business Administration with a related field of study outside the School of Business Administration. The program in Financial Management is designed for those students who want careers in the planning and controlling of financial organizations, developing decision models and developing computerized systems. The program in General Business emphasizes breadth of knowledge and viewpoint. The program in Business Economics recognizes the close relationships between these areas of study. The program in Management Science is designed to prepare students for positions where computer methods and mathematics are applied to the systematic analysis of functional problems in administration. The program in Urban and Regional Studies combines courses from many disciplines, including economics, sociology, political science, civil engineering, landscape architecture, and agricultural economics. The specific content of a special program joining business studies with work in a discipline outside the business school is mutually determined by the department chairman and the student.

### Management

Management majors are prepared to assume leadership positions in various types of organizations: business, government, and non-profit institutions such as hospitals, universities, and research organizations. Basically, all management majors become thoroughly acquainted with the essential functions of organizations, particularly operations, financial and marketing, and with the elements of managing such as planning, developing an organization structure, motivating employees, and controlling performance. Most importantly, thorough training is provided in the skills of human relations and in understanding the behavior of people at work. Courses normal

## School of Education

include such topics as management practices, personnel policies, manpower planning, social responsibilities of business, labor and industrial relations, the uses of computers in organizations, and theories of organizational behavior.

Through the judicious use of departmental and outside electives, the management major can build a program geared to career aspirations in areas such as general management, personnel management, operations management (emphasizes the efficient managing of the production of goods and services, and explores in greater depth the uses of computers and quantitative aids to planning and decision making) and systems management (prepares the student for work in systems analysis, management role in the large scale, multi-organizational systems found in education, health, and urban affairs).

### Marketing

The role of marketing management in our economy is becoming increasingly important. The Department of Marketing offers a broad range of courses for those students interested in careers in marketing administration, product / service planning and development, sales management, advertising, marketing research, and wholesale, and retail enterprises. The department's objective is to provide a specialized and comprehensive understanding of today's managerial marketing problems, whether they pertain to the business sector or marketing-conscious nonprofit organizations.

### EDUCATION

The School of Education is committed to developing alternative educational programs to address significant educational issues in contemporary American society. The School has a strong graduate program leading to doctorates and M.Ed.'s in Education as well as the Certificate of Advanced Graduate Study. The undergraduate program focuses on teacher education for both elementary and secondary certification. The School attempts wherever possible to develop individualized programs.

Clusters are the basic academic unit of the School, operating as focal points for the various teacher education programs. Presently the clusters are: Designs for Effective Learning, Division of Educational Planning and Management, Division of Humanistic Applications of Social and Behavioral Sciences in Education, Educational Policy Studies, and Transdisciplinary Education. A more detailed description of the academic focus of each cluster follows this section.

An integral part of the academic program is the administrative/instructional procedure called Flexible Curriculum, based on the philosophy that alternative instructional formats provide an improved potential in the effectiveness and responsiveness of a total curricular program. Each Learning Experience carries an agreed-upon number of modules of credit on an accumulating basis. One hundred modules is equivalent to 1 University credit. There also exists significant opportunity for individualized study, including independent studies and practica.

All teacher education programs leading to certification are coordinated and approved through the Teacher Education Council (TEC). There are over a dozen alternative programs currently available for candidates in elementary or secondary teacher education, many of which have inservice as well as preservice components. Placements for field work are available in a wide variety of locations ranging from areas in Western Massachusetts to international locations.

All students seeking certification must enroll in a TEC program. Those students majoring in Education but whose career plans do not include teaching, may develop a non-teaching major within the School of Education.

Students are encouraged to inquire at the Education Advising Office, 125B

School of Education, concerning specific credential programs and for information about the non-teaching major.

### CLUSTERS

#### Designs For Effective Learning (DEL)

The students, staff and faculty of this cluster have joined together to help build designs for effective learning, and share the following commitments:

- 1) Learning through experience — to create institutional means for a *reality-based* education for undergraduates, graduates and inservice personnel.
- 2) Learning throughout life — to create models for *open-ended* education for all involved in the education process - from students and paraprofessionals through administrators, parents, and community leaders.
- 3) Learning to change — to enable schools, programs, and institutions to adapt through *continuous self-renewal* for the needs of the future.
- 4) Learning through diversity — *combating institutionalized and personal racism* in the cluster's programs and in training others to do so.
- 5) Creating a new design for higher education — to evolve an institutional model for a *new design* for higher education.

The students, staff and faculty believe that most successful ventures in changing schools have resulted from a combination of graduate and undergraduate programs with specific goals (such as designing a comprehensive model for developing human potential, implementing effective open classrooms, or improving urban schools). The cluster prepares preservice and inservice personnel, teacher trainers, administrators, and researchers to act as catalysts for educational renewal. By combining field-based programs with academic disciplines, a new model for higher education has emerged which promises a growing influence over the quality of learning throughout the country.

#### Division of Educational Planning and Management (DEPM)

The primary goal of the Division of Educational Planning and Management cluster is to promote the welfare of its students with regard to learning experiences, administrative support services, financial support, sense of community and information needs. DEPM is com-

prised of six academically oriented sub-units. These sub-units are the Center for Curriculum and Organization (CCO), the Center for Educational Research (CER), the Clinic to Improve University Teaching (CIUT), the Center for Leadership and Administration (CLA), the Center for Occupational Education (COE), and the Academic Disciplines Program: Science and Social Studies.

To confront problems in schooling at a fundamental level, the Center for Curriculum and Organization prepares its members to focus on the teacher-learner encounter in schools. Systematic change at this level, where the concerns of the students, teachers, administrators, and parents concentrate for a minimum of 10 years in most children's lives, is the Center's priority.

The Center for Educational Research specializes in research, development, dissemination, and evaluation work within the context of professional education. Although educational research and development is the primary area of interest of CER, the faculty and students cooperatively participate in a variety of activities and services which are natural offshoots of this main function.

The Clinic to Improve University Teaching was established in 1972 to assist faculty members in improving the quality of instruction offered to students. Supported by a W. K. Kellogg Foundation grant, the Clinic has developed and refined a teaching improvement process which enables individual instructors, at elementary, secondary and University levels, to work with trained Teaching Improvement Specialists to assess and improve their teaching effectiveness.

The Center for Leadership and Administration seeks to provide opportunities for each student to enhance his/her qualifications to assume important leadership positions in education. To achieve these ends, CLA relies on active involvement of each degree candidate in one or more peer advisory and support groups; close interactions between students and staff members in a variety of situations, formal and informal; and maximum responsibility and initiative for his/her own program development by each student.

The focus of the Center for Occupational Education is to instill quality and professionalism into teaching in occupational education; to thoroughly equip and train teachers in specific occupational

areas, to develop leadership and administrative abilities in occupational educators; and, through related research, to develop new and relevant occupational programs.

The primary responsibility of the Academic Disciplines Program (Science and Social Studies) on the undergraduate level, is to prepare students from other academic departments for a career as secondary science or social studies teachers.

#### **Division of Humanistic Applications of Social and Behavioral Sciences in Education (HAPPS)**

This cluster seeks to assist people in their historical and ontological vocation of becoming more fully human by applying the social and behavioral sciences directly to the education of individuals and to the transformation of the institutions that facilitate or impede human development. All members of the cluster, both faculty and students, attempt to answer in practice the questions, "what is full humanness?", and "how can we more effectively help people become more fully human?". However, there are productive differences among cluster members in viewpoint, emphasis and applications of their answers to these two questions. Members draw from a wide range of theories for definitions of full humanness: humanistic psychology, theoretico-empirical descriptions of the universal stages of human development, philosophic, economic and social psychologies. Change methods vary from individual counseling and therapy to group methods for deliberate psychological education to organizational development strategies for changing larger social systems. The settings in which these methods are applied also vary widely from schools, mental hospitals and prisons to detention centers, half way houses, community mental health centers, drug education units. This diversity of response to the cluster's basic goal is strongly encouraged as a way of maintaining a synergistic group of professionals.

The pressing need for new, more effective, more widespread assistance demands that the programs have a strong innovative, applied experimental core. However, the cluster is not interested in creating a new breed of elite professional technicians, or in establishing new certi-

fication procedures that artificial create a scarce service resource. On the contrary, it is committed to the demystification of its goals and methods through national and international dissemination of the skills that help people become more fully human.

#### **Educational Policy Studies (EPS)**

The primary concern of EPS is with attaining greater understanding of a wide variety of aspects of the education process through systematic theory-based investigation and action.

The major focus is on attaining great understanding. Thus, action projects which intend to test or apply some aspect of theory, or which seek to increase understanding of the educational process, are highly encouraged within EPS. A wide variety of aspects of the educational process is of concern to EPS. These aspects may be defined by theory of discipline (e.g., philosophy, psychology, history of education, etc.); by function (e.g., teaching, curriculum, administration, etc.); by level of instruction (e.g., early childhood, elementary, secondary, post-secondary, etc.); by educational problems (e.g., international education, racism in education, civil rights of students and teachers, etc.) or by any other category system.

EPS operates via systematic, theory-based investigation and action. Experiments which test a theory, action projects which apply theory, and conceptual investigations which develop and combine theories are highly encouraged. Ultimately the concern of EPS is to bring systematic knowledge to bear on matters of public policy and particularly the aspects of public policy which effect the formulation and modification of educational policy.

#### **Transdisciplinary Education (TD)**

The Transdisciplinary Education cluster believes that within a complex society individual must have a basic understanding of his or her environment. This can be achieved within the school setting through the study of transdisciplinary topics such as perception, rhetoric, movement both as distinct entities and elements germane to all disciplines.

This cluster concentrates on the training of effective professionals in the fields of bilingual / bicultural education, communication arts (arts and humanities, reading and media), special education,

## School of Engineering

and transdisciplinary education / alternative schools.

Participants in Transdisciplinary education cluster programs often utilize the resources in the four other clusters in the School of Education.

Faculty members and graduate students of the cluster are committed to addressing the urgent issues of education in the 70's and to thinking and working for the strongest possible programs of undergraduate and graduate training.

### Human Development

Human Development was formerly a department in the School of Home Economics with offices in Skinner Hall. In a move to consolidate resources, the University initiated provisional affiliation of the Human Development Department with the School of Education during the fall 1974 semester. Students interested in Human Development should contact the Early Childhood Education Program in the Educational Policy Studies cluster.

The School of Engineering offers curricula in Chemical Engineering, Civil Engineering, Industrial Engineering and Operations Research, Electrical and Computer Systems Engineering, and Mechanical and Aerospace Engineering. Each of the curricula leads to the Bachelor of Science degree in that particular branch of engineering. All curricula are accredited by the Engineers Council for Professional Development.

Engineering is the profession in which a knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to utilize, economically, the material and forces of nature for the benefit of mankind. An engineer requires intensive technical training but at the same time should acquire the broad education that distinguishes the professional person from the technician. An engineer's education does not end with formal schooling but continues throughout life as experience accumulates.

The curricula in engineering have been carefully prepared to offer each student the opportunity to acquire the sound training in mathematics and the basic sciences of chemistry and physics upon which is built the work in engineering sciences. In the senior year, courses are offered which allow the use of previous training for engineering analysis, design, and engineering systems in the student's particular field of interest. About 20 percent of class time is devoted to studies in the social science and humanistic area. Some opportunity is provided to elect courses from both the technical and humanistic-social fields. The curriculum of the freshman year is the same for all. Specialization to a limited extent begins in the sophomore year.

The School contains five administrative departments, and there are a variety of optional programs available to upper-class students in each of these departments. Many of these are interdisciplinary in nature and cut across departmental lines. Thus, for example, students may concentrate in areas such as Materials, Systems, the Environment, Bioengineering, Food Engineering, Pre-Medical, Transportation, Urban Systems, and Energy.

Although the curricula within the School of Engineering are shown as eight semesters (normally four years), they require up to 130 semester hours credit

for satisfactory completion. This is well above the University minimum of 120 semester hours for a degree and it requires intensive work in mathematics, science and engineering. As a result even students in good academic standing frequently elect to extend their programs into a ninth and sometimes a tenth semester.

### Freshman Engineering

All new students in engineering are enrolled in the Freshman Engineering Program until qualified to enter into a degree program. This is normal upon satisfactory conclusion of the uniform freshman year.

#### COURSE REQUIREMENTS— Freshman Year

| First Semester                       | Credits         |
|--------------------------------------|-----------------|
| RHET 100                             | 3               |
| MATH 131                             | 4               |
| CHEM 110                             | 4               |
| ENGIN 103 or 104                     | 3               |
| Soc. Sci./Hum. Elective              | 3               |
| <b>Second Semester</b>               | <b>Credits</b>  |
| Rhetoric Elective                    | 3               |
| MATH 132                             | 4               |
| Hum., Soc. Sci. or Science Elective* | 3               |
| ENGIN 103 or 104                     | 2 or 3**        |
| PHYSIC 161                           | 4               |
| <b>Total</b>                         | <b>16 or 17</b> |

\*Students select a Humanity, Social Science, or Science course at this time. The Science Elective requires the adviser's approval and consists of a course from the following departments: Astronomy, Biochemistry, Biology, Botany, Chemistry, Entomology, Geology, Microbiology, Physics or Zoology. Past history indicates that many students who take Mathematics, Physics, and a Science elective all in one semester find the academic load difficult. The following alternatives are thus recommended:

- 1) For students who have found the first semester, freshman year, reasonably difficult and who do not yet have clearly defined ideas of what their majors will be, the choice should be a Social Science Humanity Elective.
- 2) For students who have found the first semester reasonably easy and who do not have clearly defined ideas of what their major will be (See 3 and 4 following), choice may include the Science Elective.
- 3) For students who know definitely what they will choose or think that they may possibly choose Chemical Engineering as a major, the choice should be Chemistry 112.
- 4) Students who have specific scientific interests (Biology, Geology, etc.) may choose appropriate courses in those interest areas at this time or may prefer to delay this choice until a later semester when the courses may better integrate with the work in their major fields.

\*\*Engineering 103/104—Students taking 103/104 are required to successfully complete five modules for 5

credits. An additional module for 1 credit may be taken. Two of the modules must be Computer (104) and (Computer I and II).

### **Chemical Engineering**

Chemical Engineering centers around the creation, development, design and operation of processes for bringing about chemical and certain physical changes in materials. Chemical engineers may be engaged in any of a wide range of activities concerned with converting an idea to a profit. These include research and development, economic and market analysis, design, construction, operation, production supervision, sales, technical service, and management. Basic research for new knowledge, teaching, and consulting also offer challenging and rewarding careers for many chemical engineers. Chemistry, physics and mathematics are the underlying sciences of chemical engineering and economics is its guide in practice.

Chemical engineers are in demand by industries manufacturing chemicals and also by the many related "chemical process industries," including petroleum refining and petrochemicals, plastics, synthetic fibers and textiles, pulp and paper, drugs and pharmaceuticals, natural and synthetic rubber, foods, soaps and detergents, paints and synthetic coatings, gas and coal chemicals, steel and all the metal manufacturing industries and many others. Much of the work of the atomic energy program is chemical engineering, and new fields to which chemical engineers are contributing include biomedical, environmental, and ocean engineering.

The Chemical Engineering Department has also introduced several innovations in career preparation in addition to its traditional chemical engineering program. These new developments offer much flexibility and provide the opportunity for a student to concentrate in career-oriented and interdisciplinary programs culminating in the award of an accredited B.S. degree in Chemical Engineering with emphasis in one of several chosen interdisciplinary fields of specialization. These include environmental engineering, bioengineering, food science and engineering, and business administration.

Most recently added is the new Pre-Medical Option in Chemical Engineering, which can provide an alternate and attractive route to medical school. With minor modifications in the basic chemi-

cal engineering program, a student can also satisfy the course requirements for admission to medical school. At the same time, he or she will continue to have the option open for future graduate study in chemical or biomedical engineering.

These several options and the program flexibility they represent are already attracting a substantial additional enrollment in the Chemical Engineering Department.

### **Civil Engineering**

Civil engineering is concerned with all kinds of construction — buildings, bridges, highways and railways, airports, rivers and canals, harbors, dams, pipelines, etc. Transportation, the efficient and economical transfer of people and goods from place to place, is another concern of civil engineers. They are also deeply involved in providing adequate and safe supplies of water for homes and industries, in controlling and limiting the pollution of lakes, streams and oceans, and of the atmosphere. Civil engineers have assumed major responsibilities in ocean engineering, for construction and other operations, for underwater exploitation of mineral and other resources in the seas, and for planning and organizing the transportation that will be required eventually in regions of underwater activity. Various specialized areas of civil engineering such as hydraulic engineering and fluid mechanics, soil mechanics and foundations engineering, surveying and mapping, structural engineering and materials engineering, make essential contributions to the above activities.

In every area of civil engineering there is the choice of a wide range of activities: research to obtain new knowledge, development of practical methods, utilizing existing knowledge and the results of research, designing projects which satisfy known requirements, planning for maximum economy and efficiency, construction according to plans and specifications, and operation and maintenance. In addition, civil engineers are always deeply involved in and are frequently in charge of large-scale projects which involve many fields of activity and require the coordination of activities of experts with different backgrounds such as urban planning, water resource management, and transportation systems. In general, civil engineering is a field of activity which is concerned with the

public well-being through protection and control of our environment.

### **Electrical and Computer Engineering**

Electrical engineering is the application of electrical and mathematical principles to the solution of engineering problems and to the design of the electrical and electronic equipment of the future. A wide variety of electrical systems will serve mankind by performing important and complex tasks. Modern communication systems, high speed computers, and biomedical instrumentation are just a few of the creations of electrical engineers. Because of the diversity of an electrical engineering program, our graduates are employable in sales, production, design, development, research and management positions.

The undergraduate curriculum is designed to prepare each student for work in any of these fields and to serve as a basis for further specialization. A continued study after graduation is essential in this rapidly growing field. Basic physical and systems principles are emphasized in the undergraduate program. Courses taken outside of the department in liberal arts and other engineering disciplines provide the student with a broader understanding of engineering and its relationship to other fields.

The program leading to a degree Bachelor of Science in Computer Systems Engineering is also available to interested students. This program gives broad coverage to the various aspects of computer systems engineering and its underlying mathematics. However, there is much freedom for a student to explore in depth any area of particular interest to him or her. These areas include mathematics and theory of computation, machine organization, communication electronics and device technology, numerical analysis, and theory of programming languages and syntax analysis.

Although facility in computer programming is developed in the course of the program, it is emphasized that this is only a part of the program's goal of giving the student a deep understanding of computing machines and processes of computation. Thus, courses associated with computer design and applications are included as program requirements. Further information on these programs may be obtained from the Department.

Electrical and Computer Systems Engineering.

### Industrial Engineering and Operations Research

The behavior of operating systems in our society can be subjected to scientific study, and the results can be used by engineers to improve the operations of such systems. Thus, persons with knowledge and skills in operations research and industrial engineering are found in many kinds of organizations (such as airlines, manufacturing and production companies, banks, insurance companies, government agencies, health-care institutions, consulting firms, educational institutions, and research organizations) working to understand and improve their operations. Because the problems such people work on occur at all levels in these organizations, they have unusual opportunities to become widely acquainted with the problems, functions, technologies, and policies of these organizations. Thus, IE/OR workers are found at varied levels of management.

In view of the wide variety of potential careers for IE/OR people, the curriculum is flexible. The 11 required courses in the department (33 credit hours) sketch the central concepts of the profession and provide the core of its quantitative methods. Since the areas of application (and the potential careers) are so varied, a block of nine courses (27 credit hours) is set aside so that each student may design curriculum matching his/her interests;

this segment is developed in conjunction with his/her adviser, and may emphasize an area of application or a further exploration of methods. Students completing the program are prepared to pursue professions immediately, or to enroll for further work as graduate students.

### Mechanical Engineering

Mechanical engineers use the principles of dynamics, solid mechanics, fluid and gas dynamics, heat transfer, thermodynamics, and materials science together with mathematical and computer methods for application to research, development, design, and management in industry, government, and engineering education.

Students majoring in mechanical engineering may choose from alternative options emphasizing mechanical, aerospace, or materials studies. Extensive offerings exist in energy, manufacturing and design. Mechanical engineers design and analyze a wide variety of systems in fields such as manufacturing, energy conversion, and transportation. Aerospace engineers design and analyze systems for aircraft and space such as propulsion, astrodynamical, and vehicular. Materials engineers study the atomic structure of materials, polymers, materials processing, and materials analysis. All options are fundamental and flexible so that students may prepare for either professional employment or graduate study.

The College of Food and Natural Resources, the oldest college of the University, offers a broad general education with specific training in a specialized area. Upon the completion of the requirements for the Bachelor of Science degree, the student will have devoted his or her time to pure science, social and humanistic studies, and applied sciences and technology.

Undergraduate students in the College of Food and Natural Resources are exposed to an interdisciplinary, systems-oriented, problem-solving atmosphere that has been developed to a high degree.

A broad choice of electives within most of the major programs gives the student an opportunity to prepare for a career in business, industry, education, research, government, services or production agriculture.

A unique feature of the College of Food and Natural Resources is that the faculty for all the major programs is drawn from the three divisions of the College—research, resident teaching and extension, thereby bringing depth of teaching to every student.

All departments—Food and Resource Economics; Food and Agricultural Engineering; Entomology; Environmental Sciences; Food Science and Nutrition; Forestry and Wildlife Management; Hotel, Restaurant, and Travel Administration; Landscape Architecture and Regional Planning; Plant Pathology; Plant and Soil Sciences; Veterinary and Animal Sciences and the Division of Home Economics offer graduate degrees in a discipline or professional field.

### INTERNATIONAL AGRICULTURAL STUDIES (Interdepartmental Program)

The unprecedented increase in the human population of the world makes mandatory rapid increases in world food production. Estimates indicate that total food production must double by the year 2000 to maintain our current inadequate nutritional levels and must triple if reasonable improvement is to be accomplished.

Students in this major choose a program from among those offered in the College of Food and Natural Resources and carry a specialty of International Studies within the chosen major. Supplementing major requirements are selected courses in Sociology, Anthropology, Geography, Economics, and Political Science. An overseas professional experience

rience in an agricultural development program is considered essential and students are urged to volunteer for two years of service in the Peace Corps or a similar organization upon completion of their B.S. degree.

## STOCKBRIDGE SCHOOL OF AGRICULTURE

The Stockbridge School, an academic sub-unit of the College, offers two-year technically oriented programs in the food and agricultural sciences which lead to an Associate Degree. A separate bulletin describes these offerings in detail.

### Entomology

Courses in Entomology acquaint students with all phases of insects and insect control, including apiculture and medical entomology. Trained entomologists find positions in public service and industry, such as teaching at all levels; research, quarantine, and regulatory work in a state or federal service, various roles in public health and pest control activities; research, sales and public relations work in the agricultural chemicals industry; and agriculture.

#### Freshman Year

| First Semester                   | Credits |
|----------------------------------|---------|
| CHEM 111 General                 | 3       |
| MATH 127 Calculus                | 3       |
| Rhetoric elective                | 3       |
| Humanities or Soc. Sci. elective | 3       |
| Elective                         | 3       |
|                                  | 15      |

#### Second Semester

| Second Semester                  | Credits |
|----------------------------------|---------|
| CHEM 112 General                 | 3       |
| MATH 128 Calculus                | 3       |
| ZOOL 101 Introductory            | 3       |
| Rhetoric elective                | 3       |
| Humanities or Soc. Sci. elective | 3       |
|                                  | 15      |

### Environmental Sciences

The major program in Environmental Sciences emphasizes the integration of four essential elements: 1) information via scientific disciplines; 2) analysis of the multidimensional nature of environmental problems via problem-focused, man-oriented study; 3) basic technical skills in the methods of pollution measurement; 4) participation in the predictive decision-making aspects of environmental studies. Therefore, the following

four courses are required of all Environmental Sciences majors: ENVSCI 201 (Introductory Environmental Biology), 203 (Methods of Pollution Measurement), 390 (Perspectives of Environmental Sciences), and 391 or 392 (Seminar: Options in Environmental Management). In addition to the four required courses, students will elect four more courses from the upper level offerings of the department. The 24 credit Department of Environmental Sciences requirement plus the 44 credit math/science requirement will more than satisfy the 60 credit science/math requirement for a B.S. degree.

The Environmental Sciences major will have an outside the department requirement which will provide increased breadth and program flexibility, and thus, a broader context of his or her major area of competency. With the aid of an adviser, the student will choose and plan an integrated 12 credit course of study, and thereby individualize the program according to his or her needs and interests.

#### Sample Program

| Freshman Year                    | Credits |
|----------------------------------|---------|
| BOTANY 100                       | 4       |
| CHEM 111                         | 3       |
| F&R EC 177                       | 3       |
| RHET 100                         | 3       |
| Humanities (C) or Soc. Sci. (D)  | 3       |
|                                  | 16      |
| ZOOL 101                         | 3       |
| CHEM 112                         | 3       |
| Rhetoric (B)                     | 3       |
| Humanities (C) and Soc. Sci. (D) | 6       |
|                                  | 15      |
| Sophomore Year                   | Credits |
| CHEM 261 or 263                  | 4       |
| MATH 127                         | 3       |
| ENVSCI 201                       | 3       |
| Soc. Sci. (D)                    | 3       |
| Humanities (C)                   | 3       |
|                                  | 16      |
| CHEM 262 or 264                  | 4       |
| MATH 128                         | 3       |
| ENVSCI 203                       | 3       |
| ENVSCI Elective                  | 3       |
| Conjugate Area Elect.            | 3       |

### Food & Agricultural Engineering

This professional field includes engineering activities which relate macrophysical and microphysical environments to the production, preservation and processing of food and other biological materials. The academic program quantitative and emphasizes the integration of mathematics and the physical sciences into the interpretation and solution of biological production and processing problems. Food and Agricultural engineers find professional employment in a variety of industries as well as public and private agencies engaged research and development.

#### Freshman Year

| First Semester                     | Cred. |

**Food & Resource Economics**  
**AGRICULTURAL ECONOMICS**

The program in agricultural economics is focused upon the application of principles of economics and business management to the problems of supplying agricultural businesses and the production and marketing of agricultural products. Growing demand for food and fiber products, both for domestic and foreign consumption, increases the importance of planning and management in the production and marketing of these products. Continual improvements in the efficiency of agricultural production and marketing are necessary to sustain a growing economy.

The rapidly changing agricultural industry offers increasing opportunities for students with specialized training in agricultural economics, as executives of marketing firms, farm supply organizations and food processing concerns. There are many other opportunities available to graduates in teaching and research, and in administrative positions in public service. Some graduates find well paying and rewarding positions in farm management operations.

**Freshman Year**

| First Semester                              | Credits |
|---------------------------------------------|---------|
| RIHET 100, or 110 (B)                       | 3       |
| Humanities (C)                              | 3       |
| Social Science (D)                          | 3       |
| MATH 110 El. Tech. of Math <sup>1</sup> (E) | 3       |

<sup>1</sup>A more advanced mathematics course may be substituted, based on counselling.  
<sup>2</sup>Calculus is recommended, especially for students intending to apply for graduate school

**FOOD MARKETING ECONOMICS**

The food distribution industry is the largest single industry in the nation in terms of the number of persons employed and dollar sales. Our growing population and incomes create ever-increasing demands for food and food products. The industry must also be sensitive to chang-

ing needs and desires of consumers, and to efficiency in distribution if consumers are to have available to them the variety and quality of food products desired at reasonable prices.

The number of managerial and executive positions in the food industry is growing at a rapid rate as a result of the growth of the industry and increasing application of scientific management. There are also growing opportunities in educational, research and regulatory positions with firms and agencies serving the public and the food industry.

**Freshman Year**

<sup>1</sup>A more advanced mathematics course may be substituted, based on counselling.  
<sup>2</sup>Calculus is recommended, especially for students intending to apply for graduate school

**RESOURCE ECONOMICS**

Increasing population and incomes combine to multiply the pressures on our land, water and other natural resources. As these pressures mount, careful planning and regulation will be required to insure a desirable allocation of land and water resources so that the demand for all uses (residential, industrial, agricultural, recreation, waste disposal and others) will be met. These needs must be met concurrently with an improvement in the quality of our living environment.

The Resource Economics program is designed to train students to assist in making public and private decisions on resource development and management which will contribute to the twin goals of greater resource productivity and improved environment. Students will study the many problems of resource use, the forces which have combined to create these problems, and the possible solutions to these problems. Training in

economic decision-making and the technical characteristics of specific natural resources provide a unique competence for these nationally important careers.

**Freshman Year**

| First Semester                              | Credits |
|---------------------------------------------|---------|
| RIHET 100, or 110 (B)                       | 3       |

|------------------------------------------|---------|
| Rhetoric (B)                             | 3       |
| Humanities (C)                           | 3       |
| Social Science (D)                       | 3       |
| Math or Natural Science <sup>2</sup> (E) | 3       |
| F&R EC 206 Agricultural Economics        | 3       |
|                                          | 15      |

<sup>1</sup>A more advanced mathematics course may be substituted, based on counselling.  
<sup>2</sup>Calculus is recommended, especially for students intending to apply for graduate school

**Food Science & Nutrition**

Two majors are available in the Department: Food Science and Human Nutrition.

A major in Food Science provides scientific and technological training in the principles concerned with the processing, preservation, and packaging of foods and food products. The student's training is directed to the application of modern science and technology to research and to the manufacturing and distribution of foods. Major fields open to graduates include: 1) product research and development; 2) food processing and packaging; 3) technological work and research in government, industry and education; 4) advanced graduate study.

The curriculum in Food Science is designed to provide flexibility to meet the interests and objectives of the student as well as the opportunity to obtain professional training as recommended by the Institute of Food Technologists.

Six options are available in the food Science major: 1) Nutrition, 2) Business, 3) Processing and Engineering, 4) Chemistry, 5) Microbiology, 6) Independent Concentration.

A major in Human Nutrition provides an understanding of the problems of nutritional well-being which are of increasing concern to all segments of society. Undernutrition and deficiency

diseases exist in the developing nations, and at the same time the richer nations suffer from obesity and degenerative diseases.

The program in Human Nutrition leads to an understanding of the causes of some of our present problems in nutrition and suggestions for their alleviation. The varied career opportunities open to students with training in nutrition include research, community service, product development and demonstration, hospital dietetics and food service administration.

Four options are available in the Human Nutrition major: 1) Community and Public Health Dietetics, 2) Dietetics, 3) Computerization, 4) Independent Concentration.

#### Freshman Year

| First Semester       | Credits |
|----------------------|---------|
| RHET 100 or 110      | 3       |
| CHEM 111             | 3       |
| MATH 127             | 3       |
| Electives (C) or (D) | 6       |
|                      | 15      |

#### Second Semester

| Rhetoric             | Credits |
|----------------------|---------|
| CHEM 112             | 3       |
| MATH 128             | 3       |
| FS&N 251             | 3       |
| Electives (C) or (D) | 3       |
|                      | 15      |

#### Forestry & Wildlife Management FISHERIES BIOLOGY

Fisheries Biology is concerned in its broadest terms with the management of the aquatic environment in both freshwater and marine situations leading to maximum sustained yields of both sport and commercial catch. It deals with the management of resources and with fundamental factors affecting the biology of species from a research point of view.

Government, state, and federal, provides the largest number of career opportunities, although more recently private consulting groups are hiring significant numbers of undergraduates.

#### Freshman Year

| First Semester                        | Credits |
|---------------------------------------|---------|
| RHET 100 Language and Writing         | 3       |
| MATH 127 Calculus                     | 3       |
| BOTANY 100 Intro.                     | 3       |

| NAREST 100 Cons. of Natural Resources | 3       |
|                                       | 15      |

#### Second Semester

| RHET 110 Language and Speaking | Credits |
|--------------------------------|---------|
| MATH 128 Calculus              | 3       |
| ZOOL 101 Introductory          | 3       |
| CHEM 112 Inorganic             | 3       |
| Social Sci. Elective           | 3       |
|                                | 15      |

#### FORESTRY

This major is concerned with the conservation and management, for the public benefit, of forests, park lands, and other open space through the production of wood, water, wildlife, and amenity values such as recreation and aesthetics.

The curriculum in Forestry is based on the biological, physical and natural sciences; a knowledge of the environment; and the social sciences. Six curricular options are offered: General Forestry, Environmental-Urban Forestry, Forest-Business Management, Forest Hydrology, Forest Recreation, and Forest Science.

This accredited program prepares graduates for continued education at the graduate school level, and for employment with private industry, federal and state resource agencies, secondary school education, conservation and planning organizations.

#### Freshman Year

| First Semester                        | Credits |
|---------------------------------------|---------|
| RHET 100 Language and Writing         | 3       |
| MATH 127 Calculus                     | 3       |
| CHEM 111 Inorganic                    | 3       |
| BOTANY 100 Intro.                     | 3       |
| NAREST 100 Cons. of Natural Resources | 3       |
|                                       | 15      |

#### Second Semester

| Rhetoric Elective  | Credits |
|--------------------|---------|
| MATH 128 Calculus  | 3       |
| CHEM 112 Inorganic | 3       |
| Humanities         | 3       |
| Social Science     | 3       |
|                    | 15      |

#### NATURAL RESOURCE STUDIES

A non-professional curriculum designed for students who wish to become generalists in the area of natural resource management and conservation, rather than specialists. Its primary objective is the education of an informed layman; it will not normally qualify students for employment within specific areas of the

natural resource field. The curriculum has a minimal core of specified course and offers great flexibility. Careful guidance coupled with early decisions will enable students to enter certain professional specialties and/or graduate school.

#### Freshman Year

| First Semester               | Credits |
|------------------------------|---------|
| RHET 100 or 110              |         |
| NAREST 100 Cons. Nat. Res.   |         |
| BOTANY 100 or ZOOL 101       |         |
| MATH (on basis of tests)     |         |
| Humanities or Social Science |         |

#### Second Semester

| Rhetoric Elective            | Credits |
|------------------------------|---------|
| Natural Resource Elective    |         |
| BOTANY 100 or ZOOL 101       |         |
| CHEM 110 (or higher)         |         |
| Humanities or Social Science |         |

#### WILDLIFE BIOLOGY

The first professional degree in Wildlife Biology is the Master of Science; for this reason study toward the Bachelor of Science in Wildlife Biology should be regarded as pre-professional. Students planning to enter graduate school are urged to meet with their advisers.

#### Freshman Year

| First Semester    | Credits |
|-------------------|---------|
| RHET 100 or 110   |         |
| MATH 127 Calculus |         |

|-----------------------|---------|
| MATH 128 Calculus     |         |
| CHEM 112 General      |         |
| ZOOL 101 Introductory |         |
| ECON 103              |         |

#### WOOD SCIENCE & TECHNOLOGY

The program in Wood Science & Technology emphasizes studies in the nature and properties of wood, the engineering and chemical technology of its manufacture into a variety of useful products, and the business aspects of industrial management and marketing. Strong demand

dist for graduates in wood-processing  
rms and service-related industries, and  
marketing and merchandising.

**Freshman Year**

| First Semester               | Credits |
|------------------------------|---------|
| HET 100 Language and Writing | 3       |
| MATH 123 Calculus            | 3       |

| NGIN 104 Introductory         | 2       |
|                               | 14      |

**Home Economics**

The Division of Home Economics offers undergraduate programs emphasizing a liberal education in the sciences, arts and humanities, with specialized instruction and preparation indigenous to professional career options in Home Economics.

Professional home economists serve individuals, families and communities throughout the world through elementary, secondary, postsecondary schools and colleges, cooperative extension programs, employment in major business organizations and agencies, journalism, radio and television. Some of the representative types of professional activities engaged in by home economists are, therefore, teaching, research, journalism, aesthetics, fashion marketing, food service management and product development, as well as cooperative extension and community-service-oriented activities in social welfare and rehabilitation programs. The Bureau of Labor in its recent publication of *Occupational Outlook Handbook* stated that the decade of the 70s could be very favorable in terms of employment opportunities for the home economist particularly in teaching and service-oriented occupational fields.

The professional options in the Division of Home Economics include the following:

- Home Economics Education
- Fashion Marketing
- Home Economics Cooperative Extension

**4) Consumer Economics**

**5) Community Services**

Individualized interdisciplinary programs may be pursued in consultation with the Director of the Division and under the advisorship of a faculty committee.

Programs for majors in the Division of Home Economics for the Freshman year:

**HOME ECONOMICS EDUCATION OR FASHION MARKETING**

| First Semester                          | Credits |
|-----------------------------------------|---------|
| RHET 100                                | 3       |
| PSYCH 101 or SOCIOL 101 or ECON 100     | 3       |

| Electives                                   | 6       |

**Hotel, Restaurant & Travel Administration**

The curriculum in Hotel, Restaurant & Travel Administration provides technical and professional courses for persons

who plan a career in ownership, management, or sales in the hotel/motel, food service, and travel fields. In addition to the required core curriculum courses, students take courses in accounting and control; personnel and management; food planning, purchasing, preparation, and service; promotion, merchandising and sales; kitchen planning and maintenance, travel and tourism. Emphasis is on principles, analysis, computer application, and decision-making.

**Freshman Year**

| First Semester                | Credits |

**Landscape Architecture & Regional Planning**

**ENVIRONMENTAL DESIGN**

The Department of Landscape Architecture and Regional Planning offers a non-professional program in Environmental Design which prepares students for professional study at the graduate level in Planning and / or Landscape Architecture. It provides, also, an introduction to the problems of the planning for and the design of the physical environment for those not intending to pursue graduate study.

While the professions of Planning and of Landscape Architecture each has its own special outlook, they often merge in intent and process. Landscape Architecture is a design profession and may be viewed as the conscious ordering of plants, buildings, roads, walks and other related structures in three dimensional space to further human purposes. The Landscape Architect brings a concern for people, for the natural environment and for visual quality to bear on that ordering.

The Planner is responsible for developing alternative methods of achieving community and/or regional goals, and for anticipating the future impact of each of those alternatives. There are many kinds of planners, and planning can be approached from many disciplines. This department is concerned with city and regional planning. It emphasizes the constraints and opportunities provided by land as the primary resource base. By selecting appropriate courses in other departments, the student may stress, also, social, economic and/or political factors which influence planning at various governmental levels.

Students who are interested in Planning and/or a general introduction to problems of the physical/visual environment should select courses under the parent major: Environmental Design; those interested in Landscape Architecture should select courses under the Option in Design Studio, which has limited enrollment.

A 2.0 cumulative quality point average is required for admission as a major in this department. Admission to the Design Studio Option and to the senior year studio courses is based on the following criteria: 1) Demonstrated aptitude in design; 2) an overall cumulative average of not less than 2.50; 3) a cumulative average in departmental courses of not less than 3.00; and 4) permission of the design faculty.

Aptitude in design is measured through a one-day testing program taken at the end of the Sophomore year. Interested Sophomores and potential transfer students should sign up during the Spring Counselling Period for the tests which are given on several occasions in late May.

Freshmen and Sophomores should concentrate on fulfilling University core requirements. Some recommended courses are:

for *Env. Des. majors*: HIST 150, 151; ECON 103; POL SCI 220; PSYCH 101; SOCIOLOGY 103; BOTANY 100; GEOL 101; STATIS 231, 232.  
for *Design Studio Opt.*: ART 100, 111, 113; ANTH 104; SOCIOLOGY 103; PSYCH 101; BOTANY 100 or 121; GEOL 101.

#### PARK ADMINISTRATION

The Department of Landscape Architecture & Regional Planning offers a program in Park Administration which, depending upon student interest, pre-

pares the student for management positions in parks administered at the municipal/regional, the state, and the federal levels of government. The Park Administrator is involved in park and open space planning and development, and in the management of such areas so as to insure their high quality environments over the long range.

A 2.0 cumulative quality point average is required for admission as a major in this department. Freshmen and Sophomores should concentrate on fulfilling University core requirements. Certain core courses are required for this major and others are recommended as follows: *Required*: PSYCH 101; SOCIOLOGY 101; BOTANY 100 or 121; STATIS 231  
*Recommended*: HIST 150, 151, 333; POL SCI 219 or 220; BOTANY 221; GEOL 101; STATIS 232.

#### Plant Pathology

Plant Pathology is concerned with the nature and control of plant diseases caused by fungi, viruses, bacteria, nematodes, certain higher plants and unfavorable environmental conditions. Plant pathologists fill positions in public service and in industry, such as teaching at all levels; research in state, federal, university, and industrial laboratories and experiment stations; and Extension Service, through federal, state and county organizations. They are also employed in quarantine and regulatory work, in various roles in plant disease control, and in sales and public relations work.

\*On basis of placement tests at time of summer counseling.

#### Plant & Soil Sciences

The Department of Plant & Soil Science offers three options for major students. Options are selected on the basis of student interest and career goals.

**Plant Industry** - With the increasing emphasis and demand for high quality food and more aesthetically pleasing surroundings, the plant industry curriculum provides students with the scientific basis of soil and plant relationship necessary for meeting these needs of society. The curriculum provides a general knowledge of economic plants and by careful selection of courses, program are developed in the following specialized areas:

**Agronomy** is the study of forage and grain crops which produce the basic food supply for both human and animal consumption. The demand for trained people is strong due to the shortage of food and fiber in relation to expanding world population.

**Floriculture and Ornamental Horticulture** is the study of plants which make our nation a more beautiful place in which to live. With more leisure time and emphasis being placed on the quality of life, the demand for people trained in the production and use of flowers and ornamental plants will remain strong.

**Pomology** is the study of the production and storage of high quality fruit. The demand for trained people will continue as long as people have need for fruit with delightful flavors and aromas, as well as nourishing food.

**Vegetable Crops** is the study of vegetable food plants that supply good nutrition and variety to diets. Persons trained in production, storage and marketing of these important food plants will continue to be in demand.

**Turf Management** is the study of grasses used for lawns, parks, golf courses, roadsides, athletic fields and other recreational areas. With more leisure time and expanding recreation opportunities, the demand for trained people will continue.

#### Freshman Year

| First Semester                | Credits |
|-------------------------------|---------|
| RHET 100, Lang. & Writing     |         |
| or RHET 110, Lang. & Speaking |         |
| BOTANY 100, Intro. Botany     |         |
| *Mathematics                  |         |
| PLSOIL 110, Plant Propagation |         |
| "D" Course                    |         |

| Second Semester             | Credits |
|-----------------------------|---------|
| Rhetoric "B" Course         | 3       |
| "C" Course                  | 3       |
| CHEM 110, Gen. Inorganic    | 4       |
| PLSOIL 100, Basic Plt. Sci. | 3       |
| "D" Course                  | 3       |
|                             | 16      |

\*Mathematics - On the basis of placement tests at time of summer counseling. Statistics or Computer Science may be substituted for mathematics.

**Plant Science** - In today's world there is a great need for highly trained people in the plant sciences to teach and study the fundamental physiological and genetic processes taking place within plants. A more complete understanding of these processes and the influence of environmental factors upon them will lead to a significant improvement in the supply and quality of food and fiber. Students who are interested in such careers as plant breeder and geneticist, secondary and college teaching, research and resource development and like professions should major in Plant Science. This option is designed to provide the breadth and depth in basic biological and physical sciences and mathematics necessary for graduate study and the essentials of plant industry.

| First Semester                                          | Credits |
| RHET 100, Lang. & Writing or RHET 110, Lang. & Speaking | 3       |
| BOTANY 100, Intro. Botany                               | 4       |
| *Mathematics                                            | 3       |
| PLSOIL 110, Plant Propagation                           | 3       |
| "D" Course                                              | 3       |
|                                                         | 16      |
| Second Semester                                         | Credits |
| Rhetoric "B" Course                                     | 3       |
| "C" Course                                              | 3       |
| *Mathematics                                            | 3       |
| PLSOIL 100, Basic Plt. Sci.                             | 3       |
| "D" Course                                              | 3       |
|                                                         | 15      |

\*On the basis of placement tests at time of summer counseling.

**Soil Science** - Soil Science deals with the physical, chemical and biological properties of soils as well as their relationship with higher plants. Students trained in this area become soil chemists, soil physicists, soil microbiologists,

hydrologists, and soil conservationists. Graduate study is desirable for professional careers in soils and the soils curriculum is designed to provide the necessary breadth and depth in biological and physical sciences and mathematics for graduate study.

| Freshman Year                                           |         |
|---------------------------------------------------------|---------|
| First Semester                                          | Credits |
| RHET 100, Lang. & Writing or RHET 110, Lang. & Speaking | 3       |
| BOTANY 100, Intro. Botany                               | 4       |
| *Mathematics                                            | 3       |
| PLSOIL 110, Plant Propagation                           | 3       |

|                                                         | 16      |
| Second Semester                                         | Credits |
| Rhetoric "B" Course                                     | 3       |
| "C" Course                                              | 3       |
| *Mathematics                                            | 3       |
| PLSOIL 100, Basic Plt. Sci.                             | 3       |
| "D" Course                                              | 3       |
|                                                         | 15      |

\*Mathematics - On the basis of placement tests at time of summer counseling. Statistics or Computer Science may be substituted for mathematics.

### Veterinary and Animal Sciences

The curriculum in the Animal Sciences, including poultry, is designed to provide fundamental training and knowledge in the comparative nutrition, physiology, genetics, and management of various classes of livestock and to understand the role of animal production in the national and world economy. Options emphasizing commercial animal production are supported by electives in agricultural economics, agricultural engineering, and business administration. Students interested in graduate work in such specialized areas of the animal sciences as nutrition, physiology or genetics should elect programs with stress on the sciences. Freshman pre-veterinary students in the College of Food and Natural Resources usually major in Animal Sciences, but may choose other departments if appropriate to the students' interests. Those who by their work in the first year demonstrate a potential for success should apply to the Pre-Professional Advisory Committee for admission into the pre-veterinary program (see page 50 under heading Pre-Dental, Pre-Medical, etc. for additional information). All pre-veterinary stu-

dents, regardless of major, are counseled by the pre-veterinary adviser in the Animal Sciences Department.

### Freshman Year

| First Semester        | Credits |
|-----------------------|---------|
| AN SCI 121 Introduct. | 3       |
| BOTANY 100 General    | 3       |
| CHEM 111 General      | 3       |
| *Mathematics          | 3       |
| RHET 100              | 3       |
|                       | 15      |

| Second Semester   | Credits |
|-------------------|---------|
| Elective          | 3       |
| CHEM 112 General  | 3       |
| *Mathematics      | 3       |
| Social Sci.       | 3       |
| Rhetoric Elective | 3       |
|                   | 15      |

\*On basis of placement tests at time of summer counseling.

## School of Health Sciences

The School of Health Sciences includes the Division of Nursing, the Division of Public Health, and the Department of Communication Disorders.

### Division of Nursing

The Division of Nursing offers an undergraduate program which leads to the degree of Bachelor of Science in Nursing (B.S.N.). This program is approved by the Board of Registration in Nursing, Commonwealth of Massachusetts, and is accredited by the National League for Nursing. Enrollment in recent years has been highly competitive, and is currently limited to 200 students per class. There will be no admissions to this program for the 1977-78 academic year.

There are two components of the program: 1) lower division core and university core requirements; and 2) the upper division nursing science major. Nursing core may be completed at the University of Massachusetts or in other colleges / universities. Nursing science courses (Junior and Senior Year) emphasize the role and functions of the professional nurse in assisting individuals and families to identify and/or to cope with their physical, psychosocial and environmental problems; in promoting and maintaining individual and family health; in providing primary and secondary health care to individuals and families augmented by the use of extended nursing functions and in providing continuity of care for patients and families.

Clinical learning experiences are community based in four Satellite Learning Centers. These Centers are located in the following geographic areas:

- a) Amherst-Northampton
- b) Franklin County
- c) Springfield-North
- d) Model Cities-Springfield

Students are responsible for their own transportation to the Satellite Learning Centers.

Currently, the undergraduate faculty is in the process of implementing new programs which are responsive to changing health needs and educational patterns.

### Requirements for Admission and Application Procedure

The requirements for admission to the upper division are: 1) successful completion of 60 semester hours of lower division preparation; 2) a minimum cumula-

tive grade point average of 2.5; 3) achievement of a grade of at least "C" in each pre-requisite course; and 4) a minimum grade point average of 2.5 for all core courses.

Students with a variety of academic and nursing backgrounds may apply for admission. Students may have earned credits in other colleges/universities in the Arts and Sciences or they may satisfy these requirements by satisfactorily completing CLEP (College Level Entrance Proficiency) Examinations in certain Arts and Science subjects, such as Chemistry, Microbiology, etc. (The University requires 45 semester hours credits to be taken in residence.)

The National League for Nursing Comprehensive Examinations will be used for guidance and placement in the program. Students in the major will be expected to take all senior level nursing science courses.

All students seeking admission and information concerning examination details and requirements should contact the Admissions Office or the Division of Nursing, who are available for individual counselling. All nursing students will be assigned a faculty adviser in the Division of Nursing.

The Division of Nursing is committed to Affirmative Action guidelines of the University of Massachusetts. Students lacking the required cumulative grade point average may apply for tutorial assistance.

### General Academic and Core Requirements for the Baccalaureate Program in Nursing

- 1) General Academic Requirements: Courses which satisfy University Core Requirements are:

Rhetoric — two courses  
Social and Behavioral Sciences — three courses  
Natural Sciences — three courses  
Humanities — three courses

In counselling sessions with an academic adviser, guidance will be offered in course selection.

- 2) Core requirements to the nursing major are starred (\*) as follows: Certain flexibility of sequence is possible within the following suggested framework, but the student should be aware of prerequisites to required courses.

### Freshman Year

#### First Semester

CHEM 111  
Humanities  
Rhetoric  
\*Anthropology  
\*Physics

Credit

#### Second Semester

CHEM 112  
Rhetoric  
\*Statistics (Applied)  
\*HUMDEV 370  
\*Perspectives in Nursing and Allied Health Sciences (Interdisciplinary Approach)

Credit

### Sophomore Year

#### First Semester

\*Human Anatomy and Physiology  
\*MICBIO 140  
\*PHIL 125 (Logic)  
\*Biochemistry  
\*PSYCH 101

Credit

#### Second Semester

\*Human Anatomy and Physiology  
SOCIO 101  
Humanities  
\*Principles and Skills Basic to Professional Nursing and Health Care of People

Credit

### Division of Public Health

The curriculum in Public Health designed to prepare students for health career opportunities or further study in environmental health, community health, and health education, health laboratory science, and medical technology. Students are expected generally follow the course sequences outlined below during their freshman year. minimum of 30 credits is required of students for the Bachelor of Science degree. Credits from other University departments are included in these major credits.

### ENVIRONMENTAL HEALTH

Designed to prepare for career opportunities in radiological health, industrial hygiene, environmental sanitation, occupational health, public health laboratory etc., or further study at the graduate level.

requiring specific technical knowledge and competence.

#### Freshman Year

| First Semester          | Credits |
|-------------------------|---------|
| RHET 100 or 110         | 3       |
| MATH 127 Calculus       | 3       |
| CHEM 111                | 3       |
| ZOO 101 (General)       | 3       |
| PSYCH 101 or SOCIOL 101 | 3       |
|                         | 15      |

| Second Semester         | Credits |
|-------------------------|---------|
| RHET 100 or 110         | 3       |
| MATH 128 Calculus       | 3       |
| CHEM 112                | 3       |
| ZOO 203                 | 3       |
| SOCIOL 101 or PSYCH 101 | 3       |
|                         | 15      |

\*May be taken either semester

If a language is elected, intermediate proficiency is required.

#### COMMUNITY HEALTH AND HEALTH EDUCATION

Designed to prepare the first level career opportunities in community health education, health services administration, health medical administration, health program development, epidemiology, health statistics, school health teaching, etc., or for further study at the graduate level requiring specific professional competence.

#### Freshman Year

| First Semester          | Credits |
|-------------------------|---------|
| RHET 100 or 110         | 3       |
| MATH 127 Calculus       | 3       |
| CHEM 111                | 3       |
| ZOO 101 (General)       | 3       |
| PSYCH 101 or SOCIOL 101 | 3       |
|                         | 15      |

| Second Semester         | Credits |
|-------------------------|---------|
| RHET 100 or 110         | 3       |
| MATH 128 Calculus       | 3       |
| CHEM 112                | 3       |
| SOCIOL 101 or PSYCH 101 | 3       |
| Elective                | 3       |
|                         | 15      |

\*May be taken either semester

\*With approval of advisor may take CHEM 101-102  
b an extra science or public health course will be required.

Elective chosen from Humanities.

If a language is elected intermediate proficiency is required.

#### MEDICAL TECHNOLOGY

The curriculum in medical technology consists of a three-year program followed by a 12-month internship in an accredited school of medical technology affiliated with the University.

After successful completion of the 12-month internship and after satisfying the requirements of the Division, a student will receive a Bachelor of Science degree in medical technology. A total of 130 academic credits is necessary for graduation with this option.

The few clinical facilities available for students in medical technology place limitations on the numbers of students who can major in medical technology. Consequently, beginning in January, 1974, with the class of 1978, students will not be admitted to the medical technology program until they have:

1) Completed a minimum of 48 credits including the course outlined below in the freshman year in the health laboratory sciences curriculum.

2) Registered for an additional 16 specified credits for the second semester of the sophomore year.

3) Submitted an application for admission to the Director of the medical technology program prior to March 1 of the year they wish to enter the program. (Applications are available from the Director of the medical technology program in the School of Health Sciences.)

Students are eligible for a major in medical technology in their junior year. Entering freshmen who express an interest in medical technology will be accepted in the Division of Public Health, School of Health Sciences as majors in the health laboratory science curriculum.

#### Freshman Year

| First Semester | Credits |
|----------------|---------|
| RHET 100*      | 3       |
| CHEM 111       | 3       |
| MATH 127**     | 3       |
| ZOO 101        | 3       |
| Elective*      | 3       |
|                | 15      |

| Second Semester | Credits |
|-----------------|---------|
| CHEM 112        | 3       |
| MATH 128        | 3       |
| RHET 110*       | 3       |
| Elective*       | 3       |
| Elective*       | 3       |
|                 | 15      |

\*Can be taken either semester

\*\*Precalculus mathematics (MATH 101, 102, and/or 103) available for students with elementary functions, and/or trigonometry.

#### HEALTH LABORATORY SCIENCE

Designed to provide a professional preparation in the general area of health laboratory science. Graduates are eligible for laboratory positions in hospitals, clinics, health departments, pharmaceutical firms and medical research foundations. Students completing this curriculum will also complete requirements established by the American Society of Clinical Pathologists for submitting applications to approved schools of medical technology offering clinical internships.

#### Freshman Year

| First Semester | Credits |
|----------------|---------|
| RHET 110*      | 3       |
| CHEM 111       | 3       |
| MATH 127**     | 3       |
| ZOO 101        | 3       |
| Elective*      | 3       |
|                | 15      |

| Second Semester | Credits |
|-----------------|---------|
| CHEM 112        | 3       |
| MATH 128        | 3       |
| RHET 110*       | 3       |
| Elective*       | 3       |
| Elective*       | 3       |
|                 | 15      |

\*Can be taken either semester

\*\*Precalculus mathematics (MATH 101, 102, and/or 103) available for students with elementary functions, and/or trigonometry

#### Department of Communication Disorders

The undergraduate Communication Disorders curriculum has a pre-professional orientation. Freshman and sophomore years are devoted primarily to the completion of the general University requirements. Junior and senior students receive training in the normal communicative processes, the disorders of speech and hearing, and the management of various problems. The program provides background for the student to attend advanced graduate training toward academic and clinical competence.

A minimum of 30 major credits is required of all students for the Bachelor's degree.

# School of Physical Education

The School of Physical Education includes the Departments of Exercise Science, Professional Preparation in Physical Education, Sport Studies and Athletics. It offers an undergraduate major in Physical Education and graduate programs in Exercise Science and Sport Studies. Other programs in the School include the general physical education program, the intramural sport program and the intercollegiate athletic program.

## GENERAL PHYSICAL EDUCATION PROGRAM

This program offers instruction in sport and other forms of physical activity to all students in the University.

One of the few certainties facing college graduates is that they will be continually faced with choices regarding physical activity. Burgeoning leisure time, increasing spectator interest in sport, increasing opportunity to participate in life-time sports such as golf, tennis, and bowling, as well as jogging and fitness programs, and increasing exposure to concern of medical people, particularly cardiologists, about inactivity, insure continued contact with the idea of physical activity and sport.

Some students enter the University with a background that enables them to fully appreciate and achieve satisfaction from participation in a sport and/or physical activity program. However, others are limited by insufficient preparation at earlier age levels. The General Physical Education Program offers: 1) the opportunity for self-assessment in terms of skill competencies and fitness components and 2) the opportunity to gain the ability to assess and interpret a wide variety of programs involving sport and physical activity as they relate to the individual's well-being.

The student has almost unlimited choice in selecting specific courses from those in sport skill and conditioning, as well as theoretical courses (classroom instruction and laboratory work) probing the "why" of sport and physical activity.

### Majors' Program

Departments within the School of Physical Education cooperatively offer a co-educational program for those students who wish to pursue physical education as a major. Students may elect to follow either the teacher education program or the related disciplines program which includes study in exercise science or

sport studies. The teacher education option offers further opportunity for specialization. A student may select a concentration in secondary education or elementary education. Similarly, concentrations available through the related disciplines program are exercise science and sport studies.

Each student is expected to select an area of concentration during the sophomore year. During the first two years of study, essentially the same for all majors, students fulfill the University core requirements and the physical education core requirements. The physical education core consists of the following courses:

| Courses                              | Credits |
|--------------------------------------|---------|
| EXC SCI 204 — Human Anatomy          | 3       |
| EXC SCI 205 — Kinesiology            | 3       |
| Prerequisite: Exc. Sci. 204          | 3       |
| EXC SCI 278 — Physiology of Exercise | 3       |
| Prerequisite: Zoology 135            |         |

A student will select three of the following four courses:

|                                                        |            |
|--------------------------------------------------------|------------|
| SPORST 200 — Sociology of Sport and Physical Activity  |            |
| Prerequisite: Sociol. 107                              | 3          |
| SPORST 201 — Psychology of Sport and Physical Activity |            |
| Prerequisite: Psych. 101                               | 3          |
| SPORST 202 — History of Sport and Physical Activity    |            |
| Prerequisite: History 100, 101, 150, or 151            | 3          |
| SPORST 203 — Philosophy of Sport and Physical Activity |            |
| Prerequisite: Phil. 105                                | 3          |
| Activity Courses                                       | *14        |
| <b>Total</b>                                           | <b>*32</b> |

\*Only 8 of the 14 credits in Activity Courses will generally be taken during the first two years. Thus the student actually completes 26 credits in the physical education core during the freshman and sophomore years.

The recommended program for these first two years of study is as follows:

### Freshman Year

| First Semester                | Credits |
|-------------------------------|---------|
| Elective (C, D, E) (Select 2) | 6       |
| ZOOL 101 Intro. Zool.         | 3       |
| P.E. Activity                 | 2       |
| RHET 100 or 110               | 3       |
|                               | 14      |

### Second Semester

Elective  
Electives (C, D, E) (Select 2)  
ZOOL 135 Intro. to Physiology  
P.E. Activity  
Rhetoric Elective

Electives: Soc. 101 (D), Psych. 101 (D), Hist. 100 or 1 (C), Phil. 105 (C). These are prerequisites to Physical Education Core Courses.

### Sophomore Year

First Semester  
EXC SCI 204 Human Anatomy  
\*SPORST 200, 201, 202, 203 (Select any 2)  
P.E. Activity  
Elective

Second Semester  
Elective  
EXC SCI 205 Kinesiology  
\*SPORST 200, 201, 202, 203 (Select any 1)  
P.E. Activity  
EXC SCI 278 Phys. of Ex.

\*The student must take 3 of these 4 courses during the sophomore year. They may be taken in any order provided the prerequisites have been met.

### Leisure Studies and Services

The professional in leisure services is a diagnostician of the leisure needs of people and a developer and provider of opportunities to meet these needs. He or she works primarily at the executive, administrative and supervisory levels, although a few settings involve more direct program leadership.

Options are available leading to a variety of careers in voluntary and youth serving organizations, college union, military establishments, municipal and other governmental agencies, and commercial and private enterprises; as well as in hospitals and other institutions and agencies dealing with the mentally retarded, emotionally disturbed, physically handicapped, and other types of dependents. An option in environmental interpretation includes suboptimal emphasizing natural history and environment, American history, archaeology, or natural resources planning and management, and outdoor education.

The curriculum presented below represents a core program. After becoming

## Division of Military and Air Science

familiar with the various career opportunities, the student and adviser select an appropriate current option or develop an innovative plan to fit unique goals. Recent examples of the latter include leisure services in the inner city, community resources for recreation, leisure services in correctional agencies, outdoor recreation, and outward bound leadership. In each case a coordinated group of courses totalling 15 credits is selected by the student and adviser to constitute the program.

The student majoring in Leisure Studies and Services is also encouraged to gain as much practical non-credit experience as possible through volunteer service, as well as part-time and seasonal employment in several settings and with varied types of participants.

### Freshman Year

| First Semester                      | Credits |
|-------------------------------------|---------|
| PS 101, Man and Leisure             | 3       |
| WRIT 100, Language and Writing, or  |         |
| WRIT 110, Language and Speaking     | 3       |
| Humanities & Fine Arts Elective (C) | 3       |
| Math. or Nat. Science Elective (E)  | 3       |
| Social Elective (D)                 | 3       |
|                                     | 15      |
| Second Semester                     | Credits |
| PS 111, Leisure Activity Analysis   | 3       |

### Athletics

Members of the athletic department are responsible for the conduct and administration of the various phases of intercollegiate and intramural athletic programs.

### Air Science

The Department of Air Science offers courses of general interest to the University student and of specific interest to both male and female students who would like to prepare for and serve as officers on duty with the U.S. Air Force. This service may consist of either active duty with the regular forces or reserve duty with selected Air National Guard or U.S. Air Force Reserve units. The curriculum is designed to study the need for military forces, their nature, organization, and mission (with emphasis on the Air Force), and the nature of service as a professional Air Force officer. Courses encourage critical thinking, imagination, and a high degree of student involvement. Participation in the ROTC programs is voluntary. Uniforms and textbooks are provided. Students may register for ROTC courses at the same time they register for other University courses. No formal application is required.

The Department offers two separate programs designed to meet student needs, a four-year program for students desiring to learn more about the military, and a two-year program designed primarily for transfer students who have already decided to enter the military.

There are two major phases in the four-year program curriculum. The first phase is the General Military Course (GMC) which forms a single unit consisting of two courses offered during the freshman and sophomore years. The studies cover the nature and causes of international conflict, the functions and employment of U.S. military forces, and the historical development of air power. This first phase carries no service commitment and is an excellent way for students to study the military and decide if they want to continue on for an Air Force commission. Enrollment in the GMC confers no military status on the student. These courses meet for one classroom hour and one Corps Training hour per week.

In the summer between the sophomore and junior years, students who have decided to continue the program and are selected for entry attend a four-week field training session at an Air Force installation.

The second phase of the four-year program is the Professional Officer Course (POC) taken during the junior and senior years. Enrollment depends

upon academic and medical qualification and selection by the department. In the POC, academic concentration is on preparation for service as an Air Force officer, and deals with defense policies in the contemporary world, civil-military relations, Air Force leadership at the junior officer level, military management, and military law. The development of communicative techniques is also an integral part of the POC curriculum. POC classes meet for 3 classroom hours and 1 Corps Training hour per week.

The two-year program requires that the student have two academic years remaining at either undergraduate or graduate level. Successful completion of a six-week program on a military installation during the summer prior to enrollment is a prerequisite for these students. Those interested should apply no later than one academic semester before enrollment, since processing for the summer training must be completed as soon as possible. The two-year program is available to transfer students and students unable to participate in the four-year program. After enrollment, the two-year student receives the same instruction as a four-year member.

Corps Training is a non-academic, cadet-planned and directed activity. It focuses on military customs and courtesies, the career environment of the Air Force officer, and practical experiences in leadership and management.

Field Training involves a practical, first-hand experience with military life on an Air Force installation. Cadets receive instruction on junior officer activities, career field orientation, Air Force base functions and environment, aircraft and aircrew orientation, survival training, and physical conditioning. Applicants for the two-year program also receive academic instruction on subjects normally covered during the GMC portion of the four-year program.

The department offers to qualified students scholarship assistance which pays university tuition, fees, textbook allowance, and lab expenses, plus a stipend of \$100 per month. High school seniors compete on a national basis for scholarships starting in the freshman year.

Qualified students interested in becoming military pilots may participate in the Flight Instruction Program. Completion of this program leads to pilot qualification for later advancement to

Air Force pilot training. In addition to actual flight instruction, students take ground instruction in weather, navigation, and FAA regulations.

Students with previous military training may have this experience credited toward all or part of the first two years of the four-year program. Individuals with prior active service, previous ROTC training, military school attendance, Civil Air Patrol training, or service academy attendance should consult the department.

Successful completion of the Air Force ROTC program results in the awarding of a commission as a Second Lieutenant in the U.S. Air Force. In their senior year, students may request a delay in reporting to active duty in order to complete graduate work or to attend professional school. Students who are interested in obtaining further information may inquire at Dickinson Hall or telephone (413) 545-2437 / 2451.

#### Freshman Year

| First Semester       | Credits |
|----------------------|---------|
| Air Science 111      |         |
| The U.S. Air Force   | 1       |
| Second Semester      | Credits |
| Air Science 112      |         |
| U.S. Military Forces | 1       |

#### Military Science

The Department of Military Science offers a two- and four-year Reserve Officers Training Corps (ROTC) program which is voluntary and open to eligible, regularly enrolled men and women students of the University. Enrollment in departmental courses for credit is open to all members of the University community. Students who have completed a four-year program or equivalent are eligible for a commission in the U.S. Army upon graduation.

The four-year program consists of the Basic Course (freshman and sophomore years) and the Advanced Course (junior and senior years). Basic Course students are taught Contemporary Military Theory and Basic Military Leadership and Management. Students may register for military science courses at the same time they register for other University courses. No formal application is required. Basic Course cadets may terminate ROTC enrollment at any time in accordance with University policy with-

out obligation to the U.S. Government or to the Army.

Following successful completion of the Basic Course, qualified cadets may enroll in the Advanced Course. Advanced Course students are taught Military Law, Contemporary Military Theory, Organization of the Department of Defense and the Armed Forces, and Advanced Leadership and Management. The Advanced Course, under the two-year program, is also open to graduate students, transfer students, and other students who otherwise were unable or had not elected to participate in the four-year program. Applicants for the two-year program are encouraged to apply as early as possible during the year prior to entering the program.

Students with previous military training may receive advanced placement in the ROTC program. Individuals with prior active service, previous ROTC participation, or military school attendance should consult the department on the matter of constructive credit toward ROTC.

In addition to classroom activities, all regularly enrolled ROTC cadets participate in a leadership laboratory comprised of two field practicums each semester, designed to allow the student to apply theory learned in the classroom. \*Following the junior year, each cadet attends a six-week Advanced ROTC Summer Camp at Fort Bragg, North Carolina, for intensive training in military leadership. Selected students may opt to attend the U.S. Army Ranger School at Fort Benning, Georgia, in lieu of attendance at the Advanced ROTC Summer Camp.

Scholarship assistance consisting of University tuition, fees, textbook allowances, lab expenses and a grant of \$100 per month are offered to qualified students for one, two and three years. Non-scholarship Advanced Course cadets receive a grant of \$100 each month during the junior and senior years.

Various extracurricular activities exist for interested cadets. Qualified students may participate in the Flight Instruction Program leading to pilot qualification in Army Aviation. Students may also participate in confidence building activities such as rappelling, rubber boat exercises, mountain climbing, orienteering and cold weather survival on a voluntary basis.

Upon completion of University degree requirements and military science

requirements, cadets normally receive Reserve Commission as Second Lieutenants in the U.S. Army and are required to serve from three months to two years active duty. Scholarship cadets serve four years. Cadets designated as Distinguished Military Students as a result of achievements in academic and military studies may apply for a commission in the Regular Army. An attempt is made to closely correlate the academic discipline with the Army Branch of assignment.

In their senior year, cadets may request a delay on reporting to active duty for up to two years in order to complete graduate or professional studies. Programs are available in such fields as law and medicine which lead to commissions in the Judge Advocate General's Medical Corps following professional schooling.

Students who are interested in obtaining further information may inquire at the Department of Military Science, Dickinson Hall, or telephone (413) 545-2321/2322.

\*Student health insurance is required for participation in the Leadership Laboratory.

## Graduate School

Graduate work leading to the Doctor of Philosophy degree may be taken in the following fields: Animal Science, Anthropology, Astronomy, Biochemistry, Botany, Business Administration, Chemical Engineering, Chemistry, Civil Engineering, Communication Disorders, Communication Studies, Comparative Literature, Computer & Information Science, Economics, Electrical & Computer Engineering, English, Entomology, Environmental Engineering, Food & Agricultural Engineering, Food & Resource Economics, Food Science & Nutrition, Forestry & Wood Technology, Geology, History, Human Movement, Industrial Engineering & Operations Research, Linguistics, Mathematics, Mechanical Engineering, Microbiology, Ocean Engineering, Physics, Plant Pathology, Plant Science, Political Science, Polymer Science & Engineering, Psychology, Sociology, Soil Science, Wildlife & Fisheries Biology, and Zoology.

A cooperative Ph.D. program involving Amherst, Hampshire, Mount Holyoke, and Smith Colleges and the University is also available in the

departments of Biochemistry, Botany, Chemistry, French, Geology, Germanic Languages & Literatures, Microbiology, Philosophy, Physics, Spanish & Portuguese, and Zoology.

The School of Education offers several specialized programs leading to the Doctor of Education degree for those employed in the educational field. The requirements for this degree follow closely those outlined for the Doctor of Philosophy.

Master's degrees are offered in the following areas: Animal Science, Anthropology, Art, Art History, Astronomy, Biochemistry, Botany, Business Administration, Chemical Engineering, Chemistry, Civil Engineering, Classics, Communication Disorders, Communication Studies, Comparative Literature, Computer & Information Science, Economics, Education, Electrical & Computer Engineering, English, Entomology, Environmental Engineering, Fine Arts (Art, English, or Theatre), Fisheries Biology, Food & Agricultural Engineering, Food & Resource Economics, Food Science & Nutrition, Forestry & Wood

Technology, French, Geology, Germanic Languages & Literatures, History, Home Economics, Hotel, Restaurant & Travel Administration, Industrial Engineering & Operations Research, Labor Studies, Landscape Architecture, Linguistics, Manufacturing Engineering, Marine Sciences, Mathematics, Mechanical Engineering, Microbiology, Music, Nursing, Ocean Engineering, Philosophy, Physical Education, Physics, Plant & Soil Sciences, Plant Pathology, Political Science, Polymer Science & Engineering, Psychology, Public Administration, Public Health, Regional Planning, Slavic Languages & Literatures, Sociology, Theatre, Wildlife Biology, and Zoology.

HOLDERS of undergraduate degrees desiring further information may request a Graduate School Bulletin and application materials by writing to the Graduate Admissions Office, Graduate Research Center, University of Massachusetts, Amherst, MA 01002.

## DIRECTORY OF COURSES

## COLLEGE OF ARTS AND SCIENCES

THIS DIRECTORY lists offerings available in each college, school, division, and department. Students should consult the index for the general fields under which specific courses may be found.

### SUMMARY OF THE COURSE NUMBERING SYSTEM

000-099 Non-credit courses with no quality-point value toward graduation (such as courses needed to make up entrance deficiencies).

100-199 Undergraduate credit only: freshman-sophomore level.

200-399 Undergraduate credit only: junior-senior level.

400-499 Professional courses open to students having the bachelor's degree.

500-699 Courses available for graduate credit.

700-999 Graduate level courses.

Under normal circumstances, undergraduate students will be concerned only with courses numbered below 400. Students interested in the University's program of graduate studies should consult the *Graduate School Bulletin*.

The following numbers are assigned to special courses and academic activities:

190, 290, 390 New undergraduate courses being taught on experimental basis — not listed in catalog.

|         |                                  |
|---------|----------------------------------|
| 385-386 | Special Problems, Undergraduate. |
| 391-397 | Seminars, Undergraduate.         |
| 398-399 | Departmental Honors.             |
| 700     | Special Problems, Graduate.      |
| 800     | Master's Thesis.                 |
| 900     | Doctoral Dissertation.           |

Roman numerals indicate the semester(s) in which a course is given.

Capital letters appearing in parentheses after course titles designate various categories of courses required for graduation. See the first section of this book for a full explanation of graduation requirements.

**NOTE:** All regular semester courses meet for three class hours each week unless otherwise indicated; all courses carry three credits unless otherwise indicated. Courses carry no prerequisites unless specified.

Dean Alfange, Jr., Dean, Faculty of Social and Behavioral Sciences; Jeremiah M. Allen, Dean, Faculty of Humanities and Fine Arts; Seymour Shapiro, Dean, Faculty of Natural Sciences and Mathematics; James W. Shaw, Associate Dean, College of Arts and Sciences; Edward Chang, Julia A. Fata, Harry Schumer, and James L. Wozniak, Assistant Deans, College of Arts and Sciences.

The College of Arts and Sciences consists of three Faculties with a common curriculum. Departments and programs within each Faculty are as follows:

**Humanities and Fine Arts** — Afro-American Studies, Art, Asian Studies, Classics, Comparative Literature, English, French and Italian, Germanic Languages, History, Linguistics, Music, Philosophy, Slavic Languages, Spanish and Portuguese, and Theater.

**Social and Behavioral Sciences** — Anthropology, Communication Studies, Economics, Political Science, Psychology, and Sociology.

**Natural Sciences and Mathematics** — Biochemistry, Botany, Chemistry, Computer and Information Science, Geology and Geography, Mathematics and Statistics, Microbiology, Physics and Astronomy, Polymer Science and Engineering, and Zoology.

The College has programs of study leading to four bachelor's degrees: Bachelor of Arts, Bachelor of Science, Bachelor of Fine Arts, and Bachelor of Music. All departments (except Linguistics, Computer and Information Science, and Polymer Science and Engineering) offer a program leading to the B.A. degree. In addition to the customary departmental majors, interdisciplinary majors or programs are provided in Classics and Philosophy, Journalistic Studies, Judaic Studies, Linguistics and Chinese, Linguistics and German, Linguistics and Japanese, Linguistics and Philosophy, Linguistics and Russian, Mathematics and Philosophy, Near Eastern Studies, Pre-dental, Pre-medical and Pre-veterinary Studies, Science, Social Thought and Political Economy, and Soviet and East European Studies. Certificate Programs are available in Asian Studies, General Language Interpretation, Latin American Studies, and Western European Area Studies, which do not constitute majors, but are offered for students with particular interest in these areas. The B.S. degree may be earned only if the major is in natural sciences and mathematics, science, psychology, pre-dental, pre-medical, or pre-veterinary studies. The B.F.A. programs have a strong emphasis in art and the B. Mus. programs reflect an emphasis in music. All degree programs combine a basic proficiency or experience in communication skills and a study in depth in one area with supporting study in the other two of the three main divisions of learning represented by the three Faculties.

Courses appropriate to the communicative skills and distribution requirements in the three areas are noted in University Bulletins

by the respective codes (B), (C), (D), and (E).

A program of study which conforms with the following eight provisions qualifies the student who completes it for the appropriate degree. Advanced placement and transfer credits may be applied toward any or all of these qualifications, but at least half of the major program must be completed in residence.

1. At least 120 credits (Core Requirement A).

2. Rhetoric (Core B): Two "B" courses required, one of which must be either Rhetor 100 or 110.

3. Foreign Language: For the B.A. and B.S. degrees only, a basic proficiency or experience with foreign language must be demonstrated by (a) completion of a foreign language course at the 140 level, (b) score of 600 or above on a CEEB achievement test while in high school or placement test at UMass, (c) satisfactory completion in high school of fourth-level foreign language course or third-level course in one foreign language and a second-level course in another, (d) a year in high school in which English is not the basic language of instruction, (e) substitution of language-related study with proper authorization (see CASIAC).

4. Humanities and Fine Arts (Core C): Four "C" courses for B.A.; three "C" courses for B.S., B.F.A., B. Mus.

5. Social and Behavioral Sciences (Core D): Four courses, three of which must be "D" for the B.A.; three "D" courses for B.S., B.F.A. and B. Mus.

6. Natural Sciences and/or Mathematics (Core E): Four "E" courses for B.A., B.S.; three "E" courses for B.F.A. and B. Mus.

7. For a B.S. degree, the major must be in Natural Sciences and Mathematics, Science, Psychology, Pre-dental, Pre-medical or Pre-veterinary Studies; and a minimum of 60 credits must be earned in courses in Natural Sciences and Mathematics or Psychology, or courses in other areas that are E-designated.

8. An approved major program must be completed.

Full-time students with majors in the College are eligible to use a pass/fail option in one course each semester and in those summer sessions in which they enroll for at least six credits. University regulations restrict exercise of the option to a maximum of five courses completed in satisfaction of University core requirements, but the College permits its use in those courses presented in satisfaction of its additional requirements. Exercise of the option in courses required for a student major is subject to permission of the Department.

Prerequisite: approval of the appropriate Dean, following consultation with the College Curriculum Committee or subcommittee thereof.

Humanities and Fine Arts

W.E.B. Dubois Department of  
Afro-American Studies

Chairman of Department: Associate Professor John H. Bracey Jr.; Associate Chairman: Associate Professor Chester Davis; Professors: J. Cole, Harrison; Associate Professors: R. Cole, Shepp, Stevens, Strickland, Thelwell, Terry; Assistant Professor: Austin, Afesi Mkalimoto; Instructors: Miles, Ramos; Visiting Professors: Achebe; Visiting Lecturer: Lester; Adjunct Professors: Kaplan, Roach, Boyer, Ford.

A major in Afro-American Studies is offered. Specific requirements may be obtained by contacting Associate Chairman Davis.

101. INTRODUCTION TO BLACK STUDIES: OVERVIEW (D)

An interdisciplinary introduction to the basic concepts and literature in the disciplines covered by Black Studies. Includes history, the social sciences, and the humanities as well as conceptual framework for investigation and analysis of Black history and culture.

102. INTRODUCTION TO BLACK STUDIES: RESEARCH & WRITING (D)

An introduction to basic research methods; including library use, project development, notes, and bibliographies, and writing research papers. Strongly recommended for entering Freshmen.

111. SURVEY OF AFRICAN ART (C)

The literature on African art and an analysis of the theoretical basis for its study and of the distinguishing characteristics of its major traditions. An historical survey of Black art from prehistoric times (5000 B.C.) to the European arrival.

112. INTRODUCTION TO CLAY AND PLASTER

Basic techniques and conceptualizations in traditional African and Afro-American sculptural forms, e.g., masks, icons, busts. Relation of clay, plaster and plastics to metal sculpture.

131. AFRICAN HISTORY: 300 A.D. TO EUROPEAN COLONIZATION (C)

The history of Africa including its natural environment, the development and basic characteristics of African culture, the major African civilization from 300 A.D. to European penetration, the slave trade and its impact on African and European cultures.

132. AFRO-AMERICAN HISTORY: 1619 TO THE CIVIL WAR (C)

The development, organization, practice and consequence of slavery and an historical survey of the American scene covering ten phases: beginning with the Revolutionary Era and the paradox of slavery amidst the struggle for American political freedom.

133. AFRO-AMERICAN HISTORY: RECONSTRUCTION TO THE PRESENT (C)

Major issues and actions from the end of the Civil War to the rise of the Black Power movement. Political and social history includes Blacks in Reconstruction governments, labor, education, migrations, urbanization and political organizations and movements.

135. AFRICAN HISTORY: COLONIALISM TO THE RISE OF INDEPENDENT AFRICAN STATES (C)

Survey history of West and Central Africa from the incursion of colonialism to the present period of independent states. Particular attention to political and economic development as well as current internal and external problems. Continuation of AFROAM 131; may be taken immediately.

151. CULTURE AND LITERATURE (C)

The relevant forms of Black cultural expression contributing to the shape and character of contemporary Black Culture: the literary application of these in traditional Black writers. In four parts: 1) West African cultural patterns, and the Black past; 2) the transition — slavery, the culture of survival; 3) the culture through the literature; and 4) Black perceptions vs. White perceptions.

152. BLACK RHETORIC (B)

The social and psychological implications of the adoption of English as a completely alien language. Development of the dialect, forms of expression necessitated by conditions of slavery; use of the Bible as a model for Black rhetoric; the development of the sermons; evolution of the language of Black politics; and the use of satire as a means of communication.

155. REVOLUTIONARY CONCEPTS IN AFRO-AMERICAN MUSIC I (C)

Introduction to the history of Black music from its African origins to the end of the 19th century. Discussion of styles, characteristics, and instrumentation in early African music and moves to development of New World forms from early religious expression to the beginning of the blues.

156. REVOLUTIONARY CONCEPTS IN AFRO-AMERICAN MUSIC II (C)

African-American music from the beginning of the 20th century to the present. Development of blues forms through jazz, swing, bebop, etc. Special attention to Louis Armstrong, Duke Ellington, Charles Parker and other leading figures in Black American music.

161. INTRODUCTION TO POLITICAL SCIENCE — 20TH CENTURY (D)

The role of Black Americans in political theory and movements in the United States. Traces the development of Black political

thought and organization up through the 20th century, beginning with DuBois and including such movements as the Niagara and Garvey Movements and Islamic Nationalism. The development of political institutions within the Black community.

**211. AFRO-AMERICAN TEXTILE DESIGN AND FABRIC PRINTING**

Uses motifs that relate to both African and Afro-American cultural experiences. Includes structuring and organizing designs for reproduction on dress and furnishing fabrics and techniques involved in production.

**212. SCULPTURE: WELDED SHEETMETAL**

Introductions to forms and techniques of African masters and Afro-American adaptations in metal sculpture. Aesthetic and conceptual problems. Work primarily in brass, copper and steel.

**213. AFRO-AMERICAN ART HISTORY (C)**  
Visual expression in the Black diaspora (United States, Caribbean, and Latin America) from the early slave era and early Black masters to the present. The era of slave art, the Colonial period, the Black Renaissance, and developments in Black art since the 1930s.

**214. THE EVOLUTION OF VOCAL AND INSTRUMENTAL AFRICAN-AMERICAN MUSIC (C)**

Development of form and style in the vocal and instrumental music of the African-American, from the African roots to contemporary times. Class includes experimental vocal/instrumental ensembles.

**215. AFRO-AMERICAN DANCE THEATER WORKSHOP I**

Beginner's class in Afro-American dance technique. Includes: 1) working methods and dance skills; 2) lectures and demonstrations using films, videotapes, slides, and visiting dancers from Black dance companies; and 3) selected literature on the dance.

**216. AFRO-AMERICAN DANCE THEATER WORKSHOP II**

Intermediate class. Emphasis on performance techniques and improvisational methods within framework of movement stylizations and language, which flows from and reflects movement and rhythmic patterns common to Black communities, e.g., walking, social dancing, body attitudes during conversations, etc. Prerequisites: AFROAM 215 or permission of instructor.

**217. CONTEMPORARY BLACK IMAGE MAKING (C)**

Graphic communication and its relation to the cultures, world view institutions, and value creation and transmission of African and non-African societies. Contemporary examples

related to Afro-American society. Some studio work in painting, print processes, charcoal, pencil drawing, and experimental media.

**218. BLACK MUSIC AND THE THEATER**  
Workshop in composing, arranging and performing music for Black theater. Involves work with faculty members in theater in creating a musical score for a play. Prerequisites: Ability to play a musical instrument, passable skill in reading music and some knowledge of scales, chords, and harmony.

**219. VOICES OF NEW AFRICA HOUSE CHOIR**

Preparation and performance of choral music in the Black tradition, i.e., spirituals, gospels, worksongs, chants, hollers, etc. Credit, 1.

**220. CONTEMPORARY BLACK URBAN EDUCATION (D)**

Present conditions of education for Black children in northern, urban schools. Social science assumptions which influence education, (e.g., Coleman, Moynihan, Jencks, Jensen), integrated vs. all-Black public schools, the "innovation" movement, and independent Black community schools.

**221. CULTURES OF WEST AFRICA (D)**

A survey of the social, political, economic, and religious patterns of the traditional cultures of West Africa. The problems of continuity and change with these societies and their consequences.

**222. THE BLACK CHURCH IN AMERICA (C)**

The church as a continuing and powerful institution among Black Americans. The role of the church during different periods of history; functional interpretation of religion among Afro-Americans, and analysis of various types of Black churches.

**223. AFRO-AMERICAN PEOPLE (D)**

An analysis of the culture of Black people in the United States, definitions of Black culture, retention of Africanisms, language in relation to culture, the arts, the position of religion and the Black church, political movements and economic institutions as regards Black culture.

**224. ECONOMIC PROBLEMS OF BLACK PEOPLE**

Critical areas in the economic progress of the Black community; an historical analysis providing a broad framework for understanding of current problems.

**225. SOCIAL ACTION**

Theory and fieldwork in local urban Afro-American communities. First-hand examination of social problems, community organizations, and conventional service agencies in the Springfield area.

**226. DOUBLE JEOPARDY: AUTOBIOGRAPHIES OF BLACK WOMEN (C)**

The role of the Black woman in her community, and her struggle against oppression and racism in the larger society.

**227. RACISM AND AMERICAN SOCIAL ANALYSIS (D)**

The uses and interpretations of race in traditional analysis of American political and social history. The role of intellectuals as both advocates and adversaries of racist theories. American scholarship in the universities.

**228. TECHNIQUES IN AFRO-AMERICAN RITUAL: ACTING WORKSHOP**

Black theater workshop designed to explore content of Afro-American experiences as reference for the development of acting skill. Focus on ritual techniques, character definition, and choral movement/song.

**231. LIFE AND WRITINGS OF W.E.B. DUBOIS**

The life and works of W. E. B. DuBois, "Father of Pan-Africanism," and his influence on the political thought of Black Americans.

**232. HISTORY OF BLACK NATIONALISM**  
Black Nationalism from the Nationalist Movement of the 1870's to the present.

**233. AFRO-AMERICAN SLAVERY**

Examines important questions concerning slavery in the United States with some comparisons with slavery in Latin America. Identifies important ideological forces which helped determine the character of the literature on the subject. Prerequisites: AFROAM 132, or permission of instructor.

**234. THE HARLEM RENAISSANCE (C)**

The Black literary and artistic movement of the late 19th and early 20th centuries and coming together of Black intellectuals around the idea of Blackness in the Harlem of the 1920s. Examination of the writings of Langston Hughes, Claude McKay, W. E. B. DuBois and others.

**235. BLACK SOCIOLOGICAL THOUGHT (D)**

The classic works written by Black sociologists such as DuBois, Frazier, Charles Johnson, Allison Davis, Drake and Clayton and Oliver C. Cox. The various viewpoints, underlying assumptions, place in the American sociological tradition, and theoretical contribution to an understanding of the Black Experience. Prerequisite: SOCIOL 101.

**251. BLACK DRAMA (C)**

Investigation of the problems of aesthetics in Black drama through a close study of representative plays covering the period from the 1920s to the late 1960s. Also an examination

published criticism by both White and Black drama critics.

22. **BLACK IMAGES IN WHITE AMERICAN WRITINGS (C)**  
Critical survey of White attitudes toward Black people as reflected in the national literature from colonial times to the present. Includes works of Poe, Emerson, Thoreau, Melville, O'Neill, Hemingway and Faulkner.

23. **PRE-CIVIL WAR BLACK WRITING (C)**  
Examination of the variety, range, and content of Black literary expression in the period between 1776 and 1866 through the study of novels, a play, poetry, autobiographies, appeals and defenses. Attention to attitudes toward their cultural and social positions of both slaves and free Blacks.

24. **CONTEMPORARY AFRICAN NOVELS (C)**  
Cultural foundations of West African literature and the study of representative contemporary novelists of both English and French West Africa (Chinua Achebe, Amos Tutuola, Cyprian Ekwensi, and others).

25. **BLACK THEATER IN THE AFRICAN CONTINUUM (C)**  
Exploration into African philosophy and religion as the index which best defines the aesthetic logic of African-American drama. Examination of traditional African cultural values and practices within that context and identification of their relation to the development of formal and informal dramatic expression as a part of the African-American cultural experience.

26. **PRACTICUM IN PRISON EDUCATION**  
Organized into interdisciplinary teams, students work with inmates in a Massachusetts Correctional Institution as resource persons and instructors in Black literature, history, and culture. Prerequisite: upperclass standing, permission of instructor. Credit, 6.

27. **THE CONTEMPORARY AFRO-AMERICAN NOVEL: RICHARD WRIGHT TO ISHMAEL REED (C)**  
The novels of Afro-American writers from the publication of Wright's *The Outsider* (1953) to Ted's *Mumbo Jumbo* (1972). These works and others such as Ellison's *Invisible Man* will be looked at in terms of the variety of techniques and methods used to examine the Black and American experiences.

28. **REVOLUTION IN THE THIRD WORLD (D)**  
The nature of the revolutionary process in Third World countries. Russia, China, Cuba, Vietnam and Guinea Bissau. An attempt to identify the social, economic, political and

cultural factors which advance or retard this process.

262. **WRITINGS OF FRANTZ FANON (D)**  
In-depth examination of Fanon's analysis of colonialism and his contribution to understanding of revolution and political action. Includes his concept of Negritude, participation in Algerian revolution, involvement with European liberal left, and search for his own identity through struggle.

263. **PAN-AFRICANISM AND THE THIRD WORLD**  
Survey of the history of Pan-Africanism through its roots in the West Indies to its manifestations in England, the United States, and the Conferences of 1954. Examines the politics of the "nonaligned" or neutralist countries under the leadership of such statesmen as Nehru, Tito, and Nasser, and the politics of the Third World Nation States.

264. **FOUNDATION OF BLACK EDUCATION IN THE UNITED STATES (C)**  
A critical examination of the political, economic, and social forces which have shaped the course of education for Black people in the United States from the Reconstruction period to the present.

265. **SEMINAR IN BLACK CULTURE**  
Similarities and differences in the culture of Black folks in West Africa, the Caribbean and the United States. Following background lectures on African and Afro-American anthropology, each student makes a presentation based on comparative research on a selected aspect of Black culture. Prerequisites: AFROAM 221 and 223 or permission of instructor.

310. **TOPICS IN THE BLACK CREATIVE ARTS**  
Seminar/workshop for upper level students. Research in selected areas of the creative arts (e.g., music, dance, theater, plastic arts) utilizing primary and secondary sources, field tapes, oral sources, discographies, videotapes, etc. Students prepare paper or equivalent.

311. **AFRO-AMERICAN DANCE III: CONTEMPORARY TECHNIQUES**  
New and experimental techniques in contemporary Black choreography and body language. Combining elements of dance and drama into a unified form. Students choreograph short work.

312. **AFRO-AMERICAN DANCE IV: COMPOSITION IN BLACK THEATER DANCE**  
Advanced course. Continuation of 311. Emphasis on composition and choreography.

330. **RESEARCH IN AFRO-AMERICAN HISTORY (C)**

An introduction to historical research through use of primary sources, bibliographies and other reference tools, including local sources, oral and written. Prerequisites: AFROAM 132, 133, Junior-Senior standing.

331. **READINGS IN AFRO-AMERICAN HISTORY**

Selected topics in Black social and political history, e.g., slavery, reconstruction, free Blacks, protest movements, etc. Extensive reading in the secondary literature to familiarize the students with problems of historical analysis and interpretation. Prerequisites: AFROAM 132, 133, Junior-Senior standing.

332. **READINGS IN AFRICAN HISTORY**

Selective topics in African social and political history. Specific topics dictated by the interest of the students in a given semester, e.g., 20th century African leaders, African Socialism, etc. Extensive reading in the secondary literature to familiarize students with various problems of historical analysis and interpretation. Prerequisites: AFROAM 131, 135, Junior-Senior standing.

363, 364. **PAN-AFRICANISM: STRUGGLES FOR LIBERATION AND INDEPENDENCE**

Offered for two semesters (one year). Analyzes the realities of the liberation struggle for African peoples. An in-depth examination of the writing of Pan-Africanists and a critical analysis of the revolutionary thrust toward independence and the unification of the African continent.

385. **SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

386. **SENIOR THESIS**

Afro-American Studies majors only.

398. **SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

399. **SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Art

Chairman of Department: Professor George M. Wardlaw; Professors: Becker, Benson, Coughlin, Friedmann, Kamys, Mallary, Matheson, Norton, Perkins, Reed, Roskill, Roy, Wang; Associate Professors: Berube, Cheney, Davies, Gongora, Grillo, Hendricks, Krumm, Paston, Schieppi, Stevens, Town-

send, Wozniak; Assistant Professors: Brown, Denny, Dube, Feingold, Giesman, Harbison, Hopkin, Kearns, McGee, Mochon, Parks, Patterson, Tartakov, New-Smith; Lecturers: Kaprow, Phillips.

Freshmen studio art majors must begin by taking ART 100, 120, and an art history course (111, 113, or 117) to be followed in the next term by ART 102, 122, and another art history course. After these foundation courses, students begin to explore the various areas of the department: printmaking, ceramics, painting, sculpture and design. For specific Departmental Requirements for the four years, students should contact the Director of Undergraduate Studies in Art. The sequence of courses is available in checklist form in that office.

There are additional Departmental Regulations with which all students must comply (e.g. Special Problems Contract, etc.). These regulations are available in written form in the Undergraduate Art Office. Although not included as part of the course descriptions, field trips may be required in certain courses at the discretion of the instructor.

## CREATIVE ART

### 100. BASIC DRAWING (C)

Drawing in black and white, applying pencil, crayon, charcoal techniques to representation in line and tone, emphasizing sound observation and effective presentation. 6 studio hours.

### 102. DRAWING COMPOSITION (C)

Continuation of ART 100. Emphasis on pictorial composition and advanced drawing techniques. 6 studio hours.

### 104. BASIC STUDIO (C)

Non-art majors ONLY. Introduction to visual concepts through a combination of formal presentations and laboratory experiences. Emphasis on developing understanding of divergent points of view in Art rather than the development of skills or creative accomplishments. 6 class hours. Not permitted for Art majors for credit.

### 120. BASIC DESIGN I (C)

Two-dimensional design concepts arising out of work with specific problems in a variety of media. 6 studio hours.

### 122. BASIC DESIGN II (C)

Continuation of ART 120. Specific three-dimensional problems, stressing the interrelationship of materials, processes, techniques, and sculptural concepts. Prerequisite, ART 120. 6 studio hours.

### 210. INTERIOR DESIGN I

Introduction to graphics, interior layouts, normative and descriptive elevations. 2- and 3-point perspective drawing, architectural

measurement and theory of proportion. Prerequisites: ART 100 and 120, or permission of instructor.

### 211. INTERIOR DESIGN II

Advanced elevations, layouts and perspective; freehand perspective, theory of color, light. Prerequisite: ART 210 or permission of instructor.

### 215. HISTORY OF DECORATIVE ARTS

Historical orientation in the development of styles in decorative arts. The causes and factors behind cultural exchange and the formation of aesthetic preferences. The historic development of furnishings and decorative arts.

### 217. APPLIED DESIGN

An advanced course in which the elements and principles of design are employed to solve a series of specific design problems. A variety of media required. Prerequisites: ART 100 and 120.

### 219. TEXTILES FOR THE INTERIOR

Basic factors related to durability, maintenance, appearance, appropriateness, performance and cost of textiles used in residential, commercial and public interiors. Prerequisites: ART 100 and 120.

### 220. PAINTING I (C)

Easel painting in oil related media, based on elementary understanding of physical properties of medium, and encouraging individual directions within limitation of sound composition. Prerequisites, ART 100 and 120. 6 studio hours.

### 222. PAINTING II (C)

Initial concentration on transparent water color, emphasizing control of techniques and mastery of color relationships. Further experience with opaque water color, such as gouache, casein. Prerequisites: ART 100 and 120. 6 studio hours.

### 224. PAINTING III

Continuation of ART 220. Prerequisite; ART 220. 6 studio hours.

### 226. PAINTING IV (Techniques and Materials)

Advanced work in traditional and contemporary painting techniques and media. Includes encaustic, tempera, oil, oil-resin, acrylic polymer, synthetic media, grounds and supports. 6 studio hours. Prerequisites: ART 222, 224.

### 230. ADVANCED DRAWING

Investigation and development of various techniques and media with special emphasis on figure drawing. Prerequisites, ART 100 and 102. 6 studio hours.

### 232. ADVANCED DRAWING PROBLEMS

Advanced work in traditional and contempo-

rary drawing media. Independent exploration of graphic problems emphasized. Solutions problems sought in relation to student's personal objectives. Prerequisite: ART 230. 6 studio hours.

### 240. PRINTMAKING: RELIEF I (C)

Basic study of material, technique, and aesthetic considerations peculiar to relief. Students print their own work. Prerequisite: ART 100 and 120, or permission of instructor. 6 studio hours.

### 242. PRINTMAKING: INTAGLIO I (C)

Basic study of materials, techniques, aesthetic considerations peculiar to etching, engraving, and aquatint. Students print their own work. Prerequisites, Art 100 and 120, permission of instructor. 6 studio hours.

### 244. PRINTMAKING: LITHOGRAPHY I (C)

Basic study of materials, techniques, aesthetic considerations peculiar to lithography. Students print their own work. Prerequisites: ART 100 and 120 or permission of instructor. 6 studio hours.

### 246. PRINTMAKING: RELIEF II

Advanced study of materials, techniques, aesthetic considerations relevant to relief printmaking. Students print their own work. Prerequisites, ART 240, 242, 244. 6 studio hours.

### 248. ART EDUCATION: METHODS AND MATERIALS I

Methods, tools, and materials used in public school art program, with emphasis on the elementary school level. 6 studio hours. Required for art education majors; prerequisite for student teaching.

### 250. ART EDUCATION: METHODS AND MATERIALS II

The literature, philosophies, procedures, and methods used in the teaching of art, with emphasis on the secondary school program. Required for art education majors; prerequisite for student teaching.

### 252. ART FOR THE YOUNG CHILD

The teaching of art in relation to the growth and development of children; program planning, evaluation, studio projects, and resources.

### 254. TYPOGRAPHY I

A studio course in typography and book design. The student selects a text, sets it in type, prints and binds at least one copy of a finished book. 6 studio hours.

### 260. SCULPTURE I (C)

Experimentation with materials. Investigation into the nature of 3-dimensional form. The development of 3-dimensional order. Individual projects. Prerequisites, ART 100 and 120. 6 studio hours.

2. **SCULPTURE II (C)**  
Continuation of ART 260. Prerequisite, ART 260. 6 studio hours.

4. **SCULPTURE III**  
Sequence of problems in direct and cast metal sculpture, using a variety of metals, techniques, and processes. Emphasizes traditional and modern foundry methods, and includes gas and electric welding. Prerequisite, ART 262 (previously or concurrently). 6 studio hours.

6. **SCULPTURE IV**  
Encourages development of a personal approach to sculpture and creative decisions. The student selects projects and materials of interest to himself and completes them within a classroom situation. Prerequisite, ART 264 (previously or concurrently). 6 studio hours.

8. **INTRODUCTION TO METALS AND FIBERS (C)**  
Introduction to materials and concepts related to design and execution of objects utilizing, or embellished by metals, wood, enamels or fibers. Emphasis on expanding design concepts applicable to the above media. Prerequisite, ART 100 and 120 or 6 studio hours.

10. **COMPUTER GRAPHICS WORKSHOP I**  
Students learn FORTRAN while others apply their programming skills to computer art. Lecture/workshop sessions 4 hrs. per week. Lab. 2 hrs. Prerequisites: must be B.F.A. student, or already know FORTRAN and have an interest in art. Interview with instructor required.

12. **COMPUTER GRAPHICS WORKSHOP II**  
Continuation of Computer Graphics Workshop I. 4 hrs. per week. Lab. 2 hrs. Prerequisite: ART 276.

14. **CERAMICS I (C)**  
Involvement with form through the use of clay and related materials. Hand-building and work on the potter's wheel stress a creative, aesthetic approach and related ceramic history. Prerequisite, ART 100 and 120. 6 studio hours.

16. **CERAMICS II (C)**  
Continuation of Art 280. Further refinement through hand-building and wheel techniques. Introduction to technology of clay, engobes, glaze firing. Prerequisite, ART 280. 6 studio hours.

18. **CERAMICS III**  
Creation of ceramic forms with stress on aesthetic principles rather than utility. Introduction to ceramic glaze technology and coloring media. Related ceramic history. Prerequisite, ART 282. 6 studio hours.

286. **CERAMICS IV**  
Continuation of Art 284. Emphasis on expressive potential of clay and glazes. Advanced techniques in glaze technology. Introduction to kiln design. Prerequisite, ART 284. 6 studio hours.

288. **GLASS BLOWING I**  
Basic principles and techniques of glass blowing from molten mixes, emphasizing experimental form. Prerequisite, ART 282 or permission of instructor. 6 studio hours.

292. **LIGHT WORKSHOP**  
Introduction to the use of light as a medium of aesthetic expression with emphasis on individual investigation into the techniques of modifying the quality of illumination. Prerequisites, three semesters in one of the following areas: painting, sculpture, ceramics, or printmaking. 6 studio hours.

294. **GLASS BLOWING II**  
Further refinement through additional forming techniques for molten glass. Prerequisite: ART 288. 6 studio hours.

320. **PAINTING V**  
Exploration of traditional and contemporary attitudes and approaches toward painting the human figure. Prerequisites, ART 224 and 226. 6 studio hours.

322. **PAINTING VI**  
Advanced work in painting composition with emphasis on independent exploration of painting problems and the development of effective personal forms of visual communication. Prerequisite, ART 224. 6 studio hours.

330. **INTERIOR DESIGN III**  
Planning, design, analysis and programming of interior spaces both residential and public. Interior materials, uses, applications, specifications and schedules. Prerequisites, ART 210 and 211 or equivalent.

331. **INTERIOR DESIGN IV**  
Continuation of Interior Design III with addition of research studies and design problems exploring programming and coordination of colors and furnishings. Portfolio preparation and presentation. Prerequisites, ART 210, 211, 330.

340. **PRINTMAKING: ITAGLIO II**  
Advanced study of materials, techniques, and aesthetic considerations relevant to etching, engraving, and aquatint. Students print their own work. Prerequisite, ART 240, 242, 244. 6 studio hours.

342. **PRINTMAKING: LITHOGRAPHY II**  
Advanced study of lithography, with emphasis on concepts and techniques of color lithography. Prerequisite, ART 240, 242, 244. 6 studio hours.

350. **SHELTER TECHNOLOGY AND DESIGN**  
Historic and contemporary construction techniques in wood, stone, concrete and plastic. Design/construction relationships, materials and components of architectural interiors and furnishings. Prerequisite: permission of instructor.

352. **CONSTRUCTION METHODS AND MATERIALS**  
Interior environmental systems; a survey course for Design students covering electrical, heating, ventilating, air conditioning, plumbing and acoustical systems, and their graphic applications to design and working drawings. Prerequisite: ART 350.

354. **PROFESSIONAL PRACTICE**  
Professional and business practices in design and architectural offices. Budgeting, product specifications and legal documents relating to the practice of design. The preparation of a portfolio and resume, and general preparation for professional careers. Prerequisite: Senior status.

356. **FURNITURE TECHNOLOGY**  
Required for professionally oriented students who will have to design free-standing and built-in furniture as required in most contract and many residential interior commissions. May be elected by students in ENVDES, LANDARCH, ART, BDIC-ARCH. Prerequisite: ART 210 or 211.

358. **FURNITURE TECHNOLOGY AND DESIGN**  
Required for Interior Design students. An extension of 356; also includes some lighting and graphic information and projects. May be elected by students in: ENVDES, THEATR, ART, BDIC-ARCH. Prerequisite: ART 210 or 211, or permission of instructor.

360. **SCULPTURE V**  
Advanced work in constructions and assemblage; formal and informal methods of composition, in a variety of materials and assembly techniques. Prerequisite, ART 266. 6 studio hours.

362. **SCULPTURE VI**  
Individual, collaborative and class projects of an advanced nature in new sculptural media such as plastics, light, and kinetics. Also inter-media projects involving the combination of sculpture with other arts such as painting, photography, architecture, urban design, music, dance, theater, etc. Prerequisite, ART 360 (previously or concurrently). 6 studio hours.

380. **CERAMICS V**  
Advanced exploration of ceramics and related media. Continued technology. Modern ceramic history. Emphasis on individual

objectives. Prerequisite, ART 286. 6 studio hours. May be concurrent with ART 382.

#### 382. CERAMICS VI

Continuation of Art 380. Emphasis on personal interpretation of major contemporary problems in ceramics. Prerequisite: May be concurrent with ART 380. 6 studio hours.

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. Permission of instructor and the filing of a plan of study required before registration. May not duplicate material covered in other courses. Prerequisite, Junior standing in Art. Credit, 1-6

#### 388. BFA DECREE PROJECT —

##### CERAMICS, PAINTING, PRINTMAKING, AND SCULPTURE

An independent advanced investigation and work pursued under the direction of a selected faculty committee and designed to evolve a body of work mature in concept and individual in style. Permission of the committee and the filing of a plan of study are required before registration. Normally taken for 6 credits; however, course levels 5 and 6 may be incorporated for up to 12 credits. May not be repeated. Prerequisite, Senior standing in BFA program. Credit, 6-12

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

### ART HISTORY

#### 111. SURVEY OF THE HISTORY OF ART: EARLY CULTURES AND CIVILIZATIONS (C)

Art and architecture in the western world from the Paleolithic era to the Gothic period.

#### 113. SURVEY OF THE HISTORY OF ART: RENAISSANCE TO MODERN (C)

Art and architecture in the western world from the Renaissance to the present time.

#### 117. INTRODUCTION TO THE VISUAL ARTS (C)

An examination of the diverse media of the visual arts from a topical rather than a strictly historical viewpoint. Beginning with the fundamental techniques of formal and stylistic analysis, the course surveys a wide range of topics in the context of the relation of art objects to their cultures, creators, critics, and public.

#### 205. GREEK ART (C)

The sculpture, painting and architecture of Ancient Greece from Protogeometric beginnings to the end of the Hellenistic period. Students are encouraged to take ART 111 or ART 115 before this course.

#### 225. EARLY MEDIEVAL ART (C)

Early Christian art and the beginnings of Byzantine art in East and West; Coptic art, Barbarian and Celtic influences in northern Europe; Carolingian, Ottonian and Anglo-Saxon art.

#### 227. ARTS OF THE ROMANESQUE AND GOTHIC PERIODS (C)

Art of the High Middle Ages; Romanesque and Gothic art with emphasis on architecture, monumental sculpture and painting in western Europe.

#### 233. ISLAMIC ART AND ARCHITECTURE I (C)

Survey of the art and architecture of the Islamic peoples. Origins of Islamic art and institutions in the Near East, and its development throughout the Islamic world to the eve of the Mongol invasions in the 13th century.

#### 235. ISLAMIC ART AND ARCHITECTURE II (C)

Survey of the art and architecture of the Islamic peoples; beginning in the 13th century. The art of the Mongols and Timurids in Iran and the Mamluks in Egypt, through the great Turkish, Iranian, and Indian Islamic cultures of the 16th century and beyond.

#### 245. ITALIAN ART OF THE EARLY AND HIGH RENAISSANCE, 1400-1520 (C)

The development of Italian art and architecture of the 15th and early 16th centuries in historical context.

#### 249. RENAISSANCE IN NORTHERN EUROPE, (1400-1600)

A historical and topical survey of the art produced in Flanders, Holland, Germany, and France from 1400-1600 with emphasis on painting. Prerequisite: ART 111 or 113 or 117.

#### 255. BAROQUE ART AND ARCHITECTURE IN ITALY (C)

Art and architecture in Italy from 1600 to 1750, with emphasis on Rome. Students are encouraged to take ART 113 or 115 before this course.

#### 261. THE ARTS OF AFRICA, OCEANIA, AND PRE-COLUMBIAN AMERICAS (C)

An introduction to the so-called "primitive arts" of traditional peoples of Africa, Oceania and pre-Columbian Americas.

#### 265. BAROQUE ART AND ARCHITECTURE IN NORTHERN EUROPE (C)

Art and architecture in France, Flanders, Hol-

land, Germany, and Austria from 1600 to 1750. Students are encouraged to take ART 113 or 115 before this course.

#### 271. ART OF INDIA (C)

The development of ancient Indian culture analyzed through the surviving arts. Beginning with the Neolithic revolution and the remains of the Indus Valley Civilization focuses mainly on the development of the art of Buddhism through the Gupta period.

#### 273. THE HINDU TEMPLE (C)

The concept and development of the Hindu Temple of South, and to a lesser extent Southeast Asia. Emphasis on the coherence and integration of the arts in traditional culture.

#### 275. CHINESE PAINTING (C)

The secular tradition of the East Asian graphic arts, from prehistoric times up to the present. Korean and Japanese as well as Chinese work discussed.

#### 277. THE ART OF BUDDHISM (C)

The development of Buddhism as seen through the development of Buddhist art, as spread from India via Central and Southeast Asia to China and Japan.

#### 285. EUROPEAN ART, 1780-1880 (C)

Major developments in painting from David to Post-Impressionism in France, England, and Germany.

#### 287. EUROPEAN ART, 1880-PRESENT (C)

Major artists and developments from Post-Impressionism to the present.

#### 291. 19TH CENTURY ARCHITECTURE (C)

Developments in the late 18th century and history of changes in style, technical advances, and aesthetic principles during the 19th century in Europe and America.

#### 293. 20TH CENTURY ARCHITECTURE (C)

Developments in modern architecture in Europe and America from 1900 to the present including influential personalities, social and political influences, structural innovation and aspects of city planning.

#### 295. AMERICAN ART (C)

The earliest colonial art, the impact of late European influences, regional art of the 19th and 20th centuries, and contemporary developments.

#### 305. ART OF EARLY MEDITERRANEAN CULTURES (C)

Brief consideration of Paleolithic-Neolithic background; emphasis on the high cultures of the Bronze Age; Egypt (and related Tigris-Euphrates lands); Minoan and Helladic; Phoenician and derived. Also, Cyprus, Assyrian and Syro-Palestinian in first millennium. Prerequisite, ART 115, or permission of instructor.

3. **MEDIEVAL PAINTING (C)**  
Early Christian murals and mosaics; Byzantine painting; early and later medieval painting in Western Europe; stylistic parallels in manuscript illumination and stained glass. Prerequisites, ART 111, 115, 225, 227 or permission of instructor.

3. **ITALIAN ART OF THE LATE RENAISSANCE AND MANNERISM (C)**  
The dissolution of the High Renaissance; proto-Baroque and early Mannerist art; the early Mannerism of the revived feudal class after 1530; the artistic response to the Counter-Reformation. Prerequisite, ART 246 or permission of instructor.

3. **ASPECTS OF NORTHERN EUROPEAN BAROQUE (C)**  
Selected aspects of Art or Architecture in France, Flanders, Holland, Germany, or Austria from 1600 to 1750. Treated in a combination lecture-seminar of limited size. Prerequisite, ART 255, 265 or permission of instructor.

3. **373. GREAT THEMES IN ART HISTORY (C)**  
Central themes, issues, and problems of an important area in the history of art. Prerequisite, a survey level course bearing on the particular theme to be examined, or permission of instructor.

3. **377. MASTERS OF WESTERN ART (C)**  
Intensive study of the work of a master in the field of art. Permission of instructor. 1 or 2 class hours.

3. **383. METHODS OF ART HISTORY (C)**  
Introduction to the methods of study in this field, emphasizing different approaches to the work of art. Recommended for art history majors; open to other qualified students. Permission of instructor.

3. **386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

3. **ROMAN ART (C)**  
Origins and development of Roman architecture, portraiture, historical relief, painting and mosaics. Prerequisites, ART 115 or 205, or Ancient History or permission of instructor.

3. **CRITICISM OF MODERN ART (SEMINAR)**  
Practical exercises in the evaluation of modern paintings. Discussion of the results.

3. **ASPECTS OF AMERICAN ARCHITECTURE (C)**  
Selected aspects of the history of changes in style, technical advances, or aesthetic principles

of architecture in the United States. Prerequisite, permission of instructor.

398. **SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. **SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Asian Studies

*Chairman of Program:* Associate Professor Ching-mao Cheng; *Associate Professor:* Naff; *Assistant Professors:* Cohen, Gjertson, Ozawa, Teng; *Associated Faculty:* Maki (Political Science), Miller (Comparative Literature).

Major programs can be arranged in either Chinese or Japanese language and literature in which students may place emphasis on either modern or classical language. Students in either major program receive training designed to provide them with a substantial foundation in reading, speaking, and understanding the language, as well as with a basic knowledge of the respective literatures and their cultural contexts. Students are encouraged to acquire a background in the history, government, society, religion, and arts of China and Japan — a background essential for an understanding of the cultures and literatures of the Chinese and Japanese people. Assistance in designing a major program may be obtained at the Asian Studies Program Office, 804 Thompson Hall.

In addition to the courses listed below, various departments in the University (and Five College system) offer courses dealing with specific aspects of China, Japan, and other parts of Asia. Consult the offerings of the Departments of Anthropology, Art, Comparative Literature, Geography, History, Political Science, and Sociology.

## LANGUAGE AND LITERATURE

### CHINESE

110. **NON-INTENSIVE ELEMENTARY CHINESE I**  
Non-intensive instruction in conversational Mandarin, with a limited amount of Chinese characters introduced. Use of simplified characters and latinisation.

126 (I). **INTENSIVE ELEMENTARY CHINESE**  
For those with no previous training in Chinese. Intensive introduction to the standard language (Mandarin) of China. 5 class hours. Honors section (2 credits) may be added in conjunction with this course, focusing

on the study of origin and development of Chinese character. Study of the 214 radicals. Credit, 6.

130. **NON-INTENSIVE INTERMEDIATE CHINESE**  
Non-intensive Mandarin Chinese, with emphasis on the oral aspect. Romanization and simplified characters follow those currently used in mainland China. Introduction of simplified characters up to 300. Practice in using dictionaries and writing short essays.

146 (II). **INTENSIVE ELEMENTARY CHINESE**  
Intensive training in conversational Mandarin and in composition. Systematic introduction of 600 basic Chinese logograms. Prerequisite, CHINESE 126. 5 class hours. Honors section (2 credits) may be added in conjunction with this course. Practice in working with various types of Chinese dictionaries. Basic Chinese calligraphy. Credit, 6.

226 (I). **INTENSIVE INTERMEDIATE CHINESE (C)**  
Intensive instruction in Mandarin. Development of Skills in reading, writing, and speaking Chinese. Prerequisite, CHINESE 146 or equivalent. 5 class hours. Credit, 6.

227 (II). **INTENSIVE INTERMEDIATE CHINESE (C)**  
Intensive introduction to modern Chinese literature. Analysis and discussion of basic modern literary texts. Prerequisite, CHINESE 226 or equivalent. 5 class hours. Credit, 6.

238 (I). **CHINESE FOLK RELIGION**  
The eclectic religious beliefs common in varying forms and degrees to nearly all Chinese. The influence of this form of religion on various aspects of Chinese society. An introduction to the "Little Tradition" of Chinese religion and thought. Prerequisite, HIST 115, or the equivalent basic knowledge of Chinese history, or junior standing. Knowledge of Chinese language not necessary.

253. **ART AND LITERARY THEORIES OF TRADITIONAL CHINA I. (C)**  
To provide a basic understanding of the aesthetic concerns of traditional China. It should prove to be of particular interest to students of comparative aesthetics and comparative literature.

254. **ART AND LITERARY THEORIES OF TRADITIONAL CHINA II. (C)**  
To provide a basic understanding of the aesthetics of traditional China. Part II deals with the period Sung (10th) through Ch'ing (19th).

275 (I). **SYNTACTIC STRUCTURES OF CHINESE (C)**  
Synchronic study of the syntactic structures of Mandarin. Survey of the development of

Chinese syntactic theories during this century. Critical investigation of current issues in Chinese syntax. Prerequisite, CHINSE 227.

#### 280. SUMMER INTENSIVE INTERMEDIATE CHINESE

Additional training in spoken Mandarin. Explanations of and intensive drills in advanced grammatical structures; orthodox and simplified characters up to 1500 level. Introduction of modern literary style and exercises in short essays and composition. Prerequisites, CHINSE 126, 146 or equivalent. Fifteen class hours and 5 lab hours. Credit, 8.

#### 326 (I). READINGS IN CHINESE COMMUNIST LITERATURE (C)

Intensive introduction to literary, social, and political writings by important Chinese Communist writers and thinkers. Prerequisite, CHINSE 227. 5 class hours. Credit, 8.

#### 327 (II). READINGS IN CONTEMPORARY CHINESE LITERATURE (C)

Intensive introduction to modern essays and short stories by famous modern writers such as Lu Hsun, Mao Tun, and Kuo Mo-jo. Prerequisite, CHINSE 227. 5 class hours. Credit, 6.

#### 350 (I). ELEMENTARY CLASSICAL CHINESE (C)

Introduction to the literary language of China that was used in all types of literature, scholarship, and documents until the 20th century. Stress on grammar with introduction to various tools for philological analysis of texts. Prerequisite, CHINSE 146 (for two semesters of any modern Chinese language); or JAPAN 227 (or equivalent). 4 class hours. Credit, 4.

#### 351 (II). INTERMEDIATE CLASSICAL CHINESE (C)

Readings in a variety of prose and verse mostly selected from medieval Chinese writings. Emphasis on increasing reading speed and extending vocabulary. Prerequisite, CHINSE 350.

#### 352 (I). READINGS IN CHINESE HISTORICAL TEXTS

Readings in Chinese historical texts. Advanced reading of the literary language of China. Introduction to historical writings.

#### 355. MASTERPIECES OF CLASSICAL CHINESE POETRY (C)

A critical reading of selections from major anthologies and authors of various poetic genres written in classical Chinese from the Chou dynasty to the present. Included are the Book of Odes, Ch'u Tz'u, T'ang and Sung masters.

#### 356. MASTERPIECES OF CLASSICAL CHINESE PROSE (C)

A critical reading of selections from major anthologies and authors of various prose

forms in classical Chinese in premodern China. Included are rhymed prose (fu), literary criticism, the short story (ch'uan-ch'i), and classical and neo-classical essays. Prerequisites, at least two semesters of classical Chinese, or permission of instructor.

#### 370 (II). INTRODUCTION TO CHINESE PHILOLOGY AND BIBLIOGRAPHY (C)

Development of familiarity with a wide range of philological methods relevant to the interpretation of Chinese texts and with the basic reference and bibliographic works necessary for efficient use of Chinese primary source materials. Prerequisite, CHINSE 350.

#### 375 (II). HISTORY OF THE CHINESE LANGUAGE (C)

Survey of modern Chinese dialectology. Diachronic studies of the grammatical and phonological structures of Chinese in three stages: Archaic, Ancient, and Modern. Prerequisite, two years of Chinese (Cantonese or Mandarin).

#### 376. CHINESE DIALECTOLOGY

Survey of the phonological and syntactic structures of major Chinese dialects with emphasis on Mandarin, Cantonese, Amoy and Shanghai dialects. Reconstruction of Ancient Chinese (ca. 7th Century A.D.) based on the comparative studies of modern Chinese dialects and various rhyme books. Demonstration of field methods using Tai-shan dialect as a model. Prerequisite, CHINSE 275.

### JAPANESE

#### 110. NON-INTENSIVE ELEMENTARY JAPANESE I

Basic structure of the Japanese language. Speaking, reading, writing (Hiragana writing system and about 50 kanji characters), and aural comprehension.

#### 120. NON-INTENSIVE ELEMENTARY JAPANESE II

The sequel to JAPAN 110; the basic structure of the Japanese language. Speaking, reading, writing, (Katakana writing system and additional 50 kanji characters), and aural comprehension. The sequence of JAPAN 110 and 120 is equivalent to JAPAN 126.

#### 126 (I). INTENSIVE ELEMENTARY JAPANESE I

For those with no previous training in Japanese. Intensive introduction to Japanese. 5 class hours. Honors sections (2 credits) may be added in conjunction with this course, focusing on reading and writing practice. Credit, 6.

#### 130. NON-INTENSIVE ELEMENTARY JAPANESE III

Non-intensive instruction in elementary Japanese: speaking, oral comprehension, reading,

and writing (including about 100 new kanji characters). Prerequisites, JAPAN 120, 126 or permission of instructor.

#### 146 (II). INTENSIVE ELEMENTARY JAPANESE II

Intensive study and review of the basic structure of Japanese: reading, writing and conversation. Prerequisite, JAPAN 126. 5 class hours. Honors sections (2 credits) may be added in conjunction with this course, focusing on reading and writing practice. Credit, 6.

#### 226 (I), 227 (II). INTENSIVE INTERMEDIATE JAPANESE I, II (C)

Intensive reading and analysis of literary texts; discussion in Japanese. Prerequisite, JAPAN 146; 226 is prerequisite to 227. 5 class hours. Credit, 6 each.

#### 230 (I), 231 (II). JAPANESE ART AND CULTURE (C)

The development of Japanese art (map, painting, sculpture, and architecture) from the Archaeological Age to the end of the Muromachi Period in 1573 (I), and then to the present day (II). Particular attention to cultural and historical background and to the relationship between written materials and artistic work. Class organized around lectures, slides, and discussions. (230 is not prerequisite to 231.)

#### 235. INTRODUCTION TO JAPANESE CIVILIZATION I

Development of Japanese Culture: Traditional cycle of life, family and society, occupation, houses and furnishings, clothing and food and drink.

#### 236. INTRODUCTION TO JAPANESE CIVILIZATION II

Development of Japanese Culture: Relationship of nature, seasons and annual functions, religion, sports, language and expression, and the Japanese way of thinking. Prerequisite, JAPAN 235.

#### 243. JAPANESE LITERARY TRADITION I (C)

Introduction to Japanese poetry, the novel and the theatre among the literary products of the first thousand years of high culture in Japan.

#### 244. JAPANESE LITERARY TRADITION II (C)

Introduction to the problems of traditional and modern, native and foreign as seen in Japanese literature between 1600 and present.

#### 275. JAPANESE LINGUISTICS I

The structure of Japanese in the light of modern linguistics. An honors section (1 credit) may be added in conjunction with this course for extra reading and discussion on the given subjects.

6. JAPANESE LINGUISTICS II  
Study of the structure of Japanese in the light of the concept "universal grammar". An honors section (1 credit) may be added in conjunction with this course for extra reading and discussion on the given subjects.

0 (I), 321 (II). READINGS IN HUMANITIES I, II (C)  
Extensive reading and discussion, in Japanese, of modern Japanese literary, scholarly and journalistic materials. Prerequisite, JAPAN 7; 320 is Prerequisite to 321.

2. READINGS IN SOCIAL SCIENCE  
Essays and papers written in Japanese by modern social scientists such as Masao Maruyama, Shigeto Tsuru, Hidetoshi Kato, Tetsuo Tsurumi and Masataka Koosaka. Selections from newspaper articles included.

6. TOPICS IN JAPANESE LINGUISTICS  
Critical examination of some of the current linguistic theories in respect to the Japanese language. Prerequisite, JAPAN 275, 376 or permission of instructor.

LECTURE COURSES (Knowledge of an Asian language not required)

ASIAN STUDIES 150. THE DEVELOPMENT OF MODERN ASIA (D)  
Problems of the nations of East and Southeast Asia created by the transition from traditional, pre-modern status to modern nationalism and full involvement in world affairs. Primarily for students with no background of study of modern Asia.

JAPANESE 230 (I), 231 (II). JAPANESE ART AND CULTURE

JAPANESE 235 (I), 236 (II). INTRODUCTION TO JAPANESE CIVILIZATION

JAPANESE 243 (I), 244 (II) (C). JAPANESE LITERARY TRADITION

CHINESE 240 (C). FICTION EAST AND WEST

CHINESE 242 (C). CHINESE TRADITIONAL VERNACULAR LITERATURE

CHINESE 251 (C). CONTEMPLATIVE LITERATURE EAST AND WEST

CHINESE 252 (C). CONTEMPLATIVE POETRY EAST AND WEST

CHINESE 385 (I), 386 (II). SPECIAL PROBLEMS

Credit, 1-6

JAPANESE 385 (I), 386 (II). SPECIAL PROBLEMS

Credit, 1-6

## Classics

*Head of Department:* Professor Gilbert Lawall; *Professors:* Dyer, Phinney; *Associate Professors:* Cleary, Coar, Stavrolakes; *Assistant Professors:* Isbell, Marry, Will.

The Classics major offers a choice among the following areas of concentration: 1) Classical Civilization and Literature, 2) Greek, 3) Latin, 4) Mediterranean Archaeology, and 5) Religion. The Classical Civilization and Literature Concentration requires a minimal amount of study of Greek or Latin, and the remainder of the courses are taken in ancient mythology, religion, literature in translation, history, philosophy, art and archaeology, and the classical tradition. Some courses may be taken in departments other than Classics. The Greek and Latin Concentrations prepare for graduate work and teaching careers at the secondary school or college levels. The Mediterranean Archaeology Concentration is interdepartmental and interdisciplinary in nature and prepares for graduate study and careers in teaching, field archaeology, and museum work. The Religion Concentration can accommodate the needs of those who wish a broad undergraduate major in religion, those who plan to enter seminary, and those who plan to continue with graduate studies in religion or Near Eastern Studies. The Religion Concentration is interdepartmental and interdisciplinary and usually includes courses in the departments of religion at the neighboring colleges. Specific requirements for each of these concentrations are available from the Department of Classics. Honors programs may be arranged in each concentration.

## CLASSICS

The following courses require no knowledge of Greek or Latin.

100 (I), (II). GREEK CIVILIZATION (C)  
A survey of ancient Greek literature, art, and society. The impact of the Greek experience on the cultural life of the Western world.

102 (I), (II). ROMAN CIVILIZATION (C)  
A survey of ancient Roman culture and civilization. The impact of the Roman experience on the cultural life of the Western world.

105 (I), (II). GREEK AND LATIN ELEMENTS IN ENGLISH  
Historical survey of the induction of Greek and Latin words into English; Greek and Latin roots, prefixes, and suffixes in English; spelling, meaning, problems of expression.

205 (I). THE MATERIAL WORLD OF THE ROMANS

The Romans as people on the basis of the archaeological evidence about their daily lives (their houses, pottery, coins, glass, textiles). Special attention to the finds from Pompeii.

206 (II). THE ANCIENT CITY (D)  
The city and city planning in the ancient Near East, Greece, and Italy; sociological and economic aspects; the city of Rome and its urbanization in the Roman Empire.

225 (I), (II). MYTHOLOGY IN THE ANCIENT WORLD I (C)  
A survey of ancient Greek myths with their Babylonian or Hebrew prototypes; authority of written or visual sources; structure of myth; religious, artistic, and social observances.

226 (I), (II). MYTHOLOGY IN THE ANCIENT WORLD II (C)  
A survey of ancient Egyptian myths with their Indo-Iranian, Greco-Roman, and early Christian survivals; authority of written or visual sources; structure of myth; religious, artistic, and social observances.

228 (I). RELIGIONS OF THE GREEK WORLD (C)  
Origins and development of ancient Greek worship, deities, cults, festivals, and life-crisis ceremonies; prehistoric, Near Eastern, and Indo-Iranian influences; chauvinistic, philosophical, and mystical reactions to received religion.

229 (II). RELIGIONS OF THE ROMAN WORLD (C)  
Origins and development of native Roman worship, deities, cults, festivals, and life-crisis ceremonies; importation of foreign cults and festivals; the failure of paganism and the victory of Christianity.

261 (I). GREEK LITERATURE IN TRANSLATION (C)  
Homer, lyric poetry, the major dramatists, selected dialogues of Plato, Herodotus, Thucydides, and their relations to the classical tradition.

262 (II). LATIN LITERATURE IN TRANSLATION (C)  
The development of Latin literature from Greek models; the emergence of uniquely Roman forms of comedy, tragedy, epic, lyric, pastoral, satire, history, biography, and novel; their influence on later literatures.

265 (II). GREEK DRAMA IN TRANSLATION (C)  
Thematic analysis of Greek tragedies and comedies; typical characterization; cultural, political, and social values as expressed in the plays.

275 (I), (II). THEMES IN CLASSICAL LITERATURE (C)

A major theme in Classical literature, such as the hero or anti-hero, women, the individual and society, urban problems, the rise of science, religious or philosophical issues.

285 (II). THE DEEP STRUCTURES OF GREEK THOUGHT (C)

The development of thought in the ancient world from the time of Homer to Aristotle, tracing the evolution of mental concepts and ways of thinking about humanity and the human environment.

295 (I), (II). INTERPRETING ANCIENT MYTH (C)

A view of what thinkers have said about ancient myth for over 3,000 years; misreadings of ancient myths; shaping of popular modern views of ancient myth; future trends of myth interpretation.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors office. Credit, 4.

399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

GREEK

110 (I). ELEMENTARY CLASSICAL GREEK (INTENSIVE)

An introduction to the elements of the Greek language. 5 class hours. Credit, 5.

111 (I). ELEMENTARY NEW TESTAMENT GREEK (INTENSIVE)

An introduction to the elements of koine Greek, the language of the New Testament. 5 class hours. May not be taken for credit in addition to GREEK 110. Credit, 5.

140 (II). INTERMEDIATE CLASSICAL GREEK (INTENSIVE)

Mastery of the basic structures of the Greek language and attainment of intermediate competence in reading Greek prose. Prerequisite, GREEK 110. 5 class hours. Credit, 5.

141 (II). INTERMEDIATE NEW TESTAMENT GREEK (INTENSIVE)

Mastery of the basic grammar of New Testament Greek and practice in reading from the New Testament. Prerequisite, GREEK 111. May not be taken for credit in addition to GREEK 140. 5 class hours. Credit, 5.

150 (I), 160 (II). THE READING OF GREEK (C)

The development of increased competence in reading Greek prose.

210 (I). GREEK POETRY (C)

Selections from Homer's *Iliad*.

220 (II). GREEK PROSE (C)

Selections from Herodotus.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

LATIN

110 (I), (II). ELEMENTARY LATIN (INTENSIVE)

An introduction to the elements of the Latin language. 5 class hours. Credit, 5.

115 (I), 125 (II). LATIN AS A BASIC LANGUAGE

An introduction to the Latin language especially for students learning their first foreign language and for those who have experienced difficulty with foreign languages. Aims at better understanding and use of English and a firm basis for further language study. May not be taken for credit in addition to LATIN 110.

140 (I), (II). INTERMEDIATE LATIN (INTENSIVE)

Mastery of the basic structures of the Latin language and attainment of intermediate competence in reading Latin prose. Prerequisites, LATIN 110 or 125 or 2 to 3 years of Latin in high school. 5 class hours. Credit, 5.

200 (I), (II). AENEAS TO AUGUSTUS (C)

Selections from prose and poetry illustrating the development of Roman history from Aeneas to the Augustan Principate. Prerequisites, LATIN 140 or 3 to 4 years of Latin in high school.

201 (I), (II). CATULLUS (C)

Selections from Catullus. Prerequisites, LATIN 150 or 4 to 6 years of Latin in high school.

205 (I). ORAL INTERPRETATION OF LATIN LITERATURE

Practice in the expressive reading of Latin texts. 1 or more class hours. Credit, 1. May be repeated up to 3 credits.

215 (I). GRAMMAR AND STYLE

The structure of the Latin sentence and the aspects of Latin grammar foreign to English studied by contrasting representative Latin prose authors with English prose and translating English into Latin.

(Three of the following Latin courses, 325-3 will be offered each semester.)

325. THE LATIN POLITICAL TRACT (C)

Selections from Sallust and Caesar accompanied by an historical and literary analysis of their works.

326. LATIN DIDACTIC EPIC (C)

Selections from Lucretius, Vergil's *Georgics* and Ovid's *Ars Amatoria*.

327. LATIN HISTORY AND BIOGRAPHY (C)

Selections from Livy, Tacitus, and Suetonius.

328. LATIN DRAMA (C)

Selected plays of Plautus, Terence, and Seneca.

329. LATIN ESSAYS AND LETTERS (C)

The Roman mind as revealed in the philosophical works of Cicero and the moral epistles of Seneca; Roman private life and personal concerns as revealed in the letters of Cicero and Pliny.

330. LATIN ELEGIAC POETRY (C)

Selections from Catullus, Tibullus, Propertius and Ovid.

331. CICERO'S ORATIONS (C)

The major orations of Cicero; their social and political background.

332. LYRIC POETRY (C)

Selected lyrics of Catullus and Horace.

333. VERGIL'S *AENEID* (C)

The entire poem with attention to tradition and contemporary critical perspectives and evaluations.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit,

398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit,

399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit,

## Comparative Literature

*Chairman of Department:* Professor Sarah Wall. *Professors:* Anderson, Will; *Associate Professors:* Miller, Moebius; *Assistant Professors:* Lenson, Levine, Lucid, Martin; *Adjunct Instructor:* Portuges. *Associated Faculty:* Caser, Mankin, Porter, Sturm (French and Italian); Page (English); Beekman, Lennox, Schiffrin (Germanic Languages); Lester (African American Studies) Naff (Asian Studies).

Comparative Literature is the study of literature without regard to national boundaries. It encourages detailed scrutiny of literary masterworks in the original language, comparisons between national literary traditions, and comparisons with other spheres of human expression. Comparative Literature sees literary history in an international perspective, and literary forms in the light of modern critical theories. It embodies a variety of approaches to an understanding of the meaning and function of literature, considered both in itself and in its interdisciplinary dimensions.

Three different types of programs lead to the B.A. degree in Comparative Literature. All three programs emphasize analysis and comparison of several national literary traditions; the second type of program explores, in addition, the relation of literature to one other discipline (e.g. art, philosophy, anthropology, psychology, linguistics, sociology). The first two types of program are designed for the student who would like to be prepared to go on to graduate school in Comparative Literature or in some allied field. The third type of program is designed for the student who does not plan to go on to graduate school but wishes to read widely and in some depth in two different literatures and languages. All three programs combine courses from related departments with core courses in Comparative Literature. Within the guidelines for the major, students work closely with Comparative Literature faculty to develop individual programs of study. A detailed statement concerning these three types of programs and related requirements may be obtained at the Comparative Literature office.

### 1. INTRODUCTION TO COMPARATIVE LITERATURE (C)

Literature as one of the modes of cultural expression. Comparisons and contrasts drawn from contemporary cinema, practical theater, music, and graphic art as well as from older works of art, both from the Occidental and the Oriental traditions.

### 2. MODERN EUROPEAN LITERATURE (C)

The ways in which 20th-century literature has posed and answered questions about the human condition. The political and artistic consequences of the loss of tradition and community in an age of technology and revolutionary ideology. Readings from Marx,

Nietzsche, Malraux, Camus, Brecht, Artaud, and less well-known representative works from Italian, Spanish, and East European literature.

### 202. MODERN EUROPEAN LITERATURE II (C)

The tradition of subjectivity in modern literature, particularly fiction, focusing on the conflict between social ethic and individual needs and desires. The superfluous human being as prototype of the overly self-conscious protagonists of modern narrative; the illusory relationship between art and social deviance.

### 203. THE EUROPEAN NOVEL (C)

French, Spanish, German, Russian, and English novels of the 17th to the 20th centuries. In the context of the consciousness they reflect, describe, and transcend.

### 204. CLASSICS OF EUROPEAN LITERATURE (C)

Major works from the earlier literatures of Europe in English translation, with emphasis on a major genre such as the epic or drama. The interdependence of art and general culture, shown through lectures on religion, sociology, politics, and economics.

### 205. THE ARTIST NOVEL (C)

The artist's search for his roots in landscape and in mythical and legendary prototypes. An introduction to the cultural milieu of the displaced, supercultivated European of the late 19th and 20th centuries, with emphasis on Joyce and Proust.

### 214. FROM DANTE TO SHAKESPEARE (C)

Major developments in the literary imagination which took place in European literature between the 14th and 17th centuries. Close analysis of texts by major writers of the period in their historical and literary contexts.

### 231. MODERN AFRICAN LITERATURE (C)

An introduction to the modern literature of Africa south of the Sahara, examining such topics as the role of literature and the writer in an emergent country, the blending of Western and indigenous elements in a new literature, and the literary expression of color consciousness.

### 240. FICTION EAST AND WEST (C)

A comparative approach to major works of fiction and their evolution within the Oriental and Occidental traditions, investigating the various forms, meanings, and uses of traditional fiction in Eastern and Western literature. The encounter of Orient and Occident in 20th-century examples of prose fiction from the works of Hesse, Forster, Malraux, Salinger, Kerouac, and Brautigan. Readings from Chinese fiction in English translation include *The Way of Chuang-tzu*, *All Men Are Brothers*,

*ers*, *Monkey*, *Prayer Mat of Flesh*, and *Red Chamber Dream*.

### 241. CONTEMPORARY CHINESE LITERATURE (C)

An introduction to continuity and change in 20th-century Chinese fiction, drama, and poetry, including both Communist and non-Communist literature of the Chinese mainland. The impact of Western literature on China and the resultant Chinese "Literary Renaissance." The relation between literature and politics in modern China; consideration of Chairman Mao Tse-tung's concept of literature as "Revolutionary Power." Readings in English translation include Mao Tse-tung, Lu Hsun, Lao-she, Pa Chin, Mao Tun, Kuo Mo-jo, Shen Ts'ung-wen, André Malraux.

### 242. CHINESE TRADITIONAL VERNACULAR LITERATURE (C)

The development of Chinese fiction and drama from the medieval story-teller tradition through the modern period of literary symbolism. Chinese concepts of the novel and theatre; the relation between erotic and allegoric literature in the evolution of Chinese society.

### 243. JAPANESE LITERARY TRADITION I (C)

Japanese literature from 500 A.D. to 1600 A.D. Readings, in English translation, of court poetry, the *Tale of Genji*, the military tale, and the No theatre. The impact of Buddhism and of Chinese thought and literature on the course of Japanese literary development; the role of Zen in medieval Japanese aesthetics, and early and medieval Japanese literature as an expression of Japanese civilization.

### 244. JAPANESE LITERARY TRADITION II (C)

Japanese literature since 1600. Linked verse and Haiku, the rise of popular theatre and fiction in the townsmen's culture in the 17th and 18th centuries. The modern novel (since 1885) and the interaction of Japanese and Western intellectual and artistic traditions. Novelists include Natsume Soseki, Tanizaki, Jun'ichiro, Kawabata Yasunari, and Mishima Yukio.

### 251. CONTEMPLATIVE PROSE EAST AND WEST (C)

A critical reading of contemplative prose written by contemplatives and monks of the Oriental (Buddhist, Taoist, Confucian) and Occidental (Christian) traditions. Comparisons between the imaginative presentation of concepts of reality, the self, and salvation in selected Eastern and Western prose. Consideration of how mystics of different traditions perceive ultimate reality and how an approach may be made to such reality.

### 291. MYTH AND LITERATURE (C)

The myths of creation and of self-develop-

ment; emphasis on the literary treatment of mythical experience. Mythical trends and models identified in ancient literary texts and in very recent poetry and fiction.

### 307. LITERARY GENRE

A major or minor category of literature examined through theoretical approaches and the close reading of representative texts from several literatures. Topics offered in rotation; the concept of genre may itself be one of these.

### 311. EUROPEAN LITERATURE OF THE MIDDLE AGES I (C)

Medieval romance and lyric from France, Germany, Italy, England, and Spain. Close analysis of texts: the literary, social and psychological conventions. The altered perspectives on those conventions expressed in late medieval works.

### 312. EUROPEAN LITERATURE OF THE MIDDLE AGES II (C)

Medieval allegory and drama from France, Germany, Italy, England, and Spain. The development from the late Classical and early Christian periods, of the allegorical tradition and of the dramatic tradition which evolved from it. The medieval imaginative conventions as expressed in allegory, and the changes of those conventions in allegories and drama of the 14th century.

### 321. RENAISSANCE PERSPECTIVES (C)

The tradition of the Middle Ages and the heritage of the Renaissance: the rhetoric of writing and the arts of reading and interpretation as handed down to the Renaissance.

### 322. THE SHAPE OF THE RENAISSANCE (C)

Diversity and changes of literary style in the 15th and 16th centuries, with emphasis on cultural continuity; an examination of critical methods.

### 331. THE ENLIGHTENMENT (C)

Characteristic themes, ideas, and attitudes in 18th-century European literature. Focus on major representatives of the Age of Reason such as Pope, Swift, and Johnson in England; Montesquieu, Voltaire, and Diderot in France; Wieland and Lessing in Germany.

### 341. ROMANTICISM (C)

The Western Romantic movement as exemplified by its principal figures from the Age of Rousseau to 1850.

### 342. IDEALISM TO REALISM (C)

Developments such as realism, naturalism, aestheticism, and neo-romanticism in the literatures of England, France, Germany, and Russia, against the background of 18th century idealism.

### 347. LITERATURE AND MUSIC (C)

Relations between music and literature from

Plato to Samuel Beckett. The aesthetics of Schopenhauer and the synthesis of Wagner as the crux of a modern problem of meaning and structure in both literature and music.

### 351. SYMBOLIST POETRY (C)

The development of symbolism during the 19th and 20th centuries as seen in the poetry of France (Baudelaire, Verlaine, Mallarmé, Rimbaud), Germany (George, Hofmannsthal, Rilke), and England (Yeats, Pound, Eliot).

### 352. MODERN DRAMA (C)

Currents in Western drama since Ibsen, with emphasis on one or more of the following topics: naturalism, symbolism, neo-romanticism, expressionism, folk drama and fantasy, epic realism, the "grotesque" and "absurd" theater.

### 361. THE CONTEMPORARY NOVEL (C)

Commitment and innovation in the modern novel. The nature of literary and extraliterary influences, trends, and themes that define and establish the current major traditions of the novel.

### 371. EUROPEAN EPIC POETRY (C)

Literary analysis of major classical and Renaissance epics (Homer, Vergil, Dante, Milton) and three related heroic poems ("Gilgamesh," "Beowulf," "Chanson de Roland"), with emphasis on their intrinsic qualities as works of art. Specific epic techniques and the general epic tradition related to other genres and literary problems; examination of the sources of many later patterns and themes.

### 375. INTERNATIONAL LITERARY RELATIONS (C)

Subjects and problems common to two or more different national literatures. The interplay between text, language, history, and nationality.

### 376. THEORIES OF COMPARATIVE LITERATURE

A survey and critique of various theories of the nature of comparative literature; practical discussion of the methodology of research and speculation in the discipline.

### 380. THEORIES OF LITERATURE (C)

Analysis and comparison of major contemporary theories of literature (formalist, structuralist, Marxist, phenomenological). Background reading in Plato and Aristotle as roots of the Western literary-critical tradition. A problem-oriented course with much practical criticism; emphasis on the ability to understand and assess literary works from various points of view.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 398. SENIOR HONORS

Senior research, thesis option, by arrangement with Department and/or Honors Office. Credit, 1

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. Arrangement with Department and/or Honors Office. Credit, 1

The English Department offers courses in the study of English and American literature courses in the relationship between literature and other disciplines and art forms, a courses in creative and expository writing. Innovative and experimental courses are taught under the rubrics of English 390-3 and 380-384. Descriptions of all courses are available shortly before preregistration at the English Department Undergraduate Study Office in Bartlett 252.

English majors are required to complete at least 30 credits of work in English courses numbered 201 and above. They are also required to complete one of the following distribution options:

**Option A: Approaches to Literature:** one course in literature of a period before 1800; one course in non-English literature; three of the four following kinds of courses: language, Shakespeare, major British or American author, literary genre.

**Option B: Major Authors:** two courses in masterpieces of western literature; two courses in major British writers; one course

Shakespeare. An exact list of which courses fulfill each of these categories is available in the Department's Undergraduate Studies Office.

The English major is encouraged to work within the flexible framework of the major to create a coherent program of study. The department offers concentrations within the major, such as American Civilization, Journalistic Studies, Creative Writing or Literature and Society; other concentrations are also available. Students seeking advice concerning their programs of study should go to Bartlett 472. Students who wish to become certified to teach secondary English must apply to the English Education office (Bartlett 474) for admission to the program; successful completion of the major requirements does not guarantee a place in the English Education program.

#### 1 (I), (II). MAN AND WOMAN IN LITERATURE (C)

Literature treating the relationship between man and woman. Topics may include the nature of love, the image of the hero and of the heroine, and definitions, past and present, of the masculine and the feminine. Readings may include works by Lawrence, Freud, Shakespeare, Cummings, Homer, the Brontes.

2 (I), (II). READING FICTION (C)  
An introduction to themes and techniques of fiction through a reading of selected short stories and novels with emphasis on such matters as structure, style, point of view, and the like.

3 (I), (II). READING POETRY (C)  
An introduction to themes and forms of poetry through a reading of selected poems in English. Emphasis on such poetic techniques as word choice, imagery, and structure, and on such modes as the ballad, lyric, sonnet, ode and dramatic monologue.

4 (I), (II). READING DRAMA (C)  
An introduction to themes and techniques of drama through a reading of selected plays. Emphasis on such matters as structure, style, staging, and tragic and comic modes.

5 (I), (II). NATURE AND LITERATURE (C)  
Literature that deals with man's relationship to his environment. Topics may include changing conceptions of nature, changing attitudes toward nature. Readings may include works by Conrad, Darwin, Thoreau, Shakespeare, Frost, Homer, Faulkner.

6 (I), (II). LITERATURE AND REALITY (C)  
Literature that deals with man's attempt to understand what is real, what is illusory, what visions are profitable, necessary, dangerous. Readings may include works by Cervantes,

Virginia Woolf, Plato, Shakespeare, Wallace, Stevens, Kerouac.

#### 201 (I), (II). MAJOR BRITISH WRITERS I (C)

Students read, discuss and write about such major authors or works as *Beowulf*, Chaucer, Spenser, Donne, and Milton.

#### 202 (I), (II). MAJOR BRITISH WRITERS II (C)

Students read, discuss and write about such major authors as Pope, Wordsworth, Browning, Eliot, and Yeats.

#### 203 (I), (II). THE BIBLE: MYTH, LITERATURE AND SOCIETY

The several main genres of Biblical literature in their historical setting; attention to the principles of literary, mythological, and sociological interpretation; the literary influence of the Authorized Version.

#### 213 (I). EARLY ENGLISH LITERATURE IN TRANSLATION (C)

Readings (in translation) of works from English literature before 1100 A.D. Religious and social ideas of the period as reflected in several types of poetry. Introduction to Old English prose.

#### 214 (II). MIDDLE ENGLISH LITERATURE EXCLUSIVE OF CHAUCER (C)

Readings of selected works written in the later Middle Ages in England, exclusive of Chaucer's.

#### 215 (I). CHAUCER'S *TROILUS AND CRISEYDE* AND OTHER LOVE POEMS (C)

The complaints, dream visions, later short poems, the translation of Boethius, and *Troilus* as combinations of medieval art and thought with pre-Renaissance motifs.

#### 216 (II). CHAUCER'S *CANTERBURY TALES* (C)

A close study of the General Prologue and representative tales as examples of the poet's mature techniques and extraordinary realism.

#### 221 (I). SHAKESPEARE (C)

Examination of Shakespeare's dramatic art and leading ideas through a study of approximately a dozen plays.

#### 222 (II). SHAKESPEARE (C)

Same method as 221 but with a different group of plays. Either semester or both may be taken for credit.

#### 225 (I). 16TH CENTURY ENGLISH LITERATURE (C)

Selections from the non-dramatic prose poetry of the early English Renaissance through the Age of Elizabeth, including such writers as Skelton, Wyatt, Surrey, More, Gascoigne,

Spenser, Sidney, Raleigh, Marlowe and Shakespeare. Emphasis on the rise of humanism.

#### 226 (II). ELIZABETHAN AND JACOBEAN DRAMA (C)

The drama of the English Renaissance. Selected works by several major Elizabethan and Jacobean playwrights, including Marlowe, Jonson, Chapman, Middleton, Webster, and Ford. Emphasis on the artistic and intellectual character of the English Renaissance as reflected in drama.

#### 233 (I), (II). 17TH CENTURY ENGLISH LITERATURE (C)

Selections from the poetry and prose of the late Renaissance in England, including works by such authors as Donne, Jonson, Browne, Burton, Marvell, and Milton. Emphasis on the challenge of the new science to the traditional humanism.

#### 236 (I), (II). MILTON (C)

Development of the mind and art of Milton as a figure of the English Reformation and the late Renaissance. Emphasis on *Paradise Lost*.

#### 238 (I). ENGLISH LITERATURE OF THE RESTORATION (C)

Drama, prose, and poetry of the later 17th century, illustrating the thinking of the period that gave rise to great comedy and satire. Emphasis on such figures as Dryden, Butler, Wycherley, Rochester, and Congreve.

#### 241 (I). ENGLISH LITERATURE OF THE 18TH CENTURY (C)

The literature of the Augustan Age. Emphasis on Swift and Pope.

#### 242 (II). ENGLISH LITERATURE OF THE 18TH CENTURY (C)

The literature of the later 18th century, with emphasis on the Johnson Circle. A continuation of 241; may be elected independently.

#### 243 (I), (II). THE RISE OF THE NOVEL (C)

Significant representative novels, including works of such authors as Richardson, Fielding, Sterne, Smollett and Austen.

#### 251 (I). THE ROMANTIC POETS (C)

The Romantic Movement as revealed in the poetry of Wordsworth, Coleridge, and the other early Romantics.

#### 252 (II). THE ROMANTIC POETS (C)

The Romantic Movement, with particular attention to Byron, Shelley, and Keats.

#### 253 (I), (II). THE ENGLISH NOVEL FROM SCOTT THROUGH HARDY (C)

The reading and discussion of significant representative novels, including works of such authors as Dickens, Thackeray, the Brontes, Eliot, and Hardy.

255 (I). ENGLISH PROSE OF THE  
ROMANTIC PERIOD (C)

The techniques and ideas of the chief prose writers (from 1798 to 1837), including Wordsworth, Coleridge, Lamb, Hazlitt, DeQuincey, and the early Carlyle.

256 (II). ENGLISH LITERATURE OF THE  
VICTORIAN AGE (1837-1900) (C)

Prose and poetry of several major figures: Carlyle, Macaulay, Newman, Mill, Tennyson and Browning.

257 (I), (II). ENGLISH LITERATURE OF  
THE VICTORIAN AGE (1837-1900) (C)

Prose and poetry of Ruskin, Mill, Huxley, Pater, Arnold, Wilde, Rossetti and the Pre-Raphaelite Brotherhood. A continuation of 256; may be elected independently.

261 (I). THE MODERN NOVEL: 1890-1930  
(C)

The expanding form of the novel and increasing interest in social causes as exhibited in some twelve novels.

262 (II). THE MODERN NOVEL: 1930-1960  
(C)

Analysis of some twelve novels. A continuation of 261, but may be elected independently.

263 (II). MODERN BRITISH AND  
AMERICAN DRAMA (C)

Representative dramatists since the late 19th century, including Shaw, O'Casey, O'Neill, Williams, and others. Emphasis on trends in 20th-century dramatic art.

264 (I). MODERN EUROPEAN DRAMA (IN  
TRANSLATION) (C)

Major modern dramatists beginning with Ibsen and including Chekhov, Pirandello, Strindberg, Giraudoux. Emphasis on comparative currents in various European nations.

265 (I). 20TH-CENTURY LITERATURE OF  
IRELAND IN ENGLISH (C)

Nineteenth-century background; the Irish Renaissance; such major figures as Yeats, Synge, Joyce, and O'Casey; recent and contemporary writing.

266 (I), (II). MODERN POETRY (C)

20th-century poetry to 1945; such authors as Hardy, Hopkins, Whitman, and Emily Dickinson.

267 (I), (II). CONTEMPORARY POETRY  
(C)

Poetry in English since 1945.

268 (I), (II). JAMES JOYCE (C)

Majors work of James Joyce in prose, drama, and lyric poetry, emphasizing *Ulysses* or *Finnegans Wake*.

271 (I). EARLY AMERICAN LITERATURE  
(C)

From the Puritan, Colonial, and Federalist periods. Authors include Edward Taylor, Cotton Mather, Jonathan Edwards, John Woolman, Benjamin Franklin, Charles Brockden Brown, Philip Freneau, and Washington Irving.

272 (I), (II). AMERICAN POETRY (C)

American poetry from 1800 to the emergence of a modern style early in the 20th century.

273 (I), (II). 19TH-CENTURY AMERICAN  
LITERATURE (C)

Significant productions in expository prose, fiction, and poetry; the emergence of an American literature.

274 (II). 20TH-CENTURY AMERICAN  
LITERATURE (C)

Movements, modes, and representative voices in prose, fiction, and poetry. A continuation of 273; may be elected independently.

275 (I), (II). MAJOR AMERICAN WRITERS  
(C)

Emerson, Hawthorne, James, and any of the following by announcement each semester: Howells, Adams, Dos Passos, Lewis, Anderson, Fitzgerald, Hemingway.

276 (I), (II). MAJOR AMERICAN WRITERS  
(C)

Thoreau, Melville, Whitman, and any of the following by announcement each semester: Cooper, Poe, Dickinson, Twain, Crane, Dreiser, Faulkner, Wolfe.

280 (I), (II). INTRODUCTION TO  
FOLKLORE (C)

Beginning with the ballad as the nucleus of other folklore genres.

281 (II). AMERICAN FOLKLORE (C)

Oral traditions in America, with emphasis on surviving British lore, American Indian lore, Negro lore, and recent folk materials.

282 (I). LITERARY CRITICISM: CLASSIC  
AND NEO-CLASSIC (C)

An introduction to literary criticism; emphasis on the major philosophical critics from Plato and Aristotle to the 19th century.

283 (II). MODERN LITERARY CRITICISM  
(C)

Theories and techniques of modern criticism; emphasis on the 20th century.

284 (I). LITERATURE AND  
PSYCHOLOGICAL CRITICISM (C)

An examination and application of theories and techniques of psychological criticism to selected works of literature. The theoretical focus is psychoanalytic (Freudian); other theories (Jungian, phenomenological, existential) used as time permits.

287 (I), (II). WOMAN AS HERO (C)

The concept of heroism as modified or developed in literary works having women as central characters.

288 (I). THE POLITICAL NOVEL (C)

Relationships between politics and the novel. Political setting vs. political meaning. Social change, power politics and institutions, and the personal dilemma. Emphasis on literary analysis and class discussion.

289 (I). FILM AND LITERATURE (C)

The historical, formal, and aesthetic relationships between literature and the cinema. Emphasis on problems raised in literary aesthetics as a result of film.

312 (I), (II). HISTORY OF THE ENGLISH  
LANGUAGE

The development of English; vocabulary and usage levels, grammars, and dictionary. Attention to matters crucial to the teaching of English in secondary schools.

321 (I). STRUCTURE OF MODERN  
ENGLISH

Introduction to applied English linguistic sounds, forms, and word-order of modern Standard American English; modern grammatical theory.

331 (I), (II). TECHNICAL WRITING

For majors in engineering. Factual and inductive exposition, with emphasis on research, federal, and industrial reports. 2 class hours. Credit, 1.

334 (II). ADVANCED TECHNICAL  
WRITING

Case studies in engineering and industrial reporting and in the writing of technical and professional articles.

337 (I), (II). EXPOSITORY WRITING

The writing of informative prose in the form expected in the students' major fields: report articles, essays.

339 (I), (II). ARTICLE WRITING

Magazine journalism combined with instruction in writing feature or magazine article. Prerequisite, permission of instructor at pre-registration.

341 (I), (II). CREATIVE WRITING

Intensive practice in writing prose fiction, poetry, and occasionally other forms, supplemented by discussion of ideas and technique in contemporary literature.

345 (I or II per demand). CREATIVE  
WRITING

A continuation of 341, with emphasis on fiction. Prerequisite, a grade of B or better ENGL 341.

35 (I or II per demand). **CREATIVE WRITING**

Continuation of 341, with emphasis on poetic imagination. Prerequisite, a grade of B or better in ENGL 341.

37 (I or II per demand). **CREATIVE WRITING**

Continuation of 341 with emphasis on drama. Prerequisite, a grade of B or better in ENGL 341. Note: ENGL 345, 346, and 347 may be repeated for credit.

39 (I). **THE ENGLISH LYRIC (C)**

The lyric as a personal expression of the poetic imagination within a continuing tradition. Important forms of the lyric, such as sonnet, elegy, and ode; examples selected from the whole range of poetry in English.

41 (I). **THE ENGLISH EPIC TRADITION (C)**

Substantial readings in three or four long English poems (such as *Beowulf*, *Forerime*, *Geene*, *Paradise Lost*, *The Prelude*) against the background of classical epic (e.g., *The Iliad*, *The Aeneid*). Emphasis on the ways in which each poet employs traditional epic motifs as a means of defining his own contemporary vision of man and society.

43 (I). **TRAGIC DRAMA (C)**

Examination of plays (mostly Greek, Elizabethan and modern) and critical theories (modern, but with attention to Aristotle and Hegel) in an attempt to sharpen perception of the genre "tragedy."

45 (II). **PROSE FICTION (C)**

The substance and theory of prose fiction. Students may read works that illustrate the range of possibilities within the genre, works that seek to extend the limits of the genre, or works that illustrate one or more types of fiction, such as the historical novel, the novel of manners, the picaresque novel, or the regional novel.

47 (II). **SATIRE, THEORY AND PRACTICE (C)**

Theory and practice of satire, drawing upon a wide range of representative works, largely British and American, from several periods, including novels, short stories, poems, plays and essays, as well as songs, graphics, and when available, film.

49 (I), (II). **ASPECTS OF LITERATURE (C)**

An aspect of literature in English, both British and American, including literary movements, the relations of literature to particular cultural developments, and the thematic criticism.

51 (I), (II). **ASPECTS OF BRITISH LITERATURE (C)**

An aspect of British literature. Specific subject announced at pre-registration.

382 (I), (II). **INDIVIDUAL BRITISH AUTHORS (C)**

Intensive study of one British author, announced at pre-registration.

383 (I), (II). **ASPECTS OF AMERICAN LITERATURE (C)**

An aspect of American literature, announced at pre-registration.

384 (I), (II). **INDIVIDUAL AMERICAN AUTHORS (C)**

Intensive study of one American author, announced at pre-registration.

385, 386. **INDEPENDENT STUDY**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

387 (I), (II). **ADVANCED SHAKESPEARE STUDIES (C)**

Advanced study of Shakespeare within the frame of specific topics which will vary from semester to semester. Restricted to students who have taken ENGL 221 or 222.

391 (I), 392 (II). **SEMINAR**

Normally, several seminars each semester. Topics and instructors announced at pre-registration. For majors, but open to others. Prerequisite, permission of instructor at pre-registration.

393 (I) or (II). **WRITING SEMINAR**

Writing for publication and training in editing related to professional and to University student publications. Prerequisite, permission of instructor at pre-registration. 2 class hours, 1 laboratory period.

398. **SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

399. **SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Journalistic Studies**

Journalistic Studies offers a joint major with the English Department. The major takes a minimum of 15 hours of Journalistic Studies credits and 24 hours of English credits.

200. **INTRODUCTION TO NEWSWRITING AND NEWS REPORTING**

The basic techniques of journalism, print and broadcast. A laboratory course. Students report and write under immediate professional supervision.

201 (I), (II). **INTRODUCTION TO MASS COMMUNICATION**

The communications revolution and freedom of the press, the communication process,

methods of reporting and writing and communication theory.

202 (I), (II). **LANGUAGE AND COMMUNICATION**

Analysis of several approaches of language study, with emphasis on improving journalistic style.

208 (I or II as enrollment warrants).

**COMMUNICATIONS THEORY**

Introduction to journalism as a social and behavioral science concerned with the way in which communications are arranged in our society.

210 (I or II as enrollment warrants).

**INTERNATIONAL COMMUNICATIONS**

Comparative study of mass media in countries other than the United States; the flow of communications among nations.

385, 386. **SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

391 (I), (II). **SEMINAR**

Normally, several seminars each semester. Topics and instructors announced at pre-registration. For majors, but open to others.

392 (II). **FREEDOM OF THE PRESS**

Seminar in freedom of the press; its history, major theories, key cases in Anglo-American law, and recent trends toward redefinition.

398. **SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. **SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**French & Italian**

Chairman of Department: Professor Michelle Dufau.

**FRENCH**

Professors Carrière, Cassirer, P. Johnson, R. Johnson, Mankin, Taylor, Weiner; Associate Professors Busi, Chen, Garaud, Gugli, O'Connell, Porter, Raymond, Rountree, Smith, Sturm; Assistant Professors Berwald, Bragger, Braude, Dugas, Fenoaltea, Lamb, Martin, Santerre; Instructor Tedeschi.

The basic French major, designed for students primarily interested in continuing their studies in graduate school, is supplemented by several extra-departmental options as well as the traditional program designed principally for

those who wish to teach in elementary or secondary schools. The options include a Certificate in Business Administration, Journalism Studies, Western European Studies, Social Thought, and Interpreter's Studies. Additional information may be obtained from Professor Micheline Dufau, Department Chairman.

**110, 120. ELEMENTARY FRENCH**  
For those with no previous creditable training in French. Intensive practice in the four language skills. 3 class hours, 2 laboratory periods.

**111, 121. ELEMENTARY FRENCH FOR VOICE MAJORS.**  
Special sections of 110 and 120.

**123 (I), (II). INTENSIVE REVIEW OF FRENCH**  
Intensive review of French for those who are not ready for third semester work.

**126 (I), (II). INTENSIVE ELEMENTARY FRENCH**  
For those with no previous training in French. Intensive practice in the four language skills.  
*Credit, 6.*

**130 (I), (II). INTERMEDIATE FRENCH**  
Intensive study and review. Readings in modern French literature. Normally, a section for Franco-Americans is offered. Prerequisite, either FRENCH 123 or 126, or equivalent.

**131 (I), (II). INTERMEDIATE FRENCH: ORAL**  
A third semester course for those primarily interested in developing their oral skills in French.

**132 (I). INTERMEDIATE FRENCH: HONORS or MAJORS**  
For honor students and majors. Intensive review of grammar with emphasis on all four skills.

**141 (I), (II). INTERMEDIATE FRENCH: ORAL**  
A continuation of 131.

**142 (I), (II). INTERMEDIATE FRENCH: HONORS or MAJORS**  
For honor students and majors. Stresses composition as well as reading and discussion.

**144 (I), (II). INTERMEDIATE FRENCH: FICTION**  
Stresses the reading of contemporary fiction.

**145 (I), (II). INTERMEDIATE FRENCH: READINGS IN THE HUMANITIES**  
Stresses reading of non-fiction.

**146 (I), (II). INTENSIVE INTERMEDIATE FRENCH**  
Covers third and fourth semesters in one.  
*Credit, 6.*

**147 (I), (II). INTERMEDIATE FRENCH: READINGS IN THE SOCIAL SCIENCES**

**148 (II). INTERMEDIATE FRENCH: READINGS IN MATHEMATICS AND SCIENCES**

**150. LANGUAGE AND LITERATURE (C)**  
Intensive study of short literary texts beyond the intermediate level for students not prepared to take FRENCH 171, 172, but who desire to further develop the four language skills. Prerequisite, a FRENCH 140 level course. 3 class hours, 1 laboratory session.

**151. INTERMEDIATE GRAMMAR REVIEW**  
For students who feel the need of formal French grammar beyond the intermediate level.

**161 (I), (II). ORAL FRENCH, PHONETICS AND PHONEMICS**  
Intensive practice of French pronunciation through a knowledge of its sound system.

**162 (I), (II). CONVERSATION**  
Practice in conversational French. Prerequisite, FRENCH 161.

**171 (I), (II). GREAT WORKS — POETRY, NOVEL (C)**  
Selected complete works of several periods in poetry and novel. Prerequisite for advanced courses in French.

**172 (I), (II). GREAT WORKS — THEATER, ESSAY (C)**  
Selected complete works of several periods in non-fiction and the theater. Prerequisite for advanced courses in French.

**261 (I), (II). ADVANCED GRAMMAR**  
For students who feel the need of more formal French grammar beyond the intermediate level.

**262 (I), (II). ADVANCED CONVERSATION**  
Additional oral practice for students who have completed FRENCH 161-162. (Students who have completed 161 and who have a strong background in oral production may be excused from 162 by permission of the Department.)

**263 (I), (II). FRENCH COMPOSITION**  
Advanced composition, required of French majors.

**264 (I), (II). COMPOSITION AND TRANSLATION**  
Advanced composition and translation; required of French majors.

**265 (I). BUSINESS FRENCH**  
Familiarizes students with and teaches

expression of the vocabulary and terminology of French business and financial language. Prerequisite, good command of French.

**270 (I) or (II). THEMES IN FRENCH LITERATURE (IN TRANSLATION) (C)**  
A given theme in French literature as illustrated in a series of translated works. The theme is announced in advance. Not to be taken for major credit in French.

**271 (I). FRENCH CIVILIZATION**  
French civilization to 1800. Designed for intelligent understanding of the literature and thought of France through a knowledge of its background.

**272 (II). FRENCH CIVILIZATION**  
Designed for an intelligent understanding of contemporary French literature through knowledge of its recent background.

**273 (II). FRANCOPHONE CIVILIZATION OUTSIDE FRANCE (C)**  
Introduction to common characteristics and problems of francophone areas of Canada, West Indies, Africa, Switzerland, and Belgium. May be taken for major credit in French only when taught in French.

**274 (I) or (II). MASTERPIECES IN TRANSLATION (C)**  
The vision of man in French literature from the Renaissance to the 20th century. Not to be taken for French majors or to students who have completed either FRENCH 171 or 172.

**299. SPECIAL TOPICS**  
Different topics offered for one semester only. Inquire in the French Department for further information.

**301, 302. FRENCH LITERARY MOVEMENTS**  
The characteristics and definitions of a selected movement or period (e.g., Baroque, Romanticism) in French literary history.

**303. EXPLICATION DE TEXTES**  
The principles of textual analysis and practice in that exercise. Required of students in Teacher Training.

**304. THE ART OF LITERATURE**  
The structure of the literary works of France with emphasis on the esthetic.

**311 (I) or (II). INTRODUCTION TO MEDIEVAL FRENCH LITERATURE**  
Representative masterpieces from the various genres, read in modern French translation. Relation of literature to other aspects of medieval culture.

- 4 (I). FRENCH PROSE OF THE RENAISSANCE  
Renaissance French prose. Rabelais, Bonaventure des Periers, Marguerite de Navarre, Montaigne, Les Estienne, Montaigne.
7. (II). FRENCH POETRY OF THE RENAISSANCE  
Renaissance French poetry. Marot, Sceve, Du Bellay, Du Bellay, Ronsard, Belleau, Baillet, Grippa d'Aubigné, Du Bartas, Sponde.
1. COMIC VISION — 17TH CENTURY  
Representative works of the classical period with a comic vision of society in prose and poetry; Molière, La Fontaine, La Bruyère and others.
2. TRAGIC VISION — 17TH CENTURY  
Examples of the classical tragic vision in the theater and the novel; Corneille, Racine, Mme. de La Fayette.
4. PHILOSOPHERS AND MORALISTS OF THE 17TH CENTURY  
Writers whose ideas are most important in classical thought; Descartes, Pascal, La Rochefoucauld and others.
4. FRENCH LITERATURE OF THE 18TH CENTURY  
Development of ideas of the French Enlightenment.
5. FRENCH NOVEL OF THE 18TH CENTURY  
The satirical novel as represented by LeSage, Montesquieu, Voltaire, and Diderot, and the sentimental novel as represented by Prevost, Marivaux, Rousseau and Bernardin de Saint-Pierre.
9. FRENCH DRAMA OF THE 18TH CENTURY  
Findings in French theater from LeSage to Beaumarchais.
9. THEMES IN 19TH CENTURY FRENCH POETRY  
In-depth consideration of themes in 19th century French poetry such as nature, the religious experience, the role of the poet, romantic imagery, etc. Themes vary from semester to semester.
3. PARNAISSIANS AND NERVAL  
Development of poetry between Romanticism and Symbolism.
3. 19TH CENTURY ROMANTIC NOVEL  
The novel of the first half of the century; Chateaubriand, Balzac, Hugo, Dumas, Stendhal.

The novel of the second half of the century from Flaubert to Zola.
347. FRENCH POETRY OF THE EARLY 19TH CENTURY  
Nineteenth century French Romantic poetry: Lamartine to Hugo.
348. SYMBOLIST POETRY  
The poetry of Baudelaire, Rimbaud, Mallarmé, Verlaine.
349. FRENCH THEATER OF THE 19TH CENTURY  
Development of theater from Hugo to Rostand and his contemporaries.
354. LITERATURE IN FRENCH FROM AFRICA AND THE CARIBBEAN  
Survey of contemporary literature written in French by African writers, and its literary and ideological background.
355. MAJOR FIGURES OF THE CONTEMPORARY FRENCH NOVEL I  
Novels of Romain Rolland, Martin du Gard, Duhamel, Gide, Proust, Montherlant, Giraudoux.
356. MAJOR FIGURES OF THE CONTEMPORARY FRENCH NOVEL II  
Novels of Malraux, Camus, Sartre, Simone de Beauvoir, Bernanos, Mauriac, and Julien Green.
357. CONTEMPORARY FRENCH POETRY — 20TH CENTURY  
Major French poets from the turn of the century to Surrealism. A study of Valéry, Apollinaire, Claudel, Reverdy, Eluard, Desnos, Cendrars, and the beginnings of Surrealism with the first manifesto in 1924.
358. CONTEMPORARY FRENCH POETRY — 20TH CENTURY  
French poetry from Surrealism to the present: Breton, Char, Michaux, Perse, Ponge, Bonnefoy, and selected contemporary poets. Surrealism as a movement in itself and as a precursor of more recent poetry.
359. FRENCH THEATER — 20TH CENTURY  
French theater from Scribe to the present.
- 360 (II). TECHNIQUES OF CONSECUTIVE INTERPRETATION  
Acquisition of basic skills in consecutive interpretation through notetaking, pacing, condensing, paraphrasing, and practice in memorization. Workshop course based on oral practice. No written work. Admission by permission of instructor.
361. APPLIED FRENCH LINGUISTICS  
French linguistics applied to the teaching of French in secondary schools.
362. BASIC METHODS  
An introduction to audio-lingual techniques of teaching French at the secondary level (EDUC 307).
363. ADVANCED METHODS  
Methods of teaching intermediate and advanced French at the secondary level. The second of a two-semester sequence devoted to teaching French. Prerequisite, FRENCH 362 (EDUC 307).
- 367 (I). TECHNIQUES OF SIMULTANEOUS INTERPRETATION  
Acquisition of basic skills in simultaneous interpretation through close study of comparative syntax and practice in the Language Laboratory. Admission by permission of instructor.
373. AUTOBIOGRAPHY IN FRENCH LITERATURE  
Autobiographical works in historical perspective from Rousseau to present. Emphasis on psychological and philosophical problems such as self-knowledge, sincerity, authenticity, truth. Prerequisites, ability to read French. Non-French majors may use English. (SOWEST 301).
- 374 FRENCH-CANADIAN LITERATURE  
Survey of contemporary literature written in French by Canadian poets, novelists and dramatists.
- 385, 386. SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of this department. Credit, 1-6.
- 391, 392. SENIOR SEMINAR  
French literature for advanced students. Subject announced the preceding semester. Credit, 1-3.
398. SENIOR HONORS  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.
399. SENIOR HONORS  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.
- ITALIAN  
Professor Tillona; Associate Professor Sturm; Assistant Professors Evans, Fata, Pallucchini, Terrizzi.  
  
Information on the Italian curriculum may be obtained by contacting the Department of French and Italian.
- 110, 120 (I), (II). ELEMENTARY ITALIAN  
For students with no previous creditable training in Italian. Intensive practice in language skills.
- 126 (I), (II). INTENSIVE ELEMENTARY ITALIAN  
For students with no previous creditable training in Italian.

ing in Italian. Intensive training in all language skills. Equivalent of 110, 120. Credit, 6.

130, 140 (I), (II). **INTERMEDIATE ITALIAN**  
For students with one year of college Italian or equivalent. Training in the language skills; emphasis on speaking and understanding; readings in cultural and literary texts.

146 (I), (II). **INTENSIVE INTERMEDIATE ITALIAN**  
For students with one year of college Italian or equivalent. Reinforcement of basic language skills, further training in all skills. Reading and discussion of literary and cultural texts. Equivalent of 130, 140. Credit, 6.

161 (I), 162 (II). **INTRODUCTION TO ITALIAN LITERATURE (C)**  
Close reading of representative works in Italian literature. Training in the techniques of literary analysis of the main literary forms. Prerequisite for advanced courses in Italian.

181 (I), 182 (II). **ORAL ITALIAN**  
Oral aspect of the language; pronunciation, vocabulary building, speeches, discussions, debates. This course may only be taken pass/fail.

250. **ITALIAN CIVILIZATION**  
Historical, literary, philosophic and artistic aspects of Italian civilization. Provides understanding of Italian life and culture.

255. **ITALIAN COMPOSITION**  
Advanced composition. Primarily for Italian majors; open to all qualified.

289. **ITALIAN LITERATURE IN TRANSLATION I (C)**  
Representative works of Italian literature through 1700. Not open to Italian majors.

291. **ITALIAN LITERATURE IN TRANSLATION II (C)**  
Representative works of Italian literature from 1700 to the present. Not open to Italian majors.

292. **DANTE IN TRANSLATION**  
The works of Dante Alighieri in English translation; emphasis on the *Divine Comedy*.

301 (I), 302 (II). **DANTE AND THE DUECENTO**  
Selections from the works of Dante and his contemporaries; intensive study of the *Divine Comedy*.

307. **BASIC METHODS**  
Introduction to audio-lingual techniques of teaching Italian at the secondary level and contrastive analysis of the structures of Italian and English (EDUC 307).

310. **PRE-HUMANISM AND THE EARLY RENAISSANCE**  
Literature of the 14th and early 15th centuries: Petracca, Boccaccio, Poliziano, Lorenzo, Sacchetti.

315. **THE HIGH RENAISSANCE**  
Literature of the late 15th and 16th centuries: Machiavelli, Castiglione, Ariosto, Tasso.

330. **ITALIAN LITERATURE OF THE 18TH CENTURY**  
Significant currents and authors from Goldoni to Alfieri.

335. **NEO-CLASSICISM AND ROMANTICISM**  
Intensive study of works of Foscolo, Leopardi and Manzoni.

340. **MODERN THEATER**  
Italian theater from Verga to the present.

345. **MODERN POETRY**  
Italian poetry from Carducci to the present. Emphasis on hermetism.

350. **ITALIAN NOVEL OF THE 19TH CENTURY (C)**  
Development of the novel from Verga to Sveve.

355. **ITALIAN NOVEL OF THE 20TH CENTURY (C)**  
Development of the novel from Pirandello to the present.

372. **STUDENT TEACHING**  
Credit, 3-12.

385, 386. **SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

391. **SEMINAR IN ITALIAN LITERATURE**  
Italian literature for advanced students. Subject announced the preceding semester.

398. **SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. **SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Germanic Languages and Literatures

Head of Department: Sigrid Bauschinger; Professors W. Malsch, Paulsen, Reed, Ryan; Associate Professors Beekman, Cathey, Lea, von Kries, Meid, Peter, Reh, Schiffer; Assistant Professors Hugus, S. Malsch, Seelig.

To fulfill an undergraduate major in German a student must take GERMAN 161 and complete 32 credits in the department's junior senior courses. Two programs are available. Program A (language) is designed principally for those who wish to teach in elementary secondary schools or for those whose interest is not primarily in literature; Program B (literature) is for those chiefly interested in continuing their studies in graduate school.

Students selecting Program A should take 161, 201, 202, 211, 221, or 222, 241, 242, 283, 2 or 285, and a minimum of two more courses in German, one of which must be in 20th-century literature (331, 332, 333, or 334). Students in Program A who are not planning to follow a teaching career may substitute another junior senior course for 283.

Students selecting Program B should take 161, 201, 202, 211, 221, 284, 321, 391, and the courses chosen from the following: 301, 303, 311, 312, 313, 331, 332, 333, and 334.

Students are urged to augment their coursework with at least one summer session at an approved summer school of German or by participating in a German program abroad such as the University offers in Freiburg, Germany.

## GERMAN

110, 120. **ELEMENTARY GERMAN**  
For the non-German major who has no previous training in German. Emphasis on understanding and reading. Sequence to be followed. GERMAN 110, 120, 130, 140. 3 class hours, 1 drill period.

112, 122. **ELEMENTARY CONVERSATIONAL GERMAN**  
For Honor students and prospective German majors, and those interested in intensive practice in the four language skills and who have no previous training in German. Emphasis on understanding and speaking. Sequence to be followed: GERMAN 112, 122, 132, 142. GERMAN 112, 136, 142. 3 class hours, 1 drill period.

126 (I). **INTENSIVE ELEMENTARY GERMAN**  
For non-German majors. Intensive training in all language skills. Equivalent of 110, 120 class hours. Credit.

130, 140. **INTERMEDIATE READING COURSE IN GERMAN**  
Intensive review and readings in modern German literature for the non-German major. Prerequisite, GERMAN 120 or equivalent.

132, 142. **INTERMEDIATE GERMAN**  
For Honor students and prospective German majors, and those interested in an intensive practice in the four language skills. Emphasis on speaking and reading. Intensive review. Readings and discussion (in German) of modern German literature. Prerequisite, GERMAN 130.

AN 122 or equivalent. Use of tape library in the language laboratory.

**6(II). ACCELERATED GERMAN**  
Recommended for Honor students and protective German majors. Accelerated course for students interested in intensive practice in the four language skills who are selected on the basis of superior achievement in GERMAN 122. Covers the contents of GERMAN 122 and 123. Emphasis on understanding and speaking. Students completing this course qualify for German 142. 6 class hours. Use of tape library in the language laboratory. Credit, 6.

**6(II). INTENSIVE INTERMEDIATE GERMAN**  
Thorough review for non-German majors of grammar, reading and discussion of literary texts; emphasis on the cultural background of German speaking countries. Equivalent of 130, 120. Prerequisite, GERMAN 120, 126, or advanced placement. 6 class hours. Credit, 6.

**13, 148. SCIENTIFIC GERMAN**  
Recommended for science majors. Intensive review. Readings in mathematics and natural sciences with exercises in translation from German into English. Prerequisite, GERMAN 120 or 122 or equivalent.

**1. FREIBURG PREPARATORY COURSE IN GERMAN**  
For students planning to attend the University of Freiburg Program the following year. Concurrent registration in a German language course required. Prerequisite, 120-level proficiency in German. Hours by arrangement.

**1. READINGS IN GERMAN LITERATURE (C)**  
An introductory course, intended to increase reading comprehension and fluency. Based on selected literary texts mainly from the 19th and 20th centuries. Prerequisites, 140 or equivalent (to be established by an examination administered by the department).

**2, 202. ADVANCED GERMAN**  
Advanced grammar, extension of vocabulary. Exercises in translation into German and in free composition and conversation. Prerequisite, GERMAN 142 or equivalent. 4 class hours. Use of tape library in the language laboratory. Credit, 4.

**2. ADVANCED COMPOSITION, TRANSLATION AND CONVERSATION**  
Continuation of 201 and 202. Emphasis on the writing of German (translation into German and free composition). Prerequisite, GERMAN 202 or equivalent. Use of tape library in the language laboratory. Credit, 4.

**2 (I). SURVEY OF GERMAN LITERATURE FROM 800 TO 1700 (C)**  
Prerequisite, GERMAN 161, 201 or equivalent.

**222. SURVEY OF GERMAN LITERATURE FROM 1700 TO THE PRESENT (C)**  
Prerequisite, 161, 201 or equivalent.

**231, 232. GERMAN MASTERPIECES IN TRANSLATION (C)**  
An introduction to selected masterpieces of German literature from the Middle Ages to the present. Different reading material in both semesters. Primarily for non-majors; majors may elect but not have major credit. May be repeated.

**241. GERMAN CIVILIZATION I (C)**  
The political and cultural development of Germany and her role in the European tradition from the beginning to 1648. Readings in German and English. Conducted in English. Prerequisite, GERMAN 140 or equivalent.

**242. GERMAN CIVILIZATION II**  
The political and cultural development of Germany and her role in the European tradition from 1648 to the present. Readings in German and English. Conducted in English. Prerequisite, GERMAN 140 or equivalent.

**283. METHODS OF TEACHING GERMAN**  
The various methods of teaching a foreign language based on recent developments of applied linguistics and programmed learning. Emphasized are: the development of teaching materials by the individual student and the application of textbooks to the needs of various language courses. Prerequisite, GERMAN 140 or equivalent.

**284. THE GERMAN LANGUAGE (C)**  
An introduction to the history of the German language. Prerequisite, GERMAN 140 or equivalent.

**285. THE STRUCTURE OF GERMAN**  
German phonetics and phonemics, with an introduction to German morphology. Prerequisite, GERMAN 140 or equivalent.

**301. LESSING AND HIS TIME (C)**  
The preclassical German literature of the 18th century with emphasis on Lessing. Prerequisite, GERMAN 161, 201, or equivalent.

**302. GOETHE (C)**  
A literary analysis of selected poems, plays and prose of the early and classical Goethe. Prerequisite, GERMAN 161, 201 or equivalent.

**303. SCHILLER (C)**  
Selected poems, plays, and essays by Schiller. Prerequisite, GERMAN 161, or 201 equivalent.

**311. THE GERMAN POEM (C)**  
An historical survey based on a close reading of selected poems from the major phases of German poetry after 1500. Prerequisite, GERMAN 161, 201 or equivalent.

**312. GOETHE'S FAUST (C)**  
Reading of Faust, Part I and selections of Part II. Prerequisite, GERMAN 161, 201 or equivalent.

**313. ROMANTICISM (C)**  
Poetry and prose of the Romantic period. Prerequisite, GERMAN 161, 201 or equivalent.

**321. 19TH CENTURY LITERATURE (C)**  
Poetry, drama and prose with emphasis on Kleist, Buchner, Heine, Keller. Prerequisite, GERMAN 161, 201 or equivalent.

**331. THE EARLY 20TH CENTURY (C)**  
Main literary trends at the turn of the century with emphasis on Hauptmann, Hofmannsthal, George, Rilke, and the early Thomas Mann. Prerequisite, GERMAN 161, 201 or equivalent.

**332. BRECHT AND MODERN DRAMA**  
Plays by Brecht, Frisch, Durrenmatt and Weiss. Prerequisite, GERMAN 161, 201 or equivalent.

**333. 20TH CENTURY PROSE (C)**  
Works by authors such as Thomas Mann, Kafka, Musil and Grass. Prerequisite, GERMAN 161, 201 or equivalent.

**334. CONTEMPORARY GERMAN LITERATURE**  
The contemporary literary scene in Germany. Prerequisite, GERMAN 161, 201 or equivalent.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**391(II). SEMINAR**  
In-depth study of a particular author, problem, theme, or genre. For seniors; open to juniors by permission of instructor. Prerequisite, two literature courses on the 300 level. May be repeated for credit.

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## DANISH

**110, 120. ELEMENTARY DANISH**  
Conversation, reading, grammar and composition. 3 class hours, 1 laboratory hour.

**126(I). ACCELERATED ELEMENTARY DANISH**  
Covers the material of DANISH 110 and 120. 6 class hours, 1 laboratory hour. Credit, 6.

130, 140. INTERMEDIATE DANISH  
Reading, conversation, composition. Grammar review. Prerequisite, DANISH 120 or 126.

146 (II). ACCELERATED INTERMEDIATE DANISH

Covers the material of DANISH 130 and 140. Prerequisite, DANISH 120 or 126. 6 class hours. Credit, 6.

251. DANO-NORWEGIAN LITERATURE (C)

Masterpieces of Danish and Norwegian literature; with emphasis on Ibsen, Holberg; some attention to modern authors. Prerequisite, DANISH 140 or 146 or equivalent.

DUTCH

110, 120. ELEMENTARY DUTCH

Conversation, reading, grammar and composition. 3 class hours, 1 laboratory hour.

126 (I). ACCELERATED ELEMENTARY DUTCH

Covers the material of DUTCH 110 and 120. 6 class hours, 1 laboratory hour. Credit, 6.

130, 140. INTERMEDIATE DUTCH

Reading, conversation, composition. Grammar review. Prerequisite, DUTCH 120 or 126.

146 (II). ACCELERATED INTERMEDIATE DUTCH

Covers the material of DUTCH 130 and 140. Prerequisite, DUTCH 120 or 126. 6 class hours. Credit, 6.

251. DUTCH AND FLEMISH LITERATURE (C)

Masterpieces of Dutch and Flemish (Belgian) literature. Prerequisite, DUTCH 140 or 146 or equivalent.

268. MODERN DUTCH FICTION IN TRANSLATION

Masterpieces of modern and contemporary Dutch fiction in English translation. No knowledge of Dutch required.

SWEDISH

110, 120. ELEMENTARY SWEDISH

Conversation, reading, grammar and composition. 3 class hours, 1 laboratory hour.

126 (I). ACCELERATED ELEMENTARY SWEDISH

Covers the material of SWEDSH 110 and 120. 6 class hours, 1 laboratory hour. Credit, 6.

130, 140. INTERMEDIATE SWEDISH

Reading, conversation, composition. Grammar review. Prerequisite, SWEDSH 120 or 126.

146 (II). ACCELERATED INTERMEDIATE SWEDISH

Covers the material of SWEDSH 130 and 140.

Prerequisite, SWEDSH 120 or 126. 6 class hours. Credit, 6.

History

Chairman of Department: Professor Gerald W. McFarland. Professors Albertson, Bernhard, Boyer, Cantor, Chrisman, Davis, Gordon, Greenbaum, Hart, Ilardi, Johnston, Kirk, Lewis, Oates, Potash, Quint, F. Wickwire, Wyman; Associate Professors DePillis, Drake, Griffith, Hernon, Jones, Minear, Nissenbaum, Rearick, Richards, Sarti, Swartz, Tager, Thompson, Ware, M. Wickwire; Assistant Professors Bell, Berkman, Biddle, Fox, Laurie, Loy, Pelz, Shipley, Stepan, Story, Swenson, VanSteenberg, White.

History majors must take as required courses in their freshman and sophomore years two year-long sequences chosen from HIST 100-101 or 110-111, 115-116, 120-121, 130-131, 140-141 or 106-107, and 150-151 or 152-153. The history major will select one of five areas of specialization (European, British, American, Latin American, or East Asian history) and take within it a minimum of 8 courses numbered 200 and above (totalling not less than 24 credits). Students specializing in European history will be required to include in their program at least 3 credits in ancient or medieval history and an additional 3 credits in the early modern period (from the Renaissance through the 18th century). An additional two or three courses in electives outside the area of specialization are required, for a total of at least 12 courses (totalling not less than 36 credits) in lower and upper-level history courses. (A more complete statement of the requirements for the history major is available from the department.)

100 (I), 101 (II). HISTORY OF WESTERN THOUGHT AND INSTITUTIONS (C)

The historical development of the Western European countries, their ideas, and institutions. Either semester may be elected independently. Admission to honors sections of these courses (102, 103) by permission of department.

102 (I), (II), 103 (I), (II). HONORS SECTION OF HISTORY OF WESTERN THOUGHT AND INSTITUTIONS (C)

106 (I), 107 (II). HONORS SEMINAR IN MODERN EUROPEAN HISTORY (C)  
A thematic approach to the history of Europe since 1715. Open to Commonwealth scholars and selected students.

110 (I), 111 (II). PROBLEMS IN WORLD CIVILIZATION (C)

A comparative study of both the common and distinctive aspects of the world's great civilizations at critical phases of their development.

Either semester may be elected independently.

115 (I), 116 (II). HISTORY OF EAST ASIAN CIVILIZATION (C)

An introductory survey of China, Japan, and related regions. First semester: survey Chinese history; second semester: survey Japanese history. Either semester may be elected independently.

120 (I), 121 (II). HISTORY OF LATIN AMERICAN CIVILIZATION (C)

An introduction to the history of Latin America. First semester: from pre-conquest times to the close of the colonial era; second semester: the evolution of Latin America in the 19th and 20th centuries. Either semester may be elected independently.

130 (I), 131 (II). HISTORY OF NEAR EASTERN CIVILIZATION (C)

An introductory survey of Near Eastern Civilization. First semester: The rise and development of Islamic Civilization from 570 A.D. to 1453 A.D. with emphasis on social and intellectual developments. Second semester: The interpenetration of Near Eastern institutions, concepts, and interests with those of the West from the rise of the Ottoman Empire to the present.

140 (I), 141 (II). EUROPEAN HISTORY, 1500 TO THE PRESENT (C)

The historical development of Western European thought and institutions. First semester: from 1500 to 1815; second semester: 1815 to the present. History majors are strongly urged to take this course before registering in advanced European courses.

150 (I), 151 (II). THE DEVELOPMENT OF AMERICAN CIVILIZATION (C)

A survey of the American national growth. Either semester may be elected independently. Admission to honors sections of the courses (152, 153) by permission of department.

152 (I), 153 (II). HONORS SECTIONS OF THE DEVELOPMENT OF AMERICAN CIVILIZATION (C)

185 (I), 186 (II). NEW APPROACHES TO THE STUDY OF HISTORY (C)

Learning history by doing it. Each semester devoted to analysis of a single event; they have included the Salem witch trials and the Lizzie Borden murder case. Either semester may be elected independently.

200 (I). THE ANCIENT WORLD TO 500 B.C. (C)

From origins of human society to the confrontation with the Persian Empire.

2 (II). THE ANCIENT WORLD:  
PERICLES TO CONSTANTINE (C)  
The successive assertions and breakdowns of  
leadership in the Greek and Roman worlds.

2 (I). EARLY MIDDLE AGES, 300-1100  
(C)  
Spread of Christianity; pagan and early Chris-  
tian culture; Germanic kingship; the Carolin-  
gian world; early feudalism; monasticism and  
ecclesiastical centralization.

2 (I). THE LATER MIDDLE AGES,  
1100-1350 (C)  
Rivalry of towns and commerce; the growth  
and development of the feudal monarchies  
and ecclesiastical authority; rise of secular-  
ism.

20 (I), 206 (II). THE AGE OF THE  
RENAISSANCE AND  
REFORMATION, 1300-1600 (C)  
The changes in European thought and institu-  
tions during the development of Humanism  
and the Protestant and Catholic Reformations.  
Either semester may be elected independ-  
ently.

20 (I). EUROPE IN THE  
ENLIGHTENMENT, 1685-1789 (C)  
Civilization of Western Europe in the 18th  
century, its social milieu, intellectual setting,  
institutional forces, religious tendencies,  
aesthetic contributions, and the growth of the  
revolutionary spirit.

20 (II). THE FRENCH REVOLUTION  
AND NAPOLEON (C)  
Political change in Europe from the Old  
Rome and the French Revolution to the fall  
of Napoleon.

20 (II). HISTORY OF EUROPE, 1815-1870  
(C)  
Major developments in the internal and inter-  
national affairs of the European states from  
the Congress of Vienna to the Franco-Prussian  
War.

21 (I). EUROPE, 1870-1918 (C)  
Internal developments of the principal coun-  
tries; conditions and diplomacy which led to  
the World War; military and diplomatic his-  
tory of the war years.

21 (II). EUROPE SINCE 1918 (C)  
Major developments in the internal and inter-  
national affairs of the European states since  
World War I.

21 (I). EUROPEAN INTELLECTUAL  
HISTORY IN THE 19TH CENTURY  
(C)  
Chief intellectual currents in Europe; romanti-  
cism, liberalism, religious revival, socialism,  
Darwinism, racism, and mass culture.

213 (II). EUROPEAN INTELLECTUAL  
HISTORY IN THE 20TH CENTURY  
(C)  
Philosophical, academic, literary, aesthetic,  
political and popular currents since 1900. By  
permission of instructor.

214 (I), 215 (II). THE HISTORY OF RUSSIA  
(C)  
A survey of Russian political, social, eco-  
nomic, and intellectual history from the 9th  
century to the present. First semester: the ori-  
gin, growth, and development of Russia to  
1815; second semester: the impact of modern-  
ization on Russia in the 19th and 20th cen-  
turies. Either semester may be elected independ-  
ently.

216 (I). THE RUSSIAN REVOLUTION (C)  
Origins, course, and impact of the Bolshevik  
Revolution.

217 (II). SOVIET RUSSIA (C)  
Major social, political, intellectual develop-  
ments, and the international relations of  
Soviet Russia since the Bolshevik Revolution.

218 (I). EARLY MODERN GERMANY (C)  
From the end of the Thirty Years' War to the  
revolutions of 1848.

219 (II). THE HISTORY OF MODERN  
GERMANY (C)  
The evolution and development of Germany  
since 1848, with emphasis upon diplomatic,  
political, military and social-economic trends  
and problems.

220 (I). MODERN SCANDINAVIA (C)  
The major issues of domestic and foreign poli-  
tics of the states of northern Europe in the  
19th and 20th centuries.

221 (II). FRANCE SINCE 1789 (C)  
Selected, formative political crises from 1789  
to the present, and their settings in the eco-  
nomic, social, and intellectual life of modern  
France.

222 (I), 223 (II). THE HISTORY OF SPAIN  
(C)

224 (I). EUROPEAN DIPLOMATIC  
HISTORY, 1870-1914 (C)  
The internal politics and foreign policies of  
the major European powers. Emphasis on  
nationalism, liberalism, imperialism, alliance  
systems, and the origins of World War I.

225 (II). EUROPEAN DIPLOMATIC  
HISTORY, 1914-1956 (C)  
The internal politics and foreign policies of  
the major European powers. Emphasis on the  
importance of World War I, the polarization  
of national and international politics, the ori-  
gins, course, and aftermath of World War II,  
and the post-war world.

226 (I), 227 (II). MILITARY HISTORY OF  
MODERN EUROPE (C)  
Development of European military theory and  
practice. First semester: Napoleonic era to  
1914; second semester: 1914 to the present.

228 (II). 17TH CENTURY EUROPE (C)  
Europe from the Wars of the Counter-Refor-  
mation to the Glorious Revolution. Civiliza-  
tion of the Baroque in its social, political,  
economic, religious and intellectual settings.

229 (II). SOCIAL HISTORY OF EARLY  
MODERN EUROPE (C)  
The social institutions of Europe as they  
change from a system of feudal organization  
to pre-industrial society, including the evolu-  
tion of the town to the city, the changing role  
of the church, the changing role of agrarian  
life, the development of an intellectual class.

230 (II). HISTORY OF MODERN ITALY (C)  
From the origins of the Risorgimento in the  
18th century to the "opening to the left" of the  
1960s, with particular reference to domestic  
problems after the unification, to Italian for-  
eign policy up to the Second World War, and  
to the rise and consolidation of fascism.

231 (I), 232 (II). ENGLISH HISTORY (C)  
Emphasis on economic, social, and cultural  
influences, as well as on constitutional devel-  
opment. Either semester may be elected  
independently.

233 (II). MEDIEVAL ENGLAND (C)  
England from the 5th to the 15th century, with  
particular attention to the Anglo-Saxon  
period, the Norman Conquest, and the evolu-  
tion of government to the accession of the  
Tudors.

234 (I), 235 (II). TUDOR-STUART  
ENGLAND, 1485-1688 (C)  
Selected aspects of the constitutional, social,  
intellectual, and imperial history of England  
in this period. Either semester may be elected  
independently.

236 (I). BRITAIN IN THE 18TH CENTURY  
(C)  
Selected aspects of social, intellectual, imper-  
ial, and constitutional history, including the  
Acts of Union. Impact of the Industrial and  
French Revolutions.

237 (I), 238 (II). MODERN BRITAIN (C)  
Selected topics on the political, social, and  
intellectual development of Britain in the 19th  
and 20th centuries. Either semester may be  
selected independently.

239 (II). HISTORY OF THE BRITISH  
EMPIRE AND COMMONWEALTH  
SINCE 1783 (C)  
Evolution of British imperial policy; growth of  
the Dominions, the Commonwealth, and the

dependent Empire; role of the Empire in world politics.

**240 (I). SOCIAL HISTORY OF EUROPE SINCE THE FRENCH REVOLUTION (C)**

The appearance, disappearance, rise and fall and alteration of social classes and major subclasses during the period. The causes and results of such developments. The interrelationships of political, economic, and social developments; differences of social systems within the European framework and their reverberations.

**301 (II). ARGENTINA IN THE 19TH AND 20TH CENTURIES (C)**

The emergence of the major South American states. Political organization and economic change; the contemporary growth of nationalism and mass-based political movements.

**302 (I). THE HISTORY OF MEXICO (C)**

Mexico from the end of the 18th century to the present. Emphasis on political, economic, and social developments.

**303 (I). THE CARIBBEAN (C)**

The Caribbean as a focus of conflict and adjustment from the 15th century to the present.

**304 (II). HISTORY OF GRAN COLOMBIA (C)**

Colombia, Venezuela and Ecuador from colonial settlement to the present.

**305 (II). HISTORY OF THE ANDEAN REPUBLICS (C)**

Peru, Bolivia, and Chile from the late colonial period to the present. Emphasis on political, social and economic developments with particular attention to institutions.

**307 (I). THE HISTORY OF THE PORTUGUESE EMPIRE (C)**

The colonial empire Portugal created in Morocco, West Africa, Mozambique, India, Brazil, and the Far East — from the capture of Ceuta in 1415 until Portugal recognized the independence of Brazil in 1825. Comparative treatment of economic affairs, political institutions, race relations, and cultural developments.

**308 (II). THE HISTORY OF BRAZIL (C)**

The cultural, economic, and political development of Brazil since 1822. How the largest and most populous nation in Latin America has become a significant power.

**311. CHANGING INTERPRETATION OF UNITED STATES HISTORY (C)**

Changing interpretations of various topics in United States history from the evolution to the Cold War; the different historical schools which shaped those viewpoints — the roman-

tic nationalists, progressives, revisionists, consensus historians, and the new left. Prerequisite, a college-level survey of U. S. history or equivalent is strongly advised.

**316 (I). AMERICAN COLONIAL HISTORY TO 1763 (C)**

Discovery and exploration; early European settlements; system of political and economic control; religious and intellectual development; Anglo-French rivalry.

**317 (II). THE AMERICAN REVOLUTIONARY ERA (C)**

Coming of the Revolution; War for Independence; evolution of American federalism.

**318 (II). THE EARLY NATIONAL PERIOD, 1789-1828 (C)**

The development of the United States in its formative years, emphasizing political, intellectual, and diplomatic factors.

**319 (I). JACKSONIAN AMERICA (C)**

Political, economic, and social developments in the period before the Civil War.

**320 (I). THE CIVIL WAR ERA (C)**

The causes, execution, and consequences of the American Civil War. Emphasis on sectional conflict from the early national period to Southern secession in 1860-1861, to the nature and conduct of the war itself, and to the war's profound consequences.

**321 (II). THE RECONSTRUCTION ERA (C)**

Developments growing out of the nation's reunification following the Civil War. Reconstruction, not as an episode in Southern regional history, but as an integral part of postwar American political, economic, and social evolution.

**322 (II). THE GILDED AGE (C)**

The emergence of modern political issues during the final decades of the 19th century. Emphasis on the role of industrialization, corporate consolidation, urban growth, and labor, agrarian, and genteel protests.

**324 (I). THE PROGRESSIVE AGE, 1900-1920 (C)**

The political response to the changing economic and social conditions in American life.

**325 (II). THE UNITED STATES BETWEEN THE WORLD WARS, 1920-1941 (C)**

American political, economic, and intellectual life between the two World Wars.

**326 (I), 327 (II). AMERICAN THOUGHT AND CULTURE (C)**

The basic strands of American thought and their reflection in American culture. First semester: the period before 1865; second semester: Gilded Age and 20th century. Either semester may be elected independently.

**328 (I), 329 (II). UNITED STATES**

**CONSTITUTIONAL HISTORY (C)**

Origins and development of American constitutionalism. First semester: 17th century to outbreak of armed sectional conflict; second semester: evolution of constitutional power in modern America.

**330 (I), 331 (II). SOCIAL HISTORY OF THE UNITED STATES (C)**

The evolving status of individuals and groups and problems of migration, livelihood, urbanization, and social conflict. Either semester may be elected independently.

**332 (I). THE SOUTH IN AMERICAN HISTORY (C)**

From early settlement to contemporary regional problems.

**333 (II). HISTORY OF AMERICAN WESTWARD EXPANSION, 1763-1890 (C)**

Advance of settlement from the Appalachians to the Pacific and the influence of the frontier upon social, economic, and political conditions.

**334 (I), 335 (II). DIPLOMATIC HISTORY OF THE UNITED STATES (C)**

Development of American foreign relations, 1776 to the present. Either semester may be elected independently.

**336 (II). HISTORY OF THE AMERICAN LABOR MOVEMENT (C)**

Evolution of trade unionism in American history from late 18th century origins through 19th century Civil War developments to the present. Critical evaluation of changes in labor history.

**337 (II). THE CITY IN THE MODERN UNITED STATES (C)**

The industrial city and the full-scale urbanization of the modern United States. Effect of urban life on the social, political, and economic institutions of America. Emphasis on the historical origins of the problems of modern urban existence.

**338 (I, II). CONTEMPORARY AMERICAN HISTORY (C)**

American history from 1960 to the present with emphasis on historical perspective. Vietnam War, ecology, civil rights, student movements, growth capitalism, and changing social structures.

**339 (II). UNITED STATES SINCE PEACETIME HARBOR (C)**

Emphasis on political, economic, and social currents since World War II.

**340 (I). CIVILIZATION OF ISLAM I (C)**

The development of Islam from theocratic empire with emphasis on the evolution of Islamic law and theology, Arabic literature

Persian literature, Sufism, and Shiism from 1000 A.D. to 1200 A.D.

1 (II). CIVILIZATION OF ISLAM II (C)  
The emergence of non-Arabic peoples as the preponderant political influence in the Islamic world and the impact of these peoples on the institutions and traditions of Islam. The empires of the Persians, the Turks, and Muslim civilization in India, 1000 A.D. to 1600 A.D.

2 (II). THE MODERN MIDDLE EAST (C)  
The impact of the West on the Islamic empires to the present "confrontation" of the West and the Soviet Union of Arab and Israeli nationalism.

3 (I). HISTORY OF MODERN CHINA TO 1900 (C)  
Explores the nature of the "traditional" Chinese order inherited by China's alien Manchurian rulers; China's response to the West; the failure of rebellions; failure of conservative reform; disintegration of an ancient civilization. Prerequisites, HIST 115 and 116 or permission of instructor.

4 (II). HISTORY OF MODERN CHINA: THE 20TH CENTURY (C)  
Examines 20th century China's revolutions — intellectual, social, economic, political — and their settings up to the present. Prerequisites, HIST 115 and 116 or permission of instructor.

5 (I). HISTORY OF JAPANESE CIVILIZATION (C)  
The development of Japanese civilization from its origins to the mid-19th century.

6 (II). HISTORY OF MODERN JAPAN (C)  
Japan's modernization from the mid-19th century.

7 (I, II). HISTORY OF SCIENCE (C)  
Development of major scientific achievements from antiquity to the present. Emphasis on scientific theory; conceptual developments in philosophical, cultural, sociological, and scientific contexts. Prerequisite, one year of physical science.

8 (I, II). TOPICS IN ASIAN AND NEAR EASTERN HISTORY (C)  
Intensive study of an aspect of Asian or Near Eastern History; topic to be announced at pre-registration.

9 (I, II). TOPICS IN BRITISH HISTORY (C)  
Intensive study of an aspect of British history; topic to be announced at pre-registration.

10 (I, II). TOPICS IN EUROPEAN HISTORY (C)  
Intensive study of an aspect of European History. Topic to be announced at pre-registration.

383 (I, II). TOPICS IN LATIN AMERICAN HISTORY (C)  
Intensive study of an aspect of Latin American history; topic to be announced at pre-registration.

384 (I, II). TOPICS IN UNITED STATES HISTORY (C)  
Intensive study of an aspect of United States history; topic to be announced at pre-registration.

NOTE: 380-384 topics courses may be repeated for credit provided the topic under consideration is different on each occasion.

385 (I), 386 (II). SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

395 (I, II). SENIOR SEMINAR  
For seniors specializing in history. Intensive study in area of specialization, with emphasis on research papers.

398. SENIOR HONORS  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

399. SENIOR HONORS  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Linguistics

Head of Department: Professor Samuel Jay Keyser. Professors Bach, Freeman, Partee; Assistant Professors Prince, Roeper, Selkirk, Williams.

Although there is no undergraduate major in Linguistics, courses are offered for those wishing to prepare for graduate work in this field or in anthropology, computer science, English, the foreign languages, philosophy, or speech. Joint majors are offered in Linguistics and Philosophy, Linguistics and German, Linguistics and Russian, Linguistics and Chinese and Linguistics and Japanese, and several departments offer related courses.

101 (I), (II). MAN AND HIS LANGUAGE (C)  
A wide range of language-oriented topics: dialectal variants, language change and introduction to transformational grammar. Recent developments in linguistic theory; consequences of this theory for our view of mankind.

201 (I), (II). INTRODUCTION TO LINGUISTIC THEORY (C)  
The nature of language; important aspects of linguistic structure, viewed from the standpoint of modern linguistic theory. Emphasis

on syntactic problems; some attention to phonology, language acquisition, etc.

202 (I), (II). PHONOLOGICAL THEORY (C)  
Introduction to the theoretical and psychological bases of contemporary phonological processes, illustrated by problems chosen from the languages of the world. Prerequisites, LING 201 and 214.

203 (I), (II). INTRODUCTORY SYNTAX (C)  
The principles of contemporary linguistic theory applied to specific syntactic problems drawn mostly from English. The theoretical implications of the selected problems discussed in depth. Prerequisite, LING 201.

204 FIELD METHODS  
Methods of eliciting significant linguistic information in the field. How to work with an informant investigation, with the aid of the informant, of the structure of an unfamiliar language and of specific analytical problems it presents.

209. FORMAL FOUNDATIONS OF LINGUISTIC THEORY  
Topics in formal systems as they relate to modern linguistic theory including set theory, group theory, automata theory and formal grammars. Prerequisite, LING 201.

210. INTRODUCTION TO SEMANTICS (C)  
A survey of semantics in relation to linguistic theory. Development of semantics in transformational grammar, 1960-present. Applications of theory of formal systems from logic and connections with philosophy of language. Emphasis typically on quantification, referential opacity, other structural problems. Prerequisite, LING 203 and PHIL 370.

211 (I). INTRODUCTION TO PSYCHOLINGUISTICS (C)  
Its theoretical foundations, methodology, and experimental techniques. Emphasis on the acquisition of language, child language and linguistic universals, and learning and perceptual strategies. Prerequisite, LING 201.

213. SOCIOLINGUISTICS  
Language as a social phenomenon. Linguistic, sociological, and ethical issues related to language in its social context. The social interpretation of optional grammatical rules in dialectal variation.

214 (I), (II). INTRODUCTORY PHONETICS FOR LINGUISTICS  
Principles of the International Phonetic Association. Phonetic script. Identifying and making unfamiliar sounds. The structure of the vocal tract. Credit, 1.

241. STRUCTURE OF SANSKRIT  
Introduction to Sanskrit stressing its linguistically interesting aspects: the Sandhi rules of

Sanskrit, the Nala-saga in the Devanagari script, basic grammatical properties of Sanskrit. Prerequisite, LING 201.

### 323. STUDY OF THE NATIVE LANGUAGE

The relevance of linguistic theory and results of linguistics to the study of English. Issues of style, poetics, the teaching of English and others.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Music and Dance

*Head of Department:* Professor Robert Sutton.  
*Music Faculty:* Professors Alviani, Contino, duBois, King, Roach, Teraspulsy, Tillis; Associate Professors Chesnut, Fussell, Humphrey, Jenkins, Kaeser, Moore, J. Olevsky, Ornest, Steele, Stern, P. Tanner, Whaples; Assistant Professors Abercrombie, Boyer, Cox, d'Armand, Caver, Klock, Lehrer, E. Olevsky, Stackpole, J. Tanner; Lecturers Harry, Huettelman, Stencel; Visiting Instructor Neubert. *Dance Faculty:* Assistant Professors Patton, Peterson; Instructors Jones, Watkins; Lecturer Crescione.

### MAJORS IN MUSIC

A student must apply to the Music Department for admission to the major. An audition is required of all applicants. Maintenance of status as a major is subject to review and assumes satisfactory work in the program.

The Bachelor of Music degree may be earned with a concentration in 1) Performance, or 2) Theory-Composition, or 3) Music Education (Vocal or Instrumental).

The Bachelor of Arts degree with a major in music may be earned with a concentration in 1) Performance, or 2) Theory-Composition, or 3) Music History. The Bachelor of Arts programs are preprofessional, serving to broaden cultural background.

All music majors take applied music and work in large and small ensembles (four years), music theory (a three and a half year sequence), music literature and history (three semesters) and electives. The general education requirements for the Bachelor of Arts are the core requirements of the College of Arts and Sciences; those for the Bachelor of Music are the University core requirements.

The following are among the additional music courses required for each specific major program: extra applied music credits and a senior solo recital in Performance; teacher certification work in Music Education; advanced specialized courses in the particular field for majors in Theory-Composition or Music History. Up-to-date outlines for the eight semesters in each of the majors may be obtained by applying to the Department. The final selection of courses is made by counselling each individual student. Professor Horace Boyer is the Chief Adviser for undergraduate music.

Majors in other departments may elect a minor in music upon approval of the Chief Adviser of the Department of Music. The minor includes 111, 112, 201, 202, and 4 credits as advised in individual applied music and/or ensemble work. Education majors upon completing 111-112 should elect 242 (in lieu of 201).

The large and small ensemble organizations listed under Applied Music below, and other small ensembles specially arranged under 187, are open to all University students depending on any applicable audition requirements, space available, or permission of the instructor, who should in any case be consulted beforehand.

The Music Department is a member of the National Association of Schools of Music.

### CONCENTRATIONS IN DANCE

Students who wish to concentrate in Dance may register through the College of Arts and Sciences Information and Advising Center (CASIAC) in the Freshman and Sophomore years. The Bachelor's Degree with Individual Concentration (BDIC) may be arranged with a combination of emphases on Dance and one or more other subjects. Those interested in certification for teaching in public elementary and secondary schools should consider the option of a major in Physical Education with a high concentration of Dance courses. A major in Dance is being proposed and interested students should consult with the Dance faculty.

### MUSIC HISTORY AND APPRECIATION

#### 101 (I), (II). INTRODUCTION TO MUSIC (C)

Open to all students not majoring in music. Previous musical training not required. Basic music materials, principles of design, and cultural significance of representative works from the ninth century to the present.

#### 102 (I). LITERATURE OF MUSIC (C)

Review of music materials and principles of design. Emphasis on important examples of vocal music, keyboard music, chamber music, symphonies, concertos and operas. For music majors or by permission of instructor.

#### 108 (I). AFRO-AMERICAN MUSIC AND MUSICIANS (C)

Spirituals, blues, songs, jazz, and classic music of Afro-Americans.

#### 201 (I), 202 (II). HISTORICAL SURVEY OF MUSIC

History and literature of music: MUSIC 201 from early religious chant through Bach and Handel; MUSIC 202, from 1750 through vocal and instrumental music of the 20th century. Prerequisite, permission of instructor. MUSIC 112.

#### 203 (I). MUSIC FROM MONTEVERDI TO BACH

Baroque and Rococo periods, including music of such composers as Monteverdi, Schütz, Lully, Purcell, Corelli, Couperin, Rameau, and Scarlatti, Bach, Handel. Prerequisite, MUSIC 201 and permission of instructor.

#### 205 (I). GOTHIC AND RENAISSANCE MUSIC

Chant and organum through Renaissance motet and madrigal. Reading, listening, score study, analysis. Prerequisite, MUSIC 201 and permission of instructor.

#### 209 (I), (II). MUSIC OF THE 20TH CENTURY

European and American music written since 1900, including Stravinsky, Bartók, Hindemith, Copland, jazz, electronic music. Prerequisite, MUSIC 202 and permission of instructor.

#### 253 (I), (II). HISTORY OF JAZZ

The development of Jazz from its African origins and American influences to date. Topics include: ragtime; early New Orleans style; swing, Charlie Parker, John Coltrane and contemporary styles.

#### 301 (II). HAYDN, MOZART AND BEETHOVEN

Reading, listening, score study. Prerequisite, MUSIC 202 and permission of instructor.

#### 302 (II). MUSIC FROM SCHUBERT TO DEBUSSY

History of the 19th century romantic music: small and large forms, and various media including lieder, chamber music, symphony, opera. Reading, listening, score study. Prerequisite, MUSIC 202.

#### 303. HISTORY OF OPERA

History of opera from the late 16th to the present century. Prerequisite, permission of instructor.

### MUSIC THEORY

#### 111 (I), 112 (II). ELEMENTARY MUSIC THEORY (111:C)

Notation, ear-training, solmization, sight-reading, harmony, counterpoint, analysis

re and sound of music literature from all periods, orchestration, improvisation and original composition. Prerequisite, open to music majors and music minors upon approval of the Chief Adviser of the Department of Music. 111 prerequisite to 112. 3 class hours, 2 laboratory hours.

## 111 (I), 114 (II). INTERMEDIATE MUSIC THEORY

Continuation of 111, 112. Prerequisite, MUSIC 111. 113 prerequisite to 114. 3 class hours, 2 laboratory hours.

## 211 (I), 212 (II). ADVANCED MUSIC THEORY

Continuation of 113, 114. Prerequisite, MUSIC 111. 211 prerequisite to 212. 3 class hours, 1-2 laboratory hours as arranged.

212 (I). CONTEMPORARY TECHNIQUES  
Elimination of melody, rhythm, harmony, and form in 20th century music. Analysis, listening, and written assignments. Prerequisite, MUSIC 114. 2 class hours. Credit, 2.

213 (I), 220. JAZZ THEORY AND IMPROVISATION I AND II  
Theory as applied to performing, analyzing and composing in the jazz medium. Prerequisite, MUSIC 120 or permission of instructor. 213 prerequisite to 220.

311 (I), 312 (II). COMPOSITION  
Free composition in various forms and media. Individual lessons. Weekly seminar. Prerequisite, permission of instructor, MUSIC 114.

311 (I). JAZZ ARRANGING AND COMPOSITION  
Writing arrangements and composing for jazz ensembles and the school stage band. Analysis, listening, and instrumental scoring. Prerequisite, MUSIC 219, 220 or permission of instructor. 2 class hours, 1-2 hour laboratory period.

381, 386. SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

391 SENIOR HONORS  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

391 SENIOR HONORS  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## MUSIC EDUCATION

222, 229\* (I), (II). INSTRUMENTAL TECHNIQUES  
Classes in one instrument. Materials and meth-

ods of teaching. Open to music majors only. 3 class hours, 2 laboratory hours. Credit, 2.

|                      |                  |
|----------------------|------------------|
| 221 — Violin         | 226 — Horn       |
| 222 — Cello          | 227 — Trumpet    |
| 223 — Flute          | 228 — Trombone   |
| 224 — Oboe (Bassoon) | 229 — Percussion |
| 225 — Clarinet       |                  |

## 240.\* PRACTICUM IN MUSIC EDUCATION

Laboratory experience in performance, preparation, and conducting of scores, and analysis of rehearsal techniques for elementary and secondary school large ensembles. Open to non-majors with permission of instructor. Credit, 1-3.

## 241. INSTRUMENTAL MUSIC IN THE PUBLIC SCHOOLS

Philosophy, methods, and materials of instrumental music teaching in secondary education coupled with implications for elementary school instrumental music teaching. Open to majors in Music Education, or by permission of instructor.

## 242. MUSIC IN ELEMENTARY EDUCATION

Techniques and classroom strategies that develop a sensitivity to music. Examination of movement, children's literature, vocal media, and emerging trends in curriculum design. Open to majors in Music Education, or by permission of instructor.

## 243. CHORAL MUSIC IN SECONDARY EDUCATION

Problems of the changing voice, choral repertoire for junior and senior high school, rehearsal techniques, organization and structure of secondary school choral program. Open to majors in Music Education, or by permission of instructor.

## 244 (II). CLASSROOM MUSIC IN SECONDARY EDUCATION

Investigation, evaluation, and organization of materials for use in general music classes that contribute to the development of an aurally sensitive student in grades 7-12. Open to majors in Music Education or by permission of instructor.

245 (II). VOCAL PEDAGOGY  
Methods of teaching voice production. Supervised practice teaching of other class members. Open to majors in Vocal Music Education, or by permission of instructor. Credit, 2.

247. MARCHING BAND TECHNIQUES  
Organization, training, repertoire, and show preparation for the high school and college marching band. Prerequisite, two years of college marching band experience and concurrent enrollment in MUSIC 181. Credit, 2.

## 250 (II). INTERNSHIP IN THE TEACHING OF PUBLIC SCHOOL MUSIC

A semester-long supervised experience for students who wish to be certified to teach music in the public school. Open to majors in Music Education. Prerequisite, successful completion of required techniques, methods, and pedagogy courses. Credit, 6-12.

## 363 (II). BASIC CONDUCTING

Introduction to conducting. Prerequisite, MUSIC 114 and music major status. Credit, 2.

364 (I). INSTRUMENTAL CONDUCTING  
Rehearsal techniques and conducting of instrumental ensembles. Prerequisite, MUSIC 363. 2 class hours. Credit, 2.

## 365 (I). CHORAL CONDUCTING

Rehearsal techniques and conducting of vocal ensembles. Prerequisite, MUSIC 363. 2 class hours. Credit, 2.

\*May be repeated for credit.

## APPLIED MUSIC

Registration in Applied Music courses requires prior permission of the department. Music majors are not charged additional fees for applied lessons or practice rooms.

## 120 (I), (II). PIANO CLASS

Piano proficiency. Required of all music majors. Not open to non-majors. By examination or no more than 4 hours credit allowed. 1 class hour. Credit, 1.

## 121-138\* (I), (II). INDIVIDUAL INSTRUCTION

Development of performance skills; study of appropriate literature. Student recitals and studio classes provide opportunity for frequent performances. Jury examinations required. Registration in individual instruction requires: (a) prior permission of the department; (b) an audition with the applied faculty; (c) the availability of staff time; and (d) the availability of practice facilities. Applied instruction available to non-majors based on an audition and availability of time in instructors' schedules; ensemble performance may be required as a condition of applied instruction for non-majors. Credit, 1-4.

|           |               |
|-----------|---------------|
|           | Woodwinds     |
| 121 Piano | 128 Flute     |
| 122 Organ | 129 Oboe      |
| 123 Voice | 130 Clarinet  |
|           | 131 Bassoon   |
|           | 132 Saxophone |

|            |                   |
|------------|-------------------|
| Strings    | Brasses           |
| 124 Violin | 133 Trumpet       |
| 125 Viola  | 134 French Horn   |
| 126 Cello  | 135 Trombone      |
| 127 Bass   | 136 Baritone Horn |
|            | 137 Tuba          |
|            | 138 Percussion    |

161\* (I), (II). **UNIVERSITY CHORALE**  
Choir selected by audition. Preparation and performance of choral literature ranging from the Renaissance to Contemporary. Concerts on campus and on tour. Four rehearsals a week. Chamber Singers selected from this group. *Credit, 1.*

162\* (I), (II). **UNIVERSITY CHORUS**  
Open to all students. Preparation and concert performance of oratorios and other large choral works. Three rehearsals a week. *Credit, 1.*

165\* (I), (II). **WOMEN'S CHOIR**  
A select choir specializing in choir literature for women's voices. Audition required. *Credit, 1.*

167 (I), (II). **CHAMBER SINGERS**  
Vocal ensembles specializing in performance of chamber music from Renaissance to Contemporary. Audition required. *Credit, 1.*

168 (I), (II). **MADRIGAL SINGERS**  
Vocal ensemble specializing in music of the Renaissance. Audition required. *Credit, 1.*

171\* (I), (II). **UNIVERSITY ORCHESTRA**  
Preparation and performance of orchestral literature of various styles and periods. *Credit, 1.*

181\* (I). **MARCHING BAND**  
Preparation and performance of pre-game and half-time shows during football season. Prerequisite, attendance at pre-season band camp and permission of conductor. *Credit, 1.*

182\* (I), (II). **SYMPHONY BAND**  
Preparation and performance of band and wind ensemble literature of various styles and periods. *Credit, 1.*

183\* (I), (II). **CONCERT BAND**  
Preparation and limited performance of selected band literature. *Credit, 1.*

187 (I), (II). **SMALL ENSEMBLE**  
Preparation and performance of appropriate literature for small instrumental and vocal ensembles. Open to music majors, or by permission of instructor. *Credit, 1.*

187A Brass Choir  
187B New Music Ensemble  
187C String Bass Ensemble  
187D Chamber Jazz Ensemble  
187E Percussion Ensemble  
187F UMASS MARIMBAS  
187G Collegium Musicum

188 (I), (II). **JAZZ WORKSHOP**  
Preparation and performance of literature for jazz ensembles and the school stage band. Prerequisite, permission of instructor. *Credit, 1.*

\*May be repeated for credit.

## DANCE

140. **MODERN DANCE I**  
Introduction to modern dance technique. *Credit, 1.*

141. **MODERN DANCE II**  
Continuation of modern dance technique with more emphasis on locomotor combinations. Prerequisite, Modern Dance I and permission of instructor. *Credit, 1.*

142. **MODERN DANCE III**  
Intermediate dance techniques with emphasis on the performance of more advanced combinations and techniques. Prerequisite, Modern Dance II and permission of instructor. *Credit, 1.*

143. **MODERN DANCE IV**  
Advanced techniques in modern dance with emphasis on the performance of patterns and combinations. Prerequisite, Modern Dance III and permission of instructor. *Credit, 1.*

144. **MODERN DANCE V**  
A continuation of Modern Dance IV. Prerequisite, Modern Dance IV and permission of instructor. *Credit, 1.*

147. **BALLET I**  
Beginning ballet technique involving barre and center work. *Credit, 1.*

148. **BALLET II**  
A continuation of beginning ballet techniques at the barre and in the center. Prerequisite, Ballet I and permission of instructor. *Credit, 1.*

149. **BALLET III**  
Intermediate techniques at the barre and in the center. Prerequisite, Ballet II and permission of instructor. *Credit, 1.*

155. **JAZZ DANCE I**  
Introduction to jazz dance. The discipline taught is Part I of the Luigi Technique. Emphasis on the aspects of performance. Prerequisite, Ballet I and Modern Dance I. *Credit, 1.*

156. **JAZZ DANCE II**  
Primarily for Dance Concentration and Physical Education Majors. A continuation of Jazz I. Part II of Luigi Technique is taught as the student develops a competence in the jazz style. Prerequisite, Jazz I and permission of instructor. *Credit, 1.*

157. **JAZZ DANCE III**  
Primarily for Dance Concentration and Physical Education Majors. Application of the technique of the Luigi methods acquire in Jazz I and II. Prerequisites, Jazz II and permission of instructor. *Credit, 1.*

160. **UNIVERSITY DANCERS**  
Performances of the company throughout the

East. Concentrated tour during January. audition only. *Credit*

263. **ANALYSIS OF RHYTHM**  
Analysis of rhythmic structure of music and its application to motor activity. 2 class hours, 1 2-hour laboratory period. *Credit*

264. **DANCE IMPROVISATION**  
Exploration of movement potential by solving movement problems in space, time and form. Prerequisite, Modern Dance I and permission of instructor. *Credit*

265. **DANCE COMPOSITION**  
Choreography. 1 class hour, 1 2-hour laboratory period. *Credit*

350. **DANCE HISTORY**  
History of dance as a performing art in Western culture. *Credit*

353. **DANCE PRODUCTION**  
Dance production relating to both the artistic and technical direction of the performing arts. 2 class hours, 1 2-hour laboratory period. *Credit*

## Philosophy

Head of Department: Professor Robert Sleight  
Associate Head of the Department: Professor Terence Parson. Director of Undergraduate Studies: Professor Gareth Matthews. Professors Ackermann, Aune, Ehrlich, Gettier, Gendelberger, Oppenheim, Partee, Sligh, W. Associate Professors Brentlinger, Feldman, Ferguson, Foster, Robison; Assistant Professors Jubien, Sirridge.

The standard major in philosophy consists of 10 courses (30 credits), including one in logic, one in ethics, and four in the history of philosophy. 100-level courses may be counted toward this requirement, as may individual study courses, which can be arranged by students with special interests.

Two variations on the standard major are offered: (1) an Honors major, in which students take special seminars and write a senior honors thesis; and (2) a teacher preparation program, designed to enable students to meet secondary school certification requirements in which work in Education and opportunities for student teaching at local high schools are provided.

Three joint major programs, in which philosophy is combined with classics or linguistics or mathematics, are also available. They are administered by Philosophy in cooperation with the other departments concerned. For details, consult the Director of Undergraduate Studies, Professor Gareth Matthews.

105 (I), (II). **INTRODUCTION TO PHILOSOPHY (C)**  
Some of the most important general questions, ideas, theories, and methods of inquiry which have given direction to Western thought.

1 (I), (II). ETHICS (C)  
Classical and contemporary theories concern-  
ing policy formation and the justification of  
personal decisions and ways of life.

1 (I). PROBLEMS IN SOCIAL  
THOUGHT (C)  
A critical examination of a number of major  
problems in social policy and philosophy.

1 (II). MAN AND THE STATE (C)  
An exploration of the historical, moral, legal,  
and political relationships between the indi-  
vidual and the state.

1 (I), (II). INTRODUCTION TO LOGIC  
(E)  
The nature of critical thinking, including the  
functions of language, the structure of deduc-  
tive arguments, and a glimpse at inductive  
methods.

1 (I). HISTORY OF PHILOSOPHY —  
ANCIENT AND MEDIEVAL (C)  
Development of Western thought from its  
earliest beginnings to the flowerings of medi-  
eval scholasticism. Emphasis on the contribu-  
tion of important movements and great think-  
ers.

1 (II). HISTORY OF PHILOSOPHY —  
MODERN (C)  
Continuation of 161 from the Renaissance and  
the rise of modern science to 19th century  
idealism, positivism, and voluntarism.

20 PLATO AND ARISTOTLE (C)  
The major works of Plato and Aristotle in eth-  
ics, logic, and metaphysics; the systematic  
character of their thought and its contempo-  
rary relevance. Prerequisite, one semester  
course in philosophy.

20 MEDIEVAL PHILOSOPHY (C)  
The writings of major philosophers of the  
period, including Augustine, Aquinas, Duns  
Scotus, and Ockham; their historical setting  
and relevance to modern thought. Prerequi-  
site, one semester course in philosophy.

20 CONTINENTAL RATIONALISM (C)  
Representative philosophical texts, with con-  
centration on authors of major historical  
influence such as Descartes, Spinoza, Leibniz,  
and Pascal. Prerequisite, one semester course  
in philosophy.

20 BRITISH EMPIRICISM (C)  
Representative philosophical texts. Emphasis  
on Locke, Berkeley, Hume and their historical  
influence, especially on contemporary empiri-  
cism. Prerequisite, one semester course in  
philosophy.

20 KANT AND 19TH CENTURY  
PHILOSOPHY (C)  
Readings of original texts, with emphasis on

Kant and selected 19th century thinkers. Pre-  
requisite, one semester course in philosophy.

218. AMERICAN PHILOSOPHY (C)  
Examination by means of a study of selected  
original texts by the outstanding American  
philosophers, of their contribution to Western  
thought and American civilization.

225. INDIAN PHILOSOPHIES (C)  
Theories of reality, of knowledge, of art, and  
of human destiny in the leading schools of  
Indian Asia; traditional and contemporary  
political theory.

226. EAST ASIAN PHILOSOPHIES (C)  
Theories of human nature, society, and the  
state in philosophies of Chinese and Japanese  
origin; the modification of Buddhism under  
the influence of Chinese thought.

230. INTERMEDIATE LOGIC  
First order quantification theory with rela-  
tions, identity, and definite descriptions; an  
introduction to one or more of the following:  
modal logic, epistemic logic, deontic logic,  
tense logic, and many-valued logics. Prerequi-  
site, PHIL 125.

231. FORMAL FOUNDATIONS OF  
LINGUISTIC THEORY  
Topics in formal systems as they relate to  
modern linguistic theory, including set theory,  
logic, group theory, automata theory, and for-  
mal grammars. Prerequisite, LING 201.

240. PHILOSOPHICAL APPROACHES TO  
SCIENCE (E)  
An introduction to the results of philosophical  
analysis of scientific practice, and the bearing  
of these results on a general description of  
scientific methodology.

241. PHILOSOPHICAL APPROACHES TO  
RELIGION (C)  
Readings in contrasting religious philoso-  
phies, followed by analysis of concepts  
involved in understanding religion as related  
to other aspects of experience.

242. APPROACHES TO POLITICS AND  
SOCIETY  
The relationships between theories of person-  
ality, theories of social organization, and polit-  
ical philosophies, through a close study of  
classical and contemporary texts.

243. PHILOSOPHY OF ART (C)  
The nature and function of artistic creation  
and expression, the analysis of aesthetic  
experience, the distinctive function of art in  
culture and personality, and the principles of  
criticism.

261. CONTEMPORARY ANALYTIC  
PHILOSOPHY (C)  
Russell, Carnap, Wisdom, the later Wittgen-

stein, Austin, Strawson, Quine. Prerequisite,  
one semester course in philosophy.

263. MARXISM  
The moral, social, and political philosophy of  
Marx and Engels. Prerequisite, one semester  
course in philosophy or permission of instruc-  
tor.

264. EXISTENTIAL PHILOSOPHIES (C)  
Examination by a study of selected original  
texts of the main problems peculiar to this  
movement as a whole and to its main expo-  
nents individually. Prerequisite, one semester  
course in philosophy other than 125.

340. PHILOSOPHY OF SCIENCE  
A critical analysis of the structure of scientific  
method and the language of science, the  
respective roles of induction and deduction in  
science, and the status of theoretical terms.  
Prerequisites, three semester courses in phi-  
losophy, including 125.

341. PHILOSOPHY OF RELIGION  
Analytic study of the meaning and justifiabil-  
ity of beliefs concerning the existence and  
nature of God. Prerequisites, three semester  
courses in philosophy, including 125.

342. POLITICAL PHILOSOPHY  
A systematic approach to major controversies  
in philosophy of political science and political  
ethics; e.g., rationalism vs. empiricism, natural  
law vs. legal positivism. Prerequisite, one  
semester course in philosophy or permission  
of instructor.

343. AESTHETICS  
Analytic study of selected problems in aes-  
thetic theory. Prerequisites, three semester  
courses in philosophy, including 125.

344. EPISTEMOLOGY  
Examination of various accounts of the nature  
of knowledge; attention to basic principles of  
epistemic logic, probability, and certainty.  
Prerequisites, three semester courses in phi-  
losophy, including 125.

345. METAPHYSICS  
The basic problems of metaphysics. Problems  
include the nature of necessity, the relation  
between universals and particulars, the con-  
cept of causality, and the relative merits of  
competing metaphysical views, such as mate-  
rialism, idealism, and dualism. Prerequisites,  
three semester courses in philosophy, includ-  
ing 125.

346. PHILOSOPHY OF LANGUAGE  
An introduction to some of the major  
approaches to the philosophy of language; the  
contributions of some of the following philoso-  
phers: Frege, Carnap, Quine, Austin, Chom-  
sky, Russell, Strawson, Grice, Tarski, Witt-  
genstein, and others. Prerequisite, two courses  
in philosophy in addition to PHIL 230.

### 350. HISTORY OF ETHICS

Theories of important figures in the history of ethics, presented chronologically. Works in the following traditions will be represented: ancient Greek ethics; natural law and natural right theorists; the British moral sense, sympathy, and sentiment theorists; Kant; utilitarianism; self realization; pragmatism; and contemporary intuitionists. Prerequisites, two semester courses in philosophy above 200.

### 351. ETHICAL THEORY

Some major problems of ethical theory. Emphasis on definition, the status of ethical statements, and reasoning and justification in ethics. Prerequisites, two semester courses in philosophy, including 125.

### 365. PHILOSOPHICAL THEOLOGY

Systematic and historical inquiry into the methods, problems, and directions of theological thought. Prerequisites, two semester courses in philosophy above 200.

### 371. PHILOSOPHY AND LOGIC

Informal exposition of results of modern logic that are of philosophical significance. Topics chosen from: semantics for first-order theories; Lowenheim-Skolem theorem; Herbrand-Gentzen theorem; Gödel's incompleteness theorem for first-order elementary number theory; Church's undecidability theorem for quantification theory; Tarski's semantic conception of truth; paradoxes of abstract set theory. Prerequisite, PHIL 230.

### 372. MATHEMATICAL LOGIC I (E)

Axiomatization of sentential logic and the lower functional calculus; the syntax and semantics of first-order theories including results concerning consistency, adequacy, completeness, and elementary model theory. Prerequisite, PHIL 230 or major in mathematics.

### 373. MATHEMATICAL LOGIC II (E)

Formalization of elementary number theory as a first-order theory; Gödel's theorem concerning incompleteness of number theory; introduction to the theory of recursive functions. Prerequisite, PHIL 372 or major in mathematics.

### 374. PHILOSOPHY OF MATHEMATICS

A discussion of different philosophical positions on the foundations of mathematics (logicism, intuitionism, and formalism) and the existence of mathematical objects (platonism and nominalism). Prerequisite, MATH 381 or PHIL 373.

### 381. SELECTED ANCIENT OR MEDIEVAL PHILOSOPHER

Intensive study in the works of a single ancient or medieval philosopher, such as Plato, Aristotle, or Aquinas. Prerequisites, PHIL 125, 161 or 201, and one additional semester course in philosophy.

### 382. SELECTED MODERN

#### CONTINENTAL PHILOSOPHER

Intensive study in the works of a single modern continental philosopher, such as Descartes, Spinoza, Leibniz, Kant, or Hegel. Prerequisites, PHIL 125, 162 or 203, and one additional semester course in philosophy.

### 383. SELECTED MODERN BRITISH PHILOSOPHER

Intensive study in the works of a single modern British philosopher, such as Locke, Berkeley, Hume, or Mill. Prerequisites, PHIL 125, 162 or 204, and one additional semester course in philosophy.

(381, 382, and 383 may be repeated for an additional 3 credits provided the topic is different on each occasion.)

### 384. CONTEMPORARY PROBLEMS

Selected persistent philosophical problems — e.g., induction, relation of mind and body, perception, certainty of statements, knowledge of other minds. Prerequisites, PHIL 125 and two additional semester courses in philosophy.

### 385, 386. SPECIAL PROBLEMS

Individual study under the supervision of a member of the department. Written permission of the student's faculty supervisor must be filed with the departmental secretary before registration. Credit, 1-6.

### 391, 392. SEMINAR

One major philosopher, major philosophical tradition, or restricted subject in a special field of philosophical inquiry. Prerequisites, two semester courses in philosophy numbered above 200, or permission of department.

### 396, 397. HONORS SEMINARS, I, II

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Slavic Languages and Literatures

Head of Department: Professor Laszlo M. Tikos. Professors Ivask, Levin; Associate Professor R. Rothstein; Assistant Professors Lake, Stawiecki; Lecturer, H. Rothstein

The Russian major aims at proficiency in reading, writing, speaking and understanding the language, as well as a knowledge of Russian literature. Russian majors are encouraged to acquire a background in the history, government, economy and sociology of Russia, in

order to understand the culture and literature of the Russian people. Successful completion of the program should prepare the student for graduate study or enable him or her to become a teacher or translator of Russian.

Prerequisite for a major in Russian is successful completion of RUSS 110, 120, 140 or the equivalent.

Departmental requirements for a major are:

1. the third-year language sequence:  
261, 262 — Advanced Grammar  
271, 272 — Russian Conversation
2. the fourth-year language sequence:  
281, 282 — Russian Stylistics  
291, 292 — Introduction to Russian Literature
3. Two additional courses within department to be selected in consultation with an adviser.
4. HIST 214, 215 — The History of Russia

It is strongly recommended that students make every effort to initiate or continue study of another foreign language, preferably French or German. This is particularly important for anyone planning graduate study, but is important for others as well. Since students have a limited number of electives, it is essential for majors and prospective majors to consult early and often with their academic advisers in selecting their courses.

## RUSSIAN

110 (I), 120 (II). ELEMENTARY RUSSIAN. Grammar, exercises in composition and conversation, selected readings. No previous language training required. 3 class hours, 1 laboratory hour.

### 119, 129, 139. RUSSIAN READING COURSE

Intensive study of Russian grammar. Emphasis on developing reading ability only. No previous language training required.

130 (I), 140 (II). INTERMEDIATE RUSSIAN. Review of fundamentals of grammar followed by more advanced study of grammatical structure and idiom. Composition, conversation and readings in Russian fiction. Prerequisite, RUSS 120 or equivalent.

149 (II). RUSSIAN EXPOSITORY PROSE. Readings in non-literary Russian texts from a wide variety of scientific and technical fields. Emphasis on developing reading skill in student's field of specialization. Prerequisite, three semesters of Russian or equivalent.

201 (I). RUSSIAN CULTURE. Russian geographical, historical, literary, religious, philosophic and artistic life as a means to assess Russian cultural progress. Conducted in English.

2 (I). **DOSTOEVSKY (C)**  
Historical and literary background. Close text analysis. Student reports. Readings of selected works in the original required of Russian majors. Prerequisite, junior standing.

2 (II). **TOLSTOY (C)**  
Historical and literary background. Close text analysis. Student reports. Readings of selected works in the original required of Russian majors. Prerequisite, junior standing.

2 (I). **MASTERPIECES OF RUSSIAN LITERATURE IN TRANSLATION (C)**  
Section from classics of Russian romanticism and realism culminating in the novels of Dostoevsky and Tolstoy. Prerequisite, junior standing.

2 (II). **RUSSIAN DRAMA (C)**  
Russian drama in the originals from the beginnings to the establishment of a national repertoire and theatre. Plays from Fonvizin to Chekhov. Prerequisite, RUSS 262 or equivalent.

2 (II). **SOVIET LITERATURE (C)**  
Beginnings and development of Soviet prose, drama and criticism from Gorky to the present. Conducted in English. Majors required to do research in Russian. Prerequisite, junior standing.

2 (II). **RUSSIAN POETRY**  
Russian poetry in the originals. Nineteenth century to the present. Prerequisite, RUSS 262 or equivalent.

2 (I). **THE SLAVIC PEOPLES, THEIR LANGUAGES AND CIVILIZATIONS (C)**  
Survey of the historical, social, intellectual and cultural evolution of the Slavic peoples from the earliest times to the present. Emphasis on the non-Russian Slavs. Conducted in English.

2 (I), 262 (II). **ADVANCED RUSSIAN**  
Advanced grammar, building vocabulary and improving reading ability through selection from the Classical and Soviet Periods. Composition and classroom discussions in Russian using reading materials. Prerequisite, RUSS 140 or equivalent. Departmental requirement for Russian majors.

2 (II). **SCIENTIFIC RUSSIAN**  
Intensive experience in translating scientific, technical, academic and journalistic articles. Prerequisite, RUSS 140 or equivalent.

2 (II). **RUSSIAN PHONETICS**  
Detailed analysis of the Russian sound system. Articulation and intonation treated largely in comparison with the sound system of English. Recommended for those preparing to teach Russian. Prerequisite, RUSS 262 or equivalent.

271 (I), 272 (II). **RUSSIAN CONVERSATION**  
Devoted to acquiring a conversational vocabulary and to developing fluency in speaking Russian. Prerequisite, RUSS 140 or equivalent. Departmental requirement for Russian majors.

281 (I), 282 (II). **RUSSIAN STYLISTICS**  
The style of Russian literary works. Practical application of grammatical principles and intensive study of idiomatic expressions. Prerequisite, RUSS 262 or equivalent. Departmental requirement for Russian majors.

291 (I), 292 (II). **INTRODUCTION TO RUSSIAN LITERATURE**  
Survey course conducted in Russian. Readings in Russian, written reports. Prerequisite, RUSS 262 or equivalent. Departmental requirement for Russian majors.

310 (II). **THE TEACHING OF RUSSIAN**  
Analysis of the major linguistic problems facing the teacher of Russian and the methods used in solving them. Prerequisite, RUSS 365 or permission of instructor.

319 (I). **PUSHKIN**  
The most important works of Pushkin, prose and poetry: Eugene Onegin, Boris Godunov, The Captain's Daughter, The Bronze Horseman, Poltova, and others. Facility in speaking and writing Russian required. Conducted on a seminar basis; each student actively participating.

320 (II). **GOGOL**  
The most important works of Gogol: *The Inspector-General*, *Dead Souls*, *The Overcoat* and selected passages from his *Correspondence with Friends*, and other works. Facility in speaking and writing Russian required. Conducted on a seminar basis; each student actively participating.

331 (I). **19TH CENTURY RUSSIAN CRITICISM**  
Criticism of the 19th century: Belinsky, Chernyshevsky, Dobrolyubov, Pisarev and others. Facility in speaking and writing Russian required. Conducted on a seminar basis; each student actively participating.

365 (I). **STRUCTURE OF RUSSIAN**  
Descriptive analysis of the morphology of contemporary standard Russian with additional emphasis on selected problems of derivation. Prerequisite, proficiency in Russian.

366 (II). **CONTRASTIVE STRUCTURES OF RUSSIAN AND ENGLISH**  
Contrastive analysis of Russian and English. Emphasis on those elements of Russian structure that differ significantly from English. Prerequisite, RUSS 365.

385, 386. **SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

398. **SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. **SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## POLISH

110 (I), 120 (II). **ELEMENTARY POLISH**  
Oral and written exercises, pronunciation and grammar, reading of selected works. No previous language training required. 3 class hours, 1 laboratory hour.

130 (I), 140 (II). **INTERMEDIATE POLISH**  
Review of grammar, composition and selected readings. Prerequisite, POLISH 120 or equivalent and permission of instructor.

## Spanish and Portuguese

Chairman of Department: H. L. Boudreau. Professors Bancroft, De Puy, Greenfield, Piccus, Rothberg, Wexler; Associate Professors Barreda-Tomas, Fernandez-Turienzo, Scott, Sturm; Assistant Professors Andrade, Bradford, Galvin, MacLeod, Milan, Ornelas, Rauchwarger, Soons, Staczek, Zamora; Visiting Instructor Monserrate; Lecturer Collins.

## PORTUGUESE

Approval of major in Portuguese is now pending. Information is available in the Department.

110 (I), 120 (II). **ELEMENTARY PORTUGUESE**  
For students with no previous creditable training in Portuguese. Intensive practice in the language skills. 3 class hours, laboratory.

126 (I). **ELEMENTARY PORTUGUESE — INTENSIVE**  
Emphasis on the oral aspect. Designed to allow completion of PORT 110 and 120 in one semester. 10 class hours. Credit, 6.

130 (I), 140 (II). **INTERMEDIATE PORTUGUESE**  
For students with one year of college Portuguese or equivalent. Training in the language skills; emphasis on speaking and understanding; readings in cultural and literary texts.

146 (II). **INTERMEDIATE PORTUGUESE — INTENSIVE (C)**  
Emphasis on conversation in Portuguese and readings in Portuguese and Brazilian literature.

ture. Systematic review of grammar. Fulfills the language requirement. 8 class hours.

Credit, 6.

**161 (I), 162 (II). INTRODUCTION TO PORTUGUESE LITERATURE (C)**

Selected masterpieces of Portuguese literature presented integrally, in literary-historical perspective. Conducted in Portuguese. Either semester may be elected independently. Prerequisite, PORT 140 or permission of department.

**181 (I), 182 (II). CONVERSATIONAL PORTUGUESE**

Training in language skills with emphasis on speaking and understanding. Readings in newspapers, cultural texts, debates, discussions all geared to improving pronunciation, vocabulary and fluency in the language.

**345. TEACHING OF PORTUGUESE**

Review and analysis of problems, methods and materials in teaching Portuguese at the elementary, secondary and college levels.

**SPANISH**

The major in Spanish offers programs for students in any one of the three interest areas: Literature, Language, and Linguistics, and Bilingual Studies. Further information about provisional offerings not listed below is available from the department.

**110, 120 (I), (II). ELEMENTARY SPANISH**

For students with no previous creditable training in Spanish. Intensive practice in language skills. To fulfill the language requirement, upon completion of the course most students are required to continue by taking SPAN 130, 140. 3 class hours, 2 laboratory sessions.

**111. SPANISH FOR READING**

The development of reading skills in Spanish through the study of grammar and vocabulary. Not for students wishing to develop listening and speaking skills. Five class hours.

Credit, 4.

**126 (I), (II). ELEMENTARY SPANISH — INTENSIVE**

Emphasis on oral aspect. Designed to allow completion of SPAN 110 and 120 in one semester. 10 class hours. Open to all. Credit, 6.

**130, 140 (I), (II). INTERMEDIATE SPANISH**

For upperclassmen who have completed SPAN 110-120, and freshmen and transfer students found qualified by placement examination. Training in language skill, with emphasis on speaking and understanding; readings in cultural and literary texts. Students completing SPAN 140 fulfill the language requirement.

**134 (I), (II), 144 (I), (II). INTERMEDIATE SPANISH**

Social sciences reading track.

**145 (I). SPANISH FOR NATIVE SPEAKERS**

Review of Spanish grammar. Readings and composition. Open only to native speakers of Spanish.

**146 (I), (II). INTERMEDIATE SPANISH — INTENSIVE**

Emphasis on conversation in Spanish and readings in Hispanic literature. Systematic review of grammar. Successful completion of this course satisfies the foreign language qualification. 8 class hours. Credit, 6.

**150, 151 (I), (II). GRAMMAR**

A review of basic elements of grammar. For Spanish majors and others who plan to continue with Spanish beyond SPAN 140. To be taken concurrently with SPAN 130 and 140. 2 class hours. Credit, 2.

**155. SPANISH FOR NATIVE SPEAKERS**

Advanced grammar for native speakers. Readings, oral and written communication. Prerequisite: SPAN 145 or equivalent.

**161 (I), 162 (II). INTRODUCTION TO SPANISH LITERATURE (C)**

Selected complete works in several genres studied analytically and critically to develop intensive reading skills and extend ability to interpret and explicate in Spanish both orally and in writing. Prerequisite, SPAN 140 or equivalent.

**180, 181 (I), (II). ORAL SPANISH**

Pronunciation, vocabulary building, speeches, discussions, debates. Grammatical elements required for correct and fluent use of American and Peninsular Spanish. Prerequisite, SPAN 140 or permission of department. 4 class hours. Credit, 4 (180); 3 (181).

**191 (I). COMPOSITION**

The basic principles of writing in Spanish. Required of Spanish majors; open to others qualified. Prerequisites, SPAN 150 and 151.

**200 (I). CULTURAL BACKGROUNDS: SPAIN (C)**

The diverse factors that have shaped Spanish culture. In Spanish. Prerequisite, SPAN 140 or permission of instructor.

**201 (II). CULTURAL BACKGROUNDS: LATIN AMERICA (C)**

The unity and diversity of Latin American civilization and the different cultural factors that have shaped it. In Spanish. Prerequisite, SPAN 140 or equivalent.

**220. LITERARY CURRENTS OF THE HISPANIC WORLD I (C)**

The major literary currents in Spain and Spanish America from the medieval period through the baroque era. Prerequisite: SPAN 140.

**221. LITERARY CURRENTS OF HISPANIC WORLD II (C)**

The major literary currents in Spain and Spanish America from the eighteenth century through to the present. Prerequisite: SPAN or permission of instructor.

**222. TECHNIQUES OF LITERARY ANALYSIS IN HISPANIC LITERATURE**

Intended to train the Spanish major in techniques of literary analysis via the critical examination of three principal genres: poetry, drama, and prose fiction. Prerequisite: SP 220 or permission of instructor.

**250 (I, II). CONVERSATIONAL SPANISH (Course 1)**

For Spanish majors and others interested in developing fluency in the spoken language. Prerequisite, SPAN 180-181 or permission of department. Credit

**251 (II). CONVERSATIONAL SPANISH (Course 2)**

For Spanish majors and others interested in further fluency in the spoken language. Prerequisites, SPAN 180-181 and 250 or permission of department. Credit

**252 (I). CONVERSATIONAL SPANISH (Course 3)**

For Spanish majors and others interested.

**253 (II). CONVERSATIONAL SPANISH (Course 4)**

For Spanish majors and others interested in further fluency in the spoken language. Prerequisites, SPAN 180-181, 250, 251, and 252 or permission of department. 2 class hours. Credit

**260 (II). SPANISH MASTERPIECES IN TRANSLATION (C)**

Detailed study of masterpieces of Spanish literature from various periods. Not open to Spanish majors nor to students who have taken or plan to take SPAN 161-162.

**261. LATIN-AMERICAN LITERATURE IN TRANSLATION**

The literature of Latin America from Colonial Period to the present. Works read in English translation. Not open to Spanish majors.

**262. SPANISH GOLDEN AGE DRAMA IN TRANSLATION (C)**

The drama of the Golden Age of Spanish literature (1500-1700) with emphasis on works of Lope de Vega, Tirso de Molina, and Calderón de la Barca. Readings in English translation. Not open to Spanish majors.

**292. LATIN-AMERICAN LITERATURE IN TRANSLATION (C)**

The literature of Latin America from Colonial Period to the present. Works read

lish translation. Not open to Spanish majors.

**SECONDARY STUDENT TEACHING**  
Preparation of students to meet the requirements for secondary teacher certification in Spanish. No credit from this course may be applied to the major program. Registration in this course must be completed one full semester prior to the semester in which the course is taken. Prerequisites: SPAN 375, PSYCH 263 or EDUC 301 and a Foundations of Education course or its approved alternative.

Credit, 8-12.

**331. 302 (II). FIELD STUDY**  
Field experiences (such as tutoring Spanish-speaking students, study and work in a Puerto Rican community, or field study in Puerto Rico). Before registering, students must consult the department as to time requirements. May be taken either semester or both, but only one semester may be used for major credit in Spanish. Prerequisite: permission of instructor. Credit, 1-3.

**332. ADVANCED GRAMMAR**  
For details and shades of Spanish grammar. Highly recommended for Spanish majors planning to teach; open to all qualified. Prerequisites, SPAN 150 and 151.

**333. ADVANCED COMPOSITION**  
Intensive study of composition and style. Highly recommended for Spanish majors planning to teach; open to all qualified.

**334. SPANISH LITERATURE FROM ITS BEGINNINGS TO 1500 (C)**  
Canto de mio Cid, Libro de buen amor, Celestina and other selected texts.

**335. SPANISH MEDIEVAL POETRY (C)**  
Spanish epic, lyric poetry and other verse of the period.

**336. SPANISH MEDIEVAL PROSE (C)**  
Narrative, historical and didactic prose works of medieval Spain.

**337. OLD SPANISH TEXTS AND READINGS (C)**  
Language and writing systems of Medieval Spain through an analysis of selected texts and readings. Prerequisite: SPAN 162 or equivalent.

**338. INTRODUCTION TO THE LITERATURE OF THE GOLDEN AGE (C)**  
An overview of the prose, poetry, and drama characterizing the literature of Renaissance and Baroque Spain excluding *Don Quijote*. Prerequisite: SPAN 162 or equivalent.

**339. PROSE OF THE GOLDEN AGE (C)**  
Major prose works in 16th and 17th century

Spain. Emphasis on the novel, excluding the *Quijote*.

**332. LYRIC POETRY OF THE GOLDEN AGE (C)**  
Spanish poetry of the 16th and 17th centuries from Garcilaso to Gongora.

**333. DRAMA OF THE GOLDEN AGE (C)**  
Deals primarily with the comedia during the period of maximum creation, 1556-1681.

**334. CERVANTES (C)**  
Intensive reading of *Don Quijote*.

**340. SPANISH LITERATURE FROM 1700 THROUGH ROMANTICISM (C)**  
Spanish literature and thought in the 18th century and the Romantic movement.

**341. 19TH CENTURY SPANISH NOVEL (C)**  
Prose fiction in the second half of the 19th century.

**345. MODERN SPANISH THEATRE (C)**  
Development of the theatre in Spain from the post-Romantic period to the present.

**346. 20TH CENTURY SPANISH PROSE FICTION (C)**  
The novel in Spain from the Generation of '98 to the present.

**347. MODERN SPANISH POETRY (C)**  
Poetry in Spain from Becquer to the present.

**348. THE ESSAY IN MODERN SPAIN (C)**

**350. SPANISH-AMERICAN LITERATURE TO 1900 (C)**  
A survey from pre-Columbian times to the Modernist movement.

**351. THE MODERNISTA MOVEMENT (C)**  
Modernismo in Spanish America, including a comparative study of its manifestations in Spain.

**352. MAJOR SPANISH-AMERICAN WRITERS (C)**  
Intensive study of major figures in Spanish-American literature.

**353. SPANISH AMERICAN POETRY SINCE MODERNISMO (C)**  
The principal authors and movements in 20th century poetry. Prerequisite: SPAN 162 or equivalent.

**354. RECENT AND CONTEMPORARY SPANISH AMERICAN DRAMA (C)**  
The principal authors and movements of 20th century drama. Prerequisite: SPAN 162 or equivalent.

**355. MODERN SPANISH-AMERICAN PROSE FICTION (C)**  
Spanish-American prose fiction in the late 19th and early 20th centuries.

**356. CONTEMPORARY PROSE FICTION IN SPANISH AMERICA (C)**  
The recent novel and short story.

**357. HISPANIC LITERATURE OF THE CARIBBEAN (C)**  
A comparative study of the development of the literature of Puerto Rico, Cuba and the Dominican Republic, and of the historical, cultural and socio-political factors that have shaped it. Prerequisite, SPAN 161-162.

**370. GENERAL VIEW OF HISPANIC LINGUISTICS**  
An introduction to linguistics as applied to the study of the Spanish language. An overview of the areas (diachronic, synchronic, dialectal) of study, and of the different theoretical points of view. Prerequisite: proficiency in Spanish.

**371. HISTORY OF THE SPANISH LANGUAGE IN SPAIN AND AMERICA**  
The Spanish language from the Middle Ages to the present, in both Spain and America.

**372. HISPANIC DIALECTOLOGY**  
A diachronic and synchronic survey of the dialects of Spanish America and the Hispanic Caribbean Spanish. Three major areas of study: the dialects of Spain, the dialects of Spanish America, and the dialects of the Hispanic Caribbean. The area emphasized varies from year to year. Prerequisite: SPAN 111.

**373. CONTRASTIVE ANALYSIS OF SPANISH AND ENGLISH**  
A contrastive analysis of the phonological, morphological and syntactic systems of Spanish and American English. Prerequisite: SPAN 370.

**374. HISTORY AND THEORY OF HISPANIC BILINGUALISM**  
A survey of the history of contact between different linguistic and cultural groups, and of the theories of the nature and consequences of these contacts. Emphasis on the Hispanic world and Spanish- and Portuguese-speaking groups in the U.S. Prerequisite: SPAN 370.

**375. THE TEACHING OF SPANISH**  
Analysis of the major problems anticipated in the teaching of Spanish, and their solutions.

**376. TEACHING OF ENGLISH TO SPANISH SPEAKERS**  
The application of linguistic principles to the teaching of English for Spanish speakers. Prerequisite: SPAN 370.

378 (I). SPANISH PHONETICS:

PHONOLOGY AND PHONEMICS

A systematic study of sounds, articulation and graphic representation. Highly recommended for teachers of Spanish.

379. THE STRUCTURE OF MODERN SPANISH

Syntax and morphology of contemporary Spanish. Both the oral and written systems analyzed from the points of view of the major modern grammatical theories. Structural differences between Spanish and English; problems of interference for the non-native. Prerequisite, permission of instructor.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

391. SENIOR SEMINAR

Independent work on special problems in Hispanic literatures.

398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Theater

Chairman of Department: Professor David M. Knauf. Professor Niedeck; Associate Professors Abramson, Korty, Stewart; Assistant Professors Bednerik, Brann, di Salvo, Farris, Fiala, Gaeke, Galbreath, Mahnken; Lecturer Rocky.

The course of study in the Department of Theater is grounded in the belief that the performing arts draw on a unique combination of a variety of intellectual and artistic skills and talents which are most fully developed when theory and practice are integrated in the learning experience. Students in the program gain expertise in all the fundamental areas of theatrical art in graduated sequences of study designed to bring into focus rigorous critical thinking, precise methods of research, and imaginative expression in performance.

### Sequence of Study

#### Introduction to Theater

Prerequisites: none 3 cr

#### Theater Practice

Prerequisites: none 1 cr

(May be repeated; 3 credits are required of majors)

#### Basic Techniques

Prerequisites: Introduction to Theater and at least 1 credit of Theater Practices

Scenography 3 cr

Dramaturgy 3 cr

Performance 3 cr

#### Intermediate Techniques

Prerequisite: completion of all basic techniques

Scenography 9 cr

Dramaturgy 9 cr

Performance 9 cr

In addition, students may elect up to 18 credits of advanced course work in scenography, dramaturgy, and/or performance when intermediate-level work has been completed in the corresponding area(s).

Freshmen who think they may wish to major in theater should elect Introduction to Theater, which also satisfies one of the four course requirements in the Humanities and Fine Arts core (C).

Basic techniques in scenography, dramaturgy, and performance are normally completed during the sophomore year. Opportunities to test out of basic techniques are provided regularly by the Department of Theater. The bulk of the 56 credits required by the College of Arts and Sciences should be earned before the beginning of the junior year. Intermediate and advanced course work is usually completed during the junior and senior years.

Non-majors with appropriate qualifications are welcome to participate in the activities of the Department of Theater. Introduction to Theater is strongly recommended before course work at the basic and intermediate levels. Enrollment of non-majors in all upper-level courses is permitted after completing (or testing out of) basic techniques in the specific area(s) of interest. Department majors are given preference in placement at all levels within the program.

With the exception of Introduction to Theater and Theater Practice, enrollment in theater courses is by permission of designated department advisers only. It is imperative, therefore, that all majors, prospective majors, and non-majors consult with a department adviser to determine eligibility for and appropriate placement within the various curricular activities.

### 100. INTRODUCTION TO THEATER (C)

An introduction to the art of the theater, form, function, influences, and place in society.

### 110. THEATER PRACTICES

Practical experience on box office, house, publicity, shop, and production crews; may be repeated for credit; mandatory Pass/Fail. Credit, 1.

### 120. DRAMATURGY (C)

An introduction to the esthetic principles and the methods of historical and critical research employed in the analysis of plays and stage performances.

### 140. PERFORMANCE

An introduction to the art of acting; exercise in creating the physical and vocal detail stage characterization with special attention to the techniques of establishing and controlling theatrical information. Prerequisite: THEATR 100; at least one semester of permission of department.

### 160. SCENOGRAPHY

An introduction to the art of theatrical design with emphasis on the function of scenic properties, lights, costumes, make-up, sound in creating the visual environment stage performances. Prerequisites: THEATR 100; at least one semester of 110; permission of the department.

### 210. REHEARSAL AND PRODUCTION

Individual production assignments as actor, crew heads, and assistant directors, dramaturgy, voice and movement coaches; mandatory Pass/Fail; may be repeated for credit. Credits, 1.

### 211. THEATRICAL MAKE-UP

Principles and practices of stage cosmetics and prostheses. Prerequisites: THEATR 221, or 222; 240, 241, or 242; 260, 261, or 262; permission of instructor.

### 215. THEATER MANAGEMENT

The management and organization of theaters, their public promotion, and their impact on the social, political, and economic life of the community. Prerequisites: THEATR 140, 160 and permission of instructor.

### 220. CONVENTIONS OF THE CLASSICAL THEATER (C)

Experiments in theatrical art in ancient Greece and Rome, renaissance Italy, and century France. Prerequisites: THEATR 140, at least two semesters of 110; 120, 140, and permission of the department.

### 221. CONVENTIONS OF THE MODERN THEATER (C)

Innovations in theatrical practice from late 16th century in England and Scotland through the romantic revolution in Germany and France; medieval stage artists are examined as precursors of the modern theater. Prerequisites: THEATR 100; at least two semesters of 110; 120, 140, and 160; permission of department.

### 222. CONVENTIONS OF THE AVANT-GARDE THEATER (C)

New trends in theatrical practice from middle of the 19th century to the present. Prerequisites: THEATR 100; at least two semesters of 110; 120, 140, and 160; permission of department.

### 230. AMERICAN THEATER (C)

Selected periods and styles in the history of American theater.

American stage and screen art. Prerequisites: THEATR 220, 221, 222; or permission of instructor.

## 2. BLACK THEATER (C)

Selected works by White and Black playwrights with emphasis on the image of the Afro-American. Prerequisites: THEATR 220, 221, 222; or permission of instructor.

## 2. CONCERT THEATER

Analysis of non-dramatic literature (prose, verse, non-fiction) for group performance; preparation and rehearsal of chamber theater and readers theater scripts. Prerequisites: THEATR 220, 221, or 222; 240, 242; or permission of instructor.

## 2. STAGE Diction

Development of the actor's vocal resources with attention to clarity, articulation, flexibility, range, variety, energy, and projection; the rhythms and patterns of dialogue, and the coding of the dramatic line; phonetics and ear training; the elements of stage dialect. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of the department.

## 2. STAGE MOVEMENT

Exercises in physical balance, alignment, coordination, and control with special attention to the part which posture, position, and movement play in conveying theatrical information. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of department.

## 2. ACTING

Script analysis, and the development of vocal and physical performance in the building of effective stage characterizations. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of department.

## 2. SCENIC DESIGN

The principles of scenic design and technical production and their application. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of department.

## 2. LIGHTING DESIGN

The theories, practices, and equipment of stage lighting. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of department.

## 2. COSTUME DESIGN

Principles and practices of silhouette, draping, color, texture, pattern drafting, and construction of theatrical garments. Prerequisites: THEATR 100; at least two semesters of 110, 120, 140, and 160; permission of department.

## 35. PLAYWRITING

An introduction to the technique of translating

idea into a theatrical scenario. Prerequisites: Completion of departmental major; permission of instructor.

## 339. PROJECTS IN DRAMATURGY

Selected problems in the history of western stage. Prerequisites: Completion of departmental major; permission of instructor.

## 340. SPEECH STYLES AND DIALECTS

Intensive vocal exercises in one or two theatrical periods or styles depending on the performance needs of a given semester as well as in American regional and national dialects. Prerequisites: THEATR 240, 241, 242, and permission of instructor.

## 341. STYLES OF STAGE MOVEMENT

Intensive exercises in stage movement with period costumes and properties, period and show dance; the use of stage weapons; pantomime, lazzi. Prerequisites: THEATR 240, 241, 242, and permission of instructor.

## 342. ACTING STUDY

Intensive exercises in script analysis, characterization, and ensemble performance. Prerequisites: THEATR 240, 241, 242, and permission of instructor.

## \*345. DIRECTING

An introduction to the theory and practice of stage direction with special attention to the control of stage space for conveying theatrical information. Prerequisites: Completion of departmental major; permission of instructor; assistant to a faculty director.

## \*348. CONCERT THEATER ENSEMBLE

Analysis, rehearsal, and performance of a repertory of concert theater scripts for on- and off-campus production. Prerequisites: Completion of departmental major or permission of instructor.

## \*349. SENIOR ENSEMBLE

Intensive analysis and rehearsal of a script from the initial production concept to the finished performance. Prerequisites: Completion of departmental major and permission of instructor.

## \*359. PROJECTS IN PERFORMANCE

Selected problems in voice, movement, and acting. Prerequisites: Completion of departmental major, and permission of instructor.

## \*360. SCENIC DESIGN STUDIO

Tutorial studies in scenic design theory and conceptualization, and the solution of related technical problems; may be repeated. Prerequisites: THEATR 260, 261, 262, and permission of instructor.

## \*361. LIGHTING DESIGN STUDIO

Tutorial studies in lighting design theory and conceptualization, and the solution of related

technical problems. Prerequisites: THEATR 260, 261, 262, and permission of instructor.

## \*362. COSTUME DESIGN STUDIO

Tutorial studies in costume design theory and conceptualization, and the solution of related technical problems. Prerequisites: THEATR 260, 261, 262, and permission of instructor.

## \*379. PROJECTS IN SCENOGRAPHY

Selected problems in stage design and technical theater. Prerequisites: completion of major, and permission of instructor.

## \*385, 386. SPECIAL PROBLEMS

Directed study in areas not covered in the theater curriculum; by approved contract only. *Credit, 1-6.*

## 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4*

## 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

\*May be repeated for credit.

# Natural Sciences and Mathematics

## Biochemistry

Head of Department: Professor R.C. Fuller; Professors Little, Westhead; Associate Professors Gawienowski, Nordin, Robinson; Zimmermann; Assistant Professors Fischer, Fournier, Mason, Schneider, Schwartz, Slakey.

The sample curriculum is outlined below. First Year: MATH 127-128 or 131-132; CHEM 113-114 or 111-112; ZOOL 190 or (not both) BOTANY 100 (if exempt, select from ZOOL 221 or 227 or 240 or from an approved advanced BOTANY course); LANGUAGE (if exempt, a C or D Core); RHET (if exempt, a C or D Core).

Second Year: MATH 255 (I); ZOOL, BOTANY or MICBIO; CHEM 165, 166, 167, 168, or 261, 262, 263, 264; LANGUAGE or C or D Core; PHYSICS 141-142 (II). Third Year: CHEM 210 or 127; CHEM 281-282; BIOCHM 223-224-226 (advanced section) C or D Core; Electives (may include BIOCHM 385).

Fourth Year: Advanced BIOCHM or Advanced Life Science or Advanced CHEM; BIOCHM 388; BIOCHM 385-386 or 398-399; COINS 122 or 101; Elective (or Core requirements).

### 120 (II). INTRODUCTION TO BIOCHEMISTRY (E)

A brief introduction to biochemistry as a terminal course for students whose professional objectives do not necessitate more extensive training in Chemistry. Prerequisite, Chem 112 or 110. 3 class hours, 1 3-hour laboratory period. Credit, 4.

### 220 (I), (II). ELEMENTARY BIOCHEMISTRY (E)

The more important facts relating to the chemistry of biological materials and processes. Two lecture sections, predominantly the same: One with a more chemical background for prospective engineers, chemists and people more involved in the analytical approach to biochemistry; the second more biologically oriented. Prerequisite, CHEM 160 or 261.

### 221 (I), (II). ELEMENTARY BIOCHEMISTRY LABORATORY (E)

The laboratory for BIOCHM 220. Credit, 1.

### 223 (I), 224 (II). GENERAL BIOCHEMISTRY (E)

A broad introduction, primarily for majors. Some students in closely related sciences, i.e., chemistry, microbiology, etc. may register with permission of instructor. Prerequisite, CHEM 166 or 262. Required of all biochemistry majors.

### 225 (I), 226 (II). BIOCHEMISTRY LABORATORY

Introduction to laboratory work with biochemical materials and standard techniques. BIOCHM 226 primarily for biochemistry

majors. Prerequisite, CHEM 127 or equivalent. Credit, 1-2.

### 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. For biochemistry majors only. Credit, 1-6.

### 388 (I). SENIOR SEMINAR

Topics of current biochemical interest.

Credit, 1-3.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office.

Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Botany

Acting Head of Department: Edward L. Davis. Professors Bierhorst, H. Bigelow, Davis, Livingston, Lockhart, Schuster, Shapiro, Smith, Swanson, Tippo; Associate Professors M. Bigelow, Klekowski, Mulcahy, Stein, Stern, Wilce; Assistant Professors Barrett, Godfrey, Raudzens, Rubinstein, Thompson, Walker, Webster, Herbarium Curator Ahles.

Programs in Botany permit a broad liberal education and prepare students for teaching and/or research in high schools, colleges, universities, industry and experiment stations. Departmental requirements for majors preparing for graduate training in Botany (rather than for secondary school teaching) include the following:

CHEM: 261-262, or CHEM 160 and at least one of the following: BIOCHM 220, or BOTANY 212.

MATH: 127-128 (Calculus), or two of the following: MATH 112 (Finite Math), STATIS 231 (Intro. to Fund. of Stat.), or COINS 122 (Intro. to Problem Solving).

PHYSIC: 141-142 or 121-122.

ZOOL: 240 (BOTANY 240).

Foreign language: Knowledge of a foreign language is strongly recommended, and German, Russian, French or Spanish, in that order are preferred.

BOTANY: 100 or 101, plus 24 credits in Botany, including at least two courses from each of the following 3 areas:

1. Ecology-Evolution - 219, 221, 222, 226, 228 or the offerings in Coastal, Tundra or Community Ecology.

II. Physiology-Cytology-Genetics - 212, 215, 255, 261, 270 or 311.

III. Anatomy-Morphology-Systematics 231, 241, 251, 280, 281, 291, 303 or 304.

Students planning to teach in second schools with a concentration in Bot must take the following courses:

CHEM: 111-112, plus one other course Chemistry or Biochemistry.

MATH: 127-128, or two of the following: MATH 112 (Finite Math), STATIS (Intro. to Fund. of Stat.), or COINS (Intro. to Problem Solving).

PHYSIC: 141-142 or 121-122

ZOOL: 135 and 240 (BOTANY 240)

BOTANY: 100 or 101 plus 125, Plant Kingdom and 228, Prin. of Evolution, plus a minimum of 15 credits in Botany including at least one course from each of the following areas: Ecology-Evolution, II. Physiology-Cytology-Genetics, III. Anatomy-Morphology-Systematics. (Courses for areas III above.)

Additional requirements for certification must be completed in Psychology and Education. The requirements in Psychology are: Elementary, and either 263, Adolescent 301, Educational. These should be completed by the end of the sophomore year. The requirements in Education vary with the program. The pre-practicum course "Field Schools and the School of Education", should be taken in the freshman year if possible. Details about admission to the certification program and specific Education requirements may be obtained from your departmental adviser or from John M. Adams in CASB-Machmer Hall.

100 (I), (II). INTRODUCTORY BOTANY. Structure, function and reproduction of plants, dealing primarily with the flowering plants. Basic biological principles emphasized. Not to be taken serially with BOTANY 101. 3 class hours, 1 3-hour laboratory period. Credit, 1.

### 101 (I), (II). GENERAL BOTANY (E)

An introduction to basic biological principles of organization, development and evolution using botanical illustrations. The foundation and approach in biological research, and consequence of this research on human thought and experience. Not open to science majors without permission of major department. Not to be taken serially with BOTANY 100. 2 class hours, 1 demonstration-discussion hour.

121. PLANTS AND ENVIRONMENT (E) The interrelationships between plants and

environment, emphasizing the impact of man's influence and control on the economy of natural biological areas. Designed for non-science majors. 2 class hours, 1 3-hour laboratory period. Not open to science majors without permission of major department.

#### 1. THE PLANT KINGDOM (E)

General survey of the morphology, reproduction, distribution, and importance of the various molds, bacteria, algae, fungi, lichens, liverworts, mosses, ferns and seed plants. Prerequisite, BOTANY 100 or 101. 2 class hours, 1 2-hour laboratory period.

#### 2. (I), (II). NEW ENGLAND FLORA (E)

Identification of local flora (vascular) with emphasis on terminology of fruits, leaves, flowers, etc. Prerequisite, BOTANY 100 or 101. 2- and 3-hour laboratory periods with lecture combined. Several field trips.

#### 1. (I), (II). GENETICS AND EVOLUTION (E)

Survey of the cell and those fundamental genetic principles which are the basis of evolution. Origin and history of organic evolution. Mechanisms of evolution. Intended for non-science majors.

#### 2. (II). INTRODUCTORY PLANT PHYSIOLOGY

Differentiation, growth, nutrition, and the communication between plant and environment used to illustrate the means by which plants function. Prerequisites, BOTANY 100 or 101, and at least one semester of Organic Chemistry. 3 class hours, 1 3-hour laboratory period. Credit, 4.

#### 2. (I), (II). PLANT METABOLISM

The chemical operation of plants, emphasizing the enzymatic processes involved in the synthesis and breakdown of the more important chemical constituents of plants. Prerequisites, BOTANY 211, CHEM 160 or equivalent. 3 class hours, 1 3-hour laboratory period. Credit, 4.

#### 2. PLANT GROWTH

The physiology, kinetics and energetics of plant growth. The growth of plant cells, whole plants, assemblages of plants, and plant productivity. Prerequisites, BOTANY 211, one year of introductory chemistry, and one year of introductory physics. Courses in differential calculus, statistics, and/or biochemistry are recommended.

#### 2. ECOLOGICAL PLANT PHYSIOLOGY

Physiology of plants in relation to the classes of problems they face and the various strategies evolved for survival and growth. Prerequisite, BOTANY 211, one semester of differential calculus.

#### 221 (I). PLANT ECOLOGY

Interrelationships between plants and their environment, with emphasis on the structure and development of plant communities. Prerequisite, BOTANY 100 or BOTANY 101; BOTANY 126 and 211 recommended. 2 3-hour class-laboratory periods.

#### 222. AUTECOLOGY

Plant behavior in relation to the physical and biological environment, with emphasis on the ecology of individual plants. Prerequisites, BOTANY 211 and 221.

#### 224. COASTAL PLANT ECOLOGY

The botany and ecosystem processes along the U.S. East Coast. Emphasis on salt marshes, maritime forests and grasslands, dune strand, and the impact of modern man. Prerequisites, BOTANY 100, 221.

#### 226. PLANT GEOGRAPHY

Principles governing the development and natural distribution of plants and plant communities. Consideration of the vegetation of North America. Prerequisite, BOTANY 221; BOTANY 281 recommended.

#### 228. PRINCIPLES OF EVOLUTION

Ecological phenomena through the application of genetic concepts. The adaptation of individuals, populations, and communities as functional units. Prerequisite, Introductory Genetics or permission of instructor.

#### 231 (II). MYCOLOGY

Fungi, their life history and distribution, their significance in disease, their utilization by man. Prerequisite, BOTANY 125 or permission of instructor. 2 class hours, 1 3-hour laboratory period. Credit, 4.

#### 240 (I), (II). PRINCIPLES OF GENETICS

Mechanisms of heredity in plants and animals, emphasizing transmission and action of genes, population genetics, and evolution. Prerequisites, BOTANY 100 or ZOOL 101, CHEM 112 or 114. See ZOOL 240.

#### 241 (I). PHYCOLOGY

The phylogeny, taxonomy, morphology and ecology of the major group of the marine and fresh-water algae. Field work. 2 class hours, 2 2-hour laboratory periods.

#### 251 (II). THE ARCHEGONIATES

The morphology, evolution and systematics of bryophytes, ferns and their allies. 2 class hours, 1 3-hour laboratory period.

#### 255. EXPERIMENTAL PTERIDOLOGY

Physiological and genetical parameters of the pteridophyte life cycle, integrated to give an overall biological view. The research potential of these organisms will be stressed. Prerequisites, BOTANY 240 or ZOOL 240, and BOTANY 211.

#### 261 (I). BIOLOGY OF LOWER PLANTS

The use of fungi and algae as experimental organisms for investigations in physiology and genetics. Prerequisite, BOTANY 211, ZOOL 360, or CHEM 224. 2 class hours, 2 3-hour laboratories. Credit, 4.

#### 270 (II). CYTOGENETICS

Correlation of genetic data with the behavior of chromosomes, including an analysis of the mechanism of crossing over. Consideration of the evolution of chromosomal systems, including the following: genetic control of meiotic behavior, karyotype modifications, structural changes, sex-determining mechanisms, polyploidy, deviant meiotic behaviors, and primate systems. Prerequisites, BOTANY 311 and either BOTANY 240 or ZOOL 240.

#### 271 (I). THE NATURAL HISTORY OF MAN (E)

Man's changing view of himself and the universe as new scientific discoveries are made; deals with the questions: Who is man? What is his nature and origin? Where is he going? What is his future?

#### 280. ORIGIN, EVOLUTION, AND DISTRIBUTION OF FLOWERING PLANTS

Survey of evolutionary history of primitive flowering plants and the significance of their geographic distribution. Prerequisite, BOTANY 125 or equivalent. Recommended, BOTANY 281, 291. 3 class hours, 1 2-hour seminar/discussion. Credit, 4.

#### 281 (II). INTRODUCTORY ANGIOSPERM SYSTEMATICS

The evolution and systematics of flowering plants emphasizing families and their relationships. Prerequisite, BOTANY 100 or 101. 3 class hours, 1 3-hour laboratory period. Credit, 4.

#### 291. PLANT ANATOMY

Introduction to plant histology, organography and development; emphasis on flowering plants. Presented at a level for students majoring in theoretical and applied plant sciences. Prerequisite, BOTANY 100 or equivalent. 2 class hours, 3 2-hour laboratory periods. Credit, 4.

#### 301 (I). MORPHOGENESIS

The development of plant form and structure at the level of cells and organs. Illustrations drawn from controlled experiments on the contribution of internal and external factors. 3 class hours, 1 2-hour laboratory-discussion period. Credit, 4.

#### 303, 304. PLANT MORPHOLOGY

The life cycles of various plant taxa, the dynamics of their evolution and the interpretation of various morphological structures. Prerequisite, BOTANY 100 or permission of

instructor. 2 class hours, 2 2-hour laboratory periods. Credit, 4.

### 311 (I). CYTOLOGY

Introduction to microscopy; nuclear duplication and division; nuclear function cell development; structure, function and development of cellular membrane systems, with special reference to chloroplasts and mitochondria, 2 class hours, 1 2-hour laboratory period.

### 335 (I). AQUATIC VASCULAR PLANTS

Systematics, ecology and fundamental importance of aquatic plants. Designed for majors in Wildlife. Prerequisites, BOTANY 100, 126. 2 3-hour class-laboratory periods. Credit, 1-3.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Chemistry

Head of Department: Professor William E. McEwen. Professors Archer, Brandts, Cade, Cannon, Carpino, Chien, Holmes, Lillya, MacKnight, Miller, Ragle, Rausch, Richason (Associate Head), Roberts, Siggia, Smith, Stein, Stengle, Wood; Associate Professors R. Barnes, Chandler, Curran, George, Hixson, McWhorter, Rowell, Stidham, Uden, Zajicek; Assistant Professors Oberlander, Rhodes, Williams, Wynne; Instructors Bernasconi, Reed, Turner; Lecturer D. Barnes.

Information on the chemistry curriculum is provided in the College of Arts and Sciences section where departmental programs are described, or may be obtained from Professor George Richason, the departmental Chief Advisor.

### 101 (I), 102 (II). GENERAL CHEMISTRY FOR NON-SCIENCE MAJORS (E)

Fundamental chemical laws and theories. Discussion of such topics as "Our Environment", "Energy Sources", "The Chemistry of Life", etc. CHEM 102 is a continuation of CHEM 101, but is not required for credit in 101. The sequence does not satisfy the prerequisites for advanced chemistry courses. 2 class hours, 2 quiz-demonstration hours.

### 110 (II). GENERAL CHEMISTRY (E)

The fundamental chemical laws and theories. Meets minimum prerequisite requirements of

CHEM 160 but not CHEM 127. 2 class hours, 2 quiz hours, 1 2-hour laboratory period.

Credit, 4.

### 111, 112. GENERAL CHEMISTRY (E)

The fundamental chemical laws and theories. Provides a sound scientific training for engineers and other students planning to take advanced courses in chemistry. 2 class hours, 1 quiz hour, 1 2-hour laboratory period.

Credit, 4.

### 113 (I), 114 (II). CHEMICAL PRINCIPLES (E)

The fundamental chemical laws and theories, including the elements of qualitative analysis. For students planning to major in chemistry and as a departmental requirement. Prerequisite, secondary school chemistry. 2 class hours, 2 discussion hours, 1 3-hour laboratory period. Credit, 4.

### 127 (I), (II). ANALYTICAL CHEMISTRY (E)

The principles of analytical chemistry, for students not majoring in chemistry. Basic laboratory techniques and operations of quantitative analysis. Prerequisite, CHEM 112 or 114. 2 lectures, 2 3-hour laboratory periods. Credit, 4.

### 160 (I). ORGANIC CHEMISTRY (E)

For students whose major department does not require a year course in organic chemistry. Concurrent enrollment in CHEM 162 required. Prerequisite, CHEM 110 or 112.

### 162 (I). ORGANIC CHEMISTRY LAB

A laboratory survey of the chemistry of the major functional groups. Concurrent enrollment in CHEM 160 required. 1 3-hour laboratory period. Credit, 1.

### 165 (I), 166 (II). ORGANIC CHEMISTRY FOR MAJORS (E)

A survey of modern organic chemistry. Explores the chemistry of carbon compounds. Emphasis on relationships between molecular structure, chemical properties, and reaction mechanisms. Concurrent enrollment in CHEM 167 or 168 required. Prerequisite, CHEM 112 or 114.

### 167 (I), 168 (II). ORGANIC LAB FOR MAJORS

Application of the experimental techniques of organic chemistry to the preparation, purification and identification of organic compounds. Concurrent enrollment in CHEM 165 or 166 required. 1 3-hour laboratory period. Credit, 1.

### 210 (I). QUANTITATIVE CHEMICAL ANALYSIS

The principles and practices of titrimetric and gravimetric analysis; separation methods; introduction to physical methods. Primarily for chemistry majors and others needing more detailed treatment than given in CHEM 127.

Prerequisite, CHEM 114 and 166. 2 lectures, 2 4-hour laboratory periods. Credit, 4.

### 213 (I). INSTRUMENTAL ANALYSIS

The theory and practice of modern analyses utilizing optical, electrical, and thermal properties. Selected modern separation methods may also be included. Prerequisites, CHEM 210, 286. 2 class hours, 1 4-hour laboratory period.

### 215 (II). THEORY OF ANALYTICAL PROCESSES

A detailed consideration of analytical topics, such as chemical equilibrium, precipitate formation, chelating agents, multistage separation, etc., having general applicability in chemical investigations. Prerequisites, CHEM 166 and 286. (Laboratory optional, 1 extra credit.)

### 216 (I), (II). CHEMICAL MICROSCOPY

Optics of the microscope, micrometry, microscopic study of fibers, crystals, physicochemical phenomena, qualitative analysis and an introduction to electron microscopy. Prerequisite, CHEM 213 or permission of instructor. 2 3-hour laboratory periods. Credit, 2.

### 217 (I), (II). MICROQUANTITATIVE ANALYSIS

Quantitative determination of carbon, hydrogen, oxygen, nitrogen, sulfur, halogens and phosphorus. Both organic and inorganic compounds will be included in microgram scale analyses. Prerequisite, CHEM 213 or permission of instructor. 1 4-hour laboratory period. Credit, 1.

### 219 (I). ELECTRONICS INSTRUMENTATION FOR SCIENTISTS

Laboratory oriented course designed for scientists which begins with electronic principles and leads through servo-systems, operational amplifiers, digital circuits, and other measurement devices. Prerequisite, one year of physics and permission of instructor. 1 class hour, 1 4-hour laboratory period.

### 241 (II). INTRODUCTORY DESCRIPTIVE INORGANIC CHEMISTRY

Chemical periodicity, reaction behavior and structural interrelationships are stressed within the framework of a systematic treatment of the chemistries of the representative and transition elements. Prerequisite, CHEM 114 or 112; concurrent enrollment in CHEM 168 recommended.

### 242. INORGANIC CHEMISTRY LABORATORY

Synthesis and characterization of a diverse selection of inorganic compounds of both the representative and transition elements. Emphasis is placed on the use of a wide range

of preparative and other experimental techniques. Prerequisite, CHEM 168 or 264.

Credit, 2.

#### 244 (II). RADIOCHEMISTRY

The character of atomic nuclei, nuclear reactions, radiation and its detection, and techniques for the study and utilization of radio-nuclides. Prerequisite, CHEM 112, or permission of instructor. 3 class hours, 1 3-hour laboratory period.

Credit, 4.

#### 246 (I), (II). THEORETICAL INORGANIC CHEMISTRY

A survey of theoretical aspects of inorganic chemistry. Topics include electronic structure and its relation to periodic properties, chemical bonding, molecular structure, coordination chemistry, acid-base theory, non-aqueous systems, and reaction mechanisms. Prerequisite, CHEM 285.

#### 261, 262. ORGANIC CHEMISTRY FOR NON-MAJORS (E)

A two-semester sequence. The chemistry of carbon compounds, with emphasis on the relationship between molecular structure and chemical properties. A background for understanding organic systems encountered in other fields. Concurrent enrollment in CHEM 263 or 264 required. Prerequisite, CHEM 112 or 114.

#### 263, 264. ORGANIC LAB FOR NON-MAJORS

Application of the experimental techniques of organic chemistry to the preparation, purification, and analysis of organic compounds. Concurrent enrollment in CHEM 261 or 262 required. 1 3-hour laboratory period.

Credit, 1.

#### 269 (II). ADVANCED ORGANIC CHEMISTRY LABORATORY

Continuation of CHEM 168. Preparations involving special techniques and use of the literature of organic chemistry. Prerequisite, CHEM 166, 168. 2 3-hour laboratory periods.

Credit, 2.

#### 271 (II). ADVANCED ORGANIC CHEMISTRY

An intensive survey of aliphatic and aromatic chemistry with emphasis on scope and limitations of reactions; mechanisms and recent developments. Prerequisite, one year of organic chemistry.

#### 272 (I). QUALITATIVE ORGANIC CHEMISTRY

Identification of unknowns, both single and mixtures of organic compounds, by physical and spectroscopic properties, reactions and preparation of derivatives. Prerequisite, one year of organic chemistry. 2 class hours, 2 3-hour laboratory periods.

Credit, 4.

#### 281 (I). ELEMENTARY PHYSICAL CHEMISTRY

For students with a limited mathematical background. Not open to B.S. chemistry majors. Prerequisites, CHEM 112 or 114; PHYSIC 142; MATH 132.

#### 282 (II). ELEMENTARY PHYSICAL CHEMISTRY

A continuation of CHEM 281. 2 class hours, 1 3-hour laboratory period.

#### 285 (I), 286 (II). PHYSICAL CHEMISTRY

The fundamental theories and laws of physical chemistry. Prerequisites, MATH 165; PHYSIC 163. Corequisites, CHEM 210 or 127.

#### 287 (I), (II), 288 (I), (II). PHYSICAL CHEMISTRY LABORATORY

Experience in modern physicochemical techniques. Prerequisites, CHEM 210; MATH 165; PHYSIC 163; or permission of instructor. Concurrent enrollment in CHEM 285, 286. 1 4-hour laboratory period.

Credit, 2.

#### 289. CHEMISTRY OF MACROMOLECULES

Introduction to the chemistry of biological and synthetic macromolecules. Emphasis on their synthesis, structure determinations, chain conformation and other properties in solution, morphology, mechanical and rheological properties in bulk. Prerequisite, one year each of organic chemistry and physical chemistry.

#### 294 (I), (II). ADVANCED PHYSICAL CHEMISTRY

Modular studies of topics of modern physical chemical interest, such as introductions to advanced thermodynamics, reaction kinetics, polymer chemistry and chain dynamics, molecular spectroscopy, structural methods, molecular orbital theory, statistical thermodynamics, scattering processes, or pulse techniques. Normally three modules are considered in one semester. Prerequisite, CHEM 286.

#### 295 (I), (II). ADVANCED PHYSICAL CHEMISTRY

Topics such as chemical thermodynamics, statistical mechanics, introductory quantum chemistry and theories of gases, liquids and solids. Prerequisite, CHEM 286.

#### 298 (II). SOPHOMORE SEMINAR

A series of seminars and a laboratory tour. Different views of chemistry through presentations by chemistry staff.

Credit, 1

#### 381 (I). CHEMICAL LITERATURE

Intended to give facility in the location of information of a chemical nature. Prerequisites, CHEM 166, 286, and a reading knowledge of German, or permission of instructor. 1 class hour.

Credit, 1

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department.

Credit, 1-6.

#### 388 (II). INTRODUCTION TO RESEARCH

Admission by permission of department. Each student assigned some special subject or problem in one of the several fields of chemistry. By arrangement. 10 laboratory hours.

Credit, 5.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office.

Credit, 4.

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.

Credit, 1-5.

#### RELATED COURSES:

##### Biochemistry

120 (II). Introduction to Biochemistry

220 (I). Elementary Biochemistry

223 (I), 224 (II). General Biochemistry

225 (I), 226 (II). Biochemistry Laboratory

#### Computer and Information Science

Chairman of Department: Professor Robert M. Graham. Professors Arbib (Director, Center for Systems Neuroscience), Foster, Kilmer, Spinelli, Wogrin (Director, University Computing Center); Associate Professors Ledgard, Riseman; Assistant Professors Clarke, Fishman, Moll, Tenney; Adjunct Professor Stone; Adjunct Associate Professor Eckhouse. Associated Faculty: Anderson (Education), Archer (Civil Engineering), Bobrow, Ehrich, Glorioso (Electrical and Computer Systems Engineering), Lenherr (Center for Systems Neuroscience), Mallary (Art), Manes (Mathematics), Peelle (Education), Sahin (Management), Stockton (Civil Engineering), Trchub (VA Hospital).

The Department of Computer and Information Science offers a wide range of undergraduate courses in the areas of Computer Systems, Theory of Computation, and Cybernetics.

While no formal undergraduate major exists in Computer and Information Science, one is currently being planned. Meanwhile, it is possible for students to seek a bachelor's degree with individual concentration (BDIC), the program being worked out individually with the COINS Director of Undergraduate Studies.

#### 101 (I). ELEMENTS OF COMPUTERS: ART AND SCIENCE (E)

An introduction to the historical and conceptual foundations of the computer as an intelligence amplifier. Topics include the early history of calculators, models of thought,

number systems, modern computing devices, and computer languages.

**102 (II). COMPUTERS AND SOCIETY (E)**  
The use of computers to solve social problems. Topics like data banks, security, computerized voting, automated health care, computer-aided instruction. The long-range impact of computers.

**122 (I), (II). INTRODUCTION TO PROBLEM SOLVING USING THE COMPUTER (E)**  
Problem solving and FORTRAN programming for students from all disciplines. Concepts associated with problem solving valid for many types of problems. Use of FORTRAN on the KRONOS time-sharing system. Laboratory included. Credit, 4.

**201 (I), (II). ASSEMBLY LANGUAGE PROGRAMMING**  
An introduction to assembly languages, through the teaching of MIXAL via time-sharing terminals and the batch operating system of the CYBER 74. Examples and exercises drawn from the field of information structures. Credit, 4.

**202 (I), (II). COMPARATIVE CONCEPTS IN PROGRAMMING LANGUAGES (E)**  
Fundamental concepts in programming languages. Topics include: data structures, scope of names, parameter passing, recursion, block-structure, string and list manipulation languages (like SNOBOL or LISP) and business oriented languages (like COBOL or RPG). Projects embrace concepts discussed. Prerequisite, COINS 122. Laboratory included. Credit, 4.

**210 (I). TRANSLATOR DESIGN**  
A project-oriented course covering techniques of language definition and translation. Particular reference to symbolic assemblers and algebraic compilers. Prerequisite, COINS 201 and 202.

**232 (II). ALGORITHMIC METHODS FOR SCIENTISTS AND ENGINEERS**  
Development of algorithmic techniques for solving large-scale scientific and engineering problems. Emphasis on applications, efficiency and special students interests. Use of APL as a major programming language. Prerequisite, COINS 122 or programming experience. Laboratory included.

**233 (I). MINICOMPUTERS FOR BIOLOGISTS AND PSYCHOLOGISTS**  
The use of small-scale digital computers for data gathering, analysis, and on-line control of experiments. Interfacing computers and logical design of input/output facilities. Especially useful for biologists and psychologists. Prerequisite, programming experience.

**252 (I). TOPICS IN NUMERICAL METHODS (E)**  
Computer-oriented numerical analysis, including linear algebra, solution of simultaneous equations, homogeneous equations, eigenvalues, solution of differential equations, solution of algebraic and transcendental equations, and functional representations. Prerequisite, COINS 122 or programming experience.

**291 (I). COMPUTATIONAL POPULATION DYNAMICS (E)**  
Vectors, matrices and eigenvector problems; deterministic and random ecosystem population models; solutions of nonlinear differential equation systems arising in population biology; analytical formulations of ecosystem stability problems, species-packing models, epidemiological problems, and the evolution of altruism. Computer simulation projects encouraged. Prerequisite, calculus; a computer programming course desirable.

**301 (I), (II). FUNDAMENTALS OF COMPUTATION (E)**  
Integrates application and theory by presenting the mathematical underpinnings of algorithms, languages, and machines; recursion and induction; models for machines, state diagrams, switching theory, and regular sets; trees; formal grammars; syntax and semantics; basic notions of automata, push-down automata, and Turing machines; proving properties of programs. Prerequisite MATH 167 and elementary computer mathematics.

**302 (I), (II). FUNDAMENTALS OF COMPUTING SYSTEMS**  
Core concepts of computer software, including assemblers and compilers, macros, loaders, operating systems, process control, memory management, input/output and protection. Prerequisite, COINS 201 and 202; COINS 335 recommended. Lab required.

**303 (I), (II). FUNDAMENTALS OF CYBERNETICS (E)**  
Integrates brain analysis and artificial intelligence to convey a basic understanding of systems and neural networks, modelling, feedback; scene analysis and pattern recognition in brains and machines; parameter adjustment and adaptation; heuristic search; and planning of complex behavior in the brains of animals and the control computers of robots. Prerequisite, COINS 122 and some theory of computation; or background in biology or psychology.

**320 (II). DEVELOPMENT OF QUALITY SOFTWARE**  
Recent developments in the study of programming as a systematic, creative activity. Notion of quality software; measurement of quality; top-down and other approaches to programming; structured programs; proofs of correctness; software engineering; psychology of programming. Prerequisites, COINS 201 and 202.

**335 (I). COMPUTER ARCHITECTURE**  
The various elements of computer design. The historical influence of certain real computers and the concepts behind them. Prerequisite COINS 201.

**350 (I). COMPUTATIONAL MODELLING**  
An introduction to probabilistic techniques such as Markov process, random walk and Monte Carlo techniques. Statistical techniques, distributions, and correlation coefficients. Brief introduction to simulation languages. Simple queues, n-person zero sum games. Selected topics generated by class interest. Prerequisite, COINS 202.

**377 (II). INTRODUCTION TO OPERATING SYSTEMS**  
The programs and techniques needed to transform computer hardware into a comprehensive computer. Topics include input/output control systems, mono-programming, multi-programming, and multi-processing. Prerequisite, COINS 302.

**383 (II). ARTIFICIAL INTELLIGENCE**  
Game-playing by machines; mathematical problem solving by machine, including geometry, algebra and calculus; mathematical theory of heuristic search; automatic theorem-proving; question answering systems; natural language processing; an introduction to robotics, vision, and planning. Prerequisite, COINS 303.

**385 (I), 386 (II). SPECIAL PROBLEMS**  
Topics by arrangement each semester. Credit, 1-6.

**387 (II). DATA AND INFORMATION STRUCTURES**  
Mathematical and practical concepts relevant to description and manipulation of data and information structures such as lists, trees, and graphs; and the relationship of these ideas to the constraints imposed by physical storage devices. Prerequisite, COINS 301 and 302. (Also listed as ECE 342.)

## Mathematics

251 Numerical Analysis I

252 Numerical Analysis II

271 Set Theory

381 Introduction to Mathematical Logic and Model Theory

## Geology and Geography

Head of Department: Professor Joseph H. Hartshorn. Professors Bromery, Farquhar, Hubert, Jaffe, McGill, Morse, Webb, Wise; Associate Professors Haggerty, Hall, Motts, Pitrat, Robinson; Assistant Professors L. Isaacson, P. Isaacson, Nelson, Niedoroda, Perry; Instructor Rice.

Geography Faculty: In charge of program Associate Professor Terence Burke. Associate Professors Hafner, Wilkie; Assistant Professors Bradley, D. Meyer, J. Meyer, Platt.

## GEOLOGY

### 100 (II). MODERN GEOLOGIC CONCEPTS (E)

Geology as both physical science and history; review of current ideas concerning origin and modification of the earth's materials and landforms; use of current processes as clues to earth history. 2 class hours, 1 2-hour laboratory period, 1 1-hour quiz-discussion, and field trips.

### 101 (I), (II). PHYSICAL GEOLOGY (E)

The nature and origin of the landscape features of the earth and their underlying rocks and structures, including the work of rivers, waves and currents, wind, and glaciers; the role of earthquakes, volcanoes, and the processes of mountain building. 2 class hours, 1 3-hour laboratory period, and field trips.

### 105 (I). GEOLOGY AND MAN (E)

Evidence for selected mineral-forming processes; minerals in industry; developments in mineral research and technology; geologic considerations to such engineering works as mines, foundations, tunnels, waterways, and airfields.

### 106 (II). THE FACE OF THE EARTH (E)

Survey of selected physical processes that shape the world we live in, as shown in a study of the landforms of the United States. Includes, but not limited to, streams and rivers, the wind, coastal erosion, ground water, volcanism, earthquakes, and glaciers. Attention to landforms in New England, to arid regions, and to our National Parks and Monuments.

### 107 (II). HISTORY OF LIFE (E)

The adaptations of selected lineages of animals to the changing environments of the geologic past. Emphasis on those groups which best illustrate evolutionary principles or

unsolved problems. Not open to those who have taken GEOL 240. 2 class hours, 1 2-hour laboratory period.

120 (II). ENVIRONMENTAL GEOLOGY (E) Principles of geology applied to regional planning in areas of conservation, land use, water resources, and water pollution; preservation of open spaces, wilderness areas, state and national park systems. Introductory geology or physical geography recommended.

### 121 (I). LUNAR AND PLANETARY GEOLOGY (E)

Application of basic geologic principles to study of terrestrial planets; processes acting on the moon and terrestrial planets; geologic history of the moon. 2 class hours, 1 2-hour laboratory-discussion period. Prerequisite, 1 semester of geology or permission of instructor.

### 160 (I), (II). INTRODUCTORY FIELD GEOLOGY

Interpretation and use of topographic maps and sections in laboratory and field; use of basic field equipment and techniques. 1 class hour, 1 5-hour laboratory period. Prerequisite, an introductory geology course. Credit, 2.

### 191 (I), (II). AN INTRODUCTION TO ROCKS AND MINERALS (E)

General survey of rock-forming minerals, the rock classes, common ore minerals, gem minerals, and semi-precious stones. Not for geology majors, but designed for foresters, landscape architects, archeologists, botanists, wildlife and natural resources students, and those interested in natural history. 2 class hours, 1 2-hour laboratory period.

### 219 (I), (II). MINERALOGY (E)

Chemical composition, physical properties, crystallography, and genesis of common minerals. Laboratory technique for recognition of minerals. Prerequisites, an introductory geology course; CHEM 111 and 112 (may be taken concurrently). 2 class hours, 2 2-hour laboratory periods, and field trips. Credit, 4.

### 220 (I), (II). INTRODUCTORY PETROLOGY

Rocks, with emphasis on constituent minerals, textural and structural features, classification, mode of occurrence, and origin. Laboratory includes introduction to petrographic methods. A sequel to GEOL 219, as the second half of a one-year study of minerals and rocks. Prerequisite, GEOL 219. 2 class hours, 2 2-hour laboratory periods, and field trips by arrangement. Credit, 4.

### 230 (I). FIELD AND STRUCTURAL GEOLOGY I

Basic methods of field geology; occurrences and recognition of geologic structure; preparation and interpretation of geologic maps; solu-

tion of simple structural problems. Prerequisites, MATH 123; either GEOL 100, 101, or 130; or alternatively GEOL 105, 106, 107, or 108 and 160. 2 class hours, 1 5-hour laboratory period, week end and holiday field trips. Credit, 4.

### 231 (II). FIELD AND STRUCTURAL GEOLOGY II

Structural and dynamic analysis of deformed rocks; introduction to tectonics; field study of complex areas. Prerequisites, GEOL 220, 230. 1 class hour, 1 5-hour laboratory period, week end and holiday field trips.

### 240 (I). INVERTEBRATE PALEONTOLOGY

The history, development, and identification of invertebrate animal fossils. Field trips by arrangement. Prerequisites, either GEOL 100, 101, or 130; or alternatively GEOL 105, 106, or 108 and 160. 3 class hours, 1 2-hour laboratory period. Credit, 4.

### 250 (I). SEDIMENTOLOGY

Analysis and origin of primary sedimentary structures; composition and classification of sedimentary rocks; and criteria for identification of depositional environments in the rock record. Prerequisite, GEOL 220. 2 class hours, 1 2-hour laboratory period, and field trips.

### 251 (II). STRATIGRAPHY AND HISTORICAL GEOLOGY

Principles of stratigraphic correlation; methods of reconstruction of earth history; tectonic evolution of selected regions. Prerequisites, GEOL 220, 230, 240, 250, or permission of instructor. 2 class hours, 1 3-hour laboratory period.

### 280 (II). ENGINEERING GEOLOGY

Not open to geology majors. Materials and surface features of the earth with emphasis on engineering problems; map reading as related to the phenomena of physical geology. 2 class hours, 1 3-hour laboratory period or field trip.

### 311 (I). OPTICAL MINERALOGY

Principles of optics; optical properties of minerals and methods for their measurement; relationship between optical properties and crystallography; microscopic techniques for mineral identification; crystal chemistry of rock-forming minerals. Prerequisites, GEOL 220, PHYSIC 141 and 142. 3 class hours, 1 3-hour laboratory period.

### 317 (I). AQUEOUS GEOCHEMISTRY (E)

Chemical processes affecting the distribution and circulation of chemical compounds in natural waters, and the formation of an adequate theoretical basis for chemical behavior of ocean water, estuaries, lakes, and ground-water and soil-water systems. 3 1-hour laboratory sections. Prerequisites: CHEM 111, 112; introductory geology recommended but not absolutely necessary.

318 (II). **SEDIMENTARY GEOCHEMISTRY**  
The evolution of sedimentary rocks, the geochemical cycles of the major elements in the earth's crust, and the applications of isotope geochemistry. Prerequisite: CHEM 111, 112, or permission of instructor.

321 (II). **PETROGRAPHY**  
Identification of minerals in thin section; common igneous, sedimentary, and metamorphic rocks in thin section; petrographic calculations and measurements; introduction to petrogenetic theory. Field examination of selected igneous and metamorphic rocks. Prerequisites, GEOL 220 and GEOL 311. 3 class hours, 1 3-hour laboratory period, and field trips.

330 (II). **TECTONICS**  
Past and present mechanisms creating the broader framework of global geology, mountain-building, ocean-basin structure, continental drift, mantle processes, continental evolution, early history of the earth, structural geology of selected key regions of the globe. Prerequisites, GEOL 231, 220. 2 2-hour class meetings. Given in alternate years with GEOL 334.

332 (I). **ADVANCED GEOLOGIC MAPPING**  
The complete series of operations required for the publication of a geologic map, including field location and accurate drawing of contacts, collection and interpretation of field notes, automated reduction of geologic data, preliminary and final drafting, and methods of reproduction. Field studies in areas of well defined stratigraphic units near Amherst. Prerequisites, GEOL 220 and 231 or equivalent training. Seniors can incorporate mapping done in this course into an Honors Thesis to be completed 2nd semester. 1 class hour, 1 8-hour laboratory period.

334 (I). **ASTROGEOLOGY**  
Geology of the solar system with emphasis on the solid bodies: age, sequence of events, composition, surficial and internal geologic processes. Photogeologic mapping of selected portions of Moon and Mars using recent imagery from the space program. Prerequisites, GEOL 231, 220. 2 2-hour class meetings. Given in alternate years with GEOL 330.

345. **PALEOECOLOGY (E)**  
A general survey of relations between fossil organisms and their environments. Emphasis on functional morphology, community structure, and paleobiogeography.

351 (I). **GEOMETRICS**  
Design of geological experiments; the collection and analysis of quantitative data in geology. Prerequisite, upper class standing in geology.

355 (I). **DESCRIPTIVE PHYSICAL OCEANOGRAPHY**  
Physical properties of sea water and their variations; water masses and their circulation patterns; interaction between ocean and atmosphere; dynamics of waves, tides, and ocean currents; techniques of oceanographic study. Prerequisites, PHYSIC 141 or 161, upper class standing or permission of instructor. MARSCE 225 and calculus recommended. 3 class hours and field trips.

360 (I). **GEOMORPHOLOGY**  
Origin and development of landforms in relation to geological processes, climate, and tectonic history. Application of geomorphic methods to interpretation of geologic history. 2 class hours, 1 3-hour laboratory period. Prerequisite, GEOL 230 or permission of instructor.

366 (II). **GLACIAL GEOLOGY**  
Sedimentary deposits related to glaciers; erosional and depositional processes and the recognition of erosional and constructional landforms; the origin of glaciers and forms of glaciers; Pleistocene history and stratigraphy. Peripheral subjects include shifting sea level, radiocarbon dating, palynology, the paleontological record, and Early Man. Prerequisite, either GEOL 100, 101, 130, or permission of instructor. 2 class hours, 1 3-hour laboratory period. Field trips by arrangement.

368 (II). **PHOTO GEOLOGY AND REMOTE SENSING**  
Techniques for making measurements and preparing base maps and geologic maps from vertical and oblique aerial photos; interpretation of cultural, geologic, and geomorphic features; introduction to remote sensing methods, including multispectral aerial photography, infrared imagery, and radar. Prerequisite, GEOL 231; GEOL 360 recommended. 6 laboratory and lecture hours to be arranged.

370 (I). **GEOPHYSICS**  
The physics of the earth and the gravitational, magnetic, electrical, and seismic methods of geophysical exploration. Laboratory problems and computations. Prerequisites, PHYSIC 141, 142; GEOL 230 and 220 or permission of instructor. 3 class hours and laboratory work by arrangement.

385 (I), 386 (II). **SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

387. **INTRODUCTORY ENVIRONMENTAL PROBLEMS**  
Opportunity for undergraduate research participation in environmental studies. May be repeated.. Credit, 2.

389 (I), (II). **FIELD PROBLEMS**  
Directed field study and/or research. With

permission of the department may be used to satisfy B.S. field experience requirement. Prerequisites, GEOL 220 and 230. Credit, 2-6.

391 (I), 392 (II). **SEMINAR**  
Participation in department's professional seminar. Prerequisite, GEOL 220, 230, or permission of department.  
Credit, 1 each semester (limited to 2 credits toward graduation).

398. **SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. **SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## GEOGRAPHY

145 (I), (II). **PHYSICAL ENVIRONMENT (E)**  
An introduction to physical aspects of geography by examining the interrelationships among climate, vegetation, soils, and landforms. 2 class hours, 1 2-hour laboratory period.

155 (I), (II). **INTRODUCTION TO HUMAN GEOGRAPHY (D)**  
The spatial attributes of human societies; population, cultural characteristics, settlement, and economic activity. Selected regional case studies. 2 class hours, 1 2-hour laboratory period, and field trips.

156 (I), (II). **HUMAN GEOGRAPHY (D)**  
Honors student section with an individual lab meeting time, but joint lectures with GEOG 155.

200 (II). **GEOGRAPHY OF ANGLO-AMERICA (D)**  
The contemporary physical and cultural geography of the United States and Canada approached by region and topic.

220 (I). **GEOGRAPHY OF LATIN AMERICA (D)**  
A survey of the spatial organization of cultural and physical regions of Latin America. Emphasis on the dynamic change processes affecting man's horizontal linkages and use of the environment.

225 (II). **ENVIRONMENTAL PERCEPTION AND SPATIAL BEHAVIOR**  
Exploration of the ways different cultural subgroups perceive and organize their space and environment. Emphasis on both individual and group acts that lead to evolution of the cultural landscape.

231 (I). **GEOGRAPHY OF EAST ASIA (D)**  
An introductory examination of the geograph-

ical components of East Asia, China, Japan, and Korea with emphasis on physical, human, and economic resources and their continuity. Prerequisite, GEOG 135 or 155 or permission of instructor.

## 232 (II). GEOGRAPHY OF SOUTHEAST ASIA (D)

An introductory survey of the cultural, economic, and human geographic components of Southeast Asia that contribute to regional uniformity and diversity. Emphasis on contemporary problems of regional development and integration. Prerequisite, GEOG 135 or 155 or permission of instructor.

## 240 (I). QUANTITATIVE METHODS IN GEOGRAPHY

Applications of statistical techniques to geographic problems: probability functions useful in geographic analysis, methods of spatial sampling, point pattern analysis, and spatial relations and areal association.

## 250 (I), (II). CARTOGRAPHY

A systematic introduction to the presentation of physical and human variables cartographically. Emphasis on drafting techniques, map making, and problems of compilation, analysis, and graphic presentation of data. 2 2-hour lecture and laboratory periods.

## 255 (I). CLIMATIC ENVIRONMENT (E)

The general circulation of the atmosphere and the effect of climate on man. Topics include urban climatology, modification of weather and climate, and climatic change.

## 258. CLIMATIC CHANGE (E)

Changes in climate on a local, regional, and global scale both in the past and recently. Man's role in modifying the atmosphere.

## 260 (I). ECONOMIC GEOGRAPHY (D)

The distribution, production and utilization of the natural resources and commodities on which man's livelihood depends and the problems which they pose.

## 263 (II). LAND USE CONTROL

Legal and geographic concepts relating to planning and management of land use in United States, including an analysis of historical and philosophical roots of public policy and federal and state programs. Case studies used.

## 266 (I). ENVIRONMENT, SPACE, AND RURAL SOCIETIES

The form and content of the rural landscape within the framework of spatial organization and location. Emphasis on settlement and land use patterns, forms of rural economy, and environmental factors. Geographic models of spatial analysis and location used to consider these areas cross-culturally in developed and developing societies. Prerequisites: GEOG 135, 155.

## 270 (I). URBAN SPATIAL ORGANIZATION (D)

Discussion of concepts of systems of cities, including evolution of the urban pattern, city types, settlements as manufacturing and service centers, and concepts of the internal structure of urban areas, including land use systems, location of residences, location of commercial and manufacturing areas, intraurban movements.

## 271 (II). SEMINAR IN URBAN GEOGRAPHY

A selected topic in urban geography. For example, cross-cultural spatial structure of cities, Afro-American urban spatial organization, or urban regional development. Prerequisite, GEOG 270 or permission of instructor.

## 280 (II). POLITICAL GEOGRAPHY (D)

The spatial interaction between political regions and geographic space considered in its physical and cultural components. Emphasis on the nation-state and on problems between nation-states. Prerequisite, GEOG 135 or 155 or POLSCI 160-161 or permission of instructor.

## 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

## 391 (I), 392 (II). SEMINAR

Some restricted problem or region within geography. Prerequisites, two upper-division courses in geography or permission of geography staff.

## 396 (I), (II). DEPARTMENT SEMINAR

Seminar for majors, stressing current issues and developments in geography. Activities include faculty presentation of research, talks by visiting geographers in academic and non-academic employment, student presentation of research, and field trips. Credit, 1.

## 397 (I). SENIOR SEMINAR

Seminar for senior year majors, focusing on application of geographic concepts, methods, and skills to problems. Themes vary depending on faculty and student interest.

## 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

## 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.

## Mathematics and Statistics

*Acting Head of Department:* Professor Jin-Chen Su. Professors Chen, Cohen Cullen, Fischer, Foulis, Hayes, Holland, Jacob, Janow-

itz, Kundert, Liu, Mann, Martindale, Oakland, Randall, Schweizer, Skibinsky, Stone, Strother, Su, Van Ryzin, Wagner, Wang, Whaples; Associate Professors Allen, Bennett, Borrego, Catlin, Connors, Cook, Dickinson, Eisenberg, Fogarty, Horowitz, Humphreys, Knightly, H-T Ku, Lavalley, Manes, Reed, Rosenkrantz, Rudvalis, St. Mary, Sicks, Stockton, Wattenberg; Assistant Professors Bussell, Cattani, Chang, Clark, Dahiya, Ellis, Fazal, Gauger, Geman, Gleit, Hoffman, Hurt, Kaplan, Killam, Korwar, M-C Ku, Norman, Shaw, Williams, Zinn; Lecturer Norkin (Administrative Head).

## MATHEMATICS

The requirements for a major in mathematics are the successful completion of: 1) MATH 165 (or 166) and 167; 2) a two-semester sequence in each of two of the groups Algebra, Analysis, Applied Mathematics, and Geometry and Topology listed below; 3) one course in a third of these four groups; 4) three additional 3-credit, upper division (numbered above 199, including MATH 187 but not including MATH 255) courses in mathematics or certain related fields (a list of the specific mathematics-related courses which may be used to satisfy this requirement will be found in the Mathematics Information Leaflet); 5) two courses in engineering or in some one physical or biological science. In addition, a major is expected to have a cumulative quality point average of at least 2.0 in all mathematics courses numbered 165 or above taken at the University and used to satisfy these requirements.

The Algebra group is 211-212 and 311-312. The Analysis group is 225-226, 248, 325-326, 231 (187)-332, 231 (187)-334, 331-332, 331-334. The Applied Mathematics group is 231 (187), 241-242, 247-248, 251-252, 257, 231 (187)-332, 231 (187)-334, 345-346, MATH STATIS 248. The Geometry-Topology group is 261-262, 363 and 365-366. The two-semester sequences in this list which may be used to satisfy requirement 2), above, are those pairs marked with a hyphen. Note that either pair 231 (187)-332 or 231 (187)-334 can be used as a two-semester sequence in either Analysis or Applied Mathematics, but not in both.

Students wishing to take upper level mathematics courses should note that MATH 167 is a prerequisite for most of them. MATH 167 may be taken at any time after the student has finished one semester of calculus.

Further information may be obtained from the Mathematics Information Leaflet, available from the department office, or from the departmental chief adviser.

## 011. ELEMENTARY COLLEGE ALGEBRA

For those students who offer only one unit of algebra for entrance. A review of elementary algebra and a more thorough study of such topics as quadratic equations, exponents and radicals. No Credit.

**100. MATHEMATICS IN THE MODERN WORLD (E)**

A cultural presentation of some mathematical ideas to demonstrate both the scientific and the humanistic values.

**101. ALGEBRAIC REVIEW**

A rapid review of algebraic manipulations and definitions utilized in calculus. Topics include common subsets of the real numbers; sums, products, and quotients of polynomials; factoring, rational expressions; exponents and radicals; linear and quadratic equations; radical equations, linear and quadratic inequalities; equations and inequalities involving absolute values. 4 class hours for one-third semester. *Credit, 1.*

**102. ANALYTIC GEOMETRY WITH ELEMENTARY FUNCTIONS**

An introduction to the function concept and analytic geometry. Topics include relations and functions; one-to-one functions and their inverses; linear, quadratic, and other polynomial functions; exponential and logarithmic functions; lines; conic sections. Prerequisite: MATH 101. 4 class hours for one-third semester. *Credit, 1.*

**103. PRECALCULUS TRIGONOMETRY**

An introduction to trigonometry covering topics considered essential for standard calculus. Topics include definitions and graphs of cosine, sine, tangent, cotangent, secant, and cosecant; essential identities; introductory triangle trigonometry. Prerequisite, MATH 102. 4 class hours for one-third semester. *Credit, 1.*

**110. ELEMENTARY TECHNIQUES OF MATHEMATICS (E)**

A survey of several specific topics designed to acquaint the student with the general nature of mathematics. Topics may include logic and sets, mathematical systems, calculus, probability, statistics, linear programming, and game theory.

**112. FINITE MATHEMATICS (E)**

Finite mathematics with applications in probability. Topics chosen from logic, algebra of sets, and elementary combinatorial analysis. Topics include truth tables, implication, permutations and combinations, binomial theorem, conditional probability, Bayes' Theorem, expected value, stochastic processes and Markov chains.

**120. MATHEMATICS FOR BUSINESS I (E)**  
(replaces former 115, 116, 117 sequence)

Designed for School of Business Administration students. Linear and analytic mathematical methods and their applications to business. Linear systems of equations, matrices, vectors, Markov chains, linear programming, derivatives. Credit not given after MATH 112, 115, 116, 118, or 167.

**121. MATHEMATICS FOR BUSINESS II (E)**  
(replaces former 115, 116, 117 sequence)

Continuation of MATH 120. Extrema, integration, partial derivatives. Credit not given after MATH 117, 119, 128, 132, 136, 138, or 165. Prerequisite, MATH 120.

**127. CALCULUS FOR THE LIFE AND SOCIAL SCIENCES I (E)**

Introduction to differential and integral calculus. Applications to the life and social sciences stressed. Credit given for only one of the courses 116, 118, 127, 131, 135, 137, 146. Prerequisites, high school algebra, analytic geometry.

**128. CALCULUS FOR THE LIFE AND SOCIAL SCIENCES II (E)**

Continuation of MATH 127. Credit given for only one of the courses 117, 119, 121, 128, 132, 136, 138. Prerequisite, MATH 127.

**131. CALCULUS I (E)**

Introduction to differential and integral calculus of functions of a single variable: continuity, derivatives, extrema, curve sketching, the integral, elementary integration techniques. Primarily for students in the sciences. Credit given for only one of the courses 116, 118, 120, 127, 131, 135, 137, 146. Prerequisites, high school algebra, plane geometry, trigonometry, and analytic geometry of lines and conic sections, or MATH 101, 102, and 103. *Credit, 4.*

**132. CALCULUS II (E)**

Continuation of MATH 131. Integration techniques, limits, partial derivatives, integrals as limits, improper integrals, theorems of Cauchy and Taylor, infinite series and power series, smooth curves. Credit given for only one of the courses 117, 119, 121, 128, 132, 136, 138. Prerequisite MATH 131/135/137. 4 class hours. *Credit, 4.*

**137. HONORS CALCULUS I (E)**

An enriched version of MATH 131 for those wishing a deeper knowledge of the subject matter. Graded by the standards of MATH 131. Credit given for only one of the courses 116, 118, 120, 127, 131, 135, 137, 146. Prerequisites, some demonstrated mathematical aptitude and permission of department.

**138. HONORS CALCULUS II (E)**

An enriched version of MATH 132 for those wishing a deeper knowledge of the subject matter. Graded by the standards of MATH 132. Credit given for only one of the courses 117, 119, 121, 128, 132, 136, 138. Prerequisites, some demonstrated mathematical aptitude, MATH 131/135/137, and permission of department.

**141. MATHEMATICS OF FINANCE (E)**

The mathematical principles of simple and compound interest, annuities, depreciation, valuation of bonds, and insurance.

**143, 144. SPECIAL OR EXPERIMENTAL LOWER DIVISION COURSE (E)**

Courses taught under these numbers include one-time-only courses offered upon the availability of faculty with special interests or upon petition of twelve or more students; experimental courses; or interdisciplinary studies.

**146. IDEAS OF THE CALCULUS (E)**

Origins and development of the major concepts of the calculus; analytic geometry, continuity, the derivative, the integral, differential equations. Intended for students not needing a working knowledge of calculus. Credit given for only one of the courses 116, 118, 127, 131, 135, 137, 146. Prerequisites, high school algebra and geometry.

**151. BASIC CONCEPTS OF ALGEBRA (E)**

The real numbers as a field. Linear and quadratic equations and inequalities. Systems of linear equations and inequalities. Congruence. Complex numbers. Polynomials. Algebraic structures. Functions. Highly recommended for prospective elementary school teachers. Credit not allowed for MATH 151 after MATH 211. Prerequisite, MATH 110 or equivalent.

**165. MULTIVARIABLE CALCULUS (E)**

Functions of several variables, partial derivatives, multiple integrals, theorems of Green, Stokes, and Gauss. Prerequisite, MATH 132/136/138.

**166. HONORS MULTIVARIABLE CALCULUS (E)**

An enriched version of MATH 165, for those wishing a deeper knowledge of the subject matter. Graded by the standards of MATH 165. Prerequisites, MATH 132/136/138 and 167, and permission of department.

**167. INTRODUCTION TO LINEAR ALGEBRA (E)**

Vector spaces over the real field, linear independence, linear equations, bases and dimension, inner product spaces, linear transformations and matrices, determinants, eigenvalues, applications to geometry. Corequisite, 2nd semester of calculus.

**168. LINEAR ALGEBRA LABORATORY**

A computer laboratory for MATH 167. Concurrent enrollment in MATH 167 required. *Credit, 1.*

**191, 192. FRESHMAN SEMINAR (E)**

A development of one or more topics in mathematics with extensive student participation. Intended for freshmen with mathematical interests and abilities. 191, Fall; 192, Spring. Prerequisite, permission of instructor. 1 to 3 class hours. *Credit, 1-3.*

**200. FUNDAMENTAL CONCEPTS OF MATHEMATICS (E)**

Non-axiomatic propositional calculus (with truth tables), basic quantification theory and set algebra. Binary relations, equivalence relations, partitions, functions. Development of basic algebraic and topological features of real numbers from the axioms for a complete ordered field. Effective with the class of 1979, MATH 200 may not be counted for major credit after the completion of any 200 level Mathematics course. Prerequisite, permission of instructor.

**211. INTRODUCTION TO MODERN ALGEBRA I (E)**

Introduction to groups, rings, and fields. Not for credit after MATH 311. Prerequisite, MATH 167.

**212. INTRODUCTION TO MODERN ALGEBRA II (E)**

Continuation of MATH 211. Algebraic field extensions and solution by radicals, canonical forms of matrices, quadratic forms, theory of groups, or other topics in algebra. Not for credit after MATH 312. Prerequisite, MATH 211.

**225. ADVANCED CALCULUS I (E)**

Elementary topology of the line and Euclidean  $n$ -space, continuous functions, Riemann integration, infinite series and power series. Not for credit after MATH 325. Prerequisites, MATH 165/166 and MATH 167.

**226. ADVANCED CALCULUS II (E)**

Continuation of MATH 225. Multivariate analysis and the theorems of Green, Gauss, and Stokes. Not for credit after MATH 326. Prerequisite, MATH 225.

**231. ORDINARY DIFFERENTIAL EQUATIONS FOR SCIENTISTS AND ENGINEERS (E)**

First and second order equations, elementary theory of Laplace transforms, systems with constant coefficients. Not for credit after MATH 331. Prerequisite, MATH 132/136/138. MATH 165/166 recommended as a corequisite.

**241. APPLIED ANALYSIS I**

Complex analysis including analytic functions, residues, and conformal mappings; superposition of solutions of linear differential equations; orthogonal functions and Fourier series. Prerequisite, MATH 165/166.

**242. APPLIED ANALYSIS II**

Continuation of MATH 241. Properties of Fourier series; boundary value problems; orthogonal functions; Laplace and Fourier transforms; applications to physical and engineering sciences. Prerequisite, MATH 241; differential equations and a year of physics desirable.

**247 (I), (II). INTRODUCTION TO PROBABILITY AND STATISTICS**

A survey of basic topics in both discrete and continuous spaces (sample spaces, algebra of events, combinatorics, conditional probability and independence, random variables, densities and distribution functions.) Also, special discrete (binomial and Poisson) and continuous (normal, chi-square, gamma) distributions. Expectation,  $n$ -dimensional distributions, weak law of large numbers and central limit theorem. Prerequisite, MATH 165.

**248 (I). TOPICS IN PROBABILITY THEORY**

A one-semester course intended for those Math majors who have an interest in probability and stochastic processes. Possible topics are: random walks, martingales, and the gambler's ruin problem; generating functions and branching processes (emphasizing stochastic models in biology); renewal theory; classical limit laws and sums of independent random variables; Markov chains; ergodic theory. Prerequisites, MATH 167 and 247.

**251. NUMERICAL ANALYSIS I**

A first course in techniques of numerical approximation in analysis and algebra. Not for credit after COINS 252. Prerequisites, MATH 165/166, and COINS 122 or knowledge of basic FORTRAN

**252. NUMERICAL ANALYSIS II**

Continuation of MATH 251, including numerical solution of partial differential equations. Prerequisite, MATH 251

**255. MATHEMATICS FOR THE LIFE AND SOCIAL SCIENCES**

Infinite series, finite difference equations, and differential equations with applications from the life and social sciences. Cannot be taken for credit after MATH 187 or 231 nor for upper division mathematics major credit. Prerequisite, one year of calculus.

**257. LINEAR PROGRAMMING AND THEORY OF GAMES**

The Simplex Method and extensions, duality theorems, transportation problems and other applications. Finite two-person zero-sum games and the fundamental theorem. Prerequisite, MATH 167 or permission of instructor.

**261. AFFINE AND PROJECTIVE GEOMETRY I**

Coordination of the Desarguesian affine plane, the projective plane as an extension of the affine plane. Highly recommended for prospective secondary school mathematics teachers. Prerequisite, MATH 167 or permission of instructor.

**262. AFFINE AND PROJECTIVE GEOMETRY II**

Continuation of MATH 261. Topics from

affine, projective, Euclidean, and non-Euclidean geometry. Prerequisite, MATH 261.

**271. THEORY OF NUMBERS**

Euclidean algorithm, prime numbers, congruences, quadratic reciprocity, further topics in number theory. Recommended for prospective high school mathematics teachers. Prerequisite, MATH 167 or permission of instructor.

**275. TOPICS IN THE HISTORY OF MATHEMATICS**

A detailed examination of the work of a single great mathematician, the mathematics of a single historical period, or the historical development of a single mathematical idea. Prerequisite, MATH 165/166.

**299. PROBLEM SEMINAR**

For students with strong interest and ability in mathematics. Meets weekly in small sections to present and discuss solutions to challenging problems taken from a variety of sources. May be repeated for credit. Prerequisite, permission of instructor. One class hour. Credit, 1.

**311. THEORY OF GROUP REPRESENTATIONS (E)**

Abstract groups, subgroups, quotient groups, homomorphisms, representations, irreducible representations, characters, orthogonality relations. For students qualified to study algebra at a significantly higher level of abstraction than MATH 211. Prerequisites, MATH 167 and permission of instructor. Credit, 4

**312. ADVANCED TOPICS IN ALGEBRA (E)**

Topics to be chosen from: rings, integral domains, modules over principal ideal domains, field extensions, and Galois theory. Prerequisite, MATH 311, or MATH 211 and permission of instructor. Credit, 4

**325. INTRODUCTORY MODERN ANALYSIS I (E)**

Basic topology of Euclidean  $n$ -space and metric spaces, convergence of sequences and series, continuous functions and their local and global properties. Prerequisites, MATH 165/166 and MATH 167. Credit, 4.

**326. INTRODUCTORY MODERN ANALYSIS II (E)**

Continuation of MATH 325. Differentiation, Riemann integration, sequences and series of functions, functions of several variables. Prerequisite, MATH 325. Credit, 4.

**331. ORDINARY DIFFERENTIAL EQUATIONS**

First and second order equations, existence and uniqueness theorems, systems of equations. Prerequisites, MATH 165/166 and MATH 167.

**332. TOPICS IN ORDINARY  
DIFFERENTIAL EQUATIONS**

Topics chosen from: Sturm-Liouville theory, series solutions, stability theory and singular points, numerical methods, transform methods. Prerequisite, MATH 187 or MATH 231 or MATH 331. Credit, 4.

**334. INTRODUCTION TO PARTIAL  
DIFFERENTIAL EQUATIONS**

Classification of second order partial differential equations, wave equation, Laplace's equation, heat equation, separation of variables. Prerequisites, MATH 165/166, MATH 167, and MATH 187 or MATH 231 or MATH 331. Credit, 4.

**345. LINEAR ALGEBRA FOR APPLIED  
MATHEMATICS**

Introduction to vector spaces, inner products, and matrices followed by study of linear transformations, tensors, determinants, orientation, the spectral theorem for normal operators, complexification, real normal operators, and exterior algebra. Prerequisite, MATH 167. Credit, 4.

**346. VECTOR AND TENSOR ANALYSIS  
WITH APPLICATIONS**

Continuation of MATH 345. Fréchet derivatives, the inverse and implicit function theorems, vector and tensor fields, exterior differentiation, differential forms, differentiable manifolds. Prerequisites, MATH 345 and MATH 165/166. Credit, 4.

**363. DIFFERENTIAL GEOMETRY**

Differential geometry of curves and surfaces in Euclidean 3-space using vector methods. Prerequisites, MATH 165/166 and MATH 167, or permission of instructor. Credit, 4.

**365. TOPOLOGY I**

Introduction to the topology of metric spaces and topological spaces: metrics, topologies, continuity, connectedness, compactness. Prerequisite, MATH 225, or MATH 325, or permission of instructor. Credit, 4.

**366. TOPOLOGY II**

Introduction to the geometric ideas behind algebraic topology. Polyhedra, manifolds, Jordan curve theorem, homology mod 2, classification of surfaces, Brouwer fixed-point theorem. Prerequisites, MATH 211 or 311, and MATH 365. Credit, 4.

**371. SET THEORY**

Basic properties of sets. Ordered sets. Complete ordered sets. Well-ordered sets. Cardinal and ordinal numbers. Axiom of choice, well-ordering theorem, and Zorn's lemma. Cardinal arithmetic. Highly recommended for continuing mathematics majors. Prerequisite, MATH 167 or permission of instructor. Credit, 4.

**381 (I). INTRODUCTION TO  
MATHEMATICAL LOGIC AND  
MODEL THEORY**

A one-semester course in mathematical logic and model theory. Topics include basic concepts of the propositional and predicate calculi, first order models, the completeness theorem and the Lowenheim-Skolem theorem. Turing machines, the halting problem and Godel's incompleteness theorem discussed. Prerequisite, MATH 211 or permission of instructor. Credit, 4.

**385, 386, 387, 388. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**STATISTICS**

There is no undergraduate major in statistics. The curriculum is intended for those who wish to prepare themselves for graduate work in statistics and for those who require statistics as a basic preparation for their own subject-matter discipline. Cognate courses are needed to supply a basis for mature thinking. The statistical specialist should choose, according to his or her interests, cognate courses from such fields as: animal and plant breeding, biology, computer science, econometrics, engineering, genetics, mathematics, market research, psychology, and sociology. Students who expect to do graduate work in statistics should take MATH 247 and STATIS 248. Statistics leans heavily on mathematics and most of the prerequisites for the advanced statistics courses will come from MATH 165/166 (calculus), MATH 231 or MATH 331 (differential equations), and a course in matrix algebra such as MATH 167.

**121 (I), (II). ELEMENTARY STATISTICS  
(E)**

Selected topics in elementary probability and statistics: discrete models for chance experiments, conditional probabilities; "odds" and betting schemes, combinatorics, averages and standard deviation, random sampling, binomial and normal distributions, regression, statistical inference, chi square test. Students who intend to use statistics as a research tool, but who do not have a calculus background, should elect STATIS 231, 232. Students with calculus background should elect STATIS 315, 316. Credit given for only one of the courses STATIS 121, 140, 231, 315.

**140. STATISTICS FOR BUSINESS (E)**

Required of all undergraduates in the School of Business Administration. A one-semester introductory course. Descriptive statistics, a small amount of probability theory and an introduction to the ideas of statistical inference. Topics include frequency distributions and measures of central tendency and of dispersion, linear regression, probability, the binomial and normal distributions, internal estimation and hypothesis testing.

**231. INTRODUCTION TO  
FUNDAMENTALS OF STATISTICAL  
INFERENCE I (E)**

Random experiments and probability models; independence; conditional probability; sampling; random variables; data representations; special distributions, deduction and inference.

**232. INTRODUCTION TO  
FUNDAMENTALS OF STATISTICAL  
INFERENCE II (E)**

Point, interval and model estimation; hypothesis testing; optimality concepts; power; least squares techniques; decision theoretic notions. Prerequisite, STATIS 231.

**248 (I), (II). A SURVEY OF STATISTICS**

Intended for mathematics majors interested in statistics. A one-semester introductory course leading toward further study in statistics. Topics include the theory of estimation, testing of hypothesis, analysis of variance, regression analysis and goodness of fit tests. Prerequisite, MATH 247.

**251 (II). ELEMENTARY LEAST SQUARES,  
REGRESSION AND ANALYSIS OF  
VARIANCE (E)**

Theory of least squares, analysis of variance, simple linear and multiple regression, and application of these techniques to the real data. Prerequisite, STATIS 121 or 232.

**261 (I). DESIGN OF EXPERIMENTS  
(Methods)**

Purpose of experimental designs and their basic assumptions; individual comparisons, components of error, confounding; applications from various fields. Prerequisite, STATIS 121, 232, or 316.

**262 (II). ADVANCED STATISTICAL  
ANALYSIS OF EXPERIMENTAL  
DATA**

Analysis of data with disproportionate subclass numbers. Includes the method of fitting constants, the method of weighted squares of means, absorption of equations, expectations of mean squares, and tests of hypotheses. Prerequisite, STATIS 261.

**271 (I). SURVEY SAMPLING**

Theory and practice of sampling; optimum allocation of resources, estimation of sample size, various sampling methods, ratio and

regression estimates, problem of non-response. Prerequisite, STATIS 121, 232, or 316.

#### 272 (II). SAMPLING THEORY AND METHODS

Problems and methods of samplings; production and quality control, acceptance sampling, OC and ASN curves, types and properties of estimators. Prerequisite, STATIS 121, 232, or 316.

#### 281 (II). MULTIVARIATE ANALYSIS (Methods)

Applications of the theory in STATIS 282 to actual problems; research studies by the students, critiques of published research, or analysis of other bodies of data. Prerequisite, STATIS 251 or 316.

#### 282 (II). MULTIVARIATE ANALYSIS (Theory)

Correlation and regression, principal components, canonical analysis, analysis of dispersion and covariance, tests of homogeneity, discriminant functions. Prerequisite, STATIS 316.

#### 315 (I). INTRODUCTION TO THE THEORY OF STATISTICS I (E)

Probability, random variables, probability distribution (with emphasis on the binomial and normal distributions), mathematical expectation, bivariate and multivariate distributions, sampling distributions, the central limit theorem, point estimation, maximum likelihood estimators, interval estimation. Prerequisite, MATH 117/119 or MATH 128 or MATH 132/136/138.

#### 316 (II). INTRODUCTION TO THE THEORY OF STATISTICS II (E)

Interval estimation, hypothesis testing, analysis of variance, regression, correlation, decision theory. Prerequisite, STATIS 315.

#### 350 (II). TOPICS IN STATISTICS

An intermediate course for mathematics majors. Topics may vary from year to year among the following: sampling theory, sequential analysis, decision theory, non-parametric statistics, linear statistical models, Bayesian methods and multivariate analysis. Prerequisite, MATH 247.

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By

arrangement with Department and/or Honors Office. Credit, 1-5.

### Microbiology

*Acting Head of Department:* Professor Robert P. Mortlock. Professors Canale-Parola, Cox, Thorne; Associate Professors Dowell, Holt, Lessie, Wilder; Assistant Professors Czarnecki, Norkin, Reiner.

Microbiology majors are required to have broad training in collateral sciences; minimum requirements include chemistry through quantitative analysis and organic, one year each of introductory biological science and physics, and mathematics through calculus. Those students contemplating graduate or professional school study are advised to emphasize stronger training in these collateral sciences, especially physical chemistry and biochemistry. Courses in microbiology are designed to offer fundamental training in the basic core areas and disciplines of this field. Microbiology majors are required to take 17 credits of upper division departmental courses including MICBIO 250, 251, 280, 340, 391 and 392, plus 2 Microbiology elective courses.

#### 140 (I), (II). BIOLOGY OF MICROORGANISMS (E)

The microbial world, including history, structure, growth, ecology, physiology, pathogenesis, and microbial genetics. Lectures supplemented with visual aid material.

#### 141 (I), (II). BIOLOGY OF MICROORGANISMS

Open only to students concurrently registered for MICBIO 140. 1 3-hour laboratory period. Prerequisite, MICBIO 140 or concurrent registration. Credit, 1.

#### 250. GENERAL MICROBIOLOGY I (E)

Cytology, pathogenic bacteriology, immunology and virology. Designed for students intending to take more advanced courses in microbiology and for other science majors. Prerequisites: one semester of biological science, and completion of or concurrent registration in a course in organic chemistry. 2 1-hour lectures, 1 3-hour laboratory.

#### 251. GENERAL MICROBIOLOGY II (E)

Ecology, physiology and genetics of microorganisms. Designed for students intending a career in microbiology, or professional school, such as medical or dental school. Prerequisites, a college course in biological science, and completion of or concurrent registration in a course in organic chemistry. MICBIO 250 not required but strongly recommended. 2 1-hour lectures, 1 3-hour laboratory.

#### 280 (II). PATHOGENIC BACTERIOLOGY

The pathogenic bacteria, their interactions with host defenses and the precise mechanisms whereby they produce disease. Prereq-

uisite, MICBIO 250. 2 class hours, 2 3-hour laboratory periods. Credit, 4.

#### 310 (I). IMMUNOLOGY

The nature of antigens and antibodies, their interactions and significance in resistance and hypersensitivity. Prerequisite, MICBIO 250. 2 class hours, 2 3-hour laboratory periods.

Credit, 4

#### 320 (II). MAMMALIAN VIROLOGY AND TISSUE CULTURE

Properties of animal cells in tissue culture. Mechanisms by which viruses penetrate, replicate in, and produce morphological and functional changes in animal cells. Laboratory exercises on cell and virus propagation in tissue culture, virus assay techniques, and neoplastic transformation. Prerequisite, MICBIO 250, or permission of instructor. 2 class hours, 2 3-hour laboratory periods. Credit, 4.

#### 340 (II). MICROBIAL PHYSIOLOGY

Fundamental studies of microbial chemistry and growth. Composition of bacterial cells, energy metabolism, biosynthesis of macromolecules and macromolecule precursor materials, and regulatory mechanisms governing these events. Prerequisite, MICBIO 251 or permission of instructor.

#### 360 (I). MICROBIAL DIVERSITY

Physiology, ecology, and morphology of selected groups of microorganisms. Behavior of bacteria in response to environmental stimuli. Prerequisite, MICBIO 250. 2 class hours, 2 3-hour laboratory periods. Credit, 4.

#### 370 (I). MICROBIAL GENETICS I

Essentials of microbial genetics, molecular approaches including results from the recent important scientific literature. Example topics to be discussed are chromosome structure, mutation, plasmids and genetic engineering. Prerequisite, 1 course in either Microbiology or genetics. 3 1 hour lectures.

#### 371 (II). MICROBIAL GENETICS II (with lab)

Microbial genetics literature; basic concepts and laboratory procedures in experimental microbial genetics. Prerequisite, MICBIO 250 and permission of instructor. A general biochemistry course is recommended. 2 4-hour sessions twice a week, including lecture and laboratory. Credit, 4.

#### 385, 386 (I), (II). RESEARCH

Prerequisites, 8 credits of Microbiology and departmental permission. Credit, 1-6.

#### 391, 392 (I), (II). SEMINAR

Prerequisite, MICBIO 250. Credit, 1.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Physics and Astronomy

**Head of Department:** Professor F.W. Byron, Jr. Professors Brehm, Button-Shafer, Cook, Engelsberg, Ford, Guyer, Harrison, Huguenin, Irvine, Jones, Krotkov, Peterson, Quinton, Rosen, Sternheim, Soltysik; Associate Professors Army, Dent, Gerace, Goldenberg, Golowich, Hallock, Hertzbach, Holstein, Kofler, Kreisler, Langley, Penchina, Pichanick, Rabin, Sastry, Swift, Taylor, Van Blerkom, Walker; Assistant Professors Chang, Crooker, Dakin, Hoffman, Kane, Mathieson, Scoville, Tademaru, Webb; Staff Associate Gray; Post Doctoral Research Associates and Lecturers Cuzzi, Finn, Telschow, Shah.

## PHYSICS

Introductory and advanced courses of many types designed for students with varied interests and needs are offered by the Department of Physics and Astronomy. Introductory level courses intended mainly for non-science majors are 100, 114, 115, 117, 118, 119, 121-122, 130, and 169. (114 is of special interest to Communication Disorders majors, 115 to music majors, and 130 to Elementary Education majors.) 141-142 serves the needs of life science majors, including premed-physics majors. 161-162-163 provides the necessary background for majors in Engineering, Chemistry, Physics, Astronomy, and other Physical Science fields. Students with special interest and facility in physics and mathematics, especially prospective Physics or Astronomy majors, are encouraged to elect the 170 series, the Honors version of the 160 sequence. Prospective majors sometimes elect to take 100 or 116 while completing the mathematics prerequisites for the introductory sequences.

In order to provide the maximum flexibility and diverse options, the department has recently revised all the upper division courses. This includes courses intended primarily for physics majors and those which also appeal to students in other scientific fields. The new curriculum has not yet received final University approval. Consequently all courses numbered 171 or higher are tentative, although substantial changes are not expected.

Majors are normally required to take MATH 131-132 and 165, a year of another science outside physics, and 18 credits of upper division physics courses: 220 or 222, 221 or 225, 223, 224 or 301, and two advanced laboratory courses chosen from 205, 320, 321, 322, 375, 376 (ASTRON 237 or 238 may be substituted for one of these labs). Physics students interested in interdisciplinary fields may elect to take additional courses in other departments, while those planning to continue in physics are encouraged to elect several advanced physics courses plus additional

math. Concentrations in biophysics and atmospheric physics are available.

### 100 (I), (II). PHYSICS FOR POETS: THE WORLD BEYOND OUR SENSES (E)

Physics of atoms and nuclei (quantum physics), of the universe (cosmology), and of high speeds (relativity). Designed for non-science majors and with a minimum of mathematics.

### 114 (I), (II). THEORY OF SOUND WITH APPLICATIONS IN SPEECH AND HEARING SCIENCE (E)

Fundamentals of wave motion; vibration of strings and membranes; sound waves; free and forced vibrations; transmission, reflection and absorption of sound. Applications to speech and hearing mechanisms. Designed as a prerequisite to COMSTU 287/587.

### 115 (II). PHYSICS OF MUSIC (E)

Elementary concepts of physics of sound in the production and reception of music. No previous physics training required; largely non-mathematical presentation. Emphasis on basic principles. Some historical perspective developed. Individual instruments discussed with demonstrations.

### 116 (I). RELATIVITY (E)

As much general physics material as is required for an understanding of the fundamental principles of relativity, and of their consequences in other fields. Intended for the general student. No background in physics or science required. Prerequisite, high school algebra.

### 117 (II). NUCLEAR ENERGY, ITS PHYSICS AND ITS SOCIAL CHALLENGE (E)

Basic physical concepts clarifying the nature of atoms and nuclei; the workings, capabilities and possible perils of nuclear reactors and explosives; associated social, political and diplomatic problems and challenges. Prerequisite, high school algebra.

### 118 (II). ELEMENTS OF QUANTUM PHYSICS (E)

Atoms and their structure, matter waves, duality, Pauli principle, spin, uncertainty principle, role of models in physics, application of concepts of quantum physics to solid state, nuclear and elementary particle physics, philosophical implications.

### 119. PHYSICS APPLIED TO CONTEMPORARY PROBLEMS (E)

Principles of physics applied to contemporary problems such as the energy crisis, air pollution, and the arms race. The scientific foundation for study of problems with social, political and economic implications.

### 121 (I), 122 (II). CONCEPTS OF PHYSICS (E)

Mechanics, sound, heat, electricity, light,

atomic and nuclear concepts. Conventional topics may be replaced to suit specific undergraduate majors, to emphasize historical, biological and conceptual rather than mathematical approaches. PHYSIC 121 prerequisite for PHYSIC 122. 2 class hours, 12-hour laboratory period. Credit, 3 each semester

### 123 (I), (II). PROBLEMS IN PHYSICS

Designed to fill gaps between courses such as 121-141, 141-161, etc. for students who have taken one general course and require a more advanced course tailored to the needs of individual students. Prerequisite, one general college physics course. Credit, 1-4

### 130 (I), (II). PHYSICS FOR ELEMENTARY EDUCATION MAJORS (E)

Physical phenomena and the schemes for their representation. Topics from mechanics electricity and magnetism, waves, optics and properties of matter. Mathematics at the level of algebra, trigonometry and simple geometry developed as required. For elementary education majors only. 2 class hours, 1 2-hour laboratory.

### 141 (I), (II), 142 (I), (II). INTRODUCTORY PHYSICS I, II (E)

Mechanics, sound, heat; electricity, magnetism, light and modern physics, using trigonometry and algebra, but not calculus. Intended for pre-medical, pre-dental, pre-veterinary, and other life science majors. Prerequisites, MATH 130 previously or concurrently for PHYSIC 141; PHYSIC 141 for PHYSIC 142. 4 class hours, 12-hour laboratory period alternate weeks. Credit, 4 each semester

### 161 (I), (II). GENERAL PHYSICS I (E)

Mechanics. For students primarily interested in engineering, chemistry, or mathematics. Prerequisites, MATH 131 or equivalent previously, or concurrently with special permission. Four class hours, 1 2-hour laboratory in alternate weeks. Credit, 4.

### 162 (I), (II). GENERAL PHYSICS II (E)

Heat, electricity, and magnetism. Prerequisites, MATH 131 or equivalent, PHYSIC 161; MATH 132 previously or concurrently. 4 class hours, 1 2-hour laboratory in alternate weeks. Credit, 4.

### 163 (I), (II). GENERAL PHYSICS III (E)

Electromagnetic radiation, optics, atomic and nuclear physics. Prerequisites, MATH 132; PHYSIC 162. 1 2-hour laboratory period. Credit, 4.

### 169. SCIENCE FOR READERS OF SCIENCE FICTION.

Space travel, faster than light drives, extraterrestrial life and intelligence, signals from space, etc., in the light of our present knowledge of astronomy, physics, chemistry, and biology. (Same as ASTRON 169.)

**171 (I), (II). HONORS GENERAL PHYSICS I (E)**

Particle dynamics, work and energy, conservation principles, rotational dynamics, oscillations, gravitation, elementary kinetic theory. Corequisite, MATH 131.

**172 (I), (II). HONORS GENERAL PHYSICS II (E)**

Electric fields, Gauss' Law, potential theory, capacitors and dielectrics, current and resistance, magnetic fields, Ampere's Law, Faraday's Law and induction, electromagnetic waves. Prerequisites, PHYSIC 141, 161, or 171. Corequisite, MATH 132.

**173 (I), (II). HONORS GENERAL PHYSICS III (E)**

Wave motion, particle nature of radiation-photoelectric effect, black body spectrum, X-ray production and scattering wave nature of particles — diffraction of particles, wave packets, uncertainty principle, elementary quantum mechanics and nuclear physics. Prerequisites, PHYSIC 142, 162, or 172, MATH 132.

**175 (I), (II). HONORS GENERAL PHYSICS LABORATORY I (E)**

Emphasis on data handling and error analysis. Corequisite, PHYSIC 171. Credit, 1.

**176 (I), (II). HONORS GENERAL PHYSICS LABORATORY II (E)**

An E and M lab with emphasis on DC circuits and instruments, some AC. Corequisite, PHYSIC 172. Credit, 1.

**177 (I), (II). HONORS GENERAL PHYSICS LABORATORY III (E)**

Modern physics with experience in electronics: oscilloscopes, precision meters, etc. Corequisite, PHYSIC 173. Credit, 1.

**185, 186. FRESHMAN COLLOQUIUM I, II (E)**

For freshmen (and in some cases sophomores) with a special interest in physics. Various topics in contemporary physics: lectures by physicists working in various research fields. Credit, 1.

**201. INTRODUCTION TO APPLIED PHYSICS**

Applications of basic principles of physics to such topics as acoustics, fluids, classical geometric optics and physical thermodynamics. With laboratory. Prerequisite, PHYSIC 142, 163, or 173. Credit, 4.

**202. TECHNIQUES OF THEORETICAL PHYSICS**

Free and forced, damped oscillations, impedance, wave equations and their solutions. Prerequisites, PHYSIC 142, 163, or 173.

**205. INTERMEDIATE LABORATORY**

Techniques applied in modern laboratories in

designing, constructing and using experimental apparatus. Specific laboratory skills will be developed in the course of performing physical measurements.

**220. PHYSICAL ELECTRONICS**

Basic ideas of electricity and magnetism. Emphasis on conceptual development. Topics include DC and AC circuits, electromagnetic field theory and Maxwell's equations, electron ballistics, electron microscopes, accelerators, magnetic mirrors. Prerequisite, PHYSIC 142, 162, or 172.

**221. CLASSICAL MECHANICS**

Motion of systems of particles and rigid bodies in three dimensions, gravitation, non-inertial coordinate systems, continuum mechanics, fluid dynamics, elementary Lagrangian theory, small oscillations and normal modes. Prerequisites, PHYSIC 141, 161, or 171, MATH 165.

**222. ELECTRICITY AND MAGNETISM (INTERMEDIATE)**

Static electric and magnetic fields, Maxwell's equations in matter, scalar and vector potentials, multipole expansions, electromagnetic induction, and circuit theory. Prerequisites, PHYSIC 142, 162, or 172, MATH 165.

**223. STATISTICAL PHYSICS AND THERMODYNAMICS**

Equilibrium thermodynamics, Maxwell relations, phase transitions, irreversible processes, Fermi and Bose gases, quantum liquids and solids, fluctuations. Prerequisites, PHYSIC 142, 163, 173, MATH 165.

**224. MODERN PHYSICS**

Special relativity, black body spectrum, Compton effect, photoelectric effect, nuclei and atoms, introductory quantum mechanics, molecules, binding energy and energy bands in solids, nuclear physics. Prerequisites, PHYSIC 142, 163, or 173, MATH 165.

**225 (I). BIOPHYSICS**

Techniques of biophysical measurements including X-ray structure determination, electron and optical microscopy, and molecular weight determination. Flow of energy and entropy considerations in biological systems. Electrical properties of cells, photosynthesis, vision and nerve conduction. Prerequisite, PHYSIC 142, 163, or 173.

**254 (I). METEOROLOGY.**

Theoretical treatment of various atmospheric phenomena with correlation of observation and theory. Weather observations, preparation of weather charts, and weather forecasting. Prerequisites, PHYSIC 142, 162, or 172, MATH 132.

**257 (II). ATMOSPHERIC PHYSICS**

The physics of processes occurring in the

earth's atmosphere. Topics include hydrostatic equilibrium of the atmosphere, gas laws, physics of clouds, atmospheric electricity and radiative transfer. (Listed also as ASTRON 257).

**301 (II). CONCEPTS OF MODERN PHYSICS I**

Fundamental concepts of twentieth century physics. Topics include kinetic theory, transport phenomena, shell structure of atoms, basic principles of quantum mechanics.

**302 (I). CONCEPTS OF MODERN PHYSICS II**

Continuation of PHYSIC 301. Topics include relativity, properties and structure of nuclei, nuclear reactions, new quantum numbers and families of elementary particles; aspects of space physics such as Van Allen radiation belts; properties of matter in the solid state. Prerequisite, PHYSIC 301.

**320 (II). RADIATION PHYSICS**

Physical principles of ionizing and non-ionizing radiations are discussed. The interactions of these radiations with matter (physical and biological) are considered. Applications of these as well as radioisotopes to nuclear medicine and other practical fields (such as the environment) are discussed. With laboratory. Credit, 4.

**321 (I), (II). ELECTRONICS INSTRUMENTATION FOR SCIENTISTS I**

Laboratory-oriented. Basic electronics principles, servo systems, operational amplifiers, digital circuits, other modern devices. Prerequisites, PHYSIC 142, 163, or 172. 2 class hours, 1 4-hour laboratory period. Credit, 4.

**322. ELECTRONICS INSTRUMENTATION FOR SCIENTISTS II**

Digital electronics. Two lectures, 1 2-hour laboratory weekly. Prerequisites, PHYSIC 321.

**351. APPLIED QUANTUM MECHANICS**

Applications of quantum principles to materials and the interaction of radiation with matter. Topics include electron nuclear interactions, nuclear magnetic resonance, masers, lasers, optical pumping, band theory of semiconductors, and superconductivity. Prerequisite, PHYSIC 224.

**352. ACOUSTICS**

Derivation of acoustical equations. Generation of sound; interpretation of forces and stresses as multipoles. Sound propagation: atmosphere acoustics, ray theory, refraction, absorption, scattering. Non ideal behavior: attenuation in porous materials, reverberation and decay of energy, coupled cavities. Prerequisite, PHYSIC 221.

### 353. OPTICS

Geometric optics and classical treatment of the interaction of radiation with matter. Light as a statistical process; correlation functions. Interference and spatial coherence. Fabry-Perot interferometers, Fourier transform spectroscopy, photodetectors, modern techniques of spectral analysis. Prerequisites, PHYSIC 222, 224.

### 354. PLASMA PHYSICS

The occurrence and generation of plasmas; applications to such problems as gas lasers, thermonuclear fusion and space charge effects. Collisional processes, motion of charged particles, adiabatic invariants, magnetic mirrors. Field equations and plasma oscillations. Prerequisites, PHYSIC 221, 222, 224.

### 355. HYDROMECHANICS

Introduction to theoretical fluid mechanics. Development of general equations of motion. Laminar and turbulent flow. Kinematics and dynamics of real fluids. Treatment of hydro-mechanic instabilities.

### 358. SOLID STATE PHYSICS

Introduction to theoretical and experimental physics of the solid state. Prerequisite, permission of instructor.

### 362. ELECTRICITY AND MAGNETISM (ADVANCED)

Description of electric and magnetic fields in a dynamical context. Electromagnetic radiation theory, optics, plasma physics, relativistic electrodynamics, cavity resonators, waveguides. Prerequisite, PHYSIC 222.

### 363. NON-EQUILIBRIUM STATISTICAL PHYSICS

Non-equilibrium statistical processes. Transport theory, the Boltzmann constant. Prerequisite, PHYSIC 223.

### 365. ADVANCED BIOPHYSICS

Selected topics in biophysics. Prerequisites, PHYSIC 225 or permission of instructor.

### 371. EXPERIMENTAL PHYSICS

A series of independent half semester modules. Modern laboratory practices in a given area such as vacuum techniques, computational techniques, low temperature, signals and noise, optics. Modules may include lectures and laboratories. Credit, 2.

### 375, 376. ADVANCED LABORATORY I, II

One or more elected experiments or an original research project. Laboratory work normally supervised by an individual faculty member on a one-on-one basis. Credit, 1-3.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 391. SEMINAR

An aspect of physics not usually covered in regular course offerings. Prerequisite, permission of instructor. Credit, 1-3.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

### ASTRONOMY (A Five College Department)

Chairman of Department: Professor William M. Irvine. Professors Harrison, Huguenin, Seitter, Strong; Associate Professors Arny, Dent, Taylor, Van Blerkom; Assistant Professors Dennis, C. Gordon, K. Gordon, Greenstein, Scoville, Tadamaru, White.

### 100 (I), (II). EXPLORING THE UNIVERSE (E)

Not open to Physical Science or Engineering majors. The earth, its structure and age, the moon, the sun, other planets and the origin of the solar system. Stars and galaxies, their birth and death. The universe, its structure and evolution. Supplemented by occasional hours of evening observation.

### 101 (I). THE SOLAR SYSTEM (E)

Earth, moon, tides, laws of motion, planets and satellites, the sun. Origin of the solar system and current theories of the origin of life. ASTRON 103 is an optional laboratory.

### 102 (II). STARS AND GALAXIES (E)

The astronomical universe. Astronomical instruments. Stellar distances and motions, star clusters, nebulae, pulsars, quasars. Evolution of stars and galaxies, cosmology. ASTRON 103 is an optional laboratory.

### 103 (I), (II). ASTRONOMICAL OBSERVATIONS

A laboratory and field course for those not majoring in physics and astronomy and preferably who are taking or have taken either ASTRON 100, 101, or 102. Telescopic observations, evening field trips, daytime field trips to the Five College Radio Observatory and Planetarium, and examination of astronomical photographs. Credit, 1.

### 105 (II). WEATHER AND OUR ATMOSPHERE (E)

An introduction to the earth's atmosphere, including weather forecasting, the origins of rainbows, sundogs, fog, inversions, halos, thunderstorms, and other common phenomena.

### 169 (II). (See PHYSIC 169). SCIENCE FOR READERS OF SCIENCE FICTION.

### 220 (II). COSMOLOGY (E)

Cosmological models and the relationship between models and observable parameters. Topics in current astronomy which bear upon cosmological problems, including background electromagnetic radiation, nucleosynthesis, dating methods, determinations of the mean density of the universe and the Hubble constant, and tests of gravitational theories. Questions concerning the foundations of cosmology, and its future as a science. Two 2-hour meetings. Prerequisites, one semester of calculus and one science course.

### 222 (I). INTRODUCTION TO ASTRONOMY (THE SOLAR SYSTEM AND STARS) (ASTFC 22)

For astronomy majors or others interested in a quantitative introductory course. Newtonian gravitation and the structure of the solar system; properties of the planets, meteors and comets; origin of the solar system; black-body radiation and stellar magnitudes; spectral lines and the spectral classification of stars; binary stars and stellar masses; nuclear energy and the structure and evolution of stars; the Hertzsprung-Russell diagram. 2 90-minute lectures per week plus evening laboratories. Prerequisites, PHYSIC 171 or 161 or 141, MATH 131 or permission of instructor.

### 223 (II). INTRODUCTION TO ASTRONOMY (GALACTIC AND EXTRAGALACTIC ASTRONOMY) (ASTFC 23)

For astronomy majors or others interested in a quantitative introductory course. Variable and exploding stars, pulsars, X-ray astronomy, the interstellar medium, galactic structure, external galaxies, quasars and cosmology. 2 90-minute lectures per week plus evening laboratories. Although ASTRON 223 may be taken before ASTRON 222, most students do not; those who do require some outside reading to orient themselves and should consult with instructor at the beginning of course. Prerequisites, same as 222. Credit, 4.

### 231 (I). SPACE SCIENCE: THE SOLAR SYSTEM. (ASTFC 31) (E)

Modern studies of the solar system. Emphasis on recent manned and unmanned missions undertaken by NASA and interpretation of results. Primarily for non-science majors. 2 90-minute lectures per week. Prerequisites, ASTRON 101-102 or 222 and MATH 111 or 131.

### 234 (II). DEVELOPMENT OF ASTRONOMY (ASTFC 34)

The progress of astronomy, traced from prehistoric petroglyphs to the space age. Emphasis on the development of important ideas in the field and the relation of astronomy to other cultural trends. Supplemented by occasional use of the planetarium and the departmental telescopes. Prerequisite, ASTRON 101-102 or 222.

**237 (I). ASTRONOMICAL OBSERVATION (ASTFC 37) (E)**

An introduction to the techniques of gathering and analyzing astronomical data. Subjects to be covered depend somewhat on individual interests: fundamental astronomical catalogues and their uses, photography, photometry, spectroscopy and classification of spectra, techniques of planetarium use, basic radio astronomy, introduction to telescope design and use, the astronomical distance scale. Three hours of classroom work per week, some of which will be observing sessions to be arranged. Prerequisite, ASTRON 101-102, or 222, or permission of instructor.

**238 (II). TECHNIQUES OF RADIO ASTRONOMY. (ASTFC 38) (E)**

Introduction to radio astronomy. Emphasis on practical techniques. The Five-College Quabbin Radio Astronomy Observatory is used to observe pulsars and other radio sources, and to perform flux density and interferometric position measurements. 2 90-minute lectures per week plus observing sessions.

**343 (I). ASTROPHYSICS I (ASTFC 43)**

Basic topics in astrophysics. Equilibrium configurations, and the physical state of stellar interiors. Polytrope models. Interaction of radiation and matter, and radiative transfer. Radiative and convective equilibrium. Study of opacity. Prerequisite, concurrent enrollment in Mechanics or permission of the department. 4 class hours. Credit, 4.

**344 (II). ASTROPHYSICS II (ASTFC 44)**

Interaction of matter and radiation. Radiative transfer. Introduction to the physics of stellar and planetary atmospheres. Plasma physics and cosmology. Prerequisite, ASTRON 343, or permission of the department. 4 class hours. Credit, 4.

**385 (I), (II); 386 (I), (II). SPECIAL PROBLEMS**

An individual research project approved by the department. Prerequisite, permission of the department. Credit, 1-6.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Zoology

Chairman of Department: Professor John Palmer, Gilbert L. Woodside Professor of Zoology, Vincent Dethier; Professor Emeritus, Donald Fairbairn; Professors Bartlett, Honigberg, Moner, Nutting, Rauch, J. Roberts, L. Roberts, H. Rollason (Associate Chairman),

Sargent, Snedecor, Stuart; Associate Professors Andrews, Edwards, Kaulenas, Klingener, Levin, Ludlam, Mange, O'Connor, Potswald, G. Rollason, Snyder, Woodcock, Wyse; Assistant Professors Coombs, Kunkel, Noden, Novak, Searcy, White, Ziegler.

The Zoology Department offers a variety of general interest courses in ecology, behavior, natural history, genetics, and physiology constructed for the enjoyment and benefit of everyone; a few are designed to fulfill the needs of specific groups of students.

For students who decide to major in zoology, the curriculum provides the basic concepts in all areas of zoology, but allows for various individual interests. Zoology majors should complete ZOOL 240, Principles of Genetics; ZOOL 360, Cell Physiology; and one course from each of the following groups:

**Vertebrate Zoology:**

ZOOL 221, Comparative Anatomy  
ZOOL 223, Histology  
ZOOL 227, Embryology

**Invertebrate Zoology:**

ZOOL 281, Biology of the Invertebrates  
ZOOL 282, Biology of the Invertebrates  
ZOOL 283, General Parasitology

**Ecology, Population, Behavior:**

ZOOL 243, Population Biology  
ZOOL 335, Limnology  
ZOOL 337, Ecology  
ZOOL 350, Animal Behavior

**Physiology, Development:**

ZOOL 366, Vertebrate Physiology  
ZOOL 370, Comparative Physiology  
ZOOL 380, Developmental Biology

Background knowledge in allied fields aids understanding of zoological ideas; thus, additional requirements are:

BOTANY 100, Introductory Botany  
PHYSIC 141/142, Introductory Physics  
MATH 127/128, Calculus for the Life and Social Sciences.

Students contemplating a major in zoology should also enroll in CHEM 111 their first semester in order to anticipate those zoology courses which have general chemistry (CHEM 111/112), organic chemistry (CHEM 261/262 with laboratory), or biochemistry (BIOCHM 220 or 223) as prerequisites. No other scheduling difficulties should be encountered, although the student should, of course, plan ahead with regard to all prerequisites, and fall-versus-spring scheduling of some courses.

Students may substitute for MATH 127/128 either of the following sequences: STATIS 231/232, Fundamentals of Statistical Inference; or COINS 122, Introduction to Problem Solving, plus a second COINS course for which 122 is a prerequisite. Other substitutions are possible. For example, students with a strong interest in chemical biology may,

with the permission of the Chemistry Department, substitute CHEM 113/114 for CHEM 111/112; those with a special interest in physics may wish to substitute PHYSIC 161/162/163 for PHYSIC 141/142. The Bachelor of Science degree requires a total of 60 credits in natural science, mathematics, or psychology. A few courses elected from these areas will bring a zoology major's program to the 60-credit level.

ZOOL 101, Introductory Zoology, is currently not required of zoology majors, but the faculty is preparing a first course in zoology (ZOOL 102) for its majors which will be required. Any student who has not studied biology in high school or who feels the need for review may, of course, elect ZOOL 101, or simply audit the lectures.

The curriculum for those who plan to become certified secondary school biology teachers is somewhat broader. Additional botany courses (BOTANY 125 and 126), and several psychology and education courses, as well as practice teaching, provide the needed background. Also ZOOL 135, Introductory Physiology, may be substituted for the last group of zoology courses listed above. Students are urged to contact the Science Education advisor in the School of Education as early in their academic careers as possible since good course planning will expedite their very full programs. Written application to the teacher preparation program is required for student teaching placement.

The zoology faculty stands ready to assist the student in a variety of ways. Up-to-date information on course selection, the honors program for qualified students, special courses, individualized work (ZOOL 385/386), Senior Honors (ZOOL 398/399), and summer research opportunities is readily available from your advisor or other members of the faculty. It is useful to establish rapport with your advisor, and to seek as much information as possible about careers in zoology. Publications of the University and the College of Arts and Sciences Information and Advising Office (CASIAC) also provide information on procedures to ease your progress and on the vast array of courses to enrich your undergraduate education.

**101 (I), (II). INTRODUCTORY ZOOLOGY (E)**

Principles of zoology including cell structure and metabolism, heredity, development, behavior, evolution, ecology, and the anatomy and physiology of the major groups in the animal kingdom. Background for understanding current biological problems. 2 class hours. 1 3-hour laboratory.

**135 (I), (II). INTRODUCTORY PHYSIOLOGY (E)**

Circulation, respiration, digestion, metabolism, excretion, chemical and nervous coordination, muscular activity, and reproduction.

Prerequisite, ZOOL 101. 2 class hours, 1 3-hour laboratory.

### 137 (I), 138 (II). HUMAN ANATOMY AND PHYSIOLOGY

A systematic approach to the study of the human body with integration of structure and function. Primarily for students intending to study nursing; open to others with permission. Prerequisite, one semester of chemistry, preferably two; credit only for full-year course. 3 class hours, 1 3-hour laboratory.

Credit, 4 per semester.

### 145 (II). HUMAN GENETICS (E)

Introduction to human genetics emphasizing principles applicable to all species, specific knowledge of man, and scientific methodology. Topics include chromosomal and biochemical variations, blood groups, linkage, hypothesis testing, and gene frequency changes in populations. Not open to students majoring in biological sciences. Prerequisite, ZOOL 101.

### 150 (I). BIOLOGY OF BEHAVIOR (E)

The biological approach to the study of animal behavior. Historical, descriptive, physiological, and evolutionary aspects; the relationships of animal behavior studies to the understanding of human behavior. Not for major credit. Prerequisite, one semester of biological science.

### 161 (I). BIOLOGY OF BIRDS (E)

Selected topics in avian biology; birds' migrations and navigational capabilities; breeding behavior; structural and functional specializations; origin and evolution; ecology, economics, and aesthetic relations to man. Prerequisite, one semester of biological science.

### 176 (I), (II). ECOLOGY OF MAN (E)

Man's interaction with the physical, chemical, and biological environment. Problems of population, food supply, pollution, resources, and human behavior, in relation to ecological theory. Not open to students majoring in biological sciences. Prerequisite, 1 laboratory course in biological science.

### 200 (II). NATURAL HISTORY (E)

Basic features of the solar system, earth structure, climate, and living organisms of concern to the neophyte ecologist field biologist, and primary or secondary school teacher. Many field trips. Prerequisite, one semester of biology. 1 class hour, 1 4-hour laboratory.

### 221 (I), (II). COMPARATIVE VERTEBRATE ANATOMY

Structure and phylogeny of vertebrates. Laboratory work illustrates evolutionary trends and specializations and provides experience in dissection. Prerequisite, ZOOL 101 or 240. 2 class hours. 1 3-hour laboratory.

### 222 (II). VERTEBRATE FOSSILS AND EVOLUTION

Introduction to vertebrate history emphasizing fossil forms: changes in locomotory, feeding, and defense structures, nature of transitions between groups, stratigraphic uses of vertebrate fossils, and modes of life of extinct animals. Illustrated by museum specimens. Prerequisites, one semester of zoology, geology, or physical anthropology.

### 223 (I), (II). HISTOLOGY

Structure of cells, tissues, and organs as related to function; emphasis on the mammal; introduction to microtechnique. Prerequisite, ZOOL 101 or 240. 2 class hours, 1 ZOOL 3-hour laboratory.

### 227 (II). EMBRYOLOGY

A survey of embryonic development from a combined descriptive, comparative, and analytical point of view. Laboratories deal with descriptive and comparative phases of ontogeny, especially of amphibia, birds, and mammals. 2 class hours. 1 3-hour laboratory. Prerequisite, ZOOL 101 or 240.

### 230 (I). SYSTEMS OF THE HUMAN BODY

Lectures present a detailed and integrated study of human anatomy and physiology. Laboratories deal with functional properties of the human organism and are supplemented by exercises in gross anatomy of the cat and rat. Designed for students in Medical Technology and Public Health; others must have instructor's permission. Prerequisites, CHEM 112, ZOOL 101. 3 class hours, 1 3-hour laboratory.

Credit, 4.

### 240 (I), (II). PRINCIPLES OF GENETICS

(Same as BOTANY 240). Mechanisms of heredity in plants and animals, emphasizing transmission and action of genes, population genetics, and evolution. Not open to students who have passed ZOOL 145. Prerequisites, CHEM 111, one semester of Biological science.

### 243 (II). INTRODUCTORY POPULATION BIOLOGY

An evolutionary and integrated introduction to the demographic, ecological, genetic, and geographic aspects of the biology of populations. Consideration of social implications and utility. Background in probability theory, statistics, and mathematical and numerical modelling. Prerequisites, ZOOL 145 or 240 or equivalent, and 1 semester of mathematics. 2 class hours and 1 2-hour period for discussion and problem solving.

### 275 (II). BIOLOGY OF PROTOZOA

Morphology and physiology of protozoa, with emphasis on contributions made to basic problems of biology through study of these organisms. Prerequisites, ZOOL 101 or 240, 2 additional laboratory courses in biological sciences, CHEM 262. 1 class hour, 1 2-hour and 1 3-hour laboratory.

### 281 (I), 282 (I), (II). BIOLOGY OF THE INVERTEBRATES

Ecology, physiology, development and phylogeny of invertebrate animals. Protozoa, Cnidaria, Platyhelminthes, Nematoda, Mollusca, etc. covered in 281; Annelida, Arthropoda, Echinodermata, etc. covered in 282. Either course may be elected independently. Prerequisite, ZOOL 101 or 240. 2 class hours, 1 3-hour laboratory.

### 283 (I). GENERAL PARASITOLOGY

Morphology, life cycles and physiology of protozoan and helminth parasites, with emphasis on broad aspects of parasitism. Prerequisites, ZOOL 101 or 240, CHEM 112 or 114. 2 class hours, 1 3-hour laboratory.

### 285, 286 (I), (II). TOPICS IN ZOOLOGY

Occasional offerings on a variety of zoological topics. Consult the department for current offerings.

Credit, 1-6.

### 300 (I). VERTEBRATE ZOOLOGY

Morphology and biology of recent vertebrates with emphasis on freshwater fishes, amphibians and reptiles. Laboratories combine descriptive and analytical summaries of the major groups represented in North American fauna. Prerequisites, ZOOL 101 and 240. 1 class hour, 2 2-hour laboratories.

### 302 (II). ICHTHYOLOGY

Structure and function of fishes, particularly marine teleosts and cartilaginous species; aspects of development, distribution, and adaptations to aquatic habitats. Laboratories consider anatomy, diversity, and biological bases for classification of principal taxa. Prerequisite, ZOOL 221 or 300. 2 class hours. 1 3-hour laboratory.

### 306 (II). ORNITHOLOGY

An introduction to avian biology for majors in the biological sciences. Emphasis on structure, function, classification, and behavior. Prerequisite, ZOOL 221 (preferred) or 300. 2 class hours, 1 3-hour laboratory.

### 308 (II). MAMMALOLOGY

Evolution, distribution, classification and ecology of mammals. Laboratory includes field trips, preparation of study material, and identification of local fauna. Prerequisite, ZOOL 221 or 300. 2 class hours, 1 3-hour laboratory.

### 335 (II). LIMNOLOGY

The physical and chemical properties of inland waters and the relationships between these properties and the biota. Models of nutrient cycles are used to quantify these relationships. Prerequisites, CHEM 112 and Junior standing. 2 class hours, 1 3-hour laboratory.

### 337 (I). ECOLOGY

Introduction to descriptive and theoretical ecosystems, community, population, and

## Social and Behavioral Sciences

behavioral ecology. The laboratory emphasizes ecologic principles and techniques. Prerequisites, ZOOL 101 or 240, MATH 128, one semester of invertebrate zoology, preferably ZOOL 282. 2 class hours, 1 3-hour laboratory.

### 350 (I). ANIMAL BEHAVIOR

The biological bases of animal behavior. Analysis of the methods and objectives of current research. Prerequisite, ZOOL 101 or 240, and PSYCH 101 or 250.

### 360 (I), (II). CELL PHYSIOLOGY

Modern trends in physiology with emphasis on chemical and physical properties of cells including cell ultrastructure and metabolism, permeability, muscle contraction and molecular biology. BIOCHM 220 or 223. 2 class hours, 1 3-hour laboratory.

### 366 (I). VERTEBRATE PHYSIOLOGY

Function of organs and organ systems in vertebrates. Not open to students who have passed ZOOL 135. Prerequisite, ZOOL 360 or BIOCHM 220 or 222 or 223. 2 class hours, 1 3-hour laboratory.

### 370 (II). COMPARATIVE PHYSIOLOGY

Physiological principles involved in adaptations of animals to their environment; laboratory emphasis on experimental methods used to study adaptive mechanisms. Prerequisite, ZOOL 360. 2 class hours, 1 3-hour laboratory.

### 380 (I), (II). DEVELOPMENTAL BIOLOGY

Physiological and biochemical aspects of development. Laboratory includes seminars, discussions, and experimental work. Prerequisites, BIOCHM 222 or 223, ZOOL 360. 2 class hours, 1 3-hour laboratory.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

Note: Summer courses such as Invertebrate Zoology, Invertebrate Embryology, and Marine Ecology taken at the Marine Biological Laboratory, Woods Hole, Massachusetts or study at the University's Nantucket Island Field Station or other biological field stations will be awarded 3 to 6 credits upon certification of satisfactory achievement in 6 to 12 weeks of study.

## Anthropology

Chairman of Department: Associate Professor Donald A. Proulx. Professors Fraser, Halpern, Pi-Sunyer, Salzmann and Woodbury; Associate Professors Armelagos, Cole, Hudson and Munn; Assistant Professors Dincauze, Faulkingham, Forman, Fortier, Morbeck and Wobst; Visiting Associate Professor Thomas; Visiting Assistant Professor Swedlund.

Anthropology majors must take ANTH 104 and one other of the following introductory courses: 102, 103, or 105. They should also take at least one other course in the social and behavioral sciences (either Sociology, Economics, Political Science or Psychology.) All majors must elect a minimum of 30 credits in Anthropology, with at least 21 of these credits chosen from courses above the 100 level. The maximum acceptable credits in Anthropology is 45. Students choosing Anthropology as a major are also required to take a course in quantitative methods selected from a list available from the department. Under special circumstances, and with the advisor's approval, an Anthropology major may be allowed to substitute as part of the departmental requirements non-duplicating Anthropology courses given at another of the Five-College Cooperative institutions. Transfer students must take a minimum of 15 credits of their Anthropology requirement from our department.

### 102. INTRODUCTION TO ARCHAEOLOGY (D)

The history, methods and theory of archaeology, with an outline of the main characteristics of the prehistoric record throughout the world. 2 lecture meetings, 1 discussion and/or demonstration section.

### 103. INTRODUCTION TO PHYSICAL ANTHROPOLOGY

Human evolution, human variation, racial classifications, racism, and modern theories of variation.

### 104. INTRODUCTION TO CULTURAL ANTHROPOLOGY (D)

Social and cultural anthropology dealing with variations among societies in technology and economics, social and political organization, art, religion, and ideology.

### 105. INTRODUCTION TO LINGUISTIC ANTHROPOLOGY

Survey of the role and contributions of linguistics in anthropology. Biological foundations of language; the process of communication; language structure; linguistic ontogeny, phylogeny, and prehistory; the principle of linguistic reality; and other topics.

### 204. THE ORIGINS OF ANCIENT CIVILIZATIONS (D)

A critical analysis of the archaeological data

and theories pertaining to the origins and rise of civilizations in the Old World and the New. Prerequisite, ANTH 102 recommended.

### 220. RESEARCH TECHNIQUES IN PHYSICAL ANTHROPOLOGY; SKELETAL ANALYSIS

Methods for excavating and analyzing human skeletal material with emphasis on sexing and aging techniques. Problems of growth and development and in pathology. 2 2-hour labs.

### 228. IMAGES OF U.S. INDIANS

Some of the ways in which U.S. Indians have been perceived by social scientists, federal and other officials, "do-gooders" and novelists, from the 18th to the 20th centuries. Students expected to read extensively in areas of their personal choice; books to be selected from a long bibliography. No prerequisites; open to non-majors.

### 234. PRIMITIVE ART

A survey of the cultural and aesthetic aspects of the visual arts of primitive societies in sub-Saharan Africa, Oceania, and North America. Emphasis on the function and meaning of art in society.

### 236. ARCHEOLOGY OF MESOAMERICA

The growth of civilization in Mexico and Central America from its earliest antecedents to the Spanish Conquest, based on archeological research. Prerequisite: ANTH 102 or permission of instructor.

### 238. CULTURE AND SOCIETY IN MESOAMERICA

The Mesoamerican culture area from the Spanish Conquest to the present day. Traces the evolution of contemporary Mesoamerican cultures and examines the nature of Mesoamerican pluralism and socio-cultural integration.

### 252. RURAL AND PEASANT SOCIETIES (D)

Rural and peasant societies from the standpoint of their population and institutions, their emerging needs, and their relation to mass society. Prerequisite, SOCIOL 101 or ANTH 104

### 255. PRE-INDUSTRIAL TECHNOLOGY

Analysis of selected aspects of the material culture of simpler societies, both past and present, in relation to social and economic aspects of culture. Prerequisite, ANTH 102 or 104.

### 260. PEOPLES OF EUROPE: EASTERN EUROPE AND THE U.S.S.R. (D)

A survey of the peoples and cultures of Eastern Europe; emphasis on the Slavic peoples as well as upon those cultures transitional between Europe, the Middle East and Asia from their prehistoric origins to the period of their modernization, stressing the role of peas-

antries and nomads with their changing ecological adaptations. Prerequisite, ANTH 104.

**261. PEOPLES OF EUROPE: THE WESTERN MEDITERRANEAN (D)**

A survey of the peoples and cultures of Mediterranean Western Europe. Emphasis on the historical span from the crystallization of distinct national cultures to the present.

**263. URBAN ANTHROPOLOGY**

Using as a point of departure the current urban condition, the origins and evolution of cities are explored in a cross-cultural framework. Emphasis on the nature of rural-urban relationships and how these have changed over time.

**265. PEOPLES OF EUROPE: CENTRAL EUROPE (D)**

Anthropologically oriented examination of the culture of Central Europe, with particular emphasis on Czech culture: geographic, historical and demographic background; survey of folk culture and folklore; languages and beginnings of literary tradition; major developments in this century. Prerequisite, permission of instructor.

**267. PEOPLES OF EUROPE: ALPINE EUROPE**

Analysis of Alpine cultures from prehistoric through contemporary times. Cultural adaptation to environmental variation in mountainous zones and the interrelationship of mountain and low-land communities.

**269. CULTURES OF AUSTRALIA AND NEW GUINEA (D)**

The ethnography of aboriginal Australia and New Guinea with emphasis on the particular problems of theory and analysis that have concerned anthropologists studying these areas. Prerequisite, ANTH 104.

**270. CARIBBEAN CULTURES**

An ethnographic survey of the societies of the Greater and Lesser Antilles, emphasizing the interaction of European colonial and African cultures both historically and in respect to present economic and political problems.

**315. PRIMATE ANATOMY**

Structure and phylogeny of primates (prosimian, monkey and ape) with emphasis on evolutionary trends leading to man. Laboratory work provides experience in dissection. Prerequisites, ANTH 103, ZOOL 101 or equivalent. 2 class hours, 1 -3 hour laboratory period.

**316. PRIMATE EVOLUTION**

Survey of primate evolution, including the evolutionary history of the prosimians, monkeys, apes and man, with emphasis on the diversification of apes and the origin of man.

**317. PRIMATE BEHAVIOR**

Emphasizes the adaptive behavioral complexes in field and laboratory studies of the four living grades of primates: prosimians, monkeys, apes and man. Special aggression, etc., considered.

**320. ECONOMIC ANTHROPOLOGY**

Surveys the patterns of production, distribution and consumption in traditional societies as well as the social and political matrices of these patterns. Alternative theoretical approaches to selected problems in economic anthropology.

**321. PREHISTORIC CULTURAL ECOLOGY**

Analysis of cultural ecological approaches to the interpretation of the prehistoric record. Prerequisite, permission of instructor.

**325. THE ANALYSIS OF MATERIAL CULTURE OF THE HISTORIC PERIOD**

The methods and techniques of analysis of temporal and spatial distributions, technology, and spatial interrelationships of several forms of material culture. Special attention to the relationships between material and non-material culture. Emphasis on historic period materials, but some prehistoric data is included. Recent contributions of ethnoarchaeologists.

**330. SOCIAL ORGANIZATION OF IMPERIALISM**

Analysis of the varieties of social relations between industrial societies and non-industrial areas of the world. Special attention to the development of Western imperialism on Africa, Asia and the Western Hemisphere and to the patterns of resistance, accommodation and rebellion that have developed in response.

**333. KINSHIP AND SOCIAL ORGANIZATION**

Designed to acquaint the student with basic conceptual tools and problems in this field. Principles of social organization such as kinship, descent, ranking, etc., examined with reference to individual societies and general theory.

**335. NATIVE AMERICAN LANGUAGES**

A survey of American Indian languages, primarily north of Mexico, Genetic classifications and Sapir's classification based on structural resemblances between language families. Type of linguistic structure and structural restatements. Comparative work and reconstructions. Prerequisite, ANTH 105 or permission of instructor.

**336. POLITICAL ANTHROPOLOGY (D)**

Anthropological approaches to the study of politics in representative bands, tribes, and states, Evaluation of several analytic stances

through reading and discussing relevant political anthropological literature.

**338. ANTHROPOLOGY OF LAW AND CONFLICT (D)**

A comparative cross-cultural analysis of judicial institutions, socio-cultural sources and patterns of conflict and conflict resolutions, and the social functions of law and of legal institutions.

**340. RELIGION AND RITUAL (D)**

Classical problems in the anthropology of religion from Durkheim and Tylor to Evans-Pritchard, Levi-Strauss and Lloyd Warner. Special attention to the analysis of ritual. Prerequisite, ANTH 104 or permission of instructor.

**354. JUDAIC ETHNIC GROUPS: A CROSS-CULTURAL PERSPECTIVE**

An ethnographic survey of Judaic ethnic groups, mainly since the 18th century. Concerned mainly with groups, in Eastern Europe, Israel, North America and to a lesser extent Western Europe, North Africa and Asia. Stress on changing patterns of ethnic identity and the interaction between religious tradition and culture change.

**360. LANGUAGE IN CULTURE AND SOCIETY**

The relationship between language and culture and between language varieties and social structure. Prerequisite, ANTH 105 or permission of instructor.

**362. ORAL FOLKLORE IN NONLITERATE SOCIETIES**

Introduction to the ethnography of oral folklore. Topical emphasis on the analysis and function of tales; geographic analysis of Africa and North America.

**363. LINGUISTIC ANTHROPOLOGY: COMPARATIVE DIMENSION**

The methods and interpretations of comparative linguistic analysis in the field of anthropology. Prerequisite, ANTH 105 or permission of instructor.

**364. PROBLEMS IN ANTHROPOLOGY (D)**

Examination of selected problems in physical anthropology, archaeology, social and cultural anthropology. Illustrative material drawn from both nonliterate and peasant societies. Prerequisite, ANTH 104 or permission of instructor.

**365. WORLD ETHNOGRAPHY (D)**

Selected societies of Africa, the Americas, Asia and Oceania. Problems of comparing societies, especially with regard to their environmental contexts and levels of productivity. Prerequisite, ANTH 104 or permission of instructor.

**366. THE INDIVIDUAL AND SOCIETY (D)**  
Selected approaches to the interrelations of individual behavior and social patterns, with consideration of data on "Western" and "non-Western" societies. Prerequisite, ANTH 104 or permission of instructor.

**367. CULTURES OF AFRICA (D)**  
An extensive survey of the cultures of Africa, a comparison of their social, political, religious, and economic patterns, and toward consideration of the evolution and interrelationship of the cultures of the area. Prerequisite, ANTH 104 or permission of instructor.

**368. OLD WORLD PREHISTORY (D)**  
A survey of the prehistoric cultures of Europe, Asia, and Africa, with emphasis on the Paleolithic, Neolithic and early metal-using periods. Designed to give an understanding of the significant cultural developments in the Old World before the emergence of historic civilizations.

**369. NORTH AMERICAN ARCHAEOLOGY (D)**  
An intensive survey of American Indian prehistory north or Mexico. Emphasizes the historical development processes in selected geographical regions. Prerequisite, ANTH 102.

**370. NORTH AMERICAN INDIANS (D)**  
Indian tribes with various levels of technological development and social complexity, from areas north of Mexico, in terms of their environmental context and the impact of non-Indian societies on their cultures. Prerequisite, ANTH 104.

**371. HUMAN EVOLUTION**  
The mechanisms of evolutionary change, the fossil and archaeological evidence bearing on man's evolution, and an evaluation of the various interpretations of the evidence. Prerequisite, ANTH 103.

**372. HUMAN VARIATION**  
Description and analysis of qualitative and quantitative biological variation in and between human populations. Prerequisites, a course in Genetics (ZOOL 145 or 240) and an elementary course in statistics. ANTH 103, 371 recommended.

**373. CULTURES OF SOUTHEAST ASIA (D)**  
An introduction to the history and ethnography of the native cultures of Southeast Asia, including consideration of the peasant populations and their expanding role in the development of modern Southeast Asian states. Prerequisite, ANTH 104 or permission of instructor.

**374. CULTURES OF THE FAR EAST (D)**  
A survey of culture-history and ethnography of representative people of East Asia; peasant sub-cultures of traditional contemporary

China, Japan, and Korea. Prerequisite, ANTH 104 or permission of instructor.

**375. SOUTH AMERICAN ARCHAEOLOGY (D)**  
A survey of the pre-Columbian cultures of South America and their development, with emphasis on the Andean areas.

**376. SOUTH AMERICAN ETHNOLOGY (D)**  
An analysis of the colonial and contemporary cultures of South America with emphasis on Indian tribes. The interrelationship of Indian, European and Negro societies and their contributions stressed. Prerequisite, ANTH 104 or permission of instructor.

**377. SUMMER FIELD SCHOOL IN ARCHAEOLOGY**  
Practical experience and training in archaeology. Both prehistoric and colonial sites are excavated, and instruction given in archaeological methods and techniques. Prerequisite, ANTH 102 or equivalent and permission of instructor. Credit, 6.

**378. THEORY AND METHOD IN ARCHAEOLOGY (D)**  
An intensive examination into the scientific approach to modern archaeological research and the utilization of this approach for deriving and testing theories of prehistory and human behavioral patterns. Prerequisite, ANTH 102 or permission of instructor.

**379. CULTURAL DYNAMICS AND APPLIED ANTHROPOLOGY (D)**  
Theories of cultural process and their application to practical cross-cultural situations in administration, technical assistance and community development. Prerequisite, ANTH 104 or permission of instructor.

**380. FIELD COURSE IN CULTURAL ANTHROPOLOGY**  
A summer course affording the advanced undergraduate or graduate student supervised training in cultural anthropological research. Location varies from year to year. Prerequisites, advanced course work in Anthropology and permission of instructor. Credit, 6.

**381. QUANTITATIVE METHODS IN ANTHROPOLOGY**  
The interpretation and analysis of data from all fields of anthropology. Descriptive statistics, formulation and testing of hypotheses, correlation and regression. Discussion of current trends in the methodology of anthropological research.

**382. HISTORY OF ARCHAEOLOGY**  
Events, major sites, and men important in the development of archaeology during the 19th and 20th centuries. Theoretical and technical advances related to the present state of

archaeology emphasized. Prerequisite, ANTH 102 and permission of instructor.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**388, 389. READINGS IN ANTHROPOLOGY**  
Credit, 1-3

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Economics

*Chairman of Department:* Associate Professor Norman Aitken. Professors Barkin, Bowles, Holesovsky, Howard, Katzner, Kindahl, Morris, Rapping, Resnick, Rottenberg; Associate Professors Blackman, Cox, Gale, Gintis, Ray, Treyz, Wolff; Assistant Professors Best, Burghardt, Crotty, Duston, Edwards, Feltenstein, Humphries, Oaxaca, Tsao, Wright; Instructor Gordon.

Students planning to take one or two economics courses normally choose courses with numbers in the 100s. Those students who plan to take several economics courses normally take ECON 103 and then take courses in the 200s or 300s for which this is the required prerequisite.

Economics majors must take ECON 103, 104, 203, 204 and at least 12 additional credits of upper level courses (205 and above), other than special studies, seminar and independent study courses. All majors are required to pass one semester course in calculus from among MATH 127, 131, or 132 or the two semester sequence MATH 120, 121, Mathematics for Business Students. Normally economics majors do not take more than two courses with numbers in the 100's and only if a 100 course other than ECON 100, 103, 104 was taken before becoming an Economics major. In no case may more than three 100 courses be credited toward the major. Students who have taken ECON 100 may be given a waiver from ECON 103 or 104 on approval of the instructor and the Director of Undergraduate Studies. Students contemplating graduate study in economics or business administration are advised to take mathematics at least through two semesters of introductory calculus, linear algebra (MATH 167) and two semesters of statistics (preferably STATIS 231 and ECON 252).

With the exception of ECON 103 and 104, declared Economics majors may not elect any

Economics Department course on a pass/fail basis, nor may the required credits in mathematics be elected on a pass/fail basis. Students who become economics majors after previously passing one or more upper-division economics courses on a pass/fail basis must offer at least six graded upper-division economics courses (18 credits) for graduation.

#### On Honors

The Economics Department offers a wide range of Honors courses. ECON 103 and 104 have Honors sections each term. ECON 203 (I) and 204 (II), 251 (I) and 252 (II), are also offered with Honors sections. Check the course description guide for specific instructions regarding Honors registration each term.

Information about the study of Economics may be obtained by calling 545-0855 or visiting Thompson 1032.

#### 100 (I), (II). ELEMENTS OF ECONOMICS (D)

A one-semester introduction to economics. The elements of the discipline; how the economy is structured and how it functions.

#### 103 (I), (II). INTRODUCTION TO MICROECONOMICS (D)

Introductory analysis of resource allocation and income distribution through microeconomic theory. Specific problems illustrate the use of the theoretical precepts developed.

#### 104 (I), (II). INTRODUCTION TO MACROECONOMICS (D)

Theory of the behavior of the American economy. Emphasis on the goals of full employment, price stability, economic growth and balance of payments equilibrium.

#### 121 (I), (II). THE INTERNATIONAL ECONOMY (D)

An historical and analytical introduction to international institutions, trade, finance and policy. Current problems and recent developments treated extensively.

#### 131 (I), (II). THE ECONOMICS OF INSECURITY AND POVERTY (D)

Public and private programs to prevent or alleviate economic insecurity, including poverty, substandard incomes and economic contingencies.

#### 141 (I), (II). LABOR PROBLEMS (D)

Background of the labor movement and problems involved in the management-labor relationship and the efforts of management, unions and government to solve them.

#### 172 (I), (II). THE SOVIET ECONOMY (D)

Resource allocation through centralized planning in the Soviet economic system. A case history of economic development. Current problems of economic reform.

#### 181 (I), (II). ECONOMICS AND URBAN PROBLEMS (D)

The structure of the urban economy; goals, processes, problems, and policy in urban economic development.

#### 191, 192, (I), (II). SEMINAR FOR INTRODUCTORY STUDENTS (D)

A special topic, depending on appropriate staff and department approval, on petition of 15 students or recommendation by a faculty member.

#### 203 (I), (II). INTERMEDIATE MICROECONOMIC THEORY (D)

Microeconomic analysis of consumers, firms, industries, and markets; rational decision-making under conditions of certainty; balancing forces in a free enterprise economy. Prerequisite, ECON 103.

#### 204 (I), (II). INTERMEDIATE MACROECONOMIC THEORY (D)

Formulation and empirical testing of static and dynamic theories of aggregative income, employment, and prices with reference to fluctuations, growth, and economic forecasting. Prerequisite, ECON 103 and 104.

#### 205 (II). MARXIAN ECONOMICS (D)

Exposition of the Marxian economic theory in modern idiom. Comparison of methodological assumptions and conceptualization of economic phenomena in Marx and in "mainstream economics." Prerequisites, ECON 103 and 104.

#### 211 (I), (II). MONEY AND BANKING (D)

The development and operation of the monetary and banking systems of the United States; problems of achieving full employment and price stability through monetary controls. Prerequisite, ECON 104.

#### 231 (I), (II). SOCIAL CONTROL OF BUSINESS (D)

The formal and informal methods and efforts to maintain, supplement and moderate competition, and the substitution of regulation and public enterprises for competition. Prerequisite, ECON 103.

#### 232 (I), (II). THE STRUCTURE OF AMERICAN INDUSTRY (D)

Business enterprise, market competition, and economic development in American industries. The social effectiveness of industries analyzed through measures of industrial structure and market performance. Prerequisite, ECON 103 recommended, 203.

#### 242 (II). LABOR LAW AND LEGISLATION (D)

Economic effects and historical survey of Federal and state laws and an analysis of important court decisions. Prerequisites, ECON 141, or permission of instructor.

#### 251 (I). MATHEMATICAL METHODS IN ECONOMICS

The applications of various mathematical concepts and techniques in macroeconomic and microeconomic analysis. Emphasis on the design and interpretation of mathematical models of economic phenomena. Prerequisites, ECON 103, MATH 127, 135, or permission of instructor.

#### 252 (II). ECONOMETRICS

The application of mathematical and statistical methods to economic theory, applied to both microeconomic and macroeconomic policy issues. Prerequisite, permission of instructor.

#### 261 (I). EUROPEAN ECONOMIC EVOLUTION (D)

Evolution of economic organization in agriculture, industry and commerce; the surrounding social and institutional life. Prerequisites, HIST 100 and 101, or an economics course.

#### 262 (II). AMERICAN ECONOMIC HISTORY (D)

An analytical approach to structural change, economic growth, and the development of market institutions in the United States from colonial times to the present. Prerequisite, ECON 100 or 103.

#### 266 (I). ECONOMIC DEVELOPMENT (D)

Economic problems of underdeveloped countries and the policies necessary to induce growth. Individual projects required. Prerequisite, ECON 100 or 103 or 104.

#### 267 (II). LATIN AMERICAN ECONOMIC DEVELOPMENT (D)

The economic systems of Latin America. Emphasis on the structural problems of export oriented economies and a historical comparison of development strategies. Prerequisite, ECON 266 or permission of instructor.

#### 270 (I), (II). ECONOMICS OF SOVIET PLANNING (D)

Lessons of Soviet development strategy and central administrative planning for countries in search of models. Economic imperialism and foreign transactions in the context of East-West relations. Prerequisite, ECON 103.

#### 271 (I). COMPARATIVE ECONOMIC SYSTEMS (D)

Evaluation of the performance of alternative economic systems in theory and practice. Problems of planning in the advanced economies of the United States, Western Europe, and Soviet area. Prerequisite, ECON 103.

#### 281 (I). REGIONAL ECONOMICS (D)

The process of regional economic growth; location theory and basic techniques of regional analysis; public and private area development programs. Prerequisite, ECON 103 recommended.

**285 (I). ECONOMICS OF EVALUATION**  
An introduction to the methodologies used by economists in evaluating the impact of government programs and legislation. Prerequisite, ECON 103.

**306 (I). DEVELOPMENT OF ECONOMIC THOUGHT (D)**  
The evolution of contemporary theory from its classical beginnings; neoclassicism and its chief variants; dissenters Marx, German historical school, Veblen. Emphasis on relation of economic thought to other kinds of social theories. Prerequisite, ECON 103.

**312 (I). PUBLIC FINANCE (D)**  
Principles of public revenues and expenditures; systems and problems of taxation; use of taxes, expenditures, debt policy to provide full employment; economic growth and price stability. Prerequisites, ECON 103 and 104.

**314 (II). STATE AND LOCAL PUBLIC FINANCE (D)**  
State and local government revenue and expenditure programs. Individual research projects relating to Massachusetts or surrounding states required. Prerequisite, ECON 100 or 103.

**321 (II). INTERNATIONAL MONETARY THEORY AND POLICY (D)**  
Explanations of the causes and consequences of international flows of products, capital and labor, emphasis on monetary categories including the balance of payments and adjustment mechanisms. Prerequisite, ECON 103, 104, or 204.

**322 (II). INTERNATIONAL TRADE AND ECONOMIC POLICY (D)**  
Intermediate theory of international trade, including the analysis of the balance of payments mechanism, pure non-monetary theory and its application to problems of commercial policy. Prerequisites, ECON 203 and 321.

**338 (II). ECONOMICS OF HEALTH (D)**  
Application of economic theory to resource allocation in the health services industry. Survey of performance of this industry as measured by costs and various health indices. Market failure in health care. Alternative delivery systems. Prerequisite, permission of instructor.

**345 (II). HUMAN RESOURCE ECONOMICS (D)**  
Analysis of private and social means for providing access to higher education, medical care and an improved environment. Barriers to the achievement of these ends. Priorities in human resource policy. Prerequisite, ECON 103.

**347 (I). ECONOMICS OF THE LABOR MARKET (D)**  
Microeconomic analysis applied to the conceptualization of labor market phenomena. Topics include labor supply, human capital, wage structure, and unemployment. Introduction to labor market data and empirical analysis. Prerequisite, ECON 203.

**372 (I). NATIONAL ECONOMIC POLICIES OF ADVANCED EUROPEAN COUNTRIES AND PROGRAMS**  
Evaluation of economic policy and decision-making mechanisms in the United States, Norway, Sweden, Netherlands, United Kingdom and Canada and other advanced non-socialist countries students may select. Prerequisites, ECON 103 and 104.

**382 (II). URBAN ECONOMIC ANALYSIS (D)**  
Analysis of current urban problems, their causes, and alternatives for improvement in the future. Topics include urban public finance, location theory, land use, housing, transportation, and the environment. Prerequisite, ECON 103.

**383 (I), 384 (II). TOPICS IN APPLIED ECONOMICS (D)**  
Application of principles of micro-economics to diverse problems and policies to exhibit the uses of economic theory. Prerequisite, ECON 103.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**391 (I), 392 (II). SEMINAR**  
Research in economic theory, problems of labor, commerce, and industry. If desirable, some other economic study may be substituted. Prerequisite, ECON 103. Credit, 1-3.

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**RELATED COURSES:**  
**Agricultural and Food Economics**  
352. Agricultural Policy  
373. Resource and Conservation Economics  
381. International Agricultural Development

**Political Science**  
Acting Department Head: Professor Lewis Mainzer. Professors Alfange, Allen, Booth, Braunthal, Connolly, Dolbeare, Feit, Fenton,

Fliess, Goldman, Gordon, Houn, Howards, Lederle, Lewy, Maki, Oppenheim, Syed, Wiarda; Associate Professors Coulter, Friedman, Gere, King, Kramer, Meo, Mileur, Ryavec, Shanley, Sulzner; Assistant Professors Eagan, Einhorn, Elshain, Ford, Kline; Lecturer Reid.

Political science majors are required to take two of the three introductory courses (POL SCI 101, 131, or 151), which ordinarily is done in the freshman year. Normally, majors select their first two upper-division courses from among those numbered 200 to 249. Complete information concerning the political science major may be obtained in room 218 of Thompson Hall.

**101 (I), (II). AMERICAN POLITICS (D)**  
Introduction to constitutional principles and public policy making in American national government. Democratic theory, major national political institutions, electoral behavior, and selected public policy questions.

**131 (I), (II). COMPARATIVE POLITICS (D)**  
Introduction to political structures, processes and comparative national development in parliamentary, one-party, and other political systems. The relationship of cultural values to institutions; emphasis on such forces of change as democracy, industrialization, and revolution.

**151 (I), (II). WORLD POLITICS (D)**  
Introduction to the nature, dynamics, and problems of world politics. Nationalism, ideology, and other forces underlying the foreign policies of the United States, the Soviet Union, and other states, as illustrated by selected contemporary issues.

**205 (I), (II). THE PRESIDENCY IN AMERICAN GOVERNMENT (D)**  
Constitutional and political aspects of the presidency in legislation, administration and conduct of foreign and military affairs. Presidential personality and role as party leader emphasized.

**208 (I), (II). POLITICAL PARTIES AND ELECTIONS (D)**  
American political processes. Organization and functions of parties, voting behavior and elections, and effect of electoral politics on representative government.

**214 (I), (II). MUNICIPAL GOVERNMENT (D)**  
Survey of the structure, function, and politics of government in American municipalities.

**217 (I). MASSACHUSETTS POLITICS (D)**  
Analysis of the significant characteristics of Massachusetts politics as applied to political problems from an historical perspective with both a theoretical and a practical base. Field

work supplements readings, lectures, and discussions.

**219 (I), (II). STATE GOVERNMENT (D)**  
Organization, functions, and politics of American state governments. The role of the state in our federal system.

**223 (I), (II). PUBLIC ADMINISTRATION (D)**  
Organization of bureaucracy, bureaucratic life, constitutional position, and political role of governmental bureaucracy.

**226 (II). POLITICAL THEORY AND PUBLIC POLICY (D)**  
Evaluation of social policy in the United States. Emphasis on normative issues raised in controversies over selected cases of social and economic policy in the light of the main traditions of Western political thought and of recent work on the logical and ethical aspects of social choice.

**231 (II). POLITICAL DEVELOPMENT AND MODERNIZATION (D)**  
Comparative analysis of political change and development in the emerging nations.

**233 (I), (II). GOVERNMENT AND POLITICS OF THE MIDDLE EAST (D)**  
Review of the dynamics of the traditional Islamic political system and of the transformation of that system under the impact of Western penetration of the Middle East. Contemporary Middle East politics with special reference to Israel, Syria, Lebanon, and the UAR.

**235 (I), (II). GOVERNMENTS OF EAST CENTRAL EUROPE (D)**  
Survey of the major governments in the East Central European area; emphasis on the nature of Communist Party control. Governments include those of Czechoslovakia, East Germany, Hungary, Poland, Rumania, Yugoslavia, and others.

**238 (I), (II). GOVERNMENT AND POLITICS OF SOUTH AND SOUTHEAST ASIA (D)**  
Comparative study of the institutions and dynamics of government and politics in South and Southeast Asia, especially in India, Pakistan, Indonesia, and Malaysia. The issues of political stability, economic development, and relations with the United States and other great powers.

**239 (I), (II). WEST EUROPEAN COMPARATIVE POLITICS (D)**  
Analysis of the political cultures, institutions, systems and processes of selected West European countries. Emphasis on social and economic factors relating to contemporary political issues.

**240 (I). GOVERNMENT AND POLITICS OF SOUTH AMERICA (D)**  
Comparative analysis of the interest groups, political parties, and governmental institutions of the South American countries. Emphasis on the background and political culture in which Latin American politics and government take place.

**241 (II). GOVERNMENT AND POLITICS OF CENTRAL AMERICA AND THE CARIBBEAN (D)**  
Comparative analysis of the interest groups, political parties, and governmental institutions of the Central American and Caribbean countries. Emphasis on communism and the role of the U.S.

**242 (I). THE POLITICS OF SUB-SAHARAN AFRICA (D)**  
Organization and processes of African politics, centering on the general political problems facing contemporary African governments.

**243 (I), (II). COMPARATIVE AFRICAN GOVERNMENTS (D)**  
Comparative study of the political institutions and processes of five African states.

**248 (I), (II). GREAT BRITAIN AND THE COMMONWEALTH (D)**  
The practice of parliamentary government in Great Britain and the Commonwealth countries. Emphasis on the development of the conception of the Commonwealth, the institutions through which it operates, and its role in contemporary world politics.

**254 (I), (II). INTERNATIONAL RELATIONS (D)**  
The nation-state system and conceptions of national interest in modern world politics. Emphasis on forms and distribution of power, making of foreign policy, and adjusting of international conflict.

**255 (I), (II). AMERICAN FOREIGN POLICY (D)**  
Principles of American foreign policy. Emphasis on constitutional, political, and administrative considerations that influence the formation and execution of foreign policy.

**258 (II). INTER-AMERICAN RELATIONS**  
Analysis of the effect of the United States — government, business, labor and other groups — on the internal politics and economics of the Latin American countries.

**260 (I), (II). CONSTITUTIONAL LAW (D)**  
Study of the United States Supreme Court and leading cases interpreting the United States Constitution.

**261 (I), (II). THE LAW AND PRACTICE OF CIVIL LIBERTIES (D)**  
Development in American Constitutional law of the concept of civil liberty, including free speech and religion, fair trial, and race discrimination.

**270 (I), (II). ANCIENT AND MEDIEVAL POLITICAL THOUGHT (D)**  
Development of political thought and its relation to culture and institutional growth from the time of the Greeks to the end of the Middle Ages.

**271 (I), (II). MODERN POLITICAL THOUGHT (D)**  
Development of political thought and its relation to cultural and institutional growth from the rise of the modern state to the present.

**274 (I), (II). PROBLEMS IN POLITICAL THOUGHT (D)**  
An analysis of central concepts and themes in political theory. Major orientations in both classical and contemporary thought.

**281 (II). THE PRACTICE OF AMERICAN POLITICS**  
Practical American politics, taught by a prominent political leader under the University Distinguished Professorship in Public Affairs. Credit, 2.

**283 (I), (II). GOVERNMENT SERVICE**  
Full time professional experience in an agency of government. Papers and seminars required. Open to selected students by arrangement.

**285 (I), (II). LEGISLATIVE INTERNSHIP**  
Directed studies in legislative politics arranged in conjunction with government internship. Open to selected students by arrangement.

**286 (I), (II). ADMINISTRATIVE INTERNSHIP**  
Directed studies in administrative politics arranged in conjunction with government internship. Open to selected students by arrangement.

**287 (I), (II). JUDICIAL INTERNSHIP**  
Directed studies in judicial politics arranged in conjunction with government internship. Open to selected students by arrangement.

**288 (I), (II). LOCAL GOVERNMENT INTERNSHIP**  
Directed studies in local politics arranged in conjunction with government internship. Open to selected students by arrangement.

**289 (I), (II). FOREIGN AFFAIRS INTERNSHIP**  
Directed studies in international politics arranged in conjunction with government internship. Open to selected students by arrangement.

**303 (I), (II). AMERICAN POLITICAL THOUGHT (D)**

Development of American political thought from colonial times to the present.

**305 (I), (II). CONGRESS AND THE LEGISLATIVE PROCESS (D)**

Analysis and evaluation of the United States Congress, its structure, procedures, and norms. Emphasis on the legislative process and the behavior of Representatives and Senators; the relationship between Congress and the President and the Public.

**307 (II). BLACK POLITICS (D)**

Theoretical and historical analysis of the relationship of Black people to the American political system. Emphasis on the development of Black ideologies, political organizations and strategies, and on alternative forms of participation in the American political system.

**308 (II). PUBLIC OPINION IN POLITICS (D)**

Analysis of opinion and communication as aspects of the political process. Emphasis on communication through the mass media.

**311 (II). AMERICAN FEDERALISM (D)**

The American system of federalism as it has developed and changed from the early days of the Republic to the present; emphasis on the shift from a legal to a programmatic orientation and an emerging complex of inter-governmental relations.

**314 (I), (II). METROPOLITAN POLITICS (D)**

Problems of metropolitan areas; actual and possible political approaches to their solution. Emphasis on the role of parties, the development of political leadership, existing political institutions, and pressure group activity. Prerequisite, POLSCI 208.

**316 (II). COMPARATIVE LOCAL GOVERNMENT (D)**

The formal institutions of government and patterns of political behavior characteristic of cities and related local units of government in a variety of nations. Focus on common urban problems, communist participation, and decision-making.

**320 (I), (II). GOVERNMENT OF BUREAUCRACIES (D)**

Inquiry into the meaning and possibility of "democracy" within large-scale organizations.

**323 (II). PUBLIC PERSONNEL ADMINISTRATION**

The personnel function in bureaucracy: patronage and merit; career service and political executive; authority and informal organization; employee rights and collective action.

**324 (II). ADMINISTRATIVE LAW (D)**

Governmental activities in the regulation of industry, agriculture, and labor. Emphasis on the legal framework within which these activities operate.

**326 (I), (II). AMERICAN PUBLIC POLICY**

Analysis of selected areas and problems in public policy making in the American political system. Topics regularly offered: environmental policy, educational policy, higher education policy, social policy, economic policy, science policy.

**327 (I). COMPARATIVE PUBLIC POLICY (D)**

Comparative analysis of policy formation. Emphasis on the process of social and economic policy decision-making in selected industrial societies; the interaction of institutions, ideas, and power in decisions concerning social welfare, economic planning, and related policy areas.

**334 (II). GOVERNMENT AND POLITICS OF JAPAN (D)**

Government and politics of modern Japan; emphasis on post-1945 period. Descriptive analysis of structure and function of governmental and political processes.

**336 (I), (II). GOVERNMENT AND POLITICS OF THE SOVIET UNION (D)**

Historical and ideological influences on Soviet politics; the interconnection of social and political institutions and processes; membership, organization, and operation of the Communist Party; the state structure and law; and contemporary Soviet foreign policy.

**337 (I), (II). GOVERNMENT AND POLITICS OF CHINA (D)**

An analysis of the genesis and dynamics of the Chinese Communist movement, the ideology and organization of the party and the government, and major domestic and foreign policies since 1949; special reference to the Maoist attempts to reform man and society as well as to achieve modernization.

**340 (II). GOVERNMENT AND POLITICS OF SPAIN AND PORTUGAL (D)**

An examination of the unique aspects of the process of political development (and/or decay) in Spain and Portugal, with emphasis on the heritage of these two nations as reflected in their New World colonies in the Americas and on the present-day pattern of politics in the Iberian peninsula.

**347 (I), (II). ARMED FORCES AND POLITICAL POLICY (D)**

Comparative study of civilian-military relations in Western and non-Western nations. Emphasis on both regular and irregular armed forces.

**350 (II). SOVIET FOREIGN POLICY (D)**

Analysis of continuity and change in Soviet perceptions, goals, methods, and priorities in foreign policy. Emphasis on the period since World War II.

**351 (II). CHINESE FOREIGN POLICY (D)**

Examination of the geographical, historical, ideological, economic, military, and other factors in Peking's foreign policy since 1949. Emphasis on mainland China's relations with various countries and her positions on major international issues.

**356 (II). INTERNATIONAL LAW (D)**

The origin, character, and function of international law. Prerequisite, POLSCI 254 or HIST 211.

**357 (II). INTERNATIONAL ORGANIZATION (D)**

International organization in the 20th century. Emphasis on the United Nations and regional organizations. Prerequisite, POLSCI 254 or HIST 211.

**358 (I). INTERNATIONAL RELATIONS: ASIA (D)**

Introduction to general problems of Asian international relations since 1859, with detailed examination of problems since World War I. Emphasis on China, Japan, and the new nations.

**359 (I). WESTERN EUROPEAN FOREIGN POLICIES (D)**

Analysis of the emerging institutional patterns of the West European communities. Emphasis on the major political, military, and economic regional organizations and their relations with Eastern Europe and the United States.

**362 (I), (II). POLITICS, LAW AND JUDICIAL BEHAVIOR (D)**

American court systems; the processing of cases, judicial backgrounds and selection, judicial decisional behavior, some major court policies and the responses to them from groups and institutions within the larger political system.

**371 (I). FEMINIST POLITICS AND POLITICAL THEORY**

Sex as a category for analysis in classical and contemporary political theory. Relations between the sexes in relation to the larger social and political functions they serve.

**373 (I). HUMAN NATURE AND POLITICS (D)**

The role of the individual in the political process and especially with the problem of political perception, the way in which symbols structure reality, and the use of symbols to maintain stability or effect change in the political system.

**375 (I). QUANTITATIVE POLITICAL ANALYSIS**

Introduction to basic applications of statistical techniques and reasoning to political data.

**378 (II). DEVELOPMENT AND PRACTICE OF SOVIET MARXISM**

The philosophic and religious origins of Soviet Communism in Western and Eastern Europe. Analysis of the classics from Marx to Khrushchev.

**380 (I), (II). TUTORIAL IN AMERICAN POLITICS AND LAW**

Directed readings on announced topics in American national government, politics, and public law.

**381 (I), (II). TUTORIAL IN STATE-LOCAL POLITICS AND PUBLIC ADMINISTRATION**

Directed readings on announced topics in state and local government and politics and public administration.

**382 (I), (II). TUTORIAL IN COMPARATIVE POLITICS**

Directed readings on announced topics in comparative government and politics and area studies.

**383 (I), (II). TUTORIAL IN INTERNATIONAL RELATIONS**

Directed readings on announced topics in international relations and foreign affairs.

**384 (I), (II). TUTORIAL IN POLITICAL THEORY**

Directed readings on announced topics in political theory, analysis, and methodology.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**391, 392. SEMINAR**

Special problems in the study of politics.

**393 (I). SENIOR HONORS SEMINAR**

Seminar for senior honors students on the study of politics. Prerequisite, invitation from the Departmental Honors Committee and concurrent enrollment in POLSCI 399.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Communication Studies**

Chairman of Department: Associate Professor Kenneth L. Brown. Professors Bevilacqua, Blankenship, Lynch, Reid, Stelzner; Associate Professors Matlon, Meyer, Pearce, Savereid, Shelby; Assistant Professors Bacal, Bryant, Conville, Cronen, Davis, Harper, Johnson, Mihevc, Price, Stromgren; Instructor Stevens.

Students wishing to major in Communication Studies are encouraged to visit the main office of the department in Machmer Hall to secure specific information concerning concentration in 1) Interpersonal Communication and Rhetoric, 2) Mass Communications and 3) Communication Education.

**GENERAL**

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**INTERPERSONAL COMMUNICATION AND RHETORIC**

**160. THE ART OF RHETORICAL DISCOURSE**

The history, theory, and practice of rhetoric, as an affective mode of eloquence and as a conceptual frame of reference underlying expression in its several forms, verbal and graphic.

**170. THE PROCESS OF COMMUNICATION**

The process and functions of communication in the two-person, small-group, and public contexts. Topics include: outcomes of communication, development of a model of interpersonal communication, learning theory, person perception, interpersonal attraction, language and nonverbal messages. Emphasis on increasing competence as a communicator in each of the contexts.

**201. ADVANCED PUBLIC SPEAKING**

Practical communication. For students who want to go beyond the General Rhetoric Program in developing their ability to communicate ideas. Emphasis on one-to-group communication.

**202. SMALL GROUP COMMUNICATION**

The theory and process of small group communication. Practical application to group discussion; leadership; and problem solving.

**203. ARGUMENTATION**

Reasoning and evidence as used in public deliberation. Application to the building and refuting of arguments.

**204. PERSUASION THEORY**

How attitudes are formed and changed through speech communication. An appropriate ethic of persuasion in today's society.

**205. CLASSICAL RHETORICAL THEORY (C)**

Major rhetorical theories from the emergence in ancient Greece to the Late Roman Empire. Special emphasis is given to the Sophists, Plato, Aristotle, Hermagoras, Cicero, Quintilian, and St. Augustine. Prerequisite, permission of instructor.

**207. RHETORIC AND SOCIAL CHANGE IN AMERICA (D)**

A survey of the rhetorical strategies of various American social movements such as the American Revolution, the populist movement and the civil rights movement.

**210. INTERPERSONAL COMMUNICATION**

Nature and effects of person-to-person speech communication. Emphasis on the behaviors of everyday verbal and non-verbal communication that produce effects on ourselves, others society and future communication. The relationship of interpersonal to public communication.

**211. CONTEMPORARY RHETORICAL THEORY (D)**

Contemporary philosophical approaches to rhetorical theory. Selected major contemporary theorists such as Weaver, Richards, Burke, Duncan, McLuhan, and Perelman.

**212. PARLIAMENTARY PROCEDURE**

The basic principles upon which a group operates using parliamentary law and practical drill as the class organizes itself into an operating parliamentary body.

**250. SPEECH AND LANGUAGE THEORY (D)**

The nature of speech and language and the process involved in acquiring, understanding and producing speech and language.

**303. DEBATE PRACTICUM**

The preparation of materials on current debate propositions and participation in audience debates and in intercollegiate and intramural tournament activity. Credit, 1. May be repeated up to 4 credits.

**309. RHETORIC AND SOCIETY: SPECIAL TOPICS**

Intensive examination of the rhetorical discourse of a particular period, movement, issue, genre or theme. Examples include the

rhetoric connected with racial controversies, populism, imperialism and anti-war movements, the American Revolution, revolutionary movements in other countries and religious reform. Topics change each semester. May be repeated for a total of 6 credits.

#### 314. APPROACHES TO RHETORICAL CRITICISM

Various approaches to rhetorical transactions: Historical, Formalist, Sociocultural, Psychological, and Archetypal.

#### 350. BEHAVIORAL RESEARCH IN COMMUNICATION

Introduction to research design and the practical problems in carrying out experimental and descriptive research in speech communication. Students will pursue research projects either individually or in groups.

#### MASS COMMUNICATIONS

##### 121. INTRODUCTION TO MASS COMMUNICATIONS (D)

Including history and development, structure, roles, and functions. Standards for evaluation of the mass media.

##### 123. MEDIA PRODUCTION

The basic processes by which media (radio, television, film) content moves from idea through the creative process to finished program and a limited practical application of these processes in the studio.

##### 223. THE PROGRAM PROCESS IN TELEVISION

The basic program process to television from original idea to finished program. Training and procedures involved in the technique of television production. Experience in creating and producing television programs. Evaluation of program forms. 2 class hours, 1 2-hour laboratory period.

##### 224. CREATIVE TELEVISION PRODUCTION/DIRECTION

Advanced theories of television production and direction; creation and production-direction of experimental program. Prerequisite, COMSTU 223 or 226. 2 class hours, 1 2-hour laboratory period.

##### 225. HISTORY AND DEVELOPMENT OF THE MOTION PICTURE

Evolution of the motion picture as an international art form and social force. Analysis of form, technique and impact of film. Selected screening of representative film styles and content.

##### 226. PRINCIPLES AND TECHNIQUES OF FILM MAKING

The theory and principles of film making for the motion picture theatre and television. Experience in writing, directing, editing and sound recording of films. Evaluation of film

techniques, form and content. 1 class hour, 1 4-hour laboratory period per week.

##### 227. FILM THEORY AND CRITICISM (C)

Basic theories of film communication; various film modes and structures. Development of bases for evaluation of films according to communicative and aesthetic values. Prerequisites, COMSTU 121 and 225.

##### 228. MASS MEDIA IN SOCIETY (D)

Mass media as a major force in the American society. Emphasis on cultural, economic, political and social effects. Prerequisite, COMSTU 121.

##### 229. BROADCAST NEWS AND PUBLIC AFFAIRS

Legal, ethical and practical considerations involved in selecting, preparing and presenting news broadcasts, news documentaries and other public affairs programming. Prerequisites, COMSTU 121 and 228. Field trips.

##### 232. BROADCASTING AND THE GOVERNMENT (D)

The role, function and effect of regulation on broadcasting. Prerequisites, COMSTU 121 and 228.

##### 359. POLITICAL COMMUNICATION: MEDIA & CAMPAIGNING

Diffusion of persuasive political communications through standard and created media. Examination of campaign techniques (i.e., research on issues and themes, electorate polling, thematic media approaches, campaign strategies) in campaign management and administration.

##### 391. PRO SEMINAR IN MASS COMMUNICATIONS

Analysis and discussion of major problems in the field of mass communications. Prerequisites, Written permission of instructor, senior standing, 18 hours in Mass Communication courses.

#### Sociology

Chairman of Department: Professor N. J. Demerath III. Professors Driver, Gordon, Hollander, Killian, Korson, Page, Park, Platt, A. Rossi, P. Rossi, Wilkinson, Yaukey; Associate Professors Anderson, Chevan, Chilton, Faulkner, Golden, Hewitt, Hollander, Hurn, Lewis, Manfredi, Mehta, Piedmont, Simpson, Sutton, Tausky; Assistant Professors Harris, Roof, Stokes, Tessler, Westcott, J. Wright; Instructor Key; Lecturer S. Wright.

The following prerequisites, required courses, and electives constitute the program for Sociology majors:

- I. The sociology major requires a minimum of 27 credits or nine courses distributed as indicated below. No major is permitted to

take more than a total of 36 credits or 12 total courses in sociology.

- II. Each major is required to take both SOCIOL 201 (Sociological Analysis I: Theories and Perspectives) and SOCIOL 202 (Sociological Analysis II: Data Collection and Analysis). These courses should be taken during the sophomore year as further preparation for the upper division courses to follow. At least one sociology course, preferably at the 100-level is a prerequisite for 201 and 202.

- III. In addition to 201-202, each major is required to take at least one upper division course (at the 210-level or above) in three of the following five core areas, and no more than three courses can be taken for credit toward the major in any one core area. The core areas include: A. Social Organization and Institutions; B. Social Issues and Policies; C. Demography and Urban Sociology; D. Social Psychology; E. Theory and Methods.

- IV. It is recommended that majors with special interest in a core area take a 300-level practicum in that area during their senior year. Sociology majors, especially those who are considering graduate studies, are strongly advised to take a statistics course, SOCIOL 282 (History of Sociological Theory) or 283 (Contemporary Theory), SOCIOL 295 (Quantitative Methods in Social Research) or 296 (Qualitative Methods in Social Research).

Since majors have a number of electives at the 210-level or above. It is essential that both majors and prospective majors consult early and often with their academic advisers in selecting their courses. This is particularly important for anyone planning graduate study, but is important for others as well. Questions regarding the program may be directed to Professor Wilkinson in Thompson 616.

##### 102. AGE, SEX, AND KINSHIP IN CONTEMPORARY SOCIETY (D)

Introduction to sociology with reference to the problems of growing up and growing old in the context of the contemporary family. Ranges from problems of youth and maturation to matters of old age and the sociology of death. Problems of sex roles; discussion of a wide variety of sexual relationships.

##### 103. SOCIAL PROBLEMS (D) (formerly 275)

The distribution and interrelationships among some types of deviance and disorganization; crime, mental disorders, addiction, suicide, family tension. Theories of causation; research projects.

##### 104. URBAN LIFE AND INDUSTRIAL SOCIETY (D)

Introduction to the sociological perspective, focused upon the nature and consequences of urban industrial society.

105. SELF, SOCIETY, AND

INTERPERSONAL RELATIONS (D)

Basic concepts, perspectives, and data in sociology via the approach of social psychology. The relationship between the individual, the group, and society. Topics include socialization, social roles, social interaction, dynamics of small groups, the self, attitudes, and language and communication.

106. RACE, SEX, AND SOCIAL CLASS:

INEQUALITY IN AMERICA (D)

The differential distribution of opportunities and rewards in society. The manner in which membership in a particular race, sex, or social class grouping may serve to increase or diminish opportunities to achieve positions of power, social prestige, economic security and psychological rewards.

107. CONTEMPORARY AMERICAN

SOCIETY (D)

A "first course" in sociology, with emphasis on contemporary American society. Current theories of how modern industrial societies are organized, applied to the American case. Among topics are: socialization in the contemporary American family; the American educational system; occupational composition of the American labor force; women in America; poverty and income distribution; race, religion, and ethnicity as factors in the American social structure; and the American political system.

108. SOCIOLOGY OF LEARNING:

PROBLEMS OF PERSONAL AND  
SOCIAL CHANGE (D)

Primarily for lower division students. The changing relationships between educational institutions and society in the modern world. Focus on educational institutions as status transmission and socializing agencies. Attention to educational ideologies which stress the importance of change in educational institutions.

201. SOCIOLOGICAL ANALYSIS:

THEORIES AND PERSPECTIVES

The most important varieties of contemporary sociological thought. Focus on the differing perspectives on and assumptions about human society which underlie contemporary sociological theories. The nature of theory in sociological research; the most important theoretical perspectives currently in use. Prerequisites: at least one other sociology course preferably at the 100-level.

202. SOCIOLOGICAL ANALYSIS II: DATA  
COLLECTION AND ANALYSIS

Introduction to methodology and research techniques in sociology. Quantitative and qualitative techniques including field research, interviewing, participant and laboratory observations, survey analysis, and sampling techniques.

222. SOCIOLOGY OF EDUCATION (D)

Social and economic interrelationships of education, stressing social class and social change. Attention to developing countries and minority people.

224. HIGHER EDUCATION IN AMERICA  
(D)

The organizational context within which college and post-graduate education takes place. Historical and international comparison, with review of the relevant discussions of individual development; higher education in its broader relationship to other human activities.

231. SOCIOLOGY OF AGING (D)

Aging as a social phenomenon in the United States and Massachusetts with emphasis on the elderly population. Topics include biological, psychological and social factors in the aging process, the demographic and ecological conditions of aging, the problem of retirement, and public policy and politics as they relate to old age.

233. POLITICAL SOCIOLOGY (D)

The relationships between the political and non-political institutions and values of society. The formal and informal aspects of the exercise of power, its social and cultural setting. Social movements; their appeal, ideology and social base. Extremism, pluralism and totalitarianism. Participation and pseudo-participation. The cults of personality, charisma and propaganda. The culmination of social conflict: coercion, its processes and techniques.

235. COLLECTIVE BEHAVIOR (D)

An analysis of the nature and process of collective behavior, including such topics as crowd behavior, rumor and communication, opinion and its formation, social movements, collective responses to deviance and other problematic forms of behavior, behavior in disasters, etc. Emphasis on the development of concepts and theories and their application to specific types and instances of collective behavior. Prerequisite: 100-level course in sociology.

241. SOCIOLOGY OF ATTITUDES,  
BELIEFS, AND VALUES (D)

Attitudes, beliefs, and values as social phenomena. The cognitive and evaluative processes which underlie and help to account for the variety of attitudes, beliefs, and values found within a society and which differ from society to society. Permission of instructor required.

242. SOCIOLOGY OF PARENTHOOD

A blending of sociological and social psychological concepts: parent-child relationships viewed historically, cross-culturally, and developmentally. Students develop projects of their own in such general areas as parent-

child relationships as interactive systems and the influence of children on the parents' development as adults.

243. SEX AND SOCIETY

A cross-disciplinary course. Human sexual behavior from a variety of perspectives, including psychology and physiological as well as sociological. Topics include development of sex and gender identity, the sexual act and myths about sexuality, cross cultural dimensions of sexual behavior, contraception and abortion, pregnancy and childbirth, sexual deviance, and population growth and policy.

246. SOCIAL MOVEMENTS (D)

Analysis of the structure, dynamics and significance of social movements, particularly in modern society. Political and religious movements. Emphasis on leadership, ideology, member commitment and control, and the opposition as they affect the career of a social movement.

247. ELEMENTARY STATISTICS

An introduction to principles and techniques with reference to application in sociology.

248. SOCIAL STATISTICS

Introduction to principles of multivariate techniques including sociology and related fields. Prerequisite, SOCIOL 247, equivalent, or permission of instructor.

249. OCCUPATIONS AND PROFESSIONS  
(D)

Comparative analysis of the social organization of occupations and careers. Emphasis on the process of client control, occupational mandate and autonomy, and career socialization.

250. DEVIANCE AND SOCIAL ORDER (D)

The relationship between deviance and the maintenance of social order. Sociological theories of individual and subcultural deviance. Emphasis on the role of agents and agencies of social control in the definition of categories of deviance and in the selection and treatment of deviants. Prerequisite: at least one other sociology course preferably at the 100-level.

251. URBAN SOCIOLOGY (D)

A comparative analysis of cities and of urbanization with reference to demographic characteristics of urban population, urban ecology, and urban social structure.

252. URBANIZATION AND THE CITY (D)

A comparative analysis of world urbanization, its trends, causes and consequences. Regional variations in the nature of urbanization and trends in major countries analyzed and related to major aspects of the spatial and social structure of cities. Prerequisite, SOCIOL 101.

**253. SOCIOLOGY OF LAW (D)**

The institution of law in society, with reference to variations among societies in systems of law, the development of English and American law, the structure of the legal profession, and the relationships between the legal system and other aspects of society.

**254. WORK AND SOCIETY (D)**

The contrasting ways selected industrial and developing societies are organized (e.g., Russia, China, Israel, Japan, Cuba, U.S.) to elicit work effort. Basic data on the U.S. work scene: occupational and income distributions, education and minority groups.

**255. SOCIOLOGY OF RELIGION (D)**

The relationship of religious beliefs and institutions to cultures and societies.

**256. RACE RELATIONS (D)**

The social, economic and political aspects of racial and ethnic problems in the United States; briefer consideration of similar problems in Africa and Asia.

**257. THE FAMILY (D)**

The development of the customs of courtship and marriage and the contemporary family. The basic causes of changes and trends of the family.

**258. SOCIAL INTERACTION (D)**

Social interaction in the context of groups, especially small groups. The dynamics of interaction process as the basis for group development. Attention to the emergence of normative and affective subsystems and to role differentiation.

**259. SOCIAL STRATIFICATION (D)**

The factors associated with institutionalized inequality in social life. A consideration of class, status, and power in American society.

**260. SOCIETY AND THE INDIVIDUAL (D)**

A course in sociological social psychology examining individual and group behavior in the context of structured social arrangements. Topics include socialization, motivation, the social control of behavior, attitudes and behavior, the self-concept, and some aspects of collective behavior. Materials are drawn from a variety of perspectives, ranging from behavioral social psychology and field theory to symbolic interaction and ethnomethodology. Prerequisite, SOCIOL 101.

**261. POPULATION PROBLEMS (D)**

An analytical study of population composition; the causes and consequences of changes in the basic demographic variables: fertility, mortality, and migration.

**262. THE DEMOGRAPHY OF MINORITY GROUPS (D)**

Demographic and ecological factors affecting

relationships between ethnic, racial, and religious groups. The demography of minorities from a comparative perspective, drawing upon materials from various nations. Prerequisite, SOCIOL 256.

**265. NATIONAL AND REGIONAL POPULATION STUDIES (D)**

Analysis of national and regional populations, emphasizing historical development and current structure of demographic systems. This course is designed for make available to students the real specialties of the teaching staff. Prerequisite, SOCIOL 261.

**266. COMMUNITY AND HUMAN ECOLOGY (D)**

The origin, development, location, junctions, and systems of communities. Ecological process of change, invasion and succession, centralization, decentralization, concentration, suburbanization, and patterns of residence and segregation of racial, ethnic, and religious groups are comparatively analyzed.

**267. APPLIED SOCIAL PSYCHOLOGY**

In-depth analysis of social psychological theory and research in relation to selected problems of attitudinal and behavioral change. Examples of topics are: compliance and resistance to authority, prejudice and race relations, management of deviance, modification of patient behavior for health maintenance and disease control, issues in the social psychology of mental health, poverty and inequality, and the women's movement.

**269. INTERPERSONAL RELATIONS AND GROUP STRUCTURE**

Various theories of interpersonal attraction and of group interaction and leadership. Emphasis on the types of interpersonal and group structures which result. Social cliques, family and kinship structures, community and neighborhood networks, interpersonal communication systems and leadership structures.

**270. SOCIAL STRUCTURE OF INDIA (D)**

The origins, distributions, and cultural traits of the major groups in India. Attention to marriage, family, caste patterns, and positions in the economic and political system.

**272. SOCIAL CHANGE (D)**

Changes arising from culture contact, social reform, and technical inventions. Planned and unplanned change, particularly in underdeveloped countries.

**273. SOCIOLOGY OF SEX ROLES**

The position of women to the structural and institutional arrangements of contemporary American society. Analysis of the socialization process of learning sex roles, woman's place in social stratification, and changes in woman's place through an investigation of the

structure and issues of the Women's Liberation Movement.

**276. DRUGS AND SOCIETY (D)**

The sociological implications of drug usage, including alcohol as well as "mind altering" drugs. Effects of drugs, prevalence of usage, social correlates, anthropological and historical perspectives, problems and management of addiction, social control of use and abuse, social implications of drugs, especially with respect to the counter-culture movement.

**278. CRIMINOLOGY (D)**

The nature of crimes and the factors underlying criminal behavior. The machinery of justice; the law, courts, police systems, and correctional institutions.

**280. SOVIET SOCIETY (D)**

Survey of the major social institutions, process and problems of Soviet Society; official and popular values and norms, stratifications, social controls, the family, types of socialization and social problems (i.e., crime, delinquency, the misuse of leisure, rural migration, etc.). The nature and usefulness of various theoretical models of Soviet Society.

**281. SOCIOLOGY OF COMMON SENSE KNOWLEDGE**

How knowledge is generated and used in the social context of everyday life. Topics include: process of acquiring common sense knowledge and constructing social reality; the social basis of perception, observation and inference making, contradiction, consistency and other logical relations in everyday practices.

**282. SOCIOLOGICAL THEORY (D)**

Contributions of European and American writers who have concerned themselves with theories of the origin, growth, and development of human social organization.

**283. CONTEMPORARY CRITICAL SOCIAL THEORY**

Twentieth century critical social theory in Western Europe and the United States.

**285. COMPLEX ORGANIZATIONS (D)**

An analysis of the processes leading to the formation, stability and instability of complex organization. Theoretical and empirical work related to these processes.

**286. SOCIOLOGY OF MEDICINE (D)**

Survey of the field of medical sociology, and examination of the medical institution using sociological concepts. Organization and utilization of medical care, social epidemiology, interaction between the community and the medical institution, patient-practitioner interaction.

**287. SOCIOLOGY OF MENTAL DISORDERS (D)**

Influence of social factors on diagnosis, treat-

ment, and possible etiology of mental disorders. Application of sociological concepts and methods in considering: nature and extent of mental illness, mental hospitals, and the community in rehabilitation.

## 292. BACKGROUND TO THE STUDY OF SOCIAL WELFARE (D)

The historical development and current status of British and Americans concerns about poverty in the context of the Industrial Revolution; sociological perspectives concerning differentials in access to economic security and social rewards, and problems of measurement and planning as related to social policies.

## 293. ISSUES IN SOCIAL POLICY PLANNING (D)

Primarily for upper division students. Focuses upon (1) systematic policy planning, the role of research and development and the role of the scientific community in domestic policy programming; and (2) selected substantive issues which draw heavily from social and geographical distributions of relative access to the valued goods, services and rewards in the society and consideration of mobility processes upon the redistribution of such access. Prerequisite, permission of instructor.

## 294. TECHNIQUES IN SOCIAL POLICY DEVELOPMENT: EVALUATION

Introduction to principles and techniques of evaluation of social programs and policies. Review of social planning processes; case studies develop understanding of concepts and techniques for the following topics: program and evaluation objectives specification; performance criteria; social context of evaluation; program impact, component and monitoring strategies; and integration of evaluation in the planning process. Considers levels of effort and quality of evaluative efforts in federal and state agencies.

## 295. QUANTITATIVE METHODS IN SOCIAL RESEARCH

The use of quantitative concepts in theoretical formulations and data and analysis in sociology. Topics include: unidimensional measurement; small group observation and experimentation in the interaction laboratory; sampling and experimental designs; measures of association; and simple mathematical models. Use of the computer built into instructional materials. Students do small scale exercises in research.

## 296. QUALITATIVE METHODS IN SOCIAL RESEARCH

Theory and practical application of field research in sociology. Emphasis on participant observation, respondent and informant interviewing and uses of historical data. Data collection and analysis using these techniques under supervision of instructor. Prerequisites: advanced course work in sociology and permission of instructor.

## 360. TECHNIQUES OF DEMOGRAPHIC ANALYSIS (SEMINAR)

The methods for gathering population data and the uses of these data to measure mortality, fertility, migration and population composition. The theoretical interrelations among these factors. Methods for making population estimates and projections. Prerequisite, SOCIOL 261 or a course in statistics, and permission of instructor.

## 363. FERTILITY AND SOCIETY (SEMINAR)

A review of past and present trends in fertility on a worldwide basis, an analysis of the social determinants and consequences of these trends, and an assessment of the likely future trends. Prerequisites, SOCIOL 261 and permission of instructor.

## 367. POPULATION THEORIES AND POLICIES (SEMINAR)

The major theories concerning population growth, distribution, internal and international migration, and population quality. Theorists include the pre-Malthusians, Malthus, Marx, Keynes, Stouffer, Petersen, Myrdal, Clark, Coale, Keyfitz, Spengler, and Davis and others. Population policies include the direct ones as well as social policies with demographic consequences. Attention to a cross-cultural analysis of the relations among sex status, social status, and human reproduction. Prerequisites, SOCIOL 261 and permission of instructor.

## 375. SOCIOLOGY OF LITERATURE (SEMINAR)

Literature as a source of information about society, in particular social values and norms, social change and conflict and the various relationships between society and the individual. The conditions under which literature reflects or distorts social realities and the interaction between literary products and their social environment. Permission of instructor required.

## 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

## 391. SEMINAR IN SOCIOLOGY

A survey and critical evaluation of the literature pertaining to selected topics in sociology. For juniors and seniors. Permission of instructor required.

## 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

## 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Psychology

Acting Department Head: Professor Bonnie Strickland. Professors Appley, Berger, Bogartz, C. Clifton, Donahoe, Dzendolet, Epstein, Feldman, Kates, Levinger, Moore, J. Myers, N. Myers, Raush, Southworth, Staub, Steiner, Watt; Associate Professors Ajzen, Averill (Associate Department Chairman), Ayres, Carlson, Cashdan, Chumbley, R. Clifton, Daehler, Eagly, Fite, Gadlin, Gold, Harmatz, Jarmon, Kamil, Moss, Schummer, Sulzer-Azaroff, Turner, Well; Assistant Professors Anderson, Bean, Dorris, Eichelman, Friedman, Jones, Kaplan, Lieberman, McLoyd, Nelson-Shapiro, Novak, Olley, Polatsek, Reisman, Royer, Simonson, Todd, Wade, Wisocki. Lecturer Rogers.

The courses in the Psychology Department are planned to impart an understanding of the basic principles, methods and data of psychology as a science and the application of this knowledge to current issues. The Department recognizes that interest in psychology is not limited to those who intend to pursue careers in the discipline; thus course offerings permit students to pursue study of various aspects of the subject to differing levels of depth. The wide range of the discipline permits the student to pursue programs of study which lead to either the B.A. or the B.S. degree.

PSYCH 120 and 130 are the prerequisite entrance courses for all majors. Students interested in majoring in psychology must also elect PSYCH 140 and 145, and may then pursue a general psychology major or one designed for those preparing for graduate study in the field. The general psychology major provides opportunities for those seeking a general education or for those entering career fields for which psychological information is relevant.

The psychology major must elect, in addition to PSYCH 120, 130, 140, and 145 the following: A minimum of 24 (and no more than 40) credits of advanced level courses (numbered above 200) in the Department. Included in the electives must be at least two courses from each of the following two groupings: A) 210, 220, 230 and 250; and B) 260, 270, and 280. This program allows the student considerable flexibility both within and outside the Department.

There are some College differences in the requirements for the B.A. and B.S. degree. This will rarely affect the student's choice of major courses, but it is still recommended that he or she see an advisor to make sure that the overall program will meet the College requirements for either the B.A. or B.S. degree.

In addition to the basic program of the general psychology major, it is recommended that students interested in a career in Psychology elect at least one laboratory course from each of the following two groupings: A) 211, 221, 222, 231 and 251; and B) 261, 271, 272, 281, and

282. These laboratory electives must be taken in proper sequence with their associated non-laboratory prerequisites or corequisites. These students are encouraged to elect seminars 391, 392 during their junior or senior years.

Students in the program (either B.A. or B.S.) who are eligible are encouraged to participate in the Honors Program in their junior and senior years.

*\*IMPORTANT NOTE: The prerequisites for Psychology courses are now being revised. The Department soon will have available a complete listing of courses and prerequisites. Please refer to that listing and to the Course Description Guide for the semester in which you are registering.*

#### 101. ELEMENTARY PSYCHOLOGY (D)

An introduction to the basic approaches and concepts of modern psychology. Examples from the areas of perception, conditioning, cognitive processes, social behavior, tests and measurements, and personality.

110. PSYCHOLOGY OF ADJUSTMENT (D)  
Problems of personality development and adjustment. Psychological nature of man, conflict, and thinking and adjustment.

#### 120. PSYCHOLOGY AS A NATURAL SCIENCE

Introduction to psychology including those fields concerned with a natural science approach to the study of behavior. Emphasis on the scientific method, biological determinants and bases of sensation, perception and learning, comparative and evolutionary perspectives on behavior and the role of early experience and language in human behavior.

#### 130. PSYCHOLOGY AS A SOCIAL SCIENCE

Introduction to the basic approaches and concepts of psychology as a social science. Topics include issues from clinical, developmental, educational, human learning, and language, personality and social psychology.

#### 140. METHODS OF INQUIRY IN PSYCHOLOGY

Introduction to the way questions about behavior are formulated and then tested through laboratory experiments, field research methods, naturalistic observation techniques. Lectures, discussions, and laboratory. Concepts from many areas of psychology, to illustrate procedures used in designing, conducting, reporting, and interpreting psychological research. Prerequisites, PSYCH 120 and PSYCH 130. 2 class hours, 1 3-hour laboratory period.

#### 145. STATISTICS IN PSYCHOLOGY

Introduction to statistical principles and techniques as applied to psychological data. 3 class hours, 1 1-hour laboratory.

#### 210. SENSATION AND PERCEPTION (D)

Methods, data and theories of the functioning of various sensory systems. Topics include a survey of basic sensory processes in the cutaneous senses, audition, vision, gustation, and olfaction; and higher perceptual processes in selected senses. Prerequisite, INTRO PSYCH.\*

#### 211. LABORATORY IN SENSATION AND PERCEPTION

Selected laboratory exercises in audition and vision and a semester project chosen by the student, with the aid of the instructor, in some area of sensation or perception. Prerequisites, PSYCH 140 and 145 and 210. 2 2-hour laboratory periods.

#### 220. LEARNING AND THINKING (D)

A general survey of animal and human learning and performance. Topics include: factors affecting acquisition, generalization, discrimination, extinction, and transfer in animals and humans; memory; and higher cognitive processes in humans. Prerequisite, INTRO PSYCH.\*

#### 221. LABORATORY IN HUMAN LEARNING

Introduction to methods used in investigating rote verbal learning, concept formation, short-term retention, verbal conditioning, artificial language learning, motor-skills, and other phenomena in human learning and retention. Prerequisites, PSYCH 140, 145 and 220. 2 2-hour laboratory periods.

#### 222. LABORATORY IN ANIMAL LEARNING

Introduction to methods used in investigating classical conditioning and operant behavior primarily using laboratory animals as subjects. Topics studied in the laboratory include: acquisition, generalization, discrimination, extinction, and transfer phenomena. Prerequisites, PSYCH 140 and 220. 2 2-hour laboratory periods.

#### 230 (I), (II). MOTIVATION (D)

Introduction to theories and research on the nature and determinants of motivation. Topics include instinct, behavior energization concepts, biological and acquired bases of emotions and motives, frustration, conflict and stress. Prerequisite, INTRO PSYCH.\*

#### 231. LABORATORY IN MOTIVATION

Methods of investigating motivation, including both laboratory and field studies using human and animal subjects. Includes selected projects conducted individually and in small groups by members of the class. Prerequisites, PSYCH 140, 230. 2 2-hour laboratory periods.

#### 242. ADVANCED EXPERIMENTAL PSYCHOLOGY

A presentation and critical evaluation of laboratory techniques and experimental methods used in psychology. May be taken for

one to three credits per semester dependent upon the number of techniques studied; may be repeated for a total of nine credits. Prerequisites: one undergraduate course in experimental psychology or permission of instructor. Credit, 1-3.

#### 245. STATISTICAL INFERENCE IN PSYCHOLOGY

Application of statistical procedures to analysis of psychological data and to problems of measurement in psychology and related fields. Prerequisites, INTRO PSYCH,\* PSYCH 145, or STAT 121 and permission of instructor. 2 class hours, 1 2-hour laboratory period.

#### 250. PHYSIOLOGICAL PSYCHOLOGY (D)

Neural bases of behavior, current issues in physiological psychology; psychobiological investigations of learning, sensory processes, motivation, and instinctive behavior. Prerequisites, INTRO PSYCH\* and ZOOL 101 or permission of instructor.

#### 251 (I). LABORATORY IN PHYSIOLOGICAL PSYCHOLOGY

Development of skills in laboratory techniques used in physiological psychology, including animal neurosurgery, electro-physiological stimulation and recording, and assessment of drug-behavior interactions. Prerequisites, PSYCH 140 and 250. 2 2-hour laboratory periods.

#### 252. DRUGS AND BEHAVIOR

The psychobiological foundations of drug-behavior interactions. The neural and neurochemical basis of behavior, basic pharmacology, drugs that affect mood and their mode of action, the psychological and physical bases of drug dependence and addiction, experimental approaches to psychopharmacology. Prerequisites, INTRO PSYCH\* and ZOOL 101.

#### 260. CHILD BEHAVIOR AND DEVELOPMENT (D)

Psychological development of the child, including theories, methods, and data of child behavior studies. Prerequisite, INTRO PSYCH.\*

#### 261. LABORATORY IN CHILD BEHAVIOR AND DEVELOPMENT

Selected experiments investigating perceptual, conceptual, learning, and social processes in children. Prerequisites, PSYCH 140, 145, and 260. 2 2-hour laboratory periods.

#### 262. CHILD PSYCHOLOGY (D)

Psychological development of the child, including language, emotions, intelligence, social behavior, motivation, and personality. Not open to psychology majors. Prerequisite, INTRO PSYCH.\*

#### 263. PSYCHOLOGY OF ADOLESCENCE (D)

The development and emotional, social and

intellectual adjustment of the individual during adolescence. Prerequisite, INTRO PSYCH.\*

**265. INTRODUCTION TO THE STUDY OF EXCEPTIONAL CHILDREN (D)**

Emphasis on the etiology, diagnosis, characteristics, education, and prognosis of deviations in mental, physical, and socioemotional development. Prerequisites, INTRO PSYCH\*, PSYCH 262, or permission of instructor.

**270. PERSONALITY (D)**

Introduction to the scientific study of personality. Personality development, structure and dynamics from major theoretical orientations. Prerequisite, INTRO PSYCH\*.

**271. EXPERIMENTAL STUDY OF PERSONALITY**

Selected research projects in personality carried out by class members. Each student conducts one major project of his or her own in addition to the group projects. Prerequisites, PSYCH 140, 145 and 270, which may be taken concurrently. 2 2-hour laboratory periods.

**272. LABORATORY IN PSYCHOPHYSIOLOGY**

The recording and analysis of physiological data from intact human subjects; emphasis on variables mediated by the autonomic nervous system (e.g., skin conductance, heart rate, blood pressure). Students conduct individual projects. Prerequisites, PSYCH 145 or permission of instructor. Some knowledge of basic physiology and electronics strongly recommended. 1 class hour, 1 2-hour laboratory period.

**280. SOCIAL PSYCHOLOGY (D)**

Introduction to the principles and study of social behavior. The psychological factors involved in attitude formation and change, communication and persuasion, and small group processes. Prerequisite, INTRO PSYCH.\*

**281. LABORATORY IN ATTITUDES AND OPINIONS**

Methods and research concerning attitude formation and change, attitude and opinion measurement, communication and persuasion. Prerequisites, PSYCH 140, 145 and 280 or permission of instructor. 2 2-hour laboratory periods.

**282. LABORATORY IN GROUP BEHAVIOR**

Methods and research concerning the behavior of individuals in groups. Interpersonal attraction, social interaction and influence, power and conflict, communication, group structure, leadership, and productivity. Prerequisites, PSYCH 140, 145 and 280, or permission of instructor. 2 2-hour laboratory periods.

**288. INDUSTRIAL PSYCHOLOGY (D)**

Psychological principles underlying personnel

selection and training, communication and decision-making in industry. Prerequisite, INTRO PSYCH.\*

**289. ORGANIZATIONAL PSYCHOLOGY (D)**

Introductory conceptions of schools, hospitals, prisons, industries, and other organizations as complex social systems; individual adaptation in organizational settings; organizational development and personal change. Prerequisite, INTRO PSYCH.\*

**301. EDUCATIONAL PSYCHOLOGY (D)**

Psychological facts and principles of development, learning, and measurement as applied to educational situations. 2 class hours, 1 2-hour laboratory period. Prerequisite, INTRO PSYCH.\*

**305. HISTORICAL AND CONTEMPORARY SYSTEMS (D)**

General structure of psychological theory; analysis and comparison of historical systems in the tradition of British empiricism-associationism and Continental rationalism, and of derivative near-contemporary and contemporary mentalistic, functionalistic, and behavioristic systems. Prerequisite, INTRO PSYCH.\*

**306. COMPARATIVE PSYCHOLOGY**

Emphasis on experimental investigations in a wide range of species. Topics include sensory and physiological systems, learning and early experience.

**311. PSYCHOLOGICAL TESTS**

Survey of tests of intelligence, aptitude, interest, personality, and adjustment. Test rationale, construction, characteristics, uses and evaluation emphasized. 2 class hours. 1 2-hour laboratory period. Prerequisite, INTRO PSYCH.\*

**325. ABNORMAL PSYCHOLOGY (D)**

Etiology, symptoms and therapy of behavior abnormalities including neuroses, psychoses, epilepsies, speech disorders, and mental deficiency. Prerequisite, INTRO PSYCH.\*

**331. CLINICAL PSYCHOLOGY**

Introduction to theoretical approaches and methods used in understanding and treating psychologically disturbed individuals. Prerequisite, PSYCH 325 or permission of instructor.

**345. INTRODUCTION TO QUANTITATIVE THEORIES OF BEHAVIOR (D)**

Introduction to quantification of theories of learning, retention, choice, perception and the interaction of individuals in group situations. Prerequisites, PSYCH 145, and permission of instructor.

**365. THEORIES AND PRACTICE IN COUNSELING**

Theories, techniques and tests necessary in counseling and guidance. Practice in organization and evaluating relevant data in the analysis of illustrative cases. Prerequisite, PSYCH 270, or 311, or permission of instructor. 2 class hours, 1 2-hour laboratory period.

**375. MENTAL RETARDATION**

Introduction to mental retardation; its psychological, sociological, educational, bio-medical, and legal aspects. Half day per week field work. Lecture and discussion group. Prerequisite, INTRO PSYCH.\* (PSYCH 260, 265, or 325 recommended.)

**380. FIELD STUDIES IN MENTAL HEALTH**

Concepts of normality and abnormality studied at local mental health institutions. Topics typically include: structure and dynamics of institutions for the mentally ill, and relationships between concepts of emotional disorder and community mental health services sanctioned to intervene in or regulate behavior. Prerequisite, PSYCH 325. Credit, 4.

**385, 386. SPECIAL PROBLEMS**

For qualified students. Independent work on special problems or in certain fields of psychological interest. By arrangement with members of the department. Credit, 1-6.

**387. READINGS IN PSYCHOLOGY**

Survey of relevant research literature under guidance of a staff member who will direct the student's research problem. Open only to qualified juniors. By arrangement with members of the department. Credit, 1-3.

**391, 392. SEMINAR IN PSYCHOLOGY**

For qualified juniors and seniors. A survey and critical evaluation of the literature pertaining to selected topics in psychology. Many different topics are offered each semester. By permission of the instructors. Credit, 1-3.

**395 (I). HONORS SEMINAR**

For qualified junior psychology majors. Will survey the research areas of psychology represented in the department. Intended for juniors who will work on an honors thesis during their senior year. Credit, 1.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Interdisciplinary Programs

### Classics and Philosophy

The Classics and Philosophy major is administered jointly by the two departments. It is designed for classicists with a philosophical bent and philosophers with an interest in Greek.

#### Requirements

- 1) 8 hours of credit in Elementary and Intermediate Greek
- 2) 6 hours of credit in Greek Readings
- 3) 6 hours of credit in Classics
- 4) 6 hours of credit in Philosophy
- 5) 6 hours of credit in Ancient Philosophy
- 6) 6 hours of credit in Special Classics and Philosophy seminars taken in the junior and senior years.

Questions may be directed to Prof. Gareth Matthews, Philosophy Department; and to Prof. Robert Dyer and Prof. John Marry, Classics Department.

### Judaic Studies

To major in Judaic Studies, students must complete the following requirements: a) Hebrew: One year introductory and one year intermediate Hebrew, or equivalent. Two semesters of Hebrew courses numbered 150 or above, or equivalent. b) JUDAIC 100 and 101. c) 18 hours in courses, approved by the Judaic Studies Committee, numbered 200 or above. This requirement is in addition to a) above. d) The major student will devote no fewer than nine of these 18 hours to an area of concentration approved by the Judaic Studies Committee. Six approved areas are: Biblical Studies, History, Hebrew Language and Literature, Modern Literature, Religion, Area Study.

Entering freshmen who may decide to major in Judaic Studies are strongly advised to enroll in Hebrew in the freshman year, thus leaving ample time to complete the required three years of Hebrew; it will also prepare them for a year's study in Israel, which is not required but desirable. In any event, two years of Hebrew satisfy the language requirement of the College of Arts and Sciences.

#### JUDAIC STUDIES

100 (I), 101 (II). THE JEWISH PEOPLE I, II (C)

Selected topics in history, religion, philosophy, art and music, and in the social, economic, and political life of the Jewish people from their earliest origins to the present. Either semester may be elected independently.

200. THE BIBLE AND ARCHEOLOGY (C)

The Hebrew Bible as reflection of ancient Near Eastern cultures and as an historical record; evidence from archeological excavations.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the Judaic Studies Committee.

Credit, 1-6.

398. SENIOR HONORS

Senior research, thesis option. By arrangement with the Judaic Studies Committee and/or Honors Office.

Credit, 4

399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with the Judaic Studies Committee and/or Honors Office.

Credit, 1-5.

#### HEBREW

110 (I), 120 (II). ELEMENTARY HEBREW  
Introduction to Hebrew. Two sections, dealing with either Biblical Hebrew or modern Hebrew. 3 class hours, 1 laboratory period.

126. INTENSIVE ELEMENTARY MODERN HEBREW

Intensive introduction to modern Hebrew. 4 class hours, 2 laboratory periods and open laboratory practice.

Credit, 6.

130 (I), 140 (II). INTERMEDIATE MODERN HEBREW

Emphasis on speaking and understanding readings in cultural and literary texts.

146. INTENSIVE INTERMEDIATE MODERN HEBREW

Intensive reading in modern Hebrew. 5 class hours, 1 laboratory period and open laboratory practice.

Credit, 6.

200 (I), 201 (II). MODERN HEBREW LITERATURE (C)

Readings in modern Hebrew writers.

210. READING IN THE HEBREW BIBLE (C)

A careful reading of selected passages from the Hebrew Bible in the original; attention to grammar, syntax, and style. Different passages read each year; may be repeated for credit.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with the Judaic Studies Committee.

Credit, 1-6.

#### YIDDISH

110 (I), 120 (II). ELEMENTARY YIDDISH

Introduction to the Yiddish language. 3 class hours, 1 laboratory period.

130 (I), 140 (II). INTERMEDIATE YIDDISH

Emphasis on speaking and on reading various kinds of Yiddish literature.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for

qualified students. By arrangement with the Judaic Studies Committee.

Credit, 1-6.

#### Related Courses

ANTH 351. JUDAIC ETHNIC GROUPS

GERMAN 232. GERMAN MASTERPIECES IN TRANSLATION: JEWS IN GERMAN LITERATURE

HIST 341. THE MODERN MIDDLE EAST

POLSCI 233. GOVERNMENTS AND POLITICS OF THE MIDDLE EAST

### Latin American Studies

Undergraduates interested in Latin America may enroll in the Latin American Studies Program. The Program does not constitute a major and is designed to supplement the work done in a regular discipline. However, those students who fulfill the requirements of the Program will be awarded the Certificate in Latin American Studies attesting to their attainment in area and language studies. To earn a certificate a student must enroll in the Program and fulfill either of the two following sets of requirements: Track A: demonstrate a practical working knowledge of Spanish or Portuguese and elementary proficiency in the other; satisfactorily complete four courses focussed on Latin America; and participate in the inter-disciplinary seminar, LAT AM 390; or, Track B: demonstrate a practical working knowledge of Spanish or Portuguese; satisfactorily complete five courses focussed on Latin America; satisfactorily complete LAT AM 390 and 392.

The Committee on Latin American Studies administers the Program and advises interested students. Members of the Committee are: R. Bancroft (Spanish and Portuguese); M. Best (Economics); R.A. Potash, Chairman (History); D. Proulx (Anthropology); H. Wiarda (Political Science); R. Wilkie (Geography).

380 (I, II). FIELD STUDY

Independent study in a Latin American country in accordance with a field experience project drawn up with the advice and approval of a faculty adviser and the Committee on Latin American Studies. Written report required. A scholar in the Latin American country normally is appointed to provide guidance and assistance. Orientation prior to departure is included.

Credit, 3-12.

390 (II). INTERDISCIPLINARY SEMINAR ON LATIN AMERICA

Topics in modern and contemporary Latin America. For Certificate Program seniors and others who have completed at least three courses representing at least two different disciplines on Latin America and have a reading knowledge of either Spanish or Portuguese.

### 392 (I). BIBLIOGRAPHY OF LATIN AMERICAN STUDIES

A survey and evaluation of sources of information about Latin America. Interdisciplinary approach. For Certificate Program students and others with strong interest in Latin America. Reading knowledge of either Spanish or Portuguese required.

## Interdisciplinary Majors in Linguistics

The Department of Linguistics offers five majors in which the study of Linguistics forms a significant part of the curricular requirements. These are:

- Linguistics and Philosophy
- Linguistics and Chinese
- Linguistics and German
- Linguistics and Japanese
- Linguistics and Russian

Students interested in these majors should first see the undergraduate advisor in Linguistics. Students wishing to pursue a joint major in linguistics and other disciplines (for example, Linguistics and English, Linguistics and Psychology, Linguistics and Anthropology, or Linguistics and Computer Science) should also see the undergraduate advisor in Linguistics. Joint majors in these fields have in the past been approved through the Bachelor's Degree with Individual Concentration.

Questions may be directed to Prof. Donald Freeman, Linguistics Department.

## Mathematics and Philosophy

### Requirements

A minimum of 36 semester hours of credit in courses offered in the two departments. Satisfaction of the following requirements of distribution:

- (a) *The Mathemotics Requirement.* Satisfactory completion of MATH 136, 167, and four other courses from among 165 (or 166), and courses numbered above 200, including a two-semester sequence.
- (b) *The Philosophy Requirement.* Satisfactory completion of any three courses from among PHIL 161, 162, 201, 205, 230, and 261. Satisfactory completion of PHIL 374 and one other course numbered above 200.  
COINS 285 may be taken in partial fulfillment of requirement (a) or requirement (b) (but not both).
- (c) *The Logic Requirement.* Satisfactory completion of MATH 381 or both of PHIL 372 and 373. (Note: These courses count toward satisfaction of requirements (a) and (b), respectively.)

For further information, see Prof. Michael Jubien, co-director of the program for Philoso-

phy, or Prof. Frank Wattenberg, co-director for Mathematics.

## Near Eastern Studies

An interdisciplinary and interdepartmental major is offered in Near Eastern Studies. Students majoring (or planning to major) in Near Eastern Studies may consult any of the members of the Near Eastern Studies Committee for help in arranging programs of study. Students in doubt as to which member of the Committee to choose as an adviser should contact Vartan Artinian, the Chief Adviser for Near Eastern Studies majors. The major consists of a minimum of 24 upper level credits in courses chosen from the list below. NEAST 100, 101, Near Eastern Civilization I and II, and 2 years or the equivalent of any Near Eastern language are required. Students should begin the major by taking NEAST 100 and a Near Eastern language course. Those wishing to concentrate in the area of ancient Near Eastern Studies may arrange to study Aramaic, Akkadian, and Ugaritic by signing for a special problems course with Professor Charles Isbell. Majors are urged to spend a summer, a semester, or a full academic year in the Near East. Special problems course may be arranged in the area of the student's particular interest with any member of the Committee.

### NEAR EASTERN STUDIES

#### 100 (I), 101 (II). NEAR EASTERN CIVILIZATIONS (C)

Survey of Near Eastern Civilizations from earliest times to the present. Either semester may be elected independently.

#### 110. ARMENIAN CIVILIZATION (C)

Introduction to the civilization of the Armenian people from earliest times to the present. Emphasis on geography, politics, society and economics, religion, literature and learning, arts and architecture.

#### 200. ANCIENT LITERATURES OF THE NEAR EAST IN TRANSLATION (C)

The most important extra-Biblical texts of the ancient Near East, including compositions of the ancient Sumerians, Egyptians, Hittites, Akkadians, Greeks, Aramaeans, and Ugaritians. Texts include myths, epics, legends, legal texts, historical annals, religious and ritualistic texts, magical formulae, didactic literature, and personal letters.

#### 203. THE BIBLE: MYTH, LITERATURE, AND SOCIETY (C)

The several main genres of Biblical literature in their historical setting; attention to principles of literary, mythological, and sociological interpretation; the literary influence of the Authorized Version. Not open to students who have had ENGL 203.

#### 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the Near Eastern Studies Committee. Credit, 1-6.

### RELATED COURSE:

ENGL 203 (I), (II). The Bible: Myth, Literature, and Society

### ARABIC

110 (I), 120 (II). ELEMENTARY ARABIC  
Introduction to modern standard Arabic. 3 class hours, 1 laboratory period.

130 (I), 140 (II). INTERMEDIATE ARABIC  
Readings in modern standard and classical Arabic.

200 (I), 201 (II). MODERN ARABIC LITERATURE (C)  
Readings in modern Arabic writers.

#### 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the Near Eastern Studies Committee. Credit, 1-6.

### ARMENIAN

110 (I), 120 (II). ELEMENTARY ARMENIAN

Introduction to the Armenian language. 3 class hours, 1 laboratory period.

130 (I), 140 (II). INTERMEDIATE ARMENIAN

Readings in modern and classical Armenian literature.

#### 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the Near Eastern Studies Committee. Credit, 1-6.

### HEBREW

See listings under JUDAIC STUDIES

### PERSIAN

110 (I), 120 (II). ELEMENTARY PERSIAN  
Introduction to modern Persian. 3 class hours, 1 laboratory period.

130 (I), 140 (II). INTERMEDIATE PERSIAN  
Readings in modern and medieval Persian.

#### 385 (I), 386 (II). SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of Near Eastern Studies Committee. Credit, 1-6.

### TURKISH

110 (I), 120 (II). ELEMENTARY TURKISH  
Introduction to modern Turkish. By arrangement.

130 (I), 140 (II). INTERMEDIATE TURKISH Readings in modern and Ottoman Turkish. By arrangement.

385 (I), 386 (II). SPECIAL PROBLEMS Individual study of a selected problem for qualified students. By arrangement with members of the Near Eastern Studies Committee. Credit, 1-6.

#### RELATED COURSES:

The following courses in other departments may be taken for major credit in Near Eastern Studies:

ART 233, 235. Islamic Art and Architecture I and II.

ART 305. Art of Early Mediterranean Cultures.

CLSICS 225, 226. Mythology in the Ancient World I and II.

HIST 200. The Ancient World to 500 B.C.

HIST 340. Civilization of Islam.

HIST 341. The Modern Middle East.

HIST 342. The Ottoman Empire.

POLSCI 233. Governments and Politics of the Middle East.

In addition, courses at Amherst, Mount Holyoke, and Smith Colleges may be taken for major credit in Near Eastern Studies.

#### Pre-Dental, Pre-Medical, and Pre-Veterinary Programs

A student planning to enter a dental, medical, optometry, podiatry, osteopathy, or veterinary school should select a major department in the field of greatest interest. This is usually in the College of Arts and Sciences, but may be in other colleges or schools. Pre-veterinary students frequently select a major in the College of Food and Natural Resources. Preparation for the professional schools requires relatively few specific courses beyond those necessary to obtain the bachelor's degree and can be completed within the four-year curriculum of most departments in the University.

A liberal education is felt to be one of the best backgrounds for entering the medical, dental or other health fields. Although many students may be inclined to concentrate in the sciences, this does not necessarily improve opportunity for entrance into a professional school. Rather, the field of concentration should be determined by the student's strong secondary interests; i.e., he or she should choose that area most likely to lead to a satisfying alternative career.

Minimum preparation for the pre-professional student must include one year of organic, one year of organic, and one semester of analytical chemistry, three semesters of biology, one year of college mathematics, and one year of physics. Certain additional courses in biology, chemistry, or mathematics may be required or recommended by some dental, medical, and veterinary schools. Students

should consult their advisors as well as professional school catalogs in regard to specific requirements of particular schools. Freshmen who intend to include the pre-professional courses in the curriculum should discuss their plans with the summer counseling advisor, as some change in the normal course sequence may be desirable.

Students, who by their work in the first year demonstrate a potential for success, may, in their third semester, apply to the Pre-Professional Advisory Committee for entrance into the pre-medical, pre-dental, or pre-veterinary major. This program is designed to give qualified students the opportunity to broaden their background by providing for increased flexibility in the curriculum of the last two years. These students have advisors specifically for this program, are interviewed, and, upon application to professional schools, are given a written evaluation by the pre-professional advisory committee. However, admission into a pre-medical, pre-dental, or pre-veterinary program in not a prerequisite for application to the professional schools. Many students prefer to complete a full major in an academic department; these students should also apply for entrance into the pre-professional program; they are interviewed and evaluated by the committee in the same manner as those accepted as majors.

A library of dental, medical, optometry, osteopathy, podiatry, and veterinary school catalogs and other pertinent material is maintained in the committee office, Room 206 Goessmann. Students are encouraged to visit this office for further information concerning preparation for careers in dentistry, medicine, veterinary medicine and other health areas.

Individual members of the advisory committee are available for counsel to all interested students at any stage of their program and whether or not they have been accepted into the curriculum as majors. The committee membership for 1975-76 consists of 17 faculty members from Natural Sciences, Psychology, Health Sciences and Food and Natural Resources. Dr. W. Brian O'Connor, Associate Professor/Zoology is the Chairman of the Committee.

#### Science Major

An interdepartmental science major is offered, based on courses in the departments of the Faculty of Natural Sciences and Mathematics (Biochemistry, Botany, Chemistry, Computer and Information Science, Geology, Mathematics/Statistics, Microbiology, Physics/Astronomy, and Zoology). The major is coordinated and administered by a committee composed of the chief undergraduate advisors of these departments, a representative of the Pre-Medical committee, and the assistant dean for Natural Sciences and Mathematics (NS&M). The major is intended for the student who has a broad interest in sciences but does not wish to specialize, and has requirements

in the areas of foundational work, depth, and breadth.

In the foundations area the requirements are: 1) two courses from Math or COINS (Computer and Information Science) or Statistics; 2) two courses from each of Physics and Chemistry plus one more from Physics, Chemistry or Geology; and 3) two courses from the departments of Biochemistry, Botany, Microbiology, or Zoology.

The depth requirement consists of a primary concentration of at least six courses in one department and a secondary concentration of at least four courses in another department in NS&M, with the primary concentration including at least four upper division courses.

To complete the major, the breadth requirement calls for a total of 20 courses chosen from at least six of the nine NS&M departments.

Courses for non-science majors cannot be used to satisfy any part of the Science major, nor can courses taken on a pass/fail basis. Also, courses that are acceptable in the various areas of the requirements depend partly on the primary concentration. For more detailed information contact CASIAC or any member of the coordinating committee.

#### Social Thought and Political Economy

The Social Thought and Political Economy program is an interdisciplinary major for students who want a challenging major that combines related elements of the offerings of the following departments: Anthropology, Economics, History, Philosophy, Political Science, Psychology, and Sociology.

Students choose a concentration either in Social Thought or in Political Economy. Each student is assigned a faculty advisor in consultation with whom he/she selects a program of courses.

#### Requirements

- 12 hours of credit at the introductory level in at least three of the departments listed above;
- 18 hours of credit in courses numbered 200 or above, selected in consultation with the advisor, from the offerings of the departments listed above;
- 6 hours of credit in a two-semester senior year team-taught seminar restricted to the STPEC majors.

Majors with strong academic records are encouraged to write Senior Honors Theses.

For more information, contact Prof. Patrick Eagan, in the Political Science Department.

## Soviet and East European Studies Program

Chairman of Program: Assistant Professor J. Joseph Lake (Slavic).

The Soviet and East European area is viewed in this program from the cooperative perspective of several disciplines. Requirements for the major are:

- 1) Proficiency in a relevant language (normally Russian) at a level adequate to enable the student to conduct research in that language;
- 2) Successful completion of ten courses (including the third year of the language) to be chosen within the area in a minimum of three of the following disciplines: Anthropology, Economics, History, Political Science, Slavic Languages and Literatures, and Sociology;
- 3) Two courses in modern European history.

In addition to those listed above, approximately ten other faculty members in various departments teach courses in the area. Some 35 such courses are presently offered, 15 of them language courses.

Questions may be directed to Professor Lake in 437 Herter Hall; or to Professor Ryavec, Political Science, Thompson Hall.

## Western European Area Studies Program

The Western European Area Studies Program seeks to add scope and depth to the University's liberal arts program. It is not a major concentration, but rather an informal "minor" which complements a wide variety of departmental majors and offers students additional incentive and guidance in creating a meaningful interdisciplinary undergraduate experience.

The requirements for the Western European Studies (WEST) Certificate are: 1) a minimum of one upper-level course in each of three disciplines relating to Western Europe beyond the designated major; 2) at least one interdisciplinary seminar given under the auspices of the WEST program (WEST 291 or 391); 3) a working knowledge of one modern Western European language (normally 18 credits) in addition to English (a reading knowledge of a second foreign language is recommended). These requirements may be met by courses taken at the University, at one of the four institutions in the Five College system, or in one of the overseas programs.

Courses may be chosen from the following areas and departments:

Humanities: Art, Music, History, Philosophy

Language and Literature: Comparative Literature, English, French and Italian; Germanic Languages (includes German, Dutch, Danish, and Swedish), Spanish and Portuguese

Professional Schools: Business Administration, Education

Social Science: Anthropology, Economics, Geography, Political Science, Sociology

Students should select their courses — and design their programs — in consultation with their departmental WEST advisor, who will insure that they meet the requirements for the certificate.

### 291 (I), (II). INTRODUCTORY SEMINAR

An introductory and interdisciplinary seminar focusing on historical and contemporary Western European topics. Broad national and regional issues surveyed; opportunities for student research.

### 391 (I), (II). ADVANCED SEMINAR

An advanced interdisciplinary seminar focusing on specific social, cultural, and political issues in modern Western Europe. Selected topics pursued in depth through extensive individual research. Prerequisites: four courses in the humanities, languages, and/or social sciences with substantial Western European content or permission of instructor.

Credit, 3-4.

George S. Odiorne, Dean; John T. Conlon, Associate Dean; Nelson E. Pion, Assistant Dean

The school offers a number of programs leading to the degree of Bachelor of Business Administration. Students in Business Administration follow a common curriculum during their freshman and sophomore years. This curriculum is composed of:

- RHET 100C and 110C
- MATH 190 and 290
- ECON 103 and 104
- STAT 140 followed by GB FIN 250
- ACCTG 120 and 130
- BA 110
- GB FIN 260 or POLSCI 292
- Three humanities courses
- One course in Social Science
- Four elective courses

Courses and major programs are listed under the four departments in the School of Business Administration: Accounting, General Business and Finance, Management and Marketing. Irrespective of any major selected, a certain "core" of courses is required of all students.

This core is composed of:

- GB FIN 201, Corporation Finance
- MGT 201, Principles of Management
- MKTG 201, Fundamentals of Marketing
- BA 371, Business Policy and Strategy

Elective courses in major programs are selected with the aid and consent of the student's advisor.

## BUSINESS ADMINISTRATION

These courses do not constitute a particular major or concentration within the School of Business Administration.

### 110 (I), (II). INTRODUCTION TO COMPUTERS FOR BUSINESS

The BASIC and FORTRAN computer programming languages. Emphasis on use of the computer for business data processing and problem solving.

### 333. INTERNSHIP PROGRAM

Summer service with a cooperating business firm or governmental agency. Students undertake responsible duties and participate in activities under supervision of experienced executive personnel. Written report required. With permission of department chairman.

### 371 (I), (II). BUSINESS POLICY AND STRATEGY

An integrative case course requiring identification and possible solution of practical problems encountered by general managers who are responsible at various organizational levels for formulating strategies and their successful implementation.

## Accounting

**Chairman of Department:** Associate Professor Anthony T. Krzystofik; Professors Anderson, Backer, Dennler, Lentilhon, Singer; Associate Professors Burch, O'Connell, Simpson, Stone; Assistant Professors Brown, Fitzgerald, Gosman, Horvitz, Motekat, Sardinas, Volkert.

### Curriculum in Accounting:

|                                          |    |
|------------------------------------------|----|
| Required "core" courses                  | 12 |
| Required courses in the major:           |    |
| ACCTG 220, Financial Reporting Theory I  | 3  |
| ACCTG 221, Financial Reporting Theory II | 3  |

A course or courses in at least two of the following three areas:

1. ACCTG 230, Cost Accounting, or ACCTG 235, Managerial Cost Analysis
2. ACCTG 210, Business Applications of Computer, or ACCTG 211, Business Information Systems
3. ACCTG 370, Federal Income Tax Procedures

Electives sufficient to reach a minimum of 24 hours in accounting courses (including ACCTG 120 and 130 but NOT including GB FIN 261, 262, or ACCTG 263).

A Business Law course in addition to the one required in the School core 3

Four elective courses outside the School 12

Additional electives to bring total to the 120 credits required for graduation. Curriculum concentrations exist in the areas of public accounting, management accounting, information systems and areas of special interest. Students planning to satisfy certification requirements as a CPA (Certified Public Accountant), CMA (Certified in Management Accounting), CDP (Certificate in Data Processing) or as a teacher, should consult with a faculty adviser as to the specific requirements.

### 120 (I), (II). INTRODUCTION TO ACCOUNTING I

Introduction to principles underlying the preparation of financial statements.

### 130 (I), (II). INTRODUCTION TO ACCOUNTING II

Continuation of ACCTG 120 with major emphasis on the development and application of accounting data for planning and control.

### 210 (I), (II). BUSINESS APPLICATIONS OF COMPUTERS

Basic business data processing methods with emphasis on general business problems and their application to the COBOL language. Prerequisites, ACCTG 120, 130 and ACCTG 110.

### 211 (I), (II). BUSINESS INFORMATION SYSTEMS

Data processing methods and design of file

structures as they relate to business information systems. Emphasis on the role of the accountant and manager in the design and operation of the systems. Complementary methods of providing information to management for purposes of control, planning, and decision-making. Prerequisites, ACCTG 120, 130 and ACCTG 110 or equivalent. (Also listed as MGT 211.)

### 220 (I), (II). FINANCIAL REPORTING I

Intensive examination of fundamental concepts underlying financial reporting. Current literature dealing with effects of alternative methods upon measurement of periodic income. Prerequisite, ACCTG 130.

### 221 (I), (II). FINANCIAL REPORTING II

Continuation of ACCTG 220 and intensive examination of current authoritative pronouncements on accounting principles. Prerequisite, ACCTG 220.

### 230 (I), (II). COST ACCOUNTING

Methods of cost analysis for job order, process, and standard cost systems, with emphasis on cost control and interpretation. Prerequisite, ACCTG 130.

### 235 (I), (II). MANAGERIAL COST ANALYSIS

Analysis of Cost-Volume-Profit relationships, cost behavior, budgeting and planning, responsibility accounting and control systems, behavioral aspects of budgets, divisional performance evaluation, inventory planning and accounting aspects of capital budgeting. Prerequisites, ACCTG 120, 130 and basic calculus.

### 263 (I), (II). BUSINESS LAW FOR ACCOUNTANTS

Legal concepts and rules encountered in business transactions, with particular attention to subjects currently included in CPA examinations. Prerequisite, GB FIN 260 or permission of instructor. (Also listed as GB FIN 263.)

### 272 (I). ADMINISTRATIVE ACCOUNTING AND CONTROL

Interpretation and evaluation of accounting data for use in managerial decisions of planning and control. Prerequisite, ACCTG 120 or 130. (Not open to students majoring in Accounting.)

### 320 (I), (II). FINANCIAL REPORTING III

Consolidation problems of merged firms, general price-level problems, and problems of foreign operations. Prerequisite, ACCTG 221

### 340 (I), (II). AUDITING

The basic concepts of auditing and control. Emphasizes internal control, audit programs, and professional responsibilities of the CPA. Particular attention to the auditing requirements of the CPA examination. Prerequisites,

ACCTG 221, either ACCTG 230 or 235, Statistics, and a Computer course.

### 360 (II). FUND ACCOUNTING

Special features of budgetary and fund accounting as applied to municipalities, other governmental units and institutions, such as hospitals and schools. Prerequisite, ACCTG 120.

### 370 (I), (II). FEDERAL INCOME TAX PROCEDURE

Federal income tax laws and regulations as they affect individuals; preparation of tax returns. Prerequisite, ACCTG 120

### 371 (I), (II). ADVANCED FEDERAL TAX PROCEDURES

A continuation of ACCTG 370 emphasizing corporations, partnerships, estates and trusts, gifts and estate taxes, tax planning and research. Prerequisite, ACCTG 370.

### 380 (II). CPA PROBLEMS

Extensive practice in solution of problems from CPA examinations. Topics include: proper treatment of assets, liabilities and ownership equity; partnerships; consolidations, funds and cash flow; cost accounting and management uses of accounting information; governmental (fund) accounting; and income taxes. Prerequisite, ACCTG 320.

### 382 (II). INTERNATIONAL ACCOUNTING

Current accounting principles and practices in foreign countries, including their sources and developments; relationships to taxation and auditing standards. Includes accounting problems encountered by multi-national corporations and trends towards the establishment of international accounting and auditing standards. Prerequisite, ACCTG 221 or equivalent, or permission of instructor.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6

### 393 (I), (II). SENIOR HONORS SEMINAR

Advanced study and research on selected topics in Business Administration and related disciplines. Available only to seniors with 2.8 average or better, and/or by permission of instructor. May be taken both semesters.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with the Department and/or Honors Office. Credit, 4

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## General Business and Finance

Chairman of Department: Professor Sidney C. Sufrin, Professors Balintfy, Barges, Corcoran, Hartzler, Kaczka, Ludtke, Osborn, Rivers; Associate Professors: Burak, Plattner, Whiston; Assistant Professors: Abranovic, Branch, Finnerty, Goldman, Kumar, Moore, Zoltners.

### Curriculum in Financial Management

|                                                                                            | Credits |
|--------------------------------------------------------------------------------------------|---------|
| Required "core" courses                                                                    | 12      |
| Required courses in the Major:                                                             | 15      |
| GB FIN 210, Financial Institutions, or ECON 211, Money, Banking and Credit                 |         |

| 12 credit hours from a list of quantitative electives                          |         |
| 12 additional credit hours in Business Administration and Economics            |         |
| Electives outside of Business Administrative and area of Specialization        | 12      |

## FINANCE

### 201 (I), (II). CORPORATION FINANCE

Corporate financial behavior; appraisal of factors affecting decision-making regarding sources and application of funds; introduction to capital budgeting and cost of capital prob-

lem. Prerequisite, ACCTG 125 or permission of instructor.

### 202 (I). PROBLEMS IN BUSINESS FINANCE I

Short- and intermediate-term financing; decision-making under uncertainty regarding needs and sources of funds. Prerequisite, GB FIN 201.

### 203 (II). PROBLEMS IN BUSINESS FINANCE II

Long-term financing, capital budgeting, reserves and dividend policy, pensions, company expansion, merger and consolidation, reorganization. Prerequisite, GB FIN 201.

### 204 (I), (II). MODELS OF FINANCIAL ANALYSIS AND MANAGEMENT

An analytical approach to the study of financial management. Emphasis on theoretical topics of financial decision-making. Through the use of mathematical, statistical and computer simulation methods, various financial decision-making models are made explicit in their assumptions, rigorous in their construction, and testable in their implications. Prerequisite, GB FIN 201 and the SBA required mathematics and computer courses.

### 210 (I), (II). FINANCIAL INSTITUTIONS

The American financial system and functional relationships between financial institutions and economic activities of households, business firms and governmental units. Prerequisites, ECON 125 and ACCTG 125.

### 220 (I). INVESTMENTS

Development of the general theory of investment with emphasis on the individual investor; practical application of the techniques to real world problems.

### 221 (II). THEORY OF INVESTMENT ANALYSIS

Detailed investigation into contemporary investment strategies; emphasis on the theoretical, with portfolio analysis and random walk being the chief topics. Prerequisite, GB FIN 220 or permission of instructor.

### 222 (II). THEORY OF INVESTMENT PROCESSES

In-depth study of portfolio analysis and stochastic processes in security markets; emphasis on quantitative solution techniques and testing procedures. Prerequisites, GB FIN 220 and the required SBA quantitative courses.

### 230 (I), (II). PRINCIPLES OF INSURANCE

Risks encountered by individuals and business firms and methods and institutions which have been established to insure against financial losses. Various forms of insurance are studied primarily from the buyers' point of view.

**231 (I). LIFE INSURANCE**

Application of life insurance to problems of family security, business security, investments, and estate protection.

**232 (I). EMPLOYEE BENEFIT PLANS**

Design and administration of pension; profit sharing, group life and health insurance plans and other miscellaneous insured fringe benefit programs.

**233 (II). PROPERTY RISKS AND INSURANCE**

Methods of protecting against direct and indirect losses from perils of fire, negligence, marine transportation and dishonesty are emphasized. Insurer operational functions of underwriting, claim adjusting, investing and rate making are analyzed.

**234 (I). ECONOMIC SECURITY**

Public and private programs to prevent or alleviate economic insecurity, including poverty, substandard incomes, and economic contingencies. (Also listed as ECON 341.)

**GENERAL BUSINESS****240 (I). DOMESTIC TRANSPORTATION SYSTEMS**

A comprehensive survey of transport agencies. The differential rates of technological development for each mode and the consequential effects on land utilization, methods of rate making, and the formulation of public policy.

**241 (II). LOGISTICS AND THE TRANSPORT FUNCTION**

Problems of inventory determination, plant location, trade-offs, transport alternatives, warehousing, etc. in a systems concept. Case and problem approach.

**242 (II). METROPOLITAN UTILITY SERVICES**

The nature and operation of the public utility services of urban areas such as energy, communications, water, and waste disposal. The public policy being developed, with respect to its impact upon the environment.

**245 (I). METROPOLITAN TRANSPORTATION**

The analysis of economic, social, and technological developments on demand and supply factors for the movement of people and goods within urban areas. Determination of the optimal mix of modal facilities to maximize the total transport resources of the urban area. Coordination of internal and external transport systems. Prerequisite, GB FIN 240 or permission of instructor.

**250 (II). ADMINISTRATIVE STATISTICS**

Probability and statistical distributions applied to business management problems;

application of Bayes' theorem to sampling for business decision-making under uncertainty.

**253 (I). INTRODUCTION TO MANAGEMENT SCIENCE**

The most frequently used methods in modeling and analyzing business and economic problems. The process of abstracting and modeling building, and the role of various types of models in description and decision-making. Methods including general optimization, linear programming, queuing theory, and simulation are used in examining applications from across functional areas of business. Prerequisite, Undergraduate business mathematics core requirements. (Also listed as MGT 253.)

**254 (II). APPLICATIONS OF MATHEMATICAL PROGRAMMING IN BUSINESS AND ECONOMICS**

The use of programming methods in planning and controlling the allocation of scarce resources. Methods include linear programming, integer programming, quadratic programming and dynamic programming. Applications include media selection, sales force allocation, capital budgeting, portfolio selection, work scheduling, and project sequencing. Prerequisite, GB FIN 253 desirable, but not essential. (Also listed as MGT 254.)

**255 (I). DECISION MODELS IN BUSINESS**

Builds upon the foundation of decision theory developed in Gen Bus 250 to develop more advanced methods for the analysis of decision-making under uncertainty. The Bayesian approaches developed are applied using the case method to integrative types of business problems. Prerequisite, GB FIN 250.

**256 (I), (II). ANALYTICAL APPROACHES TO CORPORATE STRATEGY AND PLANNING**

The use of models and analytical techniques to analyze and process business and economic information for the purpose of making strategic decisions about the allocation of resources in an uncertain environment. Focuses not on the development of models, but on the application of a wide variety of existing techniques to medium and long range planning problems. Draws heavily on existing "canned" computer programs to deal with cases from a number of industrial sectors and within the industries across functional areas. The "canned programs" used in analysis of problems include linear programming, forecasting models, and simulation models. Prerequisite, Senior standing in SBA or permission of instructor.

**259 (II). BUSINESS AND ECONOMIC FORECASTING**

Introduction to the uses and limitations and shortcoming of various short term and long term forecasting techniques. Problems

selected from accounting, finance, management and marketing. Techniques include exponential smoothing, input-output analysis, the delphi method, regression analysis, barometric and indicator methods, pools and survey techniques, econometric models, and life cycle analysis. Prerequisite, Upper level SBA standing or permission of instructor.

**260 (I), (II). INTRODUCTION TO LAW**

The nature, functions and limits of law. Various theoretical approaches to law as an important institution in society. Selected problems of law, power and stratification and the relationship of law and values in society. Analysis of the administration of law through legislation, administrative agencies and courts.

**261 (I), (II). ADVANCED LEGAL STUDIES**

An extension and development in detail of topics surveyed in the introductory course. Prerequisite, GB FIN 260.

**262 (II). LAW III**

The economic functions and consequences of agency, partnerships and corporations. Prerequisite, GB FIN 260.

**263 (I), (II). BUSINESS LAW FOR ACCOUNTANTS**

Legal concepts and rules encountered in business transactions, with particular attention to subjects currently included in CPA examinations. Prerequisite, GB FIN 260 or permission of instructor.

**264 (I), (II). LAW OF URBAN DEVELOPMENT**

Legal problems generated by the changing urban environment; includes the law of race relations, poverty and welfare, land use and land use planning, urban and regional planning. Prerequisite, GB FIN 260 or equivalent.

**265 (I), (II). BUSINESS AND ITS ENVIRONMENT**

(See MGT 265.)

**270 (I). REAL ESTATE AND URBAN DEVELOPMENT**

Introduction to principles of urban land use. Economic, legal, social, and political factors that affect real estate markets, valuation and land use.

**272 (II). SEMINAR IN URBAN AND REGIONAL MANAGEMENT**

An overview of the social, economic and political problems of urban America. Also concentrates on the major public finance issues of metropolitan government and explores fiscal and structural alternatives. Urban and regional economic base analysis of several types, through a combination of lectures and group projects.

**273 (I), (II). INTRODUCTION TO SIMULATION OF SYSTEMS OPERATIONS**

The use of computer models to analyze the operation of business and economic systems. Building such models; their inherent limitations. Examines applications from simple machine replacement and scheduling cases to more complex new product planning and media selection cases. (Also listed as I.E. 273.) Prerequisite, GB FIN 253 desirable.

**274 (I). REAL ESTATE FINANCE**

A problem-oriented examination of financial practices, institutions and methods of analysis related to real estate investment. Topics include investment theory, taxation and government programs. Prerequisite, GB FIN 201, 270.

**275 (II). HOUSING ANALYSIS**

An historical perspective of the development of housing markets and programs in the U. S., experience in applying market analysis to housing, and an explanation of government legislation related to housing. Prerequisite, GB FIN 270.

**333. MANAGEMENT INTERNSHIP PROGRAM**

Summer service with a cooperating business firm or governmental agency. The student undertakes responsible duties and participates in managerial activities under supervision of experienced executive personnel. A written report is required. With permission of department chairman.

**335 (I). INVENTORY CONTROL**

Mathematical modeling applied to control of inventory investments. Emphasis is also on the recognition of relevant costs for the development and solution of appropriate models. Prerequisites, proficiency with finite and infinitesimal calculus, probability theory, matrix algebra, computer programming, and operations research methodology, or permission of instructor.

**385 (I), 386 (II). INDEPENDENT STUDY AND RESEARCH**

For qualified seniors, independent study and research on selected problems in Business Administration. With permission of the department chairman. Credit, 1-6.

**391. SEMINAR IN URBAN PROBLEMS**

An analysis of both policy and managerial issues in urban communities, viewed in the context of the contemporary economic and social conditions of such areas.

**393 (I), (II). SENIOR HONORS SEMINAR**

Advanced study and research on selected topics in Business Administration and related disciplines. Available only to seniors with 2.8 average or better, and/or permission of instructor. May be taken both semesters.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Management**

Chairman of Department: Associate Professor Arthur Elkins. Professors Carlisle, Conlon, Hare, Litterer, McGarrah, Michael, Odiorne, Wortman, Young; Associate Professors Bornstein, Butterfield, Chen, Claunch, Finch, and Sabin; Assistant Professor Bryant; Lecturers Bloodsworth, McAuley.

|                                                                                                                 |         |

| Two Management Electives                                                                                        |         |
| Free Electives, to complement                                                                                   | 24      |
| Management courses, and career and general education objectives. (May include additional management electives.) |         |

**201 (I), (II). PRINCIPLES OF MANAGEMENT**

Introduction to the fundamentals of the management of organizations. Survey includes behavioral background of formal organizational life, organizational design, integrating factors in collective behavior, organizational change, systems analysis, techniques of decision-making and control, the organization and its environment, and the nature of management theory.

**211 (II). BUSINESS INFORMATION SYSTEMS**  
(See ACCTG 211.)

**214 (I), (II). PERSONNEL MANAGEMENT**  
Principles and policies followed by management in recruitment, development, direction, and control of personnel.

**230 (I), (II). MANAGERIAL BEHAVIOR**  
Principles of human behavior in organizations: understanding of one's self as a person and as a manager; development of interpersonal managerial skills. Prerequisite, MGT 201.

**231 (I), (II). ADMINISTRATIVE THEORY**  
Principles of administration, modern organization theories, specialization, functionalization, coordination, planning and control,

authority status, leadership, decision-making, communication, and power-structuring. Prerequisites, MGT 201, 230.

**234 (II). WAGE AND SALARY ADMINISTRATION**

Objectives, procedures, and problems involved in establishment and administration of operative and executive compensation plans. Prerequisite, MGT 214.

**247 (II). PRODUCTION MANAGEMENT I**  
Basic principles of production management. Use of statistical, mathematical, and simulation methods in production or operations.

**248 (I). PRODUCTION MANAGEMENT II**  
Application of principles and analytical techniques to design and operation of production systems. Quality control, inventory and production control. Prerequisite, MGT 247.

**253 (I). INTRODUCTION TO MANAGEMENT SCIENCE**  
(See GB FIN 253.)

**254 (II). TOPICS IN MANAGEMENT SCIENCE**  
(See GB FIN 254.)

**265 (I), (II). BUSINESS AND ITS ENVIRONMENT**

A critical examination of the social, political, technological, and ethical issues confronting the contemporary manager and the modern corporation. Competing concepts of the role of business in society. Prerequisite, junior standing or permission of instructor. (Also listed as GB FIN 265.)

**341 (I). MANAGEMENT DECISION SIMULATION**

Participation in management of a firm in a simulated industry. Students, organized into management teams, apply their knowledge of business administration and economics in a competitive struggle for profit and market position. Prerequisite, senior standing or permission of instructor.

**342 (II). PLANNING AND CONTROL SYSTEMS**

Systems coordinating sales, production, finance, and other business functions and producing information required for adjustment and reformulation of plans over time. Both single-use and continuous-use plans. Design of organization structure and development of control criteria. Prerequisite, senior standing.

**344 (I). MANAGEMENT - UNION RELATIONS I**

Comparison of union-management objectives, functions, and structures, including scope and impact of union penetration into areas of managerial authority. Prerequisite, MGT 201 or 214.

### 345 (II). MANAGEMENT - UNION RELATIONS II

Problems in interpretation and administration of collective bargaining agreements, studied by the case method of analysis. Prerequisite, MGT 344 or permission of instructor.

### 348. INTERNATIONAL MANAGEMENT

A taxonomy of educational, political-legal, sociological-cultural, and economic constraints provides a framework for analyzing management in an international or non-U. S. context. Managerial functions, policy and strategy areas, and current issues are discussed within the context of these constraints.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 391 (I). SEMINAR IN ADMINISTRATION

Advanced study and individual research in theory and practice of administrative organization and behavior. Prerequisite, senior standing and permission of instructor.

### 392 (II). SEMINAR IN PERSONNEL MANAGEMENT

Advanced study of current problems in development and administration of personnel problems. Research methodology and recent research findings emphasized. Each student required to complete a major research project. Prerequisite, senior standing and permission of instructor.

### 393 (I), (II). SENIOR HONORS SEMINAR

Advanced study and research on selected topics in Business Administration and related disciplines. Administration and related disciplines. Available only to seniors with 2.8 average or better, and/or by permission of instructor. May be taken both semesters.

### 394 (II). SEMINAR IN OPERATIONS MANAGEMENT

Specialized topics and advanced techniques in production and operations management. Prerequisite, MGT 247.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Marketing

*Head of Department:* Professor Jack S. Wolf. Professors Frederick, Paul, Smith; Associate Professors Barber, Buell, Guiltinan, Johnson, Lander, Monroe, Sawyer, Schwartz, Worthing; Assistant Professor Schewe

### Curriculum in Marketing

Required SBA "core" courses

Credits

12

Required course in the major: MKTG

3

216, Marketing Management

Functional Courses (any two of the following):

6

MKTG 221, Product Planning and Development

MKTG 222, Marketing Communications

MKTG 223, Distribution Channels and Systems

MKTG 224, Analysis for Pricing Decisions

MKTG 225, Sales Management

Tool Courses (any two of the following):

6

MKTG 210, Buyer Behavior

MKTG 212, Marketing Research

MKTG 214, Marketing Models

Expansive Courses (any one of the following):

3

MKTG 213, Advanced Marketing Research

MKTG 219, Marketing Strategy

MKTG 237, International Marketing

MKTG 391, Seminar in Marketing

MKTG 385-6, Independent Study and Research

One Advanced Behavioral Science Elective

3

One Advanced Economics Elective

3

Total Program Credits

36

Free Elective Credits

24

### 201 (I), (II). FUNDAMENTALS OF MARKETING

The role of marketing in our economic and social structure. The planning, distribution, pricing and promotion of goods and services to consumer and industrial markets.

### 210 (I), (II). BUYER BEHAVIOR

Analysis of buyer motivation and buying behavior. Explanatory theories of consumer market behavior and models of the decision-making process for winning patronage. Prerequisite, MKTG 201 or permission of instructor.

### 212 (I), (II). MARKETING RESEARCH

The systematic gathering, recording and analyzing of data about problems relating to the marketing of goods and services. Individual case study and research projects. Prerequisites, MKTG 201 and STAT 140 permission of instructor.

### 213 (II). ADVANCED MARKETING RESEARCH

Select areas of marketing research. Substantive problems of experimental research and research design and analysis. Class problems consist of laboratory or field experiments. Prerequisite, MKTG 212, or permission of instructor.

### 214 (I), (II). MARKETING MODELS

Relates a number of concepts and techniques to the analysis and solution of marketing management problems. Marketing models as aids to decision-making in marketing. Prerequisite, MKTG 201 or permission of instructor.

### 216 (I), (II). MARKETING MANAGEMENT

An advanced understanding of the nature and problems of marketing management: the environments facing the marketing manager, and the tools available for environmental analysis and control of marketing activities. Prerequisite, MKTG 201 or permission of instructor.

### 219 (I), (II). MARKETING STRATEGY

Exposure to realistic problems through computerized simulation or analysis of cases. Practice in seeking solutions to marketing problems through an integration of factors pertinent to strategy development. Prerequisite, senior standing or permission of instructor.

### 221 (I), (II). PRODUCT PLANNING AND DEVELOPMENT

Examination and analysis of the factors pertinent to effective product decisions by marketing managers. The organization of the products and markets, and methods for reducing new product risk. Prerequisite, MKTG 201 or permission of instructor.

### 222 (I), (II). MARKETING COMMUNICATIONS

Development effective marketing communication strategies based upon an understanding of the characteristics of audiences. Conceptual material from communications theory applied to advertising and other promotional problems. Prerequisite, MKTG 201, or permission of instructor.

### 223 (I), (II). DISTRIBUTION CHANNELS AND SYSTEMS

A systems approach to the management of all activities that facilitate the movement of goods and coordination of supply and demand. Prerequisite, MKTG 201 or permission of instructor.

### 224 (II). PRICING METHODS AND DECISIONS

Surveys the demand, cost, competitive, and legal determinants of price. Emphasis on the demand determinants of price including how buyers price in their purchasing decisions. Prerequisite, MKTG 201 or permission of instructor.

### 225 (II). SALES MANAGEMENT

The management of the personal selling function at field, intermediate and top levels. Topics include planning; time and territory management; supervisory functions; and control. Prerequisite, MKTG 201 or permission of instructor.

## School of Education

### 237 (I). INTERNATIONAL MARKETING

Background useful to United States business enterprises which market goods and services in foreign countries. Emphasis on the multinational firms, marketing operations and the design of marketing strategy. Prerequisite, MKTG 201 or permission of instructor.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

### 391 (II). SEMINAR IN MARKETING

Advanced study and individual research on selected problems and current issues in marketing. Each student completes a major research project. Prerequisite, senior standing or permission of instructor.

### 393 (I), (II). SENIOR HONORS SEMINAR

Advanced study and research on selected topics in Business Administration and related disciplines. Available only to seniors with 2.8 average or better, and/or by permission of instructor. May be taken both semesters.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4.*

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

### RELATED COURSES:

ACCTG 272 Administrative Costing and Control

GB FIN 241 Management of Traffic and Physical Distribution

GB FIN 253 Introduction to Management Science

MGT 265 Business and Its Environment

MGT 342 Planning and Control Systems

*Acting Deon:* Louis Fischer. *Acting Associate Deon:* Grace J. Craig. *Assistant Deon for Graduate Affairs:* Norma Jean Anderson. *Assistant Deon for Teacher Education:* Richard J. Clark. *Acting Director of Administration:* Karl W. Broekhuizen.

Professors Allen, A. Alschuler, E. Anderson, Anthony, Blanchard, Cappelluzzo, Carew, Ertel, Fredrickson, Gentry, Ivey, Jones, Jordan, Kornegay, Olim, Reed, Schimmel, Scribner, Seidman, Simon, Ulin, Viera, Weinstein, Wellman, Wolf, Woodbury, Wyman; Associate Professors Bunker, Coffing, Damerell, Day, Eddy, D. Evans, Eve, Fanslow, French, Griffiths, Hambleton, Hutchinson, Jarvesoo, Konicek, Lauroesch, Quilling, Rudman, Schultz, Schuman, Sims, Sinclair, Speidel, Sullivan, Suzuki, Thelen, Thuemmel, Turner, Urch, E. Washington, K. Washington, White; Assistant Professors Adams, L. Blane, Brandon, Bryniawsky, Caban, Campbell, Collard, Dye, Eisman, Elliott, Erickson, J. Evans, Flight, Forman, Gluckstern, Gorth, Gourley, Greene, Greenebaum, Hall, Hruska, Karlson, Lawson, Love, Mackin, Masalski, Melnik, Mills, Miltz, Nieves, Nuttall, Peelle, Raman, Reichmann, Sheehan, Streets, Swaminathan, Wagschal, Wideman, Wuertner; Lecturers I. Alschuler, Blain, Batchelder, Carney, George, Jackson, Kamin, Lamb, McGowan, Martin, Navon, Qamar, Ramsey, Russell; Instructors Dumas, Heide, Patrie.

Adjunct Faculty: Professors Edelman, Giladi, Hurst, Locke, Tippo, Venman; Associate Professors Atwell, Beals, Burn, T. Clark, Gulko, Lockwood, Schumer; Assistant Professors Bean, S. Blane, Daniels, Delaney, Forsyth, Higgins, Keochakian, Kraus, Martin, Preston, Royer, Stanton, White; Lecturer Harris.

Freshmen interested in becoming Education majors are initially admitted to the University as Pre-Education majors. Students interested in becoming Education majors, and other students interested in receiving teaching certification through the School of Education, should take the introductory course "Kids, Schools and the School of Education," in their freshman year.

The School of Education provides students a variety of alternatives. Revision and re-evaluation of curriculum and structure is continual; therefore, some new programs may not be included in the following information.

The following are School of Education policies and procedures pertaining to undergraduates:

#### I. The Education Major

A. There are two types of Education majors:

1. Students enrolled in Teacher Education Council programs, usually on the elementary level.
2. Non-teaching majors.

#### B. The requirements of the Education major:

##### 1. Teacher preparation

- a. Completion of the University core requirements.
- b. Completion of 27 additional credits in Arts and Sciences.
- c. Completion of at least 30 credits in Education.
- d. Completion of the course "Kids, Schools and the School of Education: An Introduction."
- e. Acceptance by and completion of a Teacher Education Council (TEC) program.
- f. Maintenance of a minimum 2.0 cumulative average.
- g. Have at least 15 graded credits in residence at the University.
- h. May not use more than 45 credits in Education toward the bachelor's degree, without prior approval.

##### 2. Non-teaching major

- a. Must complete a,b,c,f,g, and h, of Teacher Preparation requirements.
- b. Must have faculty sponsor and cluster approval for program which includes at least 30 credits in Education.
- c. Program outline, with signatures of faculty sponsor and cluster chairperson, must be submitted to the Education Advising Office for final approval.
- d. May not seek certification; may not student teach.

#### II. Organization of the School of Education for Undergraduates

- A. All students who are interested in becoming Education majors are the responsibility of and are responsible to, an advisor assigned by the Education Advising Office, located in 125B School of Education. The staff of the EAO are the advisors for these students. This and the "Kids" course are usually students' first contacts with the School of Education.
- B. Students seeking elementary teacher certification must enter a TEC program. This usually occurs between the end of the third semester and the fifth, depending upon the program, and can only be done after a student has completed the course "Kids, Schools, and the School of Education: An Introduction." Once a student enters a program,

the program staff becomes the advisor for the student, and will remain so until the student graduates or enters another program.

- C. Students seeking secondary certification are usually not Education majors. They, in most cases, should be earning degrees in academic majors. Upon receiving the approval of their major departments, they are eligible to apply for entrance into a TEC program.
- D. Students seeking a non-teaching major must design a program of at least 30 credits in conjunction with a faculty sponsor and with the approval of the cluster in which the student and his or her sponsor are concentrating. The program of study must be approved by the Education Advising Office for the Dean for Teacher Education.

### III. Course Requirements

- A. All Education majors seeking certification must complete the course "Kids, Schools, and the School of Education: An Introduction" or its equivalent.
- B. Students seeking certification must complete a TEC program.
- C. A \$30.00 Practice Teaching Fee will be collected from all students who practice teach in TEC programs.

### IV. Grades

- A. All School of Education courses are Pass/Fail. No undergraduate may receive a letter grade in an Education course.
- B. Transfer students must earn at least 15 graded credits in residence at the University. At least 6 credits should be taken for letter grades during the first semester of residence to establish a cumulative average.
- C. All students must have a cumulative average of at least 2.0 to be eligible for a TEC program.

### TEACHER EDUCATION PROGRAMS

The Teacher Education Council (TEC) is responsible for the School's undergraduate and graduate teacher preparation programs. The Council's major focus is on creating new options and alternative routes for meeting undergraduate degree and certification requirements. The Council presently sponsors more than 15 programs which have different goals, approaches, lengths, and admissions criteria. All programs include a clinical experience. Specific information on individual programs is available from the School of Education Advising Office in 125B, School of Education. Following is a list and short description of representative teacher education programs.

**Elementary Certification.** Typically, students earning an elementary teaching certificate are majors in the School of Education. The School offers a variety of elementary teacher prepa-

ration programs from which the student may choose. Some examples of these alternatives, followed by their cluster abbreviation, are:

**AMHERST-PELHAM ELEMENTARY —** A wide range of practical alternatives for elementary majors. The program has various entry and exit points, and works in the Wildwood, Pelham and Fort River schools. (DEPM)

**ANISA —** An intensive two-year program offering prospective early childhood teachers a comprehensive theoretical approach to teaching designed to foster maximum development in children. (DEL)

**EARLY CHILDHOOD EDUCATION —** A two-year program focusing on education and related services for children and their families during the child's first eight years. It emphasizes a broad social-science base with particular attention to the psychological, sociological and biological perspectives on human development. At least two student teaching experiences are incorporated into the program to integrate theory and practice. There are various areas of specialization within the program. (EPS)

**INTEGRATED DAY TEACHER EDUCATION PROGRAM (INTEP) —** A two-semester sequence open to elementary majors providing those competencies necessary to function effectively in integrated day classrooms or any educational setting where active learning is emphasized. (DEL)

**Secondary Certification.** Students seeking secondary certification are usually not Education majors. In most cases they are earning degrees in academic majors reflecting the subjects they wish to teach. Secondary students earn their certification by completing a secondary program. Some examples of current secondary programs, and their cluster abbreviations, are:

**ENGLISH EDUCATION —** A joint program with the English Department in the College of Arts and Sciences. All students desiring secondary certification in English do their student teaching through the English TEC program in the School of Education. Entrance into the program is based on selection by the English Education Committee, College of Arts and Sciences. (TD)

**PERSPECTIVES IN INTERDISCIPLINARY EDUCATION —** Designed for academic majors and BDIC students interested in interdisciplinary and interpersonal learning. Open to both undergraduate and graduate students. (TD)

**SECONDARY MATHEMATICS —** A program for mathematics majors seeking to become secondary school mathematics teachers. Admission is by joint approval of the Education Advisors in the Department of Mathematics and Statistics and the Secondary Mathematics Program Advisors in the School of Education. (DEL)

**SECONDARY SCIENCE AND SOCIAL STUDIES —** A one-year program designed for students from other academic departments who wish to prepare for a career as either a secondary science or social studies teacher. (DEPM)

**Elementary or Secondary Certification.** A number of programs are concerned with grades K-12. They lead to elementary certification for Education majors and to secondary certification for majors in other discipline areas. Some examples are:

**EDUCATION FOR A CHANGING WORLD —** A program whose broad objective is to prepare elementary and secondary teachers to educate their students with skills and values appropriate to a rapidly changing world. Following an introductory course, each student decides on an area of emphasis — Environmental, Education, International Education, Global and Future Studies, or some combination of these areas. (EPS)

**EXPLORATIONS! —** For those with the self-direction to design their own curriculum, learning environment and teaching experiences. Explorations! is a wholly contained one-year program leading to either elementary or secondary certification for students who want to be totally responsible for making their own choices. (HAPPS)

**OFF-CAMPUS —** Elementary and secondary students practice teach in schools as far away as California and England, working with innovations such as differentiated staffing, flexible scheduling, integrated day, open classroom. (DEL)

**URBAN EDUCATION (CUETEP — Center for Urban Education Teacher Education Program) —** Prepares elementary or secondary teachers to have, in addition to concepts and skills relating to learning theory, the political sophistication necessary to become reform strategists. The program is flexible, with multiple entry and exit points. (DEL)

**Specialized Certification.** The School of Education has a number of programs that prepare students for specialized areas. Programs currently in operation are:

**COOPERATIVE EDUCATION** — For secondary teaching candidates interested in the growing field of cooperative education; that is, working with high school students who spend half their time in classroom learning and half in work/learning experiences in hospitals, business offices, museums, and other community services. (DEPM)

**AGRICULTURAL EDUCATION** — For students with a major in the College of Food and Natural Resources interested in becoming vocational agricultural teachers. Combines practical experience and professional education. Student teaching sites throughout Massachusetts. (DEPM)

**SPECIAL EDUCATION** — Prepares selected prospective teachers at the B.A. level to serve as Classroom Based Diagnostic Resource Teachers (CBDRT) in an innovative, non-categorical role. The CBDRT is a specifically trained special educator with skills in determining the needs and strengths of children perceived as having learning and/or behavior problems, in assessing the resource available, and in facilitating optimum utilization of the regular classroom environment to successfully provide positive learning and growth experiences for such children. (TD)

**BILINGUAL/BICULTURAL EDUCATION PROFESSIONS** — An intensive two-year program for students committed to bilingual/bicultural education. Features laboratory and clinical experiences in the community and the classroom prior to elementary certification. (TD)

**Non-Certification Programs.** The Teacher Education Council also sponsors programs not leading to certification. A current example is:

**HUMAN SERVICES** — Designed to train undergraduates in new and effective ways of educating people in institutional settings other than schools, including prisons, mental hospitals, community mental health centers, detention centers, and state agencies. Emphasis on on-site training and experiential learning. (HAPPS)

#### **LEARNING EXPERIENCES**

The following offerings, by cluster, are open to students throughout the University. Additional courses are available to students enrolled in specific TEC programs.

#### **DESIGNS FOR EFFECTIVE LEARNING (DEL)**

##### **205. AESTHETICS ELEMENTS IN THE TEACHING-LEARNING PROCESS**

To enable teachers to increase their creativity and to use the arts in the classroom through

improvisation workshops, discussions, readings and curriculum projects.

##### **257. INTRODUCTION TO URBAN EDUCATION**

Discussion groups survey urban and suburban schools, discuss the process of learning in urban classrooms, study the effects of the present curriculum, and survey various innovative techniques as they apply to urban schools.

##### **259. PRINCIPLES AND METHODS IN TEACHING ELEMENTARY SOCIAL STUDIES**

Evaluation of various state, commercial and project social-studies curricula in terms of instructional strategies. Practical experience in creating a social studies unit.

##### **260. THE ELEMENTARY SCHOOL CURRICULUM**

The content and methodology of the elementary school curriculum. Emphasis on the unit method and activity programs. Prerequisites, electives in Foundations of Education and Child Psychology, Educational Psychology, or Human Development.

##### **261. PRINCIPLES AND METHODS IN TEACHING READING AND LANGUAGE ARTS IN THE ELEMENTARY SCHOOLS**

Approaches to the teaching of reading and language arts in the elementary schools. Innovations in methods and materials.

##### **262. PRINCIPLES AND METHODS IN TEACHING ELEMENTARY SCIENCE**

Aid in preparing pre-service students for teaching science in elementary schools. Methods, materials, and latest curriculum work.

##### **263. PRINCIPLES AND METHODS IN TEACHING ELEMENTARY MATHEMATICS**

Introduction to the structure of mathematics, and to the role, methods, material, and curricular aspects of mathematics education in the school.

##### **268. CURRICULUM DEVELOPMENT IN URBAN EDUCATION**

Student development of new and innovative curricula for urban schools and investigation of what kinds of curriculum development are relevant to inner-city environments. A post-urban internship consisting of lectures, seminars and field experience.

##### **272. TEACHING READING TO SPECIAL POPULATIONS K-12**

Approaches to the teaching of reading to such special populations as the disadvantaged, the gifted, and the emotionally disturbed, with stress on the individualized and experience approaches. One group studied intensively.

##### **317. INTRODUCTION TO COMPUTER USE IN TEACHING**

To introduce novices to uses of the computer in the teaching/learning process.

##### **318. INSTRUCTIONAL APPLICATIONS OF COMPUTERS**

Each student proposes, designs, develops, implements and documents a unit of computer-assisted instructional material.

##### **330. ECONOMICS OF EDUCATION**

An introduction to economists' approaches to education as an investment in human capital. Review of the literature and discussion of issues raised by such a general view of education.

##### **332. PRINCIPLES OF EDUCATIONAL AND PSYCHOLOGICAL TESTING**

Basic principles of measurement. Topics include descriptive statistics, reliability, validity, principles of test-construction, item analysis and a review of standardized tests.

##### **361. SCIENCE EDUCATION IN THE ELEMENTARY SCHOOLS**

For teachers or other interested persons who wish to bring their knowledge of methods, materials, and curriculum up to date. Laboratory approach.

##### **371. URBAN COMMUNITY RELATIONS**

The interrelationship of inner-city communities and established power within the school system, community control, participation, and decision-making in education and development of alternatives in power relationships. Lecture, discussion and field experience.

#### **DIVISION OF EDUCATIONAL PLANNING AND MANAGEMENT (DEPM)**

##### **216. EVALUATION MODELS**

Seminar utilizing the writings of Cuba, Stufflebeam, Stake, Pace, Serevin, Bloom, and Hammond. Emphasis on philosophies of evaluation, variables employed in the various models, and the generation of new evaluation designs.

##### **217. LEARNING SYSTEMS DEVELOPMENT**

For educational specialists, administrators, and classroom teachers. Procedures for developing instruction that meets student needs, including techniques of accountability, individualizing instruction, using instructional objectives, and evaluation techniques.

##### **218. RESEARCH METHODS IN EDUCATION**

An interdisciplinary course on research methods and scholarship in psychological, sociological, economic, political, historical, and philosophical studies of education. Prerequisite:

sites, study in a discipline and permission of instructor.

**231. ISSUES IN FREEDOM AND RESTRAINT IN ACADEMIC POLICY**

The sociological, philosophical, economic and anthropological considerations found in freedom and restraint conflict, via readings in periodicals and discussions.

**232. STUDENT REVOLUTION AND CURRICULUM CHANGE**

Sources, mechanisms, and consequences of social and cultural change; analysis of theories of change and of important theoretical studies in that area. Limited enrollment.

**233. EDUCATIONAL LAW**

Introduction to the legal aspects of public education including rights and liabilities of school boards, teachers, and pupils; attention to recent legal interpretations.

**284. ORGANIZATION AND ADMINISTRATION OF A DISTRIBUTIVE EDUCATION PROGRAM**

Activities necessary to initiate, maintain, and improve a Distributive Education Program. Organization and administration at the secondary level.

**286. ORGANIZATION AND ADMINISTRATION OF A COOPERATIVE EDUCATION PROGRAM**

Organization and administration of the Cooperative Education Program at the secondary level. Those activities necessary to initiate, maintain and improve Cooperative Education.

**287. VOCATIONAL ADULT EDUCATION**

Organization and administration of vocational adult classes; the interrelationships between secondary and adult education.

**288. DIRECTED OCCUPATIONAL EXPERIENCES (INTERNSHIP PROGRAM)**

Eight weeks of directed occupational experiences in each of the three major fields of distribution (retail, wholesale, service) planned individually by student, cooperating business, and vocational-technical education staff prior to enrolling. Credit, 2-4

**289. METHODS AND MATERIALS FOR DISTRIBUTIVE EDUCATION**

Securing, evaluating, organizing, and presenting instructional materials and experiences. For prospective distributive-educational personnel. Credit, 2.

**310. PRINCIPLES AND METHODS IN TEACHING SOCIAL STUDIES IN THE SECONDARY SCHOOLS**

Possible goals and strategies for secondary-

school social-studies instruction, to help develop a defensible rationale for teaching. Primarily a preservice offering.

**312. PRINCIPLES AND METHODS IN TEACHING SECONDARY SCIENCE**

The nature and content of science, learning strategies, and values of self and society, to help the preservice science teachers formulate their own philosophy and rationale for education in science.

**324. DESIGN AND MANAGEMENT OF SCHOOL INFORMATION SYSTEMS**

Systems analysis, problem definition, hardware selection, site preparation, systems design, staff selection, information collection and display, programming and procedure documentation standards, and user-training for various types of information systems. Concurrent internship in an appropriate school information center expected. Prerequisite, knowledge of computer programming.

**333. INTRODUCTION TO RESEARCH FOR NON-RESEARCH MAJORS**

Purposes of research, different kinds of research (i.e., historical, survey, and experimental models), and specific research methodology (drawn from statistics, experimental design, and measurement and evaluation).

**355, 356 (I), (II). INTRODUCTION TO STATISTICS AND COMPUTER ANALYSIS**

Elementary descriptive statistics, control of the computer terminal inferential statistics, and some programming concepts with a computer language (FORTRAN) for unique solutions of problems. First semester (or permission of instructor) prerequisite for second semester.

**358, 359 (I), (II). INTRODUCTION TO SCHOOL ADMINISTRATION**

Introduction to each of the many disciplines on which an administrator calls. Members of the faculty of the University and the Five Colleges lecture on their own disciplines.

**372. PRINCIPLES AND PRACTICES IN VOCATIONAL EDUCATION**

Secondary and post-secondary programs and the relationship of vocational education to the total educational program.

**373. APPRENTICE TEACHING IN AGRICULTURE**

A full year (in absentia) teaching agriculture, horticulture, and related subjects under a supervising teacher in a selected school. Credit, 6.

**375. METHODOLOGY AND MATERIALS FOR TEACHING IN OCCUPATIONAL EDUCATION**

A seminar approach to special methodology in

occupational education. Content based on experiences of students in teaching. Laboratory section in Microteaching. Credit, 1-4.

**376. PREPROFESSIONAL LABORATORY EXPERIENCE IN OCCUPATIONAL EDUCATION**

Teaching experience in occupational education programs, including directed observation of instructional activities, teaching individuals and conducting occupational placement, and/or off-farm instruction. Credit, 1-4.

**DIVISION OF HUMANISTIC APPLICATIONS OF SOCIAL AND BEHAVIORAL SCIENCES IN EDUCATION (HAPPS)**

**220. HUMAN RELATIONS LABORATORY**  
For prospective elementary teachers with several basic skills in human relations. Teacher trainees participate in exercises in attention, flexibility, and decision making in human relations.

**221. STRENGTH TRAINING**

A way of working with teacher, counselor, and administrator performance through simulation and videotape feedback. Stress on what kind of school the personnel project to their students. School personnel (pre- and in-service) are taught to evaluate the responses, feelings, and perceptions of students. A laboratory course with assigned readings. Three class hours. Prerequisite, student teaching.

**222. THE EDUCATION OF THE SELF**

Educational strategies for increasing self-knowledge. A laboratory approach to those processes, concepts, and skills leading toward self-observation, pattern clarification, and the development of personal designs for response-experimentation are pursued. Journals and final papers. Prerequisite, permission of instructor.

**277. PRINCIPLES OF SCHOOL GUIDANCE**

The nature of guidance and its need in the schools. An overview of an adequate guidance service for a school system.

**378. PRACTICUM IN HUMANISTIC CURRICULUM DEVELOPMENT**

Models for the development of humanistic curricula. Students employ one or more models in writing their own curricula, and in evaluating their efforts. Prerequisite: EDUC 222.

**379. VALUE CLARIFICATIONS FOR TEACHERS**

To help teachers clarify their own values and how these values affect their students in and out of the classroom.

## EDUCATIONAL POLICY STUDIES (EPS)

### 225. EDUCATION IN AFRICA

Major trends in education on the developing African continent. Emphasis on the changes since independence. The impact of cross-cultural forces at work in education.

### 226. CURRICULUM DEVELOPMENT IN INTERNATIONAL EDUCATION

The resources and concepts of curriculum development in international education. Students develop units that can be taught in elementary or secondary schools.

### 228. LABORATORY IN CROSS-CULTURAL STUDIES

To develop a sensitivity to cultural differences by examining the elements of cross-cultural communication in an educational context. Primarily for teachers and those working in other educational fields. Experientially based (employing field work, role-playing, and gaming), and balanced by analytical readings, discussions, and independent study. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 229. INTERNATIONAL EDUCATION

An introduction to certain portions of international education. The issues surrounding education as a tool of development, education in a cross-cultural context, and education through international exchange of persons and ideas. Substantial foreign-student participation. Readings, class discussion, learning games, and individual study projects. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 242. CONTEMPORARY EDUCATIONAL PHILOSOPHIES

Critical examination of selected contemporary philosophies of education. Attention to social implications and to relevance to educational practice. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 243. DESIGNING AND CONDUCTING ACTIVITIES TO HELP ADOLESCENTS DEVELOP AND LIVE BY THEIR VALUES

How to design and conduct classroom activities that when carefully sequenced can help adolescents develop and live by their values.

### 245. METHODS OF STIMULATING THE EXPLORATION OF VALUES

Various ways of utilizing group dynamics methodology to stimulate value exploration of psychological issues and social issues confronting contemporary youth, such as drugs, race and sex.

### 250. CONCEPTIONS OF LIBERAL EDUCATION

Traditional and modern conceptions of liberal

education; their relevance to contemporary societies and education.

### 251. FOUNDATIONS OF EDUCATION

Selected problems and issues in modern education studied through the discipline of educational sociology, educational history, educational philosophy, comparative education, or social psychology. Independent study of field experiences optional. Possible foci are educational aims, societal expectations of the schools, church-state relations, professionalism, academic freedom, curriculum and methodological emphasis, urban education, and educational innovation. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 254. EDUCATIONAL ANTHROPOLOGY

Relevant concepts from cultural anthropology (such as change, human behavior and interaction, and cultural determinants within American culture) applied to education. The culture of the schools and the role of the subculture in the culture as a whole.

### 265. EDUCATING THE DISADVANTAGED CHILD

The issues and problems in educating disadvantaged children. Emphasis on urban elementary education; rural education problems also addressed.

### 290. OBSERVATIONAL TECHNIQUES IN EARLY CHILDHOOD EDUCATION

Observation of early childhood educational programs of various kinds serving disadvantaged as well as middle-class children. Four laboratory hours per week during the first four weeks of the first semester. Credit, 1.

### 291. EARLY CHILDHOOD EDUCATION MOVEMENT

Contemporary purposes, programs, and problems of early childhood education, from an historical and philosophical perspective. A one-semester graduate seminar. Meets state requirements for Teacher Certification.

### 292. SEMINAR IN CURRICULUM DEVELOPMENT FOR EARLY CHILDHOOD EDUCATION

Curriculum components for children in early-education programs designed to follow each field-teaching experience. Limited to students specializing in early childhood education.

### 293, 294 (I), (II). LABORATORY COURSE ON USING HUMAN DEVELOPMENT KNOWLEDGE IN EDUCATION

Parallels field-teaching experiences for students concentrating on early childhood education. Factors such as sex, environment, social status, and culture in relation to growth rates and patterns. Data from the community in which each teaching experience takes place.

### 295. ADVANCED SEMINAR IN LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD EDUCATION

The relationship between language and thought. Emphasis on contemporary language development programs in early childhood education. An analysis of linguistics.

### 298. THE INDIVIDUAL AND ORGANIZATION OF HIGHER EDUCATION

Analysis of the effects of institutional and organizational structure and values on individual development.

### 299. ALTERNATIVE STRUCTURES IN HIGHER EDUCATION

Review and analysis of organizational structures of institutions of higher education; design of alternative models for governance and learning. Credit, 4.

### 319. EDUCATION AND PUBLIC POLICY

Selected issues and problems concerning the interaction between education and politics at the local, state, and national levels.

### 333. EDUCATION IN ASIA

The relationship between education and society in the major nations of the Far East. The process of change in educational thought and institutions; the conflict between tradition and contemporary forces.

### 365. EDUCATION IN LATIN AMERICA

The developmental history of the educational structures and systems of Latin America. Emphasis on the effectiveness of the various educational models. Analysis of related case studies.

### 366. EDUCATION AND DEVELOPMENT

The relationship between the development of national and regional areas of education. Systems analysis introduced; areas for potential research projects identified.

### 368. EDUCATIONAL PATTERNS AROUND THE WORLD

The processes and problems of educational development in selected areas throughout the world; the interrelationship between education and cultural forces.

### 369. PRACTICUM IN INTERNATIONAL EDUCATION

Supervised practical experience in various areas of international education. Credit, 1-6.

### 387. SPECIAL PROBLEMS IN INTERNATIONAL EDUCATION

Independent work on special problems or in certain areas of international education. Credit, 1-6.

TRANSDISCIPLINARY EDUCATION (TD)

227. CURRICULUM DEVELOPMENTS IN MUSIC AND SOUND IN EDUCATION  
A survey of methods, materials, techniques, and problems related to the innovative use of music and sound in the classroom as an aesthetic medium for enhancing learning of all kinds. Development of experimental innovations and their applications.

230. CURRICULUM INNOVATIONS IN MOVEMENT AND DANCE IN EDUCATION  
A survey of methods, materials, techniques, problems, and relevant research literature, related to the use of movement and dance in the classroom as an aesthetic medium for enhancing learning of all kinds. Experimental application of innovations developed in the course.

235. EDUCATIONAL MEDIA, TECHNOLOGY AND SYSTEMS  
The characteristic, capabilities, applications and implications of a variety of media to a variety of educational strategies.

236. AUDIOVISUAL INFORMATION TRANSMISSION  
Available knowledge and technology useful in the design of audiovisual materials. A search for principles useful in planning materials to aid in cognitive and effective experiences in educational contexts.

237. MEDIA PRODUCTION SURVEY  
Students prepare slides, graphics, recordings, and still and motion pictures for use in an educational program. Designed for teachers, trainees, and specialists.

238. PRE-PRODUCTION CREATIVITY OF VISUAL MEDIA  
How to visualize ideas, concepts and curricula, utilizing all video and cinemagraphic techniques of live action, animation, cuts, dissolves, freeze frames, slow motion, etc. to communicate them interestingly and effectively.

241. EDUCATIONAL FILM PRODUCTION  
Theoretical data and project applications: students produce educational messages in a motion picture film format through the use of portable video tape. 2 2-hour lectures.

309. PRINCIPLES AND METHODS IN TEACHING SECONDARY ENGLISH  
Purposes, problems, issues, methods, and materials in the teaching of English at the secondary level. Discussion, lectures, case studies, projects. Does not satisfy core requirements. Prerequisite for student teaching in English. Credit, 4.

311. PRINCIPLES AND METHODS IN TEACHING SECONDARY MATHEMATICS  
The nature and content of mathematics, learning strategies, and values of self and society; to help pre-service mathematics teachers formulate their own philosophy and rationale for education in mathematics.

357. TEACHING THE HANDICAPPED THROUGH MEDIA  
Professional preparation in educational media and technology. Partially fulfills requirements for the educational media and technology program.

360. EDUCATIONAL BROADCASTING  
A history of educational broadcasting. The current status, development, and availability of radio and television programming for educational purposes. Evaluation of radio and television in accordance with instructional objectives.

362. EDUCATIONAL TV WORKSHOP  
For teachers and teacher interns. The hardware of television; experimental use of television in solving educational problems.

367. PREPARATION AND USE OF AUDIO-VISUAL MATERIALS  
Machines, materials, and techniques for teaching groups of students.

Human Development

Head of Department: Professor Ellis G. Olim.  
Associate Professor Collard; Assistant Professors Craig, Forman, Karlson, Turner; Instructor Dumas.

Additional Staff: Lecturers Russell, Navon, Melrose, Batchelder, Alschuler, Blain; Day Care Center Staff Kaimin, Fletcher, Lamb, Martin.

The Department of Human Development is provisionally affiliated with the School of Education, while details of formal affiliation are being negotiated. For further information, contact the Academic Affairs Office at the School of Education.

MAJOR IN HUMAN DEVELOPMENT

|                                                                         | Credits |
|-------------------------------------------------------------------------|---------|
| General Education                                                       | 30      |
| Pre-Professional                                                        | 12      |

|                                                                |   |
|----------------------------------------------------------------|---|
| III. Human Development Core Courses                            |   |
| HUMDEV 152, Basic Concepts of Human Development                | 3 |
| HUMDEV 270, Child Development                                  | 3 |
| HUMDEV 370, Human Development in Adolescence & Young Adulthood | 3 |

IV. Major Requirements  
Human Development majors are required to take a minimum of 27-semester hours of credit. Core courses (see III above) are counted toward the 27-hour requirement. Also, Human Development courses listed in V below may be counted toward the 27-hour requirement as well as any other courses described below in the description of courses.

|                                                                  |     |
|------------------------------------------------------------------|-----|
| V. Teacher Certification Requirements                            |     |
| HUMDEV 272, Observational Child Study                            | 3   |
| HUMDEV 381, Laboratory School Management                         | 3   |
| HUMDEV 382, Philosophy and Theories of Early Childhood Education | 3   |
| HUMDEV 383, Student Teaching                                     | 3-6 |
| HUMDEV 384, Internship in a Child-Serving Profession             | 3   |
| ART 252, Art for the Young Child                                 | 3   |
| EDUC 251, Foundations of Education                               | 3   |

VI. Special Professional and Educational Programs  
Special programs may be arranged. Students may elect a semester or two of study at the Merrill-Palmer Institute of Human Development. Please consult the Department for information on other special programs.

VII. Electives  
Students shall elect an additional number of courses to bring the total credit hours to at least 120.

## 151. BASIC CONCEPTS OF HUMAN DEVELOPMENT I

Human development viewed from a number of perspectives: historical, philosophical, cross-cultural, biological, political, moral, and intellectual.

## 152. BASIC CONCEPTS OF HUMAN DEVELOPMENT II

The three major psychological theories that attempt to explain the psychological basis of human development; Behaviorism, Psychoanalysis, and Humanistic Psychology. Emphasis on the personal development of the students. Required of students majoring in Human Development.

## 270. CHILD DEVELOPMENT

The child from the development point of view. Interaction of heredity and environment on development. Prerequisites, SOCIOL 101, or PSYCH 101, or permission of instructor.

## 272. OBSERVATIONAL CHILD STUDY

Directed experience in observation techniques with laboratory school children. Prerequisite, HUMDEV 270 or equivalent.

## 300. HUMAN DEVELOPMENT IN INFANCY

Development of the infant from birth to age two. Prerequisite, HUMDEV 270, or permission of instructor.

## 310. LANGUAGE AND COGNITIVE DEVELOPMENT

Language and cognition from the developmental point of view. The relationship between language and thought and changes in the relationship in the course of cognitive growth. Prerequisite, HUMDEV 270 or equivalent.

## 315. CROSS-CULTURAL STUDY OF PERSONALITY DEVELOPMENT

Personality development viewed cross-culturally. Prerequisite, HUMDEV 270, or permission of instructor.

## 350. RESEARCH METHODS IN HUMAN DEVELOPMENT

Introduction to methods of studying human development. Prerequisite, HUMDEV 270 or equivalent; may be taken concurrently with HUMDEV 270.

## 360. THEORIES OF HUMAN DEVELOPMENT

Major theories devised to explain human development. Emphasis on psychological theories and concepts. The relevance and relationship of biological, social, and anthropological concepts. Prerequisite, HUMDEV 270 or equivalent.

## 370. HUMAN DEVELOPMENT IN ADOLESCENCE AND YOUNG ADULTHOOD

Human development during the second dec-

ade of life. Emphasis on biological, psychological, and sociological aspects. Theories of adolescent development. Prerequisite, HUMDEV 270 or equivalent, or permission of instructor. Open only to Human Development majors.

## 375. THE GHETTO FAMILY

Family relationships and styles of life of lower socio-economic status families. Emphasis is on social and psychological factors that influence interpersonal relationships and life strategies among the poor. Prerequisite, HUMDEV 270, or permission of instructor.

## 376. ALTERNATE FAMILY STYLES

Study and comparative evaluation of the traditional nuclear monogamous family and alternative family structures developed in this society.

## 380. HUMAN DEVELOPMENT IN ADULTHOOD

Human development from young adulthood through old age. A social, psychological perspective of change across the adult life span. Prerequisite, HUMDEV 270 or equivalent, or permission of instructor.

## 381. LABORATORY SCHOOL MANAGEMENT

Principles and methods of early childhood education. Teaching methods and curriculum planning for two- to five-year-old children. Prerequisite, HUMDEV 270 or equivalent.

## 382. PHILOSOPHY AND THEORIES OF EARLY CHILDHOOD EDUCATION

Philosophy, theories and history of early childhood education. Field trips. Prerequisite, HUMDEV 381 or permission of instructor.

## 383. STUDENT TEACHING

Students plan, direct, and teach curriculum in the laboratory school under staff supervision. Prerequisite, HUMDEV 270. Credit, 3-6.

## 384. INTERNSHIP IN A CHILD-SERVING PROFESSION

Teaching or working with normal or exceptional children. Head Start children, or the emotionally disturbed. Prerequisite, HUMDEV 270 or permission of instructor.

## 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

## 389. FIELD STUDY

Credit, 1-15.

## 391-397. SEMINAR IN HUMAN DEVELOPMENT

Reports and discussion of current research topics and studies in Human Development. 1-3 class hours. Credit, 1-3.

Kenneth C. Picha, Dean; Joseph S. Marcus, Associate Dean; Melton M. Miller, Jr., Associate Dean; Howard D. Segool, Director, COMTECH

The School of Engineering has the following recommended program of common courses for the freshman year.

|                                                 | Credits  |
|-------------------------------------------------|----------|
| 1st Semester                                    |          |
| RHET 100                                        | 3        |
| MATH 131                                        | 4        |
| CHEM 110A                                       | 4        |
| ENGIN 103 or 104                                | 2 or 3   |
| Social Science Elective                         | 3        |
|                                                 | 16 or 17 |
| 2nd Semester                                    |          |
| Rhetoric Electives                              | 3        |
| MATH 132                                        | 4        |
| Humanities/Soc. Science or Science <sup>1</sup> |          |
| Elective                                        | 3        |
| ENGIN 103 or 104                                | 2 or 3   |
| PHYSIC 161                                      | 4        |
| Physical Education                              | 1        |
|                                                 | 16 or 17 |

<sup>1</sup>The Science Elective requires adviser's approval. Courses from the following departments: Biochemistry, Biology, Chemistry, Entomology, Geology, Microbiology, Physics, Astronomy or Zoology.

## School of Engineering Core Requirements

### Communication Skills

RHET 100  
Rhetoric Elective  
Humanities

3 Elective courses in the University catalog with a "C" designation

### Social Sciences

3 Elective courses in the University catalog with a "D" designation

Mathematics (NOTE: Minimum of 5 courses beyond trigonometry and analytical geometry)

MATH 131  
MATH 132  
MATH 165

Natural Science (NOTE: Minimum of 16 credits)

CHEM 110A  
PHYSIC 161  
PHYSIC 162  
2 Science Electives

### Engineering

ENGIN 103  
ENGIN 104

## ENGINEERING

### 100. INTRODUCTION TO ENGINEERING AND TECHNOLOGY (E)

Engineering and technology as the management and processing of energy, material, and information. Major engineering concepts such

is the system, feedback and optimization. The methods of engineering including analysis, design synthesis, and decision making. Case studies and student projects. Not open to engineering majors.

03. INTRODUCTION TO ENGINEERING A  
A series of one-credit modules to introduce the various fields of engineering. Each module self-contained. Not recommended for transfer students. Credit, 1-4.

04. INTRODUCTION TO ENGINEERING B  
A two-module course in FORTRAN IV programming and numerical methods designed to give a working knowledge of computer programming. Additional modules as described in ENGIN 103 may be elected. Credit, 1-4.

251. NUMERICAL METHODS IN ENGINEERING  
A computer-oriented course introducing application and theory of numerical interpolation, solutions of transcendental equations, quadrature, solution of simultaneous linear equations, solutions of ordinary differential equations, and solving some simple boundary value problems. Prerequisites, MATH 165 or equivalent and an elementary FORTRAN or APL course.

385, 386. SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### Chemical Engineering

Head of Department: Professor John W. Eldridge. Professors Cashin, Douglas, Laurence, Lenz, Lindsey, Middleman, Roblee, Short, Vanpee; Associate Professor Kirk, Kittrell, McAvoy; Assistant Professor Novak; Adjunct Associate Professor Chapplelear.

| SOPHOMORE YEAR                                 |         |
|------------------------------------------------|---------|
| 1st Semester                                   | Credits |
| CH E 125, Fundamentals                         | 3       |
| CHEM 160, Organic                              | 3       |
| CHEM 162, Organic Chemistry Lab.               | 1       |
| PHYSIC 162, General Physics II                 | 4       |
| MATH 165, Multivariable Calculus               | 3       |
| CH E 101, Chemical Engineering Practice I      | 1       |

| CH E 256, Chemical Engineering Heat Transfer       | 3       |
| CH E 257, Mass. Transfer                           | 3       |
| CHEM 286, Physical Chemistry                       | 3       |
| CHEM 288, Physical Chemistry Laboratory            | 2       |
| ENGL 331, Technical Writing                        | 2       |
| Elective                                           | 3       |
| CH E 202, Chemical Engineering Practice IV         | 1       |
|                                                    | 17      |

### SENIOR YEAR

|                                               |         |
|-----------------------------------------------|---------|
| 1st Semester                                  | Credits |
| CH E 358, Staged Operations                   | 3       |
| CH E 380, Kinetics and Reactor Design         | 3       |
| CH E 383, Process Evaluation                  | 3       |
| Electives                                     | 6       |
| CH E 301, Chemical Engineering Practice V     | 1       |
|                                               | 16      |
| 2nd Semester                                  |         |
| CH E 376, Process Control and Dynamics        | 3       |
| CH E 384, Process and Plant Design            | 3       |
| CH E 392, Seminar                             | 2       |
| CH E 361 Ch.E. Analysis I (or Math. Elective) | 3       |
| Electives                                     | 3       |
| CH E 302, Chemical Engineering Practice VI    | 1       |
|                                               | 15      |

Note: The electives must include one 3-credit mathematics course to satisfy University core requirements, at least three 3-credit humanities courses plus at least three 3-credit courses in the social sciences. Note that any ROTC study must be in addition to the normal load.

### OPTIONS

In addition to the standard curriculum listed above, the Chemical Engineering

Department offers five optional curricula, each of which provides an emphasis in one of the following fields:

Biochemical Engineering  
Business Administration  
Environmental Engineering  
Food Science  
Pre-Medicine  
Each option satisfies the requirements for the Bachelor's Degree in Chemical Engineering, as well as providing a coherent core of courses in the specialty.

101, 102, 201, 202, 301, 302. CHEMICAL ENGINEERING PRACTICE I-VI  
By means of laboratory investigations, classroom demonstrations, films, plant trips and invited speakers, theoretical lecture material is related to industrial practice. Each practice course is closely coordinated with concurrent lecture material and emphasizes application of basic concepts in the solution of industrial problems. Corequisite, the concurrent Ch.E. courses for that semester of the curriculum, or permission of instructor. 3-hour laboratory period or 1-hour demonstration or lecture.  
Credit, 1 each semester of the sophomore, junior and senior years.

125 (I). FUNDAMENTALS  
Nature and scope of chemical engineering through study of selected chemical processes and of material and energy balances. Prerequisite, CHEM 112 or 114.

126 (II). CHEMICAL ENGINEERING THERMODYNAMICS  
The fundamental principles of thermodynamics. An in-depth discussion of the First and Second laws; properties of single-component systems, thermodynamic cycles, phase and chemical equilibria. Solution methods for complex energy and material balance problems are introduced. Prerequisite, CHEM 160, MATH 165, CH E 125.

250. APPLIED PHYSICAL AND CHEMICAL EQUILIBRIA  
The fundamentals of the thermodynamics of phase equilibrium and chemical reaction equilibrium, and applications of these principles to industrial problems. Prerequisites CH E 126.

255 (I). CHEMICAL ENGINEERING FLUID MECHANICS  
An introduction to momentum transport in fluids including the development of the Navier-Stokes equations and boundary layer analysis. Emphasis on the application of the theory to laminar and turbulent flow in chemical process equipment such as: flow meters, pipes, pumps, packed beds, filtration equipment, sedimentation, and classification units, etc. Prerequisites, CH E 126, MATH 231.

## 256 (II). CHEMICAL ENGINEERING HEAT TRANSFER

Theory of heat transfer by conduction, convection, and radiation with applications to the Unit Operations of Chemical Engineering. Prerequisite, CH E 255.

## 257 (II). MASS TRANSFER

Theory and application of diffusional phenomena. Microscopic and macroscopic problems of mass transfer, diffusion in a boundary layer, diffusion and chemical reaction, inter-phase transfer. The continuous contactor provides the framework in which are analyzed absorption, extraction, chromatographic separators and simultaneous heat and mass transfer. Prerequisite, CH E 255.

## 258 (II). ORGANIC CHEMICAL TECHNOLOGY

Applications of the principles of structure and reaction mechanisms of organic chemistry in the preparation and use of industrially-important organic chemicals and polymers. Prerequisite, CHEM 160 or permission of instructor.

## 358 (I). STAGED OPERATIONS

An introduction to the design of equilibrium stage processes. Topics include the thermodynamics of phase equilibria, binary and multicomponent distillation, absorption, extraction, leaching and azeotropic phenomena. Prerequisites, CH E 126, CH E 257.

## 360. AIR POLLUTION CONTROL PROCESSES

An introduction to the techniques of air pollution control particulate removal, wet and dry scrubbing processes, removal of selected species from gases (e.g., sulfur dioxide). Prerequisites, freshman chemistry, permission of instructor.

## 361 (I). CHEMICAL ENGINEERING ANALYSIS I

Mathematical techniques applied to chemical engineering problems. Emphasis on ordinary differential equations corresponding to specific problems and on their solution. Prerequisites, CH E 256 and 257.

## 362 (II). CHEMICAL ENGINEERING ANALYSIS II

Mathematical analysis of chemical engineering problems continued. Topics include: matrix methods, vector analysis, calculus of finite differences, numerical solution of ordinary and partial differential equations, complex variables and Laplace transformations. Emphasis on applying these techniques to real chemical engineering processes and on the physical and mathematical interpretation of results. Prerequisite, CH E 361.

## 363 (I). SURVEY OF NUCLEAR ENGINEERING I

Principles of reactor physics and problems involved in design and operation of nuclear

reactors; heat transfer, shielding, instrumentation and waste disposal. Prerequisites, CHEM 112 or 114; PHYSIC 142 or 162; MATH 165, or equivalent, and permission of instructor. 2 class hours, 1 3-hour laboratory period.

## 364 (II). SURVEY OF NUCLEAR ENGINEERING II

Continuation of 363; emphasis on reactor physics. Prerequisite, CH E 363. 2 class hours, 1 3-hour laboratory period.

## 370. APPLIED POLYMER SCIENCE

A survey of the methods of preparing important synthetic polymers, and their properties and applications. Prerequisites undergraduate organic and physical chemistry.

## 374 (I). SIMULATION

Simulation of physical processes using both analog and digital techniques. Topics include: programming of analog computers (linear and non-linear components, scaling, iterative operation), solutions of linear and non-linear differential equations, simulation language, useful numerical techniques (Runge-Kutta, relaxation). Prerequisite, MATH 231. 2 class hours, 1 3-hour laboratory period.

## 376 (II). PROCESS CONTROL AND DYNAMICS

Theoretical and practical factors governing automatic control of industrial processes; control systems, review of measurement devices, control modes, mathematical relationships and analysis of control systems. Prerequisites, MATH 231.

## 380 (I). KINETICS AND REACTOR DESIGN

Principles underlying rates of transformations of matter and energy. Review of pertinent differential equations; effect of temperature and catalysis on chemical reaction rates; application to design of chemical reactors. Prerequisites, CH E 126, 250; CHEM 286. 3 class hours.

## 383 (I). PROCESS EVALUATION

Solution of problems which require the use and integration of principles studied in previous courses. Final results will be determined by application of economic considerations. Prerequisites, CH E 256, 257; CHEM 286.

## 384 (II). PROCESS AND PLANT DESIGN

Optimum design of selected chemical plants; production rates, site location, process flow diagrams, equipment design and sizing, total costs, etc. Prerequisite, CH E 383. 2 3-hour computation periods.

## 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

## 388 (I). OPTIMIZATION

Fundamental ideas and application of optimi-

zation techniques in operation and design. Topics include: extrema of functions, effect of constraints. LaGrange multipliers, introduction to linear programming, geometric programming and dynamic programming. Prerequisite, MATH 187.

## 389 (II). OPTIMIZATION USING VARIATIONAL TECHNIQUES

The application of the calculus of variations Pontryogine maximum principle, and dynamic programming to the design and control of chemical process equipment. Systems described by both ordinary and partial differential equations. Topics include: optimal reactor design, the synthesis of optimal control systems and optimal periodic operation of processing units. Prerequisite, MATH 231.

## 392 (II). SEMINAR

Preparation and discussion of professional topics. Prerequisite, CH E 256, 257. 2 class hours. Credit, 2

## 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

## 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5

## Civil Engineering

Head of Department: Professor Merit P. White. Professors Adrian, Archer, Berger, Boyer, Carver, Colonell, Feng, Hendrickson, Heronemus, Higgins, Marcus, Nash, Shuldiner; Associate Professors Bemben, Chajes, DiGiano, Dzialo, Farris, Grow, Kuzminski, Miller, Stockton, Ward; Assistant Professors Harris, Mangarella.

## SOPHOMORE YEAR

| 1st Semester                     | Credits |
|----------------------------------|---------|
| Rhetoric Elective                |         |
| MATH 165, Multivariable Calculus |         |
| PHYSIC 162, General Physics II   |         |
| CE 101, Surveying                |         |
| CE 140, Statics                  |         |

## 2nd Semester

|                                 |  |
|---------------------------------|--|
| CE 102, Transportation Location |  |
| Mathematics Elective            |  |
| M&AE 163, Thermodynamics        |  |
| CE 141, Strength of Materials I |  |
| CE 142, Dynamics                |  |
| CE 286, Graphics <sup>2</sup>   |  |

## JUNIOR YEAR

| 1st Semester                         | Credits |
|--------------------------------------|---------|
| CE 210, Transportation Systems       |         |
| ECE 190, Elect. Engr. for Non-Majors |         |
| CE 220, Soil Mechanics               |         |

|                                    |    |
|------------------------------------|----|
| CE 230, Theory of Structures I     | 3  |
| CE 257, Elementary Fluid Mechanics | 3  |
|                                    | 15 |

## 2nd Semester

|                                         |    |
|-----------------------------------------|----|
| Mathematics Elective <sup>1</sup>       | 3  |
| Social Science Elective                 | 3  |
| CE 258, Fluid Mechanics Laboratory      | 1  |
| CE 260, Engineering Hydraulics          | 3  |
| CE 270, Basic Environmental Engineering | 4  |
| CE 331, Design of Metal Structures      | 3  |
|                                         | 17 |

## SENIOR YEAR

|                                        |         |
|----------------------------------------|---------|
| 1st Semester                           | Credits |
| CE 280, Engineering Materials          | 3       |
| CE 333, Reinforced Concrete Structures | 3       |
| Humanities Elective                    | 3       |
| Social Science Elective                | 3       |
| Electives <sup>1</sup>                 | 6       |
|                                        | 18      |

## 2nd Semester

|                               |    |
|-------------------------------|----|
| CE 396, Professional Problem  | 3  |
| Humanities Elective           | 3  |
| ENGL 331, Technical Writing   | 2  |
| Science Elective <sup>1</sup> | 3  |
| Electives <sup>1</sup>        | 6  |
|                               | 17 |

<sup>1</sup>Differential Equations, Statistics, ENGIN 251, Partial Differential Equations, Linear Algebra, or other mathematics courses approved by advisor.

<sup>2</sup>Students passing proficiency exam or otherwise showing competence may have requirement waived.

<sup>3</sup>Two courses must be Civil Engineering Department electives. Advanced ROTC may be used for a maximum of two courses or 6 credits. All electives must be approved by advisor.

<sup>4</sup>Must be from department of Geology, Zoology, Biology, Microbiology, or Marine Science 225.

## 100 (II). PLANE SURVEYING

Taping, transit, level, stadia, topographic surveying and mapping, care and adjustment of instruments. (Not accepted for credit for Civil Engineering majors.) Prerequisite, trigonometry. 2 class hours, 1 3-hour laboratory period.

## 101 (I), (II). SURVEYING

Theory of surveying. Use, care and maintenance of tape, transit, and level; traverse computation; topographic surveying and mapping; property surveying. Prerequisite, trigonometry. 2 class hours, 1 3-hour laboratory period.

## 102 (I), (II). TRANSPORTATION LOCATION

Route location; horizontal and vertical alignment; construction computations. Prerequisite, CE 101. 2 class hours, 1 3-hour laboratory period.

## 140 (I), (II). STATICS

Force systems, friction, first and second moments. Corequisite, integral calculus concurrently.

## 141 (I), (II). STRENGTH OF MATERIALS I

Simple and combined stresses and strains in tension, compression, and shear; torsion; stresses and deflections in beams. Prerequisite, statics.

## 142 (I), (II). DYNAMICS

Motions of particles and rigid bodies and the force systems associated with these motions. Prerequisite, statics.

## 210 (I), (II). TRANSPORTATION SYSTEMS

Planning, design and operation of highway and railroad systems. Computer methods used in conjunction with laboratory design and planning problems. Prerequisite, CE 102. 2 class hours, 1 3-hour laboratory period.

## 220 (I), (II). SOIL MECHANICS

Engineering uses and mechanical properties of soils. 2 class hours, 1 3-hour laboratory period.

## 222 (I). SOIL TESTING

Sampling and testing of soils for engineering purposes. Prerequisite, CE 220. 1 class hour, 2 3-hour laboratory periods.

## 230 (I), (II). THEORY OF STRUCTURES I

Analysis of statically indeterminate structures. Prerequisite, CE 141.

## 232 (I). THEORY OF STRUCTURES II

Analysis of statically indeterminate structures. Prerequisite, CE 230.

## 234 (II). THEORY OF STRUCTURES III

Analysis of complex or special structures. Prerequisites, CE 232, 331, 333 concurrently.

## 235 (II). MATRIX ANALYSIS OF STRUCTURES

Development and use of the flexibility and stiffness methods of matrix analysis for determinate and indeterminate structures. Prerequisite, CE 232.

## 240 (I). STRENGTH OF MATERIALS II

Calculation of stresses and strains in components of machines and structures. Prerequisite, CE 141.

## 256 (I). INTRODUCTION TO HYDRODYNAMICS

Mathematical treatment of basic theorems of classical hydrodynamics including potential flow, conformal mapping, and wave and vortex motions. Prerequisite, MATH 186.

## 257 (I), (II). ELEMENTARY FLUID MECHANICS

Fundamentals of fluid mechanics including

fluid properties, fluid behavior under static and dynamic conditions, and development of basic fluid flow equations. Prerequisite, statics.

## 258 (I), (II). FLUID MECHANICS LABORATORY

Laboratory investigations of fluid mechanics principles, pipe and open channel flow, hydraulic machinery, and fluid measurements. Prerequisite, CE 257. Corequisite, CE 260. 1 2-hour laboratory. Credit, 1.

## 259 (II). ENGINEERING OCEANOGRAPHY

Fluid mechanics problems of ocean and coastal engineering including currents, tides, surface waves, tsunami and seiche phenomena, and ocean circulation. Prerequisite, CE 257.

## 260 (I), (II). ENGINEERING HYDRAULICS

Civil Engineering applications of fluid mechanics including analysis of water distribution and drainage systems, basic hydrology, fluid drag on structures, and hydraulic machinery. Prerequisite, CE 257.

## 261 (I). OPEN CHANNEL FLOW

Steady flow in open channels including channel transitions and controls, sediment transport, and elementary design of related hydraulic structures. Prerequisite CE 257.

## 270 (I), (II). BASIC ENVIRONMENTAL ENGINEERING

Quantity, quality and treatment of water and wastewater. Air pollution and solid waste problems. Prerequisites, CHEM 112; CE 257 concurrently. 3 class hours, 1 3-hour laboratory period. Credit, 4

## 271 (I). INTRODUCTION TO ENVIRONMENTAL POLLUTION CONTROL

Basic engineering aspects of environmental pollution control. (For students not majoring in Civil Engineering.)

## 275. ATMOSPHERIC DISPERSION OF POLLUTANTS

Physical and dynamical properties of the atmosphere and their effect on dispersion of airborne material. Methods of calculation of concentration fields in simple and complex flowfields. Practical approaches to the analysis of diffusion from point, jet and urban area sources. Review of research techniques for measuring diffusion parameters. Prerequisite, integral calculus. Credit, 2-3.

## 280 (I), (II). ENGINEERING MATERIALS

Emphasis on physical behavior and the correlation between experiment and theory. Prerequisite, CE 141, 2 class hours, 1 3-hour laboratory period.

**281. MATERIALS IN THE OCEAN ENVIRONMENT**

Treatment of the response of structural materials to the ocean environment; theory of corrosion, abrasion, erosion, and biological attack. Prerequisite, permission of instructor.

**285 (II). CONSTRUCTION PROBLEMS**

Legal aspects of construction contracts; estimating and bidding; critical path scheduling.

**286 (II). ENGINEERING GRAPHICS**

Theory and practice of engineering graphics. 1 class hour, 1 3-hour laboratory period.

Credit, 2.

**290. OCEAN ENGINEERING PAYLOAD DEVICES**

Techniques for augmentation of man's abilities in the sea. Underwater illumination, photography, manipulative and prosthetic devices, tools and instruments for underwater work. Prerequisite, permission of instructor.

**291. OCEAN SYSTEMS ENGINEERING AND DESIGN**

Systems engineering applied to synthesis of systems capable of doing useful work in the deep oceans. Emphasis on design of submergence vessels. Prerequisite, permission of instructor. 3 class hours, 1 3-hour laboratory period.

Credit, 4.

**305 (I). ADVANCED SURVEYING**

Elements of astronomical, geodetic and photogrammetric surveying; coordinate systems and map projections. Prerequisite, CE 101. 2 class hours, 1 3-hour laboratory period.

**311 (II). TRAFFIC ENGINEERING**

Engineering solutions to planning, design, and operations problems of urban and rural street and highway networks. Prerequisite, CE 210. 2 class hours, 1 3-hour laboratory period.

**321 (I). FOUNDATION ENGINEERING**

Foundations and earth structures; interpretation of borings; analysis and design of piles, footings, piers, abutments and retaining walls. Prerequisite, CE 220.

**323 (II). SOIL MECHANICS FOR TRANSPORTATION ENGINEERING**

Application of the principles of soil mechanics to the field of Transportation Engineering. Topics include the evaluation of the stability of soils as subgrade and embankment materials; the role of the subgrade properties of soils. Prerequisite, CE 220.

**331 (I), (II). DESIGN OF METAL STRUCTURES**

Selecting and proportioning elements and connections of structural frames of buildings and bridges. Prerequisite, CE 230. 2 class hours, 1 3-hour laboratory period.

**333 (I), (II). REINFORCED CONCRETE STRUCTURES**

Analysis and design of reinforced concrete structures. Prerequisite, CE 230.

**334 (II). ADVANCED TOPICS IN CONCRETE**

Design of various types of reinforced concrete building frames; elastic theory and ultimate strength procedures. Prerequisites, CE 232 and 333.

**357 (I). THEORY OF HYDRAULIC SIMILITUDE**

Hydraulic similitude, dimensional analysis, methods of obtaining dynamic similarity in hydraulic models in actual practice, analysis of typical hydraulic models. Prerequisite, CE 257.

**360 (I). HYDROLOGY**

The hydrologic cycle including precipitation, runoff, groundwater, flood routing, reservoir sedimentation, water law, and applications of hydrologic techniques to water resources engineering. Prerequisite, CE 257 or permission of instructor.

**362 (II). WATER RESOURCES ENGINEERING**

Planning and design of dams, reservoirs, and other related hydraulic structures, including analysis of existing and proposed water resources projects. Prerequisite, CE 257 or permission of instructor.

**365. ENVIRONMENTAL INSTITUTIONS AND POLICIES**

Public policies and laws relating to the use and conservation of water resources. Analysis of water-related governmental organization and programs at the Federal, state and local levels. Prerequisite, permission of instructor.

**369. ENVIRONMENTAL ENGINEERING TECHNOLOGY**

The technology available to provide clean air, clean water, and to dispose of solid waste. Some field trips to see environmental effects, treatment plants, and quality monitoring stations. 1 4-hour laboratory (or field trip) period, and 1 1-hour lecture. Prerequisite, permission of instructor.

Credit, 2.

**370. ADVANCED ENVIRONMENTAL ENGINEERING PRINCIPLES**

The underlying physical, chemical and biological principles involved in engineering studies of air, water and solid waste pollution problems. Basin concepts combined with model pollution control systems and responses of the atmospheric, aquatic and terrestrial environments. Prerequisite, permission of instructor.

**371 (II). INDUSTRIAL WASTE TREATMENT AND CONTROL**

Composition of industrial effluents; pollution

criteria and effects of industrial wastes on receiving waters; physical, chemical and biological methods and applications in treatment. Prerequisite, permission of instructor. 2 class hours, 1 3-hour laboratory period.

**372 (I). ENVIRONMENTAL ENGINEERING ANALYSIS I**

Application of chemical principles to environmental engineering analysis with specific reference to pollution indices. Prerequisite, CHEM 112. 2 class hours, 1 3-hour laboratory period.

**373 (II). ENVIRONMENTAL ENGINEERING ANALYSIS II**

The fundamental microbiological and biochemical properties of the microorganisms important in environmental engineering practice. Prerequisite, CE 372 or permission of instructor. 2 class hours, 1 3-hour laboratory period.

**374. RADIOLOGICAL HEALTH ENGINEERING**

Basic principles and procedures pertaining to safe control of all common sources of ionizing radiation. Prerequisite, permission of instructor.

**375 (II). SURFACE WATER QUALITY CONTROL**

Evaluation and control of water quality in streams, lakes and reservoirs. Mathematical analysis of patterns of water movement and their relation to water quality.

**376 (I). SOLID WASTES**

The production, collection, transportation, treatment, and disposal of solid waste products (including municipal, industrial, and agricultural wastes). 2 class hours, 1 3-hour laboratory period.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**396 (II). PROFESSIONAL PROBLEM**

A problem relating to the student's area of interest in Civil Engineering studied under the direction of a member of the faculty. May be a joint project with students from Civil Engineering or other departments. Oral and written reports required. Prerequisite, senior standing.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Electrical and Computer Engineering

Chairman of Department: Professor Jack K. Wolf. Professors Franks, Hutchinson, McIntosh, Monopoli, Navon, Sheckels, Tang, Thomas, Stone; Associate Professors Bobrow, Edwards, Ehrich, Fitzgerald, Glorioso, Hill, Laestadius, Mohn, Scott, Yngvesson; Assistant Professors Herchenreder, Kohler.

### ELECTRICAL ENGINEERING OPTION FRESHMAN YEAR

|                              | Credits |
|------------------------------|---------|
| Rhet 100, Lang. and Writing  | 3       |
| MATH 131, Calculus I         | 4       |
| CHEM 111, General Chemistry  | 3       |
| ENGIN 103, Intro. to Engg. A | 3       |
| Soc. Sc. Elective (D)        | 3       |
|                              | 16      |

|                              | Credits |
|------------------------------|---------|
| MATH 132, Calculus II        | 4       |
| ENGIN 104, Intro. to Engg. B | 2       |
| PHYSIC 161, General Physics  | 4       |
| Humanity Elective (C)        | 3       |
| Science Elective (E)         | 3       |
|                              | 16      |

### SOPHOMORE YEAR

|                                  | Credits |
|----------------------------------|---------|
| ECE 141, Systems Analysis        | 4       |
| MATH 165, Multivariable Calculus | 3       |
| PHYSIC 162, General Physics      | 4       |
| Rhetoric Elective                | 3       |
| Humanity Elective (C)            | 3       |
|                                  | 17      |

|                                 | Credits |
|---------------------------------|---------|
| ECE 142, Systems Analysis       | 4       |
| MATH 167, intro. to Linear Alg. | 3       |
| PHYSIC 163, General Physics     | 4       |
| M&AE 135, Materials             | 3       |
| Humanity Elective (C)           | 3       |
|                                 | 17      |

### JUNIOR YEAR

|                              | Credits |
|------------------------------|---------|
| ECE 201, Electr. Mat. & Dev. | 3       |
| ECE 204, Circuit Theory      | 4       |
| ECE 257, Field Analysis I    | 3       |
| ENGL 331, Technical Writing  | 2       |
| *Math Elective               | 3       |
|                              | 15      |

|                                 | Credits |
|---------------------------------|---------|
| ECE 202, Active Networks I      | 3       |
| ECE 258, Field Analysis II      | 3       |
| ECE 265, Random Signal Theory   | 3       |
| ECE 205, Intermediate Lab.      | 2       |
| ECE 210, Digital Circuit Theory | 3       |
| ECE 394, Professional Seminar   | 1       |
|                                 | 15      |

### SENIOR YEAR

|                             | Credits |
|-----------------------------|---------|
| ECE 274, Advanced Lab Ia    | 1       |
| ECE 275, Advanced Lab Ib    | 1       |
| ECE 203, Active Networks II | 3       |
| Technical Elective          | 3       |
| Technical Elective          | 3       |
| Soc. Sc. Elective (D)       | 3       |
|                             | 14      |

|                              | Credits |
|------------------------------|---------|
| ECE 276, Advanced Laboratory | 3       |
| Technical Elective           | 3       |
| Technical Elective           | 3       |
| Soc. Sc. Elective            | 3       |
| Free Elective                | 3       |
|                              | 15      |

\*MATH 211, 331, 241 or other math course with consent of advisor.

### COMPUTER SYSTEMS ENGINEERING OPTION

#### FRESHMAN YEAR

|                              | Credits |
|------------------------------|---------|
| RHET 100, Lang. and Writing  | 3       |
| MATH 131, Calculus I         | 4       |
| CHEM 111, General Chemistry  | 3       |
| ENGIN 103, Intro. to Engg. A | 3       |
| Soc. Sc. Elective (D)        | 3       |
|                              | 16      |

|                              | Credits |
|------------------------------|---------|
| MATH 132, Calculus II        | 4       |
| ENGIN 104, Intro. to Engg. B | 2       |
| PHYSIC 161, General Physics  | 4       |
| Rhetoric Elective            | 3       |
| Science Elective (E)         | 3       |
|                              | 16      |

#### SOPHOMORE YEAR

|                                  | Credits |
|----------------------------------|---------|
| ECE 141, Systems Analysis        | 4       |
| MATH 165, Multivariable Calculus | 3       |
| PHYSIC 162, General Physics      | 4       |
| Humanity Elective (C)            | 3       |
| Rhetoric Elective                | 3       |
|                                  | 17      |

|                                 | Credits |
|---------------------------------|---------|
| ECE 142, Systems Analysis       | 4       |
| MATH 167, Intro. to Linear Alg. | 3       |
| PHYSIC 163, General Physics     | 4       |
| ENGL 331, Technical Writing     | 2       |
| Humanity Elective (C)           | 3       |
|                                 | 16      |

#### JUNIOR YEAR

|                                  | Credits |
|----------------------------------|---------|
| ECE 202, Active Networks I       | 3       |
| ECE 210, Digital Circuit Theory  | 3       |
| COINS 201, Mach. & Assemb. Lang. | 3       |
| Soc. Sc. Elective (D)            | 3       |
| *Math Elective                   | 3       |
|                                  | 15      |

|                                                                      | Credits |
|----------------------------------------------------------------------|---------|
| **ECE 265, Random Signal Theory                                      | 3       |
| ECE 342, Data Structures                                             | 3       |
| ECE 346, Comp. Syst. Lab. I                                          | 1       |
| ECE 394, Professional Seminar                                        | 1       |
| COINS 335, Computer Architecture<br>or ECE 278 Digital System Design | 3       |
| Technical Elective                                                   | 3       |
| Soc. Science Elec. (D)                                               | 3       |
|                                                                      | 17      |

### SENIOR YEAR

|                                 | Credits |
|---------------------------------|---------|
| ECE 350, Comp. Syst. Lab. II    | 3       |
| ECE 344, Programming Structures | 3       |
| Technical Elective              | 3       |
| Non-Technical Elective          | 3       |
| Free Elective                   | 3       |
|                                 | 15      |

|                               | Credits |
|-------------------------------|---------|
| ECE 354, Comp. Syst. Lab. III | 3       |
| COINS 377, Operating Syst.    | 3       |
| Technical Elective            | 3       |
| Non-Technical Elective        | 3       |
| Free Elective                 | 3       |
|                               | 15      |

\*MATH 211, 331, 241 or other with consent of advisor.

\*\*MATH 233, Probability may be submitted for ECE 265. Three Social Science (D) electives and three Humanity (C) electives are required. All elective courses must be satisfied and be approved by advisor.

#### 141 (I). SYSTEMS ANALYSIS I

Physical characteristics and mathematical models of system elements; techniques for writing and solving system dynamic equations. Prerequisite, ENGIN 104 and MATH 132 or 136. 3 class hours, 1 3-hour problem/lab period. Credit, 4.

#### 142 (II). SYSTEMS ANALYSIS II

Concepts relating to transfer functions; digital and analog solutions of system equations, time and frequency domain analysis techniques and stability. Prerequisite, ECE 141. 3 class hours, 1 3-hour problem/lab period. Credit, 4.

#### 143 (II). INTRODUCTORY LABORATORY

Laboratory techniques in circuits and systems appropriate to the level of sophomore engineers. Corequisite, ECE 142. 1 3-hour laboratory period. Credit, 1.

#### 201 (I). ELECTRONIC MATERIALS AND DEVICES

Introduction to quantum theory of solids and quantum statistics, conduction processes in semiconductors and metals, physics and theory of p-n junctions and bipolar transistors. Prerequisite, PHYSIC 162.

#### 202 (II). ACTIVE NETWORKS I

P-n junction diodes and applications, bipolar

transistors, linear equivalent circuits, field effect transistors (FET's), thyristors, small signal, power and tuned amplifiers. Prerequisite, ECE 142, 201.

#### 203 (I). ACTIVE NETWORKS II

Monolithic digital and linear integrated devices and circuits, feedback, op-amps, oscillators, and modulation. Prerequisite, ECE 202.

#### 204 (II). LINEAR SYSTEM THEORY

Concepts used in the analysis of physical systems; emphasis on electrical circuits and digital filters. Fourier and Laplace transforms, z-transforms, frequency domain analysis of systems, elementary synthesis. Prerequisite, ECE 142. 3 class hours, 1 3-hour problem/lab period. Credit, 4.

#### 205 (II). INTERMEDIATE LABORATORY

Laboratory techniques pertaining to electrical circuit theory, active network analysis and digital circuits appropriate to a junior year competence in electrical engineering. Prerequisite, junior standing. 2 3-hour laboratory periods. Credit, 2.

#### 210 (II). INTRODUCTION TO DIGITAL AND COMPUTER SYSTEMS

An introduction to the theory of digital circuits stressing general techniques for the analysis and synthesis of combinational and sequential logic systems. Prerequisite, junior standing.

#### 241 (I). ENERGY CONVERSION I

Electromechanical energy conversion. Dynamical systems analysis of incremental motion transducers and rotary energy converters. Prerequisites, ECE 142, 257.

#### 243 (II). ENERGY CONVERSION II

Direct energy conversion. Batteries, fuel cells, thermo-electric, photo-voltaic, thermionic and MHD generators. Prerequisite, ECE 201.

#### 257 (I). FIELD ANALYSIS I

Vector calculus. Conservative and non-conservative fields. Static and time-varying electromagnetic fields. Maxwell's equations, relations between field and circuit theory. Prerequisites, PHYSIC 162, MATH 165.

#### 258 (II). FIELD ANALYSIS II

Continuation of ECE 257 with emphasis on time-varying electromagnetic fields and wave phenomena. Prerequisite, ECE 257.

#### 265 (I). RANDOM SIGNAL THEORY

Introduction to probability and stochastic processes. Correlation theory and its application to electrical engineering problems in communication and control systems. Prerequisite, ECE 142.

#### 266 (I). SIGNAL PROCESSING AND COMMUNICATION SYSTEMS I

Principles of design of modern communication systems.

Mathematical description of digital and analog signals. Basic limitations of modulation techniques and information capacity of transmission systems. Prerequisite, ECE 142.

#### 267 (II). SIGNAL PROCESSING AND COMMUNICATION SYSTEMS II

Techniques for evaluating performance of modulation and information transmission systems. Extraction of signals from noise. Minimum error signals estimation and detection. Prerequisites, ECE 265, 266, or permission of instructor.

#### 270. SOLID-STATE POWER DEVICES

Power rectifiers and transistors, thyristors. Power circuits: regulators, inverters, converters, cycloconverters, phase-control and motor control circuits.

#### 271 (II). MICROELECTRONICS

Principles and applications of micro-electronics with particular emphasis on silicon monolithic integrated circuits. Fundamental limitations of micro-miniaturization, design constraints imposed by the monolithic technique, planar technology, digital and linear microcircuits. Prerequisite, ECE 201.

#### 274 (I). ADVANCED LABORATORY Ia

275 (I). ADVANCED LABORATORY Ib  
Projects designed to provide laboratory experience related to specific technical electives. Prerequisite senior standing. Credit, 1 each.

#### 276 (II). ADVANCED LABORATORY II

Laboratory techniques developed in ECE 275, used in a concentrated study in the student's area of interest. Prerequisite, ECE 275.

#### 278 (I). DIGITAL SYSTEMS DESIGN

The design of a digital system by the interface of subunits described in terms of register sets. The subunits are interfaced at the architectural level by a set of instructions and at the logic level by the Boolean equations derived from the corresponding register transfers. Prerequisite, ECE 210.

#### 286 (II). POWER SYSTEM ANALYSIS

Power transfer diagrams, voltage studies, system stability criteria, shortcircuit calculations, and protective methods. Prerequisite, ECE 241.

#### 287 (II). MARINE INSTRUMENTATION

A survey of the oceanographic parameters of interest to ocean engineers; the theory of measurement for those parameters. Typical examples of existing measuring equipment.

#### 288 (II). PULSE ELECTRONICS

Analysis and design of circuits for the generation, transmission and processing of information by means of pulses. Prerequisite, ECE 202.

#### 292 (I). FEEDBACK CONTROL SYSTEMS I

Time domain and frequency domain analysis and synthesis techniques for linear continuous control systems. The relationships between these techniques. Prerequisites, ECE 142 or permission of instructor.

#### 293 (II). FEEDBACK CONTROL SYSTEMS II

Analysis of nonlinear continuous control systems; introduction to digital control systems and optimization techniques. Prerequisite, ECE 292.

#### 294 (I). MICROWAVE ENGINEERING I

Electromagnetic theory applied to microwave propagation in waveguides and coaxial lines. Microwave circuit theory with applications to passive microwave networks. Prerequisite, ECE 258.

#### 295 (II). MICROWAVE ENGINEERING II

Active and nonlinear devices and phenomena in the amplification, detection, generation and propagation of microwaves. Typical devices include varactors, Impatt and Gunn Oscillators and Schottky diodes. Radiation and propagation of microwaves from a communication point of view. Prerequisites, ECE 201, 258.

#### 298 (I). BIOMEDICAL ENGINEERING I

Techniques and concepts from control and communication theory useful in biological, medical and psycho-physical research. Prerequisite, permission of instructor.

#### 299 (II). BIOMEDICAL ENGINEERING II

Engineering analysis of the visual, position-motion sensing, taste and smell biological communication channels; human tracking capabilities; analog and hybrid modeling. Prerequisite, ECE 298.

#### 306 (I). ACOUSTICS

The fundamentals of sound generation, propagation and detection. Applications of theory to underwater sound and human speech. Prerequisite, junior standing or permission of instructor.

#### 311 (II). APPLIED NONLINEAR ANALYSIS

The analysis of nonlinear mechanical and electrical systems. Numerical, graphical and analytical methods used to determine the behavior of modern nonlinear devices. Prerequisite, Math 167.

#### 342 (II). NON-NUMERICAL ALGORITHMS

Description and implementation of data structures such as lists, queues, trees, and graphs in PASCAL, and their application in the design of computer algorithms. Applications include searching and sorting. Prerequisites, assembly language programming and knowledge of some higher level language.

**344 (I). CONCEPTS OF PROGRAMMING LANGUAGES**  
Basic concepts underlying modern programming languages and their implementation. Formal definition of syntax and semantics, parsing techniques, scope rules, parameter passing, recursion, type checking, and new language constructs. Prerequisites, assembly language programming and knowledge of some higher level language.

**346. COMPUTER SYSTEMS LABORATORY I**  
Introduction to digital logic as building blocks for computer system. Basic types of logic and their characteristics. Corequisite, ECE 210.  
*Credit, 1.*

**350. COMPUTER SYSTEMS LABORATORY II**  
Subunits of digital computer systems and their control. Registers, accumulators, arithmetic units, and memories and their interconnection. Prerequisite, ECE 346.

**354. COMPUTER SYSTEMS LABORATORY III**  
Project laboratory in advanced computer systems engineering including designs of integrated hardware/software systems and studies of current computer techniques. Prerequisite, ECE 350.

**356. INTRODUCTION TO AUTOMATA THEORY**  
Formal processes of computation. Computability, automata, algorithms, recursive functions. Formal systems, computing power of machines, and automata as examples of formal systems.

**360. COMPUTER GRAPHICS**  
Introduction to basic organization of computer driven graphical display systems. Methods for generation and manipulation of vectors and characters for real-time display. Data structures for picture and text processing. Prerequisites, assembly language programming and ECE 342.

**362. ENGINEERING CYBERNETICS**  
Introduction to several aspects of self-organizing systems and pattern recognition including machine intelligence, adaptation, learning, and self repair.

**366. SIMULATION OF DYNAMIC SYSTEMS**  
Use of analog computers, high level languages and digital computation for simulation purposes.

**368. ADVANCED SWITCHING THEORY**  
Contemporary topics in digital switching theory and logical design. State-of-the-art techniques in computer hardware design. Prerequisite, ECE 210.

**385. 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

**394. PROFESSIONAL SEMINAR**  
Engineering professionalism: lectures and discussions relating to the manner and methods by which the graduating engineering student enters the professional world. Engineering and society: discussions of the status and role of the engineer in society and social, political and economic implications of modern technology. Prerequisite, junior standing.  
*Credit, 1.*

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office.  
*Credit, 4.*

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.  
*Credit, 1-5.*

## Industrial Engineering and Operations Research

*Head of Department: Professor Richard W. Trueswell. Professors Balintfy, Giglio, Miser, Rising; Associate Professors Davis, Duffy, Kaminsky, Kroner, Lippert, Rikkers; Assistant Professor Sadowski.*

### SOPHOMORE YEAR

|                                          |                |
|------------------------------------------|----------------|
| <b>1st Semester</b>                      | <i>Credits</i> |
| Humanities Elective                      | 3              |
| PHYSIC 162, General Physics II           | 4              |
| MATH 165, Multivariable Calculus         | 3              |
| IE 151, Problems and Model Formulation   | 3              |
| ECON 103, Introduction to Microeconomics | 3              |
|                                          | <hr/> 16       |

|                                            |                |
|--------------------------------------------|----------------|
| <b>2nd Semester</b>                        | <i>Credits</i> |
| Humanities Elective                        | 3              |
| ENGL 331 Technical Writing                 | 2              |
| Basic Science Elective                     | 3 or 4         |
| MATH 167, Intr. to Linear Algebra          | 3              |
| IE 353, Industrial Engineering Economics I | 3              |
|                                            | <hr/> 14 or 15 |

### JUNIOR YEAR

|                                             |                |
|---------------------------------------------|----------------|
| <b>1st Semester</b>                         | <i>Credits</i> |
| IE 379, Operations Research I               | 3              |
| IE 271, Basic Probability for Engineers     | 3              |
| IE 354, Industrial Engineering Economics II | 3              |
| Economics Elective                          | 3              |
| Elective*                                   | 3              |
|                                             | <hr/> 15       |

|                                              |                |
|----------------------------------------------|----------------|
| <b>2nd Semester</b>                          | <i>Credits</i> |
| IE 380, Operations Research II               | 3              |
| IE 272, Principles of Engineering Statistics | 3              |
| IE 273, Simulation                           | 3              |
| IE 260, Design of Man-Machine Systems I      | 3              |
| Elective*                                    | 3              |
|                                              | <hr/> 15       |

### SENIOR YEAR

|                                          |                |
|------------------------------------------|----------------|
| <b>1st Semester</b>                      | <i>Credits</i> |
| IE 378, Production Control               | 3              |
| IE 261, Design of Man-Machine Systems II | 3              |
| Electives*                               | 9              |
|                                          | <hr/> 15       |
| <b>2nd Semester</b>                      | <i>Credits</i> |
| Humanities Elective                      | 3              |
| Electives*                               | 12             |
|                                          | <hr/> 15       |

\*These 27 credit hours of electives must satisfy the following: 12 from any courses offered for credit in the University, nine in recognized engineering science courses (must include a sequence of at least two courses) and six in industrial engineering and/or engineering science.

**151. PROBLEMS AND MODEL FORMULATION**  
Introduction to Industrial Engineering (IE) and Operations Research (OR). Practical problems that arise in these fields; how theoretical models have been developed to help with their solutions. Survey of the main currents of IE and OR developed further in later courses. Insights into the varied pursuits of professionals in these fields.

**253. METHODS AND STANDARDS ENGINEERING**  
The principles involved in the simplification of the work pattern and the design of the work place, and in the establishment of production standards. 3 class hours. 1 3-hour laboratory period. Prerequisite, IE 271, previously or concurrently. *Credit, 4.*

**256. DATA PROCESSING AND INFORMATION HANDLING SYSTEMS**  
Principles and applications of data processing and electronic computer systems for use by industrial engineers as a management tool for control and decision making. Prerequisite, permission of instructor.

**260. DESIGN OF MAN-MACHINE SYSTEMS I**  
Introduction to principles of human factors engineering. Anthropometric, physiological and psychological data sources. Data gathering and analysis techniques useful to design-

ers and industrial engineers. Occupational health and safety standards. Includes lectures, demonstrations and experiments. Project option.

#### 261. DESIGN OF MAN-MACHINE SYSTEMS II

Human factors data applications to design of equipment and industrial urban and vehicle environment. Decision processes, communication. Problems of layout in industry, hospitals, etc. Involves more complex problem application than IE 260. Includes lectures, demonstrations and experiments. Project option. Prerequisite, IE 260 or permission of instructor.

#### 271. BASIC PROBABILITY FOR ENGINEERS

Probability theory including; sample spaces; discrete and continuous random variables; functions of random variables; marginal and joint probability, density and cumulative distribution functions; and moments. Prerequisite, MATH 165.

#### 272. PRINCIPLES OF ENGINEERING STATISTICS

Statistical principles as applied to engineering problems including; estimation, hypothesis testing, analysis of variance, design of experiments, sampling plans, statistical quality control. Prerequisite, IE 271.

#### 273. INTRODUCTION TO SIMULATION METHODS

(See GB FIN 273.)

#### 286. INDUSTRIAL ENGINEERING PRINCIPLES

Organization, plant location, plant layout, industrial costs, production control, production standards, incentives. For students other than industrial engineering majors. Prerequisite, junior standing.

#### 288. MOTION AND TIME STUDY

For junior and senior students outside the industrial engineering field. 2 class hours, 1 3-hour laboratory period. Prerequisite, junior standing.

#### 341. HOSPITAL INDUSTRIAL ENGINEERING I

Introductory course in the application of Industrial Engineering techniques to hospital management. Emphasis on the institution of Industrial Engineering programs in hospitals and the choice of suitable projects. Guest lecturers.

#### 342. HOSPITAL INDUSTRIAL ENGINEERING II

A projects course based upon material covered in IE 341. Study of previous Industrial Engineering projects in hospitals, followed by each student conducting a project of his or her own in a local hospital. Prerequisite, IE 341.

#### 353. INDUSTRIAL ENGINEERING ECONOMICS I

Emphasis on cost control in industrial operations. Topics include an introduction to accounting principles and financial record keeping methods, determination of costs of all aspects of manufacturing, inventory management, and budgetary planning and control. Open to all technically-oriented students. Prerequisite, ECON 100-103.

#### 354. INDUSTRIAL ENGINEERING ECONOMICS II

An introduction to economic problems faced by engineers, comparison of alternatives in engineering projects, use of discounted cash flow techniques, breakeven and minimum cost points, and economic selection and replacement of structures and machines; decisions made in the face of risk and uncertainty. Instruction wherever advantageous by the case method. Intended as a service course for all technically-oriented individuals.

#### 360. SAFETY ENGINEERING

Design of equipment facilities and processes to minimize accidents. Evaluation and design of fire prevention equipment and accident control procedures in organizations.

#### 375. JOB EVALUATION

The principles used to determine an evaluation of all occupations in order to establish an equitable rating between them, to establish sound wage and salary policies. Prerequisite, IE 151. Credit, 2.

#### 376. TIME STUDY

The principles involved in the establishment of production standards and their application in the management functions of cost accounting, estimating, production control incentives, budgetary control. Prerequisite, IE 151 concurrently except for Business Administration majors.

#### 377. LAYOUT AND DESIGN OF INDUSTRIAL FACILITIES

The principles applying to plant layout, materials handling, and plant location. Modes of layout presentations illustrated by means of a student project. Prerequisites, M&AE 102, and IE 151, or equivalents.

#### 378. PRODUCTION PLANNING AND CONTROL

Analysis of quantitative and qualitative techniques for production planning and control. Emphasis on their application to various production systems. Prerequisites, IE 272, 353, 380.

#### 379. OPERATIONS RESEARCH I

The formulation and analysis of deterministic models for decisions including linear programming, network, integer programming and dynamic programming models. A science

course for engineers of all disciplines and other technically-oriented individuals. Credit not allowed students who have taken MGT 253, 254.

#### 380. OPERATIONS RESEARCH II

Stochastic models; decision theory, game theory, queueing theory, inventory theory, and general Markov processes. Credit not allowed students who have taken MGT 253, 254. Prerequisites, IE 271, 379.

#### 382. WORK SIMPLIFICATION

The principles involved in the simplification of means of doing work and in the application and use of these principles. 1 class hour, 1 3-hour laboratory period. Prerequisites, M&AE 268, and IE 376 concurrently. Credit, 2.

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

#### 394. PROFESSIONAL SEMINAR

Presentation of papers on important subjects and recent developments. 1 class hour. Prerequisite, senior standing.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

### Mechanical Engineering

Head of Department: Professor J. Edward Sunderland. Professors Bates, Boothroyd, Crossley, Day, Dittfach, Dixon, Picha, Poli, Zahradnik; Associate Professors Ambs, Costa, Cromack, Goss, Kirchhoff, McGowan, Nelson, O'Byrne, Patterson, Ritter, Russell, Umholtz, Wilson, Zinsmeister; Assistant Professors Jakus, Murch.

Mechanical engineers use the principles of dynamics, solid mechanics, fluid and gas dynamics, heat transfer, thermodynamics, and materials science together with mathematical and computer methods for application to research, development, design and management in industry, government, and engineering education.

Students majoring in mechanical engineering may choose among several alternative options, all of which are fundamental and flexible so that students may prepare for either professional employment or graduate study.

## SOPHOMORE YEAR

| 1st Semester                          | Credits |
|---------------------------------------|---------|
| Social Science or Humanities Elective | 3       |
| MATH 165                              | 3       |
| M E 144, Mechanics I                  | 3       |
| M E 167, MAE Lab I                    | 3       |
| PHYSIC 162                            | 4       |
|                                       | 16      |

| 2nd Semester                              | Credits |
|-------------------------------------------|---------|
| Humanities Elective                       | 3       |
| MATH 231                                  | 3       |
| M E 135, Introd. to Materials Science     | 3       |
| M E 137, Introd. to Materials Science Lab | 1       |
| M E 145, Mechanics II                     | 3       |
| M E 163, Thermodynamics I                 | 3       |
|                                           | 16      |

## JUNIOR YEAR

| 1st Semester                             | Credits |
|------------------------------------------|---------|
| M E 235, Materials and Manufacturing     | 3       |
| M E 237, Materials and Manufacturing Lab | 1       |
| M E 246, Mechanics III                   | 3       |
| M E 264, Thermodynamics II               | 3       |
| ECE 141, Circuits I                      | 4       |
| Technical Elective                       | 3       |
|                                          | 17      |

| 2nd Semester             | Credits |
|--------------------------|---------|
| M E 279, MAE LAB II      | 3       |
| M E 293, ME Design I     | 3       |
| M E 265, Fluid Mechanics | 3       |
| ECE 142, Circuits II     | 4       |
| Technical Elective       | 3       |
|                          | 16      |

## SENIOR YEAR

| 1st Semester                        | Credits |
|-------------------------------------|---------|
| M E 254, 268, 283, 295 (choose one) | 3       |
| M E 284, MAE Analysis I             | 3       |
| Soc. Sci. Elective                  | 3       |
| Technical Elective                  | 3       |
| Technical Elective                  | 3       |
|                                     | 15      |

| 2nd Semester          | Credits |
|-----------------------|---------|
| Math. Elective        | 3       |
| Science Elective      | 3       |
| Technical Elective    | 3       |
| Soc. Science Elective | 3       |
| Humanities Elective   | 3       |
|                       | 15      |

## MATERIALS MAJOR

### JUNIOR YEAR

| Second Semester               | Credits |
|-------------------------------|---------|
| M E 265, Fluid Mechanics      | 3       |
| PHYSIC 319 or M E 385         | 3       |
| Math Elective                 | 3       |
| ECE 201, Electronic Materials | 3       |
| Technical Elective            | 3       |
|                               | 15      |

## SENIOR YEAR

|                          | Credits |
|--------------------------|---------|
| M E 308, Physical Metal. | 3       |
| CHEM 285, Physical Chem. | 3       |
| Soc. Sci. Elective       | 3       |
| Technical Elective       | 3       |
| Technical Elective       | 3       |
|                          | 15      |

|                                | Credits |
|--------------------------------|---------|
| CHE 370, Polymer Science       | 3       |
| M E 309, Mechanical Properties | 3       |
| Technical Elective             | 3       |
| Soc. Sci. Elective             | 3       |
| Humanities Elective            | 3       |
|                                | 15      |

\*NOTE: One of the technical electives must be selected from the following, M E 248, Structures; M E 278, Propulsion; or M E 315, Aerodynamics. Note that M E 274 is a prerequisite for M E 315. The M E Department faculty has developed a new general program in Mechanical Engineering, plus two other programs of concentrated studies in the Energy and Manufacturing areas. Students majoring in mechanical engineering also may select with approval and assistance of their faculty advisor programs emphasizing aerodynamics, design, materials study, business, bio-medical, or aquacultural subjects.

Prospective Mechanical Engineering students are advised to contact the department office in Room 213, Engineering Laboratory, for current program information.

## SUPPLEMENTARY RULES AND PROCEDURES

1. *Honors* — Sophomore, junior, or senior students who are selected for their outstanding performance by the Undergraduate Committee are eligible to participate in the Department's Honors program. Curriculum, other than School and University requirements, is completely open subject to the approval of the Honors Adviser, the Undergraduate Committee and Department Head. It is expected that Honors students will cover the Departmental core material but not necessarily by taking the regularly specified courses. Special Departmental recognition will be extended to the Honors students.

2. *ROTC* — No ROTC credits are acceptable in fulfillment of the 128 credit hour degree requirements of the Department.

3. *Non-Technical Electives* — Students may substitute one Non-Technical Elective for a Technical Elective provided the student presents evidence in writing that such a substitution is beneficial to the planned pro-

gram. The substitution must have the approval of the student's Advisor and the Department Head.

4. *Technical Electives* — Technical electives may be satisfied by upper level courses in Engineering, Mathematics, Computer Science, or Physics, or by upper or lower level courses in Chemistry or the Life Sciences.

5. *Mathematics Electives* — Mathematics electives may be satisfied by upper level Mathematics or Computer Science courses.

6. *Technical Communication* — Any student paper or report considered poor on the basis of technical communication by any instructor will be submitted to a Technical Communication Committee for review, comment, and recording. Such reports will be required to be redone. Students who show consistently poor communications performance may be required by the Committee to take a course in Technical Writing in their senior year.

7. *Pass/Fail Regulations* — Students may not take required M E courses on P/F basis. Technical, social science, and humanities may be taken P/F.

### 101 (I). ENERGY AND MAN (E)

Energy and its role in a technological society. The fundamental laws of energy and energy conversion. Secondary environmental effects of energy production and transmission. Energy resources and energy management. Not open to engineering majors.

### 102 (I). MATERIALS AND CIVILIZATION (E)

A survey of the contributions that materials have made to our past and present-day civilization. Case studies of ancient as well as contemporary items used to demonstrate the properties which make materials useful. How these properties depend upon the internal structure of materials. Fabrication of desired items from material and the problems of their disposal. Not open to engineering majors.

### 135 (I), (II). INTRODUCTION TO MATERIALS SCIENCE

The atomic and molecular phenomena responsible for the behavior of materials. The relationship between the atomic structure of materials and their behavior is emphasized. Prerequisite, CHEM 111.

### 137 (II). INTRODUCTION TO MATERIALS SCIENCE LABORATORY

Laboratory work to illustrate the concepts and principles of materials science. Prerequisite,

M E 135 concurrently. 1 3-hour laboratory period. Credit, 1.

**144 (I), (II). MECHANICS I (STATICS)**

A vector treatment of the equilibrium of particles and rigid bodies. Topics include: vector algebra, forces, moments, couples, equations of equilibrium, free-body diagrams, graphical techniques, constraints, structures and mechanisms, friction, centroids and moments of inertia, the method of virtual work. Prerequisites, MATH 132, PHYSIC 161.

**145 (I), (II). MECHANICS II (STRENGTH OF MATERIALS)**

Notions of stress, strain, and Mohr's circle. Tension shear and torsion. Plane stress and plane strain; moments of inertia. Shear force and bending moment diagrams. Deflection of beams; indeterminate beams; Castigliano's principle; plastic bending of beams. Mechanical properties of materials. Prerequisite, M E 144.

**163 (I), (II). THERMODYNAMICS**

The laws of thermodynamics introduced and applied to various energy-transforming devices. Property relations. Emphasis on the science of thermodynamics, providing a background for further study in those areas that involve thermodynamic principles. Prerequisites, PHYSIC 162, MATH 165.

**167 (I), (II). MECHANICAL AND AEROSPACE ENGINEERING LABORATORY I**

Some basic mechanical engineering measurement techniques, introduction to statistical analysis of engineering data, and technical report writing. Prerequisites, MATH 136 and digital computer programming (ENGIN 103-104 or equivalent level). 1 hour lecture, 1 hour recitation. 1 3-hour laboratory period.

**200. TECHNOLOGY AND SOCIETY**

History of technology, criticisms of modern technology, technological change and assessment, and the role of the engineer and his or her professional organizations.

**220 (I). MACHINING AND MACHINE TOOLS**

Fundamentals of metal cutting including temperatures generated and dynamic stability of the cutting process. Lubrication and wear of cutting tools and cutting conditions for maximum production or minimum cost. Design of machine tools. Numerical control and economics of machine tools. Prerequisite, senior standing.

**221 (II). AUTOMATION IN MANUFACTURING**

In-depth study of the automatic assembly process including feeding and orienting of parts and the performance and economics of assembly systems. Design of parts and prod-

ucts for automatic assembly. Prerequisite, senior standing.

**235 (I). MATERIALS AND MANUFACTURING**

Introduction to casting, forming, cutting, and joining processes for metals and plastics. Includes the economics, relative advantages and limitations of the processes. Prerequisite, M E 135 and 145.

**237 (I). MANUFACTURING PROCESSES LABORATORY**

Experiments, workshops and short experimental projects based on the topics covered in M E 235. Emphasis on experimental technique and presentation of results. Prerequisite, M E 235 concurrently.

**246 (I), (II). MECHANICS III (DYNAMICS)**

A vector treatment of dynamics. Kinematics of a particle in two- and three-dimensions. Dynamics of a particle; momentum, moment of momentum, and work-energy. Rigid bodies in plane motion; kinematics, and dynamics. Relative motion. Prerequisite, M E 144.

**248 (II). STRUCTURES FOR MECHANICAL AND AEROSPACE ENGINEERS I**

Introduction to the load and temperature environment of structures. Review of stress and strain with an introduction to the theory of elasticity. Theories of bending, extension, torsion and shear of slender beams without structural discontinuities. Introduction to work-energy principles and their application to the deflection and stress analysis of complex structures. Examples from the fields of mechanical and aerospace engineering. Prerequisite M E 145.

**249 (I). STRUCTURES FOR MECHANICAL AND AEROSPACE ENGINEERS II**

A continuation of M E 248. Elastic instability. Applications to axially symmetrical problems, curved beams and stress concentrations. Applications to plates and shells. Introduction to problems involving viscous and plastic behavior. Numerical methods. Prerequisite, M E 248, or permission of instructor.

**254 (I). PRODUCT DESIGN I**

Human values in design. Central philosophy of product design, with emphasis on the relation between technical and human values, creativity, and design methodology. Laboratory includes development of simple product concepts visualized in rapidly developed three-dimensional mockups. 2 class hours, 2 2-hour laboratory periods.

**255 (II). AQUACULTURAL ENGINEERING SYSTEMS**

Rate theory and similitude in the scale-up of biological processes. Case study of biological data used in the derivation of useful engineer-

ing system design relationships for the culture of mollusks. A bioengineering comparison of several systems used in aquaculture. Field trip to inspect an aquacultural project in operation.

**257 (II). PRODUCT DESIGN II**

Continuation of M E 254. Product Design I. 2 class hours, 2 2-hour laboratory periods.

**264 (I), (II). THERMODYNAMICS II**

Application of the laws of thermodynamics to energy conversion devices. Introduction to irreversible thermodynamics. Prerequisite, M E 163.

**265 (I). FLUID MECHANICS**

Vector approach to the fundamentals of fluid dynamics, including the topics of fluid statics, kinematics of fluids, potential flow, vorticity, dimensional analysis. Introduction to viscous fluids and compressibility. Prerequisite, M E 163.

**268 (II). KINEMATICS**

Mechanism, including velocity and acceleration diagrams, instant centers, gear teeth and gear trains, cams, and various speed transmissions. Prerequisite, M E 246. 2 class hours, 1 3-hour laboratory period.

**274 (II). FLIGHT VEHICLE PERFORMANCE**

Aircraft performance static and maneuvering. Fundamental astronautics, two-body problem, transfer orbits, rendezvous, intercept, lunar and interplanetary trajectories.

**275 (II). THERMAL ENVIRONMENTAL ENGINEERING**

A comprehensive treatment of refrigeration, psychrometrics, heat transfer including solar radiation, air conditioning theories and calculations with practical applications. Prerequisite, M E 264.

**276 (II). COMBUSTION**

Phenomenological study of combustion processes in flowing systems. Prerequisite, M E 264.

**277 (I). INTRODUCTION TO PROPULSION POWER PLANTS**

Thermodynamic and performance aspects of reciprocating gasoline and diesel engines. Prerequisite, M E 264.

**278 (II). AEROSPACE PROPULSION**

Primary and auxiliary power sources. Matching of air-breathing and rocket motor with vehicle. Electrical and nuclear propulsion systems. Prerequisite, M E 264, 265.

**279 (II). MECHANICAL AND AEROSPACE ENGINEERING LABORATORY II**

Basic concepts of instrumentation as applied

to mechanical engineering measurements. Topics include basic meters, transducers, and an introduction to analog computation. Prerequisites: ECE 142 concurrently, M E 264, M E 265, M E 167, and MATH 231. 1 hour lecture, 1 hour recitation, 1 3-hour laboratory period.

**282 (I). HEAT TRANSFER**

Fundamental principles of heat transfer by conduction, radiation, and convection. Methods of evaluating heat transfer rates and predicting operating temperatures. Prerequisites: M E 264, MATH 231, and computer programming experience.

**283 (I). MACHINE DESIGN**

Principles of the design of various machine parts; economy of manufacture, safety, styling, invention and creativity. Prerequisites: M E 235, 237, and 293.

**284 (II). MECHANICAL AND AEROSPACE ENGINEERING ANALYSIS I**

Engineering problem solving emphasizing problem recognition and formulation, simplifying assumptions, and valid analytical processes. Prerequisite, MATH 165.

**285 (I). VIBRATIONS I**

An introduction to the analysis of vibration of linear systems with emphasis on physical concepts rather than abstract mathematics. The vibrations of machines and machine structures including the setting-up and solution of the differential equations of motion for a wide variety of vibratory systems. Ways of reducing vibration including balancing, active and passive isolation, absorption, and damping. Laboratory demonstrations. Prerequisite, M E 246.

**286 (II). ADVANCED MACHINE DESIGN**

Continuation of 283. Additional elementary parts and some complete machines. Emphasis on invention and creativity. Prerequisite, M E 283. 2 class hours, 1 3-hour laboratory period

**287 (I). GAS DYNAMICS**

Continuous and discrete media. Compressible flow equations and compressibility effects. Flow in variable area ducts, normal and oblique shocks. Two dimensional flow. Applications. Prerequisites, M E 163 and 265.

**288 (I). PHYSICS OF SOLIDS**

Mechanical, electrical, magnetic and thermal properties of engineering materials. Prerequisites, CHEM 112 or 114, PHYSIC 162 or 125 or their equivalents.

**291 (II). MECHANICAL AND AEROSPACE ENGINEERING ANALYSIS II**

Continuation of M E 284. Emphasis on more complex problems and more advanced mathematical methods. Prerequisite, M E 284.

**293 (II). MECHANICAL ENGINEERING DESIGN I**

Introduction to the engineering design process, inventiveness, optimization, and decision-making. Prerequisite, M E 284. 2 class hours, 1 3-hour laboratory period.

**294. MECHANICAL AND AERO-SPACE SYSTEMS ANALYSIS**

Application of engineering analysis techniques to large scale systems. Concepts and methodology of systems engineering. Prerequisite, ECE 142 or permission of instructor.

**295 (I). MECHANICAL AND AEROSPACE ENGINEERING DESIGN**

Application of fundamentals and technology to complex design projects. Prerequisite, senior standing. 1 class hour, 2 3-hour laboratory periods.

**297 (I). LUBRICATION, FRICTION, AND WEAR**

Hydrodynamic and boundary lubrication, adhesive, abrasive and hysteretic friction and wear processes are analyzed. Applications in the design of bearings, seals, gears, and other systems involving surfaces in relative motion.

**308 (I). PHYSICAL METALLURGY PRINCIPLES**

Principles underlying the structure and behavior of metals. Atomic arrangements, crystalline imperfections. Equilibrium and non-equilibrium phase relationships in one- and two-component systems. Kinetics of diffusion and nucleation. Phase transformations, heat treatment and hardenability. Prerequisite, M E 135.

**309 (II). MECHANICAL PROPERTIES OF METALS, POLYMERS, AND GLASS**

The mechanical properties of metal, polymers, and glass and the mechanisms which control these properties. Topics include: elasticity and its relationship to bonding, plasticity in terms of dislocation theory, time dependent flow of polymers and metals, brittle fracture in metals and glass, effect of alloy additions on metal properties. Prerequisite, M E 135.

**315. AERODYNAMICS**

Application of theoretical fluid mechanics to aerodynamics including topics of theory of lift; finite wing theory; the effect of compressibility and viscosity on lift and drag; slender body theory. Prerequisite M E 265 or equivalent.

**316. STABILITY AND CONTROL OF VEHICLES**

Introduction to the general concept of stability of motion. The stability of motion of air, space and ground vehicles. Prerequisite, M E 274

**350 (II). X-RAY DIFFRACTION**

Principles of crystallography. X-ray diffraction. Prerequisite, M E 308.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6*

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4.*

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

# College of Food and Natural Resources

Arless A. Spielman, *Dean*; Ernest M. Buck, *Associate Dean*; Gene McMurtry, *Associate Dean*; John A. Naegele, *Associate Dean*; John W. Denison, *Assistant Dean*; D.N. Maynard, *Assistant Dean*.

## Entomology

*Head of Department:* Professor T. Michael Peters. Professors Becker, Edman, Hanson; Assistant Professors Barbosa, Hagedorn, Stofolano.

A departmental graduation requirement is successful completion of at least 15 semester hours of credit in junior-senior courses (those numbered 200-399) offered by the Department. The flexibility allowed by this requirement enables students in consultation with their advisors to build an individual program of courses appropriately tailored to their future goals.

For students anticipating research or teaching careers which require graduate study, electives should stress basic sciences and liberal arts courses in botany, chemistry, English, modern languages, statistics, and zoology. Students interested in medical entomology should include microbiology, parasitology, and public health courses. For work in pest control, extension quarantines or agricultural chemicals, electives from plant pathology and soil sciences, forestry, business, communication studies, and applied entomology are recommended.

### 126 (I), (II). INSECTS AND MAN (E)

A survey of the field; structure, development, evolution, classification, biology, and natural control of insects. 3 class hours.

### 150 (I). PRINCIPLES OF APPLIED ENTOMOLOGY

A broad basic course for both majors and non-majors. General principles of pest control stressed, instead of "how-to-do-it" details. 2 class hours, 1 2-hour laboratory period.

**260 (II). FOOD AND STRUCTURAL PESTS**  
Identification, biology and specific control measures of arthropod and rodent pests in structures, foods, fabrics, and miscellaneous products during transportation and in homes. A prior course in zoology or entomology desirable. 2 class hours, 1 2-hour laboratory period.

**266 (I). PRINCIPLES OF APICULTURE**  
Honeybees and their relatives, structure and biology of bees, methods of management, diseases, pollination, queen rearing, honey production, and history of beekeeping. Given in alternate years. Prerequisite, Ent 126 or permission of instructor. 2 class hours. 1 2-hour laboratory period.

### 272 (II). FOREST AND SHADE TREE INSECTS

Structure and classification of, and damage by, different types of tree insects. Identifica-

tion, biology, and control of important pests. Oriented toward forestry and arboriculture juniors and seniors. Prerequisites, ZOOL 101 plus FOREST 212 or PL SOIL 235, 236. Two class hours, one four-hour laboratory period.

Credit, 4.

### 276. ANIMALECOLOGY

The basic principles and concepts that are operative at the various levels of biological organization (organismic, population, community, and ecosystem). Topics include: ecology and natural selection, behavioral ecology, human ecology, and current ecological problems. 3-hour lecture (optional 1-credit laboratory).

Credit, 3 (or 4).

### 295 (I), (II). EVOLUTION

The course and dynamics of both inorganic and organic evolution. The implications of evolutionary concepts on human philosophy, behavior and welfare.

### 311. INSECT BEHAVIOR

The specific behaviors of insects, analyzed in view of current experimental research, and used to demonstrate various neurobiological principles. An understanding of the behavioral dynamics of a specific insect as a basis for examining how the organism's behavior insures survival under the diverse environmental stresses. 3-hour lecture (optional 1-credit laboratory).

Credit, 3 (or 4).

### 355 (I). CLASSIFICATION OF INSECTS

The identification of insects, including immature stages. First semester: Orthoptera, Hemiptera, Coleoptera; second semester: other orders. Either semester may be elected independently. Given in alternate years. Prerequisite, permission of instructor; ENT 126 desired. 3 2-hour laboratory periods.

### 357 (I). INSECT MORPHOLOGY

The external anatomy of the major orders, with stress on phylogenetic relationships, as background for subsequent work in taxonomy and physiology. Given in alternate years. Prerequisite, permission of instructor; ENT 126 desired. 1 class hour, 3 2-hour laboratory periods.

Credit, 4.

### 374 (II). MEDICAL AND VETERINARY ENTOMOLOGY

Relationships of insects and their allies to the health of man and animals. The classification, biology and control of these pests. Given in alternate years. Prerequisite, ENT 126 or permission of instructor. 1 class hour, 2 2-hour laboratory periods.

### 380 (II). INSECT CONTROL

The science of pest control. Biological control and the need, economics, effectiveness, and hazards of insecticides. Given in alternate years. Prerequisite, ENT 126. 1 class hour, 2 2-hour laboratory periods.

### 382 (II). INSECT PHYSIOLOGY

The organ systems, their functions in nutrition, reproduction, respiration, and growth and the relationship of physiology to behavior. Given in alternate years. Prerequisites: ENT 126 and permission of instructor. 2 class hours, 2 3-hour laboratory periods. Credit, 4.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-4.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 1-4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-4.

## Environmental Sciences

*Head of Department:* Commonwealth Professor Warren Litsky. Professor Gunner; Associate Professors Coler, Deubert, Lockwood Walker.

The Environmental Sciences major is a flexible, interdisciplinary program which emphasizes depth of study in environmental biology. Introductory Environmental Biology followed by Methods of Pollution Measurement are recommended for the sophomore year. Departmental requirements are outlined as follows: a strong background in biology; chemistry, physical science and mathematics; eight courses in the Department of Environmental Sciences, four of which are upper level; a 12-credit conjugate area of study. Students should seek advice early in their academic programs in order to construct an individualized course of study appropriately tailored to their future goals, and which satisfies departmental requirements.

### 201. INTRODUCTORY ENVIRONMENTAL BIOLOGY (E)

The response of the biota to environmental stress induced by air, water and soil pollutants. Prerequisites, BOTANY 101, ZOOL 101 or equivalent.

### 215. AGRICULTURE AND ENVIRONMENTAL POLLUTION

Agricultural pollutants and pollutants attributed to agriculture, their sources and the behavior in the environment. Major problem analysis of cases involving real and alleged agricultural pollution.

### 275. STREAM MANAGEMENT

Field methods for the preservation and restoration of the natural character of stream. Emphasis on habitat management. Prerequisite,

sites, ZOOL 101 or GEOL 100 or 101. One lecture and 1 3-hour laboratory. *Credit, 2.*

**302. ADVANCED POLLUTION BIOLOGY**  
The measurement and evaluation of the biotic response to environmental stress of the terrestrial and aquatic biocoenoses induced by air, water and soil pollutants. Prerequisites, ENV SCI 201 or equivalent. 2 1-hour lectures, 2 3-hour laboratory, field trips, demonstrations. *Credit, 4*

**304. RIVER POLLUTION — BIOLOGICAL SURVEY METHODS**  
A field experience to assess water quality through the application of standard biological indices supplemented by chemical and physical analyses. Prerequisites, ENVSCI 302 or permission of instructor. Two 4-hour laboratories.

**315. MICROBIOLOGY OF THE SOIL**  
Soil microorganisms; their distribution, ecology and transformation of organic and inorganic substrates including pesticides. Microbiology of the rhizosphere and the biological equilibrium.

**316. MICROBIOLOGY OF AIR AND WATER**  
Microbial communities in air and water; their responses to environmental stress and their use as indices of environmental quality.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

**391, 392. SEMINAR**  
Topics of current Environmental Sciences interests. *Credit, 1-3.*

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4*

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

## Food and Agricultural Engineering

*Head of Department:* Professor J. T. Clayton. Professors Light and Schwartzberg; Associate Professors C. Johnson, E. Johnson, Mudgett, Peleg, Rosenau, Whitney; Assistant Professor Pira.

**255 (I). AQUACULTURAL ENGINEERING**  
Rate theory and similitude in the scale-up of biological processes. Case study of biological data used in the derivation of useful engineering system design relationships for the culture of mollusks.

**261 (I), (II). HOUSING DESIGN AND CONSTRUCTION**  
Space arrangement, construction materials, construction problems, utilities, financing, maintenance and remodeling. Emphasis on planning and evaluation procedures and factors. 1 class hour, 1 3-hour laboratory period.

**281 (I). FUNDAMENTALS OF FOOD SERVICE SYSTEMS ENGINEERING**  
The fundamental engineering principles involved in the planning, equipping and operation of a commercial restaurant. Emphasis on application of these principles to specific situations within the kitchen.

**331 (I). INSTRUMENTATION**  
Instrumentation applied to research, covering recorders, indicators, controllers and transducers in general. Emphasis on applications and limitations. Prerequisite, PHYSIC 162 or equivalent. 2 class hours, 1 2-hour laboratory period.

**356 (I). CONTROL SYSTEMS FOR SOIL MOISTURE**  
Design of systems for soil drainage and crop irrigation; soil requirements, climatology and hydraulics as applied to engineering problems involved in these systems. 2 class hours, 1 2-hour laboratory period.

**361 (I). STRUCTURES AND RELATED EQUIPMENT**  
Fundamental aspects of planning modern farm structures; emphasis on design, environmental control and integration of mechanical equipment. 2 class hours, 1 2-hour laboratory period.

**365 (II). PHYSIOLOGICAL UNIT OPERATIONS**  
Introduction to physiological systems, studies of thermodynamics, fluid dynamics, heat transfer and mass transfer in biological systems, concepts in biological regulatory systems and biological engineering designs with specific examples. Prerequisites, Approval of department, or CH E 256, or M&AE 265 & 382.

**375 (I). FOOD PROCESSING SYSTEMS ANALYSIS**  
Continuous and batch processing systems for food and biological products, using flow analysis, systems analysis, scale-up, and simulation techniques. Analysis of machine operating principles, sanitary requirements, fabrication limitations and machine interrelations. Prerequisite, permission of instructor. 2 class hours, 1 2-hour laboratory period.

**376 (I). MECHANIZATION IN CROP PRODUCTION**  
Principles of operation, maintenance, and selection of farm tractors and field machinery; irrigation and drainage systems and equipment. Emphasis on management practices and

discussions. 1 class hour, 2 2-hour laboratory periods.

**381 (I). ELEMENTS OF PROCESS ENGINEERING**  
Fundamental engineering principles involved in the processing of biological materials; emphasis on heat transfer, mass and energy balances, refrigeration, psychrometry, properties of fluids and fluid flow. 2 class hours, 1 2-hour laboratory period.

**384 (I). UNIT OPERATIONS IN FOOD ENGINEERING**  
Application of engineering concepts to the processing and handling of biological materials, including evaporation, dehydration, irradiation, freeze drying, cost analysis, material handling, manual motion economy and packaging. 2 class hours, 1 2-hour laboratory period.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4.*

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

## Food and Resource Economics

*Head of Department:* Professor N. Eugene Engel. Professors Christensen, Crossmon, Foster, Leed, Storey; Associate Professors Callahan, Jarvesoo, Lee, Marion, Spindler; Assistant Professors Conrad, Field, McDowell, Willis; Visiting Professor Allen.  
Majors will satisfy University and departmental graduation requirements as follows:

| University Core                             | Credits |
|---------------------------------------------|---------|
| Rhetoric                                    | 6       |
| Math/Natural Science                        | 9       |
| Humanities                                  | 9       |
| Social Sciences                             | 9       |
|                                             | <hr/>   |
|                                             | 33      |
| <i>Departmental</i>                         |         |
| MATH 110/F&R EC-177 or<br>STAT 121/ENGL 337 | 9       |
| ECON 103/104                                | 6       |
| F&R EC-110/206/261/226                      | 12      |
|                                             | <hr/>   |
|                                             | 27      |
| F&R EC - junior-senior electives            | 18      |
| Restricted electives                        | 12      |
|                                             | <hr/>   |
|                                             | 30      |
| Unrestricted Electives                      | 30      |
|                                             | <hr/>   |
|                                             | 120     |

**110 (I). WORLD FOOD AND NATURAL RESOURCES (D)**

Introduction to the natural, economic, and sociopolitical forces influencing world food and biological resource development. Potentials for meeting pressures on resources. 2 class hours, 1 2-hour discussion.

**177 (I). BASIC BIOMETRY (E)**

Introduction to applied statistical principles and techniques for biological data.

**206 (II). AGRICULTURAL ECONOMICS**

Intensive review of the agricultural sector. Application of economic principles to problems of production and marketing, elements of price making. Income problems of agriculture.

**226 (II). ENVIRONMENTAL ECONOMICS**

Issues relating to environmental aspects of land and water use. Emphasis on the economic implications of alternative courses of action as they affect both public and private sectors. Prerequisites, ECON 100 and 103 or equivalent background.

**261 (I). FOOD MARKETING SYSTEMS**

Structure of food marketing systems. Operating principles, significant product characteristics, role of specialized marketing firms, government programs and policies.

**265 (I). FOOD MERCHANDISING**

Economic analysis of factors, internal and external to the firm, influencing sales of food firms. Food industry development, consumer behavior, competitive strategies, and legal considerations.

**282 (I). WATER QUALITY ECONOMICS**

Principles for selection of welfare maximizing plans from among alternative pollution control policies and market and administrative decision-making processes for pollution control.

**303 (I). AGRICULTURAL BUSINESS MANAGEMENT**

Decision-making principles, management tools, analytical methods and their application to management problems of commercial farms and other agricultural firms. 2 class hours, 1 2-hour discussion.

**341 (I). PRICE THEORY AND ANALYSIS**

Price theory and analytic tools of economic analysis. Emphasis on application of quantitative techniques in the analysis of practical economic problems. Material related to managerial decision making.

**346 (II). REGIONAL COMPETITION AND MARKET INTERDEPENDENCY**

Interregional competition and interdependency in agricultural factor and product markets in the context of aggregate demand and supply by regions as affected by spatial considerations.

**352 (I). AGRICULTURAL POLICY**

Analysis of farm price support programs, programs for alleviation of rural poverty, food trade and aid policies, other topical issues.

**365 (II). ECONOMICS OF RURAL DEVELOPMENT**

The economic processes that shape rural communities and affect the rural/urban balance of society. Ideas from several economic specialties focused on rural regions and communities; emphasis on development of rural economic policies and programs and on identifying community evaluation techniques. Prerequisites: F&REC. 341 or equivalent or permission of instructor.

**368 (II). FOOD DISTRIBUTION ECONOMICS**

A critical analysis of the food industry; the legal and competitive framework, performance and public policy; management practices with respect to site selection, budgeting, merchandising, expense control and employee training and evaluation in food distribution firms.

**373 (II). RESOURCE AND CONSERVATION ECONOMICS**

Economic and institutional factors affecting land and water use. Land use planning. Elements of conservation economics.

**376 (II). MARINE RESOURCE DEVELOPMENT ECONOMICS**

Economic analysis of alternative plans for attainment of social goals in the development of coastal and offshore marine resources.

**381 (II). INTERNATIONAL AGRICULTURAL DEVELOPMENT**

Economic development of low income rural economies. Relation of agriculture to national economies. Exogenous and endogenous factors in development.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**387. SPECIAL PROBLEMS IN RESOURCE ECONOMICS**

Individual study of resource economics problems. By arrangement with members of the department. Credit, 1-6.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Food Science and Nutrition**

Head of Department: Professor F.J. Francis. Professors Buck, Fagerson, Hayes, Hultin, Nawar, Pellet. Adjunct Professor Schwartzberg. Associate Professors Beal, Bert, Clydesdale, Evans, Hunting, Levin, Potter, Sawyer. Adjunct Associate Professors Manning, Rosenau, Wright. Assistant Professors Johnson, Weatherholtz.

The Department of Food Science and Nutrition has two majors: 1) Food Science, and 2) Human Nutrition. A number of options are available, such as Food Science and Technology, Nutrition and Food Science, Community and Public Health Nutrition, Dietetics, Foods In Business, Computerization in Nutrition and Food Science, etc.

**101 (II). THE STRUGGLE FOR FOOD (E)**  
Modern advances in science in the growth, production, and use of both natural and synthetic foods in alleviating the world food crises.

**102 (I), (II). WORLD FOOD HABITS**  
The historical origins, scientific bases, and nutritional implications of current human eating habits throughout the world. Physiological and psychological factors, specific taboos, superstitions, prejudices, aversions, influence of modern production technology, etc.

**140 (I), (II). MAN AND NUTRITION (E)**  
Basic facts and principles of human nutrition. Application of this knowledge to maintenance of good health and vigor. Contemporary problems in human nutrition. For students not majoring in food science and nutrition.

**210 (I). MEAL MANAGEMENT AND SCIENTIFIC FOOD PRINCIPLES**

Meal management with emphasis on the nutritional, economic, time, ethnic, and cultural factors. Experimental application of the chemical and physical properties of food in food preparation. Prerequisite, CHEM 112 or equivalent. 2 class hours, 1 3-hour laboratory period.

**240 (I), (II). BASIC NUTRITION**

The basic principles of nutrition. The nutrients: energy, protein, vitamins, minerals and water, and their chemical and physiological roles in metabolism. Prerequisite, Organic chemistry or concurrent registration.

**241. METHODS OF NUTRITION RESEARCH**

Laboratory study of methods available for assessment of nutritional status and the intakes of nutrients. Prerequisite, FS&N 240. 3-hour laboratory periods. Credit, 2.

**251 (I). INTRODUCTORY FOOD SCIENCE**  
Primarily for department majors. Seminar on food manufacture, preservation, processing and distribution. Credit, 2.

**258 (I). ANIMAL PRODUCTS**

Principles of processing, handling, packaging and storage of animal and other protein foods. Chemical and structural aspects of muscle as they relate to quality evaluation and preservation. 2 class hours, 1 2-hour lecture-demonstration.

**275 (I), (II). SURVEY OF FOOD SCIENCE**

Introduction to food science, and its role in the world's food supply. The relationships between production, processing and consumption of foods, including principles and methods of preservation. Consumer issues, regulatory functions, quality and food usage, and future prospects for the food supply. 2 class hours, 1 2-hour laboratory period.

**312. EXPERIMENTAL FOODS**

Fundamental principles of food quality evaluation; development of independent research problems. Prerequisite: FS & N 210, Organic Chem or permission of instructor. 1 class hour, 2 3-hour laboratory periods.

**340. NUTRITION IN THE LIFE CYCLE**

Nutritional needs at various stages in the life-cycle, i.e. pregnancy and lactation, infancy, childhood, adolescence, adult life and the aged. Prerequisite, FS & N 240 or permission of instructor.

**342 (II). COMMUNITY NUTRITION**

Community response through its agencies and institutions, public, private, and voluntary, in providing nutrition care services and education. Prerequisite, FS & N 340 or permission of instructor. Lecture and Field Experience. Given alternate years. Credit, 1-3.

**343 (II). NUTRITIONAL PROBLEMS OF THE UNITED STATES**

The factors within the developed countries, especially the United States, resulting from and causing malnutrition. Obesity, coronary heart disease, food fads and quackery, food additives and unintentional residues. Prerequisite, FS & N 340 or permission of instructor.

**344 (I). NUTRITIONAL PROBLEMS OF DEVELOPING NATIONS**

Malnutrition in developing nations and its socioeconomic background. Protein-energy malnutrition in childhood, famine, vitamin and mineral deficiency diseases and the relationships with diets as consumed in such regions. The synergism between nutrition and infection and the role of international agencies in fighting malnutrition. Prerequisite, FS & N 340 or permission of instructor.

**345. NUTRITION IN DISEASE**

Physiological basis for therapeutic diets in certain diseases. Current medical and nutrition literature used. Prerequisite, FS & N 340, BIOCHM 220, ZOOL 135, or permission of instructor. Given alternate years.

**352. FOOD CHEMISTRY**

The chemistry of food products. Chemical, physical and biological changes in foods at the cellular and molecular levels during storage and processing. Emphasizes water, cell structure, carbohydrates and lipids of foods. Prerequisite, organic chemistry or concurrent registration.

**353. FOOD CHEMISTRY**

The chemistry of food products. Chemical, physical and biological changes in foods at the cellular and molecular levels during storage and processing. Emphasizes food proteins, enzymes, vitamins and flavor chemistry. May be taken separately from FS & N 352. Prerequisite, organic chemistry or concurrent registration.

**360. ADVANCED METHODS OF COMPUTERIZATION IN NUTRITION AND FOOD SERVICE**

The mathematical foundations of computations with food nutrient and recipe data. The data file structure of computerized food and nutrient accounting systems. The principle of mathematical optimizations techniques and its utilization in computerized menu planning and scheduling models. Laboratory work with computer applications. Prerequisite, FS & N 340, MGT 110 and MATH 115 or equivalents.

**361 (II). FOOD PROCESSING**

Introduction to the food industry, principles of processing and preservation in current usage. Statistical quality control procedures. 3 class hours, laboratories by arrangement.

**362 (I). FOOD PROCESSING LABORATORY**

Application and utilization of pilot plant equipment to study and evaluate principles of commercial practice in the food industry. Introduction to advanced techniques of food processing. 1 class hour, 1 4-hour laboratory period. Prerequisite, FS & N 361.

**365 (I). UNIT OPERATIONS**

Technical principles involved in the processing of food, milk and dairy products. 2 class hours, 1 2-hour laboratory period.

**366 (I). HYGIENIC PRINCIPLES OF FOOD HANDLING**

The application of hygienic principles to the preparation, processing and handling of foods. Emphasis on the training of supervisory personnel.

**367 (I), (II). FOOD MICROBIOLOGY**

Application of microbiological principles and methodologies to the quality control of foods. 2 class hours, 2 2-hour laboratory periods. Credit, 4

**371 (I). ANALYSIS OF FOOD PRODUCTS**

Physical, chemical, microbiological and

microscopical methods. Prerequisite, Analytical Chemistry, 2 class hours, 1 4-hour laboratory period.

**372 (II). OBJECTIVE ANALYTICAL METHODS AND INSTRUMENTATION**

Continuation of 371. Prerequisite, FS&N 371. 2 class hours, 1 4-hour laboratory period.

**374 (II). NUTRITIONAL EFFECTS OF FOOD PROCESSING AND PREPARATION**

The effects of preparation and processing on the nutritional value of foods. Leaching and destruction of vitamins and minerals, effects of heat and oxygen on carbohydrates, lipids, and proteins, available and unavailable nutrients consequent on processing, and potentially toxic compounds produced. Prerequisite, FS&N 240 or permission of instructor.

**380 (I), (II). SPECIAL TOPICS IN WORLD FOOD TECHNOLOGY**

Selected problems concerned with food science and allied areas in solution of world food problems. 2 class hours. Credit, 2.

**384 (II). SENSORY EVALUATION METHODS**

An introduction to sensory measurements in the evaluation and acceptance of foods. Panel tests and their statistical interpretations; taste, odor, color, and texture measurements. Methodology of consumer testing and statistical interpretation of data. 2 class hours, 1 2-hour laboratory period.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**389. FIELD STUDY** Credit, 1-15.**391 (I), 392 (II). SEMINAR IN FOOD SCIENCE**

For seniors who major in Food Science and Nutrition. 2 class hours. Credit, 2.

**393 (II). SEMINAR IN NUTRITION**

Reports and discussion of current research studies in nutrition. Prerequisite, permission of instructor. Credit, 1.

**394 (I). SEMINAR IN FOOD**

Reports and discussion of current research studies in food. Prerequisite, permission of instructor. Credit, 1.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By

arrangement with Department and/or Honors Office. Credit, 1-5.

## Forestry and Wildlife Management

Head of Department: Professor Donald R. Progulski, Professors Abbott, C. F. Cole, Gatslick, MacConnell, Mader, Marra; Associate Professors Bond, Carlozzi, Dodge, Greeley, Hoadley, Kennelly, Larson, Reed, Rice, Wilson; Assistant Professors A. B. Cole, Fischer, Mawson, Parrish.

## FORESTRY

### 121 (II). TIMBER HARVESTING

Timber harvesting and primary conversion of wood products.

### 212 (I), (II). DENDROLOGY

Taxonomic features, silvical characteristics, and distribution of principal tree species of temperate North America. Permission of the instructor required by all non-forestry majors. 3 class hours, 2 2-hour laboratory periods.

Credit, 4.

### 216 (I). TREE GROWTH

An introduction to the development of tree root and shoot systems, wood production and distribution, phase changes and the relation of a tree to its environment. Prerequisite, BOTANY 100. 2 class hours.

Credit, 2.

### 223 (I). SILVICS

Principles of forest ecology as a foundation for silviculture and forest management, environmental factors; development of trees and forest communities; forest influences. FOREST 112 and FOREST 225 are required. 2 class hours, 1 4-hour laboratory period.

Credit, 4.

### 224 (I). FOREST SOILS

Effects of soil properties on tree growth; relationship of soils to silviculture, harvesting, watersheds, wildlife, and forest recreation; forest soil description, classification and mapping. 2 class hours, 1 4-hour laboratory period.

### 225 (I). January Intersession and Summer. THE ELEMENTS OF FOREST MENSURATION

The measurement of trees, stands, and forests products; practice in timber estimating and log scaling; collection and compilation of forest inventory data. 2 class hours, 1 4-hour laboratory period. Summer and January intersession course, 3 40-hour weeks.

### 226 (I). THE PRINCIPLES OF SILVICULTURE

Culture of forest crops; regeneration and intermediate cuttings, silvicides, slash disposal; planting, direct seeding, nursery management; interactions with forest manage-

ment for water, wildlife, and recreation. FOREST 223 required. Open to junior and senior forestry majors. Permission of instructor required by others. 3 class hours, 1 4-hour laboratory period.

Credit, 4.

### 227 (II). TREE PHYSIOLOGY

Growth and development during the life cycle of trees, emphasizing the whole-plant approach and phenomena best studied in trees; the physiological basis of silviculture. Prerequisite, BOTANY 211, or FOREST 216. 2 class hours, 1 3-hour laboratory period.

### 228 (II). FOREST HYDROLOGY

Principles and factors controlling the hydrologic cycle on forest lands. Review of forest watershed management research on the influence of soils, vegetation, and management practices on water yields and water quality. Watershed management as a part of integrated forest land management. 2 lectures, 1 3-hour laboratory recitation period.

### 229 (I). FOREST PROTECTION

Principles of protecting forests from fire, insects, disease, domestic animals, wildlife, and atmospheric agencies. Open to junior and senior forestry majors. Permission of instructor required by others.

### 231 (I). AERIAL PHOTOGRAMMETRY

The application of photogrammetry in forestry, wildlife biology, geography and other fields concerned with large land surfaces; photographic interpretation and map making from aerial photographs. 2 class hours, 1 4-hour laboratory period.

### 232 (II). FOREST TREE IMPROVEMENT

Tree introduction, geographic variation, tree selection, vegetative propagation, controlled pollination and hybridization, seed orchard management. Prerequisite, FOREST 212, 226. Permission of instructor required.

### 234. ADVANCED FOREST MENSURATION

The theory and application of sampling techniques in forest survey. Continuous Forest Inventory techniques; analysis of growth and yield techniques. Prerequisites, FOREST 225 and basic statistics. 2 class hours, 1 4-hour laboratory period.

### 235 (II). FORESTRY ECONOMICS

The application of economic principles to the allocation of land, labor, and capital in forest enterprises; marketing and pricing theory of forest crops. Prerequisite, ECON 103.

### 236 (I). FOREST RESOURCES POLICY

Forest policy in the United States; institutional, social, political and economic factors affecting forest resources policy development. Current policy problems. 2 class hours, 1 2-hour seminar.

### 239 (II). THE FOREST RESOURCES OF NORTH AMERICA

The forest resources of North America and their management for multi-purpose economic, and social benefits; regional physiography, climate, vegetation, demography and economic base; environmental, economic, and socio-political constraints affecting management. For seniors and graduate students with natural resource, regional planning, or similar backgrounds.

### 240 (II). PRINCIPLES OF FOREST MANAGEMENT

Multiple-use management of forest land for wood, water, wildlife, and recreation; organization of the forest for sustained-yield management; preparation of management plans. Prerequisite for the laboratory, FOREST 225. 3 class hours, 1 4-hour laboratory period. Laboratory period required for forestry majors.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department.

Credit, 1-6

### 391 (I), 392 (II). FORESTRY SEMINAR

Specialized study in a selected area of forestry. For seniors only.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office.

Credit, 4

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.

Credit, 1-5

## NATURAL RESOURCES

### 100 (I) and Summer. CONSERVATION OF NATURAL RESOURCES

Conservation principles and their application to problems in soils, water, forests, wildlife, mineral and general landscape resources; relationship of conservation to national development.

### 302 (II). ECOLOGICAL PRINCIPLES OF RESOURCE PLANNING

Analysis of ecological principles and their relationship and importance to resource planning. State and federal conservation programs chosen for critical case study. Prerequisite, permission of instructor.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department.

Credit, 1-6

### 391 (I), 392 (II). NATURAL RESOURCES SEMINAR

Specialized study in a selected area of natural resources. For seniors only.

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office.  
**Credit, 4.**

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.  
**Credit, 1-5.**

## **WOOD TECHNOLOGY**

**201 (I). WOOD ANATOMY AND IDENTIFICATION**  
A basic anatomical study of wood elements, their structural characteristics and function; identification of woods. Prerequisite, **BOTANY 100**. 2 class hours, 1 3-hour laboratory period.

**202 (II). PRIMARY TIMBER CONVERSION**  
Survey of operations, principally sawmilling, in the primary conversion of logs into lumber and allied by-products; drying, grading, handling and market distribution of sawmill products. Not open to students in Forest Management except by special permission.

**203 (I). FOREST PRODUCTS**  
An overview of the contribution of the forest to man's requirements for shelter, paper products, furniture, food, and chemicals; emphasis on the sociological and economic importance and long range potential of forest fiber including recycling.

**204 (II). PROPERTIES OF WOOD**  
The physical and mechanical properties of wood and their importance in wood utilization. Techniques for physical measurement and mechanical testing. Prerequisite, **WDTECH 201**. 2 class hours, 1 3-hour laboratory period.

**206 (II). WOOD MACHINING TECHNOLOGY**  
Fundamental principles of knife and sawtooth action as applied to problems of severing, surfacing, and shaping; general survey of commercial wood machining equipment. Several field trips. Prerequisites, **WDTECH 201** and **204**. 2 class hours, 1 3-hour laboratory period.

**208 (I). WOOD SEASONING AND PRESERVATION**  
Properties of wood in relation to drying and preservation; theory and practice of air seasoning, kiln drying, and preservative treatment. Several field trips. Prerequisite, **WDTECH 204** recommended. 2 class hours, 1 3-hour laboratory period.

**211 (I). WOOD ADHESIVE TECHNOLOGY**  
Basic concepts, theories, and applied techniques of gluing wood and fibrous composites. Prerequisites, **WDTECH 201** and **204**.

**WDTECH 238** recommended. 2 class hours, 1 3-hour laboratory.

**212 (II). WOOD COATING TECHNOLOGY**  
Basic concepts and applied techniques in wood substrate surface modification, including materials and methods for finishing wood and fibrous composites. Prerequisites, **WDTECH 201** and **204**. Organic Chemistry recommended. 2 class hours, 1 3-hour laboratory period.

**238 (II). CHEMICAL PROCESSING OF WOOD**  
Introduction to the chemistry and surface phenomena of the principal products found in wood. Prerequisite, Organic Chemistry.

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. **Credit, 1-6.**

**391 (I), 392 (II). WOOD TECHNOLOGY SEMINAR**  
Specialized study in a selected area of wood utilization and technology. For upperclass students only.

**398. SENIOR HONORS**  
Senior research, thesis option. By arrangement with Department and/or Honors Office.  
**Credit, 4**

**399. SENIOR HONORS**  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office.  
**Credit, 1-5.**

## **Wildlife and Fisheries Biology**

The first professional degree in Wildlife and Fisheries Biology is the master's degree; for this reason study toward the bachelor's degree should be regarded as a pre-professional program. Students who do not plan to enter graduate school are urged to meet with their advisors to select electives and plan their course of study accordingly. Students wishing to enroll in Wildlife Biology should declare the College of Food and Natural Resources as their major until requisite courses have been completed. Vacancies in the program will be filled as they become available.

### **WILDLIFE BIOLOGY**

**261 (I). PRINCIPLES OF WILDLIFE MANAGEMENT**  
Fundamental ecology and principles of wildlife management. Emphasis on population characteristics and responses. 2 class hours, 1 4-hour laboratory period.

**262 (II). TECHNIQUES OF WILDLIFE MANAGEMENT**  
Methods of collecting and interpreting data in

wildlife management. Emphasis on field and laboratory experience in census methods and criteria for determining sex, age and other characteristics of wild birds and mammals. Prerequisite, elementary statistics. 2 class hours, 1 4-hour laboratory period. For Wildlife majors only.

**264. MANAGEMENT OF UPLAND WILDLIFE**  
Life histories, identification, and habitat requirements of upland game birds, game mammals, and furbearers; management of upland habitats offered in alternate years. 2 class hours, 1 4-hour laboratory period.  
**Credit, 2-3.**

**363. MANAGEMENT OF WETLAND WILDLIFE**  
The origins, important characteristics and distribution of wetland wildlife habitat in North America and other portions of the northern hemisphere. Multiple values of wetlands, public management practices and principal wetland wildlife species. 2 class hours, 1 4-hour laboratory period. Laboratory section restricted to Wildlife majors. **Credit, 2-3.**

**385, 386. SPECIAL PROBLEMS**  
Individual study of a selected problem for qualified students. By arrangement with members of the department. **Credit, 1-6.**

**391 (I), 392 (II). WILDLIFE SEMINAR**  
Specialized study in a selected area of wildlife biology or management. For upper level students only. **Credit, 1-3.**

### **FISHERIES BIOLOGY**

**265 (I). TECHNIQUES OF FISHERIES BIOLOGY**  
Principles and techniques of fishery management, stressing population and growth dynamics, and field procedures. Prerequisite, **ZOOL 300**.

**267 (I). LABORATORY IN PRINCIPLES OF FISHERIES BIOLOGY**  
Field techniques in fisheries biology; operation and use of fishery research and management equipment. Laboratory analysis of field-collected data. Concurrent enrollment in **FISH 265**. 1 4-hour laboratory. **Credit, 1.**

**270 (II). ECOLOGY OF FISHES**  
Biological response of fishes to the environment. Aspects of growth, speciation, zoogeography, schooling, homing, and population and community dynamics will be considered. Prerequisites, **FISH 265** and **ZOOL 300** or permission of instructor.

**272 (II). INTRODUCTION TO MARINE FISHERIES**  
Factors affecting world marine fisheries resources and development. Review of

selected species of commercial importance and selected world fisheries. Prerequisites, FISH 265. 2 class hours, 1 4-hour laboratory.

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

#### 391 (I), 392 (II). FISHERIES SEMINAR

Specialized study in a selected area of fisheries biology. For upper level students only.

Credit, 1-3.

### Division of Home Economics

Helen R. Vaznaian, Director

Anne H. Ridenut, Assistant Director of Extension for Home Economics

Professors Merchant, Niederpruem, Wright; Associate Professors Davis, Green, Hawes, Lopez-Ansari, Miller, Murphy; Assistant Professors Moroney, Schumacher, Sullivan; Instructor Porter; Lecturers Pullen and Tuck.

The Division of Home Economics which is committed to improving the quality of individual and family life in a changing society provides several programs of study which prepare home economists for a variety of professional roles in education, business, and public service. The programs of study are as follows: HOME ECONOMICS EDUCATION, HOME ECONOMICS EXTENSION, HOME ECONOMICS IN SOCIAL WELFARE & REHABILITATION, HOME ECONOMICS IN COMMUNICATION, HOME ECONOMICS IN BUSINESS, FASHION MARKETING, and HOME ECONOMICS IN PUBLIC SERVICE.

#### 125. DESIGN FUNDAMENTALS

The language of two-dimensional design relationships, studied through a series of design problems. Provides a basic visual grammar; may serve as a foundation for further study.

#### 170. FASHION MARKETING

Importance of fashion and the allied areas that form the fashion industry. Interrelationship of designers, textile industry, foreign and domestic markets and the manufacturer.

#### 211. ECONOMIC PROBLEMS OF THE FAMILY

Personal finance at various income levels and during different stages of the life cycle.

#### 212. CONSUMER ECONOMICS

Application of macro- and micro-economic theories and concepts to an understanding of consumer demand within a market economy, income distribution, consumer spending and saving.

#### 215. THE CONSUMER AND ECONOMIC PROBLEMS

Contemporary economic problems as they

affect families. Affluence and poverty, fiscal policies, delivery of public goods.

#### 220. THEORY AND APPLICATION OF MANAGEMENT

Interrelationships in management and decision-making of family values, goals, and circumstances; use of human and material resources for maximum economy, satisfaction and family well-being.

#### 235. APPLIED DESIGN: TEXTILES

Experimental design projects in loom weaving and surface patterns using the techniques of silkscreen, tie-dye, Batik and block printing. Prerequisite, HOM EC 125, ART 120 or equivalent.

#### 240. TEXTILES FOR THE CONSUMER

Theories and processes underlying manufacture and development of textile products as a basis for the application of decision-making processes.

#### 241. TEXTILES FOR THE INTERIOR

Basic factors related to durability, maintenance, appearance, appropriateness, performance and cost of textiles used in residential, commercial and public interiors.

#### 255. MAN AND CLOTHING

The impact of clothing and textiles on the individual and society; sociological, psychological and economic implications as seen in historical and contemporary perspective. Prerequisite, PSYCH 101, SOCIOL 101 or ANTH 104.

#### 257. CONTEMPORARY FASHION ANALYSIS

Development of current fashion, current fashions in relation to the principles of design and color, and individual variables. Prerequisite, HOM EC 125.

#### 259. QUALITY ANALYSIS OF APPAREL

Analysis of quality standards in apparel; emphasis on aesthetic design and creative expression, functional characteristics and satisfactions of construction and materials, economic factors of cost and maintenance. Students receiving less than Level 1 on Clothing Pre-Test (administered at first class meetings) must sign up for special 1-credit individualized modular program.

#### 260. HOUSEHOLD EQUIPMENT

Physical principles, construction, materials, and economic considerations underlying selection, use and care of household equipment. 2 class hours, 1 2-hour laboratory period.

#### 265. HISTORY OF COSTUME

Western costume from ancient civilizations to the present; exploration of the relationship of clothing to the period. Prerequisite, HIST 100 or 110.

#### 272. PRINCIPLES AND CONCEPTS OF RETAILING

Principles and concepts requisite for successful retail distribution, history and current trends in retailing. Prerequisite, HOM EC 170 MKTG 201.

#### 274. CONSUMER ATTITUDES AND DEMAND

The motives, attitudes, and expectations of consumer behavior as influencing variables operating within and on the market. Prerequisites, ECON 100, PSYCH 101, SOCIOL 101, or permission of instructor.

276. PRODUCT ANALYSIS: NONTEXTILE  
Consumer products from design through the manufacture and distribution channels. Evaluation of products as they relate to consumer needs and ecology.

#### 310. LEGAL ASPECTS OF CONSUMER INTEREST

Consumer protection as afforded the consumer in the market by Federal, State and private agencies and recent court decisions. Protections which should be afforded the consumer, legal and otherwise.

#### 320. RESOURCE MANAGEMENT FOR EXCEPTIONAL FAMILIES

Special managerial problems faced by families with exceptional imbalances in resources. Analysis of techniques of compensating for resource limitations in families in poverty, with health handicaps, with young mothers in the labor force, one-parent families, student couples, and retired couples.

#### 342. TEXTILES FOR THE CONSUMER II

Current developments and research in the field of textiles affecting consumer satisfactions with product serviceability and legislative projections. Prerequisite, HOM EC 240 or 241.

#### 361. APPAREL DESIGN I, FLAT PATTERN

Theory of apparel design developed through flat pattern methods. Problems include fitting master pattern, creation and execution of original designs. Prerequisite, HOM EC 259, or Level 2 score on Clothing Pre-Test and special 1-credit problem on fitting and alterations.

#### 363. APPAREL DESIGN II, COMPARATIVE MATERIALS AND METHODS

Experimentation, execution and evaluation of methods and materials as they relate to design, performance and maintenance factors in advanced structuring and creation of apparel. Prerequisite, HOM EC 259, or Level 2 score on Clothing Pre-Test and special 1-credit problem on fitting and alterations.

#### 365. PERSPECTIVES IN THE CLOTHING PROFESSION

Literature, research, current issues and trends

with implications for the clothing professional in educational programs, social and governmental agencies, consumer and business organizations.

**371. COMMUNITY ORGANIZATIONS AND SERVICES**

An experience of short-term reciprocity between theory and practice emphasizing the principles, methods and problems of community planning to meet a diversity of human needs. Personnel and recipient attitudes, agency relationships, public and private agency roles and responsibilities and contemporary movement.

**374. RETAIL SALES PROMOTION**

Principles and concepts of sales promotion, including advertising types and techniques and methods of display. Prerequisite, HOM EC 272.

**381. ADULT EDUCATION IN HOME ECONOMICS**

Philosophy and principles of adult education, and the community and organizational factors affecting their development. Field trips include observation of adult education programs in community organizations and agencies.

**382. CURRICULUM AND METHODS IN HOME ECONOMICS**

Organization, scope and sequence of learning experiences in Home Economics Education. Philosophy and content of curriculum, development or resource units, and methods of teaching. Prerequisites, PSYCH 301, 263, and EDUC 251. 4 class hours. Credit, 4

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**388. FIELD EXPERIENCE** Credit, 1-15.

**389A. RETAILING FIELD EXPERIENCE**

Supervised work-study program including 3 months off-campus experience in cooperating stores; evaluation of student's training, experience and development. Prerequisites, MKTG 201 and 210, HOM EC 272 and 374. 6-8 weeks prior selling experience and permission of the department. Credit, 15.

**389. FIELD EXPERIENCE** Credit, 1-15.

**391-394. SEMINAR IN HOME ECONOMICS**

Reports and discussion of current research in Home Economics. 1-3 class hours. Credit, 1-3.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Hotel, Restaurant and Travel Administration**

*Head of Department:* Associate Professor Stevenson W. Fletcher, Professor Eshbach, Adjunct Professor Tabler; Associate Professors Cournoyer, Manning, McCullough, Pizam, Wisley; Lecturer Witkoski.

All students are required to complete at least 800 hours of paid work experience in the hotel, restaurant, or travel field — or 400 hours of paid work experience and completion of HRTA 310 and HRTA 311. Students may elect a concentration of courses in one of these areas of study: Hotel Administration, Restaurant Administration, Travel and Tourism, or Institution Management. See the Departmental bulletin, *The Passkey*, for details.

**100 (I), (II). INTRODUCTORY**

An orientation to the hotel, restaurant and travel industry. Development of the industry; current trends and opportunities in the various sectors of the industry.

**120 (I), (II). TRAVEL AND TOURISM**

Travel: trends, travel-modes, economic impact on destination area. Tourism development and marketing. Prerequisite, HRTA 100 or permission of instructor.

**130 (I), (II). SCHOOL FOOD SERVICE MANAGEMENT**

School food service administrative policy, funding, recordkeeping, personnel management, food production logistics, relationships with power groups, legislation, and current trends. Scheduled field trips. Prerequisites, HRTA 156, ACCTG 120, MGT 214 or other management course.

**156 (I), (II). FOOD PRODUCTION MANAGEMENT I**

Basic principles of menu planning and the management of purchasing, food production, and service. 2 class hours, 13-hour laboratory.

**168 (I), (II). WINES AND SPIRITS IN FOOD SERVICE OPERATIONS**

The selection, pricing, merchandising, and service of wines and spirits in restaurants, clubs, and other food service operations. Factors in determining which wines should be offered in a particular food service operation. Recognition of better known wines, American and imported. 1 class hour. Credit, 1.

**200 (I), (II). MANAGERIAL ACCOUNTING FOR THE HOSPITALITY INDUSTRY**

Financial practices and systems used in hotels and restaurants. Controls, capital budgeting, operational budgeting, use and interpretation

of financial statements, and specialized hotel accounting procedures. Prerequisite, course in accounting. Non-majors require permission of instructor.

**202 (I), (II). PERSONNEL MANAGEMENT IN HOTELS, RESTAURANTS, AND THE TRAVEL INDUSTRY**

The management of people in food service, hotels, and the travel industry; leadership and motivation, organization, training and management development, job analysis, wage and salary administration, and work simplification.

**203, 204 (I). GUEST LECTURE SERIES**

Analysis of trends and practices by leaders of the hotel, restaurant and travel field. 1 class hour. Credit, 1-2.

**211 (I), (II). FOOD SERVICE MANAGEMENT**

Practices used by the food service industry pertaining to purchasing, receiving, and issuing food, beverages, and other supplies. Principles of food and beverage cost control.

**267. ADVANCED FOOD PRODUCTION MANAGEMENT**

Analysis of factors affecting food production in the food service industry, emphasizing maintenance of food quality and nutritive value. Evaluation of convenience foods, new food ingredients, and commercial equipment. Prerequisite, HRTA 156. Credit, 2.

**269. ADVANCED FOOD PRODUCTION MANAGEMENT LABORATORY**

Laboratory in food production practices including demonstration, application, and advanced concepts, new developments, equipment, usage, and teaching methods. Prerequisite or co-requisite HRTA 267. Credit, 1.

**300 (I), (II). HOTEL AND RESTAURANT MERCHANDISING**

Market environment in which the firm operates; communication principles and their application to sales goals; and effective utilization of techniques and tools of merchandising in hotel, restaurant, and similar enterprises. For seniors: others by permission of instructor.

**301 (II). HOTEL, RESTAURANT AND TRAVEL LAW**

Laws as applied to hotel, food service establishments, and the travel industry; a consideration of bailments, contracts, torts, regulations, insurance, and sanitation.

**310 (I), (II). HOTEL SYSTEMS AND OPERATIONS**

Analysis and evaluation of hotel systems and operations. Emphasis on analytical techniques, systems, computer-assisted operations, and change-induced problems. Oppor-

tunity to participate in operations of Campus Center. Prerequisites, HRTA 102, 200, 211. 2 class hours, laboratories by arrangement.

### 311 (I), (II). FOOD AND BEVERAGE SYSTEMS AND OPERATIONS

Analysis and evaluation of the food and beverage systems and operations. Emphasis on analytical techniques, systems, and operational decision-making within the food and beverage complex. Opportunity to participate in the food and beverage operations of the Campus Center. Prerequisites, HRTA 102, 200, 211. 2 class hours, laboratories by arrangement.

### 321. ADVANCED PERSONNEL MANAGEMENT IN HOTELS AND RESTAURANTS

Reports and discussions of current practices in personnel management in the Hospitality Industry.

### 350 (I), (II). QUANTITY FOOD MANAGEMENT

Management of food production in institutions, quality control, recipe standardization, portion and cost control, menu planning, and simplification. Prerequisite, HRTA 156. 2 class hours, 1 4-hour laboratory. Credit, 4.

### 351 (I). INSTITUTIONAL ADMINISTRATION

Principles of organization, management, sanitation, food service planning, and equipment selection. Three field trips. Prerequisite, HRTA 130 or 156. 2 class hours, 1 4-hour laboratory. Credit, 4.

372 (II). QUANTITY FOOD PURCHASING  
Food distribution and merchandising processes as they relate to the purchasing of food for food service. Prerequisites, ACCTG 110, ECON 104.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 392. SEMINAR IN TRAVEL AND TOURISM

Consideration of the interaction between the broad area of the travel industry and its relationship to hotels, restaurants, and similar firms, with special attention to management decisions made in this broader context. 2 class hours. Credit, 2-3.

### 393. SEMINAR ON LABOR RELATIONS PROBLEMS

Considerations of the labor relations problems peculiar to the hotel, restaurant, travel and institutional management area, with special attention to negotiation, grievances, and collective bargaining. 2 class hours. Credit, 2-3.

### 394. SEMINAR IN FOOD I

Reports and discussions of current research studies in food. Permission of instructor required. 1 to 3 class hours. Credit, 1-3.

### 395. SEMINAR IN INSTITUTION ADMINISTRATION II

Reports and discussions of current research studies in Institution Administration. Permission of instructor is required. 1 to 3 class hours. Credit, 1-3.

### 396. SEMINAR IN FOOD SERVICE SYSTEMS

Selected case studies in the food service industry to enable students to develop analytical and decision-making abilities in solving management and operational problems. 2 class hours. Credit, 2-3.

### 397. SEMINAR

Relationships between hospitality industry problems, trends and developments, and emerging problems and changes of society. 2 class hours. Credit, 2.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Landscape Architecture and Regional Planning

Head of Department: Professor Ross S. Whaley

Professors Bacon, Costley, Davis, King, Mosher, Procopio, Scheffey, Zube; Associate Professors Dines, Fabos, Greenbie, Hamilton, Kent, Martin; Assistant Professors Bumgardner, Cramer, Gluck, Olson, Platt, Sears; Lecturers Braun and Schwarz.

The department offers two undergraduate programs: Environmental Design and Park Administration. In addition, an Option in Design Studio is available under the Environmental Design program. For information on Park Administration see the description under that name.

### ENVIRONMENTAL DESIGN

The following courses are required in sequence: junior year: Fall semester, ENVDES 190, 243, and 305; Spring semester, ENVDES 244 and 274; senior year: Fall semester, ENVDES 347, ENGL 337; Spring semester, ENVDES 348 and 390A. In addition, the student is expected to select 7 electives through which he/she will build a strong base in the natural sciences and/or the social sciences.

The department provides a list of acceptable courses from which these selections can be made, with the help of an advisor.

### OPTION IN DESIGN STUDIO

During the Fall semester of the junior year the student is required to take ENVDES 190, 235, 243 and 315. Required courses during the Spring semester are: ENVDES 236, 244, 274 and 316. Enrollment in the senior year studio courses is limited, as noted earlier in this directory (see Environmental Design). The studio courses are ENVDES 327, 328 and 353, 356. In addition, ENVDES 347 and 348 are required.

### 140 (I). VISUAL AWARENESS OF THE PHYSICAL ENVIRONMENT (D)

A survey course to improve the ability to perceive, understand and discuss the physical/visual environment, its use and problems. The breadth of environmental complexity; different environments, their component parts, processes and problems. Emphasizes an expanded consciousness of environment: a developed, directed and focused concern. Outlines or delimits courses of citizen action. Non-majors only.

### 212 (II). PRINCIPLES OF GRAPHIC COMMUNICATION

The theories of projection as related to graphic communication. Primarily for non-majors. 1 class hour, 6 studio hours. Credit, 4.

### 235 (I), 236 (II). PLANT MATERIALS

Introduction to trees, shrubs and other plant material useful in landscape plantings. Prerequisite, BOTANY 100, 101 or 121. 1 class hour, 2 2-hour laboratory periods. Credit, 3 per semester.

### 243 (I). HISTORY AND THEORY

A broad survey of the history of the designed human environment, from the origins of human society into the Renaissance.

### 244 (II). HISTORY AND THEORY

A broad survey of the history of the designed human environment; the Renaissance to the present. May be elected independently. 2 class hours, 1 discussion period.

### 273 (I). CITY PLANNING HISTORY

The historical aspects of changing land uses, the evolution of community form and the development of urban areas.

### 274 (II). CITY PLANNING

Planning techniques and legal tools for guidance and control of contemporary urban and metropolitan development. Problems of land use, housing, transportation, and related urban elements. May be elected independently.

**305 (I). THE DYNAMICS OF HUMAN HABITATIONS**

The complex interactions between man and his physical environment. Uses information and viewpoints from psychology, sociology, biology, ecology, ethology, art, architecture and planning to locate and demonstrate fundamental organizing principles in the human perception and use of space, and its effect on interpersonal relations. 2 2-hour lecture/seminar periods.

**315 (I); 316 (II). GRAPHIC COMMUNICATIONS I & II**

Theories of projection as applied to graphic communications; current techniques in the graphic communication of the analyses and solutions of various environmental design problems and the development of facility in various media. ENVDES 212 or 315 is prerequisite for ENVDES 316. 1 class hour, 6 studio hours. Credit, 4 per semester.

**327 (I), 328 (II). BASIC APPLIED DESIGN**

The development of an approach embodying the application of theory and design principles to the solution of environmental design problems. Open only to students in the Design Studio Option. 9 studio hours. Credit, 4 per semester.

**347 (I). THEORY**

Natural factors which influence environmental planning and site development. The influences of climate, land form, soil, water and vegetation. 2 class hours, 1 discussion period.

**348 (II). THEORY**

Theories and techniques relevant to the analysis of design problems. Functional requirements. Human needs and responses to the design environment. 2 class hours, 1 discussion period.

**353 (I). LAND FORM**

The manipulation of land surfaces; graphic representation through topographical plans, cross sections, profiles and models. Open only to students in the Design Studio Option. 6 studio hours.

**356 (II). CONSTRUCTION MATERIALS**

The materials used in landscape construction, their design potential and limitations. Open only to students in the Design Studio Option. 6 studio hours.

**377 (I), 378 (II). URBAN PROBLEMS**

Nature of the planning function in government; and investigation of planning problems in housing, industrial location and development, decentralization of cities, urban transportation, urban design and regional planning. Prerequisite, ENVDES 274. Credit, 3 per semester.

**385 (I), 386 (II). SPECIAL PROBLEMS**

Supervised individual work on assigned projects for qualified seniors. With permission of advisor and contract with instructor. Credit, 1-6.

398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Related Courses**

224 (I), 226 (II). Architectural Design I & II

**PARK ADMINISTRATION**

The following courses should be taken during the freshman and sophomore years: BOTANY 100 or 121, PSYCH 101, SOCIOL 101 and STAT 231. These courses satisfy portions of the University Core Requirements.

Juniors are required to take the following courses during the Fall semester: ENVDES 190, ENGL 337 and PK ADM 241; and, during the Spring semester: ENVDES 235, 274, MGT 201. Seniors take during the Fall semester: ENVDES 347, PK ADM 367, and during the Spring semester: PK ADM 264 and 368. In addition, a one-credit seminar is required each semester of the junior and senior years.

**231 (I). PRINCIPLES OF ARBORICULTURE**

Maintenance of shade and ornamental trees. Development of municipal and private shade tree programs. 1 class hour, 2 2-hour laboratory periods.

**241 (I). HISTORY AND PHILOSOPHY OF PARKS**

The historical, social, economic, and political backgrounds, and present policies under which parks and other outdoor recreation resources have been and are being administered.

**263 (I). ADMINISTRATION OF PARKS AND OTHER OUTDOOR RECREATION RESOURCES**

The theory, policies, and procedures followed at the several governmental levels in the selection, development and administration of parks and other outdoor recreation resources.

**264 (II). PARK MAINTENANCE AND MANAGEMENT**

Survey of maintenance systems management. The role of maintenance programs, their organization and functions. Planning and organizing the maintenance program, development and application of maintenance standards, property and facility maintenance, job planning and scheduling, maintenance inspections, contract maintenance, computer applications to maintenance and records

keeping and scheduling. On-site observation of maintenance programs. Field trip required.

**283 (I), 284 (II). JUNIOR SEMINAR**

Classroom and field examination of new and proposed legislation, areas of current public concern and controversy, innovations in public practice, and opportunities in extended education and professional practice. Graded pass/fail. 1 2-hour discussion period. Credit, 1 per semester.

**367 (I). PARK FISCAL AND PERSONNEL MANAGEMENT**

Evaluation of the methods utilized in the preparation, presentation and justification of the financial and personnel requirements of municipal, county, state and national parks.

**368 (II). PARK, RECREATION AND OPEN SPACE PLANNING**

The purposes, techniques and processes of preparing and implementing park, recreation and open space master plans. Primarily for park administration majors; others admitted as space permits. 3 2-hour laboratory periods.

**385 (I), 386 (II). SPECIAL PROBLEMS**

Supervised individual work on assigned projects for qualified seniors. With permission of adviser and contract with instructor. Credit, 1-6.

**387 (I), 388 (II). SENIOR SEMINAR**

Classroom and field examination of new and proposed legislation, areas of current public concern and controversy, innovations in public practice, and opportunities in extended education and professional practice. Graded pass/fail. 1 2-hour discussion period. Credit, 1 per semester.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Plant Pathology**

Head of Department. Professor Richard A. Rohde. Professors Gilgut, Holmes; Associate Professors Agrios, Mount; Assistant Professor Tattar.

**100 (II). PLANT DISEASES AND THEIR CONTROL**

Occurrence, importance, identification and control of diseases of plants used for food, clothing, shelter and beauty. Infectious and environmental factors that cause diseases of plants in the home and garden.

**251 (I). GENERAL PLANT PATHOLOGY**

The causes, nature and control of plant diseases. Diagnosis of plant diseases. Mechanisms, biochemistry and genetics of plant disease induction, development and control. Prerequisite, a course in botany. 2 class hours, 1 3-hour laboratory period.

**269 (II). FOREST AND SHADE TREE PATHOLOGY**

The causes, nature and control of tree diseases. Physiology and genetics of host-parasite-environment interaction in trees. Forest and shade tree disease management and principles of decay prevention in forest products. 2 class hours, 1 3-hour laboratory period.

**340 (I). GENETICS OF PLANT-PATHOGEN INTERACTION**

Genetic factors which control plant disease reaction and virulence. Includes genetic stability of pathogens, mutations and parasexuality in pathogenic variation, and gene for gene hypothesis in relation to disease development. Prerequisite, PLPATH 251 or permission of instructor.

**361 (I). PLANT VIROLOGY**

Plant virus structure, infection, synthesis, assay and purification. Symptomatology and physiology of virus infected plants. Transmission, identification and control of plant viruses. Virus diseases of major plant groups. Prerequisite, PLPATH 251 or permission of instructor. Three class hours, 1 3-hour laboratory period. Credit, 4.

**378 (I). NEMATOLOGY**

Anatomy, morphology, and classification of plant-parasitic and other soil-inhabiting nematodes, parasitic relationships with plants and principles of control. Prerequisite, a year of biological science. 3 class hours, 1 3-hour laboratory period. Credit, 4.

**385, 386. SPECIAL PROBLEMS**

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

**398. SENIOR HONORS**

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

**399. SENIOR HONORS**

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

**Plant and Soil Sciences**

Head of Department: Professor F.W. Southwick. Professors Boicourt, Drake, Gunner, Havis, Lachman, Lord, Maynard, Thomson, Troll, Vengris, Weeks, Zak; Associate Professors Baker, Barker, Bramlage, Craker, God-

dard, Greene, Jennings, Marsh, Rosenau, Stewart; Assistant Professors Anderson, Carrow, Emino, Kirkham, Victor.

**100 (II). BASIC PLANT SCIENCE (E)**

An introduction to the study of crop plants: the soil, mineral nutrition, physiological principles and environmental factors related to the growth and development of economic crops. 2 class hours, 1 2-hour laboratory period.

**105 (II). SOILS**

Fundamentals of soil science covering development, properties and management of soils and the interrelationship of soils to plant growth. 2 class hours, 1 2-hour laboratory period.

**110 (I). PLANT PROPAGATION**

The science of plant reproduction. 2 class hours, 1 2-hour laboratory period.

**115 (I). THE PLANT ENVIRONMENT AND CROP PRODUCTION (E)**

Important environmental factors affecting plant growth and development, the interrelationships which exist between these factors and plants, and the effects resulting from environmental modification attributable to human activities.

**120 (II). ORGANIC FARMING AND GARDENING (E)**

Basic principles of plant nutrition and culture, soil fertility and management by organic methods, biological and natural control of insect pests, weeds and plant diseases, variety selection, and alternative chemical methods. 2 class hours, 1 2-hour laboratory and discussion period.

**125 (II). FLORICULTURE**

An introduction to plants for the esthetic enrichment of the home environment. Propagation, use, culture, and identification of plants are stressed. For non-majors. 2 class hours, 1 2-hour laboratory period.

**200 (I). DECIDUOUS ORCHARD SCIENCE**  
The physiological and nutritional principles upon which deciduous tree fruit production is based. Responses of the plants to environmental influences and cultural practices. 2 class hours, 1 2-hour laboratory period.

**205 (I). SMALL FRUIT TECHNOLOGY**  
Basic principles underlying the production of small fruits. 2 class hours, 1 2-hour laboratory period.

**210 (II). RETAIL FLORAL DESIGN**  
Basic principles of design as applied to commercial floral arrangements. Non-majors excluded without special permission. 2 3-hour laboratory periods.

**215 (I). GREENHOUSE CROP MANAGEMENT**

Fundamentals of the artificial environment of greenhouses as they influence the vegetative and reproductive growth of plants. 2 class hours, 1 2-hour laboratory period.

**225 (I). PRINCIPLES OF VEGETABLE CROPS**

Principles and practices of commercial vegetable crop production. 2 class hours, 1 2-hour laboratory period.

**250 (II). FORAGE & FIELD CROPS**

Morphological characteristics, physiological responses, cultural requirements, harvest management, and storage requirements of forage and field crops. 2 class hours, 1 2-hour laboratory period.

**255 (I). AGROSTOLOGY**

The establishment and maintenance of turf grasses used on lawns, athletic fields, highways, airports, cemeteries and turf nurseries. 2 class hours, 1 2-hour laboratory period.

**315 (I). MICROBIOLOGY OF THE SOIL**

Soil microorganisms; their distribution, ecology and transformation of organic and inorganic substrates. Microbiology of the rhizosphere and the biological equilibrium. Prerequisite, MICBIO 250 or permission of instructor. 2 class hours, 1 3-hour laboratory period.

**330 (I). PLANT NUTRITION**

The accumulation and transport of inorganic ions in plants and their function in plant metabolism. 2 class hours, 1 2-hour laboratory period.

**335 (I). TAXONOMY OF ECONOMIC PLANTS**

Plant families, genera, species and cultivars of importance in the horticultural and agronomic fields. 2 class hours, 1 2-hour laboratory period.

**340 (II). PLANT BREEDING**

Improvement of horticultural crops using established genetic principles and methods. Prerequisite, ZOOL 240 or equivalent. 2 class hours, 1 2-hour laboratory period.

**345 (II). POST-HARVEST PHYSIOLOGY**

The physical and chemical processes of plants before and after harvest and the influence of environmental, chemical, and storage factors on these processes. 2 2-hour classes.

**360 (I). ECOLOGY AND CONTROL OF WEEDS**

Identification and ecology of common weeds and principles of weed control with emphasis on the use of chemical herbicides. 2 class hours, 1 2-hour laboratory period.

**365 (I). SOIL FORMATION AND CLASSIFICATION**  
 The development and classification of soils as related to physical, chemical, biological, climatic and geological factors. 3 class hours, 1 2-hour laboratory period. *Credit, 4.*

**370 (II). SOIL PHYSICS**  
 Physical properties of soils including water retention and movement, soil temperature, microclimatology, texture and structure; their measurements, evaluation and influence in environmental systems. Prerequisite, PLSOIL 105, PHYSIC 121-122, or permission of instructor. 2 class hours, 1-3 hour laboratory period.

**375 (I). SOIL CHEMISTRY**  
 Soil chemical properties as related to chemical reactions of plant nutrients in soils. Prerequisites, CHEM 112 and PLSOIL 105 or equivalent. 2 class hours, 1-2 hour laboratory period.

**380 (II). SOIL FERTILITY**  
 Mineral nutrition in the growth of plants; the use and interactions of fertilizers and other soil amendments; soil reaction; mineral deficiencies and toxicities in plants. 2 class hours, 1-2 hour laboratory period.

**385, 386. SPECIAL PROBLEMS**  
 Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

**391 (I), (II). SEMINAR**  
 Career planning for Plant & Soil Science majors, and the presentation of pertinent topics related to students' major interests.

**398. SENIOR HONORS**  
 Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4.*

**399. SENIOR HONORS**  
 Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

**Veterinary and Animal Sciences**

*Head of Department:* Professor T. W. Fox.  
*Professors:* Anderson, D. Black, W. Black, Damon, Grover, Smith, Smyth; *Associate Professors:* Borton, Howe, Lyford; *Assistant Professors:* Duby, Marcum.

The Department of Veterinary and Animal Sciences offers a program of study in the animal sciences. The curriculum provides for an important degree of flexibility depending upon the student's interest and ability.

In addition to the University core the requirements for majors are:

*Basic Science Core*  
 Botany 100 or Zool 101

*Chemistry-* 1 course  
*Biochemistry-* 1 course  
*Microbiology-* 1 course  
*Mathematics/Statistics-* 2 courses

*Animal Sciences Core*  
*Genetics-* 2 courses  
*Nutrition-* 2 courses, including ANSCI 330  
*Physiology-* 2 courses, including ANSCI 220  
*Management-* 1 course  
*Pathology-* 1 course

*Animal Science/Animal Industry Option*  
 An additional 4 courses in three "areas" are required to prepare students in their selected option.

Pre-veterinary students in the College of Food and Natural Resources major in animal science as freshmen. Students completing two semesters of academic work with a satisfactory cumulative average (2.5) may apply to the pre-medical advisory committee in their third semester for entrance into the pre-veterinary curriculum. Such students are counseled in the Department of Veterinary and Animal Sciences.

**121 (I), (II). INTRODUCTORY ANIMAL SCIENCE**  
 Modern animal and poultry science and the many scientific disciplines it encompasses. The poultry, dairy, meat, recreational and laboratory animal industries in terms of national and world economics and their role in serving mankind. 2 class hours, 1 2-hour laboratory.

| EQUITATION SKILLS                        | Credit |
|------------------------------------------|--------|
| 150 (I), (II) Riding, Beginner I         | 1      |
| 151 (I), (II) Riding, Beginner II        | 1      |
| 152 (I), (II) Riding, Intermediate I     | 1      |
| 153 (I), (II) Riding, Intermediate II    | 1      |
| 154 (I), (II) Riding, Advanced           | 1      |
| 155 (I), (II) Special Problems in Riding | 1      |
| 156 (I) Special Problems in Training     |        |
| 157 (II) Special Problems in Teaching    |        |

**220 (II). SYSTEMATIC ANIMAL PHYSIOLOGY**  
 Comparative study of the organ physiology of mammals and birds. Emphasis on those aspects most pertinent to animal science. 3 class hours, 1 3-hour laboratory. *Credit, 4.*

**221 (I). PHYSIOLOGY OF HOMEOSTASIS**  
 Homeostatic circuits available to the living body; such as fluid, gaseous, neural, muscular and specialized integrated mechanisms. 2 class hours, 1 2-hour laboratory.

**255 (II). FOOD FROM ANIMALS**  
 Animals as a food source. Topics include methods of estimating yield and quality; effects of genetics, nutrition, physiology and management on product quality, yield, and

efficiency of production. 2 class hours, 1 2-hour lecture-demonstration period.

**256 (II). LIVESTOCK MANAGEMENT**  
 Beef, sheep and swine production in New England and the United States. Field trips cost \$5-\$10. 3 class hours, 1 2-hour laboratory. *Credit, 4.*

**307 (I), (II). PRINCIPLES OF ANIMAL GENETICS**  
 The identification, transmission, expression and arrangement of the hereditary material. Emphasis on genetic principles affecting qualitatively inherited traits of animals. Prerequisite, permission of instructor. 2 class hours, 1 2-hour lecture-demonstration period.

**308 (I), (II). APPLIED ANIMAL GENETICS**  
 The mechanisms of heredity and variation in livestock and poultry; the role of selection and breeding systems in genetic improvement and their evaluation. Prerequisite, ANSCI 307.

**321 (I). PHYSIOLOGY OF REPRODUCTION**  
 Comparative aspects of anatomy, embryology, endocrinology and physiology of reproduction and lactation. Three class hours.

**322 (I). REPRODUCTION LABORATORY**  
 A laboratory course in techniques used to regulate reproductive performance of the farm species. *Credit, 1.*

**323 (II). PHYSIOLOGY OF REPRODUCTION LABORATORY**  
 Laboratory exercises illustrating basic mechanisms involved in reproductive processes. Individual student participation stressed. *Credit, 1.*

**330 (I). PRINCIPLES OF ANIMAL NUTRITION**  
 Scientific principles of nutrition in both ruminants and nonruminants.

**334 (II). APPLIED ANIMAL NUTRITION**  
 Application of scientific principles of nutrition to practical feed formulation and feeding systems for poultry and livestock. Prerequisite, ANSCI 330. 1 class hour, 2 2-hour laboratory periods.

**353 (I). POULTRY MANAGEMENT**  
 Principles of poultry business management. A comprehensive view of all phases of the poultry industry. Field trips cost \$10-\$15. 2 class hours, 1 2-hour laboratory.

**354 (II). DAIRY HERD MANAGEMENT**  
 Dairy cattle and milk production in New England and the United States. Managerial problems concerned with successful dairying. Field trips cost \$10-\$15. 2 class hours, 2 2-hour laboratory periods. *Credit, 4.*

## School of Health Sciences

### 358 (I). HORSE MANAGEMENT

An introduction to the breeds, feeding, training, care and management of the horse. Lab fee \$5-\$10 covers field trips. Open to all. 1 class hour, 1 2-hour laboratory. Credit, 2.

### 359 (II). ADVANCED HORSE MANAGEMENT

An advanced course in the nutrition, physiology, genetics, reproduction and health of the horse. Limited to Animal Science majors or by permission. Lab fee \$5-\$10. Two class hours, 1 2-hour laboratory. Credit, 4.

### 361 (I). INTERMEDIATE BIOMETRY

Design of experiments conducted in the biological sciences; methods of analysis of such designs, expectations of mean squares, selection of appropriate error terms, individual and multiple comparison, and trend analyses. Prerequisite, introductory course in biometrics or statistics, such as STAT 121.

### 362 (II). ADVANCED BIOMETRY

Analysis of data with disproportionate subclass numbers includes the method of fitting constants, the method of weighted squares of means, absorption of equations, expectations of mean squares, and tests of hypotheses. Prerequisite, ANSCI 361.

### 370 (II). ANIMAL PATHOLOGY

An introduction to the study of animal diseases. The causes, development, transmission and control, with application to diseases of animals which are of economic and/or public health importance. Prerequisites, MICBIO 140 or ZOOL 135 or ANSCI 220.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 391 (I). JUNIOR SEMINAR

Review of current literature in Animal Science. Credit, 1.

### 392 (II). SENIOR SEMINAR

Review of current literature in Animal Science. Credit, 1.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and Honors Office. Credit, 1-5.

William A. Darity, *Dean*

## Communication Disorders

Chairman of Department: E. Harris Nober. Professors Melrose, Tolhurst; Associate Professors Boothroyd, Gengel, Nerbonne; Assistant Professors Duffy, Peirce, C. Seymour, H. Seymour.

The undergraduate Communication Disorders curriculum has a pre-professional orientation. Freshman and sophomore years are devoted primarily to the completion of the general University requirements. Junior and senior students receive training in the normal communicative processes, the disorders of speech and hearing, and the management of various problems. The program provides background for the student to attend advanced graduate training toward academic and clinical competence.

A minimum of 30 major credits is required of all students for the Bachelor's degree.

### 181. PHONETICS

The physiological and acoustic processes involved in producing sounds and the use of the International Phonetic Alphabet in describing these processes.

### 182. INTRODUCTION TO COMMUNICATION DISORDERS

The types and causes of communication disorders with emphasis on speech disorders.

### 281. CLINICAL PROCEDURES

Introduction to the clinical process as employed in a Communication Disorders Clinic including personnel responsibilities, professional ethics, techniques of differential diagnosis, clinic forms and referral procedures. Familiarization with clinical equipment and A/V presentations of selected diagnostic and therapy sessions. 2 class hours, 1 - hour laboratory period. Prerequisites: COMDIS 181, 182.

### 283. ARTICULATION DISORDERS

Basic principles and methods involved in the rehabilitation of articulation disorders. Emphasis on types of disorders, diagnosis, and evaluation of disorders, and therapeutic procedures. Laboratory observation. Prerequisites, COMDIS 181, 182 and 284. 3 class hours, 1 1-hour laboratory.

### 284. ANATOMY AND PHYSIOLOGY OF THE SPEECH AND HEARING MECHANISM

The anatomy and physiology of the speech and hearing mechanism; consideration of respiration, phonation, resonance, articulation, and audition.

### 285. BASIC CLINICAL AUDIOLOGY

The acoustics and physiology of hearing. The etiology and symptomatology of hearing loss. Selected diagnostic procedures. Supervised practice in audiometric testing. Prerequisites, COMDIS 182, 287.

### 286. REHABILITATION OF THE ACOUSTICALLY HANDICAPPED

Techniques of speech therapy, auditory-training, and speech reading for hard of hearing children and adults; multi-sensory approach to language development. Laboratory practice under supervision. Prerequisite, COMDIS 285. 2 class hours, 1 3-hour laboratory period.

### 287. FUNDAMENTALS OF HEARING AND SPEECH SCIENCE

Investigation of physiological, acoustic and psychological correlates of speech production, transmission and reception. Exercises in the application of laboratory methods. Prerequisites, COMDIS 181 and 284, and PHYSIC 114. 2 class hours, 1 2-hour laboratory.

### 288. CLINICAL PRACTICE

Supervised experience in therapy with individuals having articulatory type disorders. May be repeated once. Prerequisite, COMDIS 281. Limited to seniors.

Credit, 1-3 per semester.

### 289. COMMUNICATION PROBLEMS OF THE DEAF AND HARD OF HEARING

Physical, psychological, social, and education problems and needs of the hearing handicapped. Prerequisite, COMDIS 285.

### 291. PEDIATRIC AUDIOLOGY

Assessment and clinical management of infants and children with auditory disorders. Problems of differential diagnosis, screening techniques, conditioning procedures, and electrophysiologic methods. Parental guidance and employment of amplification with children. Prerequisite, COMDIS 285.

### 292. LEARNING AND LANGUAGE DISABILITIES IN CHILDREN

Learning disabilities associated with physical, psychological and social etiologies. Problems of language development and cognitive disorders, remedial practices in reading and writing problems, and learning patterns of the culturally disadvantaged. Diagnostic assessment and educational processes are outlined.

### 295. STUTTERING

Major theories of the etiology, diagnosis, and clinical management of stuttering. Limited to seniors.

### 392. SEMINAR IN COMMUNICATION DISORDERS

Special problems; include a choice of a) communication disorders and the teacher, b) communication disorders in geriatrics, c) communication disorders and medicine, d) the non-verbal child, e) electrophysiologic audiometry, f) speech audiometry, and g) communication disorders and mental retardation. Prerequisite, permission of instructor. May be repeated.

385,386. SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

398. SENIOR HONORS  
Senior research, (thesis option). By arrangement with Department and/or Honors Office. Credit, 4.

399. SENIOR HONORS  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

### Division of Nursing

Director: Professor Ira Trail. Professors Earles, Gallagher, Good, Marram, Winder; Associate Professors Ancrum, Clark, Condrón, Friedman, Haase, Lindsay, Petrunenko, Sharp, Smith, Walker; Assistant Professors Flynn, Grancio, Hall, Hine, Johnson, LaMonica, McNally, Sahin, Sheridan, Whitbeck; Instructors Cole, Dreher, Karshmer, Rueckel; Lecturer Tripp.

### UNDERGRADUATE PROGRAM IN NURSING

The Division of Nursing offers an undergraduate program which leads to the degree of Bachelor of Science in Nursing (B. S. N.). This program is approved by the Board of Registration in Nursing, Commonwealth of Massachusetts, and is accredited by the National League for Nursing. Enrollment is limited to 200 students per class. There will be no admissions to this program for the 1977-78 academic year.

There are two components of the program: 1) lower division core and university core requirements; and 2) the upper division nursing science major. Pre-nursing courses may be completed at the University of Massachusetts or in other colleges/universities.

Nursing science courses (Junior and Senior Year) emphasize the role and functions of the professional nurse in assisting individuals and families to identify and/or to cope with their physical, psychosocial, and environmental problems; in promoting and maintaining individual and family health; in providing primary and secondary health care to individuals and families augmented by the use of extended nursing functions and in providing continuity of care for patients and families.

Clinical learning experiences are community based in four Satellite Learning Centers. These Centers are located in the following geographic areas:

- Amherst-Northampton
- Franklin County
- Springfield-North
- Model Cities-Springfield

### REQUIREMENTS FOR ADMISSION AND APPLICATION PROCEDURE

The requirements for admission to the upper division are: 1) successful completion of 60 semester hours of pre-professional prepara-

tion; 2) a minimum cumulative grade point average of 2.5; 3) achievement of a grade of at least "C" in each pre-requisite course; and 4) a minimum grade point average of 2.5 for all pre-requisite courses.

Students with a variety of academic and nursing backgrounds may apply for admission. Students may have earned credits in other colleges/universities in the Arts and Sciences or they may satisfy these requirements by satisfactorily completing CLEP (College Level Entrance Proficiency) Examinations in certain Arts and Science subjects, such as Chemistry, Microbiology, etc. (The University requires forty-five (45) semester hour credits to be taken in residence).

The National League for Nursing Comprehensive Examinations will be used for guidance and placement in the program. Students in the major will be expected to take all senior level nursing science courses.

All students seeking admission and information concerning examination details and requirements should contact the Admissions Office or the Division of Nursing, who are available for individual counselling. All nursing students will be assigned a faculty advisor in the Division of Nursing.

The Division of Nursing is committed to Affirmative Action guidelines of the University of Massachusetts. Students lacking the required cumulative grade point average may apply for tutorial assistance.

### GENERAL ACADEMIC AND PRE-PROFESSIONAL REQUIREMENTS FOR THE BACCALAUREATE PROGRAM IN NURSING

#### 1. General Academic Requirements:

Courses which satisfy University Core Requirements are:

- Rhetoric — 2 courses
- Social and Behavioral Sciences — 3 Courses
- Natural Sciences — 3 courses
- Humanities — 3 courses

In counselling sessions with an academic advisor, guidance will be offered in course selection.

#### 2. Pre-professional Prerequisites:

Prerequisites to the nursing major are as follows:

- Human Anatomy and Physiology 2 courses 6-8 credits
- Chemistry\* 1-2 courses 4-6 credits
- Zoology\* 1 course 3 credits
- Human Growth and Development over the Life Cycle 1-2 courses 3-6 credits
- Logic 1 course 3 credits
- Statistics (Applied) 1 course 3 credits

\*= prerequisites to Human Anatomy and Physiology.

### FRESHMAN YEAR

| 1st Semester                       | Credits |
|------------------------------------|---------|
| CHEM 111, General (E)              | 4       |
| Humanities (C)                     | 3       |
| Rhetoric (B)                       | 3       |
| *ANTH 104, Intro. To Cult. Anth.   | 3       |
| *PHYSIC 190                        | 3       |
|                                    | 16      |
| 2nd Semester                       |         |
| CHEM 160, Organic (E)              | 3       |
| CHEM 162, Organic Lab              | 1       |
| Rhetoric (B)                       | 3       |
| *MICBIO 140, Bio. of Microorganism | 3       |
| NURSE 100, Perspectives in Nursing | 2       |
| Elective                           | 3       |
|                                    | 15      |

### SOPHOMORE YEAR

| 1st Semester                   | Credits |
|--------------------------------|---------|
| *ZOOL 137, Anatomy             | 4       |
| *SOCIO 258 or PSYCH 280A       | 3       |
| *BIOCHM 220, Elementary (E)    | 4       |
| *PHIL 125, Logic               | 3       |
|                                | 14      |

|                                  | 15      |

\*Nursing Core Requirements

#### 100. PERSPECTIVES IN NURSING

An overview of health and health care services, relating historical events and social movements to developments in nursing and the health professions. Emerging roles of the professional nurse in health care are explored. Interrelationships of nurses and other members of the health team are considered. Permission of instructor required for non-majors. 2 1-hour lectures. Credit, 2.

#### 120. PRINCIPLES AND SKILLS BASIC TO PROFESSIONAL NURSING AND THE HEALTH CARE OF PEOPLE

A self-paced course. Acquisition of skills basic to the provision of nursing care, based on an understanding of scientific principles, in a multi-media laboratory setting with faculty supervision. All lower division prerequisites to the nursing major must be fulfilled previously or concurrently. 6-hour laboratory. Credit, 6.

#### 200. PATHOPHYSIOLOGY

Concepts of pathophysiology based upon student's prior knowledge of physiology. Emphasis on formation of concepts of pathology rather than upon the particulars of system dysfunction or individual disease entities. Ways in which various pathological processes affect the human organism at cellular, tissue, organ, organ system and whole body levels. Prerequisite: Upper division standing; permission of instructor for non-majors

#### 210. COMMUNITY HEALTH FOCUS ON NURSING

The health status of a community viewed through systematic collection and analysis of data; a report of the findings. Theories of health, community, systems, communication, the nurse's role in health care. Prerequisite: Upper division standing; permission of instructor for non-majors. 2 1-hour lectures, 1 3-hour practicum.

#### 220. FAMILY HEALTH FOCUS OF NURSING

A practicum. The role of the nurse in caring for individuals and families in health maintenance and promotion. Clinical experiences in a variety of community health and related facilities. Students use a problem-solving approach in providing nursing care for people of a variety of ages experiencing developmental crises and minor health problems. Prerequisites: Upper division standing and NURSE 210 (prerequisite or concurrent). 2 1-hour lectures, 6 hours clinical laboratory. Credit, 4.

#### 230. NURSING IN THE PREVENTION AND TREATMENT OF ILLNESS

Lecture/discussion. The nurse's role in diagnosing and meeting needs for nursing care in illness and its prevention. Concepts and theories related to the nurse's relationship with other health care members. Students analyze

an individual agency's contribution to prevention and treatment of illness and the agency's effects on individuals and families using it. Prerequisite: NURSE 210 and 220; prerequisite or concurrent: NURSE 200, PSYCH 325. 3 1-hour lectures.

#### 231. NURSING PRACTICUM I

Students begin to assume the role of the nurse in caring for individuals and families when prevention and treatment of illness is the goal of health care. Clinical learning experiences in a variety of community settings. Students use a problem-solving approach in providing nursing care for people in the prevention and treatment of the major health problems across the life span. Prerequisites or concurrent: NURSE 230, 200, PSYCH 325. 12 hours clinical laboratory. Credit, 4.

#### 240. HUMAN DEVELOPMENT THROUGHOUT THE LIFE CYCLE

A firm foundation in human development throughout the life cycle. Emphasis on biological, psychological and sociological aspects. Three 1-hour lectures.

#### 250. NURSING PROCESS

An orientation to the Nursing Process in clinical decision-making for the Registered Nurse. The Nursing Process as a foundation for professional practice, in terms of its historical origins, present implications and future potential. Prerequisites: Upper division standing, Registered Nurses. 2 1-hour lectures, 12 hours clinical laboratory. Credit, 6.

#### 310. CURRENTS IN NURSING

Selected historical and contemporary currents in nursing and outside of nursing. Attempts to project future currents and implications. Prerequisite: Senior year standing. 3 1-hour lectures.

#### 320. NURSING IN REHABILITATION

The role of the nurse in diagnosing and meeting needs for nursing care in assisting individuals and families toward rehabilitation. Community resources and services related to rehabilitation in the major health problems. The role of the nurse in assisting individuals and families to gain access to needed health and health-related services. Concepts and theories related to collaboration with other health care workers. Prerequisite: NURSE 230. 3 1-hour lectures.

#### 321. NURSING PRACTICUM II

Students assume the role of the nurse in caring for individuals and families when rehabilitation is the goal of health care. Clinical learning experiences in a variety of community settings. Students use a problem-solving approach in assisting people to cope with stresses brought about by long-term disability and the significant alterations in life style that accompany it. Prerequisite or concurrent: NURSE 231, 320. 12 hours clinical laboratory. Credit, 4.

#### 330. INTRODUCTION TO RESEARCH IN NURSING

The essentials of research in nursing. A model for identifying research problems in nursing, the interrelationship between theory and method, methodology unique to research in nursing, and appropriate statistical models. Students expected to analyze research articles and to understand the implications of the results for the clinical setting. Prerequisites: Upper division standing; PUB HL 340. 3 1-hour lectures.

#### 340. LEADERSHIP IN NURSING

An analysis and integration of organizational behavior in health settings, leadership styles in nursing roles, and management models in the delivery of nursing care. Prerequisites: Senior standing. 3 1-hour lectures.

#### 350. COMPREHENSIVE NURSING

The concept of comprehensive nursing care; participation in the delivery of such care to groups of people in a variety of community settings. Students evaluate their leadership role in the practice and management of comprehensive nursing care, recognize professional accountability, and draw upon the new knowledge from the field of research. A synthesis of previous learning about nursing and development of a theoretical and philosophical basis for beginning nursing practice. Prerequisite: NURSE 321, may be taken concurrently. 2 1-hour lectures, 12 hours clinical laboratory. Credit, 6.

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Division of Public Health

Director: Professor William A. Darity. Professors Gage, Litsky, Peterson; Associate Professors Butts, Gross, Moustafa, Ortiz, Peters, Reynolds, Stuart, Tuthill, Wisnieski; Assistant Professors Chen, DiNardi, Goggin, Hosmer, Moore, Stamps; Instructor Crowley; Lecturers Reed, Stryker, Zapka.

Instruction in the Division of Public Health provides a comprehensive view of public health and prepares interested students for the many professional opportunities open in this area. Each student is expected to gain a broad background in the natural, biological and social sciences upon which health professional preparations are based.

The Division offers four optional areas at the undergraduate level. These are community health, environmental health, health laboratory science and medical technology. In each option students are prepared for further study at the graduate level.

### COMMUNITY HEALTH

#### FRESHMAN YEAR

| 1st Semester     | Credits |
|------------------|---------|
| *RHET 100 or 110 | 3       |
| **MATH 127       | 3       |
| +CHEM 111        | 3       |
| ZOOL 101         | 3       |
| PSYCH 101 or     |         |
| * SOCIOL 101     | 3       |
| 2nd Semester     |         |
| *RHET 100 or 110 | 3       |
| **MATH 128       | 3       |
| +CHEM 112        | 3       |
| SOCIOL 101 or    |         |
| *PSYCH 101       | 3       |
| ***Elective      | 3       |

\*May be taken either semester.

\*\*On basis of placement tests and interest in advanced science.

\*\*\*Elective chosen from Humanities.

If a language is elected, intermediate proficiency is required.

+With Divisional approval CHEM 101 and 102 may be substituted.

#### SOPHOMORE YEAR

| 1st Semester                        | Credits |
|-------------------------------------|---------|
| *PHYSIC 141                         | 4       |
| **4 Electives                       |         |
| 2nd Semester                        |         |
| ZOOL 230, Systems of the Human Body | 4       |
| *PHYSIC 142                         | 4       |
| MICBIO 140                          | 3       |
| **Electives                         | 3       |

#### JUNIOR YEAR

| 1st Semester                                         | Credits |
|------------------------------------------------------|---------|
| PUB HL 320, Introduction to Health Administration    | 4       |
| PUB HL 301, Principles of Community Health Education | 4       |
| ***STAT 121                                          | 3       |
| Sociology Elective                                   | 3       |

| 2nd Semester                                   |   |
|------------------------------------------------|---|
| PUB HL 304, School Health Education Elective   | 3 |
| PUB HL 330, Principles of Epidemiology         | 3 |
| PUB HL 360, Principles of Environmental Health | 3 |
| 2 Electives                                    | 6 |

#### SENIOR YEAR

| 1st Semester                                                         | Credits |
|----------------------------------------------------------------------|---------|
| +PUB HL 382, Field Training Studies                                  | 3-10    |
| PUB HL 385, Special Problems and/or                                  | 3       |
| **Electives                                                          | 3-7     |
| 2nd Semester                                                         |         |
| ++PUB HL 302, Community Development and Health Education or Elective | 3       |
| PUB HL 386, Special Problems                                         | 3       |
| ***3 Electives                                                       |         |

\*Students with Divisional approval may take PHYSIC 121 and PHYSIC 122.

\*\*Elective chosen from Humanities, or Social and Behavioral Sciences or PUB HL 301 or C E 374 or RHET 140, 145, 160, 165, or 170. (3 credits)

\*\*\*Students who take STAT 231 and 232 instead of MATH 127 and 128 will not be required to take this course.

+This is an option based on student's future plans.

++This is an option based on student's interest.

This program is designed to provide three sub-options to prepare students for first level career opportunities as community health educators, health teachers, or health program generalist, or for further study in community health and health education. Students who elect to become *community health educators* will be required to carry out two semesters of special problems (PUB HL 385-386) to take Community Development (PUB HL 302) and to have one semester in full time field training (PUB HL 382). Students who elect to become *health teachers* will be required to take the minimum education courses and carry out practice teaching for certification. Students who elect the *health program generalist* sub-option will be required to meet Divisional and University degree requirements. The curriculum permits a wide range of general courses with concentration and major courses during the Junior year (3rd year) and Senior year (4th year).

### ENVIRONMENTAL HEALTH

#### FRESHMAN YEAR

| 1st Semester     | Credits |
|------------------|---------|
| *RHET 100 or 110 | 3       |
| **MATH 127       | 3       |
| CHEM 111         | 3       |
| ZOOL 101         | 3       |
| PSYCH 101 or     |         |
| *SOCIOL 101      | 3       |

| 2nd Semester     |   |
|------------------|---|
| *RHET 100 or 110 | 3 |
| **MATH 128       | 3 |
| CHEM 112         | 3 |
| ZOOL 230         | 3 |
| SOCIOL 101       |   |
| or *PSYCH 101    | 3 |

\*May be taken either semester.

\*\*On basis of Placement tests and interest in advanced science.

If a language is elected, intermediate proficiency is required.

#### SOPHOMORE YEAR

| 1st Semester          | Credits |
|-----------------------|---------|
| PHYSIC 141            | 4       |
| CHEM 261, Organic     | 3       |
| CHEM 263, Org-Lab     | 1       |
| COINS 122, Fortran IV | 4       |
| Elective (C or D)     | 3       |
| 2nd Semester          |         |
| CHEM 262, Organic     | 3       |
| CHEM 264, Org-Lab     | 1       |
| PHYSIC 142            | 4       |
| Electives (C or D)    | 6       |

#### JUNIOR YEAR

| 1st Semester                                             | Credits |

## MEDICAL TECHNOLOGY

### FRESHMAN YEAR

| 1st Semester              | Credits |
|---------------------------|---------|
| RHET 100* (Lang & Writ)   | 3       |
| CHEM 111 (Gen Chem)       | 3       |
| MATH 127** (Calc Lif-Soc) | 3       |
| ZOOL 101* (Intro Zool)    | 3       |
| (C or D) Elective*        | 3       |

### 2nd Semester

|                          |   |
|--------------------------|---|
| CHEM 112 (Gen Chem)      | 3 |
| MATH 128 (Calc Lif-Soc)  | 3 |
| (C or D) Elective*       | 3 |
| RHET 110* (Lang & Speak) | 3 |
| (C or D) Elective*       | 3 |

### SOPHOMORE YEAR

| 1st Semester               | Credits |
|----------------------------|---------|
| CHEM 261, 263 (Organic*)   | 4       |
| PHYSIC 141 (Intro Physics) | 4       |
| PUB HL 340 (Statistics)    | 3       |
| Elective (C or D)          | 3       |

### 2nd Semester

|                               |   |
|-------------------------------|---|
| CHEM 262, 264, (Organic)      | 4 |
| PHYSIC 142 (Intro Physics II) | 4 |
| ZOOL 230 (* Sys hum body)     | 4 |
| Elective (C or D)             | 3 |

### JUNIOR YEAR

| 1st Semester                                       | Credits |
|----------------------------------------------------|---------|
| PUB HL 355/655 Principles of Diagnostic Methods, I | 4       |
| CHEM 220 (Elem. Biochem)                           | 4       |
| MICBIO 250 (General)                               | 4       |
| Electives                                          | 3       |

### 2nd Semester

|                                                     |   |
|-----------------------------------------------------|---|
| PUB HL 356/656 Principles of Diagnostic Methods, II | 4 |
| CHEM 127 (Analytical)                               | 4 |
| MICBIO 280 (Pathogenic Bact)                        | 4 |
| MEDTEC 390 (Seminar)                                | 1 |
| Electives                                           | 3 |

### SENIOR YEAR

During the fourth year, students may serve a 12-month internship in a hospital laboratory accredited by the Council on Medical Education of the American Medical Association and the Board of Schools of Medical Technology of the American Society of Clinical Pathologists and one with which the University of Massachusetts has reciprocal affiliation. As placement opportunities are limited, prefer-

ence is given to those students with superior overall records. The student must complete all of the requirements set by the American Society of Clinical Pathologists to qualify for the Registry of Medical Technology. The student who begins a hospital internship for credit toward a degree must complete the full year of hospital training in order to be granted any credit. The course of training must be consistent at all times with the curriculum formulated by the Board of Schools of Medical Technology as approved by the American Society of Clinical Pathologists, the College of American Pathologists, the American Society for Medical Technology, and the Council on Medical Education and Hospitals of the American Medical Association.

THE CURRICULUM OFFERED BY THE HOSPITAL STAFF OF THE ACCREDITED AFFILIATED HOSPITAL SHALL HAVE THE FOLLOWING SCHEDULE:

| Title                            | Credits |
|----------------------------------|---------|
| MEDTEC 301 Clinical Microbiology | 10      |
| MEDTEC 302 Clinical Biochemistry | 10      |
| MEDTEC 303 Urinalysis            | 3       |
| MEDTEC 304 Hematology            | 10      |
| MEDTEC 305 Immuno-hematology     | 4       |
| MEDTEC 307 Clinical Serology     | 3       |

### 123 (I), (II). DYNAMICS OF PERSONAL AND COMMUNITY HEALTH

Development of understanding and attitudes relative to personal, family and community health needs. Attention to mental and physical well-being, drugs, sexuality, communicable and chronic diseases and health services.

### 200 (II). PEER SEX EDUCATION

A training course for selected students who will serve as peer resources with educational, counseling, and referral responsibilities. By arrangement with instructor only.

### 201 (I). PSE—IN-SERVICE TRAINING I

In-service training for Peer Sex Education counselors who are working with an assigned target group. By arrangement with instructor only. Prerequisite, PUB HL 391.

### 202 (II). PSE—ADVANCED IN-SERVICE TRAINING

In-service training for Peer Sex Education counselors who are working with an assigned target group. By arrangement with instructor only. Prerequisite, PUB HL 391.

### 263 (I), (II). INSTITUTIONAL HYGIENE AND SANITATION

Application of bacteriology to the prevention of food poisoning events. Evaluation of sanitary measures designed to prevent disease transmission via food and institutional environments.

### 264 (II). MICROSCOPY OF WATER

Microscopic forms of life, exclusive of bac-

teria. Counting and control of plankton in potable waters. Elements of limnology. Prerequisite, MICBIO 140. 3 class hours, 1 2-hour laboratory period.

**293 (I), 294 (II). PUBLIC HEALTH SEMINAR-II HEALTH SERVICES**

A seminar to develop an awareness of health services, particularly at the University; to promote health education and an awareness of minor health problems and first aid. Permission of instructor. Credit, 1.

**301 (I). PRINCIPLES OF COMMUNITY HEALTH EDUCATION**

Principles of health education. Exploration of methods and approaches to community health. Family, school, and community dimensions and potentials. Types and use of various methods leading to community action. Permission of instructor required. 3 class hours, 1 2-hour laboratory period. Credit, 4.

**302 (II). COMMUNITY DEVELOPMENT AND HEALTH EDUCATION**

Latest approaches in community development and community organization procedures. Exploratory readings, field assignments, and leadership emphasis; emphasis on coordinated community action. Permission of instructor required.

**304 (I), (II). SCHOOL HEALTH**

The principle concepts, methods, and dynamics of the organization of a school health program at the elementary and secondary level. Stress on planning and teaching in problem areas, (i.e., sex education, mental health and drugs). Prerequisite, junior or senior standing or permission of instructor.

**305 (II). CURRENT ISSUES IN HEALTH EDUCATION**

Latest issues in the field of health. Emphasis on controversial issues such as sex, drugs, and suicide education.

**311 (II). HUMAN SEXUALITY AND SEX EDUCATION**

Human sexuality as it may appear in the infant, the child, the adolescent, and the young married adult; examination and clarification of some of the crucial dynamics of the present era. Prerequisite, junior or senior standing and permission of instructor.

**312 (I). PUBLIC HEALTH AND FAMILY PLANNING**

Public Health problems associated with family health and population limitation. Historical factors, limitation methods, and barriers and facilitators related to family health and size. Prerequisites, PUB HL 123, SOCIOL 101 or permission of instructor.

**320 (I). INTRODUCTION TO HEALTH ADMINISTRATION**

Introduction to the philosophy, nature, and

scope of modern health services. Major health issues and programs. Organization of health services by local, national, and international health agencies. Prerequisites, SOCIOL 101 and ZOOL 101, or permission of instructor. 3 class hours, 1 2-hour laboratory period.

Credit, 4

**321 (II). ORGANIZATION AND ADMINISTRATION OF HEALTH PROGRAMS**

The organization of health programs to meet the needs of people. Emerging health problems and approaches to their solution. Emphasis on comprehensive planning and evaluation procedures. Prerequisites, PUB HL 320 or permission of instructor. 3 class hours, 1 2-hour laboratory period. Credit, 4.

**330 (I). PRINCIPLES OF EPIDEMIOLOGY**

An epidemiological perspective of health. General approaches for describing the patterns of disease in groups of people and elucidating the various processes involved in creating the differing levels of health in human groups. Lecture and lab examples illustrate a wide range of contemporary health problems.

**332 (I). CHRONIC DISEASE EPIDEMIOLOGY**

An analysis of the impact of selected chronic diseases on modern society. Current theories of cause and prevention related to present and future needs in health care and research efforts. Prerequisite, PUB HL 330 or permission of instructor.

**333 (II). COMMUNICABLE DISEASE EPIDEMIOLOGY**

A review of selected infectious diseases; emphasis on current theories of distribution, transmission and control.

**340 (I). PUBLIC HEALTH STATISTICS**

Principles of statistics applied to the evaluation of public health practices. Prerequisite, permission of instructor. 3 class hours, 1 2-hour laboratory period.

**350 (I). BASIC PUBLIC HEALTH LABORATORY**

Standard methods used in present day applied bacteriology; soils, dairy products, water and shellfish, and air. Prerequisite, MICBIO 140 or permission of instructor. 2 class hours, 2 2-hour laboratory periods.

**351 (II). ADVANCED PUBLIC HEALTH LABORATORY PROCEDURES**

Public Health laboratory procedures; field collection of samples, stream pollution study, food poisoning and infection, standard methods of food analysis. Prerequisite, permission of instructor. 1 4-hour laboratory and 1 2-hour laboratory period.

**352 (II). CLINICAL BACTERIOLOGY**

Procedures in clinical laboratory work. Pre-

requisite, MICBIO 250 or permission of instructor. 1 class hour, 2 2-hour laboratory periods. Credit, 4

**360 (II). PRINCIPLES OF ENVIRONMENTAL HEALTH**

The application of scientific knowledge to the control of man's environment as applied to human health. The physical, chemical and biological aspects of the air, water, land, food, housing, and occupation environments. Public Health or science majors with junior standing, or permission of instructor.

**361 (I). ENVIRONMENTAL HEALTH PRACTICES**

Control methods used by the environmental health and engineering practitioner. Topics include: water, waste water, solid wastes, food sanitation, vector control, housing, and accident control measures. Limited to environmental health and engineering majors. Other science majors by permission of instructor.

**362 (I). PRINCIPLES OF AIR POLLUTION**

Presents air pollution as a major public health problem. Topics include: air pollutants and their sources, health and economic effects, meteorology, sampling and analysis, air quality criteria and standards, control technology, control regulations and programs. Limited to public health and engineering majors. Other science majors by permission of instructor.

**363 (II). PRINCIPLES OF RADIATION PROTECTION**

Effect and control of radiation in the mammalian system. Includes sources, measurements, radio-sensitivity, radiation chemistry, cellular effects and acute and delayed effects in occupational, medical, and environmental exposures. Prerequisite, permission of instructor.

**370 (II). PRINCIPLES OF OCCUPATIONAL HEALTH**

The relation of the occupational environment to the health, efficiency, and well-being of workers. Emphasis on industrial hygiene, including toxic materials, physical stresses and control methods. Limited to public health and engineering majors. Other science majors by permission of instructor.

**382 (I), (II). SUPERVISED FIELD TRAINING**

A summer field training program with an official health agency, approved by the department. Must be under faculty supervision.

Credit, 3-10.

**385 (I), 386 (II). SPECIAL PROBLEMS**

Qualified seniors with permission of the department may arrange for independent work on special problems. Credit, 1-6.

**391 (I), 392 (II). SEMINAR**

Credit, 1.

## School of Physical Education

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

David C. Bischoff, *Dean*  
Professor M.A. Coffey; Assistant Professor J.L. Cobb

## General Physical Education

### 100G. PHYSICAL EDUCATION

Skills courses in sport, dance, equestrian, and other forms of physical activity. Open to all. Credit, 1.

### 101G. PHYSICAL EDUCATION

Theoretical and/or skill instruction in sport, dance and other forms of physical activity. 3 to 6 class hours or equivalent. Credit, 1-2.

## Exercise Science

*Head of Department:* Associate Professor D.W. Edington. Professors Campney, Kroll, Plagenhoef, Ricci; Associate Professor James.

### 101. EXERCISE HEALTH AND FITNESS

Critical analysis and interpretation of ideas, concepts, and practices relating to adaptation of body systems to stress imposed by physical activities. Credit, 2.

### 204. HUMAN ANATOMY

Gross structure and function of the body. 2 lecture hours, 1 2-hour laboratory period.

### 205. KINESIOLOGY

Anatomical application as a basis to a thorough understanding of mechanical problems in motor skills. Prerequisite EXSCI 204. 2 lecture hours, 1 2-hour laboratory period.

### 259. KINESIOTHERAPY

Programs of developmental activities, suited to interests and capacities of students with disabilities who are restricted from participation in activities of the general physical education program. Prerequisite, EXSCI 205.

### 260. INTRODUCTION OF SENSORIMOTOR TRAINING AND MENTAL RETARDATION

An analysis and interpretation of the sensorimotor domain of the mentally retarded with practicum exposure to training programs for such a population.

### 274. THEORY OF MEASUREMENT AND EVALUATION

Construction, interpretation, and evaluation of tests, including the theory of grading. Prerequisite, STAT 121.

### 278. PHYSIOLOGY OF EXERCISE

Application of basic physiological concepts of the program of physical education, emphasizing physiological effects and adjustments accruing from participation in physical activity. Prerequisite, ZOOL 135. 2 class hours, 1 2-hour laboratory period.

### 321. PHYSIOLOGICAL BASIS OF HUMAN PERFORMANCE

Analysis and interpretation of cardiovascular-pulmonary adjustment, metabolic requirement, and heat regulation during exercise. Prerequisite, EXSCI 278. 2 class hours, 1 2-hour laboratory period.

### 331. MECHANICAL ANALYSIS OF HUMAN MOTION

Application of the principles of mechanics to the analysis of human motion. Prerequisite, EXSCI 205 or equivalent. 2 class hours, 1 2-hour laboratory period.

### 341. MOTOR INTEGRATION

Examination of the control of muscular activity by the nervous system. Topics include basic motor system reflexes, cross transfer, fatigue, kinesthetic sense, lateral dominance, and neuromuscular facilitation techniques. Prerequisites EXSCI 205 and 278.

### 351. THEORY OF THERAPEUTIC EXERCISE

The theory of therapeutic exercise for the mentally retarded, physically handicapped and normal. Prerequisite, EXSCI 259 or equivalent.

### 352. PHYSICAL ACTIVITY AND MENTAL RETARDATION

Physical activity relative to the behavior of the mentally retarded. Prerequisite, EXSCI 259.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Professional Preparation in Physical Education

Choirperson: Assistant Professor Barber. Professors Locke, Vendien; Associate Professors Ogilvie, Riggs, Wallace; Assistant Professors Brosky, Rife, Shute; Instructors Callahan, Diggs, Evans, Griffin, Hart.

## MAJOR ACTIVITY COURSES

Primarily for majors in physical education. Instruction focuses both on skill in the activity and methods of learning to teach the skill. Other courses cover the wide spectrum of sports in this culture. Credit, 1.

102. Fundamentals
103. Hockey I
104. Gymnastics I
106. Soccer-Speedball-Flag Football
107. Basketball
108. Lacrosse-Softball
110. Synchronized Swimming and Aquatic Composition
111. Competitive Swimming and Diving
115. Gymnastics II
116. Gymnastic Teaching
117. Rhythmic Gymnastics and Routine Composition
121. Officiating Sports *Credit, 2.*
122. Officiating Gymnastics *Credit, 2.*
130. Gymnastics
131. Aquatics
132. Weight Training and Conditioning
133. Football Coaching
134. Basketball
135. Basketball Coaching
136. Baseball
137. Baseball Coaching
138. Gymnastic Coaching
139. Wrestling
140. Wrestling Coaching
141. Lacrosse
142. Lacrosse Coaching
143. Hockey
144. Hockey Coaching
145. Soccer
146. Soccer Coaching
147. Squash and Handball
148. Tennis Coaching
150. Swim for Handicapped
151. Aquatics
155. Educational Gymnastics
160. Bowling
161. Golf
162. Advanced Golf
163. Tennis and Badminton
165. Track and Field
166. Track and Field Coaching
167. Volleyball
170. Outdoor Education
180. Folk and Square Dance

#### 198, 199. OFFICIATING

For both men and women. Development of the techniques of officiating seasonal sports with practical experience.

#### 206. PERCEPTUAL MOTOR DEVELOPMENT

Motor development in the child, focusing on conditions affecting the learning of motor skills.

#### 253. PHYSICAL EDUCATION FOR ELEMENTARY SCHOOLS

Program content for elementary school physical education and methods used for teaching physical education activities at the elementary school level.

#### 254. PHYSICAL EDUCATION IN THE SCHOOL

Content and presentation of methods designed to prepare students for educational internship in the schools. The applicability of micor-teaching techniques to situations in teaching physical education activities.

#### 275. PREVENTION AND CARE OF INJURY IN ACTIVITY

Theory and techniques in preventing and treating all types of physical injuries. First aid treatment; therapeutic aids and clinical use of physiotherapy equipment. 2 class hours, 1 2-hour laboratory period.

#### 276. PRINCIPLES OF PHYSICAL EDUCATION

Aims and objectives in physical education; presentation and critical analysis of curricular, methodological and adapted principles as they apply to the teaching of physical education.

#### 277. PSYCHOLOGY OF COACHING

Analysis of psychological content in athletics and coaching. Topics include personality and motivation, mental health aspects, competitive spirit, sportsmanship, and selected problems in coaching pertaining to psychological factors. Prerequisites, PSYCH 101 and 263 or permission of instructor.

#### 370. ORGANIZATION AND ADMINISTRATION

Administrative theory and practice as they relate to the program and curriculum of physical education in the schools.

#### 381. ADMINISTRATION OF INTRAMURAL PROGRAMS

Objectives, tourney design, organization and administration of intramural programs. 2 class hours. *Credit, 2.*

#### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 1-6.*

#### 391. SEMINAR

Analysis of studies and issues in physical education.

#### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. *Credit, 4.*

#### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. *Credit, 1-5.*

#### Sport Studies

Head of Department: Professor H.J. Vander-Zwaag. Professors Lewis, Loy, Page, Spears;

Assistant Professors Graham, Gundersheim, and Toyama.

#### 200. SOCIOLOGY OF SPORT AND PHYSICAL ACTIVITY

Social action theory, group structure, social institutions, social processes, current cultural trends, and social problems in sport. Prerequisite, SOCIOL 101.

#### 201. PSYCHOLOGY OF SPORT AND PHYSICAL ACTIVITY

Variables of skilled performance; behavioral patterns and interactions in games, sports, and dance activities; evaluation of skilled performance. Prerequisite, PSYCH 101.

#### 202. HISTORY OF SPORT AND PHYSICAL ACTIVITY

A survey of the history of sport, dance, and other forms of organized, physical activity throughout the Western world. Prerequisite, HIST 100 or 101.

#### 203. PHILOSOPHY OF SPORT AND PHYSICAL ACTIVITY

A philosophical analysis of sport and physical activity. Consideration of the nature and values of sport and its role as a meaningful activity. Prerequisite, PHIL 105.

#### 261. WORLD HISTORY OF SPORT

Factors influencing the rise of sport and the role of sport in society. Prerequisite, SPORST 202.

#### 264. PHILOSOPHY OF SPORT

A philosophical analysis of key concepts which influence the objectives and content of various programs in the broad realm of sport. Prerequisite, SPORST 203 or equivalent.

#### 265. SOCIOLOGY OF SPORT

Sport as a social institution, including structure and function. Topics include theories explaining the role of sport in society; the incidence, form, and regulation of sport in society; physical activity in contemporary society; and the social psychology of sport, including personality, attitude, and motivation. Prerequisite, SPORST 200.

#### 362. HISTORY OF SPORT IN THE UNITED STATES

Sport in America from earliest times to the contemporary period. Emphasis on the social, political, and economic factors which affected the development of sport. Prerequisite, SPORST 261.

#### 363. COMPARATIVE SPORT

A comparative analysis of sport and athletics in selected countries. Emphasis on historical, cultural, and social values affecting the status of sports and recreation, and current international cooperation. Prerequisite, SPORST 261.

385, 386. SPECIAL PROBLEMS  
Individual study of a selected problem for qualified students. By arrangement with members of the department. Credit, 1-6.

398. SENIOR HONORS  
Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

399. SENIOR HONORS  
Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1.5.

## Leisure Studies and Services

Head of Department: Professor William E. Randall. Assistant Professors: Klar, Sherrow; Instructor Willmann.

### SOPHOMORE YEAR

| 1st Semester                  | Credits |
|-------------------------------|---------|
| LS&S 230, Group Leadership    | 3       |
| Humanities and Fine Arts      |         |
| Elective (C)                  | 3       |

| 1st Semester                                                   | Credits |
|----------------------------------------------------------------|---------|
| LS&S 352, Organization and Administration for Leisure Services | 3       |
| Option Course                                                  | 3       |
| Arts and Sciences Electives                                    | 3       |
| Free Electives                                                 | 6       |
|                                                                | 15      |

| 2nd Semester         |    |
|----------------------|----|
| LS&S 380, Internship | 15 |
|                      | 15 |

\*One of these three courses must be a "D" course.  
\*\*Select freely from Anthropology, Economics, Geography, Political Science, more Psychology, or more Sociology. Economics 125 and Political Science 100 recommended.

101. MAN AND LEISURE  
Concepts of leisure, play and recreation and their societal implications. Examination of leisure opportunities and experience with emphasis on the delivery of leisure services. Field trips.

103, 104. FIELD EXPERIENCE  
Leadership skills plus not less than 20 hours per semester of supervised experience as a volunteer in leadership or other appropriate clientele-oriented roles, in approved settings. Enrollment limited to LS&S majors. Credit, 1.

111. LEISURE ACTIVITY ANALYSIS  
Analysis of leisure activities in terms of inherent characteristics and values for various participant types. Leadership skills and resources needed for a broad variety of program areas.

112. LEISURE ACTIVITIES FOR SPECIAL POPULATIONS  
Pertinent characteristics of individuals and groups requiring adapted and/or modified programming. Providing leisure activities to meet the needs of these special populations. Practicum experience included. All day field trips. Prerequisites, LS&S 111 or permission of instructor, 2 class hours, 1 2-hour laboratory.

131. ORGANIZED CAMPING  
Operating procedures of organized camps. Camper guidance, program skills, and practical leadership experience. Two-night camping trip, plus one-day trip. 2 class hours, 1 2-hour laboratory.

230. GROUP LEADERSHIP  
Foundations and tools for leadership. Successful leadership techniques for large and small groups such as clubs and committees. Field trip. Non-major admission only by permission of instructor.

313. LEISURE SERVICE PROGRAMMING  
Critical determination of individual and group needs and objectives and the selection, planning, development and evaluation of comprehensive programs. Prerequisite, LS&S 111.

320. LEISURE SERVICE FACILITIES  
Principles, practices, and problems in the planning, development, and management of areas and structures in the facilitation of leisure programs and services. Prerequisite, LS&S 101, 111, or equivalent.

### 332. SUPERVISION IN LEISURE SERVICES

Nature, functions, principles, and methods of supervision in leisure services. The supervisory process as related to paid and volunteer staff. Prerequisite, LS&S 230 or equivalent.

### 351. INTRODUCTION TO OUTDOOR RECREATION

Characteristics, principles, and practices of outdoor recreation, including current developments; relationship to other uses of land and water resources. Field trips.

### 352. ORGANIZATIONS AND ADMINISTRATION FOR LEISURE SERVICES

A pragmatic approach to functions and methods for administrative personnel in the leisure service field. Problems, role simulation, field trip, guests. Prerequisites, LS&S 313, 320.

### 353. ENVIRONMENTAL INTERPRETATION

Principles and practices in interpretation for public appreciation of natural archaeological and historical features in parks, museums, and similar settings. Field trips. Prerequisites, 18 credits in one of the following areas: American history, anthropology, natural resources, or the natural sciences; and permission of instructor. 2 class hours, 1 2-hour laboratory period.

### 354. PERSPECTIVES IN THERAPEUTIC RECREATION

Historical and contemporary foundations and philosophies in therapeutic recreation. Professional functioning and state of the art are emphasized. Interdisciplinary relationships, research and demonstration needs, and future perspectives are analyzed. Field trips. Prerequisites, LS&S 112, EXSCI 204 or ZOOL 135, 18 credits in pertinent Psychology or Sociology, and junior or senior standing, or permission of instructor.

### 380. INTERNSHIP

Professional field experience with one or more approved cooperating leisure service agencies appropriate to the student's career choice. Open only to LS&S seniors who have completed the major option. LS&S 332 & 352, and who have at least a 2.0 cumulative quality point average. Full-time field placement throughout the semester. Credit, 15.

### 385, 386. SPECIAL PROBLEMS

Individual intensive study of an aspect of leisure studies and services and the presentation of results in written form. Credit, 1-6.

### 391. SEMINAR

Critical consideration of basic philosophies and problems in leisure studies and services. Prerequisite, LS&S 101 or 351. Credit, 1.

## Division of Military And Air Science

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with Department and/or Honors Office. Credit, 4.

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with Department and/or Honors Office. Credit, 1-5.

## Military Science

*Head of Department:* Professor (Colonel, USA) Baxter M. Bullock. Lecturers (Lieutenant Colonel) Gladfelder, (Captain) Ehrenreich (Captain) Dionne.

The Department of Military Science offers courses which are open to any student of the University or other institutions in the local area. In addition, the department conducts the Reserve Officers' Training Corps program for those desiring to earn a commission as an officer in the United States Army. Students electing to earn a commission must complete eight semesters or the equivalent of military science subjects. These eight semesters may be compressed into six academic semesters with permission of the department head. A student may receive constructive credit towards an army commission through attendance at a basic summer camp in lieu of the first two years of the ROTC program; veterans may receive appropriate constructive credit for military service. In addition to classroom instruction and seminars, participation is required in the department's leadership laboratory comprised of several weekend practicums during the year. Students are also required to complete a six-week advanced summer camp session at the end of the junior or senior year. The summer practicum combined with the leadership laboratory permits the application of theory presented in academic subjects. To be eligible to be enrolled as a cadet, students must possess the University-sponsored student health insurance or equivalent coverage.

Upon completion of University degree requirements and departmental requirements, the student is commissioned a Second Lieutenant in the U.S. Army. Students also participating in department-sponsored activities to include visits and guest lecturer presentations.

111(I). AMERICAN MILITARY HISTORY I  
American Military History from origins to 1930. Army organization for each war and post-war period; leadership techniques; principles of war; the development of tactics and equipment. 1 class hour. Credit, 1.

### 112(II). AMERICAN MILITARY HISTORY II

American Military History from 1930 to the present. Change in Army organization during the period; leadership techniques, principles of war; the development of tactics and equipment. 1 class hour. Credit, 1.

### 119(I). CONTEMPORARY MILITARY THEORY I

Introduction to the military; analysis, interpretation and usage of topographic maps and map substitutes; land navigation techniques; introduction to communications procedures and equipment. 2 class hours, laboratory for cadets. Credit, 2.

### 137(II). INTRODUCTION TO MILITARY LEADERSHIP AND MANAGEMENT

Analysis of military leadership through readings and discussion of leader and group behavior; communication systems, motivational theory and organizational structures; fundamentals and principles required by the junior officer as a manager and a leader. 3 class hours, laboratory for cadets.

### 251(I). ADVANCED MILITARY LEADERSHIP AND MANAGEMENT

Military instructional principles and their application; mission, organization and functions of the branches of the Army; integration of the branches of the Army into current divisional structure; Code of Conduct of the individual soldier. Prerequisite: permission of instructor. 3 class hours, laboratory for cadets.

### 252(II). ADVANCED CONTEMPORARY MILITARY THEORY

Principles of modern offensive and defensive military tactics; concepts of tactical communications; functions of command to include unit administration, supply, maintenance and officer and enlisted personnel management. Prerequisite: permission of instructor. 3 class hours, laboratory for cadets.

### 378(I). MILITARY LAW

The constitutional basis of powers; the constitution and the individual; the basic principles of criminal law; administration of military justice; and the rules of evidence. Prerequisite, junior or senior standing. 3 class hours, laboratory for cadets.

### 379(II). SEMINAR IN MILITARY LEADERSHIP AND MANAGEMENT

Managerial problems inherent in military staff planning and administration; perspective of defense and Army leadership, management, and organization in support of national security. Prerequisites: MILSCI 251 and junior or senior standing. 3 class hours, laboratory for cadets.

### 385(I), 386(II). SPECIAL PROBLEMS

Individual study of selected problems for qualified students. Credit, 1-6.

## Air Science

*Head of Department:* Professor (Colonel) Volpe. Assistant Professors (Major) Richardson, (Major) Sonoda, (Captain) Liquori.

The Department of Air Science offers courses of general interest to all University students and of specific interest to male and female students who wish to become officers in the United States Air Force. Requirements for an Air Force commission are as follows: 1) satisfactory completion of departmental course offerings. This can be accomplished through either a two- or a four-year program. Students in a four-year program take eight semesters of

departmental course offerings and attend a four-week summer training session on an active Air Force base at the end of the sophomore year. Those in a two-year program attend a six-week summer training session at the end of the sophomore year in lieu of the first two years of the ROTC program, and then complete the last four semesters of departmental course offerings. Students with previous ROTC instruction in either high school or college, with military school or service academy attendance, active military duty, or Civil Air Patrol training should consult the department for possible accreditation of this experience toward all or part of the first two years of ROTC. In addition to the classroom instruction, participation is required in the department's leadership laboratory, which consists of briefings and field trips designed to acquaint students with Air Force life, customs, and duties, and which entails participation in the operation of a cadet organization patterned after a military organization. 2) Satisfactory completion of the summer training session which, combined with the leadership laboratory, permits the practical application of theory presented in academic subjects and provides students an opportunity to see Air Force personnel at work on jobs similar to those the students will perform once on active duty.

Upon completion of University degree requirements and departmental requirements, the student is commissioned a Second Lieutenant in the U.S. Air Force. A student in the senior year may request a delay in reporting to active duty of up to two years in order to complete graduate or professional school.

## FRESHMAN YEAR

### 111 (I). THE U.S. AIR FORCE

Introduction to the mission, organizational structure, and operational concepts of the U.S. Air Force. Emphasis on U.S. strategic offensive and defensive forces. 1 class hour, 1 hour corps training. Credit, 1.

### 112 (II). U.S. MILITARY FORCES

Composition and deployment of U.S. general purpose forces and Air Force support forces. The mission, resources, and operation of tactical air forces in limited war and of Army, Navy, and Marine general purpose forces, their concepts and organization. 1 class hour, 1 hour corps training. Credit, 1.

## SOPHOMORE YEAR

### 123 (I). DEVELOPMENT OF AIR POWER I

Survey of principal persons, events, and concepts contributing to emergence of American military aviation as a separate air arm. Air power theories of Mitchell, Douhet, and Trenchard applied to subsequent experiences of the Army Air Forces. Credit, 1.

### 124 (II). DEVELOPMENT OF AIR POWER II

Emergence of the U.S. Air Force and its employment from Berlin Airlift through Vietnam. Assessment of the role of air power as an instrument of the military element of national power. Credit, 1.

## JUNIOR YEAR

### 235 (I). NATIONAL SECURITY FORCES IN CONTEMPORARY AMERICAN SOCIETY (I)

Political interrelationships between the military establishment and American society in the context of military professionalism, civil military relations, and the framework of defense policy making (constraint on U.S. defense policy in the international and domestic areas). 3 class hours, 1 hour corps training.

### 236 (II). NATIONAL SECURITY FORCES IN CONTEMPORARY AMERICAN SOCIETY (II)

Evolution of U.S. military strategy in the nuclear age; emphasis on arms races, arms control, and escalation. Implementation of defense policy; emphasis on bureaucratic politics and organizational theory in policy formulation and implementation. 3 class hours, 1 hour corps training.

### 233 (II). FLIGHT INSTRUCTION PROGRAM — CLASSROOM PHASE

A basic ground school to introduce students to private flying at the light aircraft level. Includes basic aerodynamics, navigation, radio navigation, meteorology, and federal regulations. 2 class hours. Permission of department required. Credit, 2.

## SENIOR YEAR

### 341 (I). THE PROFESSIONAL OFFICER I

Military management functions, the role of command and staff in decision-making, the factors relating to effective leadership, quantitative techniques, game theory, and the traditional aspects of power, authority, and status. 3 class hours, 1 hour corps training.

### 342 (II). THE PROFESSIONAL OFFICER II

The professional concept of military duty, the framework of military law, and a practical introduction to active duty service as a professional officer. 3 class hours, 1 hour corps training.

### 343 (I), (II). FLIGHT INSTRUCTION PROGRAM — FLIGHT PHASE

For senior, pilot-qualified Air Force ROTC cadets only. Twenty-five hours of flight instruction in light aircraft; emphasis on cross-country navigation, radio navigation, safety, and basic visual flight maneuvers. Prerequisite, AS 233. By arrangement. Credit, 1.

## Honors Program

Director: George J. Armelagos; Associate Director: Mary Sirridge.

Honors Program courses are open to any qualified student. One need not be a Commonwealth Scholar nor a member of any departmental Honors Program to be eligible to take Honors Courses. However, like other University courses, some Honors Courses have prerequisites; some require permission of instructor.

Most Honors Courses, which number approximately 200 each semester, and are drawn from all departments of the University, are designated by adding an Honors Colloquia to departmental courses, giving them one additional credit.

### 181 (I), 182 (II), 183 (I), 184 (II), 185 (I), 186 (II).

#### HONORS — STUDIES IN THE HUMANITIES (C)

An area of one or more of the humanistic disciplines, such as art, literature, music, history, or philosophy. For Honors Program freshmen and sophomores; others by permission of the Director of Honors.

### 187 (I), 188 (II), 189 (I), 190 (II), 191 (I), 192 (II).

#### HONORS — STUDIES IN THE SOCIAL SCIENCES (D)

An area of one or more of the social sciences, such as economics, psychology, sociology, or anthropology. For Honors Program freshmen and sophomores; others by permission of the Director of Honors.

### 193 (I), 194 (II), 195 (I), 196 (II), 197 (I), 198 (II).

#### HONORS — STUDIES IN THE SCIENCES AND MATHEMATICS (E)

An area of one or more of the sciences, such as physics, chemistry, botany, astronomy, geology, or zoology, or of mathematics. For Honors Program freshmen and sophomores; others by permission of the Director of Honors.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with the Director of Honors. Credit, 1-6.

### 387 (I), 388 (II). HONORS — INTERDISCIPLINARY STUDIES: SENIOR COLLOQUIUM

An interdisciplinary seminar for Honors Program seniors; open by invitation only.

### 391 (I), 392 (II), 393 (I), 394 (II). HONORS — INTERDISCIPLINARY SEMINAR

A problem requiring the use of several disciplines. For Honors Program juniors and seniors; others by permission.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with the Director of Honors. *Credit, 4.*

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with the Director of Honors.

*Credit, 1-5.*

## Legal Studies Program

Director: Assistant Professor M. Ethan Katsh.  
Associate Professor John J. Bonsignore;  
Assistant Professors Stephen Arons, Peter d'Errico, Ronald M. Pipkin, Janet Rifkin.

The Legal Studies Program provides an opportunity for students to pursue courses about the nature and function of law; it presents field work and research opportunities, conferences, practica, and special courses about law for the University community.

The major in Legal Studies is individually designed around a basic core of study. This is not a "pre-law" preparatory program.

The Legal Studies Program is allied with a range of faculty and courses in the Five Colleges. A Five-College Legal Studies Catalog lists many of the offerings available. The courses are open to anyone interested in examining the interrelationships of law and society.

Admission to the major is available to a small number of undergraduates through a selection process in which a study plan is negotiated for each student by the student and major advisor according to their mutual interests.

Each major is required to take LEGAL 201, 202, 264, 383, 385-386, and 391, as well as an additional 15 credits of study drawn from the law-related offerings of other disciplines in the Five-College Legal Studies Curriculum.

### 201. INTRODUCTION TO LEGAL STUDIES

The purposes and functions of law in society. Legal reasoning and decision-making; the impact of law upon persons directly and indirectly involved with it; the relationship between political, social, and economic power and law; the relationship of law and morality; and the problems of achieving justice in contemporary society.

### 202. INTERMEDIATE LEGAL STUDIES

Specific views of law at a more advanced level; for example, the legal imagination; law, community and consciousness; law, prisons and society.

### 242. THE LEGAL IMAGINATION

Legal theory and literature as tools in analyzing how the law communicates with, characterizes, labels, judges and categorizes individuals. How the law can be for some an interesting intellectual challenge, a vehicle for social change, and a logical system, and for others, a lifeless, mysterious, necessary evil.

### 264. URBAN LAW

The efficacy of the legal system in dealing with major urban social problems. Materials concentrated in one or two problem areas, such as housing, crime or welfare.

### 271. SEX ROLES, LAW & SOCIETY

Law in society, how this interaction fosters the treatment and classification of individuals according to their sex. The role of women in society and how the law affects this status.

### 383. LEGAL RESEARCH AND WRITING

Development of one area of legal doctrine as a means of learning how to read and analyze judicial opinions and statutes and as a vehicle for legal research and writing.

### 385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the program. *Credit, 1-6.*

### 391. SEMINAR

Topics covered reflect student and faculty interests.

### 398. SENIOR HONORS

Senior research, thesis option. By arrangement with the program and/or Honors Office.

*Credit, 4.*

### 399. SENIOR HONORS

Continuation of 398. Thesis mandatory. By arrangement with the program and/or Honors Office. *Credit, 1-5.*

## RELATED COURSES

ANTH 336. Political Anthropology

ANTH 338. Anthropology of Law and Conflict

POLSCI 362. Politics, Law and Judicial Behavior

## Rhetoric

Acting Director of Program: Jane Blankenship.  
Director of Communication Skills Center: Shirley DeShields.

Director of English as a Second Language Component: Clodomiro Cabañas. Director of Rhetoric Center for Instructional Improvement: Sara Stelzner.

The Rhetoric faculty is composed of faculty members from the Departments of English, Communication Studies, and others.

With certain exceptions for advanced placement, the University Core in Rhetoric requires the completion of one course in Group I, and one other course in Rhetoric. The requirement is expected to be completed by the end of the sophomore year.

Within the standard two-semester sequence in composition and speech, the Pro-

gram in General Rhetoric offers flexibility and choice, as well as a systematic theory of language. It asks two questions: How do we use words and styles to express ourselves and communicate with our world? How can we improve this expression and communication, and what do we mean by "improvement?" The Program confronts at a basic or unspecialized level, many of the "languages" through which people share their experience — oral and written, kinesics, film, electronics. Fuller details on the courses in the Program are available at the Rhetoric Office, 308C Bartlett Hall.

## GROUP I

### 100 (I), (II). LANGUAGE AND WRITING (B)

How words and styles are chosen to express ourselves and our world, with particular attention to the written language. Varied opportunities for written expression, on different subjects for different purposes and audiences. Emphasizes responsible choice in the language used in both academic and everyday life.

### 102. READING, COMPREHENSION AND GRAMMAR (B)

Laboratory course for students with special problems in reading, grammar, study skills, etc. Enrollment only by permission of Skills Center. *Credit varies.*

### 105, 106, 107. ENGLISH AS A SECOND LANGUAGE

Rhetoric courses offered for the non-native English speaking student. Enrollment by permission of Program. *Credit varies.*

### 110 (I), (II). LANGUAGE AND SPEAKING (B)

The process and act of communication, emphasizing meaning and the principles of and the choices available in the use of language. The rhetorical nature of our world, and the means and ends of effective and ethical communication. The concepts of communication, meaning, and language; and the principles and problems of informative and persuasive speaking.

## GROUP II

### 140 (I), (II). VOICES OF IMAGINATIVE WRITING (B)

Various kinds of verbal imaginative expressions in our culture — rock lyrics and modern poems, short fiction, drama — to enable more articulate and critical reading and more resourceful and daring writing. Exercises in critical reading or analysis balanced by frequent "creative" writing activities in various genres; "playing" at self-expression and self-definition.

145 (I), (II). CRITICISM AND THE  
THEATRICAL ARTS (B)

An opportunity to sharpen critical judgment about theatre. Aims at development of informal criticism into well-reasoned judgments of theatrical art, using as subject matter current local offerings in theatre, film and dance, and participation in laboratory projects.

165 (I), (II). MODERN PUBLIC  
DISCOURSE (B)

The analysis of contemporary rhetorical discourse; how it works and why it sometimes fails. Emphasis on oral political discourse, but a wide variety of communication situations are studied to discover the relationship of source, message and receiver. The interrelation of language and thought with the environment in which they occur examined through lectures, discussion, films, tapes, and multimedia presentations.

180 (I), (II). THE RHETORIC OF FILM (B)

The process of communication focusing on the languages of film. Emphasis on relationships between techniques and meaning in film and the ways film uses the rhetorical methods of oral and written language. Each student views a significant number of films, reads related essays, writes frequent papers, and has an opportunity to write a brief scenario or (in some cases) make a short film.

385, 386. SPECIAL PROBLEMS

Individual study of a selected problem for qualified students. By arrangement with members of the program. *Credit, 1-6.*

# Administrative Officers

## University System

Robert Wood, Ph.D. (Harvard University), *President*  
Ernest A. Lynton, Ph.D. (Yale University), *Senior Vice President for Academic Affairs*  
Jay Janis, B.A. (Yale University), *Senior Vice President for Management and Business Affairs*  
Nan S. Robinson, M.A. (Radcliffe College), *Vice President for Planning*  
Gladys Hardy, B.A. (Sarah Lawrence College), *Secretary*  
Kenneth W. Johnson, B.S. (University of Vermont), *Treasurer*  
Adam Yarmolinski, LL.B. (Yale University), *Ralph Waldo Emerson Professor of the University*  
Rev. Michael P. Walsh, Ph.D. (Fordham University), *Academic Adviser to the President*

## Amherst Campus

### OFFICE OF THE CHANCELLOR

Randolph W. Bromery, Ph.D. (Johns Hopkins University), *Chancellor*  
James I. DeShields, Ed.D. (University of Massachusetts), *Assistant to the Chancellor*  
Douglas R. Forsyth, Ph.D. (Colorado State University), *Assistant to the Chancellor*  
Warren W. Gulko, Ph.D. (University of Minnesota), *Director of Budgeting and Institutional Studies*  
H. J. Littlefield, Jr., B.S. (Kings Point), *Director of Planning*  
Daniel M. Melley, M.S. (Boston University), *Director of Public Affairs*  
Sidney Myers, J.D. (Boston University Law School), *Staff Attorney*  
George A. Norton, B.S.M.E. (University of Maine), *Director, Physical Plant*  
Charlotte Rahaim, Ed.D. (University of Massachusetts), *Assistant to the Chancellor*  
Zina Tillona, D.M.L. (Middlebury College), *Assistant to the Chancellor*

### OFFICE OF THE VICE CHANCELLOR FOR ACADEMIC AFFAIRS AND PROVOST

Dean Alfange, Jr., Ph.D. (Cornell University), *Acting Vice Chancellor for Academic Affairs and Provost*  
David C. Bischoff, Ph.D. (Pennsylvania State University), *Associate Provost*

Vere C. Chappell, Ph.D. (Yale University), *Acting Associate Provost*  
Robert L. Woodbury, Ph.D. (Yale University), *Associate Provost for Special Programs*

## ACADEMIC DEANS

Jeremiah M. Allen, Ph.D. (University of Colorado), *Dean of the Faculty of Humanities and Fine Arts, College of Arts and Sciences*  
David C. Bischoff, Ph.D. (Pennsylvania State University), *Dean of the School of Physical Education*  
Vere C. Chappell, Ph.D. (Yale University), *Acting Dean of the Graduate School*  
William A. Darity, Ph.D. (University of North Carolina at Chapel Hill), *Dean of the School of Health Sciences*  
Louis Fischer, Ph.D. (Stanford University), *Acting Dean of the School of Education*  
Glen Gordon, Ph.D. (University of Chicago), *Acting Dean of The Faculty of Social and Behavioral Sciences, College of Arts and Sciences*  
George Odiorne, Ph.D. (New York University), *Dean of the School of Business Administration*  
Kenneth G. Picha, Ph.D. (University of Minnesota), *Dean of the School of Engineering*  
Seymour Shapiro, Ph.D. (University of Michigan), *Dean of the Faculty of Natural Sciences and Mathematics, College of Arts and Sciences*  
Arless A. Spielman, Ph.D. (University of Minnesota), *Dean of the College of Food and Natural Resources; Director, Experiment Station and Extension Service*

### OFFICE OF THE VICE CHANCELLOR FOR STUDENT AFFAIRS

Robert W. Gage, M.D. (Harvard Medical School), *Vice Chancellor for Student Affairs*  
Barry W. Averill, B.S. (University of Kentucky), *Director of Health Services*  
William F. Field, Ph.D. (University of Maryland), *Dean of Students and Interim Director of the Campus Center*  
Sally A. Freeman, M.A. (New York University), *Director of Student Development Center*

## **Where to Write for Further Information**

### **Admissions**

William D. Tunis, *Dean of Admissions,*  
*Records and Financial Aid, Whitmore*

### **Placement and Guidance Services**

*Director, Student Development Center,*  
*Berkshire House*

### **Expenses, Payments**

Robert R. Mishol, *Bursar, Whitmore*

### **Graduate School**

*Dean, Graduate Research Center*

### **Housing**

J. Bruce Cochrane, *Whitmore*

### **Financial Aid**

Richard A. Dent, *Director (Loans &  
Scholarships), Whitmore*

### **Academic Records and Transcripts**

Ralph D. Jones, *Registrar, Whitmore*

### **Stockbridge School of Agriculture**

John W. Denison, *Director, Stockbridge  
Hall*

### **Student Affairs**

William F. Field, *Dean of Students,*  
*Whitmore*

### **Summer Session**

*Office of the Provost, Whitmore*

### **Admissions at Boston**

*Director of Admissions*

### **Admissions at Worcester**

*Office of Admissions*

### **PLEASE NOTE**

All correspondence concerning the *University of Massachusetts at Amherst* should be addressed to the appropriate office, *University of Massachusetts, Amherst, MA 01003.*

All correspondence concerning the *University of Massachusetts at Boston* should be addressed to: *Columbia Point, Boston, MA 02115.*

All correspondence concerning the *University of Massachusetts Medical School* should be addressed to: *55 Lake Avenue North, Worcester, MA 01605.*

## **The New England Association of Colleges and Secondary Schools**

The University of Massachusetts at Amherst is accredited by the New England Association of Colleges and Secondary Schools. The Association accredits schools and colleges in the six New England states. Membership in one of the six regional accrediting associations in the United States indicates that the school or college has been carefully evaluated and found to meet standards agreed upon by qualified educators. Colleges support the efforts of public-school and community officials to have their secondary schools meet the standards of membership.

| Monday, November 14     | Spring semester preregistration week begins.                |
| Wednesday, November 23  | Thanksgiving recess begins after last class.                |
| Monday, November 28     | Classes resume.                                             |
| Thursday, December 15   | Final examinations begin.                                   |
| Wednesday, December 21  | Final examinations end; Christmas recess begins.            |
| Friday, December 30     | Degree requirements deadline for February 1, 1978 degrees.  |
| Monday, January 23      | Registration for graduate students.                         |
| Tuesday, January 24     | Classes begin.                                              |
| Monday, January 30      | Last day to register.                                       |
| Monday, February 6      | Last day to add courses.                                    |
| Monday, February 20     | Holiday.                                                    |
| Wednesday, March 1      | Application deadline for Summer or Fall 1978 admission.     |
| Monday, March 6         | Last day to drop courses with DR.                           |
| Saturday, March 18      | Spring recess begins after last class.                      |
| Monday, March 27        | Classes resume.                                             |
| Monday, April 17        | Holiday.                                                    |
| Monday, April 24        | Fall semester preregistration week begins.                  |
| Friday, April 28        | Degree requirements deadline for May 20, 1978 degrees.      |
| Thursday, May 11        | Final examinations begin.                                   |
| Wednesday, May 17       | Final examinations end.                                     |
| Saturday, May 20        | Commencement.                                               |
| Thursday, August 31     | Degree requirements deadline for September 1, 1978 degrees. |

## General Information

### The University

The University of Massachusetts is the state university of the Commonwealth. It was founded in 1863 under the provisions of the Morrill Land Grant Act passed by the United States Congress one year earlier.

Situated in one of the most picturesque sections of the state, the University at Amherst joins with its academic neighbors — Amherst, Smith, Mount Holyoke, and Hampshire Colleges — in maintaining the rich tradition of education and cultural activity associated with the Connecticut Valley region. The University's Amherst campus consists of approximately 1,100 acres of land and 110 buildings. Physical growth has been carefully planned, with provisions for additional buildings and facilities to accommodate an enrollment of approximately 25,000 students.

The Associate Provost and Dean of the Graduate School, in collaboration with the University Graduate Council, exercises overall review and supervision of graduate programs conducted in the several colleges and provides guidance in the development of new programs as well as the maintenance of standards for existing programs. Each college of the University has developed its graduate programs in accordance with the highest national professional standards of the respective fields.

For information about University of Massachusetts at Boston graduate programs, consult the *University of Massachusetts at Boston Bulletin*.

Information on graduate programs in medicine is found in the *University of Massachusetts at Worcester Medical School Catalogue*.

#### COLLEGES CONDUCTING GRADUATE PROGRAMS

Seven colleges and schools of the University are authorized to offer graduate degree programs through the Graduate School: the College of Arts and Sciences, the College of Food and Natural

Resources, the School of Business Administration, the School of Education, the School of Engineering, the School of Health Sciences, and the School of Physical Education.

#### UNIVERSITY LIBRARY

The University Library system is composed of the new 28-story University Library and several branch libraries. Present holdings include over 1,400,000 books, periodical volumes, and government documents, and over 420,000 microforms. Holdings of the University Library and its branches are listed in the public catalog, situated on the main level of the University Library. More than 10,000 periodicals are currently received and distributed, according to subject matter, in the University Library or its branch libraries. Holdings and locations are listed in both the card catalog and the *Pioneer Valley Union List of Journal and Serial Holdings*, a computer-produced book that also includes serial listings of Amherst, Hampshire, Mount Holyoke and Smith College Libraries, Forbes Public Library and the Hampshire Inter-Library Center. A computer project to provide on-line access to all University serial holdings is currently in progress. The Library is a depository for U.S. government publications and also regularly receives many categories of publications from the United Nations and other international agencies and from the Commonwealth, cities, and towns of Massachusetts.

The University Library contains the major portion of the entire collection, including most of the holdings in the social sciences and humanities. The principal branch libraries are the Morrill Biological Sciences Library in the Morrill Science Center and the Physical Sciences Library in the Graduate Research Center.

A library handbook and information series is available at the reference desk of the University Library as well as in the branch libraries. Librari-

## UNIVERSITY OF MASSACHUSETTS

ans are on duty in the University Library and the two branch libraries to assist the University community in using the Library and its collections.

### HAMPSHIRE INTER-LIBRARY CENTER

The University Library is a participating member of the Hampshire Inter-Library Center, a cooperative facility for the acquisition, storage, and servicing of research materials, especially journals, documents, and scholarly sets. Incorporated in 1951 to augment library resources in the area, HILC is jointly operated by the libraries of the five Connecticut Valley colleges — Amherst, Hampshire, Mount Holyoke, Smith, and the University of Massachusetts — and the Forbes Library of Northampton, Massachusetts. The HILC collection numbers about 35,000 bound volumes, and approximately 1,000 journals are received currently. The Center is presently located in the Physical Sciences Branch Library.

### THE UNIVERSITY COMPUTING CENTER

The University Computing Center provides the computing services required to support the instruction and research activities of the faculty and students of the University. Computing services include batch, remote batch and time sharing operations. A large number of popular programming languages and an extensive library are available to the community. The time sharing system allows access to the computer from over 150 terminals located around the campus. As many as 90 simultaneous users can be accommodated. Programming languages that are available are FORTRAN, COBOL, BASIC, COMPASS, APL, SNOBOL, LISP and other special purpose languages. In addition to this, other program packages are available such as SPSS, BMDs, IMSL, SSP, Univac, MATH/STAT, etc. Users can also maintain and share their own private libraries.

In addition to the computing services, the University Computing Center offers many services including applications programming, consulting, program assistance and keypunching. Short courses in programming and various languages and the use of the various systems are offered as needed by the community. Formal full-term courses in computing techniques are offered by the Computer and Information Science Department.

The equipment of the University Computing Center consists of a Control Data Corporation

CDC Cyber 74-18 which has one CPU, 10 PPU's and 131K words of memory. Peripheral devices include disk drives, seven-track and nine-track tape drives, card readers, printers, card punch and two TEMPO-1 computers used as communications processors. Remote terminals include Teletypes and APL compatible terminals. Off-line equipment includes a plotter, keypunches, collator, reproducer, sorter and accounting machines.

### WATER RESOURCES RESEARCH CENTER

The Water Resources Research Center at the University's Amherst campus supports research in the planning and development of water and related land resources including water supply, water quality, flood control and hydropower. Areas covered include engineering, economics and hydrogeology; management and decision-making institutions; and the ecology of wetlands, rivers, lakes, and coastal waters. Through its research the Center also provides training opportunities for persons interested in master's and doctoral degrees in water resources-related fields. The Center assists the various departments in the development of new and strengthened water resources programs and courses. The Center organizes and sponsors short courses and seminars on water-related subjects of special interest.

### LABOR RELATIONS AND RESEARCH CENTER

The Labor Relations and Research Center conducts research in the field of labor relations, provides consultation services, and supports a regular program of academic course work. A Master of Science degree in Labor Studies is described elsewhere in this *Bulletin*. Inquiries should be addressed to the Director of Labor Relations and Research Center, 125 Draper Hall, University of Massachusetts, Amherst, MA 01002.

### THE MARINE STATION

The Marine Station of the University of Massachusetts is located about half way between Rockport and Gloucester on the North Shore of Cape Ann. The main laboratory building is on the end of a peninsula jutting out into Ipswich Bay. The Station is equipped essentially for marine studies, containing cultural facilities, darkrooms, instru-

ment rooms, running seawater, research offices, and a library. Further information is available from the Dean of the Graduate School.

#### THE SUBURBAN EXPERIMENT STATION

A part of the College of Food and Natural Resources, the University's Suburban Experiment Station is located in Waltham, about 10 miles west of Boston. It has 30 acres of land available for field experiments under urban/suburban conditions. Well-equipped greenhouses and laboratories for studying the effects of environmental stresses on plants are also available. Represented disciplines include plant physiology, plant pathology, entomology, plant breeding and plant genetics.

Faculty members regularly participate in graduate programs and are willing to cooperate in studies involving urban/suburban stresses.

#### DEPARTMENTS OF MILITARY AND AIR SCIENCE

Seniors and graduate students with two years of academic study remaining who are interested in becoming commissioned officers in the United States Army or United States Air Force may apply to the Department of Military Science or to the Department of Air Science, respectively, for a two-year commissioning program. Selected students receive \$100 per month and are granted Selective Service deferments. Two-year scholarships are available for qualified applicants. Those interested should consult the head of either department at least six months prior to the beginning of their final two years at the University. Early application is necessary for administrative processing. Candidates must pass an aptitude test, a physical examination, and attend a six-week summer camp.

#### UNIVERSITY OF MASSACHUSETTS ABROAD

##### FREIBURG PROGRAM

The Freiburg Program, begun in 1966-67, offers to graduate students and selected upper-division undergraduates an opportunity for a year of advanced studies in the humanities, social sciences, and arts at the University of Freiburg, Germany. Although a good command of German

is necessary for admission, the program is not restricted to students concentrating in German language and literature. However, a superior academic record is required for admission. Accepted students may enroll in a wide variety of courses at the University of Freiburg, including political science, comparative literature, philosophy, economics, music, psychology, and German language and literature.

The program is directed in Freiburg by a member of the University of Massachusetts faculty and is headquartered in the University of Massachusetts Study Center in Freiburg. The relationship between the two universities is developing into a genuine partnership, with yearly exchange of students and faculty from each institution.

Students from other colleges and universities applying to study in the Freiburg Program at the graduate level must apply to the Graduate School of the University of Massachusetts, as well as to the Office of International Programs, Whitmore Administration Building.

Basic cost of the program is estimated at \$2,000 - \$2,500 annually, including room and board, tuition and fees, but excluding international travel. Scholarships are available to outstanding students, and Fulbright scholarships may be applied to participation in the Freiburg Program. Applications and additional information are available at the Office of International Programs.

##### SUMMER PROGRAM AT FREIBURG

The Department of Germanic Languages and Literatures sponsors a six-week summer program in West Berlin and Freiburg, Germany. Courses in elementary, intermediate, and advanced German are offered, and students may earn up to 6 University of Massachusetts credits. There is a two-week period for independent travel in Europe between the initial week in Berlin and the five weeks spent in Freiburg.

The course fee for the program is \$1025. This fee covers round-trip international travel, tuition, room and board, special excursions, and lectures which supplement the basic program.

Although primarily for undergraduates, the program is open to graduate students as well. One of its aims is to offer to students enrolling in the one-year Freiburg Program the opportunity to gain greater proficiency in German prior to participation in that program.

For further information contact the Department of Germanic Languages and Literatures, Herter Hall.

## UNIVERSITY OF MASSACHUSETTS

### SUMMER PROGRAM AT OXFORD

A special group of courses in English literature is regularly offered at Trinity College, Oxford, during July and part of August. The six-week session is part of the regular Summer Session of the University of Massachusetts and awards University of Massachusetts credit. Courses are taught by Oxford faculty, with the Bodleian Library available for extensive research. Graduate and undergraduate courses are offered, subject matter varying according to the availability of specialists at Oxford and the interests of students. Evening lectures by noted authorities supplement course offerings. Students from colleges and universities other than the University of Massachusetts are also eligible. Admission requirements include 15 hours of credit in literature and good academic standing. The overall cost to the student is \$1100. There is free travel time before and after the seminar. To apply, contact Dr. Ernest Hofer, Department of English, Bartlett Hall.

### FIELD COURSE IN CULTURAL ANTHROPOLOGY ST. VINCENT, WEST INDIES

The Anthropology Department offers an eight-week field course in cultural anthropology to graduate and selected undergraduate students in anthropology. The purpose of the course is to give students a supervised introduction to cultural anthropological field work, the foundation of a professional career in anthropology.

The course is given in June and July. The first week is devoted to orientation and familiarization with the culture of St. Vincent in the capital, Kingstown. This is followed by six weeks' residence in research sites selected on the basis of both student and government interest. Research activities in the field are closely supervised by the director of the program, and students return to Kingstown periodically for brief seminars to compare and discuss their progress and problems. The final week's work, held in Kingstown, is devoted to presentation of preliminary results, evaluation, discussions with officials of Government, and planning for publication of final reports.

Costs of the program, including round-trip air transportation from New York, tuition, room and board, and program-related transportation, is about \$700 (\$850 for non-residents of Massachusetts). Limited financial aid is available. Students earn 6 University of Massachusetts credits. Fur-

ther information may be obtained from Professor T. M. Fraser, Department of Anthropology, Machmer Hall.

### FIELD PROGRAM IN ANTHROPOLOGY, EUROPE

The Anthropology Department offers a field program in anthropology open to graduate and advanced undergraduate students in anthropology. Lasting for a period of either four or seven months, the course is designed to provide serious students preparing for careers in anthropology with an extended period of field research in Europe under the guidance of an experienced field worker. The program is held each spring semester, with an option to extend the period of research through the summer available to selected participants.

Directorship of the program rotates among the faculty members of the Department's European Studies Committee. Location of the program in Europe in any given year depends upon who is directing the program. Each participant selects a field site in accordance with his interests and training, but within the country or group of countries designated by the director. The first few weeks in the field each student conducts a survey of the region in which his field is located before taking up residence at the site. Supervision of all field activities is provided by the director. All participants assemble periodically in a central location for short seminars, to discuss their problems and progress. A final seminar, during the last week of the program, is devoted to the presentation and evaluation of preliminary results.

Prerequisites for participation in the program include a working knowledge of the language required for field research, and prior course work in both field methods and in the culture area where research is to be conducted. Students interested in participation in the program should submit to the program director a proposal outlining the research they hope to accomplish. The proposal should be submitted during the fall preceding the spring in which the applicant wishes to participate in the program. A format for such a proposal, as well as additional information about the program, is available from the Chairman of the European Studies Committee, Anthropology Department, Machmer Hall.

A limited number of stipends is available to offset costs of international travel and maintenance while in the field.

## *Application Procedures for Admission and Readmission*

Holders of bachelors' degrees, from this University or from other institutions having substantially the same requirements for the bachelors' degree, are eligible to apply for admission to a program of graduate studies. Admission is only for the semester requested and cannot be guaranteed for a later date. An application may be obtained by writing to the Graduate Admissions Office, Graduate Research Center, University of Massachusetts, Amherst, MA 01002. Applications for admission, complete with supporting documentation, must be sent in duplicate to the Graduate Admissions Office so as to be received by March 1 for September or Summer Session enrollment and by October 1 for January enrollment.

Applicants can be admitted to the Graduate School in one of the following categories:

*Degree status:* students admitted as fully qualified to undertake a program toward a graduate degree.

*Provisional status:* students admitted on a provisional basis to a program. Students may enroll for a maximum of 12 credits or two consecutive enrollment periods (including Summer Session), whichever comes first. This status may not be renewed beyond the credit/time limitation regulation as stated above. At the conclusion of the Provisional status period students are either admitted to Degree status or terminated, depending upon the evaluation and recommendation by the graduate program and subject to the Graduate Dean's approval.

*Non-Degree status:* students who have a bachelors' degree and wish to take courses but do not intend to pursue a graduate degree are admitted on a limited basis for a period through the following Summer Session. Enrollment in any course is subject to the instructor's approval, and on a space-available basis. This status may be renewed upon completion of another application. Applications for this status do not require the supporting documentation specified below for Degree and Provisional status. Graduate credits earned under the Non-Degree status are normally not applicable toward a graduate degree at this University; however, up to six graduate credits may be applied toward a graduate degree if a student is later admitted to Degree status, and subject to the

recommendation by the graduate program and approval by the Dean of the Graduate School.

### REQUIREMENTS FOR ADMISSION

1. Payment of the required Application Fee (\$10, Massachusetts residents; \$25, non-residents).

2. A minimum undergraduate cumulative grade point average of 2.75 on a 4.0 grading scale.

3. A bachelor's degree or the equivalent from any college or university of recognized standing.

4. Two official transcripts of all previous college work (undergraduate and graduate). An applicant must request the registrar of all colleges previously attended to send two copies of the transcript directly to the Graduate Admissions Office. A final transcript showing that the bachelor's degree has been awarded must be received before the applicant can enroll in the Graduate School.

5. Two letters of recommendation from persons in the field of the applicant's academic major at the institution most recently attended. In some cases letters of recommendation from other persons may be more appropriate to the proposed field of study.

6. The Graduate Record Examination (GRE) Aptitude Test (required of all applicants, including foreign students). For a list of those graduate programs requiring a GRE Advanced Test refer to the Application Form. Only GRE scores taken within five years of the date of requested enrollment will be considered as fulfilling this requirement. Applicants must have transcripts of their GRE scores sent directly to the Graduate Admissions Office. Applicants for Fall admission are urged to take the GRE at the preceding November testing or earlier. The results of later testings are frequently not available before decisions on admission must be made. The Educational Testing Service, Box 955, Princeton, NJ 08540, administers the test in the United States as well as abroad. Addresses of test centers may be obtained from that organization. On this campus the test is given by the Student Development Center.

Applicants for admission to the School of Business Administration and the Department of Hotel, Restaurant, and Travel Administration are required to take the Graduate Management Admissions Test (GMAT) rather than the GRE. This test is also administered by the Educational Testing Service.

7. For foreign student requirements see section entitled *Foreign Applicants*.

8. Application procedures for the Five-College Cooperative Ph.D. Program are listed in the section entitled *Doctoral Degree Requirements*.

9. Finally, recommendation of admission by the graduate program applied for and formal acceptance by

## UNIVERSITY OF MASSACHUSETTS

the Dean of the Graduate School.

### FOREIGN APPLICANTS:

A brochure entitled "Information for Prospective Students from Other Countries" giving detailed information of use to foreign students, is available from the Graduate Admissions Office. Foreign applicants must complete their applications at least seven months prior to the registration date of the first semester of study.

The Test of English as a Foreign Language (TOEFL) is required of *all* applicants for admission to the Graduate School from countries whose native language is not English. Information about the examination may be obtained by writing:

Test of English as a Foreign Language  
Educational Testing Service  
Princeton, NJ 08540 U.S.A.

TOEFL may be waived if the applicant has attended an American college or university for a period of at least two academic years at the time the application is being considered. A score of 550 or above is *required* for admission. Students scoring between 500 and 549 who otherwise meet the requirements set by departments may be admitted provided they agree to attend, at their own expense in the summer prior to admission, a summer institute in English (such as the program of the Experiment in International Living at Putney, Vermont). All non-native-speakers of English who are admitted will be tested by the University on arrival before registration, whether or not they have submitted TOEFL. Students scoring below the established minimum will be *required* to take further work in English. The program of study of graduate students taking remedial English work is subject to limitation by the Graduate School.

Foreign applicants are normally admitted only to *Degree Status* and for *full-time study*.

*Admission of Faculty and Staff Members to Graduate Study:* A member of the faculty of the University with the rank of assistant professor or higher may not earn a graduate degree from the University; he or she may, however, do graduate work on a non-degree basis. A full-time staff member of the University may not carry more than seven credits per semester. Tuition for the first four credits and all general fees are waived.

*Readmission:* A student or applicant who falls into one of these categories must reapply:

1. An applicant who has previously been admitted to the University but did not enroll on the entrance date stated in the acceptance letter;

2. A graduate student at this University who was accepted for one degree program and wishes to apply for another program or degree; and

3. A degree candidate who has not continuously enrolled in courses or paid the Program Fee (see next section) must reapply and pay all associated fees.

## Tuition and Fees

### APPLICATION FEE

Residents of Massachusetts pay a \$10 Application Fee; non-residents pay a \$25 Application Fee.

### TUITION

All graduate students pay tuition at the following (Fall 1976) rates: Residents of Massachusetts — \$23.60 per credit hour up to \$236 per semester; non-residents — \$48.20 per credit hour up to \$482 per semester. Tuition rates will increase each semester on a graduated basis through Spring 1978, at which time Massachusetts residents will pay \$33.50 per credit hour up to \$335 per semester; non-residents will pay \$77.50 per credit hour up to \$775 per semester.

In order to register as a Massachusetts resident, a student must have on file a Certificate of Residence properly authenticated by a notary public.

Residents of other New England states may pay the in-state tuition rate under the *New England Regional Student Program*, but only if admitted to a degree program at this University that is not available at their home state university's graduate school. Inquiries should be directed to the Graduate Admissions Office.

### GENERAL FEES

(also see Medical-Surgical Section)

Graduate students enrolled for five or more credit hours are assessed approximately \$100 per semester.

This General Fee includes such facilities and services as Infirmary, Fine Arts, Campus Center, I.D. Card, and Graduate Student Senate Tax. The General Fee is **NOT** optional. Infirmary Service Fee is \$46. per semester.

Graduate students enrolled for fewer than five credit hours are assessed approximately \$30 per semester. This fee includes an I.D. card, Graduate Student Senate Tax, and one-half of the Campus Center charge.

The Summer Session tuition charges and fees are stated in the Summer Session Course Catalog.

### TUITION AND FEE CHANGE

Tuition and fees are subject to change and may be changed without prior notice.

### PROGRAM FEE

Graduate students not enrolled for any course credits but who are candidates for a degree, must pay a Program Fee of \$50 each semester until the degree for which the student has been accepted has been formally awarded. Deadline for payment of this fee is one week after the first day of classes. If a student does not pay this fee but later seeks readmission or applies for graduation, he shall pay the accumulated Program Fees plus a readmission fee of \$50. Students seeking readmission must file a written request, endorsed by the appropriate Department Head or Graduate Program Director, with the Graduate Dean.

### COMMENCEMENT FEE

There is a \$10 Commencement Fee requisite for graduation. This fee must be paid by the time a student files for graduation.

### MEDICAL-SURGICAL INSURANCE

An optional medical-surgical insurance plan supplements the care received by students at the Infirmary. It provides hospital, medical, and surgical care on a twelve-month basis for illness or injuries received during the academic year as well as holidays, summer vacation, and other times when the student is off campus. Students who register for the Fall Semester have only one opportunity to enter or reject this program each year, at the time of payment of the Fall Semester bill. It is offered on the Spring Semester bill for new spring registrants only. The fee for medical-surgical insurance is approximately \$53 per year. Married students desiring family coverage are advised to contact the Student Health Services. The cost of family coverage is an additional \$48.50 per quarter.

### STUDENT FINANCES

Students should arrive on campus with enough cash on hand to pay their tuition, fees, and insurance bills as well as room and board for at least one month after registration. Normally, this will be approximately \$500. (Students receiving financial assistance from or through the University will not receive their first checks for approximately two to three weeks after registration.)

### WAIVER OF TUITION

#### *Graduate Assistants and Fellowship Recipients*

Tuition is waived for graduate teaching and research assistants and associates and for fellowship recipients, provided that the stipend is at least \$900 per semester.

#### *Full-Time Community College Faculty*

The Trustees of the University of Massachusetts have authorized waiver of tuition, *but not fees*, for faculty members of the Massachusetts Regional Community Colleges taking courses at the University of Massachusetts, providing the faculty members have been serving full-time before taking such courses and return to full-time teaching in their Community College after completion of course work. When a faculty member who is eligible for such a tuition waiver desires to take a course at the University, his Community College President should write a memorandum certifying that he is a full-time faculty member. Such waivers will apply for the period from September 1 to the following August 31. Such faculty members must be accepted for admission by the Graduate School prior to any registration.

#### *Full-time University Faculty and Staff Members*

See section entitled Admission of Faculty and Staff Members to Graduate Study.

#### *Foreign Students*

Tuition may be waived for a number of foreign students up to a maximum of 10 percent of the foreign students in degree programs.

#### *Vietnam Veterans*

Tuition may be waived for any Vietnam veteran, as defined in the General Laws, whose service was credited to the Commonwealth. Any veteran eligible for this waiver is advised to contact the Veterans' Office, Whitmore Administration Building for further information.

### TUITION AND FEE REFUNDS

A student who leaves the University for any reason before a semester is completed, except as specified below, will be granted a pro rata refund of tuition and fees. A student who makes an advance payment and then for any reason does not attend any part of the next semester or term at the University will be given full refund of tuition and fees. A student who is involuntarily called into military service before the completion of a semester will be given pro rata refund of tuition and fees provided he receives no academic credit for work done in that semester. If academic credit is

## UNIVERSITY OF MASSACHUSETTS

given, there will be no refund. A student who is suspended or expelled from the University for disciplinary reasons forfeits all rights to a refund.

Refunds are first applied to reimburse scholarships or loan funds (up to the full amount), and any remaining amount is refunded to the student.

### REFUND SCHEDULE

#### *Regular Term*

- a. Within the first two weeks from the beginning of semester or term — (Registration Day) — 80%
- b. During the third week — 60%
- c. During the fourth week — 40%
- d. During the fifth week — 20%
- e. After the fifth week — No refund

#### *Summer Session*

- a. During the first week — 60%
- b. During the second week — 20%
- c. After the second week — No refund

### ROOM RENT

The charge varies from \$350 to \$400 per semester, depending upon the residential area. The telephone charge, where applicable, is \$20 per semester and is not optional.

### ROOM RENT REFUNDS

Room rent refunds are granted on a pro rata basis which applies for the first five weeks of the semester only. No rent refunds are granted after five weeks.

### BOARD

The cost for each semester is \$405 for 19 meals per week, \$370 for 14 meals per week, or \$330 for 10 meals per week. Food service will be available weekends on an individual purchase basis. Students may purchase individual meals on a cash basis.

### BOARD REFUNDS

Authorized refunds will be made on a pro rata basis. A student who is suspended or expelled from the University for disciplinary reasons forfeits all rights to a refund.

## Housing

The University provides a limited amount of

housing on campus for married and single graduate students. Information relating to off-campus housing should be requested from the Housing Office, Room 235, Whitmore Administration Building.

At present, one of the residence halls in the Southwest Residential College is reserved for use by unmarried graduate students. Prince House is a four-story building containing three large social-lounge areas, a recreation room, a television room, vending machines, and a snack lounge. Student bedrooms are for double occupancy only. Terms of occupancy are indicated below:

1. Space in the building will be assigned on a full-semester basis only.

2. Both American and foreign single graduate students, male or female, are admitted to the limits of available space. Each individual assignment states the amount of board and room charged. The University reserves the right to alter fees whenever necessary.

3. Residence-hall rules and regulations require that occupants assume the responsibility for damage in and to their rooms; hot plates or any other equipment for preparing hot food are expressly prohibited.

4. No assignment will be made until the \$100 Room Security Deposit has been paid. This deposit is required of all students who live in University residence halls. It is not deductible from the semester bill and can be refunded only upon notification of withdrawal or of the student's plans to move off campus, *provided* such notification is given to the Housing Office no later than forty-five days prior to registration day of each semester.

5. Upon acceptance to the Graduate School, the entering student will receive housing information and an application form. While every effort is made to comply with requests, the University reserves the right to make room assignments in accord with existing vacancies. Early applications receive preference.

### APARTMENTS FOR MARRIED STUDENTS

The University owns and manages 395 unfurnished apartment units of various sizes at three convenient locations on or near campus. A waiting list is established for entrance into University-owned housing and is maintained according to the date of application. Apartments are allocated as follows: 75% married graduate students, 20% married undergraduates, and 5% for University

use. Information on assignment procedures, apartment descriptions, and application forms may be obtained from the Married Student Housing Office, Room 235, Whitmore Administration Building.

#### OFF-CAMPUS HOUSING

A listing of off-campus apartments, houses, and rooms is maintained at the Off-Campus Housing Office for use by any person connected with the University. Due to daily changes in these rental listings and the fact that all off-campus arrangements must be made directly by the parties involved, these listings cannot be secured except by a personal visit. Information concerning off-campus housing may be obtained from the Off-Campus Housing Office, Munson Hall.

### *Fellowships, Assistantships, and Teaching Associateships*

#### UNIVERSITY FELLOWSHIPS

A limited number of unrestricted University Fellowships are awarded to graduate students on a University-wide basis by competition. They are intended to encourage and assist superior students in pursuing graduate study and in completing the requirements for graduate degrees in the minimum possible time.

The stipend is \$3000 for the academic year, payable in 4 quarterly installments from September through May. Fellowships provide for waiver of tuition, but not fees, and are not renewable beyond the second year. A recipient of a University fellowship must enroll as a full-time student.

Application can be made on forms supplied as part of the regular admissions material by the Graduate School of the University of Massachusetts. Completed applications must be submitted to the Graduate School for major department review before February 1 for the following September. Awards are announced by April 15. Applicants not currently enrolled in graduate study at the University must also have filed an application for admission to the Graduate School.

#### FEDERAL FELLOWSHIPS

The University participates in the various Federal fellowship programs sponsored by the National

Defense Education Act (NDEA), the National Science Foundation, and the National Institutes of Health. Suitable applicants are recommended by the academic departments.

#### OTHER FELLOWSHIPS

Direct fellowship awards are available from a number of foundations. Students may obtain information concerning these fellowships from the Graduate School.

#### GRADUATE ASSISTANTSHIPS AND ASSOCIATESHIPS

The University offers a number of graduate assistantships and associateships in the research and instructional programs of the various departments. Graduate assistants and associates are not required to pay tuition if their stipend is \$900 or more for the semester. A stipend of \$2400 or more over two semesters entitles the assistant to a waiver of tuition during the following Summer Session. Application for a graduate assistantship is made to the Graduate Program Director in the department involved.

#### RESEARCH ASSISTANTSHIPS

A number of research assistantships are available to qualified graduate students. These are made possible through funds provided by various industries, the Experiment Station, and research grants awarded to members of the Graduate Faculty either from sources outside the University or from funds provided by the University and administered by the Research Council. Stipends vary with the type of work and the amount of time involved, but are normally \$3600 per academic year for a 20-hour per week research assignment.

#### TEACHING ASSISTANTSHIPS

Many departments offer teaching assistantships to qualified regularly enrolled graduate students. A teaching assistant is normally required to devote 20 hours per week in preparation and teaching. The stipend is normally \$3600 per academic year.

#### TEACHING ASSOCIATESHIPS

Superior achievement and ability among a limited number of teaching assistants is recognized and rewarded by promotion to the position of Teaching Associate. The stipend for teaching associates is normally \$4000 per academic year.

UNIVERSITY OF MASSACHUSETTS

NATIONAL DIRECT LOANS AND  
THE COLLEGE WORK-STUDY PROGRAM

Graduate students may be eligible for National Direct Loans and employment under the College Work-Study Program. Loans are awarded on the basis of need and funds available; however, no student may borrow in excess of \$10,000. The repayment period and the interest do not begin until nine months after the student ends his studies. The loans bear interest at the rate of three percent per year, and repayment of principal may be extended over a ten-year period. If a borrower becomes a teacher in an elementary or secondary school or in an institution of higher education, as much as half of the loan may be forgiven at the rate of 10 percent of each year of teaching service.

Borrowers who elect to teach in certain eligible schools located in areas of primarily low-income families may qualify for cancellation of their entire obligation at the rate of 15 percent per year. Repayment may be deferred up to a total of three years while a borrower is serving in the Armed Forces, with the Peace Corps, or as a Volunteer in Service to America (VISTA). Repayment also is deferred for as long as a borrower is enrolled at an institution of higher education.

Information concerning these programs may be obtained from the Financial Aid Office, Whitmore Administration Building.

The deadline for filing an application is March 1. Applications received after this date may not receive consideration.

Programs Offered

MAJOR FIELDS IN WHICH COURSES ARE OFFERED LEADING TO THE DEGREE OF DOCTOR OF PHILOSOPHY:

|                                     |                                                |
|-------------------------------------|------------------------------------------------|
| Animal Science                      | French                                         |
| Anthropology                        | Geology                                        |
| Astronomy                           | Germanic Languages and Literatures             |
| Biochemistry                        | History                                        |
| Botany                              | Industrial Engineering and Operations Research |
| Business Administration             | Linguistics                                    |
| Chemical Engineering                | Mathematics and Statistics                     |
| Chemistry                           | Mechanical Engineering                         |
| Civil Engineering                   | Microbiology                                   |
| Communication Disorders             | Ocean Engineering                              |
| Communication Studies               | Philosophy                                     |
| Comparative Literature              | Physics                                        |
| Computer and Information Science    | Plant Pathology                                |
| Economics                           | Plant and Soil Science                         |
| Electrical and Computer Engineering | Political Science                              |
| English                             | Polymer Science and Engineering                |
| Entomology                          | Psychology                                     |
| Environmental Engineering           | Sociology                                      |
| Exercise Science                    | Spanish                                        |
| Food and Agricultural Engineering   | Sport Studies                                  |
| Food and Resource Economics         | Wildlife and Fisheries Biology                 |
| Food Science and Nutrition          | Zoology                                        |
| Forestry and Wood Technology        |                                                |

In several fields, degrees are awarded under the Five-College Cooperative Ph.D. Program: All departments in the biological sciences; Chemistry, French, Geology, Germanic Languages and Literatures, Philosophy, and Physics.

See *Education* section for concentrations of study leading to the degree of Doctor of Education.

## MAJOR FIELDS IN WHICH COURSES ARE OFFERED LEADING TO THE MASTER'S DEGREE:

|                                     |                                                |
|-------------------------------------|------------------------------------------------|
| Animal Science                      | Hotel, Restaurant and Travel Administration    |
| Anthropology                        | Industrial Engineering and Operations Research |
| Art                                 | Labor Studies                                  |
| Astronomy                           | Landscape Architecture                         |
| Biochemistry                        | Linguistics                                    |
| Botany                              | Manufacturing Engineering                      |
| Business Administration             | Marine Sciences                                |
| Chemical Engineering                | Mathematics and Statistics                     |
| Chemistry                           | Mechanical Engineering                         |
| Civil Engineering                   | Microbiology                                   |
| Classics                            | Music                                          |
| Communication Disorders             | Nursing                                        |
| Communication Studies               | Ocean Engineering                              |
| Comparative Literature              | Philosophy                                     |
| Computer and Information Science    | Physics                                        |
| Economics                           | Plant and Soil Sciences                        |
| Education                           | Plant Pathology                                |
| Electrical and Computer Engineering | Political Science                              |
| English                             | Polymer Science and Engineering                |
| Entomology                          | Psychology                                     |
| Environmental Engineering           | Public Administration                          |
| Exercise Science                    | Public Health                                  |
| Food and Agricultural Engineering   | Regional Planning                              |
| Food and Resource Economics         | Slavic Languages and Literatures               |
| Food Science and Nutrition          | Sociology                                      |
| Forestry and Wood Technology        | Spanish                                        |
| French                              | Sport Studies                                  |
| Geology                             | Theater                                        |
| Germanic Languages and Literatures  | Wildlife and Fisheries Biology                 |
| History                             | Zoology                                        |
| Home Economics                      |                                                |

DIVISION OF  
CONTINUING EDUCATION

The Division of Continuing Education serves part-time students for whom traditional or formal programs of study are not feasible. Such students' needs are met through two basic channels: Academic Extension (graduate- and undergraduate-level credit programs) and Conference Services (a flexible noncredit schedule of conferences, institutes, workshops, and seminars). The Division's main offices are located in Hills House North.

Academic Extension includes the Evening Division and special programs for off-campus credit

courses. Programs include such offerings as Project SELF, a women's program that is expanding beyond the Pioneer Valley in an attempt to provide continuing education to a vital sector of the Commonwealth's population.

The Division, through its Conference Services, assists on- and off-campus groups to arrange institutes, short courses, and workshops to be held in the Campus Center or elsewhere on the Amherst campus or, if circumstances require, off campus as well. Arrangements include budgeting, publicity, housing, meals, meeting rooms, registration, transportation, audiovisual material, and bookkeeping.

## Doctoral Degree Requirements

All requirements for any advanced degrees to be awarded at a given degree-granting period (February, May, September) must be completed by the appropriate deadline. The completed Eligibility for Degree forms must be submitted to the Graduate School by the specified deadline so that all the candidate's credentials can be certified before the degree is actually awarded. Refer to the *Guidelines for Doctoral Degree Candidates* for further detailed guidance in the preparation and completion of a program of study.

### DOCTOR OF PHILOSOPHY AND DOCTOR OF EDUCATION

The departmental Graduate Program Director is responsible for the following, all within the guidelines of the Graduate School and the candidate's school/department graduate studies program:

- a. Approving the candidate's program of courses.
- b. Approving the procedure for satisfying the language requirements, if any.
- c. Arranging for the candidate's preliminary comprehensive examination.
- d. Reporting fulfillment of the above requirements to the Head/Chairman of the Department.

As soon as the student has passed his preliminary comprehensive examination, the Department Head/Chairman or Graduate Program Director of the candidate's major department\* shall recommend to the Dean of the Graduate School the names of at least three members of the Graduate Faculty to serve as a Dissertation Committee. At least two of the Graduate Faculty so nominated shall be from the candidate's major department.\* One member shall be appointed from outside the candidate's department.\* The outside member shall, without exception, be a voting member of the Dissertation Committee.

It shall be the responsibility of the Dissertation Committee to approve the dissertation project, to supervise its execution, and to arrange for the final examination of the student. All members of the Dissertation Committee must tentatively

approve the dissertation before the final oral examination is scheduled and agree that it is time for this examination to be held. Attendance at the final oral examination is open to all members of the candidate's major department and any member of the Graduate Faculty. However, only members of the Dissertation Committee may cast votes. A unanimous vote of the Dissertation Committee is required for the student to pass the final oral examination. If, at the final examination, two members of the Dissertation Committee cast negative votes, the candidate will be informed that he has not passed the examination. If there is but one negative vote, the degree will be held up pending action of the Graduate Council.

The doctoral degree is conferred upon graduate students who have met the following requirements:

1. Successful completion of all courses and projects specified by the advisor/guidance committee within the guidelines of the candidate's school/department graduate studies program.
2. Satisfactory completion of foreign language requirements under Graduate Council policy. (These requirements are listed in the departmental sections of this *Bulletin*.)
3. Passing a preliminary comprehensive examination conducted by the major department. If the student fails the comprehensive examination he may, at the discretion of the examining committee, be permitted a second and final examination.
4. Submission of an approved dissertation prospectus to the Graduate School at least seven months prior to the Final Oral Examination (defense of dissertation).
5. Preparation of a dissertation satisfactory to the Dissertation Committee and the Department Head/Chairman.
6. Passing a final (at least partly oral) examination conducted by the Dissertation Committee. This examination shall be primarily upon, but not necessarily limited to, the candidate's dissertation. This examination cannot be scheduled until all members of the Committee and the candidate's Department Chairman or Head (or his designee) have approved the dissertation.

7. A minimum of one academic year as a full-time graduate student in residence at the University. The residence year must consist of two consecutive semesters, either a fall-spring or a spring-fall sequence. In order to qualify for full-time status, a student must be enrolled for nine or more credits per semester, either in regular graduate courses or for Doctoral Dissertation credits (900)/or in some combination of both. To be in residence he must be physically present on the campus

\*Refers to administrative entity for which degree has been authorized (i.e., department, program, school, etc.).

for some part of each week during the semester (although he need not reside or be domiciled in the Amherst area); and he may not be employed on more than a one-half time basis during the semester, either within the University or outside it.

8. The Statute of Limitations (total time period in which to earn the Ph.D. or Ed.D.) is six calendar years from acceptance into the program, or four years if the student already has a master's degree in the same field. A part-time student may be granted an additional year upon petition to his or her graduate program director and approval by the Dean of the Graduate School.

#### FIVE-COLLEGE COOPERATIVE PH.D. PROGRAM

A cooperative Ph.D. program is offered by Amherst, Hampshire, Mount Holyoke, and Smith Colleges, and the University of Massachusetts. The degree is awarded by this University, but in exceptional cases much of the work leading to it may be taken at one or another of the participating institutions. Departments authorized to offer the cooperative Ph.D. degree are: all departments in the biological sciences, Chemistry, French, Geology, German, Philosophy, and Physics.

An applicant must apply for the Five-College Cooperative Ph.D. Program through the Graduate School of the University of Massachusetts. The applicant must then secure the approval of the appropriate academic department at the University. The application then will be forwarded to the appropriate Five-College institution for its evaluation. The letter of acceptance to the applicant is sent only by the Dean of the Graduate School of the University of Massachusetts, not by the other cooperating institution.

Registration for the Five-College Cooperative Ph.D. students is handled only through the Graduate School of the University of Massachusetts.

Degrees awarded in this program will be appropriately indicated on the diploma and the permanent record card.

All requirements for the Five-College Cooperative Ph.D. degree are similar to those for the Ph.D. degree at the University except for the residency requirement. Residence in this program will apply to the institution where the dissertation work is done.

The names of the Graduate Faculty at cooperating institutions are listed at the end of this *Bulletin*.

## Doctoral Dissertation

In addition to the other requirements of the Graduate School, a candidate for the degrees Doctor of Philosophy (Ph.D.) and Doctor of Education (Ed.D.) must complete an acceptable dissertation. The dissertation qualifies for acceptance when it satisfies the following criteria: 1) It should demonstrate the candidate's intellectual competence and maturity in the field of concentration; 2) It should make an original and valid contribution to human knowledge; 3) It should be an individual achievement and the product of independent research.

Although doctoral dissertations may result from a project involving collaboration of several scholars, the individual contribution of each doctoral candidate must be substantial, clearly identified, and separately presented. Length of the dissertation is governed by the nature of its subject matter.

The dissertation in its completed form will be judged largely upon the ability of the candidate to review and make critical use of relevant literature; to formulate a problem, plan a method of attack, and work systematically toward a solution; to summarize his material or data, and draw conclusions based thereon. Scholastic attainment in writing and presenting the results of the study will be crucial. The goal of the dissertation is to make a contribution to knowledge. It should be of publishable quality.

The following rules shall be adhered to in the preparation and presentation of a dissertation:

1. The professor responsible for the direction of the student's research shall be the Chairman of the student's Dissertation Committee. Only members of the Graduate Faculty may be appointed to this committee.

2. It is the responsibility of the Chairman of the Dissertation Committee to arrange a conference with other members of the Committee and the candidate to discuss the research problem before approving the dissertation prospectus.

3. A copy of the candidate's dissertation prospectus must be signed by each member of the Dissertation Committee to indicate that the prospectus has been approved and that a conference with the candidate has been held. The signed copy of the prospectus shall then be sent to the Dean of the Graduate School, via the candidate's Graduate Program Director.

4. The Dissertation Committee is responsible for preparation of an acceptable dissertation. The dissertation must have the unanimous approval of this Committee and the approval of the Department Head or Chair-

## UNIVERSITY OF MASSACHUSETTS

man before arrangements are made for the final examination for the degree.

5. Because of the time required to give adequate consideration to the research, it is important that the dissertation be submitted to the Dissertation Committee not later than one month before the Graduate School degree granting deadlines.

6. Although different disciplines have distinctive research and presentation styles, the following recommendations should help achieve maximum uniformity:

a. The MLA Style Sheet (revised edition) is the recommended standard. However, any school, college, or department may specify substitute standards agreed upon in that discipline.

b. All typed copies of theses or dissertations must be on plain, white, quality rag paper, not less than 20-pound weight and 8½ x 11" in size. This paper is available at the University Store; no substitutions may be made. All copies should be of this same weight and quality paper. (This can be arranged by supplying your copy service with the correct paper in sufficient quantity.) Margins to the left shall be 1½ inches; margins to the right, one inch.

c. Any method of reproducing duplicate copies that produces the required number of clear, neat, and permanent copies is acceptable.

d. The form of doctoral dissertations must conform to the "Instructions for Typing Theses and Dissertations" which may be found in the *Guidelines for Doctoral Degree Candidates*.

e. Since the Graduate School has every dissertation microfilmed, much attention must be paid to the finished form. Both the Dissertation Committee and the Graduate School must approve the final format and appearance.

The candidate shall submit to the Graduate School the *original* (or copy of comparable quality, subject to approval *before* presentation of completed copy by the Graduate Dean), and one copy of the dissertation. Both the original (after being microfilmed) and the copy will be sent to the Library for binding. The candidate shall submit a money order or a certified bank check of \$8 made out to the Library Binding Trust Fund to cover binding costs. The original will be deposited in the central library as an archival copy. The copy will be located in either the central library or branch library, as appropriate, for circulation. Some departments require an additional bound copy for their own file. The candidate wishing to have other copies of his dissertation bound for departmental requirements or for his own purposes, is referred to the *Guidelines for Doctoral Degree*

*Candidates*. The candidate must also provide an abstract of fewer than 600 words.

The microfilm fee of \$40 covers microfilm publication of the dissertation by University Microfilms Library Services and the publication of the abstract by them in Dissertation Abstracts.

The microfilm fee covers the cost of copyright in the author's name. If the author does not wish to have the dissertation copyrighted the microfilm fee is \$25. The dissertation will be cataloged in the Library of Congress and in the University of Massachusetts Library. Microfilm copies may be purchased from University Microfilms Library Services, Xerox Corporation, Ann Arbor, Michigan 48106. Publication by microfilm does not preclude the printing of the dissertation in whole or in part in a journal or as a monograph.

## Master's Degree Requirements

In addition to the Master of Arts (M.A.) and Master of Science (M.S.) degrees, the University also offers the following master's degrees: \*Master of Arts in Teaching (M.A.T.), Master of Business Administration (M.B.A.), Master of Science in Business Administration (M.S.B.A.), Master of Education (M.Ed.), \*Master of Fine Arts (M.F.A.), Master of Landscape Architecture (M.L.A.), Master of Music (M.M.), Master of Regional Planning (M.R.P.), Master of Science in Chemical Engineering (M.S.Ch.E.), Master of Science in Civil Engineering (M.S.C.E.), Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), Master of Science in Environmental Engineering (M.S.Envr.E.), Master of Science in Industrial Engineering and Operations Research (M.S.I.E.O.R.), Master of Science in Manufacturing Engineering (M.S.Manf.E.), Master of Science in Ocean Engineering (M.S.O.E.), Master of Science in Mechanical Engineering (M.S.M.E.), and Master of Public Administration (M.P.A.).

The basic requirements for the master's degrees are given below. Programs marked by asterisk above are described under headings below. Also consult the departmental sections for more detailed information. Refer to the *Guidelines for Master's Degree Candidates* for further detailed guidance in pursuing and completing a program of study.

1. A minimum of 30 graduate credits, of which

not more than six of grade B or better may be transferred from other institutions with the consent of the candidate's major department and approval by the Graduate Dean. Twenty-one of the 30 credits must be in the major field. If a thesis is offered, at least six credits must be earned in 700-900 series courses (at this University); if a thesis is not offered, at least 12 credits must be earned in 700-900 series courses (at this University). A minimum of half the required credits for a Master's degree in each department must be on a letter graded basis; some or all of the remaining number of credit hours toward the degree may be on a pass/fail basis, subject to the approval of the student's department. The option as to which courses may be taken on a pass/fail basis rests with the department/school rather than with the individual candidate. Transfer credits cannot be used as part of the required component of one-half credits of letter grades. No more than 10 credits may be earned by means of a thesis.

2. The Statute of Limitations (total time period in which to earn the Master's degree) is three calendar years from acceptance into the program, or (four years for the M.F.A. degree). A part-time student may be granted an additional year upon petition to his or her Graduate Program Director and approval by the Dean of the Graduate School.

3. The thesis is optional with the school or department; if one is required, however, it shall be under the supervision of a Thesis Committee. This Committee shall consist of one or more members of the Graduate Faculty appointed by the Dean of the Graduate School upon recommendation of the Head or Chairman of the Department. The thesis must be approved by the Thesis Committee and the Department Chairman or Head.

The candidate must also pass a general examination, not necessarily limited to the thesis topic, to be conducted by an examining committee of at least three members of the Graduate Faculty. The recommendation of two of the three members of the Examining Committee shall be requisite to receiving the degree. If the candidate prepares a thesis, Special Problems courses shall be limited to six credits.

4. Candidates for the Ph.D. degree may apply for the master's degree when they have fulfilled the residence and course requirements for the doctorate and the master's degree, have passed any applicable language examinations and have successfully completed the preliminary comprehensive examination for the Ph.D.

5. Foreign language requirements for the mas-

ter's degree are optional with the school or department.

6. Course credits used for fulfilling the requirements for a master's degree may not be used for fulfilling requirements for any other master's degree at this University.

#### MASTER OF ARTS IN TEACHING

This program is primarily for those who do not have adequate academic preparation nor appropriate teaching experience — but who do hold a bachelor's degree — to become effective teachers either at the secondary school or community/junior college level. The M.A.T. program leads to a terminal degree combining professional aspects of the M.Ed. degree with the academic tradition of the M.S./M.A. degree. Thirty-nine credits are required for the secondary school option, and 45 credits for the community/junior college option. A maximum of nine graduate credits of grade B or better from another accredited institution may be applied toward the degree, upon recommendation by one of the participating departments (Anthropology, Art, Botany, Chemistry, Classics, English, French, German, Physics, Public Health, and Sport Studies) and approval by the Graduate Dean.

#### MASTER OF FINE ARTS

The Master of Fine Arts degree program is particularly designed for those interested in the creative aspects of the arts and may be obtained in the Department of Art for work in the visual arts, the Department of English for work in creative writing, or the Department of Theater for work in dramatic art. The basic requirements for the degree are:

1. Sixty credits at the graduate level. Not more than 12 credits may be transferred from other institutions where the department considers it appropriate. While an interdisciplinary course of study may be arranged, the Art Department does not require that 12 credits be earned in courses outside the Art Department. No more than 18 credits may be earned for the thesis project.

2. The exact nature of the thesis project will be determined by the student's major adviser in conference with the student. It is to be understood that the student will produce a work in the creative arts. A written analysis of the work itself and of the procedures used in producing it will be required. The candidate will be asked to pass an

## UNIVERSITY OF MASSACHUSETTS

examination in the major field in addition to presenting the thesis project publicly. Applicants to the Department of Art (Studio) must submit a portfolio of slides directly to the Director of the Graduate Program.

### *Master's Thesis*

The requirements for the master's thesis are the same as those for the doctoral dissertation, listed above, with the following exceptions:

1. The Chairman or Head of the Department shall submit nominations to the Graduate Dean for a Thesis Committee. This Committee may consist of one, two, or three members, all of whom must be members of the University of Massachusetts Graduate Faculty. After the Thesis Committee has been appointed by the Graduate Dean, it shall review the candidate's proposed thesis outline. When accepted, all members shall sign a cover sheet indicating approval. The thesis outline, with the cover sheet bearing the signatures of the Committee members and the date of the Thesis Committee's meeting with the candidate, will be forwarded to the Graduate Dean by the Graduate Program Director at least four months prior to the general Master's examination (or defense of thesis).

2. The *original* (or copy of comparable quality, subject to approval *before* presentation of completed copy by the Graduate Dean) and one copy (both unbound) of the thesis are required. The candidate shall submit a money order or a certified bank check of \$8 made out to the Library Binding Trust Fund to cover binding costs. The original will be deposited in the central library as an archival copy; the copy will be placed in either the central library or branch library, as appropriate for circulation. Some departments require an additional copy of the thesis for their own files. Refer to the *Guidelines for Master's Degree Candidates* regarding having additional copies bound.

3. The thesis must be submitted along with the Eligibility for Degree form to the Graduate School by the deadline for the appropriate degree granting period.

### *Foreign Language Examinations*

Under Graduate Council policy, each academic program establishes foreign language requirements for its own advanced degree candidates. The program determines both the number of foreign languages and the level of competency required. A foreign language is defined for this requirement as a language other than the candidate's native tongue, in which there is a significant body of literature relevant to his or her academic discipline.

The levels of competency which a department may select are:

1. Advanced level.
2. Intermediate level.
3. Journal level: reading knowledge sufficient to understand journals in the language of the student's academic disciplines.
4. No foreign language competency.

A department may select any of these levels or combination of them for as many languages as it wishes. When a department selects levels one or two, the student's competency is judged by the score on the Graduate School Foreign Language Examination: The passing grade for advanced and intermediate levels is specified by the Graduate Council. Current passing levels are 600 and 450 respectively. The results are recorded on the student's transcript. When a department selects level three, the student's competency is decided by a departmental committee, but not by the Thesis or Dissertation Committee, and no entry is made on the student's permanent record card.

### *General Regulations*

1. *Course numbering system at the University of Massachusetts:*

- 001-099 Noncredit courses, nonquality point courses, entrance deficiencies, etc.
- 100-199 Undergraduate credit only: lower division.
- 200-399 Undergraduate credit only: upper division.
- 400-499 Professional courses which presume a bachelor's degree, no graduate credit.
- 500-600 Graduate credit only: parallel to 200-399.
- 700-999 For graduate students only.

700 Special Problems.

800 Master's Thesis.

900 Doctoral Dissertation.

2. *"More Restrictive" program regulations:*

Any Graduate School regulation or procedure shall *not* preclude separate degree programs from developing specific regulations or procedures which are *more* restrictive or selective.

3. *Academic average for regular standing:*

A graduate student must maintain a 2.80 overall cumulative average in all graduate courses in the major field. A student with a cumulative grade point average in the major field falling below 2.80 may be placed on academic probation. If, at the end of the ensuing semester, the cumulative average remains below 2.80, the student is subject to academic dismissal upon the recommendation of the graduate program. Only the Graduate Dean has authority to terminate/dismiss a student.

4. *Satisfactory or reasonable progress:*

A student must make satisfactory or reasonable progress towards completion of a degree program within the Statute of Limitations for that degree. A student who is not making satisfactory or reasonable progress is subject to termination upon the recommendation of the graduate program to the Dean of the Graduate School.

5. *Academic average for graduate degrees:*

In the grades which a student is offering to satisfy degree requirements, a minimum standard for satisfactory work is a B average. No degree will be awarded to a student whose cumulative average for course work earned for the degree at the University of Massachusetts is below 3.0.

6. *Maximum credit load:*

A graduate student may register for up to 15 credits during the fall and spring semesters and nine credits during the Summer Session. Any student who wishes to register for more than the maximum credit load must secure written permission from the graduate program director in the major department and secure the Graduate Dean's approval.

7. *Full-time students register for nine credits or more per semester. Part-time students register for eight credits or less per semester. Ph.D. and Ed.D. candidates may be considered full-time students regardless of the number of dissertation credits for which they register, when the major department certifies that they are working full-time on research.*

8. *Withdrawal regulations:*

a) To add, drop, or change a course, students must obtain the written approval of the instructor concerned and their faculty adviser. Signed cards

are to be filed with the Graduate Records Office.

b) Up to and including 10 academic days from the beginning of a semester a student may add, drop, or change courses without penalty; that is, no entry will be made on the student's permanent record. *No courses may be added after this date.* Signed cards are to be filed with the Graduate Records Office.

c) After period (b) but within six calendar weeks after the beginning of a semester a student may drop courses with a grade of DR (DRop) provided approval is obtained from the instructor and the student's major adviser.

d) During periods (b) and (c) a student may withdraw from the University without academic penalty. Grades of DR will be noted on the record. After six weeks, grades of WF (Withdraw Failing) or WP (Withdraw Passing) will be entered unless special permission is obtained from the Dean of the Graduate School. No student may withdraw from courses after final examinations begin.

9. *Incompletes:*

A student can obtain credit for an "incomplete" only by finishing the work of the course before the end of one calendar year from the time of enrollment in that course. At the end of that period, if a grade is not submitted, an IF (Incomplete Failure) will be recorded. The initiative in arranging for the removal of an "incomplete" rests with the student. This regulation does not apply to thesis and dissertation credits.

10. *Thesis and dissertation credits* (Thesis 800 and Dissertation 900): The required number of thesis and dissertation credits varies by program. They range up to a maximum of 10 for masters' theses and from 10 to 27 for doctoral dissertations. No student is exempt from this requirement; normal tuition rates will apply. These credits will remain "incomplete" until the thesis or dissertation has been accepted by the Graduate School at which time these credits will be converted to SAT (satisfactory).

11. *Five-college library use:*

The libraries at Amherst, Smith, Hampshire and Mount Holyoke Colleges are normally available to students from the University of Massachusetts, subject to the rules and procedures set by each library.

TRANSFER OF COURSES AND CREDITS  
TAKEN OVER AND ABOVE CREDITS  
EARNED FOR A BACHELOR'S DEGREE

An undergraduate student in the senior year at

## UNIVERSITY OF MASSACHUSETTS

any of the five-college institutions who will earn during this year more credits than needed for the bachelor's degree, may register concurrently for graduate credits at the University of Massachusetts after securing the permission of the major adviser and of the graduate course instructor. The student registers for these credits with the undergraduate registrar. The Graduate School will accept a maximum of six credits earned via this method. After completing the courses, if the student wishes to transfer them to a graduate program, the registrar should be requested to send to the Graduate School an official statement listing the courses, credits, and grades, and certifying that they were over and above those needed by the student for the bachelor's degree. The Graduate School will then record this information on a permanent record card and supply the student with transcripts bearing this legend:

"Approval given (date) to transfer the following course(s) and credits, earned over and above credits required for the bachelor's degree, toward the master's degree."

Transferring such credits does not comprise or guarantee admission to any program of the Graduate School; the normal admission procedure must still be followed.

## *Special Services Available to Graduate Students*

### GRADUATE COURSES DURING THE SUMMER

The University offers opportunity to pursue graduate studies during the summer. Details regarding courses offered, facilities for study, tuition and fees, etc., may be found in the Summer Session Bulletin, a copy of which may be obtained from the Graduate Admissions Office, Graduate Research Center, around April 15.

### HEALTH SERVICES

All students who have paid the Health Fee are eligible to receive care through the University Health Services. The provision of direct personal services to students is financed entirely by the student Health Fee. Therefore, any professional services rendered on campus by a member of the Health Services' staff is provided without addi-

tional charge. Off-campus hospitalization and surgical services can be arranged by the Health Services' staff, but the cost of this care is the responsibility of the individual student. A supplemental insurance program is available to students on an optional basis to provide coverage for most medical and surgical services not available at the Health Center. This plan also provides coverage for dependents of students. Services available at the Health Center include unlimited outpatient consultation with staff physicians and nurse practitioners backed by supporting diagnostic x-ray, laboratory, pharmacy, and physical therapy facilities. In addition, the Health Center contains 65 beds for the care of students who require hospitalization.

The outpatient clinic hours are weekdays, 8:00 a.m.-12 noon and 1:00-5:00 p.m., and for urgent problems only, Saturdays, 8:00-11:30 a.m. Appointments made with the physician of choice are encouraged, but care may be obtained on a walk-in basis. Emergency care is available 24-hours-a-day, seven days a week. Student visitors are allowed during specific hours; parents may visit at any reasonable hour.

The Mental Health Division is available to assist students with specific emotional problems and includes diagnostic and short-term treatment services. Appointments may be made by calling the Mental Health Division. In addition to direct-care services, the health program includes an active Health Education Division which attempts to involve students in programs that develop awareness of personal and community health needs. The Health Services is also concerned with matters of environmental health and safety that affect students, faculty, employees, and visitors on campus.

Each graduate student who has paid the Health Fee must fill out and submit a pre-entrance medical history and health evaluation form prior to registration. Information contained on this form will in no way affect the student's admission to the Graduate School. Students who have been under medical care prior to admission are encouraged to have their physician contact the Health Services and provide detailed reports and instructions.

All health-service program records are strictly *confidential*. No information will be released without the express written permission of the student. Students with questions concerning their health are encouraged to speak with a member of the staff.

### TEACHING IMPROVEMENT SERVICES

The Center for Instructional Resources and Improvement provides these coordinated services on the Amherst campus. Course evaluation services include questionnaire design and processing, computer display and data interpretation assistance. Teaching improvement strategies are matched to evaluation results. A wide array of teaching improvement support services are available, including videotaping, microteaching, skills training and others. Evaluation and improvement services are available to Teaching Assistants and faculty on an individual or departmental basis.

### CAREER PLANNING & PLACEMENT SERVICE

Vocational counseling with assistance in finding employment through career and occupational information, on-campus interviews, the preparation of credentials, personal resumes and recommendations is offered to aid graduate students to attain their career objectives.

### POST-DOCTORAL FELLOWS, RESEARCH ASSOCIATES AND VISITING FELLOWS

Post-Doctoral Fellows and Research Associates will be entitled to faculty privileges for the duration of their appointments at the University. Qualified scholars who desire temporarily the

privileges of the library and research facilities of the University, and who are not candidates for a degree may be appointed as Visiting Fellows (without stipend) upon petition to the Dean of the Graduate School. Such Fellows may be entitled to faculty privileges. However, use of research facilities will have to be arranged on an individual basis with the chairman or head of the department in whose area the facilities are located.

### GRADUATE STUDENT SENATE

The Graduate Student Senate serves as the representative body of graduate students at the University. It pursues policies and objectives that serve to advance the material and academic needs of the graduate community.

### NON-DISCRIMINATION POLICY

The University of Massachusetts at Amherst prohibits discrimination on the basis of race, color, sex, age, religion, national origin or handicap in any aspect of its employment, in the recruitment, admission and treatment of students and in its policies and programs, as required by Federal and State laws and regulations. Inquiries concerning these laws and regulations or their application should be addressed to the Office of the Affirmative Action Coordinator, Chancellor's Office 375 Whitmore Administration Building.

# Description of Graduate Programs

Before consulting the course descriptions listed in this section, students should become thoroughly familiar with the General Regulations governing registration for courses in the Graduate School. The regulations cover such matters as graduate credit, course numbering system, changing or dropping of courses, and requirements regarding incomplete work in a course. Students should also acquaint themselves with the requirements governing the particular degree which they wish to earn.

For description of courses numbered from 100 to 399, refer to the current Undergraduate Course and Faculty Directory of the University.

## Animal Science

### GRADUATE FACULTY

THOMAS W. FOX, *Professor and Head of the Department of Veterinary and Animal Sciences*, B.S., Massachusetts, 1949; M.S., 1950; Ph.D., Purdue, 1952.

J. ROBERT SMYTH, JR., *Professor and Graduate Program Director*, B.S., Maine, 1945; M.S., Purdue, 1947; Ph.D., 1949.

DONALD L. ANDERSON, *Professor*, B.S., Massachusetts, 1950; M.S., Connecticut, 1952; Ph.D., Cornell, 1955.

DONALD L. BLACK, *Professor*, B.S., Maine, 1954; M.S., Cornell, 1957; Ph.D., 1959.

WALLACE G. BLACK, *Professor*, B.S., Wisconsin, 1948; M.S., 1949; Ph.D., 1952.

ANTHONY BORTON, *Associate Professor*, A.B., Haverford, 1955; M.S., Michigan State, 1961; Ph.D., 1961.

RICHARD A. DAMON, JR., *Professor*, B.S., Massachusetts, 1947; M.S., Minnesota, 1949; Ph.D., 1951.

ROBERT T. DUBY, *Assistant Professor*, B.S., Massachusetts, 1962; M.S., 1965; Ph.D., 1967.

HEINRICH FENNER, *Associate Professor*, B.S., Agricultural College of Stuttgart-Hohenheim, 1951; Ph.D., 1956.

STANLEY N. GAUNT, *Professor*, B.S., Rutgers, 1938; Ph.D., North Carolina State, 1955.

GEORGE R. HOWE, *Associate Professor*, B.S., Vermont, 1957; M.S., Pennsylvania State, 1959; Ph.D., Massachusetts, 1961.

SIDNEY J. LYFORD, JR., *Associate Professor*, B.S., New Hampshire, 1958; M.S., North Carolina State, 1960; Ph.D., 1964.

JAMES B. MARCUM, *Assistant Professor*, B.S., Missouri, 1960; M.S., Cornell, 1961; M.Div., Midwestern Baptist Theological Seminary, 1965; Ph.D., Missouri, 1969.

MARTIN SEVOIAN, *Professor*, B.S., Massachusetts, 1949; V.M.D., Pennsylvania, 1953; M.S., Cornell, 1954.

RUSSELL E. SMITH, *Professor*, B.S., Massachusetts, 1938; V.M.D., Pennsylvania, 1912.

GLENN H. SNOEYENBOS, *Professor*, D.V.M., Michigan State, 1945.

OLGA M. WEINACK, *Associate Professor*, B.A., Mount Holyoke, 1946; M.S., Massachusetts, 1950.

The graduate program in the animal sciences includes studies in mammalian and avian biology, with options in (a) genetics, (b) physiology, (c) nutrition, and (d) animal diseases. Students planning to major in any one of these fields must have a strong background in biology and chemistry or mathematics, or must be prepared to remedy undergraduate deficiencies without graduate credit. The option in animal diseases is designed primarily for veterinarians but is open to others with appropriate academic training. Requirements for both the M.S. and Ph.D. degrees include courses in the animal sciences offered by the department and courses in supporting areas offered by such departments as Zoology, Chemistry, Biochemistry, Microbiology, and Statistics. Available research material includes a number of domestic species. The department requires no foreign language reading competency for the doctoral degree.

### COURSES OFFERED BY THE DEPARTMENT

(Note: 500 and 600 series courses are open to both graduate and undergraduate students; 700 and 800 series are open to graduate students only. Where prerequisites are stated, equivalent courses taken at other institutions or permission of instructor may be substituted.)

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### Genetics

#### 607. PRINCIPLES OF ANIMAL GENETICS.

The identification, transmission, expression and arrangement of the hereditary material. Emphasis on genetic principles affecting qualitatively inherited traits of animals. Permission of instructor required.

Mr. Smyth, Mr. Marcum.

#### 608. APPLIED ANIMAL GENETICS.

The mechanisms of heredity and variation in livestock and poultry; the role of selection and breeding systems in genetic improvement and their evaluation. Permission of instructor required.

Mr. Fox.

## ANTHROPOLOGY

### 704. AVIAN GENETICS.

The classical and physiological genetics of morphological traits of avian species. Emphasis on melanogenesis and characteristics involving epidermal structures.  
Permission of instructor required. Mr. Smyth.

### 705. GENETICS OF PRODUCTIVE TRAITS IN POULTRY.

Lectures and reports on the genetics of meat production and reproduction. Emphasis on the physiological genetics of fertility and embryogenesis.  
Permission of instructor required. Mr. Smyth.

### 706. QUANTITATIVE INHERITANCE AND SELECTION.

The principles of population genetics and quantitative inheritance as applied to selection for traits of economic importance in poultry; theoretical and practical considerations of breeding systems.  
Permission of instructor required. Mr. Fox.

### 707. ADVANCED ANIMAL GENETICS.

Modern research in animal breeding with emphasis on the statistical approach. Includes development of selection indexes for various farm animals, sire indexes, and breeding plans based on systems of mating.  
Prerequisite, An Sci 608. Mr. Gaunt.

## Physiology

### 520. ANIMAL PHYSIOLOGY.

An in-depth study of the different systemic organ systems of the body. Emphasis on their applied regulation in animals and man.  
*Credit, 4.* Mr. Howe.

### 521. PHYSIOLOGY OF HOMEOSTASIS.

Foundations for systemic organ physiology through the presentation of homeostatic circuits available to the living body, such as fluid, gaseous, neural, muscular, and specialized integrated mechanisms.  
Mr. Howe.

### 621. PHYSIOLOGY OF REPRODUCTION.

Comparative aspects of anatomy, embryology, endocrinology, and physiology of reproduction and lactation.  
*Credit, 4.* Mr. W. G. Black.

### 724. ADVANCED AVIAN PHYSIOLOGY.

Lectures and reports on specific problems in avian physiology.  
Permission of instructor required. Mr. Anderson, Mr. Smyth.

### 725. MAMMALIAN REPRODUCTION.

An advanced course in the comparative approach to reproductive anatomy and endocrinology. Lectures and reports with theoretical and practical consideration of current research in laboratory and domestic animals, and in primates.  
Mr. D. L. Black.

### 726. FERTILITY AND FECUNDITY.

The role of heredity, nutrition, pathology, and the environment in the determination of fertility and fecundity in mammals. Current research directed toward control of reproduction through experimental means is emphasized.  
Prerequisite, An Sci 621 or 725. Mr. W. G. Black.

## Nutrition

### 630. PRINCIPLES OF NUTRITION.

Emphasis on the basic biochemical and physiological concepts underlying the specific functions and interrelationships of the nutrients required for maintenance, production, and reproduction in both ruminants and nonruminants.  
Mr. Anderson.

## GRADUATE SCHOOL

### 734. ADVANCED AVIAN NUTRITION.

Lectures, reports, and discussions of significant research developments and theories in avian nutrition.  
Permission of instructor required. Mr. Anderson.

### 735. RUMINANT NUTRITION.

An advanced course in ruminant digestion and metabolism. Special topics selected and discussed in the light of recent and current research.  
Permission of instructor required. Mr. Fenner, Mr. Lyford.

## Animal Diseases

### 670. ANIMAL PATHOLOGY.

Introduction to the study of animal diseases; causes, development, transmission, and control. Lectures and demonstrations.  
Permission of instructor required. Mr. Smith.

### 771. DIAGNOSTIC LABORATORY TECHNIQUES.

Microbiological, histopathological, immunological, hematological techniques applicable to the diagnostic laboratory.  
*Credit, 2.*

### 772. MAMMALIAN DISEASES.

A survey of diseases of mammals, including laboratory animals. Emphasis on infectious diseases and their control. Lectures and demonstrations.  
Permission of instructor required. Mr. Harris.

### 773. AVIAN DISEASES.

A survey, with emphasis on infectious diseases and their control. Lectures and demonstrations.  
Permission of instructor required. Mr. Snoeyenbos.

### 774. HISTOPATHOLOGY.

Histological study of basic pathological processes.  
Permission of instructor required. Mr. Sevoian.

## Miscellaneous

### 661 (I). INTERMEDIATE BIOMETRY.

Design of experiments in the biological sciences. Methods of analysis of such designs, including expectations of mean squares, selection of appropriate error terms, individual and multiple comparisons, and trend analyses.  
Prerequisite, introductory course in biometrics or statistics.  
Mr. Damon.

### 662 (II). ADVANCED BIOMETRY.

Analysis of data with disproportionate subclass numbers, including the method of fitting constants, the method of weighted squares of means, absorption of equations, expectations of mean squares, and tests of hypotheses.  
Prerequisite, An Sci 661. Mr. Damon.

### 700. SPECIAL PROBLEMS.

A specific problem in some aspect of animal science not related to the candidate's thesis.  
*Credit, 3-6.*

### 751, 752. SEMINAR.

*Credit, 1 each semester.*

### 800. MASTER'S THESIS.

*Maximum credit, 10.*

### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

## Anthropology

## GRADUATE FACULTY

DONALD A. PROULX, *Associate Professor and Chairman of the Department of Anthropology, B.S., Wisconsin at Milwaukee, 1961; Ph.D., California at Berkeley, 1965.*

## UNIVERSITY OF MASSACHUSETTS

H. MARTIN WOBST, *Assistant Professor and Graduate Program Director*, B.A., Michigan, 1966; M.A., 1968; Ph.D., 1971.

GEORGE J. ARMELAGOS, *Professor*, B.A., Michigan, 1958; M.A., Colorado, 1963; Ph.D., 1968.

JOHN W. COLE, *Associate Professor*, B.A., Michigan, 1957; M.A., 1963; Ph.D., 1969.

JOHNETTA B. COLE, *Professor*, B.A., Oberlin College at Ohio, 1957; M.A., Northwestern Univ., 1959; Ph.D., 1967.

DENA F. DINCAUZE, *Assistant Professor*, B.A., Barnard, 1956; Ph.D., Harvard, 1967.

RALPH H. FAULKINGHAM, *Associate Professor*, B.A., Wheaton College, 1965; M.A., Michigan State, 1969; Ph.D., 1970.

SYLVIA HELEN FORMAN, *Assistant Professor*, B.A., California at Berkeley, 1968; M.A., 1969; Ph.D., 1972.

DAVID H. FORTIER, *Associate Professor*, B.A., Columbia, 1949; M.A., 1953; Ph.D., 1964.

THOMAS M. FRASER, JR., *Professor*, A.B., Harvard, 1949; M.A., Columbia, 1958; Ph.D., 1963.

JOEL M. HALPERN, *Professor*, B.A., Michigan, 1950; Ph.D., Columbia, 1956.

ALFRED BACON HUDSON, *Associate Professor*, B.A., California at Berkeley, 1958; Ph.D., Cornell, 1967.

ORIOI PI-SUNYER, *Professor*, B.A., Mexico City College, 1954; M.A., Harvard, 1957; Ph.D., 1962.

ZDENEK SALZMANN, *Professor*, M.A., Indiana, 1949; Ph.D., 1963.

ALAN C. SWEDLUND, *Assistant Professor*, B.A., Colorado, 1966; Ph.D., 1970.

R. BROOKE THOMAS, *Associate Professor*, B.A., Pennsylvania State, 1963; Ph.D., 1972.

RICHARD B. WOODBURY, *Professor*, B.S., Harvard, 1939; M.A., 1942; Ph.D., 1949.

Students beginning graduate work in anthropology are expected to be conversant with the field as evidenced by successful undergraduate completion of introductory course work in at least three of the four subfields of anthropology, plus at least two advanced undergraduate courses, not both in the same subfield. Students admitted without this minimum of preparation may be expected to remove any deficiencies before being granted full graduate standing.

Students working toward the Master of Arts degree in Anthropology, in addition to fulfilling the general requirements of the Graduate School for the degree, must complete and be evaluated on a core program, normally comprising four to six specified courses, that has been worked out in consultation with the student's guidance committee. The core program is tailored to meet the student's particular needs, and is normally completed in the first two to three semesters of graduate work. Students who, at the completion of their core evaluation, are recommended as qualified to complete the M.A. degree, have two options, one requiring the writing of an M.A. thesis, the other not.

## ANTHROPOLOGY

A student working toward the Doctor of Philosophy degree in Anthropology will, under the guidance of his/her committee members, prepare statements of field in three areas of specialization that reflect the student's career goals and intellectual interests. One of the statements of field normally represents the student's dissertation prospectus. After the completion and approval of the three statements of field, the student takes an oral Ph.D. Preliminary Comprehensive Examination, normally at the end of the fourth or fifth semester of graduate work. Upon successful completion of this examination, the student concentrates on the research that will provide the basis for a required dissertation. Normally, all candidates are expected to engage in fieldwork.

There is no general foreign language or tool of research requirement for degree qualification in anthropology. However, where the candidate's guidance committee deems the acquisition of certain relevant skills as necessary for the effective pursuit of his or her research and professional objectives, the student may be expected to develop satisfactory levels of competence in the use of various research tools and/or languages.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

700. SPECIAL PROBLEMS IN ANTHROPOLOGY.  
Directed individual research or reading in anthropology.  
*Credit, 1-9*

701, 702. SEMINAR.  
Each semester, guest speakers present their research findings related to one or more of anthropology's four fields to graduate students and faculty.  
*Credit, 0.*

722. ARCHAEOLOGY OF THE SOUTHWEST.  
Examination of selected problems in methodology and interpretation of the prehistory of the American Southwest. May be repeated once for credit.  
*Mr. Woodbury.*

725. ANDEAN ARCHAEOLOGY.  
Selected problems in excavation, analysis, and interpretation of Andean prehistory. Emphasis on the later stages of development of native American civilizations.  
*Mr. Proulx.*

760. SEMINAR IN EUROPEAN ANTHROPOLOGY.  
Particular attention to problems resulting from students' field investigations in Europe.

765. PROBLEMS IN FAR EASTERN ANTHROPOLOGY.  
Detailed consideration of selected, important anthropological problems and controversies in dealing with cultural and anthropological data from the Far East. China is emphasized.  
*Mr. Fortier.*

767. SOUTHEAST ASIAN ANTHROPOLOGY.  
Selected problems in Southeast Asian anthropology, such as relations between hill and valley cultures, education, economic development, and minority group problems. Major attention to the mainland.  
*Mr. Fraser, Mr. Halpern.*

770. PROBLEMS IN NORTH AMERICAN ARCHAEOLOGY.  
Selected problems in North American archaeology, emphasizing the anthropological interpretation of prehistoric data.

## ANTHROPOLOGY

779. MAT TEACHING PRACTICUM SEMINAR.  
Intended to be taken in conjunction with an MAT in Anthropology student's teaching internship or practicum.  
*Credit, 9.*
800. MASTER'S THESIS. *Credit, 6-9.*
802. RESEARCH IN ARCHAEOLOGY.  
Directed individual research in archaeology. *Credit, 1-12.*
803. RESEARCH IN PHYSICAL ANTHROPOLOGY.  
Directed individual research in physical anthropology.  
*Credit, 1-12.*
804. RESEARCH IN CULTURAL ANTHROPOLOGY.  
Directed individual research in cultural anthropology.  
*Credit, 1-12.*
805. RESEARCH IN LINGUISTIC ANTHROPOLOGY.  
Directed individual research in linguistic anthropology.  
*Credit, 1-12.*
812. SEMINAR IN SOCIAL BIOLOGY.  
The interaction of the social, biological, and ecological factors involved in various aspects of human biological and cultural diversity. Mr. Workman.
836. INDIVIDUAL AND SOCIETY.  
A cross-cultural consideration of the relationship between the individual and his society with attention to theories, methods, and empirical findings as reported in the literature of the behavioral sciences.
837. THE HISTORY OF ANTHROPOLOGICAL THEORY.  
The origin and development of anthropological theory, cultural evolution, culture history, and cultural dynamics with a primary focus on trends in American anthropology up to mid-twentieth century. Mr. Fortier.
838. CONTEMPORARY ANTHROPOLOGICAL THEORY.  
A seminar analyzing selected problems in contemporary anthropological theory. Emphasis on the structural approaches of the British and French schools.
839. SEMINAR: COMPARATIVE SOCIAL SYSTEMS.  
Individual study and discussion of types of social systems in non-literate and peasant societies; consideration of relevant anthropological theory.
840. ANTHROPOLOGY AND DEVELOPMENT.  
Tribal and traditional economic systems and the process of economic technological change. Emphasis on current problems of modernizing nations. Mr. Pi-Sunyer.
- 841, 842. THEORY AND METHOD IN SOCIAL ANTHROPOLOGY.  
A two-semester sequence devoted to structural functional analysis as developed in British social anthropology. Emphasis on method in the analysis of social and political theoretical issues.  
*Credit, 6 (3 each).* Miss Munn, Mr. Faulkingham.
845. REVOLUTION AND SOCIAL CHANGE.  
Drastic social and cultural change. Emphasis on the historical background and social contexts of political revolutions and their role in modernizing nations. Mr. Halpern.
850. SEMINAR IN COMPARATIVE SYMBOL SYSTEMS.  
Current theory and analytic method in the symbolic analysis of socio-cultural systems. Miss. Munn.
860. LANGUAGE AND CULTURE.  
Linguistic prehistory and classification; methods and interpretations of comparative linguistic analysis; linguistic methodology and "ethnoscience" approaches; the "Whorf hypothesis" and linguistic relativity. Mr. Hudson

## GRADUATE SCHOOL

961. ANTHROPOLOGY OF COMMUNICATION.  
Various communicative codes, from a biological and socio-cultural viewpoint. Mr. Salzmann.
862. LINGUISTIC ANTHROPOLOGY: THE SOCIAL DIMENSION.  
A seminar examining the phenomena, methods of investigation, and interpretation of the social correlates of linguistic usage and variability. Mr. Hudson.
868. EUROPEAN PREHISTORY.  
Analysis of the prehistoric cultures of Europe to the end of the Iron Age. Cultural evolution, and long range trends in natural and cultural adaptation emphasized. Mr. Wobst.
875. METHODS IN ANTHROPOLOGICAL RESEARCH.  
Methods of studying cultures of homogeneous and heterogeneous societies among primitive and modern peoples; emphasis on the various techniques of field work.
880. PHYSICAL ANTHROPOLOGY: THE SKELETON.  
The human skeleton considered in its functional aspects and with reference to evolution, age, and sex. Methods of osteological investigation and osteometrics. Mr. Armelagos.
882. PHYSICAL ANTHROPOLOGY OF THE LIVING.  
Techniques and applications of physical anthropology among living persons. Anthropometry, somatotyping, serology, and other descriptive methods; elements of statistical analysis. Body form and function in relation to individual constitution and racial variation. Mr. Armelagos.
883. SEMINAR IN BIOLOGICAL ANTHROPOLOGY.  
Advanced treatment of topics such as anthropological genetics, behavior genetics, growth and development adaptation.
884. HUMAN ADAPTABILITY.  
Seminar dealing with the mechanisms of human adaptation to environmental stress; emphasis on human variation. Cultural as well as biological modes of adaptation. Prerequisite, Anthro 372 or permission of instructor.
900. DOCTORAL DISSERTATION. *Credit, 10.*
- ANTHROPOLOGY COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS.  
(For either major or minor credit)
504. THE ORIGINS OF ANCIENT CIVILIZATIONS.  
A critical analysis of the archaeological data and theories pertaining to the origins and rise of civilizations in the Old World and the New.
528. IMAGES OF THE U. S. INDIAN.  
Some of the ways in which U.S. Indians have been variously perceived by social scientists, officials, "do-gooders" and novelists, from the 18th to the 20th centuries. Miss Chandler.
536. ARCHAEOLOGY OF MESOAMERICA.  
The growth of civilization in Mexico and Central America from its earliest antecedents to the Spanish Conquest, based on archaeological research. Mr. Woodbury.
538. CULTURE AND SOCIETY IN MESOAMERICA.  
The Mesoamerican culture area from the Spanish Conquest to the present. The evolution of contemporary Mesoamerican cultures, and the nature of pluralism and sociocultural integration. Mr. Pi-Sunyer.
552. RURAL AND PEASANT SOCIETIES.  
Examined from the standpoint of their population and institutions, their emerging needs, and their relation to mass society.
555. PRE-INDUSTRIAL TECHNOLOGY.  
Analysis of selected aspects of the material culture of simpler societies, past and present, in relation to social and economic aspects of culture. Mr. Woodbury.

## UNIVERSITY OF MASSACHUSETTS

### 560. PEOPLES OF EUROPE: EASTERN EUROPE AND THE U.S.S.R.

A survey of the peoples and cultures of Eastern Europe from prehistoric times to the present, stressing the role of peasants and nomads with their changing ecological adaptations. Mr. Halpern.

### 563. URBAN ANTHROPOLOGY.

Using as a point of departure the current urban condition, the origins and evolution of cities are explored in a cross-cultural framework. Emphasis on rural-urban relationships and how these have changed over time. Mr. Halpern.

### 565. PEOPLES OF EUROPE: CENTRAL EUROPE.

Anthropologically oriented examination of the culture of Central Europe, with emphasis on Czech culture. Mr. Salzmann.

### 567. PEOPLES OF EUROPE: ALPINE EUROPE.

Analysis of Alpine cultures from prehistoric through contemporary times. Cultural adaptation to environmental variations in mountainous zones and the interrelationship of mountain and lowland communities is emphasized. Mr. Cole.

### 569. CULTURES OF AUSTRALIA AND NEW GUINEA.

The ethnography of aboriginal Australia and New Guinea with emphasis on the particular problems of theory and analysis encountered in these areas. Miss. Munn.

### 570. CARIBBEAN CULTURES.

An ethnographic survey of the Greater and Lesser Antilles, emphasizing the interaction of European colonial and African cultures both historically and in respect to present economic and political problems. Mr. Fraser.

### 615. PRIMATE ANATOMY.

Structure and phylogeny of primates (prosimian, monkey, and ape) with emphasis on evolutionary trends leading to man. Laboratory work provides experience in dissection. Miss. Morbeck.

### 616. PRIMATE EVOLUTION.

Survey of primate evolution, including the evolutionary history of the prosimians, monkeys, apes and man; emphasis upon the diversification of apes and the origin of man.

### 617. PRIMATE BEHAVIOR.

Survey of primate behavior, emphasizing the adaptive behavioral complexes in field and laboratory studies of four living grades of primates: prosimians, monkeys, apes and man.

### 620. ECONOMIC ANTHROPOLOGY.

The patterns of production, distribution and consumption in traditional societies, and the social and political matrices in which these occur. Alternative theoretical approaches to selected problems. Mr. Cole.

### 621. PREHISTORIC CULTURAL ECOLOGY.

Analysis of cultural ecology approaches to the interpretation of the prehistoric record. Prerequisite, permission of instructor. Mr. Wobst.

### 625. THE ANALYSIS OF MATERIAL CULTURE OF THE HISTORIC PERIOD.

The methods and techniques of analysis of temporal and spatial distributions, technology and spatial interrelationships of several forms of material culture. Mr. Woodbury.

### 635. NATIVE AMERICAN LANGUAGES.

Survey of American Indian languages north of Mexico. Genetic classifications and Sapir's classification based on structural resemblances. Types of linguistic structure and structural restatements. Comparative work and reconstructions. Mr. Salzmann.

## ANTHROPOLOGY

### 636. POLITICAL ANTHROPOLOGY.

Anthropological approaches to the study of politics in representative bands, tribes, and states. Evaluation of several analytic instances through reading and discussing relevant political anthropological literature. Mr. Faulkingham.

### 638. ANTHROPOLOGY OF LAW AND CONFLICT.

A comparative, cross-cultural analysis of judicial institutions, socio-cultural sources and patterns of conflict and conflict resolution, and the social functions of law and legal institutions. Miss. Forman.

### 640. ANTHROPOLOGICAL PERSPECTIVES ON RELIGION RITUAL AND MYTH.

An introductory course stressing the relationship between symbolic forms and social order, and the analysis of meaning in ritual and myth. Selected theorists from Durkheim to Victor Turner and Levi-Strauss. Miss. Munn.

### 654. JUDAIC AND ETHNIC GROUPS: A CROSS-CULTURAL PERSPECTIVE.

An ethnographic survey of Judaic ethnic groups, particularly those of Eastern Europe, Israel, and North America, and mainly since the 18th century. Mr. Halpern.

### 662. ORAL FOLKLORE IN NONLITERATE SOCIETIES.

Introduction to the ethnography of oral folklore. Topical emphasis on the analysis and function of tales; geographic emphasis on Africa and North America. Mr. Salzmann.

### 663. LINGUISTIC ANTHROPOLOGY: THE COMPARATIVE DIMENSION

The methods and interpretation of comparative linguistic analysis in the field of anthropology. Prerequisite, Anthro 105 or permission of instructor. Mr. Hudson.

### 664. PROBLEMS IN ANTHROPOLOGY.

Current anthropological thought in regard to specific problems chosen from physical anthropology, archaeology, and cultural anthropology. Prerequisite, permission of instructor. Mr. Fraser.

### 667. CULTURES OF AFRICA

An intensive consideration of several representative peoples of Africa; comparison of their traditional institutions, their appearance in evolutionary perspectives, and adaptations to colonialism and neocolonialism. Prerequisite, permission of instructor. Mr. Faulkingham.

### 668. OLD WORLD PREHISTORY

The Old World prehistoric record discussed in terms of general cultural processes, and with the help of hypotheses, models, and theories developed by anthropologists and scientists. Prerequisite, Anthro 102 or permission of instructor. Mr. Wobst.

### 669. NORTH AMERICAN ARCHAEOLOGY.

An intensive survey of American Indian prehistory north of Mexico. Emphasizes the historical developmental processes in selected geographical regions. Prerequisite, Anthro 102 or permission of instructor. Mr. Woodbury.

### 670. NORTH AMERICAN INDIANS

Indian tribes with various levels of technological development and social complexity, from areas north of Mexico, in terms of their environmental context and the impact of non-Indian societies on their cultures. Prerequisite, Anthro 104. Mr. Woodbury.

### 672. HUMAN VARIATION.

Description and analysis of qualitative and quantitative biological variation and variation between human populations. Mr. Workman.

### 673. CULTURES OF SOUTHEAST ASIA.

An introduction to the history and ethnography of the cultures of Southeast Asia, as these relate to problems of general anthropological interest. Prerequisite, Anthro 104. Mr. Fraser, Mr. Hudson.

## ART

### 674. CULTURES OF THE FAR EAST.

A survey of the culture-history and ethnography of representative peoples of East Asia; peasant subcultures of traditional and contemporary China, Japan, and Korea.  
Prerequisite, permission of instructor.

Mr. Fortier.

### 675. SOUTH AMERICAN ARCHAEOLOGY.

A survey of the pre-Columbian cultures of South America and their development. Emphasis on the Andean areas.  
Prerequisite, Anthro 102 or permission of instructor.

Mr. Proulx.

### 676. THE ETHNOLOGY OF SOUTH AMERICA.

Analysis of the prehistoric, colonial, and contemporary cultures of South America; the Indian, European, and Negro peoples and how they have related to each other over the past three centuries.

Prerequisite, Anthro 104 or permission of instructor.

Mr. Proulx.

### 677. SUMMER FIELD SCHOOL IN ARCHAEOLOGY.

Practical training in archaeology. Prehistoric and Colonial sites will be excavated and instruction given in archaeological methods and techniques.

Prerequisite, Anthro 102 or equivalent.

Credit, 6. Mrs. Dincauze.

### 678. THEORY AND METHOD IN ARCHAEOLOGY.

An intensive examination into the scientific approach to modern archaeological research and the utilization of this approach for deriving and testing theories of prehistory and human behavioral patterns.

Prerequisites, Anthro 360 and permission of instructor.

### 679. CULTURAL DYNAMICS AND APPLIED ANTHROPOLOGY.

Theories of cultural process and their application to practical cross-cultural situations in administration, technical assistance, and community development.

Prerequisite, Anthro 102 or permission of instructor.

Mr. Fraser.

### 680. FIELD COURSE IN CULTURAL ANTHROPOLOGY.

A summer field course for advanced undergraduates or graduates. Supervised training in cultural anthropological research. Location varies from year to year.

Credit, 6.

### 681. QUANTITATIVE METHODS IN ANTHROPOLOGY.

Interpretation and analysis of data from all fields of anthropology. Descriptive statistics, formulation and testing of hypotheses, correlation and regression. Current trends in the methodology of anthropological research.

Mr. Workman.

### 682. HISTORY OF ARCHAEOLOGY.

Events, major sites, and men important in the development of archaeology during the 19th and 20th centuries. Emphasis on theoretical and technical advances related to the present state of archaeology.

## Art

### GRADUATE FACULTY

GEORGE WARDLAW — Painter — *Professor and Chairman of the Department of Art*, B.F.A., Memphis Academy of Arts, 1951; M.F.A., University of Mississippi, 1954.

IRIS H. CHENEY — Art Historian — *Associate Professor and Graduate Program Director in Art History*, B.A., Wellesley, 1950; M.A., 1951; Ph.D., Institute of Fine Arts, N.Y.U., 1963.

## GRADUATE SCHOOL

ARNOLD FRIEDMANN — Designer — *Professor and Graduate Program Director in Design*, B.F.A., Pratt Institute, 1953; M.S., Pratt Institute and New York University, 1960.

JAMES P. HENDRICKS — Painter — *Associate Professor and Graduate Program Director in Studio Art*, B.A., University of Arkansas, 1962; M.F.A., State University of Iowa, 1964.

CARLETON L. REED — Art Educator — *Professor and Graduate Program Director in Art Education*, B.S., New York University, 1941; M.A., Columbia, 1954; D.Ed., New York University, 1964.

FREDERICK BECKER — Printmaker — *Professor*, Otis Art Institute, Los Angeles; Diploma, Beaux Arts Institute of Design, N.Y.C., 1936. Guggenheim Fellowship, 1957.

JACK L. BENSON — Archaeologist, Art Historian — *Professor*, B.A., University of Missouri, 1941; M.A., University of Indiana, 1947; Ph.D., University of Basel, 1952.

PAUL E. BERUBE — Ceramist — *Associate Professor*, B.A., Bowdoin College, 1959; B.F.A., Rhode Island School of Design, 1961; M.F.A., University of Southern California, 1962.

JOHN J. COUGHLIN — Printmaker — *Associate Professor*, B.F.A., Rhode Island School of Design, 1954; M.S., 1961.

HANLYN DAVIES — Painter — *Associate Professor*, N.D.D., Swansea College of Art and University of Wales, 1963; A.T.D., 1964; M.F.A., Yale, 1966.

WALTER B. DENNY — Art Historian — *Associate Professor*, B.A., Oberlin, 1964; M.A., Harvard, 1964; Ph.D., 1970.

TINA FEINGOLD — Painter — *Visiting Assistant Professor*, B.A., University of Arizona, 1968; B.F.A., 1969; M.F.A., Boston University, 1971.

LEONEL GONGORA — Painter — *Associate Professor*, Diploma in Art, Washington University, 1956.

JOHN GRILLO — Painter — *Professor*, Hartford School of Fine Arts, 1935-38; Studied with Hans Hoffman, 1948-51.

CRAIG HARBISON — Art Historian — *Assistant Professor*, B.A., Oberlin, 1966; M.F.A., Princeton, 1969; Ph.D., 1972.

MARTHA J. HOPPIN — Art Historian — *Assistant Professor*, B.A., University of Michigan, 1965; M.A., Harvard, 1966; Ph.D., 1974.

WALTER KAMYS — Painter — *Professor*, Diploma in Art, Chicago Art Institute, 1943.

JERRY KEARNS — Sculptor — *Assistant Professor*, B.A., University of California, Santa Barbara, 1966; M.F.A., 1968.

TERRY KRUMM — Art Educator — *Associate Professor*, B.F.A., University of Denver, 1957; M.A., Hunter College, 1961; Ed.D., Massachusetts, 1972.

ROBERT W. MALLARY — Sculptor — *Professor*, Guggenheim Fellowship, 1964-65.

DONALD R. MATHESON — Printmaker — *Professor and Associate Chairman of Department*, B.S., United States Military Academy, 1938; M.A., University of Michigan, 1951.

## UNIVERSITY OF MASSACHUSETTS

JOSEPH MCGEE — Designer — *Associate Professor*, B.S., Philadelphia College of Art, 1962.

ANNE MOCHON — Art Historian — *Assistant Professor*, B.A., Vassar, 1964; Ph.D., Yale, 1973.

ANN NEW-SMITH — Art Historian — *Assistant Professor*, B.A., Hollins College, 1967; M.A., Boston University, 1971; Ph.D., 1975.

PAUL F. NORTON — Art Historian — *Professor*, B.A., Oberlin College, 1938; M.F.A., Princeton, 1947; Ph.D., 1952.

SUSAN E. PARKS — Ceramist — *Assistant Professor*, B.A., Mount Holyoke College, 1964; M.F.A., Massachusetts, 1968.

HERBERT S. PASTON, *Associate Professor*, B.F.A., Philadelphia College of Arts, 1952; M.A., Columbia, 1956; Ph.D., 1970.

WILLIAM J. PATTERSON — Printmaker — *Assistant Professor*, B.F.A., Hartford Art School of the University of Hartford, 1964; M.F.A., Syracuse University School of Art, 1969.

LYLE N. PERKINS — Ceramist — *Professor*, B.F.A., Alfred University, 1939; M.F.A., 1947; Ph.D., Ohio State, 1956.

NORMAN P. PHILLIPS — Sculptor — *Lecturer*, B.F.A., Massachusetts, 1972; M.F.A., 1974.

MARK W. ROSKILL — Art Historian — *Professor*, B.A., Trinity College, Cambridge, 1956; M.A., Harvard, 1957; M.F.A., Ph.D., Princeton, 1961.

JOHN A. ROY — Painter — *Professor*, B.F.A., Yale, 1957; M.F.A., 1959.

DALE D. SCHLEAPPI — Sculptor — *Associate Professor*, B.A., Pratt Institute, 1959; M.S., 1960.

MELVIN H. SMITH — Architect — *Lecturer*, B.S., Massachusetts Institute of Technology, 1954.

NELSON STEVENS, *Associate Professor of Afro-American Studies, and Adjunct Associate Professor*, B.F.A., Ohio University, 1962; M.F.A., Kent State, 1969.

JOHN F. TOWNSEND — Sculptor — *Professor*, B.S., Carroll College, 1951; M.F.A., University of Minnesota, 1959.

HUI-MING WANG — Painter — *Professor*, B.A., University of Missouri, 1949; M.A., New York University, 1953.

JAMES L. WOZNIAK — Ceramist — *Professor*, B.S., University of Wisconsin, 1954, M.S., 1955; M.F.A., 1958.

## MASTER OF ARTS IN ART HISTORY

The degree of Master of Arts in Art History is offered upon the successful completion of 30 credits and the qualifying examinations. These consist of a comprehensive examination, an examination or publishable paper in the field of special concentration, and an oral examination. Some courses may be taken for graduate credit at Amherst, Hampshire, Mount Holyoke, and Smith Colleges. Most students require two years to complete the degree. For further information write to the Director of Graduate Studies in Art History, Bartlett Hall, University of Massachusetts, Amherst, MA 01002.

## ART

### MASTER OF ARTS IN TEACHING

The Art Department offers a Master of Arts in Teaching (M.A.T.) Program in Art Education, designed for candidates who have completed an undergraduate degree in fine arts or liberal arts and who wish to prepare for teaching in elementary or secondary schools. Enrollment is limited to a small number of highly qualified candidates who have evidenced interest and success in working with young people. A minimum of 39 credits is required for graduation: 21 credits in studio art, art history and related areas, and 18 credits in the professional education area (nine credits of education courses and nine credits Student Teaching Practicum and Practicum Seminar). Students who have an adequate spread of studio experiences as undergraduates may concentrate on one or two studio areas. The program can be completed in three semesters, or during one academic year and two summers. A slide portfolio is required of all applicants.

### MASTER OF FINE ARTS IN ART

This degree program is designed for students who are committed to becoming professional artists and who want an intensive two-year, 60-hour, in-residence preparation for careers in art. There are four principal areas of study: painting, printmaking, ceramics, and sculpture. An applicant must select and qualify in one of these areas. The thesis (required) consists of a one-person exhibition supported by a written statement and other documentation, including a slide of each work in the exhibition. The candidate must also make an oral defense of the thesis.

Thirty-three to 36 credit hours are required in the major; 12-18 of these are thesis credits. Any credits over the 36 limit cannot be counted toward the M.F.A. degree in Art. The remaining 24 to 27 hours, taken in other studio areas and art history constitute the minor. In some instances, if the department chairman approves, an interdisciplinary course of study may be arranged, providing that it is consistent with the student's background and goals. Up to 18 hours of work may be taken as special problems.

Fall enrollment is necessary to assure continuity in the program. The number of graduate students that can be accepted into the studio-art program each fall is limited. Often places are filled by March 1. Therefore, application should be made early. Only those applicants who can clearly demonstrate their ability to work at a professional level need apply. There are a few openings for qualified special students, but admission to courses is on a space available basis, as degree candidates are given preference.

The normal requirements for admission to the Graduate School apply except that applicants to the M.F.A. in Art program must also submit a portfolio of slides of their work.

Application forms should be obtained from and returned to the Graduate Admissions Office by February 1. Slides should be submitted separately to the Director of the Graduate Program, Art Department, Fine Arts Center, University of Massachusetts, Amherst, MA 01002. Space is provided on the regular application form to apply for financial aid, but note that the deadline for University Fellowship applicants is February 1.

All 35 mm color transparencies *must* be submitted in 9" X 11" clear plastic viewing sheets. There must be at least 10 slides of work from the major area. In addition, slides of drawings and work closely allied to the

## ART

major direction should be included. Each slide must be labeled with name of artist, date, size, and medium. Slides of rejected candidates will be returned by April 15. Slides of accepted candidates, including those on waiting list status, will be retained by the department until admission procedures have been completed.

### MASTER OF SCIENCE IN DESIGN

A program in professional design is offered, with emphasis on interior/environmental design and related research. The two-year program is designed to provide professional education to candidates whose undergraduate background is in Art. Candidates who have a strong architectural and/or design background are encouraged to develop special interests and research. The program is interdisciplinary, encouraging work in landscape architecture, art, psychology and other related fields available at the University. A thesis project is required.

The Design Area was established as a unit of the Art Department with a strong interdisciplinary orientation, relating to the Department of Landscape Architecture and Regional Planning and other pertinent units within the University. Several faculty members told cross appointments between the Design Area of the Art Department and the Department of Landscape Architecture and Regional Planning. The program has two goals at present:

1. To provide professional education in design for students who have had a general education in liberal arts with minor emphasis in art, design, or architecture. It is designed to permit the development of individualized professional programs in design, interior/environmental design, furniture design, exhibition design, and in general the professional aspects of environmental design-related fields.
2. To provide graduates with strong background in art, design and related fields with the opportunity to develop research, specialized development and interdisciplinary work. It also provides an opportunity to qualified candidates with a professional design background to prepare for a career in teaching interior/environmental design on the college level.

**Admissions:** Candidates must meet all requirements of the Graduate School. A portfolio must be submitted to be evaluated by a special graduate admissions committee for the Design Area. Portfolio work must be submitted in the form of 35mm color slides and *MUST* be in a plastic viewing sheet. Applications and other supporting documents should be sent to the Graduate Admissions Office, Graduate Research Center and the slides should be sent directly to the Art Department. The Graduate Record Exam is required of all applicants.

**Deadline dates:** for the Summer/Fall-February 1  
for the Spring-October 1

**Requirements:** The M.S. degree in Art (Design) requires candidates to complete from 36 to 45 credits, depending upon their background and area of specialization. A thesis project of up to 10 credits is part of the total credit requirement.

**Transfer credit:** up to six graduate credits may be transferred from other institutions upon the recommendation of the Director of the Graduate Program in Design.

**Undergraduate deficiencies:** A student may be accepted into the program with the stipulation that a

## GRADUATE SCHOOL

specified number of undergraduate courses must be completed as a pre-requisite for graduate work. Such courses are not counted for graduate credit.

**Thesis and Thesis Committee:** A thesis is required in the final semester of graduate work. The design thesis may be a creative project, (design, planning, three-dimensional work, etc.) supported by written documentation, or a combination of research, written and graphic material.

A total of three copies of the thesis project must be prepared by the candidate for the University. Drawings and plans must be incorporated into a bound thesis in the form of photographs. At the time of the thesis presentation, candidates must be prepared for an oral examination (defense) concerning their thesis project.

A thesis committee consisting of a chairperson and a minimum of two or a maximum of three *graduate* faculty members must be constituted for a thesis.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

| 727. STUDIES IN MEDIEVAL ICONOGRAPHY.                                                          |                            |

## UNIVERSITY OF MASSACHUSETTS

## ART

### 733. PROBLEMS IN ISLAMIC ART AND ARCHITECTURE.

A graduate seminar dealing with a specific problem or problems in the history of Islamic art.  
Prerequisites: Art 233/533 or Art 235/535 or permission of instructor. Mr. Denny

### 734. NINETEENTH-CENTURY PAINTING & SCULPTURE.

Mr. Roskill.

### 735. ART SINCE 1880.

Mr. Roskill.

### 736. NINETEENTH-CENTURY AMERICAN ARCHITECTURE.

Mr. Norton.

### 740. PROBLEMS IN CONTEMPORARY ART.

### 771. SEMINAR IN ART OF INDIA.

Intensive study of selected aspects of the arts of South/Southeast Asia: development of the Hindu temple, impacts of one cultural system on another as seen in the Indian environment. Mr. Tartakov.

### 781. METHODS OF ART HISTORY.

Deals with the history of the discipline, its methodological orientations, and the conceptual and technical framework within which art-historical research is undertaken. Required of all M.A. candidates in Art History during the first year of graduate study.

### 793. SEMINAR IN 20TH CENTURY ARCHITECTURE.

Intensive study of particular aspects of modern architecture, such as influential personalities and important building types.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

## Creative Art

### 520. PAINTING I.

Easel painting in oil and related media, based on elementary understanding of physical properties of medium, and encouraging individual directions within limitations of sound composition. Six studio hours. Mr. Wang, Mr. Grillo.

### 522. PAINTING II.

Initial concentration on transparent water color, emphasizing control of techniques and mastery of color relationships. Further experience with opaque water color, such as gouache, casein. Six studio hours. Mr. Gongora, Mr. Wang.

### 524. PAINTING III.

Continuation of Art 520. Six studio hours.

Mr. Kamys.

### 526. PAINTING IV.

Advanced work in traditional and contemporary painting techniques and media. Includes encaustic, tempera, oil, oil-resin, acrylic polymer, synthetic media, grounds and supports. Six studio hours. Prerequisites, Art 522, 524. Mr. Hendricks.

### 530. ADVANCED DRAWING.

Investigation and development of various techniques and media. Emphasis on figure drawing. Six studio hours. Mr. Grillo, Mr. Gongora, Mr. Kamys.

### 532. ADVANCED DRAWING PROBLEMS.

Advanced work in traditional and contemporary drawing media. Independent exploration of graphic problems. Solutions to problems sought in relation to student's personal objectives. Six studio hours. Mr. Grillo.

### 540. PRINTMAKING: RELIEF I.

Techniques and aesthetic considerations of the woodblock print and related media. Emphasis on drawing and on understanding technical procedures. Six studio hours. Mr. Becker.

### 542. PRINTMAKING: INTAGLIO I.

Techniques and aesthetic considerations of etching, engraving, aquatint, and related media. Emphasis on drawing and on understanding technical procedures. Six studio hours. Mr. Patterson.

### 544. PRINTMAKING: LITHOGRAPHY I.

Techniques and aesthetic considerations of making lithographs. Emphasis on drawing and on understanding technical procedures. Six studio hours. Mr. Coughlin, Mr. Matheson.

### 546. PRINTMAKING: RELIEF II.

Advanced study of materials, techniques, and esthetic considerations relevant to relief printmaking. Six studio hours. Mr. Becker.

### 548. ART EDUCATION: METHODS AND MATERIALS I.

Methods, tools, and materials used in the public school art program, with special emphasis on the elementary school level. Required for art education majors and a prerequisite for student teaching. Six studio hours. Ms. Perry.

### 550. ART EDUCATION: METHODS AND MATERIALS II.

The literature, philosophies, procedures, and methods used in the teaching of art. Emphasis on the secondary school program. Required for art education majors and a prerequisite for student teaching. Mr. Reed.

### 554. TYPOGRAPHY I.

A studio course in typography and book design. The student selects a text, sets it in type, prints and binds at least one copy of the finished book. Six studio hours.

### 560. SCULPTURE I.

Experimentation with materials. Investigation into the nature of three-dimensional order. Individual projects. Six studio hours. Mr. Townsend, Mr. Schleappi.

### 562. SCULPTURE II.

Continuation of Art 560. Six studio hours.

Mr. Kearns.

### 564. SCULPTURE III.

A sequence of problems in direct and cast-metal sculpture, using a variety of metals, techniques, and processes. Emphasizes traditional and modern foundry methods, and includes gas and electric welding. Prerequisite, Art 562 (previously or concurrently). Six studio hours. Mr. McCaleb.

### 566. SCULPTURE IV.

Encourages development of a personal approach to sculpture and creative decisions. The student selects projects and materials of interest to himself and completes them within a classroom situation. Prerequisite, Art 564 (previously or concurrently). Six studio hours. Mr. Schleappi.

### 570. INTRODUCTION TO METALS AND FIBERS.

Introduction to materials and techniques related to design and execution of objects utilizing, or embellished by, metals, wood, enamels or fibers. Prerequisite: beginning drawing and design.

### 580. CERAMICS I.

The designing and making of pottery with the potter's wheel and related tools. One or more basic courses in creative art should be taken previously. Six studio hours. Mr. Berube, Ms. Parks, Mr. Giesmann.

## ART

582. CERAMICS II.  
Continuation of Art 580.  
Prerequisite, Art 580.  
Six studio hours.

Ms. Parks, Mr. Berube.

584. CERAMICS III.  
Creation of ceramic forms with stress on aesthetic principles rather than utility. Introduction to ceramic glaze technology and coloring media. Related ceramic history.  
Prerequisite, Art 582.  
Six studio hours.

Mr. Giesmann.

586. CERAMICS IV.  
Continuation of Art 584. Emphasis on expressive potential of clay and glazes. Advanced techniques in glaze technology. Introduction to kiln design.  
Prerequisite, Art 584.  
Six studio hours.

Ms. Parks.

588. GLASS BLOWING I.  
An introduction to the principles and techniques of glass blowing from molten mixes, emphasizing experimental form.  
Six studio hours.

Mr. Perkins.

592. LIGHT WORKSHOP.  
Introduction to the use of light as a medium of aesthetic expression. Emphasis on individual investigation into the techniques of modifying the quality of illumination.

Mr. Roy.

640. PRINTMAKING: INTAGLIO II.  
Advanced study of materials, techniques, and aesthetic considerations relevant to etching, engraving and aquatint.  
Six studio hours.

Mr. Patterson.

642. PRINTMAKING: LITHOGRAPHY II.  
Advanced study of lithography. Emphasis on the concepts and techniques of color lithography.  
Six studio hours.

Mr. Matheson.

## History of Art

505. GREEK ART.  
The sculpture, painting, and architecture of ancient Greece from Protogeometric beginnings through the Hellenistic period.

Mr. Benson.

525. EARLY MEDIEVAL ART.  
Early Christian art and the beginnings of Byzantine art in East and West; Coptic art, Barbarian and Celtic influences in northern Europe; Carolingian, Ottonian, and Anglo-Saxon art.

Ms. New-Smith.

527. ART OF THE ROMANESQUE AND GOTHIC PERIODS.  
Art of the High Middle Ages; Romanesque and Gothic art. Emphasis on architecture, monumental sculpture, and painting in western Europe.

Ms. New-Smith.

533. ISLAMIC ART AND ARCHITECTURE I.  
Art and architecture of Islamic peoples from their origins up to the Mongol invasions in the 13th century.

Mr. Denny.

533. ISLAMIC ART AND ARCHITECTURE II.  
Art and architecture of Islamic peoples from the 14th century to our time.

Mr. Denny.

545. ITALIAN ART OF THE EARLY AND HIGH RENAISSANCE (1400-1520).  
The development of Italian art and architecture of the 15th and early 16th centuries in historical context.

Mrs. Cheney.

555. ITALIAN BAROQUE ART.  
Art and architecture in Italy from 1600 to 1750, with emphasis on Rome.

Mrs. Cheney.

## GRADUATE SCHOOL

561. THE ARTS OF AFRICA, OCEANIA, AND PRE-COLUMBIAN AMERICAS.  
An introduction to the so-called "primitive arts" of traditional peoples of Africa, Oceania, and pre-Columbian Americas.

565. BAROQUE ART AND ARCHITECTURE IN NORTHERN EUROPE.  
Art and architecture in France, Flanders, Holland, Germany, and Austria from 1600 to 1750. Students are encouraged to take Art 113 or 115 before taking this course.

Mr. Harbison.

571. ART OF INDIA.  
The effect of the great Eastern religious movement on art in India and surrounding territories. Some attention to secular art and architecture in modern times.

Mr. Tartakov.

573. THE HINDU TEMPLE.  
The conception and development of the Hindu temple in South and Southeast Asia. Emphasis on the structural traditions of the regions covered.

Mr. Tartakov.

575. CHINESE PAINTING.  
Shang tomb paintings; Han, Sung, Yuan, Ming, and Ch'ing Dynasty art; and the interplay between the art of Japan and the West.

Mr. Tartakov.

577. ART OF BUDDHISM.  
The development of Buddhist arts as they spread through Central Asia into East Asia and through Southeast Asia. The influence of the changing religion on the arts.

Mr. Tartakov.

585. EUROPEAN ART, 1780-1880.  
Major developments in painting from David to Post-Impressionism in France, England, and Germany.

Ms. Mochon, Mr. Roskill.

587. MODERN ART, 1880 TO THE PRESENT.  
Emphasis on major artists such as late Cezanne and Gauguin, Picasso, Matisse, Klee, Jackson Pollock, Optical and Pop artists. Main developments of style in relation to these artists.

Ms. Mochon, Mr. Roskill.

591. MODERN ARCHITECTURE, 19TH CENTURY.  
Developments in the late 18th century and the history of the changes in style, technical advances, and aesthetic principles during the 19th century in Europe and America.

Mr. Norton.

593. MODERN ARCHITECTURE, 20TH CENTURY.  
Developments in Europe and America, including influential personalities, social and political influences, structural innovations, and aspects of city planning.

Mr. Norton.

595. AMERICAN ART.  
The earliest colonial art, the impact of later European influences, regional art of the 19th and 20th centuries, and contemporary developments.

Ms. Hoppin.

605. ART OF EARLY MEDITERRANEAN CULTURES.  
The art of high cultures of the Bronze Age: Egyptian, Mesopotamian, Aegian, Hittite, and related cultures.

Mr. Benson.

625. MEDIEVAL PAINTING.  
Early Christian to later medieval painting in Eastern and Western Europe.

Ms. New-Smith.

627. SUMPTUARY ARTS OF THE MIDDLE AGES.  
The technique, style, function, and symbolism of liturgical and secular objects in precious materials from Early Christian through Gothic periods.  
Prerequisite, Art 225 or 227 or permission of instructor.

## UNIVERSITY OF MASSACHUSETTS

### 647. ITALIAN ART OF THE LATE RENAISSANCE AND MANNERISM.

The dissolution of the High Renaissance; proto-Baroque and early Mannerist art; the courtly Mannerism of the revived feudal class after 1530; the artistic response to the Counter-Reformation. Mrs. Cheney.

### 665. ASPECTS OF BAROQUE ART IN NORTHERN EUROPE.

Selected aspects of art and architecture in France, Flanders, Holland, Germany and Austria from 1600 to 1750; a combination lecture-seminar of limited size. Mr. Harbison.

### 671, 673. GREAT THEMES IN ART HISTORY.

Central themes, issues, and problems of an important area in the history of art.

### 675, 677. MASTER OF WESTERN ART.

An intensive study of the work in the field of art. Prerequisite, permission of instructor.

### 691. SEMINAR IN ROMAN ART.

Origins and development of Roman architecture, portraiture, historical relief, painting, and mosaics. Prerequisite, Art 115 or 505, or Ancient History, or permission of instructor. Mr. Benson.

### 693. CRITICISM OF MODERN ART — SEMINAR.

Practical exercises in the evaluation of modern paintings. Discussion of the results.

### 697. ASPECTS OF AMERICAN ARCHITECTURE.

Early American architecture. Colonial architecture in its variety of forms from the first settlements to the Revolutionary War. Mr. Norton.

## Astronomy

(Five-College Cooperative Program)

### GRADUATE FACULTY

WILLIAM M. IRVINE, *Professor and Head of the Astronomy Program*, B.A., Pomona College, 1957; M.A., Harvard, 1958; Ph.D., 1961.

ARTHUR R. SWIFT, *Professor of Physics and Graduate Program Director in Physics and Astronomy*.

THOMAS T. ARNY, *Associate Professor*, B.A., Haverford, 1961; Ph.D., Arizona, 1965.

TOM R. DENNIS, *Assistant Professor* (Mount Holyoke College).

WILLIAM A. DENT, *Associate Professor*, B.S., Case Institute of Technology, 1960; M.S., University of Michigan, 1962; Ph.D., 1965.

H. MARK GOLDENBERG, *Associate Professor of Physics*.

COURTNEY P. GORDON, *Assistant Professor* (Hampshire College).

KURTIS J. GORDON, *Assistant Professor* (Hampshire College).

GEORGE S. GREENSTEIN, *Assistant Professor* (Amherst College).

EDWARD R. HARRISON, *Professor*, Graduate, Institute of Physics, England, 1949; Associate, 1956; Fellow, 1963.

G. RICHARD HUGENIN, *Professor*, B.S., Massachusetts Institute of Technology, 1959; Ph.D., Harvard, 1964.

ROBERT V. KROTKOV, *Professor of Physics*.

WALTRAUT C. SEITTER, *Professor* (Smith College).

## ASTRONOMY

NICHOLAS Z. SCOVILLE, *Assistant Professor*, B.A., Columbia University, 1967; Ph.D., 1972.

JOHN D. STRONG, *Professor Emeritus*, B.A., Kansas, 1926; Ph.D., Michigan, 1930.

EUGENE TADEMARU, *Assistant Professor*, B.S., University of Illinois, 1964; Ph.D., University of Chicago, 1969.

JOSEPH H. TAYLOR, JR., *Associate Professor*, B.A., Haverford, 1963; Ph.D., Harvard, 1968.

DAVID J. VAN BLERKOM, *Associate Professor*, B.S., City College of New York, 1963; Ph.D., Colorado, 1969.

RICHARD E. WHITE, *Assistant Professor* (Smith College).

Students entering the master's and doctor's programs in astronomy are expected to have a sound background in undergraduate physics. Previous training in astronomy is helpful but not required.

The candidate for a master's degree generally takes a normal course load during the first year. The second year is devoted principally to either research directed toward a thesis or advanced course work. Physics courses are included with astronomy courses for determination of the total graduate credits in the major field. If a thesis is offered, at least six credits must be earned in 700-900 series astronomy courses; if a thesis is not offered, 12 credits must be earned in 700-900 series astronomy courses. A general examination must be passed before the degree is awarded.

The general requirements for the Ph.D. in astronomy are those of the Graduate School. A student takes a normal load of basic courses during the first two years. After passing the qualifying examination, the student is expected to devote his major effort to research. Research problems may be in either theoretical or observational areas. There is no foreign language requirement for the Ph.D. in astronomy. The basic courses of the program are 643, 644, 730, 740, 741, and 743. In addition, students will normally take several courses from Physics 701, 702, 703, 704, 705, 706, 707, and 718.

All degree candidates are required to perform teaching in the department. Students requesting a waiver of this requirement must apply to the graduate studies committee.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY

#### 700. SPECIAL PROBLEMS

Special study in some branch of astronomy or astrophysics, either theoretical or experimental, under direction of a faculty member. May be repeated for credit. Prerequisites, permission of the Head of the Astronomy program and the directing faculty member. Credit, 1-6.

#### 730. RADIO ASTROPHYSICS

The physical theory fundamental to radio astronomy: propagation of electromagnetic waves in isotropic and anisotropic media with emphasis on plasmas, Faraday rotation, the emission and absorption of synchrotron radiation and bremsstrahlung emission, spectral lines at radio frequencies; non-thermal radio source models. Prerequisites, Physics 552 and 586. Mr. Dent.

#### 731. RADIO ASTRONOMY

An introduction to observational radio astronomy. Topics include: a brief survey of areas to which radio observations have made important contributions; antenna systems, inter-

## BIOCHEMISTRY

ferometers, radiometric systems, and other instrumentation; observing methods and techniques.

Prerequisites, Physics 552 and Math 641 or equivalent.

Mr. Huguenin.

### 740. GALACTIC AND EXTRA-GALACTIC ASTRONOMY.

The stellar density and luminosity functions as applied to the problem of galactic structure. Determination of the galactic force field from stellar motions. Spiral structure, star clusters and their stability.

Prerequisite, Physics 556.

Mr. Huguenin.

### 741. THE INTERSTELLAR MEDIUM.

Observed properties of the interstellar medium from optical and radio data: composition, distribution, and motions. Transfer of dilute radiation and its production in a rarefied gas. The dynamics of the gas as influenced by radiation and gravity.

Prerequisite, Astron 644 or permission of instructor.

Mr. Arny.

### 743. STELLAR ATMOSPHERES.

Theory of stellar atmospheres. Observational methods and observational data, formation of the continuous spectrum, line formation and curve of growth techniques in normal stars, stars with envelopes, variable stars, novae, magnetic fields in stars. Departure from local thermo-dynamic equilibrium.

Prerequisite, Astron 644.

Mr. Van Blerkom.

### 744. STELLAR STRUCTURE.

Stellar structure and evolution: energy generation and transfer in the interior of stars, convective and radiative equilibrium, the computation of stellar models and evolution of young and old stars, red giants, pulsating stars, novae, and white dwarfs.

Prerequisites, Astron 643, COINS 409, or equivalent.

Mr. Harrison.

### 745. THE SUN.

The determination of physical conditions in the solar atmosphere using the various observational data. The features of both the quiet and the active sun: granulation, limb darkening, plagues, sunspots, etc. Solar-terrestrial relationships.

Prerequisite, Astron 644.

### 746. SOLAR SYSTEM PHYSICS.

The physics and chemistry of planetary atmospheres, surfaces, and interiors. Comets, meteors, and asteroids. The solar wind, solar terrestrial relations, and the interplanetary medium. Advanced topics in mechanics applicable to astronomical problems.

Prerequisites, Physics 552 and 556 and Astron 644, or permission of instructor.

Mr. Irvine.

### 748. COSMOLOGY AND GENERAL RELATIVITY.

Observational cosmology and cosmological Principles. Background radiation and Olbers' paradox. Newtonian cosmology. General relativity, gravitational waves, relativistic cosmology, and gravitational collapse. Theories of the universe and the origin of celestial structure.

Prerequisite, Physics 585.

Mr. Harrison.

### 797, 798. SEMINAR — REVIEW OF CURRENT LITERATURE.

Discussion and review of current articles in the astronomical literature. May be repeated for credit. Required of graduate students.

*Credit, 1 each semester.*

### 850. ADVANCED TOPICS IN ASTRONOMY.

Topics of special interest not covered in regular courses.

Prerequisite, permission of instructor.

### 860. SEMINAR ON RESEARCH TOPICS IN ASTRONOMY.

Topics of current interest not covered in regular courses. Instruction via reading assignments and seminars. May be repeated for credit.

Prerequisite, permission of instructor.

*Credit, 1-3.*

## 800. MASTER'S THESIS.

*Credit, variable.*

## 900. DOCTORAL DISSERTATION.

*Credit, 18.*

## COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

### 538. TECHNIQUES OF MODERN ASTRONOMY.

An introduction to modern methods of astronomical observation and data reduction. Specific techniques of optical astronomy, radio astronomy, and space astronomy discussed and analyzed. Laboratory experiments and field observations.

Prerequisites, Physics 113 or 107.

Mr. Huguenin.

### 643. ASTROPHYSICS I.

Basic topics in astronomy and astrophysics. Gravitational equilibrium configurations, virial theorem, polytropes, hydrodynamics, thermodynamics, radiation transfer, convective and radiative equilibrium, stellar and planetary atmospheres, the equations of stellar structure. Miscellaneous topics on the physics of stellar and galactic structure.

Prerequisite, permission of instructor.

*Credit, 4. Mr. Harrison.*

### 644. ASTROPHYSICS II.

Atomic physics and opacity. Nuclear physics and nucleosynthesis in stars. Gravitational instability and star formation. Stellar evolution and electron-degenerate configurations. Gravitational collapse. Topics in plasma physics and the propagation of electromagnetic waves. Topics in magnetohydrodynamics and Alfvén waves. Dynamic and kinematic principles of cosmology and a review of the underlying physical processes.

Prerequisite, Astron 643.

*Credit, 4. Mr. Harrison.*

## RELATED COURSES

### Physics

### 701. CLASSICAL MECHANICS.

### 702. STATISTICAL PHYSICS.

### 703. INTRODUCTORY QUANTUM MECHANICS I.

### 704. INTRODUCTORY QUANTUM MECHANICS II.

### 705. METHODS OF MATHEMATICAL PHYSICS.

### 706. CLASSICAL ELECTRODYNAMICS I.

### 707. CLASSICAL ELECTRODYNAMICS II.

### 718. BASIC PHYSICS OF ATOMS AND MOLECULES.

## Biochemistry

## GRADUATE FACULTY

HENRY N. LITTLE, *Professor and Graduate Program Director*, B.S., Cornell, 1942; M.S., Wisconsin, 1946; Ph.D., 1948.

R.C. FULLER, *Professor and Head of the Department of Biochemistry*, B.A., Brown, 1947; M.A., Amherst, 1948; Ph.D., Stanford, 1952.

JOHN F. BRANDTS, *Professor of Chemistry*.

PAT W. CAMERINO, *Associate Professor and Acting Director of the Office of Grant and Contract Administration*, B.S., Kent State, 1957; Ph.D., Cornell, 1961.

MARK S. FISCHER, *Assistant Professor*, A.B., Brandeis, 1965; Ph.D., California, Berkeley, 1969.

## UNIVERSITY OF MASSACHUSETTS

MAURILLE J. FOURNIER, *Assistant Professor*, B.A., Vermont, 1962; Ph.D., Dartmouth, 1967.

ANTHONY M. GAWIENOWSKI, *Associate Professor*, B.A., Villanova, 1948; M.A., Missouri, 1953; Ph.D., 1956.

THOMAS L. MASON, *Assistant Professor*, B.S., Wisconsin, 1962; M.S., Louisiana State, 1965; Ph.D., Minnesota, 1970.

JOHN H. NORDIN, *Associate Professor*, B.S., Illinois, 1956; Ph.D., Michigan State, 1961.

TREVOR ROBINSON, *Associate Professor*, B.A., Harvard, 1950; M.A., 1951; M.S., Massachusetts, 1953; Ph.D., Cornell, 1956.

DONALD L. SCHNEIDER, *Assistant Professor*, B.A., Kalamazoo, 1963; Ph.D., Michigan State, 1969.

IRA S. SCHWARTZ, *Assistant Professor*, B.S., City College of New York, 1968; Ph.D., City University of New York, 1973.

LINDA L. SLAKEY, *Assistant Professor*, B.S., Siena Heights, 1962; Ph.D., Michigan, 1967.

EDWARD W. WESTHEAD, *Professor*, B.S., Haverford, 1951; M.S., 1952; Ph.D., Brooklyn Polytechnic, 1955.

ROBERT A. ZIMMERMANN, *Associate Professor*, B.A., Amherst, 1959; Ph.D., Massachusetts Institute of Technology, 1964.

### GENERAL INFORMATION

Candidates for the degrees of Master of Science and Doctor of Philosophy in Biochemistry are accepted for admission under the general regulations of the Graduate School. Students normally must complete the following undergraduate courses before admission to either degree program: two semesters each of organic chemistry, physical chemistry; a year of calculus, physics and biology. As part of these requirements, all students prior to their first registration must take achievement or placement exams in the areas of organic chemistry, analytical chemistry, and physical chemistry. Satisfactory completion of the admission requirements will be judged by the Graduate Study Committee of the Department on evidence of the student's undergraduate transcript and his scores on these examinations. Those students with deficiencies must remove them at the earliest possible date by taking the appropriate courses. Students may register for graduate credit courses while doing this remedial work, but no graduate credit is given for such remedial courses.

### SUMMARY OF REQUIREMENTS FOR THE PH.D. DEGREE

Upon entrance a student is assigned an adviser who will work out the first-year courses, seminar and research programs with the entering student. At the end of the first two semesters the student must have remedied any deficiencies, and have taken the equivalent of one year's graduate study in biochemistry (including laboratory work).

All students must attend regular departmental seminars. A comprehensive examination (of the research-proposal and written-comprehensive type) is required of all Ph.D. students. The Department requires that students demonstrate competence in one foreign language either through previous course work or through a Departmental examination. In addition to the comprehensive examination, all Ph.D. students must complete the preparation of a dissertation satisfactory to

## BIOCHEMISTRY

their Dissertation Committees and pass a final oral examination on that dissertation.

### SUMMARY OF REQUIREMENTS FOR THE M.S. DEGREE

Entrance requirements for the master's degree are similar to those for the Ph.D. degree. They may be fulfilled by remedial work during the first year. All students are expected to complete 30 graduate credits, no more than 10 of which may be earned by means of a thesis. A thesis, based on either laboratory or library research, is defended in an oral examination.

### GENERAL REQUIREMENTS FOR ALL GRADUATE STUDENTS

All entering candidates for either the M.S. or Ph.D. degree must participate in one or more research projects before the end of the first year of studies. It is expected that the master's degree will take two years to complete, and the Ph.D. degree two years after the award of a master's degree from this or another institution.

### CONCENTRATION IN NEUROCHEMISTRY

An interdisciplinary concentration in neurochemistry is currently being developed in conjunction with the Departments of Psychology, Zoology and Computer Science and Information. For current information contact the Graduate Program Director of the Department of Biochemistry.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY

721, 722. ADVANCED BIOCHEMICAL TECHNIQUES. A laboratory course to provide experience in isolation, identification and analysis of biochemical compounds. Prerequisite, permission of instructor.

Credit, 4(721), 3(722). Mr. Fournier.

#### 724. SPECIAL TOPICS IN BIOCHEMISTRY.

Topics of current interest which may include hormones, lipids, carbohydrates, control mechanisms, protein synthesis, membranes, nucleic acids, biochemical data analysis and protein-nucleic acid interactions. Prerequisite, Biochem 524.

#### 728. PROTEIN PHYSICAL CHEMISTRY.

The chemical, physical, and biological properties of proteins. Prerequisites, Biochem 524 and Chem 586. Mr. Brandts.

#### 729. ENZYMES.

Basic aspects of enzyme assay, preparation, kinetics, and properties. Topics of current importance such as studies on active sites, mechanisms, and controls of enzyme action. Prerequisite, Biochem 524. Mr. Westhead.

#### 731. PLANT BIOCHEMISTRY.

The chemistry and metabolism of plants with particular emphasis on higher plants. Topics such as nitrogen metabolism, photosynthesis, and the chemistry of compounds peculiar to plants. Prerequisite, Biochem 524. Mr. Robinson.

#### 800. MASTER'S THESIS.

Credit, 10.

#### 891. SEMINAR.

Required of all students. Each semester oriented around topics such as molecular biology, membranes.

Credit, 2 each semester.

## BOTANY

900. DOCTORAL DISSERTATION. *Credit, 18.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

523, 524. GENERAL BIOCHEMISTRY.  
Introductory course for students majoring in chemistry or in the biological sciences. A background for more advanced or specialized study.  
Prerequisites, Chem 166 or equivalent; second semester requires Chem 281 or equivalent. *Credit, 3 each semester.*

525, 526. BIOCHEMISTRY LABORATORY.  
Introduction to laboratory work with biochemical materials and techniques.  
Prerequisite, Chem 127 or equivalent. *Credit, 1-2.*

### COURSES NOT FOR MAJOR CREDIT (No graduate credit for students majoring in biochemistry.)

520. ELEMENTARY BIOCHEMISTRY.  
The more important facts relating to biological materials and processes. Primarily for students not eligible for Biochem 523 or 524. Not open to chemistry or biochemistry majors.  
Three class hours, one 3-hour laboratory period. *Credit, 4.*

## Botany

### GRADUATE FACULTY

CARL P. SWANSON, *Professor and Acting Head of the Department of Botany*, B.S., Massachusetts State, 1937; M.A., Harvard, 1939; Ph.D., 1941.

DAVID L. MULCAHY, *Associate Professor and Graduate Program Director*, B.A., Dartmouth, 1959; Ph.D., Vanderbilt, 1963.

PAUL E. BARRETT, *Assistant Professor*, B.S., University of New Hampshire, 1964; M.S., 1966; Ph.D., British Columbia, 1972.

DAVID W. BIERHORST, *Professor*, B.S., Tulane, 1947; M.S., 1949; Ph.D., University of Minnesota, 1952.

HOWARD E. BIGELOW, *Professor*, B.A., Oberlin, 1949; M.A., 1951; Ph.D., Michigan, 1956.

MARGARET E. BARR BIGELOW, *Professor*, B.A., British Columbia, 1950; M.A., 1952; Ph.D., Michigan, 1956.

EDWARD L. DAVIS, *Professor*, B.A., Harvard, 1951; M.S., Massachusetts, 1953; Ph.D., Washington University, 1956.

PAUL J. GODFREY, *Associate Professor*, B.S., Connecticut, 1962; Ph.D., Duke, 1969.

EDWARD J. KLEKOWSKI, JR., *Associate Professor*, B.S., 1962; M.S., N.C. State, 1964; Ph.D., University of California at Berkeley, 1968.

ROBERT B. LIVINGSTON, *Professor*, B.A., Colorado College, 1938; M.A., Duke, 1941; Ph.D., 1947.

JAMES A. LOCKHART, *Professor*, B.S., Michigan State, 1949; M.S., 1952; Ph.D., California at Los Angeles, 1954.

LIVJA RAUDZENS, *Assistant Professor*, B.A., Barnard, 1961; M.A., Columbia, 1964; Ph.D., 1967.

BERNARD RUBINSTEIN, *Assistant Professor*, B.S., Michigan State, 1960; M.S., Purdue, 1962; Ph.D., California at Berkeley, 1968.

## GRADUATE SCHOOL

RUDOLF M. SCHUSTER, *Professor*, B.S., Cornell, 1945; M.S., 1946; Ph.D., Minnesota, 1948.

OTTO L. STEIN, *Professor*, B.S., Minnesota, 1949; M.S., 1952; Ph.D., 1954.

ARTHUR I. STERN, *Associate Professor*, B.S., City College of New York, 1953; Ph.D., Brandeis, 1962.

SEYMOUR SHAPIRO, *Professor and Dean of the Faculty of Natural Sciences*, Mathematics, B.S., Michigan, 1947; Ph.D., 1953.

OSWALD TIPPO, *Commonwealth Professor*, B.S., Massachusetts, 1932; M.A., Harvard, 1933; Ph.D., 1937.

JAMES W. WALKER, *Associate Professor*, B.A., University of Texas, 1964; Ph.D., Harvard, 1970.

PETER L. WEBSTER, *Associate Professor*, B.S., University of St. Andrews, 1964; Ph.D., Western Reserve, 1968.

ROBERT T. WILCE, *Professor*, B.S., University of Scranton, 1950; M.S., Vermont, 1952; Ph.D., Michigan, 1957.

Candidates for the degrees of Master of Arts, Master of Science, and Doctor of Philosophy are accepted for admission under the general regulations of the Graduate School. Admission to advanced courses does not imply admission to candidacy for an advanced degree. Only students whose knowledge of botany and related chemical and physical sciences is considered by the Department to be adequate will be accepted as candidates for advanced degrees. Research work leading to the thesis may be selected from the fields of anatomy, cytology, ecology, morphology, morphogenesis, physiology, and taxonomy. Candidates for the degree of Master of Arts in Teaching are expected to meet all the departmental requirements of the other masters degrees.

The Botany Department normally requires candidates for the Ph.D. degree to demonstrate on the intermediate level reading knowledge of two foreign languages, one of which must be German. Choice of the second language will be made after consultation between the student and his guidance committee. Waiving of the requirement for the second language requirement may be made by consultation of the student with his guidance committee and must be approved by the departmental Degree Requirements Committee.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

700. SPECIAL PROBLEMS.  
Research not expected to terminate in a thesis; advanced study in special subjects. *Credit, 1-5 each semester.*

711, 712. ADVANCED PLANT PHYSIOLOGY.  
Selected topics in plant physiology. Lectures, laboratory, and individual conferences.  
Prerequisites, Botany 511 and permission of instructor. *Credit, 2-4 each semester.*

Miss Fulz, Mr. Lockhart, Mr. Rubinstein, Mr. Stern.

715. PLANT GROWTH REGULATORS.  
Recent advances in the field, including phytochrome, auxins, gibberellins, cytokinins, and herbicides. The mechanisms whereby these materials control plant growth and development. Possible experimental approaches.  
Prerequisites, Botany 511 and one semester of biochemistry.

Mr. Rubinstein, Mr. Marsh

## UNIVERSITY OF MASSACHUSETTS

## BOTANY

### 721. ADVANCED PLANT ECOLOGY.

Lectures, conferences, critical reading, and reports on advanced considerations of synecology and autecology.  
Prerequisite, Botany 521. Mr. Godfrey.

### 731. ADVANCED MYCOLOGY.

Systematics and ecology of the higher ascomycetes and basidiomycetes.  
Prerequisite, Botany 531 or equivalent. Credit, 4.  
Mr. H. E. Bigelow, Mrs. M. E. B. Bigelow.

### 741. ADVANCED PHYCOLOGY

Detailed study of marine and fresh-water algae. Emphasis on phylogeny, life histories, and ecology.  
Prerequisite, Botany 541 or equivalent. Mr. Wilce.

### 750. PLANT PHOTOSYNTHESIS.

Lectures and discussions of the literature on the mechanisms and requirements of photosynthesis, including the light and dark reactions and the process of photorespiration.  
Prerequisite, Botany 512 or Chem 524 or equivalent. Mr. Stern.

### 761. BIOLOGY OF LOWER PLANTS.

The use of fungi and algae as experimental organisms for investigations in physiology and genetics.  
Prerequisite, Botany 511, Zool 660, or Chem 524.  
Credit, 4. Mrs. Fulz.

### 781. ADVANCED ANGIOSPERM SYSTEMATICS.

Consideration of angiosperm systematics and evolution at an advanced level. Topics may vary from year to year. May be repeated with permission of instructor. Three class hours, one 3-hour laboratory-discussion period.  
Prerequisite, Botany 528 and Botany 581, or permission of instructor. Credit, 4. Mr. Walker.

### 800. MASTER'S THESIS.

Maximum credit, 10.

### 801. PLANT MORPHOGENESIS.

Lectures, discussions, and reading on the development of the plant body.  
Prerequisites, Botany 591, Botany 511 or equivalent.  
Mr. Shapiro, Mr. Stein.

### 825. PALYNOLOGY

Comparative morphology of modern and fossil pollen grains and spores, including development of the pollen wall. Emphasis on the taxonomic use of pollen characters for angiosperm systematics. Mr. Walker.

### 850. SEMINAR

Credit, 1 each semester; maximum credit, 6.

### 900. DOCTORAL DISSERTATION.

Credit, 18.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

### 511. INTRODUCTORY PLANT PHYSIOLOGY.

How the plant grows and feeds itself. Methods of communication among cells and organs, and between plant and environment.  
Prerequisite, 1 semester organic chemistry.  
Credit, 4. Mr. Rubinstein, Mr. Stern.

### 512. PLANT METABOLISM.

The basic metabolic processes in plants including carbohydrate metabolism, glycolysis, respiration, photosynthesis, lipid metabolism and protein synthesis. Biological as well as chemical approach. Emphasis on free energy changes and the enzymatic reactions and pathways involved.  
Credit, 4. Mr. Jennings, Mr. Marsh, Mr. Stern.

### 515. PLANT GROWTH.

Description and analysis of the physiology, kinetics, and energetics of plant growth; the methods used to study growth. Cells, tissues, whole plants, and assemblages of plants.  
Prerequisites, Botany 511 and College Physics.  
Mr. Lockhart.

### 519. ECOLOGICAL PLANT PHYSIOLOGY.

Physiology of plants in relation to the classes of problems they face and the various strategies evolved for survival and growth.  
Prerequisites, Botany 211 and one semester of differential calculus. Mr. Lockhart.

### 521. PLANT ECOLOGY

Interrelationships between plants and their environment; the structure and development of plant communities.  
Mr. Barrett, Mr. Godfrey, Mr. Mulcahy.

### 522. AUTECOLOGY.

Plant behavior in relation to the physical and biological environment. Emphasis on the ecology of individual plants.  
Prerequisites, Botany 511 and 521. Mr. Godfrey.

### 524. COASTAL PLANT ECOLOGY.

The botany and ecosystem processes along the U.S. East Coast. Emphasis on salt marshes, maritime forests and grasslands, dune strand, and the impact of modern man.  
Prerequisite, Botany 521. Mr. Godfrey.

### 526. PLANT GEOGRAPHY.

Principles governing the development and natural distribution of plants and plant communities. Special consideration of the vegetation of North America.  
Prerequisite, Botany 521.

### 528. PRINCIPLES OF EVOLUTION

Ecological phenomena through the application of genetic concepts. The adaptation of individuals, populations, and communities as functional units.  
Prerequisite, introductory botany or zoology. Mr. Mulcahy.

### 531. GENERAL MYCOLOGY

Survey of the various fungi, their life history and distribution, their significance in disease, their utilization by man.  
Mr. H. E. Bigelow, Mrs. M. E. B. Bigelow.

### 541. PHYCOLOGY

The phylogeny, taxonomy, morphology, and ecology of the major groups of marine and fresh water algae. Includes field work in both marine and fresh water environments.  
Mr. Wilce.

### 551. THE ARCHEGONIALES

The morphology, evolution, and systematics of primitive land plants. Emphasis on evolution and systematics of Bryophyta. Mr. Schuster.

### 555. EXPERIMENTAL PTERIDODOLOGY

An integrated view of physiological and genetical parameters of the pteridophyte life cycle.  
Prerequisites, Botany 240 or Zool 240, and Botany 211.  
Mr. Klekowski.

### 570. CYTOGENETICS

The correlation of genetic data with chromosome behavior, including an analysis of the mechanism of crossing over. Evolutionary considerations of changes to chromosome structure and number.  
Prerequisites, Zool 540 and a cytology course preferred.  
Mr. Swanson.

### 580. ORIGIN, EVOLUTION, AND DISTRIBUTION OF FLOWERING PLANTS.

Survey of evolutionary history of primitive flowering plants and the significance of their geographic distribution.  
Prerequisite, Botany 125 or equivalent. Recommended, Botany 581, 591.  
Credit, 4. Mr. Smith.

### 581. INTRODUCTORY ANGIOSPERM SYSTEMATICS

The evolution and systematics of flowering plants, emphasizing families and their relationships. Credit, 4. Mr. Walker.

### 591. PLANT ANATOMY.

Origin and structure of vegetative and reproductive organs of seed plants coordinated with exercises in preparation of stained slides for microscopic studies.  
Credit, 4. Mr. Berthorst.

## BUSINESS ADMINISTRATION

### 601. MORPHOGENESIS.

Lectures and laboratory exercises demonstrating the development of plant form utilizing examples from throughout the plant kingdom.  
Mr. Davis.

### 603. PLANT MORPHOLOGY.

The life cycles of various non-vascular plant taxa, the dynamics of their evolution and the interpretation of various morphological structures.

Prerequisite, Botany 100 or permission of instructor.

Credit, 4. Mrs. Bigelow, Mr. Schuster, Mr. Wilce.

### 604. PLANT MORPHOLOGY.

As 603, but vascular plant taxa.

Credit, 4. Mr. Bierhorst, Mr. Schuster.

### 611. CYTOLOGY.

Development, structure, and function of cell organelles; cell reproduction and differentiation, with reference to the behavior and role of the nucleus.

Mr. Stein, Mr. Swanson, Mr. Webster.

## COURSE NOT FOR MAJOR CREDIT

### 635. AQUATIC VASCULAR PLANTS.

Systematics, ecology, and fundamental importance of aquatic plants. For majors in Wildlife.

Two 3-hour class-laboratory periods.

Prerequisites, Botany 100 and 126.

Mr. Ahles.

## Business Administration

### GRADUATE FACULTY

GEORGE S. ODIORNE, *Professor and Dean of the School of Business Administration*, B.S., Rutgers, 1948; M.B.A., New York University, 1951; Ph.D., 1957.

JACK S. WOLF, *Professor and Associate Dean of the School of Business Administration*, B.A., Coe, 1949; M.B.A., Wharton, 1950; Ph.D., State University of Iowa, 1957.

MARY K. BARBER, *Associate Professor of Marketing and Graduate Program Director for Masters Programs*, B.S., Massachusetts State, 1944; M.A., New York University, 1948; Ph.D., 1969.

KENT B. MONROE, *Associate Professor of Marketing and Graduate Program Director of the Ph.D. Program*, B.A., Kalamazoo, 1960; M.B.A., Indiana, 1961; D.B.A., Illinois, 1968.

WYNN A. ABRANOVIC, *Associate Professor of General Business and Finance*, B.E.E., Rensselaer Polytechnic Institute, 1963; M.S., 1965; Ph.D., 1969.

JOHN W. ANDERSON, *Professor of Accounting*, B.S., Indiana University, 1949; M.B.A., 1953; C.P.A., Maine, 1952.

MORTON BACKER, *Professor of Accounting*, B.B.A., Boston University, 1939; M.Lt., University of Pittsburgh, 1950; Ph.D., 1958; C.P.A., New York and West Virginia, 1941.

JOSEPH L. BALINTFY, *Professor of General Business and Finance*, Dipl. Eng., University of Technical Sciences, 1947; Dipl. Ec., 1948; D.Eng., The Johns Hopkins University, 1962.

ALEXANDER BARGES, *Professor of General Business and Finance*, B.S., University of California, 1956; M.B.A., Northwestern, 1956; Ph.D., 1962.

TIM BORNSTEIN, *Professor of Management*, B.A., University of Louisville, 1954; J.D., Harvard, 1957.

## GRADUATE SCHOOL

BEN S. BRANCH, *Associate Professor of General Business and Finance*, B.A., Emory, 1965; M.A., Texas, 1968; M.A., Michigan, 1969; Ph.D., 1970.

MARY LOU BRYANT, *Assistant Professor of Management*, B.A., Kentucky Southern, 1967; M.B.A., Indiana, 1970; D.B.A., 1973.

VICTOR P. BUELL, *Professor of Marketing*, B.A., Pennsylvania State, 1938.

D. ANTHONY BUTTERFIELD, *Associate Professor of Management*, B.S., Yale, 1961; M.A., Michigan, 1963; Ph.D., 1968.

ARTHUR E. CARLISLE, *Professor of Management*, B.A., McGill, 1948; M.B.A., Michigan, 1963; Ph.D., 1966.

GORDON K. C. CHEN, *Associate Professor of Management*, B.S., Great China University, 1945; M.A., University of Iowa, 1950; Ph.D., 1956.

SIDNEY J. CLAUNCH, *Associate Professor of Management*, B.A., Ohio, 1949; M.B.A., Wisconsin, 1951; Ph.D., 1958.

JOHN T. CONLON, *Professor of Management*, B.B.A., Massachusetts, 1949; M.A. Connecticut, 1951; Ph.D., Michigan State, 1960.

A. WAYNE CORCORAN, *Professor*, B.S., Cornell, 1954; M.S., University of Rochester, 1960; C.P.A., State University of New York, 1960; Ph.D., 1966.

CARL DENNLER, JR., *Professor of Accounting*, B.S., University of Missouri, 1948; M.A., 1950; Ph.D., Wisconsin, 1962.

ARTHUR ELKINS, *Associate Professor and Chairman of the Department of Management*, B.B.A., Massachusetts, 1957; M.S., Columbia, 1958; D.B.A., Indiana, 1967.

FREDERICK E. FINCH, *Associate Professor of Management*, B.S., Kent State, 1961; M.B.A., 1963; D.B.A., University of Washington, 1966.

JOSEPH E. FINNERTY, *Assistant Professor of General Business and Finance*, B.S., Notre Dame, 1967; M.B.A., Michigan, 1969; Ph.D., 1974.

JOHN M. FITZGERALD, *Assistant Professor of Accounting*, B.S., U.S. Merchant Marine Academy, 1944; B.B.A., Southern Methodist, 1950; M.A., Connecticut, 1961.

DONALD G. FREDERICK, *Professor of Marketing*, B.S., Indiana, 1957; M.B.A., 1958; D.B.A., Washington University, 1964.

SAMUEL GOLDMAN, *Assistant Professor of General Business and Finance*, B.B.A., Michigan, 1960; M.B.A., Wharton (Pennsylvania), 1962; J.D., Northwestern, 1965.

MARTIN L. GOSMAN, *Associate Professor of Accounting*, B.B.A., Wisconsin, 1965; M.B.A., 1966; Ph.D., 1971; C.P.A., Wisconsin, 1972.

VAN COURT HARE, JR., *Professor of Management*, B.S., Massachusetts Institute of Technology, 1950; M.A., Columbia, 1953; Ph.D., 1961.

H. RICHARD HARTZLER, *Professor and Chairman of the Department of General Business and Finance*, B.A., Indiana, 1950; J.D., 1955.

LAWRENCE A. JOHNSON, *Associate Professor of Marketing*, B.S.B.A., Boston University, 1955; M.B.A., 1958; Ph.D., Stanford, 1970.

## UNIVERSITY OF MASSACHUSETTS

EUGENE E. KACZKA, *Professor of General Business and Finance*, B.S., Rensselaer Polytechnic Institute, 1960; M.S., 1961; Ph.D., 1966.

ANTHONY T. KRZYSTOFIK, *Professor and Chairman of the Department of Accounting*, B.S., American International College, 1952; M.A., Connecticut, 1961; C.P.A., Massachusetts, 1956.

PREM KUMAR, *Assistant Professor of Finance*, B.S., University of Delhi, India, 1965; M.S., Wisconsin, 1967; Ph.D., 1970.

RICHARD LEIFER, *Assistant Professor of Management*, A.B., California at Berkeley, 1964; M.S., 1966; Ph.D., Wisconsin, 1975.

ROBERT W. LENTILHON, *Professor of Accounting*, B.S., Rhode Island, 1949; M.B.A., Boston University, 1963; C.P.A., Massachusetts.

BERTIL LIANDER, *Associate Professor of Marketing*, Undergraduate, Schartau College, 1948; M.B.A., Stockholm School of Economics, 1954; Ph.D., Massachusetts, 1972.

JOSEPH A. LITTERER, *Professor of Management*, B.S., Drexel Institute of Technology, 1950; M.B.A., 1955; Ph.D., Illinois, 1959.

JOSEPH L. SARDINAS, JR., *Assistant Professor of Accounting*, B.S., Connecticut, 1969; M.B.A., 1970; Ph.D., Pennsylvania State, 1975.

## BUSINESS ADMINISTRATION

ALAN G. SAWYER, *Associate Professor of Marketing*, B.S., Maine, 1965; M.B.A., Northeastern, 1967; Ph.D., Stanford, 1970.

CHARLES D. SCHEWE, *Assistant Professor of Marketing*, B.A., Michigan, 1965; M.B.A., 1965; Ph.D., Northwestern, 1971.

SIDNEY SCHOEFFLER, *Professor of Marketing*, B.S., New York University, 1945; A.M., Pennsylvania, 1946; Ph.D., New School for Social Research, 1952; C.P.A., New Jersey, 1949.

GEORGE SCHWARTZ, *Associate Professor of Marketing*, B.A., Brooklyn College, 1943; Ph.D., Pennsylvania, 1960.

RICHARD H. SIMPSON, *Associate Professor of Accounting*, B.B.A., Massachusetts, 1958; M.B.A., North Carolina, 1961; Ph.D., 1967; C.P.A., North Carolina, 1964.

FRANK A. SINGER, *Professor of Accounting*, B.S., Indiana, 1948; M.B.A., 1949; D.B.A., 1955.

WENDELL R. SMITH, *Commonwealth Professor*, B.S., Iowa, 1932; M.A., 1935; Ph.D., 1941.

DONALD E. STONE, *Associate Professor of Accounting*, B.S., Lehigh, 1961; M.B.A., Wisconsin, 1952; Ph.D., 1965; C.P.A., Wisconsin, 1965.

SIDNEY C. SUFRIN, *Professor of General Business and Finance*, B.A., University of Pennsylvania; Ph.D., Ohio State, 1940.

WILLIAM B. WHISTON, *Associate Professor of General Business and Finance and Director of the Center for Business and Economic Research*, B.A., Amherst, 1943; B.D., Yale, 1947; B.S., Massachusetts Institute of Technology, 1949; M.S., Cincinnati, 1964; M.A., Harvard, 1967; Ph.D., 1972.

PARKER M. WORTHING, *Associate Professor of Marketing*, B.S., University of Maine, 1962; M.B.A., Michigan State, 1964; Ph.D., 1968.

MAX S. WORTMAN, JR., *Professor of Management*, B.S., Iowa, 1956; Ph.D., Minnesota, 1962.

STANLEY YOUNG, *Professor of Management*, B.A., Washington University, 1949; M.B.A., Pennsylvania, 1951; Ph.D., 1956.

The School of Business Administration is a fully accredited member of the American Association of Collegiate Schools of Business (AACSB). The Ph.D. and two different master's degree programs are offered.

The program of graduate courses in business administration is designed to prepare students for positions of responsibility in business, in organizations that serve business, in government, and in related fields of teaching.

## THE DOCTOR OF PHILOSOPHY DEGREE

The graduate program leading to the degree of Doctor of Philosophy in Business Administration is designed primarily for students interested in a career in college teaching, service, and research. A minimum of three years is normal for the degree. Application requirements are described below.

A minimum ATGSB score of 550 is expected, but a higher score may be necessary depending upon the applicant's previous record. A summary of the requirements for the degree follows:

1. At least two years of formal resident course study involving not less than 48 hours nor more than 72 credit-hours are required.

2. Prerequisites or foundation course work may be required depending upon the student's previous preparation at time of admission. Evaluation of this preparation will be based upon the requirements of a minimum of: 12 credits in business administration; six credits in micro- and macroeconomic theory beyond a six-credit introductory economics requirement; nine credits in mathematics, including finite mathematics, differential and integral calculus; six credits of statistics; and six credits in the behavioral sciences. Individual requirements shall be determined by the Graduate Program Director and the student's adviser.

3. Core requirements for the program include proficiency in the behavioral sciences, research methodology and statistics, and micro- and macroeconomic theory. In addition, until the dissertation proposal has been accepted, the student is required to participate in an ongoing research seminar in business administration.

4. Students are required to take a written qualifying examination measuring ability in the core areas. A common examination is administered three times a year by the graduate faculty.

5. A maximum of 12 hours of non-core doctoral courses may be taken prior to the completion of the qualifying examination requirement. In addition, all core course requirements as well as completion of the qualifying examination requirements must be met within 24 months from the date the student enters the doctoral program.

6. The student selects a field of concentration from among the following alternatives:

- a. Functional Fields.
  - i. Accounting.
  - ii. Finance.
  - iii. Industrial and Personnel Relations.
  - iv. Marketing.
  - v. Operations Management.
- b. General Fields.
  - i. Business and its Environment.
  - ii. Information and Control Systems.
  - iii. Organizational and Administrative Behavior.
  - iv. Quantitative Management Science.

In conjunction with the adviser and the Graduate Program Director, a course plan is developed to achieve the concentration desired. In addition to the selection of a major area of concentration from the alternatives listed above, the student must also designate a minor area consisting of a minimum of nine semester hours. The minor may be selected from graduate courses offered anywhere in the University.

7. Upon completion of at least 30 credits of graduate study beyond the Core requirements, the student shall take a written and oral Preliminary Comprehensive Examination, administered by the Doctoral Adviser and Doctoral Committee.

8. In conjunction with his adviser and committee, the student will develop a doctoral dissertation.

9. A Final Oral Examination, upon completion of the dissertation, is administered by the adviser and the Doctoral Committee.

10. Teaching, or the equivalent experience, is required of all candidates for the Ph.D. in Business Administration.

Fellowships, assistantships, and other financial aid

from the School of Business Administration are not available to foreign students during their first year on this campus. An application from a foreign student must be accompanied by a statement of financial sufficiency.

### MASTER'S DEGREE PROGRAMS

In accordance with the accreditation guidelines of the AACSB, the foundation for master's study within the School consists of basic course work in economics, mathematics, statistics, computer methods, organizational behavior, accounting, finance, marketing, and the social and legal environment. Any baccalaureate degree holder may apply for admission to the master's degree program of the School. Applicants holding the baccalaureate degree in business typically satisfy most of the foundation requirements. Admittees having deficiencies in any of these areas are required to complete appropriate Foundation Courses prescribed from among the following: BA600, 606, 611, 622, 650, 647, 651, 656, and 657.

All master's degree candidates are required to demonstrate proficiency in written English. To this end one faculty member devotes his time. Noncredit course work and writing counseling is available to the student. The writing requirement is aligned with the student's regular course work writing requirements.

Students seeking entry into any graduate course may be required to demonstrate eligibility for such advanced study through a qualifying examination or by other means. Graduate and 600-level prerequisite courses are open only to students meeting the usual admission requirements for graduate study.

A comprehensive examination is required of all students enrolled in master's degree programs of the School. This may be oral or written, depending upon the program involved.

Permission to present a thesis may be granted to qualified candidates enrolled in any of the masters programs. The thesis proposal must be approved by the end of the first semester of full-time graduate study. Up to nine credit hours in lieu of course credit may be allowed for a thesis. An oral comprehensive examination is required upon completion of the thesis.

Description of the requirements for the various master's degree program of the School are set forth below.

### THE MASTER OF BUSINESS ADMINISTRATION DEGREE

The M.B.A. Program is oriented toward the development of general management knowledge and skills. The requirements for this degree follow:

1. Over and above the Foundation requirements noted above, candidates for the M.B.A. degree shall satisfactorily complete 30 semester hours of approved graduate study, 24 of which must be in courses designated as exclusively for graduate students.

2. All candidates shall complete the following courses: BA 711, 756, 722, 751, 706, 742, and 752.

3. At least three electives from among the 500-, 600-, and 700-level offerings of the School are required. Other electives may be chosen with the consent of the student's adviser.

### THE MASTER OF SCIENCE IN BUSINESS ADMINISTRATION DEGREE

This is a specialized degree program having several fields of concentration. The degree requirements in the various concentrations follow:

#### 1. The M.S.B.A./Accounting Program

This program prepares students for careers in public accounting, industry, government, and teaching. It is expected that students completing the program will possess the following attributes:

- a. Ability to intelligently evaluate contemporary research.
  1. Familiarity with sources.
  2. Familiarity with research tools.
- b. Facility for correct written and oral expression.
- c. Professional level of competence in accounting theory.
  1. Appreciation of historical development of accounting thought to serve as a foundation for understanding current and developing accounting theory and practice.
  2. An appreciation of income theory including economic theories of income and alternative accounting valuation models.
  3. An appreciation of the relationship between accounting measurements and management decision models and processes.
- d. An awareness of current accounting practices and the forces that act as influences on them.

In addition to the foundation requirements described above, students not holding an undergraduate degree with a major in accounting shall take courses as prescribed by the School to provide a foundation in accounting appropriate to the student's career interests.

Candidates shall satisfactorily complete 30 semester hours of approved graduate study, 18 of which must be in courses designated as exclusively for graduate students.

The following courses are required of all candidates: BA 703, 704, 706, 712, one course in Organizational Behavior (BA 751 or 807(I), or equivalent), one course in Quantitative Methods (BA 756, 757, 805 (I), or equivalent), and BA 752.

Elective courses are chosen with the consent of the student's adviser. These may be selected so as to lead to specialization in various fields such as the following: managerial accounting, public accounting, information systems, accounting research and teaching, and institutional accounting. With the consent of the student's adviser, special programs can be arranged involving the election of courses in other departments and schools on campus.

Highly qualified non-business majors may be granted privileges of an accelerated program, at the discretion of the School.

The CPA laws in Massachusetts and some other states, permit the holder of the master's degree to substitute the degree for part of the Public Accounting experience required for the certificate.

#### 2. The M.S.B.A./Industrial and Personnel Relations Program

This program prepares students for careers in private and public organizations in personnel management, industrial relations, labor relations, and manpower affairs.

The industrial and personnel relations concentration requires a minimum of 30 semester hours of graduate study.

Prerequisites for the program are those of all master's degree programs in this School. Students must complete these prerequisites before taking related 700-level courses and before completing their master's programs. Substitutions for prerequisite requirements may be made with the consent of the adviser. No thesis is required.

The following courses are required: BA 761, 762, 763, one course in Quantitative Methods (BA 756, 757, 805(I), or equivalent), one course in Behavioral Science (BA 751, 807(I), or equivalent), and BA 752. Three industrial relations electives (nine credits) and two electives in management, economics, sociology, psychology, government, or related fields are chosen with the consent of the student's adviser.

#### 3. The M.S.B.A./Management Science Program

This program is specifically designed for individuals who are interested in the application of quantitative techniques to the problems of business and administration. It is anticipated that persons with undergraduate training in engineering, mathematics, science, business, or economics will find this program appealing.

The number of credits necessary to complete the program is dependent upon previous preparation. Depending on the number of prerequisites already fulfilled, the program may require between 30 and 51 credit hours. Thus, while it is possible to complete the program in a year, as a general rule one should plan to spend three or four semesters.

A key feature of this program is its flexibility in meeting the professional goals of the individual student. The program allows between six and eight elective courses. These electives allow the individual to develop considerable strength in specific disciplines or problem areas.

The following are required courses in the Management Science Program: BA 758, 759, 770, one course in Organizational Behavior (BA 751, 765 or 807(I), or equivalent), and BA 752.

In addition, nine credit hours of electives in Quantitative Analysis and other electives in the area of specialization are required.

An *Operations Research/Management Science Program* is administered jointly by the School of Business Administration and the department of Industrial Engineering. The program does not grant degrees (each School grants its own degrees). It is a formal recognition of long standing cooperation in an area of vital interest to both Schools.

#### 4. The M.S.B.A./Marketing Program

The program prepares students for careers in marketing administration, sales management, product management, advertising management, marketing research, or wholesale/retail enterprise.

The Marketing concentration requires a minimum of 30 semester hours of graduate study. Prerequisites for this program are those of all master's degree programs in the School of Business Administration. *A thesis is required.*

The following courses are also required: BA 722, 723, 724, 725, one course in Quantitative Methods (BA 756, 757, or 805), one course in Behavioral Science (BA 751, or 807), and BA 752. In addition, a six-credit master's thesis is required.

#### 5. The M.S.B.A./Urban and Regional Management Program

The program prepares its graduates for careers in city and state government, community relations departments of business firms, business firms con-

## BUSINESS ADMINISTRATION

cerned with real estate and/or urban problems, research consulting firms, foundations, non-profit service organizations, and educational institutions.

This program of graduate study is designed to be flexible in order to meet the needs of students with different interests and abilities. A core of quantitative methods, behavioral science and management seminars forms the first semester. Thereafter, enough electives are available so that the student may develop skills and understanding in the chosen field. Specialization may be developed in the following areas:

- a. Urban Economic Planning.
- b. Real Estate and Housing.
- c. Research and Analysis.
- d. Transportation Planning & Policies.
- e. Other areas designed in cooperation with the program coordinator.

Sixteen of the 36 hours required for the degree must be in courses designed exclusively for graduate students. All candidates for the degree must:

- a. Complete an independent work-study project approved by the program coordinator *OR*
- b. Present a thesis (six to nine credit hours allowed).

The requirements of the program are: BA 572, 782, 799, one course in Quantitative Methods (BA 756 or 757) and one course in Behavioral Science (BA 751 or 807).

In addition to the above 15 credit hours of required courses, the above-mentioned work-study project (or thesis) is required along with enough specialized electives (18 to 24 credits) to complete a total of 36 credit hours.

### 6. The M.S.B.A./Finance

The M.S.B.A. Finance Program is designed to prepare students for professional careers in business through breadth and specialization in the field of finance. Stress is on financial principles and techniques with applications in financial management, investments, and insurance.

A minimum of 30 semester hours of graduate study are required. Prerequisites for this program are those of all Master's Degree Programs in the School of Business Administration. Thesis writing is encouraged.

The requirements of the program are: BA 706, 708, 709, one course in Quantitative Methods (BA 756, or equivalent), one course in Behavioral Science (BA 751, 807(I), or equivalent), and BA 752.

## GENERAL

The M.B.A. and M.S.B.A./Management Science degree programs are also offered on an evening basis in Pittsfield, Mass.

Questions concerning any of the graduate degree programs of the School should be addressed to: Graduate Program Director, School of Business Administration, University of Massachusetts, Amherst, MA 01002.

## APPLICATION

Application for Graduate Study should be made directly through the Dean of the Graduate School, as described elsewhere in this Bulletin. A complete application consists of (a) the application form, (b) two references, (c) two sets of official transcripts of all college-level work, and (d) an official score report on the Admission Test for Graduate Study in Business (ATGSB). The Graduate Record Examination is not an acceptable substitute for the ATGSB. Information

## GRADUATE SCHOOL

on the ATGSB may be obtained from the Educational Testing Service, 20 Nassau Street, Princeton, New Jersey 08540. Application deadlines are found elsewhere in this Bulletin. Action is taken immediately upon receipt by the Graduate School of a complete application.

Standards for admission are consistent with those described earlier in this Bulletin. A minimum ATGSB score of 450 is required, but a higher score may be necessary depending on the applicant's grade-point-average. Foreign students are not exempt from this requirement. The present master's student average ATGSB score at this school is 524. This examination may be taken more than once.

Fellowships, assistantships, and other financial aid from the School of Business Administration normally are not available to foreign students during their first year of study. An application from a foreign student must be accompanied by a statement of financial sufficiency.

Program ABLE (Accelerated Business Leadership Education) is a 24-month program designed to identify and assist members of minority groups who have the potential to achieve the Master of Business Administration degree. Although there is an apparent need for top level minority managers and administrators to enter the mainstream of American business, our program is more concerned with the development of managers and administrators to service the growing needs of minority businessmen.

Candidates selected for this program must have a bachelor's degree or the equivalent from any college or university of recognized standing. Applicants *must* take the ATGSB (Admission Test for Graduate School of Business) in August or November. Applicants will be judged primarily on the basis of past academic achievement, ATGSB scores, and recommendations. Classes start June 1, therefore the deadline for all application materials (including ATGSB scores) is February 1. Decisions will be made by April 15.

Each person who qualifies for admission under Program ABLE is eligible for a fellowship to pursue the master's degree. The awarding of fellowships is based on need.

Students once selected are required to attend an intensive 12-week summer program on the campus of one of the ABLE consortium member schools. This summer program is designed to concentrate on areas where most students experience difficulties.

Following the summer session, the students return to enter the regular master's program at the School to which they have been admitted.

Further information on Program ABLE may be obtained from Dr. Lawrence Johnson, School of Business Administration.

## ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### DOCTORAL COURSES IN BUSINESS ADMINISTRATION (B.A.)

(Open to doctoral students only, except by special permission of the Graduate Program Director and the instructor.)

#### 801. PHILOSOPHICAL FOUNDATIONS OF BUSINESS ADMINISTRATION.

Conceptual foundations of business administration in context of social and economic philosophy. Topics include corporate objectives and goal models, theories of organization, and social responsibilities of corporate management.

## UNIVERSITY OF MASSACHUSETTS

### 802. BUSINESS ORGANIZATION AND ADMINISTRATIVE THEORY

Investigation and critique of contemporary theories of organization, administration, and decision, with a view of their scientific support and practicality for increasing rationality, prediction, and control in business administration.

Mr. Finch, Mr. Litterer.

### 803. MANAGEMENT SYSTEMS: THEORY, ANALYSIS, AND DESIGN

Review of systems with stress on normative behavioral systems. Designing, implementing, operating, maintaining, and controlling such systems. The organization viewed as a total system. The student designs a behavioral system as a class project.

Mr. Young.

### 804. DECISION MODELS IN BUSINESS ADMINISTRATION

Application of probability theory and selected topics in mathematics to stochastic and deterministic managerial decision models.

Mr. Kaczka.

### 805. I, II. STATISTICAL ANALYSIS FOR BUSINESS RESEARCH

Analysis of statistical theory and techniques relevant to business research and decision making. First semester: probability and distribution theory; second semester: decision theory and multivariate methods.

Credit, 3-6. Mr. Frederick.

### 806. SEMINAR IN QUANTITATIVE MANAGEMENT SCIENCE

A presentation of journal reports on business topics utilizing a quantitative approach.

Credit, 3-6.

### 807. I, II. SEMINAR IN BEHAVIORAL SCIENCE

Selection of relevant findings in the behavioral and social sciences regarding human organizational behavior and conversion into forms suitable for transmission and application in business administration.

Credit, 3-6. Mr. Finch, Mr. Litterer.

### 808. ADVANCED TOPICS IN BUSINESS ADMINISTRATION

An advanced topic section is available in each general or functional field of study to facilitate investigation of current literature and research effort in these areas.

Credit, 1-6.

### 809. INTERNATIONAL ASPECTS OF BUSINESS ADMINISTRATION

The basis of international division of labor, the history of international business policy, and the cultural differences that affect the management of international business enterprises.

### 810. TUTORIAL STUDY IN BUSINESS ADMINISTRATION

Individualized secondary or applied research in special areas of guided doctoral-level investigation. Permission of instructor required.

Credit, 3-5.

### 811. BUSINESS HISTORY

American business institutions as they have evolved through time. The impact of social and economic processes on their development and operations.

### 812. JURISPRUDENCE AND BUSINESS

Social-scientific and philosophical theories of law; the systems, functions, processes and limits of law, applications to the business organization in its external and internal affairs.

### 821, 822. ADVANCED TOPICS IN MANAGEMENT SCIENCE I, II

Selected topics of current significance in mathematical, statistical, computer, and behavioral approaches to management and administration. Either semester may be elected independently.

Credit, 3-6. Mr. Balintfy.

## BUSINESS ADMINISTRATION

### 823. MATHEMATICAL PROGRAMMING

Application of linear, quadratic, integer, and dynamic programming models and algorithms in pricing and resource allocation by firms; sensitivity analysis and parametric programming.

Mr. Balintfy.

### 831. LONG RANGE BUSINESS PLANNING

Advanced and intensive study of long-range planning practices in business firms. Emphasis on the planning process in relation to other managerial processes on the most recent methods of reducing risk and uncertainty in long-term planning strategies.

Mr. Michael.

### 832. DYNAMICS OF CORPORATE ORGANIZATION

Changes in corporate organization as adaptive responses to challenges and constraints imposed upon the corporation by variations in endogenous and exogenous factors.

Mr. Michael.

### 841. MANAGEMENT INFORMATION THEORY

Theories and applications of management information system in the context of total servomechanism system concept. Topics include the generation, organization, transformation, dissemination, codification, discrimination, and economics of information.

Mr. Hare.

### 842. MANAGEMENT CONTROL SYSTEMS

The function of total systems theory which provides direction in attaining planned objectives of the system. Various theories of control and measurement in relation to organization resources and information requirements.

Mr. Hare.

### 851. THEORY AND SCIENCE IN MARKETING

The state of marketing knowledge; the content and validity of marketing thought, theories, and other substantive and methodological contributions to the development of marketing science.

Mr. Frederick.

### 852. SOCIAL SCIENCE ISSUES IN MARKETING

Materials from the various social science disciplines that have been used to expand understanding of marketing; discernment of areas of ignorance about marketing involving social-science-related marketing phenomena.

### 861. ADVANCED ACCOUNTING THEORY

The origin, development, and current status of accounting theory and its relationship to other disciplines and the needs of report users. Independent research required.

Mr. Backer.

### 862. MANAGEMENT INFORMATION PROBLEMS

Methods of research for establishing: 1) The behavioral impact of incremental differences in information. 2) The determinants of useful information for problem solving and their normative implications. Existing literature examined.

Mr. Backer.

### 871. MICRO THEORY OF FINANCE

Optimum financial policies and decisions of nonfinancial firms. Theory of competition and optimum asset management of financial firms.

Prerequisite, 12 hours in finance and economics. Mr. Kumar.

### 872. FINANCIAL INTERMEDIARIES AND MARKETS

Financial intermediaries and financial markets and the development of a theory of financial intermediation as it relates to growth, employment, and price levels.

### 881. PRODUCTION MANAGEMENT ANALYSIS

Application of mathematical and statistical methods and models for production management decisions and problem analyses and for managerial planning and control.

Mr. McGarrah.

### 882. PRODUCTION MANAGEMENT POLICY

Formulation and administration of production and operations management policies with reference to developing an effective total business strategy.

Mr. McGarrah.

## BUSINESS ADMINISTRATION

### 891. MANPOWER PLANNING.

Investigation and comparative evaluation of systems of manpower planning both at the corporate and national levels including systematic manpower inventory appraisal.

Mr. Wortman.

### 892. LEGAL ASPECTS OF INDUSTRIAL AND LABOR RELATIONS.

The historical evolution of national labor policy from its English origin in 1349 through modern experiences. Common law, statutory, and constitutional developments of labor policy examined against a historical, political, and economic background.

### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

## MASTER'S LEVEL COURSES IN BUSINESS ADMINISTRATION (BA)

(Open to graduate students only, for major or elective credit. Students seeking entry may be required to demonstrate eligibility for advanced study through a qualifying examination or by other means.)

### 700. PROBLEMS IN BUSINESS ADMINISTRATION.

Independent study and research on selected problems in business administration.

Permission of instructor and the dean required.

*Credit, 3-6 each semester.*

### 702. ACCOUNTING SYSTEMS.

Accounting systems and their relationship to other business information systems.

Mr. Burch, Mr. Krzystofik.

### 703. ACCOUNTING THEORY.

Agreed and controversial criteria for collecting and reporting financial information. Examination of the professional literature.

Mr. Backer, Mr. Simpson.

### 704. CONTEMPORARY ACCOUNTING ISSUES.

Investigation and analysis of selected contemporary issues in accounting with presentation of individual findings through discussion and reports.

Mr. Backer, Mr. Gosman.

### 705. SEMINAR IN ACCOUNTING.

Study and evaluation of current literature in accounting and related fields.

Mr. Dennler, Mr. Stone.

### 706. FINANCIAL MANAGEMENT.

Internal financial problems of firms; capital budgeting, cost of capital, dividend policy, rate of return, and the financial aspects of growth. Readings and cases.

Mr. Barges, Mr. Ludtke.

### 707. GROWTH, MERGERS, AND ACQUISITIONS.

An analysis of the financial problems and implications of corporate growth. Mergers and acquisitions as instruments for achieving growth. Text and cases.

Prerequisite, BA 706 or equivalent.

Mr. Barges.

### 708. SEMINAR IN FINANCE.

Recent developments in areas such as investments, financial institutions, capital markets, and corporation finance. Emphasis on the use of theoretical as well as applied analytical techniques for decision making in these areas.

### 709. INVESTMENTS.

Development of a general theory of investment management and its application to individual and institutional investors; computer portfolio management.

### 711. ACCOUNTING IN MANAGEMENT.

Production and use of accounting and other quantitative data for decision making related to planning and control.

Mr. Backer, Mr. Stone.

## GRADUATE SCHOOL

### 712. ADVANCED MANAGERIAL ACCOUNTING.

An advanced course in the use of accounting and other quantitative measurements for business planning, decision-making, and performance-evaluation.

Prerequisite, BA 711 or permission of instructor.

### 722. MARKETING MANAGEMENT.

Marketing concepts of planning, organization, control, and decision-making from the viewpoint of the business executive. Stress on tools available for analysis and control of marketing activities.

Prerequisites, BA 406, 411, 422, 440, 456, and 457, or equivalents.

Mr. Paul, Mr. Worthing.

### 723. MANAGEMENT SCIENCE IN MARKETING.

An analytical examination of the application of management-science techniques to marketing phenomena. Examines the relationship of the behavioral and quantitative sciences to marketing.

Prerequisites, BA 722 and 756, or permission of instructor.

### 724. RESEARCH METHODS IN MARKETING.

Applicability and utilization of quantitative research techniques to marketing problems and processes.

Prerequisites, BA 722 and 756, or permission of instructor.

Mr. Frederick, Mr. Monroe.

### 725. PERSPECTIVES ON CONSUMER BEHAVIOR.

The social, psychological, and economic roles of the consumer in decision-making and market behavior. The external and internal determinants of buyer behavior.

Prerequisite, BA 422 or equivalent.

### 726. INTERNATIONAL MARKETING MANAGEMENT.

The impact of political, social, economic and cultural forces of divergent societies upon the managerial decision-making process in international marketing operations. Problems associated with the design of marketing strategy.

Prerequisite, BA 722 or equivalent.

Mr. Liander.

### 730. SEMINAR IN MARKETING PROGRAMS AND ISSUES.

Selected areas of pronounced and current interest in the field of marketing. Topics include marketing and public policy, buyer-behavior research, and marketing communications.

Prerequisite, BA 722 or equivalent.

Mr. Buell, Mr. Paul.

### 735. RISK MANAGEMENT.

Analysis of risks to which a business is exposed, determination of methods of providing protection, including loss-prevention techniques, risk retention, self-insurance, and use of commercial insurance. Case and field studies.

Mr. Osborn.

### 740. MANAGERIAL ECONOMICS.

Application of microeconomic analysis to typical business decisions such as: cost and profit analysis; demand and pricing, investment analysis, and capital budgeting; and the uses of economic forecasting in business decisions.

Prerequisite, one semester intermediate microeconomic theory.

### 742. OPERATIONS MANAGEMENT.

Analysis of production problems and solution techniques, applicable in industrial analysis.

### 745. DYNAMIC MODELLING OF COMPLEX SYSTEMS.

The student learns the principles of feedback behavior and system dynamics, attaining sufficient competence in six weeks to build computer simulation models of such complex organizational systems as industrial, educational, social, and ecological, and to analyze their dynamic behavior. The course can be taken by graduate students in social as well as natural sciences.

Mr. Sahin.

### 746. BUSINESS LOGISTICS.

The total cost concept in the management of a business enterprise. Problems in inventory determination, location theory and practice, transportation and warehousing alternatives with the objective of maximizing customer service at least cost. A case and problem approach.

Mr. Rivers.

UNIVERSITY OF MASSACHUSETTS

**751. ORGANIZATIONAL BEHAVIOR**  
For students who want to develop professional skills dealing with organizational and interpersonal factors related to effective organizational performance. Emphasis on the impact of managerial actions on organizational behavior.  
Prerequisite, BA 451 or equivalent.

**752. BUSINESS POLICY.**  
Capstone course requiring application of knowledge, theories, and techniques derived from previous courses, using integrative cases and empirical observations to formulate improved policies and plans.

**754. MANAGEMENT SCIENCE TECHNIQUES IN ENVIRONMENTAL PLANNING.**  
Introduction to mathematical and computer methods and techniques useful in the description and control of environmental systems. Large scale computer models used to demonstrate the technique in analysis of selected representative problems.  
Mr. Kaczka.

**755. GAME THEORY.**  
Zero and non-zero games including theory, solution technique; experimental literature based upon game theory.  
Prerequisites, BA 758 and BA 759

**756. QUANTITATIVE METHODS III**  
Statistical methods employed in collection, analysis, and interpretation of data. Business applications of sampling, analysis of variance, experimental design, regression analysis, and forecasting models.

**757. QUANTITATIVE METHODS IN BUSINESS ADMINISTRATION.**  
Application of probability theory (discrete and continuous) stochastic process, linear, quadratic and dynamic programming, waiting lines, sequencing, and computer simulation models to selected problems in management science.  
Mr. Kaczka.

**758. DETERMINISTIC MODELS IN MANAGEMENT SCIENCE.**  
Introduction to deterministic models and techniques relevant to business problems. Topics include Kuhn-Tucker theory, mathematical programming, difference equations and discrete and continuous maximum principles.

**759. PROBABILISTIC MODELS OF MANAGEMENT SCIENCE.**  
Introduction to probabilistic models and statistical techniques relevant to the understanding of business problems.

**760. WORK STANDARDS AND JOB CLASSIFICATION.**  
The principles and basic requirements in evaluating and classifying job positions, in establishing and applying production standards, and in work simplification.

**761. SEMINAR IN PERSONNEL MANAGEMENT.**  
Current practices and major problems of personnel administration through use of the case method and role-playing techniques.  
Prerequisite, personnel management course. Mr. Young.

**762. MANAGEMENT OF INDUSTRIAL RELATIONS**  
Organization and administration of the industrial relations function within business firms. Emphasis on alternative approaches to management rights and responsibilities in labor relations.  
Prerequisite, Mgt 644. Mr. Conlon.

**763. SEMINAR IN INDUSTRIAL RELATIONS.**  
Analysis of the major current problems encountered by business management in the negotiation and administration of labor relations agreements. A major research study is required.  
Mr. Conlon.

**765. BEHAVIORAL-SCIENCE MODELS IN BUSINESS.**  
Behavioral-science theories and models as they apply to the behavioral problems of enterprises.

BUSINESS ADMINISTRATION

**770. MANAGEMENT SCIENCE IN PLANNING AND CONTROL.**  
Application of management science to problems of design testing and evaluation of facilities usage, manpower organization, and information procedures actually employed by business firms or government agencies.  
Mr. Hare, Mr. McGarrah

**776. INTERNATIONAL FINANCE.**  
Introduction to foreign money and capital markets and international financial institutions; financial planning for corporations with overseas operations; analysis of sources and uses of corporate funds abroad; criteria for choice among alternative foreign investments. A text/case approach.  
Prerequisites, introductory level courses in corporate finance and financial institutions and markets, or permission of instructor.  
Mr. Ludtke.

**780. RESEARCH METHODS.**  
Fundamental concepts of the purpose and practice of scientific research, including formulation of research design and objectives, collecting, processing, and analyzing socio-economic data.  
Prerequisite, BA 457 or equivalent.

**781. SYSTEMS THEORY & URBAN PROBLEMS.**  
The fundamentals of systems theory and its application to urban problems. Various social-economic urban problems, and how systems theory can be utilized in effective solutions.

**782. CURRENT ISSUES IN URBAN AND REGIONAL MANAGEMENT**  
An analysis of the dimensions of urban growth and change. Reasons behind and problems arising from economic growth and stagnation of urban areas.  
Prerequisite, economics course.

**783. URBAN BUDGETING AND PUBLIC FINANCE**  
The theory, techniques, and administration of public finance and budgeting, as applied within an urban and regional framework.  
Prerequisite, economics course.

**784. REAL ESTATE FINANCE**  
A problem-oriented course; financial practices, institutions, and methods of analysis related to real-estate investment. Topics include investment theory, taxation, and government programs.  
Prerequisite, Gen Bus 201 and 270 or equivalents.

**785. HOUSING ANALYSIS**  
The urban housing market; government housing programs and practices of private enterprises analyzed and evaluated. A housing-market model is used for analysis. All students required to complete a project  
Prerequisite, Gen Bus 270 or equivalent.

**787. SEMINAR IN URBAN AND REGIONAL MANAGEMENT**  
Integrates concepts gained in prior courses in areas of urban studies, sociology, political science, economics, and business administration.  
Prerequisite, advanced standing in a graduate urban studies oriented curriculum.

**788. LAND AND THE DEVELOPMENT OF COMMUNITIES.**  
The urban development process from a business and economic viewpoint. Topics include economic, legal, social, political, and administrative aspects of the real estate market  
Prerequisite, economics course.

**799. SEMINAR IN BUSINESS ADMINISTRATION**  
The relationship of business and management to the environment in which they operate.

**800. MASTER'S THESIS** Credit, 9.

## BUSINESS ADMINISTRATION

### MASTER'S FOUNDATION COURSES

#### 600. COMPUTER METHODS FOR BUSINESS.

Current and potential management usage of computers, basic computer programming, and computer-based information systems in management decision-making.

#### 606. BUSINESS FINANCE.

Survey of principles and practices of financing business. Not open to students with undergraduate work in corporation finance.  
Prerequisite, elementary accounting (through corporate accounts.)

#### 611. INTRODUCTION TO ACCOUNTING.

Principles underlying preparation of financial statements and the development and application of accounting data for planning and control.  
Mr. Dennler.

#### 622. MARKETING ENVIRONMENT.

Dimensions of change in social, economic, and political factors, related to efforts surrounding establishment and attainment of marketing policy and corporate objectives.  
Mr. Buell, Mrs. Barber.

#### 650. MANAGERIAL ECONOMICS.

Microeconomic analysis and application to business decisions such as: cost and profit analysis; demand and pricing; investment analysis and capital budgeting; and economic forecasting.

#### 647. LAW AND GOVERNMENT.

An introduction to nature, functions, and limitations of state and non-state law-government systems, industrial jurisprudence, and politico-legal environment of business.

#### 651. ADMINISTRATIVE THEORY.

Analysis of fundamental psychological and sociological phenomena that underlie group behavior; exploration of organization processes including leadership, communication, and change; analysis of classical decision and system theory.

#### 656. QUANTITATIVE METHODS I — CALCULUS.

Business applications of algebra including ratios, proportions, logarithms, partial fraction series, limits, convergence, combinations, and permutations. Basic concepts of differential and integral calculus, and matrix algebra.  
Prerequisite, one semester of college algebra.

#### 657. QUANTITATIVE METHODS II — STATISTICS.

Laws and theories of probability and statistics, with applications in business and economics. Topics include probability models, sampling distribution, estimation, hypothesis testing, and decision theory.  
Prerequisite, BA 656 or equivalent.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

#### ACCOUNTING (ACCTG)

#### 510. BUSINESS APPLICATIONS OF THE COMPUTER.

Intermediate and advanced computer programming applied to business problems. The COBOL language treated in depth, related to accounting problems. Also surveys the Computer application in areas such as simulation, PERT, and business gaming.  
Prerequisites, Acctg 110 or COINS 121 or equivalent.

#### 563. LAW IV.

Limited to Accounting majors. Also listed under General Business and Finance.

#### 620. FINANCIAL REPORTING III.

Consolidation problems of merged firms. Application of interest to accounting problems. Both general price-level and specific price change problems. Problems of foreign operations and firms in financial difficulty.  
Prerequisite, Acctg 221 or equivalent.  
Ms. Motekat, Mr. Simpson.

## GRADUATE SCHOOL

#### 635. INVENTORY CONTROL.

Mathematical modeling applied to control of inventory investments. Emphasis on the recognition of relevant costs for the development and solution of appropriate models.  
Prerequisites, BA 759 or permission of instructor.

#### 640. AUDITING AND CONTROL.

Basic principles of auditing with emphasis on theory, types of audits, duties and responsibilities of the auditor, audit programs, and methods of internal control. Emphasis on the responsibilities of both the independent and internal auditor.  
Prerequisites, Acctg 221 or equivalent and a Cost Accounting course.  
Mr. Krzystofik.

#### 671. ADVANCED FEDERAL TAX PROCEDURES.

Emphasis on corporations, partnerships, estates and trusts, gifts and estate taxes, tax planning and research.  
Prerequisite, Acctg 370 or equivalent.

Mr. Anderson, Mr. Fitzgerald.

#### 680. C.P.A. PROBLEMS.

Solution of problems for CPA examinations. Topics include: proper treatment of assets, liabilities, and ownership equity; partnerships; consolidations; funds and cash flow; cost accounting and management uses of accounting information; and governmental accounting.  
Prerequisite, Acctg 620 or equivalent.

Mr. Lentilhon, Mr. O'Connell.

#### 682. INTERNATIONAL ACCOUNTING.

Current accounting principles and practices in foreign countries. Includes accounting problems encountered by multinational corporations and trends towards the establishment of international accounting and auditing standards.  
Prerequisite, Acctg 221 or equivalent, or permission of instructor.  
Ms. Motekat.

### GENERAL BUSINESS AND FINANCE (GB FIN)

#### 504. MODELS OF FINANCIAL ANALYSIS AND MANAGEMENT.

An analytical approach to financial management. Emphasis on theoretical topics of financial decision-making. Through the use of mathematical, statistical, and computer simulation methods, various financial decision-making models are made.  
Prerequisites, Gen Bus 201 and elementary knowledge of mathematics, statistics, and programming.  
Mr. Kumar.

#### 512. TOPICS IN FINANCIAL INSTITUTIONS AND MARKETS.

Intensive study of selected topics relating to financial institutions and markets with emphasis on management implications.  
Prerequisite, Fin 210 or Econ 211.

#### 521. THEORY OF INVESTMENT ANALYSIS.

Factors affecting investment values of securities, and methods used in their analysis.

#### 522. THEORY OF INVESTMENT PROCESSES.

An in-depth study of portfolio analysis and stochastic processes in security markets. Emphasis on quantitative solution techniques and testing procedures.  
Prerequisites, Fin 220 and 221 or permission of instructor.

#### 545. METROPOLITAN TRANSPORTATION.

Analysis of economic, social, and technological developments on demand and supply factors for the movement of people and goods within urban areas. Determination of the optimal mix of modal facilities to maximize the total transport resources.  
Prerequisite, Gen Bus 240 or permission of instructor.  
Mr. Rivers.

#### 561. LAW II.

Sales, negotiable instruments and secured transactions; their economic functions and consequences.  
Prerequisite, Gen Bus 260.

## UNIVERSITY OF MASSACHUSETTS

### 562. LAW III.

Economic functions and consequences of agency, partnerships and corporations.

### 563. LAW IV.

Legal problems most commonly encountered by certified public accountants with attention to the subjects currently being included in C.P.A. examinations.

Prerequisite, Gen Bus 260. Limited to Accounting majors.

### 564. LAW OF URBAN DEVELOPMENT

Legal problems generated by the changing urban environment. Topics include the law of race relations, poverty and welfare, land use planning, urban and regional planning.

Prerequisite, Gen Bus 260 or equivalent. Mr. Bonsignore.

### 569. (I), 570 (II). CITY PLANNING.

(Reg Pl 573, 574).

The historical and legal aspects of land use and regional development, and a critical examination of planning techniques used in guiding the physical growth of communities.

Credit, 3 each semester.

### 573. INTRODUCTION TO SIMULATION METHODS (IE 573).

The principles and methods of computer simulation. Each student expected to construct, test, and run a complex simulation model.

Mr. Kaczka.

### 658. QUEUEING-THEORY MODELS.

Development and application of models of waiting lines, including single- and multiple-channel and single- and multiple-stage queues for various priorities and queue disciplines.

Prerequisites, BA 758 and 759 and permission of instructor.

### 659. TIME-SERIES ANALYSIS.

Analysis of time-series and dynamic models for use in forecasting and control of business and economic systems.

## MANAGEMENT (MGT)

### 510. MANAGERIAL APPLICATIONS OF COMPUTER PROGRAMMING.

Intermediate and advanced computer programming. Emphasis on problems in accounting and management information systems.

Prerequisite, Mgt 110 or permission of instructor.

### 534. WAGE AND SALARY ADMINISTRATION.

Objectives, procedures, and problems involved in establishment and administration of operative and executive compensation plans.

Mr. Wortman.

### 641. MANAGEMENT DECISION SIMULATION.

Participation in management of a firm in a simulated industry. Students, organized into management teams, apply their knowledge of business administration and economics in a competitive struggle for profit and market position.

### 644. MANAGEMENT-UNION RELATIONS I.

Comparison of union-management objectives, functions, and structures including scope and impact of union penetration into areas of managerial authority.

Mr. Conlon, Mr. Wortman, Mr. Carlisle, Mr. Bornstein.

### 645. MANAGEMENT-UNION RELATIONS II.

Problems in the interpretation and administration of collective-bargaining agreements studied by use of the case method of analysis.

Prerequisite, Mgt 644 or permission of instructor.

Mr. Conlon, Mr. Wortman, Mr. Carlisle, Mr. Bornstein.

## CHEMICAL ENGINEERING

# Chemical Engineering

## GRADUATE FACULTY

JOHN W. ELDRIDGE, *Professor and Head of the Department of Chemical Engineering*, B.S., Maine, 1942; M.S., Syracuse, 1946; Ph.D., Minnesota, 1949.

LELAND H. S. ROBLEE, JR., *Professor and Graduate Program Director*, B.S., Purdue, 1949; M.S., 1956; Ph.D., 1958.

KENNETH D. CASHIN, *Professor*, B.S., Worcester Polytechnic Institute, 1947; M.S., 1948; Ph.D., Rensselaer Polytechnic Institute, 1955.

DAVID C. CHAPPELEAR, *Adjunct Associate Professor*, B.E., Yale, 1953; Ph.D., Princeton, 1960.

JAMES M. DOUGLAS, *Professor*, B.S., Johns Hopkins, 1954; Ph.D., Delaware, 1960.

ROBERT S. KIRK, *Associate Professor*, B.S., Illinois Institute of Technology, 1943; M.S., Illinois Institute of Technology, 1943; Ph.D., University of Wisconsin, 1948.

JAMES R. KITTRELL, *Associate Professor*, B.S., Oklahoma State University, 1962; M.S., University of Wisconsin, 1963; Ph.D., 1966.

ROBERT L. LAURENCE, *Professor*, B.S., Massachusetts Institute of Technology, 1957; M.S., Rhode Island, 1960; Ph.D., Northwestern, 1965.

ROBERT W. LENZ, *Professor*, B.S., Lehigh University, 1949; M.S., Institute of Textile Technology, 1951; Ph.D., State University of New York, 1956.

E. ERNEST LINDSEY, *Professor*, B.S., Georgia Institute of Technology, 1936; Ph.D., Yale, 1940.

THOMAS J. McAVOY, *Associate Professor*, B.S., Brooklyn Polytechnic Institute, 1961; Ph.D., Princeton, 1964.

STANLEY MIDDLEMAN, *Professor*, B.S., Johns Hopkins, 1958; D.Eng., 1961.

W. LEIGH SHORT, *Professor*, B.S., University of Alberta, 1956; M.S., 1957; Ph.D., University of Michigan, 1962.

MARCEL VAN PEE, *Professor*, B.S., M.S., University of Louvain, Belgium; Ph.D., 1940.

The graduate program in chemical engineering emphasizes advanced study in engineering fundamentals rather than specific technological applications. To be admitted to full graduate status in the field, either of the following requirements should be met:

1. Applicant must have Bachelor's degree in chemical engineering from a recognized school, or

2. Applicant must show satisfactory academic training or demonstrate proficiency in these subjects as a minimum:

Mathematics: through Calculus.

Chemistry: through Organic and Physical.

Engineering Mechanics: Statics, Strength of Materials, Dynamics.

Chemical Engineering: Stoichiometry, Unit Operations.

Thermodynamics (including thermodynamics of chemical change).

Electrical Engineering: Elements of Circuits and Machines.

## CHEMICAL ENGINEERING

### REQUIREMENTS FOR THE PH.D. DEGREE

In the Chemical Engineering Department, the Ph.D. candidate is required to fulfill the foreign language requirement or to successfully complete (with a grade of B or better) Eng 634, Advanced Technical Writing. The Department does not impose any other requirements beyond those established by the Graduate School.

### REQUIREMENTS FOR THE M.S. DEGREE

1. Ch E 800, Thesis, six to 10 credits (may be research or design). If a student elects a nonexperimental thesis, he must demonstrate experimental proficiency by other evidence such as from industrial experience.

2. At least 12 credits of Chemical Engineering 700-level courses. Ch E 662 may also be used toward meeting this requirement (*i.e.*, in lieu of three of these 12 credits).

3. Additional graduate-credit courses, chosen according to the student's interests from the fields of engineering, science, mathematics, and the humanities, to constitute the total requirement of 30 credits for the M.S. degree.

4. University-wide requirements as described in the front section of this *Bulletin*.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

700. SPECIAL PROBLEMS. *Credit, 1-3.*

#### 701. CHEMICAL ENGINEERING THERMODYNAMICS I.

Review of the fundamental laws of thermodynamics, P-V-T relations of fluids, thermodynamic functions, fluid flow, compression and expansion of gases, liquefaction and separation of gases.

Prerequisite, Ch E 126 or equivalent.

Mr. Roblee.

#### 702. CHEMICAL ENGINEERING THERMODYNAMICS II.

Phase equilibria and chemical reaction equilibria and their applications in chemical processing.

Prerequisites, Chem 586 and Ch E 701.

*Credit, 2.* Mr. Vanpee.

#### 703. CHEMICAL ENGINEERING ANALYSIS III.

Mathematical analysis of chemical engineering problems continued. Advanced matrix techniques, perturbation analysis, and analytical solutions to partial differential equations.

Prerequisite, Ch E 662.

Mr. Douglas.

#### 705. CHEMICAL REACTOR DESIGN.

Principles of chemical reaction kinetics and their application to industrial chemical processes. Systems homogeneous and heterogeneous, batch and flow, catalyzed and uncatalyzed, isothermal and adiabatic.

Prerequisites, Chem 586, Math 186 or 541 or equivalent.

Mr. Kirk.

#### 706. ADVANCED KINETICS AND REACTOR DESIGN.

Topics from the recent literature including reactions in gradients, catalysis and optimization of chemical reactors by methods of dynamic programming.

Prerequisites, Ch E 705 and Ch E 361 or equivalent.

Mr. Kirk.

## GRADUATE SCHOOL

#### 707. ADVANCED PROCESS CONTROL.

Theory of closed loop control. Use of Laplace transforms and transfer functions; stability analysis, root-locus, Bode diagrams; frequency response and time response in controller design.

Prerequisite, Ch E 376 or equivalent.

Mr. McAvoy.

#### 708. PROCESS DYNAMICS.

Translating process performance into mathematical form, application to control system design. Fluid systems, thermal systems, mass transfer systems (distillation, drying), reaction kinetics.

Prerequisite, Ch E 707.

Mr. Douglas.

#### 710. APPLIED OPTIMIZATION IN CHEMICAL ENGINEERING.

Topics include non-linear programming, (Kuhn-Tucker theorem, quadratic programming), geometric programming, calculus of variations, dynamic programming, Pontryagin's Maximum Principle.

Prerequisite, Ch E 688.

Mr. Novak.

#### 711. CHEMICAL ENGINEERING FLUID MECHANICS.

Introduction to advanced work in chemical engineering fluid mechanics. Viscosity, momentum balances (Navier-Stokes equation), friction, turbulence, the motion of suspended solids in fluids, and non-Newtonian fluids.

Prerequisite, Ch E 256.

Mr. Middleman.

#### 712. CHEMICAL ENGINEERING HEAT TRANSFER.

Introduction to advanced work in heat transfer as applied to chemical engineering. Thermal diffusivity; energy balances; analytical, graphical, and numerical solutions to steady and transient problems; convection and radiation.

Prerequisite, Ch E 711.

*Credit, 2.* Mr. Roblee.

#### 713. ANALOG-HYBRID SIMULATION IN CHEMICAL ENGINEERING.

Topics in analog-hybrid simulation useful to students beginning research. Linear and non-linear components, magnitude and time scaling, digital logic, hybrid operation.

Mr. Novak.

#### 714. POLYMER RHEOLOGY.

Definition and measurement of rheological properties; continuum mechanics and constitutive equations; molecular theories of polymer deformation; correlation and interrelation of material functions. Relation of the various approaches taken in describing the viscous and viscoelastic properties of polymers, evaluation of the utility of these approaches, and indication of the role of modern rheology in the characterization and processing of polymers.

Prerequisite, Ch E 711.

Mr. Middleman.

#### 715. COMBUSTION PHENOMENA.

Fundamentals of combustion. Combustion thermodynamics, Rankin-Hugoniot relations, propagation of explosions, laminar flames, turbulent flames, detonations, radiation processes, kinetics of combustion.

Prerequisites, Ch E 358 and 380.

Mr. Vanpee.

#### 716. MASS TRANSFER.

A unified treatment of mass transport phenomena, emphasizing scientific principles. Diffusional phenomena, convective mass transfer and application of integral averaging techniques to mass transfer.

Prerequisite, Ch E 711.

*Credit, 2.* Mr. Laurence.

#### 731. ADVANCED MASS TRANSFER.

Mass transfer with emphasis on theory of diffusion. Molecular diffusion, multicomponent diffusion, convective mass transfer, diffusion with chemical reaction and chromatographic separations.

Prerequisites, Ch E 662 and 716.

Mr. Laurence.

#### 741. ADVANCED PROCESS DESIGN I.

Solution of advanced process design problems which require the use of principles covered in previous courses. The problems may be conceptual designs, economic decision-making in process design or engineering design calculations for a specific process.

Prerequisites, Ch E 256 and 382.

Mr. Short.

## UNIVERSITY OF MASSACHUSETTS

## CHEMISTRY

### 800. MASTER'S THESIS.

A theoretical or experimental study of some chemical engineering problem. Credit determined by the work done, and by agreement with the Department and the Graduate Thesis Committee. *Credit, 6-10.*

### 801. ADVANCED TOPICS IN CHEMICAL ENGINEERING.

An in-depth exploration of the advanced aspects of an area pertinent to chemical engineering. *Credit, 1-3.*

Prerequisites, Ch E 662, 712, and 716.

### 802. ADVANCED TOPICS IN TRANSPORT PHENOMENA

An in-depth exploration of a particular aspect of advanced transport phenomena. *Credit, 1-3.*

Prerequisites, Ch E 662, 712, and 716.

*Credit, 1-3.* Mr. Roblee.

### 803. ADVANCED TOPICS IN THERMODYNAMICS.

An intensive consideration of current literature and research in a particular area of thermodynamics. *Credit, 1-3.*

Prerequisite, Ch E 702.

*Credit, 1-3.* Mr. Short.

### 804. ADVANCED TOPICS IN KINETICS.

Selected topics from the current literature. *Credit, 1-3.*

Prerequisite, Ch E 705.

*Credit, 1-3.* Mr. Kirk.

### 805. ADVANCED TOPICS IN PROCESS DYNAMICS AND CONTROL.

Topics from the current literature, discussed in depth. *Credit, 1-3.*

Prerequisite, permission of instructor.

*Credit, 1-3.* Mr. Douglas.

### 806. ADVANCED TOPICS IN CHEMICAL ENGINEERING ANALYSIS.

For advanced graduate students in chemical engineering. Application of mathematics to problems in chemical engineering. Specific topics vary according to instructor and student interests. *Credit, 1-3.*

Prerequisites, Ch E 662, 703 or permission of instructor.

*Credit, 1-3.* Mr. McAvoy.

### 807. ADVANCED PROCESS DESIGN II.

Continuation of Advanced Process Design I. Emphasis on more complex designs and the uses of mathematical models or optimization techniques in the solution of these design problems. *Credit, 1-3.*

Prerequisites, Ch E 256, 257, and 688.

*Credit, 1-3.* Mr. Short.

### 900. DOCTORAL DISSERTATION.

A theoretical or experimental study of a chemical engineering problem. Credit determined by the work done and by agreement with the Department and the Graduate Thesis Committee. *Credit, 18.*

*Credit, 18.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

### 661. CHEMICAL ENGINEERING ANALYSIS I.

Application of mathematical techniques to chemical engineering problems. Emphasis on analysis of problems and the devising of satisfactory mathematical models. Machine computation with digital and analog devices. *Credit, 3.*

Prerequisites, Ch E 256 and Math 256.

*Credit, 3.* Mr. Roblee.

### 662. CHEMICAL ENGINEERING ANALYSIS II.

Mathematical analysis of chemical engineering problems continued. Topics include: matrix methods, vector analysis, calculus of finite differences, numerical solution of ordinary and partial differential equations, complex variables and Laplace transformations. Emphasis on applying these techniques to real chemical engineering processes and on the physical and mathematical interpretation of the results. *Credit, 3.*

Prerequisite, Ch E 661.

*Credit, 3.* Mr. Novak.

### 663, 664. SURVEY OF NUCLEAR ENGINEERING I, II.

Introduction to the principles of nuclear physics and a survey of problems involved in the design and operation of nuclear reactors. Heat transfer, shielding, metallurgy, controls, waste disposal, and health physics. *Credit, 3 each semester.*

Two lectures, one laboratory period per week each semester.

Prerequisite, two semesters of physics and mathematics through integral calculus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

*Credit, 3 each semester.* Mr. Marcus.

### 670. APPLIED POLYMER SCIENCE.

A survey of the methods of preparing important synthetic polymers, and their properties and applications. *Credit, 3.*

Prerequisite, undergraduate organic and physical chemistry. *Credit, 3.*

*Credit, 3.* Mr. Lenz.

*Credit, 3.* Mr. Lenz.

*Credit, 3.* Mr. Lenz.

*Credit, 3.* Mr. Lenz.

*Credit, 3.* Mr. Lenz.

*Credit, 3.* Mr. Lenz.

## Chemistry

### GRADUATE FACULTY

WILLIAM E. McEWEEN, *Professor and Head of the Department of Chemistry*, B.A., Columbia, 1944; M.A., 1945; Ph.D., 1947.

GEORGE R. RICHASON, JR., *Professor and Associate Head of the Department of Chemistry*, B.S., Massachusetts, 1937; M.S., 1939.

## CHEMISTRY

- GEORGE W. CANNON, *Professor and Graduate Program Director*, B.A., Dakota Wesleyan, 1939; M.A., Illinois, 1941; Ph.D., 1943.
- RONALD D. ARCHER, *Professor*, B.S., Illinois State at Normal, 1953; M.S., 1954; Ph.D., Illinois, 1959.
- RAMON M. BARNES, *Associate Professor*, B.S., Oregon State, 1962; M.A., Columbia, 1963; Ph.D., Illinois, 1966.
- JOHN F. BRANDTS, *Professor*, B.A., Miami, 1956; Ph.D., Minnesota, 1961.
- PAUL E. CADE, *Professor*, B.S., Texas, 1954; Ph.D., Wisconsin, 1961.
- LOUIS A. CARPINO, *Professor*, B.S., Iowa State, 1950; Illinois, 1951; Ph.D., 1953.
- JOHN A. CHANDLER, *Associate Professor*, B.S., Ohio, 1955; M.S., Illinois, 1958; Ph.D., 1959.
- JAMES C. W. CHIEN, *Professor*, B.S., St. John's, 1949; B.A., Wayland College, 1950; M.S., Kentucky, 1951; Ph.D., Wisconsin, 1954.
- DAVID J. CURRAN, *Associate Professor*, B.S., Massachusetts, 1953; M.A., Boston College, 1958; Ph.D., Illinois, 1961.
- JOHN W. GEORGE, *Associate Professor*, B.A., Princeton, 1948; M.A., North Carolina, 1950; Ph.D., M.I.T., 1958.
- RICHARD GREEN, *Adjunct Assistant Professor*, B.A., Concordia, 1961; M.S., North Dakota State, 1963; Ph.D., Louisville, 1969.
- STEPHEN S. HIXSON, *Associate Professor*, B.A., Pennsylvania, 1965; Ph.D., Wisconsin, 1970.
- ROBERT R. HOLMES, *Professor*, B.S., Illinois Institute of Technology, 1950; Ph.D., Purdue, 1954.
- CLIFFORD P. LILLYA, *Professor*, B.A., Kalamazoo, 1959; Ph.D., Harvard, 1964.
- WILLIAM J. MACKNIGHT, *Professor*, B.S., Rochester, 1958; M.A., Princeton, 1963; Ph.D., 1964.
- EARL J. MCWHORTER, *Associate Professor*, B.S., Rensselaer Polytechnic Institute, 1950; Ph.D., Cornell, 1955.
- BERNARD MILLER, *Professor*, B.S., C.C.N.Y., 1951; M.A., Columbia, 1953; Ph.D., 1955.
- JOHN L. RAGLE, *Professor*, B.S., California at Berkeley, 1954; Ph.D., State College of Washington, 1957.
- MARVIN D. RAUSCH, *Professor*, B.S., Kansas, 1952; Ph.D., 1955.
- MARION B. RHODES, *Assistant Professor*, B.A., Connecticut, 1958; M.S., Massachusetts, 1960; Ph.D., 1966.
- JOHN E. ROBERTS, *Professor*, B.S., New Hampshire, 1942; M.S., 1944; Ph.D., Cornell, 1947.
- ROBERT L. ROWELL, *Associate Professor*, B.S., State Teachers College at Bridgewater, Mass., 1954; M.S., Boston College, 1956; Ph.D., Indiana, 1960.
- SIDNEY SIGGIA, *Professor*, B.S., Queens College, 1942; M.S., Brooklyn Polytechnic Institute, 1943; Ph.D., 1944.
- J. HAROLD SMITH, *Professor*, B.S., Utah, 1936; M.S., 1938; Ph.D., Wisconsin, 1941.
- RICHARD S. STEIN, *Professor*, B.S., Brooklyn Polytechnic Institute, 1945; M.S., Princeton, 1948; Ph.D., 1949.
- THOMAS R. STENGLE, *Professor*, B.S., Franklin & Marshall, 1951; M.S., Michigan, 1953; Ph.D., 1961.

## GRADUATE SCHOOL

HOWARD D. STIDHAM, *Associate Professor*, B.S., Trinity College, 1950; Ph.D., Massachusetts Institute of Technology, 1955.

PETER C. UDEN, *Associate Professor*, B.S., Bristol, 1961; Ph.D., 1964.

ROBERT M. WILLIAMS, *Assistant Professor*, B.A., Dartmouth, 1951; M.S., New Hampshire, 1953; Ph.D., Iowa State, 1958.

JOHN S. WOOD, *Professor*, B.A., Keele, 1958; Ph.D., Manchester, 1962.

OLIVER T. ZAJICEK, *Associate Professor*, B.S., Baldwin-Wallace, 1950; M.S., Wayne State, 1958; Ph.D., 1961.

The chemistry department offers programs leading to the M.S. and Ph.D. degrees in analytical, inorganic, organic, and physical chemistry and in interdisciplinary areas. In addition, the department actively participates in the Five College Ph.D. Program.

During their first year doctoral students are expected to complete qualifying requirements in the four areas of chemistry (or certain cognate areas). Qualification requires the demonstration of competence at the advanced undergraduate or beginning graduate level. It can be accomplished by formal course work or by examination. Students fulfill the Ph.D. comprehensive examination requirement by passing a series of cumulative examinations in their specialty. All doctoral candidates are required to pass a departmental examination showing that they have a reading knowledge of German, Russian, or Japanese sufficient to understand journal literature.

In order to allow each student's program to be tailored as closely as possible to individual needs, the department has few formal course requirements for the doctoral degree. On entrance, the student is assigned an adviser who helps plan the initial program. After the student has selected a research topic, the research adviser helps plan the remainder of the course program.

M.S. degree candidates must qualify in three areas in their first year. Thirty credits of graduate work must be presented; 10 of these are awarded for the thesis. The course of study is planned by the student and the adviser. No language or cumulative examinations are required. An acceptable research thesis must be presented and defended.

The M.S. degree may be awarded to doctoral candidates after they have satisfied all Ph.D. qualifying and cumulative examination requirements and requirements of the Graduate School.

Students accepted into graduate programs are expected to have undergraduate preparation comparable to that recommended by the American Chemical Society. Those who have not fulfilled these requirements may be admitted as provisional students until the deficiencies have been removed. All entering graduate students take placement examinations in the week prior to the beginning of the first week of graduate study. These are designed to evaluate the student's preparation and assist in planning a course of study. When a student elects an interdisciplinary research problem, an individual program of courses and examination requirements may be worked out to satisfy special needs. For example, the chemistry department has a close association with the Polymer Science and Engineering Program and many graduate students pursue interdisciplinary work in the two areas.

The Chemistry Department also offers a program of

## UNIVERSITY OF MASSACHUSETTS

## CHEMISTRY

study in chemistry leading to the degree of Master of Arts in Teaching (M.A.T.). The primary aim of the program is to prepare those who do not have adequate or appropriate classroom teaching experience — but who hold a B.A. or B.S. degree — to become effective classroom teachers either at the secondary school or the community/junior college level. The M.A.T. program leads to a professional degree which combines essential aspects of the Master of Education with the academic tradition of the Master of Science degree. It simultaneously assures balanced competence in a) field of chemistry, and b) daily classroom performance of the teacher's role.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (for either major or minor credit)

##### 701. ADVANCED ANALYTICAL CHEMISTRY.

Special laboratory work to meet the needs of the individual student.

Prerequisite, Chem 513 or equivalent.

*Credit, 1-5.*

##### 705. LABORATORY GLASS BLOWING FOR SCIENTISTS.

Technique of fabrication and repair of glass apparatus useful in research.

Prerequisite, permission of instructor.

*Credit, 0.*

##### 706. APPLIED ANALYTICAL CHEMISTRY.

Application of basic analytical principles and techniques to the solution of actual analytical problems. The interrelationship between the diverse analytical approaches, as applied to organic, inorganic, qualitative, and quantitative problems.

Prerequisite, Chem 513.

Mr. Siggia.

##### 710. ELECTROANALYTICAL CHEMISTRY.

Principles of electrochemistry and their relation to the newer electroanalytical methods.

Prerequisite, Chem 513 or equivalent.

Mr. Curran.

##### 715. SPECTROANALYTICAL CHEMISTRY.

Theory and practice of modern chemical analysis methods based upon spectroscopic measurements of atoms and molecules in solid, liquid, gas, and plasma states. Includes x-ray, optical, and radio frequency techniques.

Prerequisite, Chem 513 or equivalent.

*Credit, 4.* Mr. Barnes.

##### 716. CHEMICAL SEPARATION METHODS.

Methods of chemical analysis using separatory techniques. Theory of separations and practical treatment of chromatographic methods, liquid-liquid extraction, precipitation, distillation, electrical and membrane separations.

Prerequisite, Chem 513 or 515 or permission of instructor.

*Credit, 4.* Mr. Uden.

##### 741. INORGANIC PREPARATIONS LABORATORY.

Preparation and testing of various types of inorganic substances, to teach important techniques and give familiarity with the reactions and properties of inorganic materials.

*Credit, 3-5.*

##### 742. INORGANIC CHEMISTRY OF THE LESS FAMILIAR ELEMENTS.

The chemistry of some of the less familiar elements, with correlations among structural, thermodynamic, kinetic and chemical properties.

##### 747. STRUCTURAL INORGANIC CHEMISTRY.

Application of principles of spectroscopy and magnetic resonance to structural aspects of inorganic substances. Symmetry, nonrigid molecules, coordination compounds, metal carbonyls, bioinorganic systems, hydrogen bonding, solid state effects.

Prerequisite, Chem 546 or equivalent.

Mr. Holmes.

##### 748. COORDINATION CHEMISTRY.

Molecular orbital bonding theory, spectroscopy, magnetism, stereochemistry, and reaction mechanisms as applied to coordination species. Emphasis on transition elements.

Prerequisite, Chem 546 or equivalent

Mr. Archer.

##### 756. TOPICS IN INORGANIC CHEMISTRY

Topics such as coordination chemistry, non-aqueous solvents, less familiar oxidation states, acid base theories, reaction mechanisms, etc.

Prerequisite, Chem 546 or equivalent

*Credit, 2 each semester. Maximum credit, 6.*

##### 760. ORGANIC REACTION MECHANISMS.

A detailed survey of the basic organic reactions in terms of the relationship between structure and reactivity. Mechanistic presentation brings each topic up-to-date on the basis of current work.

Prerequisite, Chem 571, or permission of instructor

##### 761. PHYSICAL ORGANIC CHEMISTRY

Application of theory and physical principles to problems of structure, spectroscopy, and reactivity.

Prerequisite, Chem 571; corequisite, Chem 594, or permission of instructor.

##### 765. ADVANCED ORGANIC CHEMISTRY LABORATORY.

Discussion and laboratory work involving experimental techniques of research and design of experiments. Syntheses of compounds desired for research and use of the original literature.

Prerequisite, a year course in organic chemistry. *Credit, 1-5.*

##### 770. HETEROCYCLIC CHEMISTRY.

The chemistry of the common organic heterocyclic compounds containing nitrogen, oxygen, and sulfur. Consideration of mechanisms of the reactions discussed.

Prerequisite, Chem 571 or equivalent.

Mr. McEwen

##### 771. ORGANOMETALLIC CHEMISTRY

The chemistry of compounds containing carbon-metal and carbon-metalloid bonds. Preparation, structure, physical properties, chemical reactions, and synthetic applications of organometallic derivatives. Topics of current interest stressed.

Prerequisite, Chem 571 or equivalent.

Mr. Rausch.

##### 772. CHEMISTRY OF NATURAL PRODUCTS.

Natural products of current interest, primarily from the steroid, terpene, and alkaloid groups. Emphasis on structural proofs, stereochemistry, synthesis, and biogenetic relationships.

Prerequisite, Chem 571 or permission of instructor.

Mr. McWhorter.

##### 775. SPECIAL TOPICS IN ORGANIC CHEMISTRY.

One to three topics of current interest discussed in detail. Recent developments of theoretical and/or synthetic importance to organic chemistry.

Prerequisite, Chem 571 or permission of instructor.

*Maximum credit, 6.*

##### 776. ORGANIC SYNTHESIS.

Important synthetic reactions, with stress on recent developments in methods of organic synthesis. Develops the student's ability to propose his own syntheses of complex molecules.

Prerequisite, Chem 571 or permission of instructor.

##### 785. STATISTICAL THERMODYNAMICS

Introduction to statistical thermodynamics. Microcanonical, Canonical, Grand Canonical, and Generalized Ensembles. Application to chemical problems.

Prerequisite, Chem 595 or equivalent.

Mr. Sudham, Mr. Cade.

## CHEMISTRY

## GRADUATE SCHOOL

### 787. CHEMICAL SPECTROSCOPY, TECHNIQUE AND APPLICATIONS.

Introduction to the elementary theory, and interpretation of data obtained in applications of infrared, Raman, visible, ultraviolet, nuclear quadrupole and nmr spectroscopy to chemical problems.  
Prerequisite, Chem 586 or equivalent.

Mr. Stengle, Mr. Stidham.

### 788. CHEMICAL SPECTROSCOPY THEORY.

Introduction to the theory of infrared, Raman, visible and ultraviolet, nuclear quadrupole and nuclear magnetic resonance spectroscopy.  
Prerequisites, Chem 787 and permission of instructors.

Mr. Stidham, Mr. Stengle.

### 791, 792. QUANTUM CHEMISTRY.

Quantum mechanics and its application to chemical problems and matter.

Prerequisite, Chem 546 or equivalent.

*Credit, 3 each semester.* Mr. Cade, Mr. Ragle.

### 793, 794. X-RAY CRYSTALLOGRAPHY.

Crystal symmetry and space groups. Principles of diffraction of x-rays, electrons and neutrons. Solution of crystal structures using single crystal techniques. Methods of obtaining trial structures and their refinement.

Prerequisite, Chem 281 or equivalent.

*Credit, 3 each semester.* Mr. Wood.

### 795. TOPICS IN PHYSICAL CHEMISTRY.

Prerequisites, Chem 595 and 546 or equivalent.

*Credit, 2 each semester. Maximum credit, 6.*

### 797. ORGANIC POLYMERIZATION REACTIONS.

Mechanisms, kinetics, and thermodynamics of principal types of polymerization reactions and their relationship to the properties of resulting polymers.

Prerequisite, Chem 166 or equivalent.

Mr. Lenz.

### 798, 799. PHYSICAL CHEMISTRY OF HIGH POLYMERS.

Structure of solid polymers, determination of molecular weights, sizes and shapes, mechanical properties of solid polymers, colligative properties of polymer solutions, polyelectrolytes, and physical chemistry of proteins.

Prerequisite, Chem 785 or equivalent.

*Credit, 3 each semester.* Mr. Stein, Mr. MacKnight.

### 891. SEMINAR.

Conference, reports or lectures.

*Credit, 1 each semester. Maximum credit, 2.*

### 895. RESEARCH PROBLEM.

Students prepare two proposals for research problems primarily involving library research, not directly related to the thesis topic, if the latter has been selected.

*Credit, 4.*

### 800. MASTER'S THESIS.

*Credit, 10.*

### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 513. INSTRUMENTAL ANALYSIS.

Theory and practice of modern analyses utilizing optical, electrical, and thermal properties. Selected modern separation methods may be included.

Two class hours, one 4-hour laboratory period.

Prerequisites, Chem 210 and 586.

Mr. Barnes.

#### 515. THEORY OF ANALYTICAL PROCESSES.

Topics such as chemical equilibrium, precipitate formation, chelating agents, multistage separation, etc., having general applicability in chemical investigations.

Three class hours, laboratory optional (1 extra credit).

Prerequisites, Chem 166 and 586.

*Credit, 3-4.*

#### 516. CHEMICAL MICROSCOPY.

Optics of the microscope, micrometry, microscopic study of fibers, crystals, physicochemical phenomena, qualitative analysis, and an introduction to electron microscopy.

Prerequisite, Chem 513 or permission of instructor.

Two 3-hour laboratory periods. *Credit, 2.* Mr. Roberts.

#### 517. MICROQUANTITATIVE ANALYSIS.

Quantitative determination of carbon, hydrogen, oxygen, nitrogen, sulfur, halogens, phosphorous. Both organic and inorganic compounds included in microgram scale analyses.

Prerequisite, Chem 513 or permission of instructor.

One 4-hour laboratory period.

*Credit, 1.*

#### 519. ELECTRONICS INSTRUMENTATION FOR SCIENTISTS.

Laboratory-oriented course. Begins with electronic principles and leads through servo-systems, operational amplifiers, digital circuits, and other measurement devices.

Two 3-hour laboratory periods.

Prerequisites, one year of physics and permission of instructor.

Mr. Barnes, Mr. Curran.

#### 544. RADIOCHEMISTRY.

Character of atomic nuclei, nuclear reactions, radiation and its detection, and techniques for the study and utilization of radionuclides.

Three class hours, one 3-hour laboratory period.

Prerequisite, Chem 210 or 127 or permission of instructor.

*Credit, 4.* Mr. Richason.

#### 546. THEORETICAL INORGANIC CHEMISTRY.

Survey of theoretical aspects of inorganic chemistry chosen from such topics as electronic structure and its relation to periodic properties, chemical bonding, molecular structure, coordination chemistry, acid-base theory, non-aqueous systems, and reaction mechanisms.

Prerequisite, Chem 585.

#### 547. INORGANIC CHEMISTRY OF THE COMMON ELEMENTS.

Chemistry of common element compounds based on thermodynamics, kinetics, structure, bonding, and periodicity (Optional 2-credit, 6-hour inorganic technique laboratory on demand.)

Prerequisite, Chem 546 or permission of instructor.

*Credit, 3-5.*

#### 571. ADVANCED ORGANIC CHEMISTRY.

An intensive survey of basic fundamentals; brings the student up-to-date on current work. Includes a detailed mechanistic study of some of the more important organic reactions.

Prerequisite, one year of organic chemistry or permission of instructor.

#### 572. IDENTIFICATION OF ORGANIC COMPOUNDS.

Identification of unknowns, both single compounds and mixtures of organic compounds, by their reactions, preparation of derivatives, spectra, and other physical properties. Two class hours, two 3-hour laboratory periods.

Prerequisites, one year of organic chemistry and permission of instructor.

*Credit, 4.*

#### 594. ADVANCED PHYSICAL CHEMISTRY.

Survey of modern physical chemistry emphasis on fundamentals of quantum mechanics and statistical mechanics. For students not taking further advanced work in these areas.

Prerequisite, Chem 586.

#### 595. ADVANCED PHYSICAL CHEMISTRY.

Topics such as chemical thermodynamics, statistical mechanics, introductory quantum chemistry, and theories of gases, liquids, and solids.

Prerequisite, Chem 586.

#### COURSES NOT FOR MAJOR CREDIT

(No graduate credit for students majoring in chemistry)

## UNIVERSITY OF MASSACHUSETTS

### 561, 562. ORGANIC CHEMISTRY.

Introduction to the chemistry of carbon compounds. Survey of the principal classes of organic compounds and their reactions with emphasis on the relation of structure and reactivity.

Prerequisite, Chem 112. *Credit, 3 each semester.*

### 563, 564 ORGANIC CHEMISTRY LABORATORY.

Application of the experimental techniques of organic chemistry to the preparation, purification, and identification of organic compounds.

One 3-hour laboratory period.

Concurrent enrollment in Chem 561, 562 required.

*Credit, 1 each semester.*

### 580. ELEMENTARY PHYSICAL CHEMICAL LABORATORY.

One 3-hour laboratory period.

Concurrent enrollment in Chem 582 required

*Credit, 1. Mr. Stengle.*

### 581. ELEMENTARY PHYSICAL CHEMISTRY.

Basic principles of physical chemistry designed for students with a limited mathematical background. Not open to chemistry majors.

Prerequisites, Chem 112, Physics 142, and Math 124.

*Mr. Stengle.*

### 582. ELEMENTARY PHYSICAL CHEMISTRY.

Continuation of Chemistry 581.

Two class hours.

*Credit, 2. Mr. Stengle.*

### 585, 586. PHYSICAL CHEMISTRY.

Fundamental theories and laws of physical chemistry.

Prerequisites, Math 174 and Physics 142.

*Credit, 3 each semester.*

### 587, 588. PHYSICAL CHEMISTRY LABORATORY.

Experience in modern physicochemical techniques. Concurrent enrollment in Chem 585, 586 required.

*Credit, 2 each semester. Mr. Stidham.*

## CIVIL ENGINEERING

CHARLES E. CARVER, JR., *Professor*, B.S.C.E., Vermont, 1947; M.S.C.E., Massachusetts Institute of Technology, 1949; D.S., 1955.

ALEXANDER CHAJES, *Associate Professor*, B.S.C.E., Cooper Union, 1952; M.S.C.E., Polytechnical Institute, 1955; Ph.D., Cornell, 1964.

JOSEPH M. COLONELL, *Professor*, B.S.C.E., Colorado, 1958; M.S.C.E., Washington State, 1962; Ph.D., Stanford, 1966.

FRANCIS A. DIGIANO, *Associate Professor*, B.S.C.E., Massachusetts, 1964; M.S.C.E., Tufts, 1965; Ph.D., Michigan, 1969.

FREDERICK J. DZIALO, *Associate Professor*, B.S.C.E., Massachusetts, 1954; M.S.C.E., 1957; Ph.D., Rensselaer Polytechnic Institute, 1965.

RICHARD J. FARRIS, *Associate Professor*, M.S.C.E., Utah, 1969; Ph.D., 1970.

TSUAN H. FENG, *Professor*, B.S.C.E., Pei-Yang University, China, 1940; M.S.C.E., Wisconsin, 1946; Ph.D., 1950.

DENTON B. HARRIS, *Assistant Professor*, B.S.C.E., Massachusetts, 1952; M.S.C.E., 1953.

KARL N. HENDRICKSON, *Professor*, B.S.G.E., Maine, 1938; B.S.C.E., 1939; M.S.C.E., 1941.

WILLIAM E. HERONEMUS, *Professor*, B.S., United States Naval Academy, 1941; M.S., Massachusetts Institute of Technology, 1948.

GABBIEL HORVAY, *Professor*, B.S., New York University, 1933; E.E., Columbia, 1931; Ph.D., 1939.

JOSEPH S. MARCUS, *Professor and Associate Dean*, B.S.Ch.E., Worcester Polytechnic Institute, 1944; M.S.C.E., Massachusetts, 1954.

MELTON M. MILLER, JR., *Associate Professor*, B.S.C.E., Vermont, 1955; M.S.C.E., Purdue, 1958; Ph.D., 1964.

PAUL W. SHULDINER, *Professor*, B.S.C.E., University of Illinois, 1951; M.S.C.E., 1953; Eng.D., California, Berkeley, 1961.

FRED D. STOCKTON, *Associate Professor*, B.S.C.E., Alabama, 1942; M.E., Brown, 1949; Ph.D., 1953.

The Civil Engineering Department offers the M.S. and Ph.D. degrees in Civil Engineering, Environmental Engineering, and Ocean Engineering. The two latter programs and the corresponding degrees and degree requirements are described elsewhere in this Bulletin under the corresponding headings. The Master of Science degree in Civil Engineering requires 31 graduate credits, of which six must be for a thesis or project with report, at the discretion of the Guidance Committee. There are the following options, each with a required core of four of five courses: Environmental Engineering, Fluid Mechanics and Hydraulics, Mechanics and Structures, Ocean Engineering, Soil Mechanics and Foundations, and Transportation Engineering.

## Civil Engineering

### GRADUATE FACULTY

MERIT P. WHITE, *Commonwealth Professor and Head of the Department of Civil Engineering*, B.A., Dartmouth, 1930; C.E., 1931; M.S.C.E., California Institute of Technology, 1932; Ph.D., 1935.

WILLIAM A. NASH, *Professor and Graduate Program Director*, B.S.C.E., Illinois Institute of Technology, 1944; M.S., 1946; Ph.D., Michigan, 1949.

DONALD D. ADRIAN, *Professor*, B.A., Notre Dame, 1957; B.S., 1958; M.S., California at Berkeley, 1959; Ph.D., Stanford University, 1964.

ROBERT R. ARCHER, *Professor*, B.S., Massachusetts Institute of Technology, 1952; Ph.D., 1956.

STANLEY M. BEMBEN, *Associate Professor*, B.S., Massachusetts, 1956; M.S., Illinois, 1958; Ph.D., Cornell, 1966.

BERNARD B. BERGER, *Professor*, B.S., Massachusetts Institute of Technology, 1935; M.S., Harvard, 1948.

WILLIAM W. BOYER, *Professor*, B.S.C.E., North Carolina State, 1947; M.S.C.E., 1950.

## CIVIL ENGINEERING

The requirements for the degree of Doctor of Philosophy are specified by the Graduate School. The student's course of study, including both technical and non-technical courses as well as the dissertation topic, is determined by the student and individual guidance committee. It is intended that the entire program, including all non-technical courses, shall be related to the candidate's interests and career plans.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY

700. SPECIAL PROBLEMS. *Credit, 3-6.*

710. TRANSPORTATION ANALYSIS AND PLANNING. Analysis of traffic and transportation engineering problems in highways, railroads and airports and the planning related to those facilities.

Prerequisite, permission of instructor.

Mr. Shuldiner, Mr. Webster.

715. PAVEMENT DESIGN.

The theory of flexible and rigid pavement design; soil conditions, joints, base and subgrade material and mix.

Mr. Boyer.

716. TRANSPORTATION DESIGN.

Design of the visible features of rural and urban roadways and intersections.

Mr. Boyer, Mr. Webster.

720. THEORETICAL SOIL MECHANICS.

The behavior of soil masses subjected to such forces as seepage, frost and imposed loads.

721. APPLIED SOIL MECHANICS.

Solution of case problems applying the principles of soil mechanics to the design of embankments, retaining walls, footings, raft foundation, and pile structures.

Prerequisite, CE 720. Mr. Bemben, Mr. Hendrickson.

722. SEEPAGE ANALYSIS.

Analytical study of ground water and seepage problems related to earth structures.

Mr. Hendrickson.

723. SHEAR STRENGTH OF SOILS.

Survey of current theory and research.

Mr. Bemben.

CE 724. SUBMARINE SOIL MECHANICS AND FOUNDATION ENGINEERING (OE 724).

Exploration of marine sediments, assessment of geotechnical properties and methods for their alteration, submarine slope stability, and foundation design factors for structures on and in marine sediments.

Prerequisite, CE 220 or equivalent.

Mr. Bemben.

730. PLASTIC STEEL DESIGN.

Plastic analysis and design of steel frames, plates, and shells.

Prerequisites, CE 331 and 532.

Mr. Chajes, Mr. Dzialo, Mr. Stockton.

731, 732. CIVIL ENGINEERING ANALYSIS I, II.

Mathematical and computational methods for the solution of civil engineering problems. Topics include equilibrium problems in continuous systems and the solution of related self adjoint boundary value problems in one or more space variables; vibration and stability problems, orthogonal functions, and eigenvalue problems; propagation problems in discrete and continuous systems.

Prerequisite: mathematical background covering topics in advanced engineering mathematics.

*Credit, 3 each semester.* Mr. Archer, Mr. Stockton.

## GRADUATE SCHOOL

734. NUMERICAL METHODS IN STRUCTURAL MECHANICS.

Application of numerical methods to the solution of problems of structural mechanics. Finite difference techniques and other methods for the solution of problems in the vibration, stability and equilibrium of structural elements.

Prerequisite, Math 585, introductory computer programming, or permission of instructor.

Mr. Archer, Mr. Miller, Mr. Stockton.

CE 738. ANALYSIS AND DESIGN OF OCEAN ENGINEERING STRUCTURES (OE 738).

Techniques for analysis and prediction of loading, performance, and durability of fixed coastal and offshore structures; examination of structural design factors peculiar to the marine environment.

Prerequisite, CE/OE 559.

Mr. Miller, Mr. Nash.

741. STRUCTURAL DYNAMICS.

Behavior of linear and non-linear mechanical systems subjected to periodic forces, to non-periodic forces and to shock loads.

Mr. Archer, Mr. Chajes, Mr. Dzialo, Mr. Nash, Mr. White.

742. EXPERIMENTAL STRESS ANALYSIS.

Experimental procedures for determination of stresses and strains due to static and dynamic loads.

Mr. Harris.

743. ELASTICITY.

General equations of the mathematical theory of elasticity in space. Plane strain and plane stress in cartesian, polar, and general orthogonal coordinates.

Mr. Archer, Mr. Dzialo, Mr. Nash, Mr. Stockton.

744. THEORY OF PLATES.

Classical theory of plates as well as modern developments. Relationship of the general theory of elasticity to plate theory.

Mr. Archer, Mr. Dzialo, Mr. Nash, Mr. Stockton.

745. STRUCTURAL STABILITY.

Linear and non-linear buckling of columns, frames, plates and shells; elastic, inelastic, and finite deformation theories. Exact solutions and approximate solutions by energy and finite difference methods.

Mr. Archer, Mr. Chajes, Mr. Nash.

746. SEISMIC ANALYSIS OF STRUCTURES.

Principles of engineering seismology including the analysis and design of structures to resist earthquake motions.

Prerequisite, CE 741.

Mr. Chajes, Mr. Dzialo, Mr. Nash, Mr. White.

747. STRUCTURAL DYNAMICS II.

A continuation of CE 741. Emphasis on analysis of civil engineering structures subject to various steady state and transient loadings.

Prerequisite, CE 741.

Mr. Chajes, Mr. Dzialo, Mr. Nash, Mr. White.

748. STRUCTURAL SHELLS.

Analysis of structural shells. Membrane theory, bending theory of shells of revolution, shear deformation shell theory, nonlinear theories, stability.

Prerequisite, permission of instructor.

Mr. Archer, Mr. Nash.

CE 751. FLUID MECHANICS OF THE OCEAN (OE 751).

Introduction to geophysical fluid dynamics. Emphasis on large-scale interactions between the atmosphere and the oceans.

Prerequisite, CE 256/556 or equivalent.

Mr. Colonell, Mr. Mangarella.

## UNIVERSITY OF MASSACHUSETTS

### CE 752. OCEAN WAVE THEORY (OE 752).

Classical theories of water waves, generation and propagation of waves at sea; observation and analysis of sea waves, wave spectra, sea forecasting, and wave effects.  
Prerequisite, CE 256/556 or equivalent. Mr. Colonell.

### 763. SUBSURFACE HYDROLOGY.

Interrelation of surface and subsurface hydrology. Saturated and unsaturated flow in permeable media. Development and utilization of subsurface waters. Chemical, bacteriological, and physical aspects of ground water quality. Deep well liquid wastes disposal.  
Prerequisite, CE 660 or permission of instructor. Mr. Adrian.

### CE 765. COASTAL AND ESTUARINE HYDRODYNAMICS (OE 765).

Techniques for analysis, simulation, prediction, and measurement of hydrodynamic behavior of coastal and estuarine waters. Environmental considerations in the planning, design, construction, and operation of engineering works in coastal waters.  
Prerequisites, CE 256/556 and CE/OE 559, or equivalent. Mr. Colonell.

### 770. ENVIRONMENTAL ENGINEERING DESIGN.

Selection, evaluation, and design of environmental engineering processes and systems based on laboratory evaluations and pilot plant studies.  
Prerequisites, CE 771 and 772. Mr. DiGiano, Mr. Lindsey.

### 771. UNIT PROCESSES OF ENVIRONMENTAL ENGINEERING.

Application of biological processes in environmental engineering: aerobic and anaerobic biological oxidation. Design of aeration and disinfection systems.  
Prerequisite, CE 669 and 670. Mr. Lindsey.

### 772. UNIT OPERATIONS OF ENVIRONMENTAL ENGINEERING.

Application of physical and chemical processes in environmental engineering: sedimentation, flotation, filtration, adsorption, ion exchange, drying and chemical coagulation.  
Prerequisites, CE 669 and 670. Mr. DiGiano.

### CE 773. AIR SAMPLING AND ANALYSIS.

Applications of fluid mechanics and gas laws to measurement and collection of atmospheric pollutants which are injurious to health. These pollutants are analyzed by various chemical techniques.  
Prerequisite, permission of instructor. Mr. Halitsky.

### 774. ADVANCED WASTE TREATMENT.

Application of new techniques for treatment of waste water with the ultimate objective of providing closed-cycle use. Methods of removing nonbiodegradables and inorganics from wastewater using physical and chemical processes.  
Prerequisites, CE 771 and 772. Mr. DiGiano.

### 775. ENVIRONMENTAL SYSTEMS SIMULATION.

Theoretical and practical factors governing simulation in environmental engineering systems. Mathematical models of water resources, water supply, waste treatment and disposal systems.  
Prerequisites, Math 187 and CE 270. Mr. Adrian, Mr. Mangarella.

### 776. BIO-INSTRUMENTATION OF ENVIRONMENTAL SYSTEMS.

Instrumentation and analytical techniques for research on biological, biochemical, and chemical systems influencing man's environment. Spectral theory and absorption spectroscopy, chromatographic and mass spectrographic analysis, automatic analysis instruments.  
Prerequisite, CE 672 or equivalent. Mr. Kuzminski.

### 780. MECHANICS OF MATERIALS.

Advanced topics related to the mechanical behavior of structural materials. Mr. Harris.

## CIVIL ENGINEERING

### CE 783. STRUCTURAL MECHANICS OF DEEP SUBMERSIBLE VEHICLES (OE 783).

Elastic and inelastic action of pressure hull structure for deep submersible vehicles; design criteria for stiffened shells and plating common to such systems.  
Prerequisite, CE 141 or CE 240. Mr. Nash.

### CE 792. DEEP OCEAN SYSTEMS ENGINEERING AND DESIGN (OE 792).

Systems engineering applied to analysis and synthesis of systems capable of doing useful work in the deep oceans. Emphasis on design of deep-submergence vehicles. Three class hours, one 3-hour laboratory period.  
Credit, 4. Mr. Heronemus.

### CE 794. FUNDAMENTALS OF NAVAL ARCHITECTURE (OE 794).

Vehicle buoyancy and stability, vehicle resistance and production of thrust, motion of surfaced and submerged bodies, vehicle maneuvering and control, towing and mooring line analysis. Three class hours, one 3-hour laboratory period.  
Credit, 4. Mr. Adams, Mr. Heronemus.

### CE 795. OCEAN ENGINEERING FIELD LABORATORY (OE 795).

Introduction to oceanographic measurements and ocean engineering field operations. Emphasis on development of practical approaches to problems in ocean environment.  
Prerequisite, OE core curriculum. Credit, 1-6.

### 850, 851. SEMINAR.

Presentation by the graduate student of selected current literature and research. Visiting lecturers. One class hour.  
Credit, 1.

### 800. MASTER'S THESIS.

Minimum credit, 6.

### CE 801. MASTER'S PROJECT

Research carried out and reported under the supervision of student's advisor as partial fulfillment of the requirements for Master's degree in Civil Engineering or Environmental Engineering. May not be taken by those taking CE 800, Master's Thesis.  
Credit, 3-6.

### 900. DOCTORAL DISSERTATION

Credit, 18.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit).

### 522. SOIL TESTING.

Sampling and testing of soils for engineering purposes. One class hour, two 3-hour laboratory periods.  
Prerequisite, CE 220 or equivalent. Mr. Bembem.

### 523. SOIL MECHANICS FOR TRANSPORTATION ENGINEERING.

Application of the principles of soil mechanics in the field of Transportation Engineering. Topics include evaluation of the stability of soils as subgrade and embankment materials, the role of the subgrade properties of soils on the design of pavements, and methods for improving the subgrade properties of soils.  
Prerequisite, CE 220. Mr. Bembem.

### 532. THEORY OF STRUCTURES II.

Analysis of statically indeterminate structures.  
Prerequisite, CE 230. Mr. Archer, Mr. Chajes, Mr. Nash, Mr. Stockton.

### 534. THEORY OF STRUCTURES III.

Analysis of complex or special structures.  
Prerequisite, CE 232; corequisite CE 331 and 333. Mr. Miller.

### 535. MATRIX ANALYSIS OF STRUCTURES.

Development and use of the flexibility and stiffness methods of matrix analysis for determinate and indeterminate structures.  
Prerequisite, CE 232. Mr. Archer, Mr. Chajes, Mr. Stockton.

## CIVIL ENGINEERING

### 540. STRENGTH OF MATERIALS II.

Calculation of stresses and strains in components of machines and structures.

Prerequisite, CE 141.

Mr. Archer, Mr. Chajes, Mr. Dzialo,  
Mr. Stockton, Mr. White.

### 556. INTRODUCTION TO HYDRODYNAMICS.

Mathematical treatment of basic theorems of classical hydrodynamics: potential flow, conformal mapping, wave and vortex motion. Practical application of hydrodynamic principles to engineering problems.

Prerequisite, Math 186 or permission of instructor.

Mr. Carver, Mr. Colonell.

### CE 559. ENGINEERING OCEANOGRAPHY (OE 559).

Physical, biological, chemical, and geological characteristics of the marine environment which are relevant to ocean engineering activities.

### 561. OPEN-CHANNEL FLOW.

Steady flow in open channels including channel transitions and controls, sediment transport, and elementary design of related hydraulic structures.

Prerequisite, CE 260.

Mr. Higgins, Mr. Mangarella.

### 575. ATMOSPHERIC DISPERSION OF POLLUTANTS.

Physical and dynamical properties of the atmosphere and their effect on dispersion of air-borne material. Methods of calculation of concentration fields in simple and complex flowfields. Practical approaches to the analysis of diffusion from point, jet, and urban area sources. Review of research techniques for measuring diffusion parameters.

Prerequisite, Math 174.

Credit, 2. Mr. Halitsky.

### CE 581. MATERIALS IN THE OCEAN ENVIRONMENT (OE 581).

Response of materials to the ocean environment, including theories of corrosion, corrosion control, fouling and antifouling systems.

Mr. Harris.

### CE 590. ENGINEERING DESIGN OF SYSTEM PAYLOAD DEVICES (OE 590).

Techniques for augmentation of man's abilities in the seas. Underwater illumination, manipulative and prosthetic devices, tools and instruments for underwater work.

Prerequisite, permission of instructor.

Mr. Adams.

### CE 591. MARINE DESIGN (OE 591).

Fundamentals of ocean engineering design technology. Specific emphasis on matters peculiar to the marine environment.

Three class hours, one 3-hour laboratory period.

Credit, 4. Mr. Adams, Mr. Heronemus.

### CE 593. PUBLIC POLICY AND THE USE OF THE SEAS (OE 593).

Policies of the United States and other nations toward sovereignty over and use of the seas. Laws and agreements relating to jurisdiction over oceanic and estuarine resources and arrangements for prevention of their degradation.

Credit, 2. Mr. Heronemus, Mr. Zahradnik.

### 605. ADVANCED SURVEYING.

Elements of astronomical, geodetic, and photogrammetric surveying; coordinate systems and map projections.

Two class hours, one 3-hour laboratory period.

Prerequisite, CE 101.

Mr. Boyer, Mr. Weidmann.

### 611. TRAFFIC ENGINEERING.

Engineering solutions to planning, design, and operations problems of urban and rural street and highway networks. Two class hours, one 3-hour laboratory period.

Prerequisite, CE 210.

Mr. Boyer, Mr. Webster.

### 634. ADVANCED TOPICS IN CONCRETE.

Design of various types of reinforced concrete-building frames; elastic theory and ultimate-strength procedures.

Prerequisites, CE 232 and 333.

Mr. Miller.

## GRADUATE SCHOOL

### 657. THEORY OF HYDRAULIC SIMILITUDE.

Hydraulic similitude, dimensional analysis, methods of obtaining dynamic similarity in hydraulic models in actual practice, analysis of typical hydraulic models.

Prerequisite, CE 257.

Mr. Carver.

### 660. HYDROLOGY.

The hydrologic cycle, including precipitation, runoff, ground water, flood routing, reservoir sedimentation, water law, and applications of hydrologic techniques to water resources engineering.

Prerequisite, CE 260 or permission of instructor.

Mr. Higgins.

### 662. WATER RESOURCES ENGINEERING.

Planning and design of dams, reservoirs, and other related hydraulic structures, including analysis of existing and proposed water resources projects.

Prerequisite, CE 260 or permission of instructor.

Mr. Higgins.

### 665. ENVIRONMENTAL INSTITUTIONS AND POLICIES.

Public policies and laws relating to the use and conservation of water, air, land resources. Analysis of environmental-related governmental organizations at the federal, state, and local levels.

Prerequisite, permission of instructor.

Mr. Adrian, Mr. Berger.

### 669. ENVIRONMENTAL ENGINEERING TECHNOLOGY.

The technology available to provide clean air, clean water, and to dispose of solid waste. Some field trips to see environmental effects, treatment plants, and quality-monitoring stations.

One 4-hour laboratory (or field trip) and one 1-hour lecture.

Prerequisite, permission of the instructor.

Credit, 2.

### 670. ADVANCED ENVIRONMENTAL ENGINEERING PRINCIPLES.

The underlying physical, chemical, and biological principles involved in engineering studies of air, water, and solid-waste pollution problems are developed. Basic concepts are combined to model pollution-control systems and responses of the atmospheric, aquatic, and terrestrial environments.

Prerequisite, permission of instructor.

Mr. DiGiano.

### 671. INDUSTRIAL WASTE TREATMENT AND CONTROL.

Composition of industrial effluents; pollution criteria and effects of industrial wastes on receiving waters; physical, chemical, and biological methods and applications in treatment.

Two class hours, one 3-hour laboratory period.

Prerequisite, permission of instructor.

Mr. Lindsey.

### 672. ENVIRONMENTAL ENGINEERING ANALYSIS I.

An application of chemical principles to environmental engineering analysis with specific reference to pollution indices.

Two class hours, one 3-hour laboratory period.

Prerequisite, Chem 112.

Mr. Kuzminski.

### 673. ENVIRONMENTAL ENGINEERING ANALYSIS II.

The fundamental microbiological and biochemical properties of the microorganisms important in environmental engineering practice. Two class hours, one 3-hour laboratory period.

Prerequisite, CE 672 or permission of instructor.

Mr. Kuzminski.

### 674. RADIOLOGICAL HEALTH ENGINEERING.

Basic principles and procedures pertaining to the safe control, use, and disposal of common sources of ionizing radiation.

Mr. Marcus.

### 675. SURFACE WATER QUALITY CONTROL.

Evaluation and control of water quality in streams, lakes,

## UNIVERSITY OF MASSACHUSETTS

and reservoirs. Mathematical analyses of patterns of water movement and their relation to water quality.  
Prerequisite, permission of instructor. Mr. Feng.

### 676. SOLID WASTES.

Production, collection, transportation, treatment, and disposal of solid waste products (including municipal, industrial, and agricultural wastes).  
Prerequisite, permission of instructor. Mr. Kuzminski.

### COURSES NOT FOR MAJOR CREDIT

(No graduate credit for students majoring in Civil or Environmental Engineering)

### 520. SOIL MECHANICS.

Engineering uses and mechanical properties of soils.  
Two class hours, one 3-hour laboratory period.  
Mr. Hendrickson.

### 571. INTRODUCTION TO ENVIRONMENTAL POLLUTION CONTROL.

Basic engineering aspects of environmental pollution control.  
Mr. Feng, Mr. Ward

## Classics

### GRADUATE FACULTY

GILBERT W. LAWALL, *Professor and Chairman of the Department of Classics*, B.A., Oberlin College, 1957; Ph.D., Yale University, 1961.

VINCENT J. CLEARY, *Associate Professor and Graduate Program Director*, B.S., St. Joseph's College, 1954; M.A., Villanova University, 1959; Ph.D., University of Pennsylvania, 1967.

ROBERT H. DYER, *Professor*, B.A., Auckland University College, 1954; M.A., University of New Zealand, 1955.

ROBERT J. GOAR, *Associate Professor*, B.A., Harvard College, 1954; M.A., Harvard University, 1958; Ph.D., 1968.

JOHN D. MARRY, *Assistant Professor*, B.A., Fordham University, 1968; Ph.D., Stanford University, 1973.

EDWARD PHINNEY, JR., *Professor*, B.A., University of Oregon, 1957; M.A., 1959; Ph.D., University of California at Berkeley, 1963.

ELIZABETH LYDING WILL, *Associate Professor*, B.A., Miami University, 1944; M.A., Bryn Mawr College, 1945; Ph.D., 1949.

The degree of Master of Arts in Teaching (M.A.T.) may be earned in Latin and Classical Humanities. The program is designed to prepare students for teaching careers in secondary schools. It requires two full years of work and may include study in Italy during the summer. Teaching assistantships and summer scholarships are available. A minimum of 39 credits is required, distributed as follows: 21 credits in Latin and Classical Humanities, nine credits in professional education, and nine credits in a teaching practicum accompanied by a seminar. The credits in Classical Humanities may include courses in art, history, philosophy, English, and comparative literature. Courses may be taken at the neighboring colleges (Amherst, Mount Holyoke, and Smith) under the Five College Cooperation Program. Supervised practice teaching is done in Latin

## CLASSICS

and classics courses at the University (pre-practicum) and in secondary schools (practicum). Special innovative projects and pilot programs are being conducted in schools throughout the state, staffed by M.A.T. candidates at the University. All students in the program must equip themselves with a minor in some other teaching field such as English, French, Spanish, history, or mathematics. At least 18 credits of undergraduate and graduate work must be earned in the minor field. Much or all of this should be done at the undergraduate level before the student enters the M.A.T. program. Applicants should also have completed courses in educational or adolescent psychology and foundations or philosophy of education at the undergraduate level. Graduation requirements include demonstration of familiarity with Latin authors on a departmentally approved reading list and successful completion of a comprehensive examination.

### Classics

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### CLASSICS 505. THE MATERIAL WORLD OF THE ROMANS.

The Romans as people on the basis of the archaeological evidence about their daily lives (their houses, pottery, coins, glass, textiles). Special attention to the finds from Pompeii.

#### CLASSICS 506. THE ANCIENT CITY

The city and the rise of city planning in the Near East, Greece, and Italy; stress on sociological and economic aspects. Special attention to Rome and its urbanization in the Empire.

#### CLASSICS 528. RELIGIONS OF THE GREEK WORLD

Origins and development of ancient Greek worship, deities, cults, festivals, and life-crisis ceremonies; prehistoric, Near Eastern, and Indo-Iranian influences; chthonic, philosophical, and mystical reactions to received religion.

#### CLASSICS 529. RELIGIONS OF THE ROMAN WORLD

Origins and development of native Roman worship, deities, cults, festivals, life-crisis ceremonies; importation of other cults, festivals; nature and causes of the failure of paganism and the victory of Christianity.

#### CLASSICS 585. THE DEEP STRUCTURES OF GREEK THOUGHT

The development of thought in the Greek world from Homer to Aristotle, tracing the evolution of mental concepts and ways of thinking about man and the world around him

#### CLASSICS 595. INTERPRETING ANCIENT MYTH

What some thinkers have said about ancient myth for over 3000 years, and why.

#### CLASSICS 608. THE TEACHING OF CLASSICAL HUMANITIES IN SECONDARY SCHOOLS.

Guidance in preparing enrichment material in language classes and in designing and teaching courses dealing with classical life and institutions, drama, art, mythology, and literature on the secondary level.

#### CLASSICS 610. STUDENT TEACHING. CLASSICS

Supervised practice teaching in secondary schools.  
*Credit, 1-12.*

#### CLASSICS 700. SPECIAL PROBLEMS.

Directed study of some problem in classical civilization.  
*Credit, 1-6.*

## COMMUNICATION DISORDERS

### CLASSICS 701. THE ROMAN CITY.

The topography, monuments, and daily life of selected Roman cities with emphasis on Rome itself. Sociological, economic, and environmental factors in ancient city planning. May involve travel and study in Italy. By arrangement (summer only).  
*Credit, 3-6.*

### Greek

### GREEK 700. SPECIAL PROBLEMS.

Directed study of some problems in Greek literature.  
*Credit, 1-6.*

### Latin

### LATIN 505. ORAL INTERPRETATION OF LATIN LITERATURE.

Practice in the expressive reading of Latin texts.  
One class hour.  
*Credit, 1.*  
*May be repeated up to 3 credits.*

### LATIN 515. ADVANCED GRAMMAR AND STYLE.

Structure of the language; evolution of grammatical and linguistic concepts and terminology used to describe them. Analysis of the style of representative Latin prose authors and exercises in composition.

### LATIN 607. TEACHING THE LATIN LANGUAGE.

Methods and materials for teaching the Latin language in secondary schools. May be coordinated with practice teaching experiences.  
*Credit, 3-6.*

### LATIN 608. TEACHING LATIN LITERATURE.

Methods and materials for teaching Latin literature in secondary schools. May be coordinated with practice teaching experiences.  
*Credit, 3-6.*

### LATIN 610. STUDENT TEACHING: LATIN.

Supervised practice teaching in secondary schools.  
*Credit, 1-12.*

(Two of the following courses — Latin 625-633 — are offered each semester.)

### LATIN 625. THE LATIN POLITICAL TRACT.

Selections from Sallust and Caesar accompanied by an historical and literary analysis of their works.

### LATIN 626. LATIN DIDACTIC EPIC.

Selections from Lucretius, Vergil's *Georgics*, and Ovid's *Ars Amatoria*.

### LATIN 627. LATIN HISTORY AND BIOGRAPHY.

Selections from Livy, Tacitus, and Suetonius.

### LATIN 628. LATIN DRAMA.

Selected plays of Plautus, Terence, and Seneca.

### LATIN 629. LATIN ESSAYS AND LETTERS.

The Roman mind as revealed in the philosophical works of Cicero and the moral epistles of Seneca; Roman private life and personal concerns as revealed in the letters of Cicero and Pliny.

### LATIN 630. LATIN ELEGIAC POETRY.

Selections from Catullus, Tibullus, Propertius, and Ovid.

### LATIN 631. CICERO'S ORATIONS.

The major orations of Cicero interpreted against their social and political background and analyzed according to ancient rhetorical theories.

### LATIN 632. LYRIC POETRY.

Selected lyrics of Catullus and Horace.

### LATIN 633. VERGIL'S *AENEID*.

The entire poem with attention to traditional and contemporary critical perspectives and evaluations.

## GRADUATE SCHOOL

### LATIN 700. SPECIAL PROBLEMS.

Directed study of some problem in Latin literature.  
*Credit, 2-6.*

### LATIN 701. EXPLORING LATIN LITERATURE.

Exploratory readings in a variety of Latin authors.  
*Credit, 3-6.*

### LATIN 790. SEMINAR.

Intensive, advanced study of some aspect of Latin literature.  
*Credit, 3-6.*

### LATIN 800. MASTER'S THESIS.

Research and writing of a master's thesis. Optional.  
*Maximum credit, 9.*

## Communication Disorders

### GRADUATE FACULTY

E. HARRIS NOBER, *Professor and Chairman of the Department of Communication Disorders*, B.A., 1951; M.A., Brooklyn College, 1952; Ph.D., Ohio State, 1957.

ARTHUR BOOTHROYD, *Associate Professor*, B.Sc., Kingston-upon-Hull, 1957; Ph.D., Manchester, 1968.

ROY W. GENDEL, *Associate Professor*, B.A., Knox College, 1958; M.S., Wisconsin, 1962; Ph.D., CID-Washington University, 1968.

JAY MELROSE, *Professor*, B.A., Queens College, 1948; M.A., 1953; Ph.D., Illinois, 1954.

GARY P. NERBONNE, *Associate Professor*, B.S., Central Michigan, 1959; M.A., 1962; Ph.D., Michigan State, 1967.

HENRY B. PEIRCE, JR., *Assistant Professor*, B.A., Massachusetts, 1950; M.A., Michigan, 1955; Ed.D., Boston University, 1970.

CHARLENA M. SEYMOUR, *Assistant Professor*, B.A., Howard, 1965; M.A., 1967; Ph.D., Ohio State, 1971.

HARRY N. SEYMOUR, *Assistant Professor*, B.A., Howard, 1964; M.A., 1969; Ph.D., Ohio State, 1971.

GILBERT C. TOLHURST, *Professor*, B.A., 1937; M.A., Brigham Young, 1946; Ph.D., Iowa, 1948.

The Department of Communication Disorders currently offers work leading toward the M.A. and Ph.D. degrees in Communication Studies. Applicants to the Graduate program should meet all requirements for admission to the Graduate School and either have an adequate undergraduate background in communication disorders or expect to correct deficiencies without graduate credit.

Graduate study leading to the M.A. is designed to prepare students for careers as speech pathologists, audiologists, and speech and hearing scientists, and is also preparatory for doctoral study in these fields.

The M.A. degree is offered under thesis and non-thesis option. Candidates must complete a minimum of 30 credits for either option. The thesis option allows up to six credits for the thesis.

Graduate study leading to the Ph.D. degree is designed to prepare students for positions of clinical and research leadership in academic, clinical, medical and research settings in such areas as speech pathology, audiology, language pathology and speech and hearing science.

## UNIVERSITY OF MASSACHUSETTS

For the Ph.D., a minimum of 60 credits beyond the bachelor's degree is required, exclusive of credit for the dissertation.

The Communication Disorders Clinic and the Communication Disorders Laboratory are available for clinical practicum work and for acquiring research experience. In terms of clinical preparation, on-campus and off-campus supervised clinical work is offered in order to help students meet professional requirements by the time of the completion of advanced degrees.

For both the M.A. and the Ph.D., plans of study are prepared individually in consultation with faculty advisers.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 700. SPECIAL PROBLEMS.

Independent study in special subjects. Not more than 9 credits may be applied toward the M.A. degree.

*Credit, 1-3 each semester; maximum credit, 9.*

##### 781. VOICE PROBLEMS.

Voice disorders, organic and functional; symptoms, and principles and techniques of therapy and diagnosis.

Prerequisites, Comm Studies 182 and 284 or equivalents.

Mr. Peirce.

##### 782. ADVANCED CLINICAL PRACTICE.

Supervised clinical practice with children and adults with various speech and hearing disorders; group and individual therapy techniques.

Prerequisites, Comm Studies 181, 182 and 284 or equivalents.

*Credits, 1-6.*

##### 783. INTRODUCTION TO EXPERIMENTAL PHONETICS.

Review of experimental research and instrumental approaches in the study and analysis of the phonetic elements of language. Individual student reports.

Prerequisites, Comm Studies 181, 284, or equivalents.

Mr. Nerbonne

##### 784. ORGANIC PATHOLOGIES OF SPEECH.

Etiology, classification, evaluation, and speech rehabilitation of cleft palate, laryngectomy, and other organic pathologies of speech.

Prerequisites, Comm Studies 283 and 284.

##### 785. NEUROPATHOLOGIES IN COMMUNICATION DISORDERS I.

Principles concerning etiologies, instruments for evaluation, classification, and methods of clinical management of acquired aphasia and cerebral palsy.

Prerequisites, Comm Studies 284 or equivalent.

##### 787. HEARING CONSERVATION AND INDUSTRIAL AUDIOLOGY.

Identification and management of the hearing-impaired in hospitals, public schools, and industry. Noise control and other preventative measures.

Prerequisite, Comm Studies 285.

##### 788. ADVANCED CLINICAL AUDIOLOGY.

Theories, methodologies, and procedures for special diagnostic testing in audiology. Hearing, selection and evaluation procedures.

Prerequisite, Comm Studies 285.

##### 789. TRENDS IN CONTEMPORARY AUDIOLOGY.

Investigation and evaluation of the recent research and advances in knowledge concerning the auditory capacities, and the management of audiological problems.

Prerequisite, Comm Studies 788.

Mr. Nober.

## COMMUNICATION DISORDERS

##### 790. BEHAVIOR MODIFICATION IN COMMUNICATION DISORDERS.

The habilitation and rehabilitation of speech and language disorders through behavior modification, using operant procedures.

Prerequisite, Comm Studies 182 and 283.

##### 791. MANAGEMENT OF COMMUNICATION DISORDERS PROGRAMS.

Investigation, management and supervision of speech pathology and audiology programs in public schools, rehabilitation centers, hospital clinics, and in special-education residential settings.

Prerequisite, permission of instructor

##### 792. THEORIES OF HEARING.

The current acoustic, psychophysiological, physical, anatomical, psychological, and clinical aspects of audition, and the theories of hearing developed to explain them.

Prerequisite, Comm Studies 284, 285, 287/587.

Mr. Tolhurst.

##### 793. HEARING AIDS AND AMPLIFICATION.

The nature and types of amplifying systems employed with hearing-handicapped. Electro-acoustic characteristics including gain, power, acoustic response, distortion, etc. Principles and methods of selection and usage of hearing-aids.

Prerequisite, Speech 788.

##### 794. DIFFERENTIAL DIAGNOSIS IN SPEECH & LANGUAGE DISORDERS.

Review, analysis and demonstrations of the diagnostic procedures used in the assessment and evaluation of speech and language disorders.

Prerequisites, Comm Studies 182 and 281/581.

##### 800. MASTER'S THESIS.

*Credit, 3-6.*

##### 810. SEMINAR IN RESEARCH TOPICS AND METHODS.

Desirable areas and topics of investigation; application methodology and bibliography. Tentative exploration of selected subjects. Offered for doctoral students as needed, with sections arranged for each of the principal areas of the department.

##### 881. ACOUSTIC PHONETICS.

In-depth study of the acoustic characteristics of speech; distinctive acoustic features of phonetic elements and their relations to production and reception; emphasis on laboratory approaches. Student research projects.

Prerequisite, Comm Studies 783.

##### 882. PHYSIOLOGICAL PHONETICS.

In-depth study of the physiological processes involved in speech and voice production; distinctive physiological features of phonetic elements; laboratory approaches. Student research projects.

Prerequisite, Comm Studies 783.

##### 884. GRADUATE SEMINAR IN COMMUNICATION DISORDERS.

Analysis and discussion of major problems in the field of communication disorders. One of the following topics is usually offered: a) communication disorders and the teacher, b) communication disorders in geriatrics, c) communication disorders and medicine, d) the non-verbal child, e) electrophysiologic audiometry and f) speech audiometry.

Prerequisite, permission of instructor. May be repeated for credit.

*Maximum credit, 9.*

##### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

##### 581. CLINICAL PROCEDURES.

Introduction to the clinical process in a Communication Disorders Clinic including personnel responsibilities, profes-

## COMMUNICATION STUDIES

sional ethics, techniques of differential diagnosis, study of clinical forms and referrals. Supervised observations of diagnostic and therapy sessions. Laboratory training in clinical equipment. Mr. Melrose.

### 586. REHABILITATION OF THE ACOUSTICALLY HANDICAPPED.

Techniques of speech therapy, auditory training, and speech reading for hard-of-hearing children and adults; multi-sensory approach to language development. Laboratory practice under supervision.

Prerequisite, Comm Studies 285.

### 587. FUNDAMENTALS OF HEARING AND SPEECH SCIENCE.

Investigation of physiological, acoustical, and psychological correlates of speech production, transmission, and reception. Exercises in the application of laboratory methods.

Prerequisites, Comm Studies 181 and 284. Mr. Nerbonne.

### 588. CLINICAL PRACTICE.

Supervised experience in therapy with individuals having articulatory-type disorders.

May be repeated once.

Prerequisites, Comm Studies 181 and 182. Credit, 1-3.

### 589. COMMUNICATION PROBLEMS OF THE DEAF AND HARD-OF-HEARING.

The physical, psychological, social, and educational problems and needs of the hearing handicapped.

Prerequisite, Comm Studies 250/550. Mr. Nober.

### 591. PEDIATRIC AUDIOLOGY.

Assessment and clinical management of infants and children with auditory disorders. Problems of differential diagnosis, screening techniques, conditioning procedures and electrophysiologic methods. Parental guidance and employment of amplification with children.

Prerequisites, Comm Studies 285 and 286/586.

### 592. LEARNING AND LANGUAGE DISABILITIES IN CHILDREN.

Learning disabilities associated with physical, psychological, and social etiologies. Problems of language development and cognitive disorders, remedial practices in reading and writing problems, and learning patterns of the culturally disadvantaged. Diagnostic assessment and educational processes outlined.

Mr. Nober.

### 595. STUTTERING.

Major theories of the etiology, diagnosis, and clinical management of stuttering.

Prerequisite, Comm Studies 182.

## Communication Studies

### GRADUATE FACULTY

KENNETH L. BROWN, *Associate Professor and Chairman of the Department of Communication Studies*, B.S., Syracuse, 1955; M.A., 1960; Ph.D., Northwestern, 1965.

VERNON E. CRONEN, *Associate Professor and Graduate Program Director*, B.A., Ripon College, 1963; M.A., 1968; Ph.D., Illinois, 1970.

JEFFREY P. BACAL, *Assistant Professor*, B.A., Dartmouth, 1968; M.A., 1970; Ph.D., Iowa, 1974.

VINCENT M. BEVILACQUA, *Professor*, B.A., 1957; M.A., Emerson, 1958; Ph.D., Illinois, 1961.

JANE BLANKENSHIP, *Professor*, B.A., Akron, 1956; M.A., 1957; Ph.D., Illinois, 1961.

JENNINGS BRYANT, *Assistant Professor*, A.B., Davidson College, 1967; M.Div., Louisville Presbyterian Theological Seminary, 1971; Ph.D., Indiana, 1974.

## GRADUATE SCHOOL

RICHARD L. CONVILLE, JR., *Assistant Professor*, B.A., 1965; M.A., Samford, 1968; Ph.D., Louisiana State, 1970.

LESLIE K. DAVIS, *Assistant Professor*, B.A., Slippery Rock State College, 1968; M.S., Indiana State University, 1969; Ph.D., Pennsylvania State, 1975.

RICHARD D. HARPER, *Assistant Professor*, B.A., Vermont, 1948; M.A., 1949; Ph.D., Wisconsin, 1951.

WILLIAM K. PRICE, *Assistant Professor*, B.A., Maryland, 1954; M.A., 1960; Ph.D., Wisconsin, 1964.

RONALD F. REID, *Professor*, B.A., Pepperdine College, 1950; M.A., New Mexico, 1951; Ph.D., Purdue, 1954.

MAURICE E. SHELBY, JR., *Associate Professor*, B.A., Washington, 1960; Ph.D., Ohio State, 1963.

HERMANN G. STELZNER, *Professor*, B.A., Emerson, 1953; M.A., 1955; Ph.D., Illinois, 1957.

RICHARD L. STROMGREN, *Assistant Professor*, B.A., Massachusetts, 1954; M.A., Northwestern, 1958.

The Department of Communication Studies offers programs leading toward the M.A. and Ph.D. degrees.

Graduate study leading to the Ph.D. in Communication Studies with a concentration in Communication and Rhetorical Theory emphasizes a combination of historical-critical and behavioral research methodologies for examining past and present phenomena of human communication.

Graduate study leading to the Ph.D. in mass communications emphasizes an interdisciplinary approach to the study of mass communications through which the graduate student interprets, consolidates, and makes more meaningful, information and research within the Department of Communication Studies and from other areas of the University interested in mass media. The program is designed to prepare students for academic careers and for research and development positions in commercial and public media.

The department requires a research tool. It is up to the student's Guidance Committee to require the specific competencies deemed appropriate to the candidate's research. For example, students doing quantitative research would probably need advanced work in statistics or computer science; students doing historical-critical research in classical rhetoric probably need a reading-knowledge of one or more languages.

Candidates for the M.A. degree select one of the following major areas of concentration: 1) mass communications, 2) communication and rhetorical theory, or 3) communication education.

Graduate work leading to an M.A. in mass communications provides the student with academic back-

## UNIVERSITY OF MASSACHUSETTS

ground for entering the communications industries in either educational or commercial media, and provides a foundation for doctoral study. The M.A. in Communication and Rhetorical Theory emphasizes theoretical, historical, and critical studies of these subjects and is designed primarily to prepare students for doctoral study and for careers in college and university teaching and research. Graduate work leading to the M.A. in Communication Education is a more general course of study to prepare candidates for secondary school teaching of interpersonal communication, oral interpretation, debate, theatre and mass communication.

Applicants to the graduate program should meet all requirements for admission to the Graduate School and either have a good undergraduate background in communication studies or proceed to correct deficiencies without graduate credit.

The M.A. degree is offered under a thesis and non-thesis option. Candidates must complete a minimum of 30 credits for both options. The thesis option allows up to six credits for the thesis. A minimum of 60 credits beyond the bachelor's degree, exclusive of credits for the dissertation, is required for the Ph.D. Plans of study are prepared individually in consultation with faculty advisers.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 700. SPECIAL PROBLEMS.

Independent study in special subjects. No more than 9 credits may be applied toward the M.A. degree.

*Credit, 1-3 each semester; maximum credit, 9.*

##### 707. SEMINAR IN MASS COMMUNICATIONS.

Revolving topics in mass communications; research papers, reports. Course may be repeated for credit; credit not granted for the same topic twice.

Prerequisite, 9 upper-division hours in mass communications and permission of instructor.

##### 712. RHETORIC OF ARISTOTLE.

Intensive study of the *Rhetoric* in translation; related concepts in other works of Aristotle. Lectures, discussion, papers.

##### 713. THEORIES OF LANGUAGE AND STYLE.

Theories of language and style from ancient times to the present. Emphasis on their application to rhetorical theory and criticism.

Prerequisite, 12 credits in communication and rhetorical theory. Miss Blankenship.

##### 714. EXPERIMENTAL STUDIES IN PERSUASION THEORY.

Examination of quantitative research studies in persuasion. Attention to experimental research.

Prerequisites, Comm Studies 211/511 and 350/650.

Mr. Cronen.

##### 715. DIRECTING THE FORENSIC PROGRAM.

Problems related to forensic programs: coaching individual and group activities, judging, tournament administration, and administration of the entire forensics program.

Prerequisite, permission of instructor. Mr. Matlon.

##### 718. SEMINAR IN PUBLIC ADDRESS.

Selected topics in the history and criticism of public address.

Prerequisite, permission of instructor. May repeat for a total of 6 credits. Mr. Reid

##### 719. SEMINAR IN RHETORICAL THEORY.

Selected topics in rhetorical theory; detailed consideration of

## COMMUNICATION STUDIES

the relationship of rhetoric to other disciplines, specific concepts, periods, and figures.

Prerequisite, permission of instructor. May repeat for a total of 6 credits.

##### 720. SEMINAR IN MEDIA RESEARCH METHODS.

Historical, descriptive, critical, experimental, and quantitative mass communications research methodologies.

Prerequisite, 9 upper-division hours in mass communications and permission of instructor. May repeat for a total of 6 credits. Mr. Meyer.

##### 721. SEMINAR IN BROADCASTING.

Revolving topics pertaining to various political, social, and economic aspects of broadcasting; research papers, reports.

Prerequisite, 9 upper-division hours in mass communications and permission of instructor. Course may be repeated for credit, but students may not receive credit for the same topic twice.

##### 722. SEMINAR IN FILM.

Intensive study of topics in film history, theory, and criticism. Revolving topics.

Prerequisite, 9 upper-division hours in mass communications and permission of instructor. Course may be repeated; credit not granted for the same topic twice.

Mr. Bacal, Mr. Stromgren.

##### 733. MASS PERSUASION.

The process, functions, and effects of persuasion on a mass level. The role of the mass media.

Mr. Mevet

##### 734. FILM AND SOCIETY: THE CINEMA AS A SOCIAL FORCE.

The effective and reflective roles of film in society. Emphasis on the relationship of society to the structure, development, function, and effects of the motion picture.

Mr. Bohn.

##### 770. HISTORY OF COMMUNICATION EDUCATION.

Speech pedagogy from ancient Greece to the present. Emphasis on speech-communication education in America.

Mr. Brown

##### 771. SEMINAR IN COMMUNICATION PEDAGOGY.

Selected topics relevant to the principles and methods of teaching communication. Attention to communication and rhetorical theory.

Mr. Brown, Mr. Price.

##### 800. MASTER'S THESIS.

*Credit, 3-6.*

##### 810. SEMINAR IN RESEARCH TOPICS AND METHODS.

Desirable areas and topics of investigation; application methodology and bibliography. Tentative exploration of selected subjects. Offered for doctoral students as needed, with sections arranged for each of the principal areas of the department.

##### 812. SEMINAR IN CONTEMPORARY RHETORICAL PRACTICE AND CRITICISM.

Intensive study and analysis of the speaking and writing generated by a major public controversy, 1930 to the present.

Miss Blankenship, Mr. Stelzner

##### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

##### 505. CLASSICAL RHETORICAL THEORY.

Major rhetorical theories from their emergence in ancient Greece to the late Roman Empire. Emphasis on the Sophists, Plato, Aristotle, Hermagoras, Cicero, Quintillian, and St. Augustine.

##### 507. RHETORIC AND SOCIAL CHANGE IN AMERICA.

A survey of the rhetorical strategies of various American social movements such as the American Revolution, the populist movement, and the civil rights movement.

Mr. Reid

## COMPARATIVE LITERATURE

### 511. CONTEMPORARY RHETORICAL THEORY.

Contemporary philosophical approaches to rhetorical theory. Selected major contemporary theorists such as Weaver, Richards, Burke, Duncan, McLuhan, and Perelman.

Miss Blankenship.

### 525. HISTORY AND DEVELOPMENT OF THE MOTION PICTURE.

The motion picture as a social force and as a form of art. Interrelationship and analysis of form, technique, and social impact of film. Selected screenings of representative film styles and content.

### 527. FILM THEORY AND CRITICISM.

Basic theories of film communication; various film modes and structures. Development of bases for evaluation of films according to communicative and aesthetic values. Prerequisite, Comm Studies 225/525.

Mr. Bacal, Mr. Stromgren.

### 528. MASS MEDIA IN SOCIETY.

Mass media as a major force in the American society. Emphasis on cultural, economic, political, and social effects. Prerequisite, Comm Studies 121.

Mr. Bryant.

### 532. BROADCASTING AND THE GOVERNMENT.

The role, function, and effect of regulation on broadcasting. Prerequisite, Comm Studies 121.

Mr. Shelby.

### 550. COMMUNICATION AND LANGUAGE THEORY.

The nature of speech and language, and the process involved in acquiring, understanding, and producing speech and language.

Prerequisite, permission of instructor.

Mr. Conville.

### 614. APPROACHES TO RHETORICAL CRITICISM.

Various critical approaches to rhetorical transactions: Historical, Formalist, Sociocultural, Psychological, and Archetypal.

### 650. BEHAVIORAL RESEARCH AND COMMUNICATION.

Introduction to research design and the practical problems in carrying out experimental and descriptive research in speech communication. Students pursue research projects either individually or in groups.

Prerequisite, 12 undergraduate credits in Communication Studies.

Mr. Cronen.

### 659. POLITICAL COMMUNICATION: MEDIA AND CAMPAIGNING.

Diffusion of persuasive political communications through standard and created media. Examination of campaign techniques (i.e., research on issues and themes, electorate polling, thematic media approaches, campaign strategies) in management and administration.

## Comparative Literature

### GRADUATE FACULTY

SARAH N. LAWALL, *Professor and Chairman of the Department of Comparative Literature*, B.A., Oberlin 1956; Ph.D., Yale, 1961.

WARREN D. ANDERSON, *Professor and Graduate Program Director*, B.A., Haverford, 1942; B.A., Oxon, 1949; M.A., Harvard, 1947; Ph.D., 1954.

DAVID R. LENSEN, *Associate Professor*, B.A., Princeton, 1967; M.A. 1970; Ph.D., 1971.

DON E. LEVINE, *Assistant Professor*, B.A., Columbia, 1964; M.A., Princeton, 1967; Ph.D., 1972.

DANIEL P. LUCID, *Assistant Professor*, B.A., Reed, 1968; M. Phil., Yale, 1971; Ph.D., 1972.

## GRADUATE SCHOOL

ELIZABETH P. MARTIN, *Assistant Professor*, B.S. Ed., Northwestern, 1960; M.A., California at Berkeley, 1964; Ph.D., 1972.

LUCIEN M. MILLER, *Associate Professor*, B.A., California at Berkeley, 1961; M.A., 1963; Ph.D., 1970.

C. WILLIAM MOEBIUS, *Associate Professor*, B.A., Lawrence (Wis.), 1963; Ph.D., S.U.N.Y. at Buffalo, 1969.

FREDERIC WILL, *Professor*, B.A., Indiana, 1949; Ph.D., Yale, 1954.

### ASSOCIATED FACULTY

ERIC M. BEEKMAN, *Associate Professor of Germanic Languages and Literatures*.

THOMAS CASSIRER, *Professor of French*.

ARTHUR F. KINNEY, *Professor of English*.

SARA LENNOX, *Assistant Professor of Germanic Languages and Literatures*.

JULIUS LESTER, *Lecturer in Afro-American Studies*.

PAUL MANKIN, *Professor of French*.

PAUL L. MARIANI, *Professor of English*.

WILLIAM E. NAFF, *Associate Professor of Japanese*.

ALEX R. PAGE, *Professor of English*.

DENNIS PORTER, *Associate Professor of French*.

EVA SCHIFFER, *Associate Professor of Germanic Languages and Literatures*.

SARA STURM, *Professor of French and Italian*.

### ASSOCIATED FIVE-COLLEGE GRADUATE FACULTY

EDITH KERN, *Doris Silbert Professor of Comparative Literature* (Smith College).

The Department of Comparative Literature offers graduate work leading to the degrees of Master of Arts and Doctor of Philosophy. Facilities and staff are available for specialized work in classical tradition studies and in medieval, Renaissance, Romantic, modern, and contemporary European literature, as well as in literary theory and criticism. Courses or seminars dealing with genres, themes, or movements are regularly offered as well. It is also possible to specialize in the study of Dutch literature or of classical and modern Chinese and Japanese literature. Graduate courses in Comparative Literature are open to all qualified graduate students and may, with prior approval of the other department or program concerned, be taken to meet a foreign language requirement.

### PREREQUISITES FOR ADMISSION TO THE M.A. OR PH.D. PROGRAM

(beyond the usual requirements of the Graduate School).

Undergraduate Degree: Applicants must possess a bachelor's degree or a recognized foreign equivalent, either with a major in a language-literature field or awarded upon completion of substantial literary studies.

**Languages:** All applicants are required to have studied at least two major languages besides English. One of the two must be either French or German. Ph.D. applicants should have completed at least three years' study of their first foreign language, and two of their second. M.A. applicants should have completed at least three years of their first foreign language and one year of their second. Ph.D. candidates are expected to show competence in one ancient language (Greek, Latin, Classical Chinese, etc.)

An entering student who does not show language competence by previous study may demonstrate competence in one of the following ways: a) An examination, normally to be administered by the appropriate language department; b) Two semesters of undergraduate courses beyond the grammar level, passed with a grade of B or better; c) One graduate course or seminar in the appropriate language department, passed with a grade of B or better.

**Grade Point Average:** The applicant should have a grade point average equivalent to at least 3.0 out of a possible 4.0.

**Examinations:** Applicants are required to have taken the Graduate Record Examination before applying, or to take it at the earliest opportunity thereafter. Non-native speakers of English are required to take the Test of English as a Foreign Language (TOEFL.)

**Written work:** Applicants are required to submit directly to the Department an example of their written work with their application. This should demonstrate critical handling of literary material, preferably including non-English texts. The paper need not be written in English.

#### THE DOCTOR OF PHILOSOPHY DEGREE

**Qualification:** Successful completion of the qualifying procedure entitles the student to M.A. degree candidacy, and enables him or her to proceed with preparations for the Preliminary Comprehensive Examination, beginning with the formation of a guidance committee. The qualifying procedure involves competence in foreign languages, and satisfactory performance on a qualifying examination to be based on reading lists prepared by the student and the student's advisory committee. The examination will include both written and oral portions: the total time for the examination will be about three hours.

**Languages:** Students are required to demonstrate competence in two foreign languages, one of which may be Latin or Greek. This requirement may be met by a satisfactory performance in a two-hour written examination; other options are also available. Students in European literature must offer a working knowledge of both French and German.

**Program of Study:** The balance among the main constituent elements of a candidate's course of study will necessarily vary with individual circumstances. The following kinds of competence, however, are taken to characterize the holder of a Ph.D. in Comparative Literature: a knowledge of one language and its literature sufficient to warrant the respect of specialists; a reading knowledge of three major European or Oriental languages (ancient or modern) in addition to English; a wide command of the literature of one main historical period; ability to make serviceable use of at least three literatures, one of which may be English; a reading competence in a classical language; and training in research method, literary translation, and problems of criticism.

**Requirements:** Work in the major literature requires historical coverage from the earliest literary forms of the language to the present, with emphasis either on a genre or on a major period, and a thorough reading knowledge of the language. Work in the second and third literatures requires coverage of the period or genre related to the field of emphasis in the major literature. Reading knowledge of the languages involved should be very good in the case of the second literature and good in the case of the third. Finally, work in Comparative Literature courses and seminars will be determined according to the candidate's needs in acquiring the ability to deal with the broad demands of the discipline and the more limited ones of his or her special field.

**Preliminary Comprehensive Examination:** The Comprehensive Committee works with the student to formulate the list of 10 topics on which the Comprehensive Examination is based. A topic is a conceptual issue of considerable breadth. The purpose of the individual topic is to permit the exploration and synthesis of a critical problem within a broad spectrum of literary expressions, works, authors, and traditions. More than one critical approach to individual literary texts shall be reflected among the 10 topics.

The examination will include both written and oral portions, and also a passage for textual analysis. Students have the option of writing substantial papers to satisfy up to four topics. Successful completion of this examination allows the candidate to proceed to the dissertation.

**The Dissertation:** The dissertation may deal with any subject in literary history, or with the comparison of texts, in the original languages, of works from two or more literatures. A translation dissertation may be proposed, provided that it is prefaced by an extensive introduction, with a level of analysis appropriate to a doctoral dissertation. The introduction should deal with theories and specific problems of the translation.

#### THE MASTER OF ARTS DEGREE

Two types of M.A. degrees are offered in Comparative Literature. Students who do not plan to proceed to the Ph.D. will normally choose the M.A. with thesis; the M.A. without thesis should be elected as a degree plan by students planning doctoral study.

**Program of Study:** A minimum of 30 graduate credit hours will be required in all cases. The following is to be included: 12 graduate credits in a major literature, 6 graduate credits in a second literature studied in the original language, and 6 graduate credits in Comparative Literature courses. One of the Comparative Literature courses must be Comparative Literature 676 (Theories of Comparative Literature); another must be a course that combines theoretical perspectives with practical criticism. Students who elect the M.A. without thesis must take at least 9 credits in a second literature and also in Comparative Literature.

**Examinations:** All candidates for the M.A. are required to take an examination that will include both written and oral portions: the total time for the examination will be about three hours.

**Thesis:** The thesis is intended to demonstrate ability to formulate and explore a specific literary problem. The student must present a brief prospectus to the advisory committee for approval. A thesis consisting of a translation preceded by a substantial critical introduction may be approved, subject to conditions similar to those applying to doctoral translation dissertations.

## COMPUTER AND INFORMATION SCIENCE

## GRADUATE SCHOOL

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY

##### 700. SPECIAL PROBLEMS.

Directed study of some problem in comparative literature. May be repeated for credit. *Credit, 2-6.*

##### 701. BIBLIOGRAPHY AND METHODS OF LITERARY RESEARCH.

Introduction to the bibliography and methodology of comparative studies in literature.

##### 702. LITERARY CRITICISM I: CLASSIC TO NEOCLASSIC.

Problems in critical theory prior to the modern period. Not necessarily chronological or limited to Occidental critics.

##### 703. LITERARY CRITICISM II: INTRODUCTION TO THE HISTORY OF CONSCIOUSNESS.

Modern crises of consciousness, ethics, and form, as manifested in seminal works of avant-garde criticism and fiction.

##### 704. CONTEMPORARY THEORIES OF LITERATURE.

Intensive study of theories of literature which have importance for contemporary criticism and scholarship.

##### 705. THEORY AND PRACTICE OF TRANSLATION.

The history of translation theory. Intensive practical experience in translating poetry and prose.

##### 890. SEMINAR.

Intensive, advanced study of a topic in comparative literature. *Credit, 3-6.*

##### 900. DOCTORAL DISSERTATION.

*Credit, 10.*

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

##### 621. RENAISSANCE PERSPECTIVES.

The tradition of the Middle Ages, the heritage of the Renaissance — the rhetoric of writing and the arts of reading and interpretation as handed down to the Renaissance.

##### 622. THE SHAPE OF THE RENAISSANCE.

Diversity and change of literary style in the 15th and 16th centuries. Emphasis on cultural continuity. An examination of critical method.

##### 631. THE ENLIGHTENMENT.

Characteristic ideas, themes, and attitudes in 18th-century European literature. Focus on major representatives of the Age of Reason.

##### 641. ROMANTICISM.

The Romantic movement in Western literature as exemplified by its principal figures from the age of Rousseau to 1850.

##### 642. FROM IDEALISM TO REALISM.

Developments such as realism, naturalism, aestheticism, and neo-Romanticism in the literatures of England, France, Germany, and Russia, seen against the background of 18th-century idealism.

##### 647. LITERATURE AND MUSIC.

Relations between literature and music from Plato to Samuel Beckett. Emphasis on the aesthetics of Schopenhauer and the Wagnerian synthesis.

##### 651. SYMBOLISM.

The development of symbolism in English, French, and German poetry of the 19th and 20th centuries.

##### 652. MODERN DRAMA.

Currents in Western drama since Ibsen: naturalism, symbolism, neo-Romanticism, expressionism, folk drama and fan-

tasy, epic realism, and the "grotesque" or "absurd" theatre are possible topics.

##### 661. CONTEMPORARY EUROPEAN NOVEL.

Commitment and innovation in the modern novel. The nature of literary and extraliterary influences, trends, and themes that define and establish the current major traditions of the novel.

##### 671. EUROPEAN EPIC POETRY.

Literary analysis of major classical and Renaissance epics. Emphasis on their intrinsic qualities as works of art. Specific epic techniques and the epic tradition.

##### 675. ANGLO-GERMAN LITERARY RELATIONS.

Subjects and problems common to two or more different national literatures. The interplay between text, language, history, and nationality.

##### 676. THEORIES OF COMPARATIVE LITERATURE.

Major theories concerning the nature and proper province of comparative literature. Emphasis on their significance for graduate study.

## Computer and Information Science

### GRADUATE FACULTY

ROBERT M. GRAHAM, *Professor and Chairman of the Department of Computer and Information Science*, B.A., Michigan, 1956; M.A., 1957.

CAXTON C. FOSTER, *Professor and Graduate Program Director*, B.S., Massachusetts Institute of Technology, 1950; M.S., Michigan, 1957; Ph.D., 1965.

MICHAEL A. ARBIB, *Professor, Director of the Center for Systems Neuroscience, and Adjunct Professor of Psychology*, B.S., University of Sydney, 1961; Ph.D., Massachusetts Institute of Technology, 1963.

LORI A. CLARKE, *Assistant Professor*, B.A., University of Rochester, 1969; Ph.D., Colorado, 1976.

WILLIAM L. KILMER, *Professor*, B.S., Pennsylvania State, 1954; M.S., 1955; Ph.D., Michigan, 1958.

HENRY F. LEDGARD, *Associate Professor*, B.S., Tufts, 1964; M.S., Massachusetts Institute of Technology, 1966; Ph.D., 1969.

ROBERT N. MOLL, *Assistant Professor*, B.S., Carnegie-Mellon, 1967; M.S., 1968; Ph.D., Massachusetts Institute of Technology, 1973.

EDWARD M. RISEMAN, *Associate Professor*, B.S., Clarkson College of Technology, 1964; M.S., Cornell, 1966; Ph.D., 1969.

D. N. SPINELLI, *Professor and Adjunct Professor of Psychology*, Liceum G. Parini, 1954; M.D. in Medicine and Surgery, University of Milan Medical School, 1958.

RICHARD L. TENNEY, *Assistant Professor*, B.A., California at Los Angeles, 1965; M.S., Cornell, 1969; Ph.D., 1972.

CONRAD A. WOGGIN, *Professor and Director of the University Computing Center*, B. Eng., Yale, 1949; M. Eng., 1951; Eng. D., 1955.

## UNIVERSITY OF MASSACHUSETTS

### ADJUNCT FACULTY

**RICHARD H. ECKHOUSE, JR.**, *Adjunct Associate Professor*, B.E.E., Cornell, 1962; M.S., Illinois, 1963; Ph.D., S.U.N.Y. at Buffalo, 1971.

**OLIVER G. SELFRIDGE**, *Adjunct Professor*, S.B., Massachusetts Institute of Technology, 1945.

**HAROLD STONE**, *Adjunct Professor and Professor of Electrical and Computer Engineering*.

The Department of Computer and Information Science (COINS) offers the M.S. and Ph.D. degree in the three focal areas of computer systems, theory of computation, and cybernetics. Comprehensive course offerings are available, and active research is on-going, in each of these areas, as well as in inter-area fields. Active collaboration is maintained with colleagues in such diverse schools and departments as Art, Business, Education, Electrical and Computer Engineering, Linguistics, Mathematics, Psychology, and Zoology. Students are encouraged to take advantage of these inter-departmental links to enrich their university experience.

Students in the graduate program have direct access to excellent computer facilities and a lively on-going series of guest seminars. In addition, most advanced students will wish to take part in the research seminars (700 A, B, C) in their own area of concentration.

To be admitted to full graduate status in COINS, candidates should be holders of B.S. or B.A. degrees, with good academic records and recommendations, and have either a major in Computer Science or exhibit a good knowledge of computer programming and college mathematics. Students are expected to have mastered the equivalent of COINS 122 and 202 and Math 167: Introduction to Linear Algebra (co-requisite, second semester of calculus).

Students who have already studied computer science will note that at most six credits may be transferred from other institutions, and these must be of a grade B or better. It is the policy of the department to grant such transfer credit sparingly, since the program is sufficiently rich for most students to be able to take a full 24 units of course credit to their advantage.

COINS has an *affirmative action goal* of increasing the number of women and minority members in the student body. There is an increasing realization of the crucial role played by technology in the complexities of modern society; and a consequent desire for involvement in such fields as computer and information science. Unfortunately, many otherwise excellent candidates are lost to the field because of a weak undergraduate background in mathematics. However, in most instances students with a capability for problem solving can master the necessary background in a semester or two if their academic standing in their undergraduate major is comparable to that of other students admitted to the COINS program.

To this end the department is developing a program

## COMPUTER AND INFORMATION SCIENCE

of background study in computer mathematics and programming, and invites applications from students in need of such a program, especially from women and minority members. Students admitted on this basis will be expected to complete their background study in one or two semesters, with performance at B average or better automatically entitling them to regular candidacy in the M.S. program. (Credits in background courses obtained during this period will *not* count towards COINS graduate degrees.)

### THE MASTER OF SCIENCE DEGREE PROGRAM

The following are the requirements for the M.S. degree in Computer and Information Science:

- (i) Each student shall take (or receive advanced standing in) the core courses 601, 602, and 603.
- (ii) Each student shall take two COINS 700 series courses other than 701.
- (iii) Each student shall take 6 units of COINS 701, Project. The project must be completed in one semester, with a grade of B or better. Students are required to plan their project in the semester preceding that in which they register for 701. A written proposal must be approved by two faculty members as first and second readers, and submitted to the Graduate Program Director by the preregistration day preceding the semester of registration.
- (iv) Each student shall take additional graduate courses, chosen with the approval of the adviser, to satisfy the 30-credit requirement for the M.S. degree. Each student must obtain a B grade average or better in the 24 units other than the project.
- (v) Students entering with deficiencies in the equivalent of COINS 122, 202, or Math 167 are required to remove these deficiencies by the end of their first semester. The credits so obtained do not count toward the 30 credits for the M.S. degree.

### THE DOCTOR OF PHILOSOPHY DEGREE

To be confirmed in their candidacy for the Ph.D. Degree, students must pass the Ph.D. qualifying exam, which is offered in March and October of every year. Students enrolled as M.S. candidates who wish to proceed to the Ph.D. program are advised to first take the examination within one year of completion of COINS 701; they normally are expected to pass the exam before being admitted to the second year of their Ph.D. candidacy.

In addition to course work appropriate to the M.S. degree, Ph.D. students are required to take some six 700-level courses from both within and without the department to lay a firm basis for thesis research. There is no formal language requirement for the degree. Students are discouraged from taking more than two or three years beyond the M.S. to complete their Ph.D. degree. M.S. candidates intending to proceed to the Ph.D. should choose their 701 projects with this time restriction in mind. Other conditions for the Ph.D. are as listed under general University requirements.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### COURSES OPEN TO GRADUATE STUDENTS ONLY

## COMPUTER AND INFORMATION SCIENCE

### 700. SPECIAL SEMINARS.

Topics by arrangement. Recent advanced and current problems in a specialized field of computer and information science.

Prerequisite, permission of instructor. *Credit variable, 1-6.*

### 701. ADVANCED TOPICS IN COMPUTER SCIENCE.

A project-type course for second-year graduates. Moderately large projects of implementation, design of computers, languages, operating systems, cybernetic simulation, theoretical integration, etc.

Prerequisite, permission of instructor. *Credit, 6.*

### 711. SYNTACTIC ANALYSIS.

An introduction to the concepts and techniques of syntactical analysis with respect to context-free grammars, the cognitive processes involved in the analysis and generative algorithms of computer translators.

Prerequisites, COINS 301/601 and 210/510.

### 724. ADVANCED PROGRAMMING.

Use of list processing and associative computers. Design of interpreters and higher level languages. Topics vary.

Prerequisite, COINS 302/602.

### 741. COMPUTABILITY AND COMPLEXITY.

The idea of recursion; algebraic and machine characterizations; hierarchies of partial recursive functions; complexity of computation by both axiomatic and machine-oriented criteria; speed-up and gap theorems.

Prerequisites, COINS 301/601 or Math 381.

### 743. TOPICS IN THEORY OF COMPUTATION.

Algebraic automata theory; advanced topics in language theory; theory of problem-solving in hierarchically structured systems; theory of theorem proving. Topics vary from year to year.

Prerequisite, COINS 301/601.

### 762. FOUNDATIONS OF PROGRAMMING LANGUAGES.

Fundamental concepts underlying higher-level languages. Methods of syntactic and semantic definition; mathematical models of Scott and Strachey; models for assignment, transfer of control, block structure and procedures.

Prerequisites, COINS 301/601 and 302/602.

### 777. ADVANCED OPERATING SYSTEMS.

Systems analysis, feasibility studies and applicable techniques of operating systems. Input/output file control systems; on-line applications, case studies, design and use of extended machine language function facilities for systems programming.

Prerequisites, COINS 335/635 and 377/677.

### 782. COMPUTATIONAL CYBERNETICS.

Computer simulation models of the reticular formation; the frog's visual system; learning equations; a comparison of models of the cerebellum; archicortex and neocortex; statistical neuronal processing; action-oriented model of human vision.

Prerequisite, COINS 303/603.

### 784. PATTERN RECOGNITION.

Techniques of pattern recognition; optical character recognition; feature extraction and contextual cuing; automata and grammars for two-dimensional patterns; statistical decision theory; scene analysis.

Prerequisites, COINS 383/683 and 303/603.

### 790. SEMINAR ON COMPUTER AND INFORMATION SCIENCE.

Conferences, reports and lectures on topics not currently covered in regular courses.

Prerequisite, permission of instructor. *Credit, 1-6.*

### 795. SEMINAR ON IMPLICATIONS.

Interdepartmental studies of social and economic factors in

## GRADUATE SCHOOL

relation to computer-based solution of large-scale problems. Topics vary.

Prerequisite, permission of instructor.

### 900. DOCTORAL DISSERTATION.

*Credit, 10.*

## COURSES NOT FOR MAJOR CREDIT

### 422. INTRODUCTION TO PROBLEM SOLVING USING THE COMPUTER.

### 450. INTRODUCTION TO COMPUTER AND INFORMATION SCIENCE.

### 502. COMPARATIVE CONCEPTS IN PROGRAMMING LANGUAGES.

### 532. ALGORITHMIC METHODS FOR SCIENTISTS AND ENGINEERS.

## COURSES OPEN TO GRADUATE AND UNDERGRADUATE STUDENTS

### 501. ASSEMBLY LANGUAGE PROGRAMMING.

Input/output equipment, machine organization, logical design, elementary data structures, and assembly language programming. Lab involves hands-on experience with programs, loaders, and assemblers.

Prerequisite, COINS 122/422 or programming experience.

*Credit, 4.*

### 510. TRANSLATOR DESIGN.

A project-oriented course covering techniques of language definition and translation. Particular reference to symbolic assemblers and algebraic compilers.

Prerequisites, COINS 201/501 and 202/502.

### 533. MINI COMPUTERS.

The use of small-scale digital computers for data gathering, analysis and on-line control of experiments. Interfacing computers and logical design of input/output facilities.

Prerequisite, programming experience.

### 552. TOPICS IN NUMERICAL METHODS.

Computer-oriented numerical analysis, including linear algebra, solution of simultaneous equations, homogeneous equations, eigenvalues, solution of differential equations, and functional representations.

Prerequisite, COINS 122/422 or programming experience.

### 560. LINGUISTICS AND AUTOMATA.

An introduction to formal studies of the origins, properties, and structure of natural languages; phrase structure and transformational grammars; pushdown, linear-bounded and stack automata; grammatical behavior and pattern description.

Prerequisite, COINS 301/601.

### 575. COMBINATORIAL THEORY AND ITS APPLICATIONS.

The solution of problems of enumeration using permutations and combinations, generating functions, and recurrence relations. Introduction to graph theory, linear and dynamic programming. Block designs. Applications.

Prerequisite, COINS 301/601.

### 591. ECOLOGICAL CYBERNETICS.

Ecosystem population models; solutions of nonlinear differential equation systems arising in population biology; analytical formulations of ecosystem stability problems. Computer simulation projects encouraged.

Prerequisite, calculus; computer programming desirable.

### 601. FUNDAMENTALS OF COMPUTATION.

Algorithms, languages, and machines; recursion and induction; state diagrams, switching theory, and regular sets; trees; formal grammars; syntax and semantics; proving properties of programs.

Prerequisite, Math 167 or equivalent.

## UNIVERSITY OF MASSACHUSETTS

### 602. FUNDAMENTALS OF COMPUTING SYSTEMS

Core concepts of computer software and hardware, including syntax, semantics and implementation models; data structures and accessing strategies; operating systems, control programs and languages, and machine architecture.

Prerequisite, COINS 202/502; COINS 201/501 recommended.

### 603. FUNDAMENTALS OF CYBERNETICS.

Integrates brain analysis and artificial intelligence to convey a basic understanding of systems and neural networks, modelling, feedback; planning of complex behavior in the brains of animals and the control computers of robots.

Prerequisite, COINS 122 or background in biology or psychology.

### 604. FUNDAMENTALS OF INFORMATION.

Concepts of information theory with background in discrete probability theory; semi-groups applied to coding and automata theory; linear machines and codes.

Prerequisite, COINS 301/601.

### 620. DEVELOPMENT OF QUALITY SOFTWARE.

Notion of quality software; measurement of quality; top-down and other approaches to programming; structured programs; proofs of correctness; software engineering; psychology of programming.

Prerequisites, COINS 201/501 and 202/502.

### 635. COMPUTER ARCHITECTURE.

The various elements of computer design; the historical influence of certain real computers and the concepts behind them.

Prerequisite, COINS 302/602.

### 650. COMPUTATIONAL MODELLING.

Markov process, Random Walk and Monte Carlo techniques. Statistical techniques, distributions, and correlation coefficients. Brief introduction to simulation languages. Simple queues, n-person zero sum games. Applications.

Prerequisite, COINS 202/502.

### 660. COMPUTER GRAPHICS (ECE 660).

Basic organization of computer-driven graphical display systems. Methods for generation and manipulation of vectors and characters for real-time display. Data structures for picture and text processing.

Prerequisite, COINS 201/501.

### 677. INTRODUCTION TO OPERATING SYSTEMS.

A study of the programs and techniques needed to transform computer hardware into a comprehensive computer. Topics include input/output control systems, mono-programming, multi-programming, and multi-processing.

Prerequisite, COINS 302/602.

### 683. ARTIFICIAL INTELLIGENCE.

Game-playing by machines; problem solving by machine, theory of heuristic search; automatic theorem-proving; question answering systems; natural language processing; an introduction to robotics, vision and planning.

Prerequisite, COINS 303/603.

### 685. SPECIAL PROBLEMS.

(Topics by arrangement each semester.)

Prerequisite, permission of instructor. *Credit variable, 1-6.*

### 686. SPECIAL PROBLEMS.

(Topics by arrangement each semester.)

Prerequisite, permission of instructor. *Credit variable, 1-6.*

### 687. DATA AND INFORMATION STRUCTURES

(ECE 642).

Mathematical and practical concepts relevant to description and manipulation of data and information structures such as lists, trees, and graphs, and the relationship of these ideas to the constraints imposed by physical storage devices.

Prerequisites, COINS 301/601 and 302/602.

IN ADDITION TO THE ABOVE COURSES,

STUDENTS ARE ADVISED TO TAKE COURSES IN OTHER DEPARTMENTS SUCH AS:

## ECONOMICS

### Electrical and Computer Engineering

510. DIGITAL CIRCUIT THEORY.

644. PROGRAMMING STRUCTURES.

662. SELF-ORGANIZING SYSTEMS AND PATTERN RECOGNITION.

666. ANALOG AND HYBRID COMPUTERS

668. ADVANCED SWITCHING THEORY.

702. ALGEBRA AND CODING.

750. GRAPH THEORY AND ITS APPLICATIONS

### Linguistics

703. GENERATIVE PHONOLOGY

710. SEMANTICS AND GENERATIVE GRAMMAR

### Mathematics

511, 512. INTRODUCTION TO MODERN ALGEBRA

541. APPLIED ANALYSIS I

545, 546. APPLIED MATHEMATICS

551, 552. NUMERICAL ANALYSIS.

557. LINEAR PROGRAMMING AND THEORY OF GAMES

735. LATTICE THEORY.

745, 746. ADVANCED APPLIED MATHEMATICS

### Philosophy

672, 673. MATHEMATICAL LOGIC

### Psychology

711, 712. SENSORY PROCESSES.

715. PERCEPTION

725, 726. HUMAN INFORMATION PROCESSING.

746. QUANTITATIVE METHODS IN PSYCHOLOGY

750. PHYSIOLOGICAL PSYCHOLOGY.

752. THE NEUROANATOMICAL BASIS OF BEHAVIOR

753. PSYCHOPHARMACOLOGY

### Zoology

770. COMPARATIVE NEUROPHYSIOLOGY.

## Economics

### GRADUATE FACULTY

DONALD W. KATZNER, *Professor and Chairman of the Department of Economics*, B.A., Oberlin, 1959, M.A., Minnesota, 1962; Ph.D., 1965.

## ECONOMICS

MARSHALL C. HOWARD, *Professor and Graduate Program Director*, A.B., Princeton, 1941; Ph.D., Cornell, 1951.

NORMAN D. AITKEN, *Associate Professor*, B.A., Cincinnati, 1961; Ph.D., Tennessee, 1967.

SOLOMON BARKIN, *Professor*, B.S., College of The City of New York, 1928; M.A., Columbia, 1929.

MICHAEL H. BEST, *Associate Professor*, B.A., Washington, 1963; M.A., Oregon, 1967; Ph.D., 1969.

JOHN L. BLACKMAN, JR., *Associate Professor*, B.A., Haverford, 1930; M.A., 1948; Ph.D., Harvard, 1957.

SAMUEL S. BOWLES, *Professor*, B.A., Yale, 1960; Ph.D., Harvard, 1965.

JAMES C. COX, *Associate Professor*, B.A., California at Davis, 1965; M.A., Harvard, 1968; Ph.D., 1970.

JAMES CROTTY, *Assistant Professor*, B.S., Fordham, 1961; M.S., Carnegie-Mellon, 1963; Ph.D., 1973.

THOMAS E. DUSTON, *Assistant Professor*, B.S., Maine, 1962; M.A., S.U.N.Y. at Binghamton, 1967; Ph.D., Brown, 1972.

RICHARD C. EDWARDS, *Assistant Professor*, B.A., Grinnell, 1966; Ph.D., Harvard, 1972.

BRADLEY T. GALE, *Associate Professor*, B.S., Worcester Polytechnic Institute, 1964; M.A., Massachusetts, 1965; Ph.D., Rutgers, 1968.

HERBERT GINTIS, *Professor*, B.A., Pennsylvania, 1961; M.A., Harvard, 1962; Ph.D., 1969.

JOSEPHINE G. GORDON, *Assistant Professor*, B.A., Vassar, 1966; M.A., Washington, 1971; Ph.D., 1975.

VACLAV HOLESOVSKY, *Professor*, Diploma in Political Sciences, Paris, 1950; M.A., 1958; Ph.D., Columbia, 1964.

K. JANE HUMPHRIES, *Assistant Professor*, B.A., Newnham College, Cambridge, 1970; M.A., Cornell, 1973; Ph.D., 1973.

JAMES K. KINDAHL, *Professor*, B.A., Chicago, 1951; M.B.A., 1953; Ph.D., 1958.

LEONARD A. RAPPING, *Professor*, B.A., California at Los Angeles, 1956; M.A., Chicago, 1958; Ph.D., 1961.

STEPHEN A. RESNICK, *Professor*, B.S., University of Pennsylvania, 1960; Ph.D., Massachusetts Institute of Technology, 1964.

SIMON ROTTENBERG, *Professor*, B.A., George Washington, 1939; M.A., Harvard, 1948; Ph.D., 1950.

GEORGE I. TREYZ, *Associate Professor*, A.B., Princeton, 1958; Ph.D., Cornell, 1967.

CHE S. TSAO, *Associate Professor*, B.S., Chung Hsing University, 1955; M.S., Wisconsin, 1964; Ph.D., 1966.

RICHARD D. WOLFF, *Associate Professor*, B.A., Harvard, 1963; M.A., Stanford, 1964; M.A., Yale, 1967; Ph.D., 1969.

## GRADUATE SCHOOL

ARTHUR W. WRIGHT, *Associate Professor*, B.A., Haverford, 1960; Ph.D., Massachusetts Institute of Technology, 1969.

### FIELDS OF CONCENTRATION

Programs of graduate study in economics are offered in the following fields of specialization: Comparative Economic Systems; Econometrics; Economic Development; Economic History; Economic Theory; History of Economic Thought; Human Resource Economics; Industrial Organization and Regulation; International Economics; Labor Economics; Monetary Theory and Policy; Political Economy; Public Finance.

### THE MASTER OF ARTS DEGREE PROGRAM

#### *Entrance and Admission Requirements*

All entering students must have completed at least one semester of each of intermediate micro theory, intermediate macro theory, and calculus. All applicants must take the verbal and quantitative Graduate Record Examinations; the advanced test is not required. Foreign applicants, in addition, must take the Test of English as a Foreign Language (TOEFL) and achieve a minimum score of 550.

#### *Degree Requirements*

All candidates for the M.A. are required to complete 36 graduate credits subject to the following restrictions: Twelve credits must be earned in 700 to 900 series courses; candidates must take one semester each of microeconomic theory, macroeconomic theory, mathematical methods in economics, and econometrics; 21 of the credits must be taken within the Department of Economics. The candidate must earn grades of B or better in the four required courses, and maintain a 3.0 average overall. M.A. candidates have the option of submitting a thesis, which counts for between 6 and 9 semester credit hours.

### THE DOCTOR OF PHILOSOPHY DEGREE PROGRAM

#### *Entrance and Admission Requirements*

Requirements are the same as for the M.A. Program, plus at least one semester of linear algebra. Persons applying for the Ph.D. Program without the M.A., may be required to complete the M.A. Program first.

#### *Degree Requirements*

Ph.D. candidates write comprehensive examinations in micro and macro economic theory, economic history, and the history of economic thought. The candidate may offer Marxian value theory on the comprehensives as an alternative to heavier concentration in micro or macro theory. Course work in mathematical methods in economics and also in econometrics is required and is scheduled so that the student will have taken these tool courses before he takes the comprehensive examinations. These examinations are given in January of each year; for the new student without any previous graduate work the examinations thus occur after three semesters of course work. A requirement of accomplishment in at least two fields is met by satisfactory completion of at least two courses in each field. The doctoral dissertation must be successfully defended in an

## UNIVERSITY OF MASSACHUSETTS

## ECONOMICS

oral examination. One year's full-time residence is required.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### GRADUATE COURSES

(For either major or minor credit)

(Open to undergraduates with instructor's permission)

#### 700. SPECIAL STUDIES IN ECONOMICS.

*Credit, 2-9 each semester.*

#### 701 (I), 702 (II). MICROECONOMIC THEORY.

A systematic development of the theory of the consumer, the firm, the industry, and their interactions.

Prerequisite, Econ 203. *Credit, 3 each semester.*

#### 705 (I), 706 (II). MACROECONOMIC THEORY.

Nature, construction, and use of social accounting systems. A systematic development of static and dynamic theories of aggregative economic behavior and their applications.

Prerequisite, Econ 212, 204, or equivalent. *Credit, 3 each semester.*

#### 711. MONETARY THEORY.

Relationship among the supply of money, interest rates, capital market, price levels and output.

Prerequisite, Econ 705.

#### 712. MONETARY AND FISCAL POLICY

An analytical treatment of the effects of government and central bank policies intended to achieve such objectives as price stabilization and economic growth.

Prerequisite, Econ 312, 612 or permission of instructor. Mr. Crotty, Mr. Rapping.

#### 721. INTERNATIONAL FINANCE.

An analysis of the properties of foreign exchange markets, adjustment mechanisms, speculation, capital flows, transfer problems and the relationship between balance of payments correctives and domestic policy goals.

Prerequisite, Econ 204 or permission of instructor. Mr. Aitken.

#### 722. INTERNATIONAL TRADE THEORY

The pure theory of international trade. The reasons for trade, the gains from trade, factor price equalization, commercial, policy, trade and economic development, and customs unions.

Prerequisite, Econ 322 or 622 or permission of instructor. Mr. Aitken.

#### 731. INDUSTRIAL ORGANIZATION

A survey of the literature on the market structure, conduct, and performance of industry.

Prerequisite, Econ 203 or 503 or permission of instructor. Mr. Howard, Mr. Gale.

#### 732. INDUSTRIAL REGULATION.

A survey of the literature on controls extended by government over the business sector of the economy.

Prerequisite, Econ 203 or 503 or permission of instructor. Mr. Howard, Mr. Gale.

#### 741. COLLECTIVE BARGAINING.

The legal background of collective bargaining, the process, subject matter, and problems involved. Individual case problems.

Prerequisite, Econ 141. Mr. Blackman.

#### 743. WAGE THEORY AND WAGE RELATIONSHIPS.

Theoretical and institutional study of theories of wages and wage structure.

Prerequisite, Econ 141. Mr. Blackman.

#### 745. LABOR DISPUTE SETTLEMENT.

Ways of settling labor disputes, including grievance proceed-

ings, arbitrations, and presidential intervention.

Given alternate years (not given 1973-74).

Prerequisite, Econ 141. Mr. Blackman.

#### 746. COMPARATIVE LABOR MOVEMENTS.

Labor movements in various countries with an analysis of their similarities and differences.

Prerequisites, Econ 141 and History 336. Mr. Barkin.

#### 747. MANPOWER DEVELOPMENT.

A critical examination of current manpower policies and problems. The quantity and quality of manpower resources, problems of labor employment and mobility. Adjustment policies and research tools are reviewed.

Prerequisite, Econ 141. Mr. Barkin.

#### 751. MATHEMATICAL METHODS IN ECONOMICS.

The various modern applications of mathematics to economic analysis. Both static and dynamic processes.

Prerequisites, Econ 301, 251, or equivalent, one year of college mathematics, and permission of instructor.

Mr. Crotty, Mr. Cox, Mr. Smith, Mr. Tsao.

#### 752 (I), 753 (II). ECONOMETRICS

The application of modern statistical methods to micro- and macroeconomic theory formulated in mathematical terms.

Prerequisite, Econ 251 or permission of instructor.

*Credit, 3 each semester.*

Mr. Gale, Mr. Kindahl, Mr. Treys, Mr. Tsao.

#### 761 (I), 762 (II). GENERAL ECONOMIC HISTORY.

Topics in the history of economic activity in the Western World.

Prerequisite, Econ 261.

Mr. Edwards, Mr. Resnick, Mr. Wolff.

#### 765. ECONOMIC DEVELOPMENT: STRUCTURAL PROBLEMS.

The concept of economic development and the structural changes needed in underdeveloped countries to permit development.

Prerequisite, 15 hours of economics.

Ms. Humphries, Mr. Morris, Mr. Resnick.

#### 766. ECONOMIC DEVELOPMENT: POLICY ISSUES.

Policy decisions involved in efforts of underdeveloped countries to induce development.

Prerequisite, Econ 765.

Ms. Humphries, Mr. Morris, Mr. Resnick.

#### 773. THEORIES OF ECONOMIC SYSTEMS.

The theory of alternative economic systems, of national economic planning, and of resource allocation under different systems.

Prerequisite, Econ 172. Mr. Holesovsky, Mr. Wright.

#### 774. SELECTED TOPICS IN SOVIET AND EAST-

##### EUROPEAN ECONOMIES.

Application of advanced economic theory to selected major problems of planned economics of the Soviet type.

Prerequisites, Econ 172, 173. Mr. Holesovsky.

#### 781 (I), 782 (II). HUMAN RESOURCE AND LABOR

##### MARKET ECONOMICS.

A theoretical and empirical analysis of human resource and labor market problems using primarily the tools developed in microeconomics and statistics. First semester is a general survey of research in the area; second semester is an intensive analysis of selected topics.

Prerequisite for 781 — Econ 201/501 or permission of instructor. Prerequisite for 782 — Econ 781 or permission of instructor.

*Credit, 3 each semester.*

#### 785. ECONOMIC MODELS OF NATURAL RESOURCES AND THE ENVIRONMENT

Theoretical economic models of the institutional, technological, and economic features of natural-resource utilization. Economic analysis of public-policy problems. Public control

## ECONOMICS

techniques. Some degree of mathematical sophistication required. Mr. Cox.

### 795. TOPICS IN THEORETICAL WELFARE ECONOMICS.

Recent developments in theoretical welfare economics, following introduction to Pareto optimum conditions in general equilibrium. Properties of allocation mechanisms and their adequacy for achieving Pareto optima. Prerequisites, Econ 701, 702. Mr. Wright, Mr. Cox.

797. TOPICS IN THE ECONOMICS OF UNCERTAINTY. Recent developments in the theory and application of expected utility and decision theory. Discussion of experimental studies of choice under uncertainty. Some degree of mathematical sophistication required. Prerequisite, Econ 701, 702. Mr. Cox.

801. HISTORY OF ECONOMIC THOUGHT. Treatment in depth of various topics within the history of economic thought. Mr. Bowles, Mr. Gintis, Mr. Wolff.

803 (I), 804 (II). SEMINAR IN ECONOMIC THEORY. Development of models of economic processes, with emphasis on analysis in depth. Specific subject matter may vary from year to year.

*Credit, 3 each semester.*  
Mr. Bowles, Mr. Gintis, Mr. Rapping.

813 (I), 814 (II). PUBLIC FINANCE. Theory of public goods and non-market allocation. Normative models of public expenditure and taxation. The integration of equity and efficiency considerations in evaluation of tax-expenditure programs. Social discount rates and shadow prices of resources used in the public sector. The structure and incidence of U.S. taxes. Discussion of tax reform proposals. Fiscal federalism and proposals for federal revenue-sharing. Prerequisite, Econ 701 or permission of instructor.

*Credit, 3 each semester.* Mr. Cox.

### 823 (I), 824 (II). POLITICAL ECONOMY OF CAPITALISM.

Mutual interaction of social relations of production, forces of production, and class. Roles of the state, surplus and capital accumulation, imperialism, sexism, racism in development and maintenance of capitalist system.

Mr. Bowles, Mr. Gintis.

### 897 (I), 898 (II). SEMINAR IN QUANTITATIVE ECONOMICS.

For advanced students with interest in econometrics. Weekly seminars are of two kinds: (1) lectures on advanced topics, especially new theoretical developments; (2) discussion of econometric and other empirical studies in process by members of the seminar, by other students and faculty, and by visiting speakers. Emphasis on the use of econometric tools in economic research.

Prerequisite, Econ 753 or permission of instructor.

*Credit, 3 each semester.* Mr. Gale, Mr. Treyz.

### 900. DOCTORAL DISSERTATION.

*Credit, 15.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 505. MARXIAN ECONOMICS.

Exposition of the Marxian economic theory in modern idiom. Comparison of methodological assumptions and conceptualization of economic phenomena in Marx and in "mainstream economics." Prerequisite, Econ 103.

Mr. Bowles, Mr. Best, Mr. Holesovsky, Mr. Wolff.

#### 511. MONEY AND BANKING.

The development and operation of the monetary and banking systems of the United States; problems of achieving full employment and price stability through monetary controls.

Ms. Humphries.

## GRADUATE SCHOOL

#### 512. MONEY, INCOME, AND MONETARY POLICY.

The relationships among money, income, and monetary policy, and among individuals, banks, money markets, governments and central banks.

Prerequisite, either Econ 211 or Finance 210.

#### 531. SOCIAL CONTROL OF BUSINESS.

The formal and informal methods and efforts to maintain, supplement, and moderate competition, and the substitution of regulation and public enterprises for competition.

Prerequisite, Econ 103. Mr. Edwards, Mr. Howard.

#### 532. THE STRUCTURE OF AMERICAN INDUSTRY.

Business enterprise, market competition, and economic development in American industries. The social effectiveness of industries analyzed through measures of industrial structure and market performance.

Prerequisites, Econ 103 and 203 recommended.

Mr. Edwards, Mr. Gale, Mr. Howard.

#### 542. LABOR LAW AND LEGISLATION.

Economic effects and historical survey of Federal and state laws and an analysis of important court decisions.

Prerequisite, Econ 141, or permission of instructor.

Mr. Blackman.

#### 552. ECONOMETRICS.

The application of mathematical and statistical methods to economic theory. Emphasis on the application to both microeconomic and macroeconomic policy issues.

Prerequisite, permission of instructor.

Mr. Gale, Mr. Tsao.

#### 561. EUROPEAN ECONOMIC EVOLUTION.

Evolution of economic organization in agriculture, industry, and commerce; the surrounding social and institutional life.

Prerequisites, Hist 100 or 101 or an economics course.

Mr. Resnick, Mr. Wolff.

#### 562. AMERICAN ECONOMIC HISTORY.

An analytical approach to structural change, economic growth, and the development of market institutions in the United States from colonial times to the present.

Prerequisite, Econ 100 or 103.

Mr. Edwards.

#### 566. ECONOMIC DEVELOPMENT.

Economic problems of underdeveloped countries and the policies necessary to induce growth. Individual projects required.

Prerequisite, Econ 100 or 103.

Ms. Humphries, Mr. Best, Mr. Morris, Mr. Resnick.

#### 567. LATIN AMERICAN ECONOMIC DEVELOPMENT.

Development of the Latin American economies with emphasis on the central problems of the various economies and proposed economic programs.

Prerequisite, Econ 266 or permission of instructor.

Mr. Best.

#### 570. ECONOMICS OF PLANNING.

Theoretical analysis of the Soviet economy: growth models; measurement of growth and factor productivity; centralized planning and decentralization; investment criteria; foreign trade; other.

Prerequisites, Econ 103 or 203, or permission of instructor.

Mr. Holesovsky, Mr. Wright.

#### 571. COMPARATIVE ECONOMIC SYSTEMS.

Evaluation of the performance of alternative economic systems in theory and practice. Problems of planning in the advanced economies of the United States, Western Europe, and Soviet area.

Prerequisite, Econ 103.

Mr. Wright, Mr. Holesovsky.

#### 581. REGIONAL ECONOMICS.

The process of regional economic growth; location theory and basic techniques of regional analysis; public and private area development programs.

Prerequisite, Econ 103; Econ 203 recommended.

Mr. Burghardt.

## UNIVERSITY OF MASSACHUSETTS

**606. DEVELOPMENT OF ECONOMIC THOUGHT.**  
Development of economic analysis since 1500. Main currents in the evolution of mercantilistic, Physiocratic, classical, neo-classical, Marxian, and Keynesian economic thought.

Mr. Bowles, Mr. Gintis, Mr. Wolff.

### 612. PUBLIC FINANCE.

Principles of public revenues and expenditures; systems and problems of taxation; use of taxes; expenditures, debt policy to provide full employment; economic growth and price stability.

Prerequisite, Econ 103.

Mr. Cox, Mr. Ray.

### 614. STATE AND LOCAL PUBLIC FINANCE.

State and local government revenue and expenditure programs. Individual research projects relating to Massachusetts or surrounding states required.

Prerequisite, Econ 100 or 103.

Mr. Ray.

### 621. INTERNATIONAL TRADE AND ECONOMIC POLICY.

Intermediate theory of international trade, including the analysis of the balance of payments mechanism, pure non-monetary theory and its application to problems of commercial policy.

Prerequisites, Econ 203 and 321.

Mr. Aitken.

### 638. ECONOMICS OF HEALTH.

Economic aspects of health care and ill-health and social policies relative to health care and prevention of ill-health.

Mr. Duston.

### 641. ECONOMIC SECURITY.

Public and private programs to prevent or alleviate economic insecurity, including poverty, substandard incomes, and economic contingencies.

Mr. Blackman.

### 645. HUMAN RESOURCES ECONOMICS.

Private and social means for providing access to higher education, housing, medical care, and improved environment. Poverty, population concentration, and discrimination as barriers. Policies and priorities in human resource development.

Prerequisite, Econ 103 or equivalent.

Mr. Barkin, Mr. Duston, Mr. Oaxaca.

### 647. ECONOMICS OF THE LABOR MARKET

A theoretical and empirical analysis of labor markets, utilizing primarily the tools developed in microeconomics, including an introduction to labor-market data and to the formulation and testing of economic models.

Prerequisite, Econ 203.

### 682. SEMINAR IN URBAN & REGIONAL ECONOMICS.

In-depth study of varied aspects of urban and regional economics. Topics to be determined by interests of participants.

Prerequisites, Econ 103 and 203, or permission of instructor.

Ms. Gordon.

## Education

### GRADUATE FACULTY

**LOUIS FISCHER**, *Professor and Acting Dean of the School of Education*, B.A., Stanford, 1949, LL.B., 1951, M.A., 1954, Ph.D., 1958.

**GRACE J. CRAIG**, *Associate Professor and Acting Associate Dean*, B.A., Massachusetts, 1959, M.S., 1962, Ph.D. 1967.

**NORMA JEAN ANDERSON**, *Professor and Assistant Dean for Graduate Affairs*, B.S., Illinois, 1956, M.Ed., 1961; Ed.D., 1966.

**RICHARD J. CLARK, JR.**, *Associate Professor and Assistant Dean for Teacher Education*, B.A., Amherst, 1960; M.Ed., Harvard, 1961; Ed.D., Stanford, 1969.

## EDUCATION

**DWIGHT W. ALLEN**, *Professor*, B.A., Stanford, 1953, M.A., 1957; Ed.D., 1959.

**ALFRED S. ALSCHULER**, *Professor*, B.A., Amherst, 1961, M.A., Harvard, 1963; Ph.D., 1967.

**G. ERNEST ANDERSON, JR.**, *Professor*, B.A., Amherst, 1950; M.A.T., Harvard, 1955; Ed.D., 1955.

**ALBERT S. ANTHONY**, *Professor*, B.S., Trinity, 1937; M.A.T., Harvard, 1947; Ed.D., 1955.

**KENNETH H. BLANCHARD**, *Professor*, B.A., Cornell, 1961; M.A., Colgate, 1963; Ph.D., Cornell, 1966.

**LINDA SUE BLANE**, *Assistant Professor*, B.A., Miami, 1963, M.S., 1965; Ed.D., Florida, 1967.

**LIANE BRANDON**, *Assistant Professor*, A.B., Boston, 1962; M.Ed., 1967.

**R. MASON BUNKER**, *Associate Professor*, B.S., Farmington State, 1959; M.Ed., Maine, 1965; Ed.D., Illinois, 1970.

**SUSAN CAMPBELL**, *Assistant Professor*, B.A., Drew, 1962, M.A., Temple, 1963; Ph.D., Massachusetts, 1967.

**EMMA CAPPELLUZZO**, *Professor*, B.S., Boston, 1955, M.Ed., Arizona, 1959; Ed.D., 1965.

**DONALD CAREW**, *Professor*, B.A., Ohio, 1955, M.A., 1956, Ed.D., Florida, 1962.

**ROBERTA A. COLLARD**, *Associate Professor*, B.S., Texas, 1940; Ph.D., Chicago, 1962.

**REGINALD DAMERELL**, *Associate Professor*, B.A., Columbia, 1946.

**DAVID E. DAY**, *Associate Professor*, B.S., State University of New York at Brockport, 1952, M.S., 1955, Ed.D., Wayne State, 1962.

**LARRY DYE**, *Associate Professor*, M.Ed., Massachusetts, 1971, Ed.D., 1972.

**S. PHILIP EDDY**, *Associate Professor*, B.A., Nebraska State at Wayne, 1951, M.A., Columbia, 1956.

**JEFFREY W. EISEMAN**, *Assistant Professor*, B.A., Stanford, 1962, M.A., Michigan, 1964, Ph.D., 1971.

**PORTIA ELLIOTT**, *Assistant Professor*, B.A., Fisk, 1969, M.A., Michigan, 1970, Ed.D., Massachusetts, 1973.

**KENNETH A. ERTEL**, *Professor*, B.S., Minnesota, 1953, M.Ed., Eastern Washington College of Education, 1960, Ed.D., Washington State, 1967.

**DAVID R. EVANS**, *Associate Professor*, B.S., Oberlin, 1959, M.S., Illinois, 1961, Ph.D., Stanford, 1969.

**JUDITH EVANS**, *Assistant Professor*, B.S., Minnesota, 1963, M.A., Stanford, 1966; Ed.D., Massachusetts, 1973.

**ARTHUR W. EVE**, *Associate Professor*, B.Ed., Chicago Teachers College, 1957; M.A., Chicago, 1961; Ph.D., 1967.

**WILLIAM V. FANLOW**, *Associate Professor*, A.B., Chapman College, 1959; M.A., Stanford, 1961; Ph.D., 1967.

**GEORGE E. FORMAN**, *Associate Professor*, B.S., Louisiana State, 1963; Ph.D., Alabama, 1967.

**RONALD H. FREDRICKSON**, *Professor*, B.S., Kansas State Teachers, 1953, M.S., 1959, Ph.D., 1963.

## EDUCATION

- NATHANIEL S. FRENCH, *Associate Professor*, B.A., Black Mountain College, 1936.
- ATRON GENTRY, *Professor*, B.A., California State at Los Angeles, 1966; Ed.D., Massachusetts, 1970.
- JUDITH GOURLEY, *Assistant Professor*, B.A., Northern Illinois, 1965; M.A., Cornell, 1971; Ph.D., 1974.

## UNIVERSITY OF MASSACHUSETTS

JUDITHE D. SPEIDEL, *Associate Professor*, B.A., Smith, 1944; M.A., San Jose State College, 1961; M.A., Stanford, 1962; Ph.D., 1969.

DONALD STREETS, *Assistant Professor*, B.S., Indiana, 1956; M.A., Notre Dame, 1965; Ed.D., Massachusetts, 1971.

PATRICK J. SULLIVAN, *Associate Professor*, B.A., Georgetown, 1960; M.A., California at Berkeley, 1962; Ph.D., 1967.

BOB SUZUKI, *Associate Professor*, B.S., California at Berkeley, 1960; M.S., 1962; Ph.D. California Institute of Technology, 1967.

HARIHARAN SWAMINATHAN, *Assistant Professor*, B.S., Dalhousie, 1965; M.S., Toronto, 1966; M.Ed., 1968; Ph.D., 1971.

LAVERNE J. THELEN, *Professor*, B.S., Nebraska State at Wayne, 1949; M.A., Nebraska, 1956; Ed.D., 1961.

WILLIAM L. THUENMEL, *Associate Professor*, B.S., Michigan State, 1958; M.A., 1965; Ph.D., 1970.

BARBARA TURNER, *Associate Professor*, B.A., Antioch, 1962; M.A., DePauw, 1965; Ph.D., Chicago, 1969.

RICHARD O. ULIN, *Professor*, B.A., Harvard, 1938; M.A., 1942; M.Ed., 1949; Ed.D., 1955.

GEORGE URCH, *Associate Professor*, B.A., Western Michigan, 1953; M.A., 1959; Ph.D., Michigan, 1967.

SILVIA VIERA, *Professor*, B.A., University of Puerto Rico, 1943; M.Ed., Columbia, 1951; Ph.D., Texas, 1960.

PETER H. WAGSCHAL, *Associate Professor*, B.A., Harvard, 1966; M.A., Stanford, 1967; Ed.D., Massachusetts, 1969.

ERNEST WASHINGTON, *Associate Professor*, B.A., Minnesota, 1960; M.A., Illinois, 1965; Ph.D., 1968.

KENNETH WASHINGTON, *Associate Professor*, B.A., Michigan State, 1961; M.A., 1967; Ph.D., 1970.

GERALD WEINSTEIN, *Professor*, B.S., Temple, 1954; M.Ed., 1959.

ROBERT WELLMAN, *Professor*, B.A., Dartmouth, 1954; M.A., Western Reserve, 1959; Ph.D., Ohio State, 1962.

DONALD W. WHITE, *Associate Professor*, B.A., Emerson, 1960; M.A., St. Louis, 1971; Ph.D., Pittsburgh, 1974.

JOHN W. WIDEMAN, *Associate Professor*, B.A., Williams, 1950; M.Ed., Harvard, 1956; Ed.D., 1970.

WILLIAM C. WOLF, JR., *Professor*, B.S. Pennsylvania State at Kutzman, 1955; M.Ed., Ohio, 1956; Ph.D., Iowa, 1959.

ROBERT L. WOODBURY, *Professor and Associate Provost*, B.A., Amherst, 1960; M.A., Yale, 1962; Ph.D., 1966.

RAYMOND WYMAN, *Professor*, B.S., Massachusetts, 1937; M.Ed., Boston, 1947; Ed.D., 1956.

## THE SCHOOL OF EDUCATION

The School of Education is committed to developing and evaluating new structures, programs, and perspectives with a goal of major reforms in education. The

## EDUCATION

school is attempting to become a powerful force for changing education to meet more effectively students' needs for living in today's world and society's needs for education to improve the quality of life for all its members.

## THE DOCTOR OF EDUCATION DEGREE PROGRAM

Typically an Ed.D. candidate spends at least three years beyond the bachelor's degree in full-time study. Within the framework of Graduate School regulations, each student plans his or her own doctoral program with the advice of and subject to the approval of a Guidance Committee. Students are expected to spend at least two consecutive semesters under direct supervision of their committees, participate in conceptual or quantitative research efforts, engage in teaching and/or some form of field experience, become familiar with contemporary problems in education, and take a comprehensive examination prior to writing a dissertation.

## CERTIFICATE OF ADVANCED GRADUATE STUDY (C.A.G.S.)

Programs leading to a Certificate of Advanced Graduate Study, individually prepared in consultation with a member of the graduate faculty, are designed for those who seek post-master's degree work in any of the approved areas, but who are not committed to the more lengthy and rigorous requirements of a doctoral program. These are not degree programs, but require a minimum of 30 credit hours beyond the master's degree (the master's degree must not be more than 10 years old). All 30 credits must be taken at the University of Massachusetts within a four-year period, and at least 15 credits must be taken in the School of Education. Of all the course work leading to the Certificate, at least 18 credits must be 700-900 courses.

## THE MASTER OF EDUCATION DEGREE PROGRAM

The Master of Education degree is offered for prospective elementary teachers, for professional improvement of elementary and secondary teachers, and for the training of educational specialists in any of the approved Areas of Concentration. Each candidate prepares a 33-credit program in consultation with a faculty adviser. A minimum of 18 credits must be graded and a minimum of 12 credits must be selected from the 700 to 900 number series of courses.

## INDIVIDUALIZED STUDY CONTRACTS

Individualized study contracts offer students the option of study and experience in areas where formal courses are not available or are too general. Such programs of reading, research, writing, etc., are described as "Independent Study" on the contract form, while experiential or field-related learning activities are labeled "Practicum".

The contractual system places maximum responsibility for initiative and work on the learner. Individualized study assumes the integrity and sincerity of the student.

## EDUCATION

### LEARNING CLUSTERS

The general academic program is characterized by a diversity of learning and teaching resources, alternative educational paths and an emphasis on active involvement in the field. The School of Education has reorganized incorporating its previous Learning Centers and programs into academic Clusters which operate as focal points for the various academic experiences and courses. A student typically will belong to the Cluster of his major adviser but may have other members of his Guidance Committee and Dissertation Committee from other Clusters, thus, cluster preference should be indicated on the Graduate School application form. The degree is not awarded through any Cluster but through the School and the Graduate School as a general education degree. Current Clusters are:

1. Humanistic Applications of Social and Behavioral Sciences in Education
2. Designs for Effective Learning
3. Division of Educational Planning and Management
4. Transdisciplinary Education, and
5. Educational Policy Studies.

A more detailed description of the academic focus of each Cluster follows.

#### HUMANISTIC APPLICATIONS OF SOCIAL AND BEHAVIORAL SCIENCES IN EDUCATION

The goal of this Cluster is to assist people in their historical and ontological vocation of becoming more fully human. The method is the application of the social and behavioral sciences to the direct education of individuals and to the transformation of the institutions that facilitate or impede human development. All members of the Cluster, both faculty and students, are attempting to answer in practice the questions, "what is full humanness?", and "how can we more effectively help people become more fully human?". However, there are productive differences among Cluster members in viewpoint, emphasis and applications of their answers to these two questions. Members draw from a wide range of theories for definitions of full humanness: humanistic psychology, theoretico-empirical descriptions of the universal stages of human development, philosophic, economic and social psychologies. Change methods vary from individual counselling and therapy to group methods for deliberate psychological education to organizational development strategies for changing larger social systems. The settings in which these methods are applied also vary widely from schools, mental hospitals and prisons to detention centers, half-way houses, community mental health centers, drug education units. This diversity of response to the cluster's basic goal is strongly encouraged as a way of maintaining a synergistic group of professionals.

The pressing need for new, more effective, more widespread assistance demands that the program have a strong innovative, applied experimental core. However, the goal is not to create a new breed of elite professional technicians, or to establish new certification procedures that artificially create a scarce service resource. On the contrary, the program is committed to the demystification of its goals and methods through national and international dissemination of the skills that help people become more fully human.

#### DESIGNS FOR EFFECTIVE LEARNING

The students, staff and faculty of the Cluster have

## GRADUATE SCHOOL

joined together to help build designs for effective learning, and share these commitments:

1. Learning through experience to create institutional means for a *reality-based education* for undergraduates, graduates, and in-service personnel.
2. Learning throughout life to create models for *open-ended education* for all involved in the education process from students and paraprofessional through administrators, parents, and community leaders.
3. Learning to change to enable schools, programs, and institutions to adapt through continuous *self-renewal* for the needs of the future.
4. Learning through diversity *combatting institutionalized and personal racism* in our own programs and in training others to do so.
5. Creating a new design for higher education to evolve an institutional model for a *new design for higher education*.

The students, staff and faculty believe that most successful ventures in changing schools have resulted from a combination of graduate and undergraduate programs with specific goals (such as designing a comprehensive model for developing human potential, implementing effective open classrooms, or improving urban schools). This Cluster is preparing pre-service and in-service personnel, teacher trainers, administrators, and researchers to act as catalysts for educational renewal. By combining field-based programs with academic disciplines, a new model for higher education has emerged which promises a growing influence over the quality of learning throughout the country.

#### DIVISION OF EDUCATIONAL PLANNING AND MANAGEMENT

The primary goal of the Division of Educational Planning and Management (DEPM) Cluster is to promote the welfare of its students with regard to learning experiences, administrative support services, financial support, sense of community and information needs. DEPM is comprised of six academically oriented sub-units. These sub-units are the Center for Curriculum and Organization (CCO), the Center for Educational Research (CER), the Clinic to Improve University Teaching (CIUT), the Center for Leadership and Administration (CLA), the Center for Occupational Education (COE), and the Academic Disciplines Program: Science and Social Studies.

To confront problems in schooling at a fundamental level, the Center for Curriculum and Organization prepares its members to focus on the teacher-learner encounter in schools. Systematic change at this level, where the concerns of the students, teachers, administrators, and parents concentrate for a minimum of 10 years in most children's lives, is the Center's priority.

The Center for Educational Research specializes in research, development, dissemination, and evaluation work within the context of professional education. Although educational research and development is the primary area of interest of CER, the faculty and students cooperatively participate in a variety of activities and services which are natural offshoots of this main function.

The Clinic to Improve University Teaching was established in 1972 to assist faculty members in improving the quality of instruction which they offer to students. Supported by a W. K. Kellogg Foundation grant, the Clinic has developed and refined a teaching

improvement process which enables individual instructors, at elementary, secondary and University levels, to work with trained Teaching Improvement Specialists to assess and improve their teaching effectiveness.

The Center for Leadership and Administration seeks to provide opportunities for each student to enhance his/her qualifications to assume important leadership positions in education. To achieve these ends, CLA relies on active involvement of each degree candidate in one or more peer advisory and support groups; close interactions between students and staff members in a variety of situations, formal and informal; and maximum responsibility and initiative for his or her own program development by each student.

The focus of the Center for Occupational Education is to instill quality and professionalism into teaching in occupational education; to thoroughly equip and train teachers in specific occupational areas, to develop leadership and administrative abilities in occupational educators; and, through related research, to develop new and relevant occupational programs.

The primary responsibility of the Academic Disciplines Program (Science and Social Studies) on the graduate level, is to offer inservice educational opportunities for practicing secondary school science and social studies teachers, which could lead to the M.Ed. degree or the C.A.G.S. The group also enrolls a small number of doctoral students preparing to become specialists in science and social studies education.

#### TRANSDISCIPLINARY EDUCATION

The Transdisciplinary Education Cluster believes that within a complex society an individual must have a basic understanding of his or her environment. This can be achieved within the school setting through the study of transdisciplinary topics such as perception, rhetoric, and movement, both as distinct entities and as elements germane to all disciplines.

The Transdisciplinary Education Cluster concentrates on the training of effective professionals in the fields of bilingual/bicultural education, communication arts (arts and humanities, reading and media), special education and transdisciplinary education/alternative schools.

Participants in Transdisciplinary Education Cluster programs often utilize the resources in the four other clusters in the School of Education.

Faculty members and graduate students of the Transdisciplinary Education Cluster are committed to addressing the urgent issues of education in the 70's and to thinking and working for the strongest possible programs of graduate training. Emphasis in all programs falls on critical inquiry, alertness to quality evaluation, shared responsibility between faculty and student members and development of solid research capabilities. Each graduate student is given maximum flexibility to plan and develop his or her course of study. Further, the faculty supports and actively encourages research into new methods and approaches which add to knowledge of Transdisciplinary Education. As the School develops a larger number of inservice components of its graduate programs, these goals develop added meaning and sense of opportunity for all.

#### EDUCATIONAL POLICY STUDIES

The primary concern of EPS is with attaining greater understanding of a wide variety of aspects of the educa-

tional process through systematic theory-based investigation and action.

EPS's major focus is "with attaining greater understanding". Thus, action projects which intend to test or apply some aspect of theory, or which seek to increase understanding of the educational process, are highly encouraged within EPS. "A wide variety of aspects of the educational process" is of concern to EPS. These "aspects" may be defined by theory of discipline (e.g., philosophy, psychology, history of education, etc.); by function (e.g., teaching, curriculum, administration, etc.); by level of instruction (e.g., early childhood, elementary, secondary, post-secondary, etc.); by educational problems (e.g., international education, racism in education, civil rights of students and teachers, etc.) or by any other category system that subdivides education.

EPS operates via "systematic, theory-based investigation and action." Experiments which test a theory, action projects which apply theory, and conceptual investigation which develop and combine theories are highly encouraged. Ultimately the concern of EPS is to bring systematic knowledge to bear on matters of public policy and particularly those aspects of public policy which effect the formulation and modification of educational policy.

#### HUMAN DEVELOPMENT

Human Development was formerly a department in the School of Home Economics and had its offices in Skinner Hall. In a move to consolidate resources, the University initiated provisional affiliation of the Human Development Department with the School of Education during the Fall 1974 semester. This affiliation has now been completed. The members of the Human Development Department have aligned themselves with the five existing clusters in the School of Education are included among the faculty listed above. In order to accommodate those students with Human Development majors, approved Human Development courses are listed separately.

#### SCHOOL OF EDUCATION CURRICULUM

The following courses form the foundations of the School of Education's curriculum program. Referred to as approved courses, they represent that portion of the School's curriculum which has gone beyond the experimental stage and which remains relatively fixed. These courses are not totally rigid, however. Although they cover basically the same subject areas each semester they are modified from semester to semester to reflect the needs of the ever changing student population and demands of professional education. Additional components of the School's curriculum program include individualized study and experimental courses which provide the capacity for individuality and numerous options that are typically not available in the approved course area.

Courses listed herein are grouped by cluster. Exceptions are the Human Development courses, which are still listed separately for the convenience of Human Development majors, and a General Listing, which includes courses that are not affiliated with any particular cluster, but which are an integral part of the School's curriculum and are shared by all of the clusters.

## EDUCATION

### HUMANISTIC APPLICATIONS OF SOCIAL AND BEHAVIORAL SCIENCES IN EDUCATION

#### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 701. PRACTICUM FOR SCHOOL GUIDANCE.

Field experience under supervision. For students in final part of master's program.  
Prerequisites, Educ 577, 910, and 911. *Credit, 1-4.*

##### 706. SEMINAR IN GUIDANCE (MASTER'S SECTION).

Professional problems reviewed; ethical issues regarding confidentiality; program development to combat racism and sexism.

##### 707. SEMINAR IN GUIDANCE (DOCTORAL SECTION).

Analysis of evaluation designs and methods for measuring effectiveness of guidance services.

##### 713. HUMAN APPRAISAL AND EVALUATION.

Analysis of statistical procedures; review of achievement, aptitude, and interest tests, and their interpretation, selection, and administration; case-study procedures; ethical consideration; and problems in human assessment.  
Prerequisite, permission of instructor.

##### 730. MEASUREMENT FOR GUIDANCE.

Analysis of measurement devices in school guidance, including sociometrics, value scales, inventories, and other tests.

##### 742. PROBLEM SOLVING METHODS FOR EDUCATIONAL CONSULTANTS.

Students analyze concepts, strategies, and group behavior practices that positively or negatively affect the outcome of efforts to solve complex educational problems. *Credit, 4.*

##### 747. FAMILY COUNSELING.

Basic approaches to family counseling including communications, psychoanalytical and behavioral theories.

##### 831. LABORATORY FOR COUNSELING SKILLS.

The general nature of theory construction, levels of explanation, relationships of philosophy, psychology and sociology, various methods of facilitating human growth and development.

##### 835. SPECIAL SEMINAR IN HUMANISTIC EDUCATION.

A reading seminar exploring the philosophy, social-psychology and purposes of humanistic education. For Doctoral students who have taken Educ 522 and the Practicum in Humanistic Curriculum Development.

##### 910. SCHOOL COUNSELING THEORY.

Counseling theory and research evaluation. Methodology, philosophies, ethics, problems, and issues of school counseling.  
Prerequisites, Educ 577 and at least one hour of credit in Educ 701.

##### 911. SCHOOL COUNSELING PROCEDURES.

Instruments and techniques of guidance, such as observation, individual appraisal, and record-keeping, and school-community liaison practices.  
Prerequisites, Educ 577 and 910.

##### 912. OCCUPATIONS AND PLACEMENT IN SCHOOL GUIDANCE.

The collection and evaluation of occupational, educational, and placement information, and its use with individuals and groups of students in school guidance.  
Prerequisite, Educ 577.

## GRADUATE SCHOOL

##### 913. ADMINISTRATION OF SCHOOL GUIDANCE SERVICES.

Operative framework of guidance programs in terms of personnel, functions, physical facilities, institutional integration, finance, and data processing. To be taken near completion of master's degree.  
Prerequisite, Educ 577.

##### 915. GROUP ACTIVITIES IN COUNSELING.

A guidance study of school groups. Group dynamics, discussion techniques, group counseling, sociometric methods, and other school group activities.  
Prerequisites, Educ 577, 910, and 911.

##### 916. CLINICAL STUDIES IN SCHOOL GUIDANCE.

Intensive case studies of youth.  
Prerequisite, Educ 911 or 730.

##### 928. INTERNSHIP IN COUNSELING.

Supervised on-the job counseling experience. Work includes direct counseling, individual supervisory conferences, writing of case reports and the analysis of taped counseling sessions. For CAGS and doctoral students.

##### 929. ADJUSTMENT COUNSELING CASEWORK.

Supervised experience with children having special adjustment problems. May not be taken in addition to Educ 928.

##### 949. CAREER DEVELOPMENT.

Intensive study of theories of vocational choice, related literature and research. Analysis of world of work and impact of such factors as technology, demography, social structure, geography, automation, age, and sex on career and personal development; implications for educational institutions.

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

##### 520. HUMAN RELATIONS LABORATORY.

For prospective elementary teachers with several basic skills in human relations. Teacher trainees participate in exercises in attention, flexibility, and decision making in human relations.

##### 521. STRENGTH TRAINING.

A way of working with teacher, counselor, and administrator performance through simulation and videotape feedback. Stress on what kind of school the personnel project to their students. School personnel (pre- and in-service) are taught to evaluate the responses, feelings, and perceptions of students. A laboratory course with assigned readings, meeting once a week for three hours.  
Prerequisite, student teaching.

##### 522. THE EDUCATION OF THE SELF.

Educational strategies for increasing self-knowledge. A laboratory approach trains the student in those processes, concepts, and skills leading toward self-observation, pattern clarification, and the development of personal designs for response-experimentation are pursued. Journals and final papers document experiences.  
Prerequisite, permission of instructor.

##### 577. PRINCIPLES OF SCHOOL GUIDANCE.

The nature of guidance and its need in the schools with an overview of an adequate guidance service for a school system.

##### 678. PRACTICUM IN HUMANISTIC CURRICULUM DEVELOPMENT.

Models for the development of humanistic curricula. Students will employ one or more models in writing their own curricula, and in evaluating their efforts.  
Prerequisite, Educ 522.

##### 679. VALUE CLARIFICATIONS FOR TEACHERS.

To help teachers clarify their own values; how these values affect their students in and out of the classroom.

DESIGNS FOR EFFECTIVE LEARNING

ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

COURSES OPEN TO GRADUATE STUDENTS ONLY  
(For either major or minor credit)

**710. SEMINAR IN MATHEMATICS EDUCATION.**  
A survey of recent developments in elementary mathematics education and their implications for exploring mathematics in the elementary school.

**721. WORKSHOP IN LANGUAGE ARTS.**  
Students are required to design presentations in the language arts for pre-service students preparing for the open classroom. Lectures, workshops and individual conferences.

**735. ADVANCED THEORY AND PRACTICE OF TESTING I.**  
The theory of mental tests beginning with the classical test theory model and including such topics as reliability, validity, item analysis, and latent structure models.  
Prerequisite, permission of instructor.

**740. ADVANCED THEORY AND PRACTICE OF TESTING II.**  
An in-depth study of advanced topics in test theory. Includes problems in the measurement of change, latent trait theory, item-examinee sampling theory and tailored testing strategies.  
Prerequisite, Educ 735.

**757. RESEARCH, PLANNING AND DEVELOPMENT IN URBAN EDUCATION.**  
Urban development and power structures in relation to urban schools. Includes a survey of relevant literature, seminars and research or planning projects. *Credit, 3-6.*

**758. URBAN ADMINISTRATION AND SCHOOL STRUCTURES.**  
New departures in school organization and administration in urban schools. Explores decentralized school systems, MIA's, the house plan and educational parks, the development of differentiated staffs, flexible scheduling, etc.

**768. DEVELOPMENTS IN ELEMENTARY SCIENCE EDUCATION.**  
A survey of recent research in elementary science education and the resultant implications for practice in the school.  
Prerequisite, Educ 562 or 661.

**951. PRINCIPLES OF SUPERVISION.**  
Principles and problems of supervision and the exercise of educational leadership to improve instruction in the elementary curriculum and in secondary school content fields.

COURSES OPEN TO BOTH GRADUATE AND UNDER-GRADUATE STUDENTS  
(For either major or minor credit)

**505. AESTHETIC ELEMENTS IN THE TEACHING-LEARNING PROCESS.**  
To enable teachers to increase their creativity and to use the arts in the classroom through improvisation workshops, discussions, readings and curriculum projects.

**557. INTRODUCTION TO URBAN EDUCATION.**  
Discussion groups survey urban and suburban schools, discuss the process of learning in urban classrooms, study the effects of the present curriculum, and survey various innovative techniques as they apply to urban schools.

**559. PRINCIPLES AND METHODS OF TEACHING ELEMENTARY SOCIAL STUDIES.**  
Students evaluate various state, commercial, and project social-studies curricula in terms of instructional strategies. Practical experience in creating a social studies unit.

**560. THE ELEMENTARY SCHOOL CURRICULUM**  
The content and methodology of the elementary school curriculum. Emphasis on the unit method and activity programs.  
Prerequisites, electives in Foundations of Education and Child Psychology, Educational Psychology, or Human Development.

**561. PRINCIPLES AND METHODS OF TEACHING READING AND LANGUAGE ARTS IN THE ELEMENTARY SCHOOLS**  
Approaches to the teaching of reading and language arts in the elementary schools. Innovations in methods and materials demonstrated and discussed.

**562. PRINCIPLES AND METHODS OF TEACHING ELEMENTARY SCIENCE.**  
Provides aid in preparing pre-service students for teaching science in elementary schools. Methods, materials, and latest curriculum work.

**563. PRINCIPLES AND METHODS OF TEACHING ELEMENTARY MATHEMATICS.**  
An introduction to the structure of mathematics, and to the role, methods, material, and curricular aspects of mathematics education in the school.

**568. CURRICULUM DEVELOPMENT IN URBAN EDUCATION.**  
Students develop new and innovative curricula for urban schools and investigate what kinds of curriculum development are relevant to inner-city environments. A post-urban internship consisting of lectures, seminars, and field experience.

**572. TEACHING READING TO SPECIAL POPULATIONS K-12**  
Approaches to the teaching of reading to such special populations as the disadvantaged, the gifted, and the emotionally disturbed, with stress on the individualized and experience approaches. One group studied intensively.

**617. INTRODUCTION TO COMPUTER USE IN TEACHING.**  
Introduces novices to uses of the computer in the teaching/learning process.

**618. INSTRUCTIONAL APPLICATIONS OF COMPUTERS.**  
Each student proposes, designs, develops, implements and documents a unit of computer-assisted instructional material.

**630. ECONOMICS OF EDUCATION.**  
An introduction to economists' approaches to education as an investment in human capital. Review of the literature and discussion of issues raised.

**632. PRINCIPLES OF EDUCATIONAL AND PSYCHOLOGICAL TESTING**  
Basic principles of measurement. Topics include descriptive statistics, reliability, validity, principles of test-construction, item analysis and a review of standardized tests.

**661. SCIENCE EDUCATION IN THE ELEMENTARY SCHOOLS.**  
For teachers or other interested persons who wish to bring their knowledge of methods, materials, and curriculum up to date. Laboratory approach.

**671. URBAN COMMUNITY RELATIONS.**  
The interrelationship of inner-city communities and established power within the school system, community control, participation, and decision-making in education and development of alternatives in power relationships. Lecture, discussion and field experience.

DIVISION OF EDUCATIONAL PLANNING AND MANAGEMENT

ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

## EDUCATION

### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

722. **WORKSHOP IN EDUCATIONAL ADMINISTRATION (PRINCIPALS).**
723. **WORKSHOP IN EDUCATIONAL ADMINISTRATION (ADMINISTRATORS).**
725. **EXTERNSHIP IN BUSINESS AND INDUSTRY.**  
Supervised field experience in industry, business, research organizations, or public agencies relevant to the student's area of specialization. Planned individually by student, cooperating business and vocational-technical education staff prior to enrollment. *Credit, 1-6.*
731. **INTRODUCTION TO FACTOR ANALYSIS.**  
An introductory treatment of the linear factor model consideration of the basic problems of factor analysis and a discussion of various factor-analytic solutions. Problems of design and interpretation discussed.  
Prerequisite, permission of instructor.
736. **SEMINAR IN CURRICULUM DEVELOPMENT IN VOC. TECH. EDUCATION.**  
Curriculum development approached from the standpoint of problem areas and embodying current research and response to social or technical changes.
745. **INQUIRY INTO AMERICAN SCHOOLING.**  
Contemporary educational practices. Emphasis on promising developments in curriculum, staffing, and organization of public schools, past and future innovations.
752. **INTRODUCTION TO THE USES OF COMPUTERS IN EDUCATION.**  
Many areas of application of computer-related technology to schools, including instruction, research, administration, the systems approach and general societal impact of the computer.
765. **ORGANIZATION FOR CURRICULUM DEVELOPMENT: BASIC PRINCIPLES IN CURRICULUM AND INSTRUCTION.**  
The procedures and criteria for curriculum development. Determining goals, creating and organizing learning opportunities, and evaluating the effectiveness of curricula, considered in a small group setting.
766. **CURRICULUM DEVELOPMENT: THEORY AND RESEARCH.**  
The needs of children and society; modern programs; procedures for developing curricula and improving present offering in a school. Includes clinical involvement in curriculum development in schools cooperating with the Center for Study of Educational Innovations.
769. **EVALUATION OF CURRICULUM PROGRAMS.**  
The role of evaluation in curriculum development and the development of evaluative instruments. The nature of the educational environment of schools and the need for determining what makes a compelling curricular program.  
Prerequisites, Educ 765 and 766.
811. **RECENT DEVELOPMENTS IN SECONDARY SCIENCE.**  
The scope and sequence of the science curriculum; the rationale, content, and implications for different student populations of selected curricula.  
Prerequisite, teaching experience.
813. **NEW DEVELOPMENTS IN SECONDARY SCHOOL SOCIAL STUDIES.**  
A comparative study and evaluation of recent programs and practices in secondary school social studies.
820. **RESEARCH PRACTICUM IN EDUCATION.**  
Educational problems examined in varied field settings. Alternative solutions contemplated in the context of schools,

## GRADUATE SCHOOL

state agencies, and federally-sponsored projects. Consultative arrangements made for students; discussions and field work.

833. **EDUCATIONAL KNOWLEDGE DIFFUSION AND UTILIZATION.**  
Efforts to diffuse and utilize research in agriculture, medicine, the military, social sciences, and the world of commerce.
838. **SEMINAR IN SCIENCE EDUCATION.**  
The current literature and research in science education of researchable problems and research strategies which may be applicable.
846. **WORKSHOP IN SCIENCE EDUCATION.**  
Selected problems in curriculum and instruction in science. *Credit, 3-6.*
849. **CURRENT CONCEPTS, TRENDS, AND PRACTICES IN VOCATIONAL-TECHNICAL EDUCATION.**  
Concepts resulting from a critical evaluation of the research and legislation involved in the development of vocational and technical education programs.
950. **FUNDAMENTALS OF EDUCATIONAL ADMINISTRATION.**  
Introduction to general school administration, the relation of public education to the cultural pattern, and organization and practices in school administration.
952. **ADMINISTERING ELEMENTARY SCHOOLS.**  
The principal's responsibilities, organization of the school office, scheduling, use of school facilities, curriculum organization, staff relationships, and the place of the school in the community.  
Prerequisite, teaching experience.
953. **ADMINISTERING SECONDARY SCHOOLS.**  
Housing, finance, scheduling, the library, guidance, cafeteria, public relations, etc.  
Prerequisite, teaching experience.
954. **PUBLIC SCHOOL FINANCE.**  
The economics of public education, sources of school revenue, taxation, and federal, state and local plans of school fiscal support.  
Prerequisite, Educ 950.
955. **COMMUNITY RELATIONS FOR SCHOOL PERSONNEL.**  
The development of good public-relations policies and techniques for assisting lay people in interpreting school activities, policies, and objectives.  
Prerequisite, permission of instructor.
956. **PRINCIPLES OF SCHOOL LAW.**  
Review of the legal relations of school personnel in school and community. A series of selected cases.
957. **LEGAL BASIS OF SCHOOL ADMINISTRATION.**  
The legal basis of school operation, cases in school law, the role of the attorney general and school solicitor in school law interpretation, and school operation in relation to federal, state, and local environment.  
Prerequisite, Educ 950.
958. **SCHOOL PERSONNEL ADMINISTRATION.**  
The leadership role in staff performance and duties, the planning and promotion of continuous programs of in-service training, and personnel recruitment and development.  
Prerequisite, Educ 950.
959. **SCHOOL BUSINESS ADMINISTRATION.**  
The business aspects of school administration as related to the attainment of educational objectives. The nature of the problems involved and the skills needed in directing school business affairs.  
Prerequisite, Educ 950.

## UNIVERSITY OF MASSACHUSETTS

## EDUCATION

### 960. SCHOOL PLANT PLANNING.

A comprehensive study of school plant needs, site selection, bonding, building planning, and standards, architectural service, and furniture and equipment selection practices.  
Prerequisite, Educ 950.

### 961. CASE STUDIES IN EDUCATIONAL ADMINISTRATION.

A series of situations involving the role of the school administrator in a democracy.  
Prerequisites, Educ 950 and 958.

### 962. EDUCATIONAL PLANNING AND EVALUATION.

Participation in a school survey to give advanced graduate students practical field experience in inspection evaluation and recommendations for future action in the educational operation.  
Prerequisites, Educ 950, 959, 960, and permission of instructor. Taught in two consecutive semesters. *Credit, 6.*

### 963. INTERNSHIP IN EDUCATIONAL ADMINISTRATION.

For advanced graduate students in educational administration. Placement on assignment in actual school administration positions on the basis of cooperative school system-university selection, assignment, and supervision.  
Prerequisites, 18 semester hours in educational administration and permission of instructor. *Credit, 1-12.*

### 964. ADMINISTRATION OF ADULT EDUCATION.

Role of the public schools in continuing community service and planning and directing programs in adult education; adult needs in preparation for job procurement, retraining, job advancement, and community service.  
Prerequisite, Educ 950.

### 965. THEORY AND RESEARCH IN EDUCATIONAL LEADERSHIP.

The historical development of administrative theory. Emphasis on its contribution to research and development in educational administration.  
Prerequisite, Educ 950.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 516. EVALUATION MODELS.

Seminar utilizing the writings of Guba, Stufflebeam, Stake, Pace, Serevin, Bloom, and Hammond. Emphasis on philosophies of evaluation, variables employed in the various models, and the generation of new evaluation designs.

#### 517. LEARNING SYSTEMS DEVELOPMENT.

Teaches educational specialists, administrators, and classroom teachers procedures for developing instruction that meets student needs, including techniques of accountability, individualizing instruction, using instructional objectives, and evaluation techniques.

#### 518. RESEARCH METHODS IN EDUCATION.

An interdisciplinary course on research methods and scholarship in psychological, sociological, economic, political, historical, and philosophical studies of education.  
Prerequisites, study in a discipline and permission of instructor.

#### 531. ISSUES IN FREEDOM AND RESTRAINT IN ACADEMIC POLICY.

The sociological, philosophical, economic, and anthropological considerations found in freedom and restraint conflict, via readings in periodicals and discussions.

#### 532. STUDENT REVOLUTION AND CURRICULUM CHANGE.

Examination of sources, mechanisms, and consequences of social and cultural change; analysis of theories of change and of important theoretical studies in that area. Limited enrollment.

### 533. EDUCATIONAL LAW.

An introduction to the legal aspects of public education including rights and liabilities of school boards, teachers, and pupils; special attention to recent legal interpretations.

### 584. ORGANIZATION AND ADMINISTRATION OF A DISTRIBUTIVE EDUCATION PROGRAM.

Activities necessary to initiate, maintain, and improve a Distributive Education Program. Focus on organization and administration at the secondary level.

### 586. ORGANIZATION AND ADMINISTRATION OF A COOPERATIVE EDUCATION PROGRAM.

Organization and administration of the Cooperative Education Program at the secondary level. Examines those activities necessary to initiate, maintain and improve a Cooperative Education

### 587. VOCATIONAL ADULT EDUCATION.

Organization and administration of vocational adult classes; the interrelationships between secondary and adult education.

### 588. DIRECTED OCCUPATIONAL EXPERIENCES (INTERNSHIP PROGRAM).

Eight weeks of directed occupational experience in each of the three major fields of distribution (retail, wholesale, service) planned individually by student, cooperating business, and vocational-technical education staff prior to enrolling. *Credit, 2-4*

### 589. METHODS AND MATERIALS FOR DISTRIBUTIVE EDUCATION.

Information on securing, evaluating, organizing, and presenting instructional materials and experiences. Designed for prospective distributive-education personnel. *Credit, 2*

### 610. PRINCIPLES AND METHODS IN TEACHING SOCIAL STUDIES IN THE SECONDARY SCHOOLS.

A critical examination of various possible goals and strategies for secondary-school social-studies instruction, to help the prospective teacher develop a defensible rationale for his teaching. Designed as a pre-service offering.

### 612. PRINCIPLES AND METHODS IN TEACHING SECONDARY SCIENCE.

The nature and content of science, learning strategies, and values of self and society, to help the pre-service science teacher formulate his own philosophy and rationale for education in science.

### 624. DESIGN AND MANAGEMENT OF SCHOOL INFORMATION SYSTEMS.

Systems analysis, problem definition, hardware selection, site preparation, systems design, staff selection, information collection and display, programming and procedure documentation standards, and user-training for various types of information systems. Concurrent internship in an appropriate school information center expected.  
Prerequisite, a knowledge of computer programming.

### 633. INTRODUCTION TO RESEARCH FOR NON-RESEARCH MAJORS.

Purposes for research; different kinds of research (i.e., historical, survey, and experimental models); specific research methodology (drawn from statistics, experimental design, and measurement and evaluation).

### 655 (I), 656 (II). INTRODUCTION TO STATISTICS AND COMPUTER ANALYSIS.

Elementary descriptive statistics, control of the computer terminal inferential statistics, and some programming concepts with a computer language (FORTRAN) for unique solutions of problems. First semester (or permission of instructor) prerequisite for second semester.

### 658 (I), 659 (II). INTRODUCTION TO SCHOOL ADMINISTRATION.

To introduce each of the many disciplines on which an

## EDUCATION

administrator calls. Members of the faculty of the University and the Five Colleges lecture on their own disciplines.

### 672. PRINCIPLES AND PRACTICES IN VOCATIONAL EDUCATION.

Emphasis on secondary and post-secondary programs and the relationship of vocational education to the total educational program.

### 673. APPRENTICE TEACHING IN AGRICULTURE.

A full year (in absentia) teaching agriculture, horticulture, and related subjects under a supervising teacher in a selected school. *Credit, 6.*

### 675. METHODOLOGY AND MATERIALS FOR TEACHING IN OCCUPATIONAL EDUCATION.

A seminar approach to special methodology in occupational education. Content based on experiences of students in teaching. Laboratory section in microteaching. *Credit, 1-4.*

### 676. PREPROFESSIONAL LABORATORY EXPERIENCE IN OCCUPATIONAL EDUCATION.

Participatory experience in teaching in occupational education programs, including directed observation of instructional activities, teaching individuals and conducting occupational placement, and/or off-farm instruction. *Credit, 1-4.*

## TRANSDISCIPLINARY EDUCATION

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 709. SEMINAR IN READING.

Content varies each semester. Topics may include psycholinguistics and reading, miscue analysis, current issues, role of the reading consultant.

##### 714. SEMINAR IN ENGLISH EDUCATION.

##### 716. WORKSHOP IN REMEDIAL READING.

##### 727. PHOTOGRAPHY IN EDUCATION.

Theory and practice of taking and processing photographs for use in educational activities.

##### 728. AUDIOVISUAL TECHNOLOGY.

Applications of acoustics, electricity, magnetism, mechanics, and optics to audio-visual equipment and techniques. Prerequisite, Educ 667.

##### 737. EDUCATIONAL MEDIA THEORY.

The research and theoretical aspects of media in education systems; special reference to philosophies, learning systems and communication models which relate to the teaching-learning situation.

##### 738. ADVANCED MEDIA PRODUCTION.

Professionals preparation in the area of education media and technology.

##### 739. VISUAL COMMUNICATIONS AND LITERACY.

The elements of visual literacy and of programs of visual education.

##### 780. RESEARCH IN READING.

Discussion and review of relevant research and development activities in reading, past, present, and future, including an analysis of the research-to-implementation process and an investigation into possible breakthroughs in reading instruction. Prerequisite, permission of instructor.

##### 782. CHILDREN'S LITERATURE.

Lectures, demonstrations, discussions, practicum and readings surveying the field. Investigates various content areas

## GRADUATE SCHOOL

(such as comparative folklore, poetry, and non-fiction), approaches for classroom use, contemporary problems, and the needs of specific populations.

### 783. DIAGNOSIS OF READING DIFFICULTIES.

Develops a background of information in the diagnosis and treatment of reading difficulties. Theory and interpretation of diagnostic procedures. Prerequisite, Educ 561.

### 812. RECENT DEVELOPMENTS IN SECONDARY ENGLISH.

A critical evaluation of the current literature, research, year-books, and experiments in the curriculum and teaching of English. Prerequisite, Educ 609 and teaching experience.

### 814. RECENT DEVELOPMENTS IN SECONDARY MATHEMATICS.

A critical evaluation of the current literature, research, and studies in the curriculum and teaching of secondary school mathematics. Prerequisites, Educ 611 and teaching experience.

### 815. SECONDARY SCHOOL CURRICULUM.

The factors influencing the secondary school curriculum, the organization of the curriculum, and the goals of the secondary school, and current developments and elements desirable in the curriculum of typical secondary schools. Prerequisite, teaching experience or permission of instructor.

### 850. AUTO-INSTRUCTIONAL DEVICES AND PROGRAMMED LEARNING.

Theory and practice of programmed learning for typical school subjects. Each student sets up objectives and constructs a program for a unit of work. Implications for future use in education are considered. Prerequisite, Educ 667.

### 852. ADMINISTRATION OF AUDIOVISUAL SERVICES.

To prepare audiovisual coordinators, directors, and supervisors in the operation of an audiovisual service: teacher-training, selection of materials and equipment, storage, cataloging, distribution, maintenance, and financial support. Prerequisites, Educ 667 and teaching experience.

### 854. NEWER MEDIA IN EDUCATION.

To acquaint administrators, supervisors, and experienced classroom teachers with the characteristics, applications, and implications of the newer media in education such as language laboratories, motion pictures, closed circuit television, and teaching machines. Prerequisite, Educ 667 or permission of instructor.

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit).

### 527. CURRICULUM DEVELOPMENTS IN MUSIC AND SOUND IN EDUCATION.

A survey of methods, materials, techniques, and problems related to the innovative use of music and sound in the classroom as an aesthetic medium for enhancing learning of all kinds. Development of experimental innovations and their applications.

### 530. CURRICULUM INNOVATIONS IN MOVEMENT AND DANCE IN EDUCATION.

A survey of methods, materials, techniques, problems, and relevant research literature related to the use of movement and dance in the classroom as an aesthetic medium for enhancing learning of all kinds. Experimental application of innovations developed in the course.

### 535. EDUCATIONAL MEDIA, TECHNOLOGY AND SYSTEMS.

The characteristics, capabilities, applications and implications of a variety of media to a variety of educational strategies.

## UNIVERSITY OF MASSACHUSETTS

## EDUCATION

**536. AUDIOVISUAL INFORMATION TRANSMISSION.**  
Available knowledge and technology useful in the design of audiovisual materials. A search for principles useful in planning materials to aid in cognitive and effective experiences in educational contexts.

**537. MEDIA PRODUCTION SURVEY.**  
Students prepare slides, graphics, recordings, and still and motion pictures for use in an educational program. Designed for teachers, trainees, and specialists.

**538. PRE-PRODUCTION CREATIVITY OF EDUCATIONAL FILMS.**  
How to visualize ideas, concepts and curricula, utilizing all video and cinemagraphic techniques of live action, animation, cuts, dissolves, freeze frames, slow motion, etc. to communicate them interestingly and effectively.

**541. EDUCATIONAL FILM PRODUCTION.**  
Theoretical data and project applications: students produce educational messages in a motion picture film format through the use of portable video tape. Two 2-hour lectures per week.

**609. PRINCIPLES AND METHODS IN TEACHING SECONDARY ENGLISH.**  
An analysis of purposes, problems, issues, methods, and materials in the teaching of English at the secondary level. Discussion, lectures, case studies, projects. Does not satisfy core requirements. Prerequisite for student teaching in English.

*Credit, 4.*

**611. PRINCIPLES AND METHODS IN TEACHING SECONDARY MATH.**  
The nature and content of mathematics, learning strategies, and values of self and society; to help the pre-service mathematics teacher formulate his own philosophy and rationale for education in mathematics.

**657. TEACHING THE HANDICAPPED THROUGH MEDIA.**  
Professional preparation in educational media and technology. Partially fulfills requirements for the educational media and technology program.

**660. EDUCATIONAL BROADCASTING.**  
A history of educational broadcasting. The current status, development, and availability of radio and television programming for educational purposes. Evaluation of radio and television in accordance with instructional objectives.

**662. EDUCATIONAL TV WORKSHOP.**  
For teachers and teacher interns. The hardware of television; experimental use of television in solving educational problems.

**667. PREPARATION AND USE OF AUDIO VISUAL MATERIALS.**  
Machines, materials, and techniques for teaching groups of students.

### EDUCATIONAL POLICY STUDIES

**ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED**

**COURSES OPEN TO GRADUATE STUDENTS ONLY**  
(For either major or minor credit)

**712. ENGLISH FOR THE DISADVANTAGED.**  
Special problems involved in teaching English in secondary schools in which students come largely from culturally and economically disadvantaged backgrounds.

**724. SEMINAR IN INTERNATIONAL EDUCATION (For Doctoral Majors).**  
An integrating core experience for doctoral students in international education. Current issues and areas of competency needed in the field.

**729. RESEARCH METHODOLOGY IN INTERNATIONAL EDUCATION.**  
An introduction to research methods; students enabled to design and carry out field studies in international education. Techniques used in the various social sciences and examples of their application to problems in international education. Survey methods, attitude and value analysis, interviewing and participant-observation techniques, and research design. Models of design and techniques presented for critique. Each student sets up a research design and method outline for a specific project.

**743. HISTORY OF EUROPEAN EDUCATION.**  
Educational movements and institutions traced from early Greece to the present in Europe, in an attempt to understand modern problems better.

**744. HISTORY OF HIGHER EDUCATION IN AMERICA.**  
An inquiry into the role of the college and university in American society in the past as well as the present. Special attention to the meaning of a college education at various periods in American life.

**748. THE TWO-YEAR COLLEGIATE INSTITUTION IN AMERICAN EDUCATION.**  
The evolution of variant forms of two-year degree-granting institutions with attention to related philosophical and social issues. *Credit, 2.*

**750. THE UNIVERSITY: AN ORGANIZATIONAL ANALYSIS.**  
The effects of institutional organization in higher education on human behavior.

**751. INDIVIDUAL ALIENATION AND CONTEMPORARY HIGHER EDUCATION.**  
An analysis based on interdisciplinary readings on student alienation in contemporary institutions of higher education.

**816. TECHNOLOGY AND EDUCATIONAL DEVELOPMENT.**  
Modern technology and educational innovations and their adaptations to problems of developing countries. Students expected to design a project for implementing given innovations in the context of a particular country.

**817. TECHNIQUES OF EDUCATIONAL PLANNING FOR DEVELOPING COUNTRIES.**  
For advanced doctoral majors in educational development. Basic techniques of educational planning as currently used in Europe and developing countries. Students carry out a planning exercise for a given school system.

**830. EDUCATION AND NATION BUILDING.**  
The educational problems facing developing nations as they endeavor to use the schools as an ameliorative agent. Economic factors and political considerations influencing educational planning in divergent cultures; the allocation of educational resources and the confrontation between old and new cultural values.

**836. SEMINAR IN EDUCATIONAL SOCIOLOGY AND EDUCATIONAL ANTHROPOLOGY.**  
Seminar in selected topics in educational sociology and educational anthropology.

**837. SEMINAR IN EDUCATIONAL HISTORY.**  
Seminar in selected periods or topics of educational history.

**870. SPECIAL PROBLEMS IN INTERNATIONAL EDUCATION.**  
Independent work in international education. *Credit, 1-6.*

## EDUCATION

### 880. CURRENT ISSUES IN EDUCATION.

In-depth exploration of historical antecedents, present conditions, and future alternatives. Fulfills the "Foundations" requirement for students seeking teacher certification.

### 881. COMPARATIVE EDUCATION.

The processes and problems of educational development in selected areas throughout the world. The interrelationship between education and culture explored in a multicultural context. While historical antecedents are recognized, major emphasis is on the cultural forces responsible for contemporary educational practices. Fulfills "Foundations" requirement for students seeking teacher certification.

### 884. EDUCATIONAL SOCIOLOGY.

The American public schools examined as one of many social institutions in the American culture. Emphasis on population, pressure groups, and the social structure of the schools within the community. Optional field experience. Fulfills "Foundations" requirement for students seeking teacher certification.

### 887. HISTORY OF AMERICAN EDUCATION.

A survey of the development of education in the United States. The uses which society has made of American schools.

### 890. ANCIENT AND MEDIEVAL EDUCATIONAL THOUGHT.

Representative educational thinkers during the ancient and medieval periods.

### 891. MODERN EDUCATIONAL THOUGHT.

Representative educational thinkers of this era.

### 914. STUDENT PERSONNEL SERVICES IN HIGHER EDUCATION.

Origin, growth, and operation of student personnel services in American colleges and universities. Specific personnel services such as selection and admission of students, orientation to college life; student financial aid, student activities, and discipline. Prerequisite, Educ 577.

### 918. SEMINAR IN RESEARCH ADVANCED METHODOLOGY FOR INTERNATIONAL EDUCATION.

An advanced seminar in research methods for doctoral candidates about to begin field work. Discussion and analysis of dissertation proposals. Normally taken by second and third year doctoral students in international education.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

### 525. EDUCATION IN AFRICA.

Major trends in education on the developing African continent. Emphasis on the changes since independence. The impact of cross-cultural forces at work in education.

### 526. CURRICULUM DEVELOPMENT IN INTERNATIONAL EDUCATION.

The resources and concepts of curriculum development in international education. Students expected to develop units that can be taught in elementary or secondary schools.

### 528. LABORATORY IN CROSS-CULTURAL STUDIES.

To develop a sensitivity to cultural differences by examining the elements of cross-cultural communications in an educational context. Primarily for teachers and those working in other educational fields. Experientially based (employing field work, role-playing, and gaming), and balanced by analytical readings, discussions, and independent study. Fulfills "foundations" requirement for students seeking Teacher Certification.

### 529. INTERNATIONAL EDUCATION.

An introduction to certain portions of international education. The issues surrounding education as a tool of develop-

## GRADUATE SCHOOL

ment, education in a cross-cultural context, and education through international exchange of persons and ideas. Substantial foreign-student participation. Readings, class discussions, learning games, and individual study projects. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 542. CONTEMPORARY EDUCATIONAL PHILOSOPHIES.

Critical examination of selected contemporary philosophies of education. Special attention to social implications and to relevance to educational practice. Fulfills the "Foundations" requirement for students seeking Teacher Certification.

### 543. DESIGNING AND CONDUCTING ACTIVITIES TO HELP ADOLESCENTS DEVELOP AND LIVE BY THEIR VALUES.

How to design and conduct classroom activities that when carefully sequenced can help adolescents develop and live by their values.

### 545. METHODS OF STIMULATING THE EXPLORATION OF VALUES.

Various ways of utilizing group dynamics methodology to stimulate value exploration of psychological issues and social issues confronting contemporary youth, such as drugs, race, and sex.

### 550. CONCEPTIONS OF LIBERAL EDUCATION.

Traditional and modern conceptions of liberal education analyzed with regard to their relevance to contemporary societies and education.

### 551. FOUNDATIONS OF EDUCATION.

Selected problems and issues in modern education studied through the discipline of educational sociology, educational history, educational philosophy, comparative education, or social psychology. Independent study or field experience optional. Possible foci are educational aims, societal expectations of the schools, church-state relations, professionalism, academic freedom, curriculum and methodological emphasis, urban education, and educational innovation. Fulfills "Foundations" requirement for students seeking Teacher Certification.

### 554. EDUCATIONAL ANTHROPOLOGY.

Relevant concept from cultural anthropology (such as change, human behavior and interaction, and cultural determinants within American culture) applied to education. The culture of the schools and the role of this subculture in the culture as a whole.

### 565. EDUCATING THE DISADVANTAGED CHILD.

The issues and problems in educating disadvantaged children. Emphasis on urban elementary education; rural education problems also addressed.

### 590. OBSERVATIONAL TECHNIQUES IN EARLY CHILDHOOD EDUCATION.

Observation of early childhood educational programs of various kinds serving disadvantaged as well as middle-class children. Four laboratory hours per week during the first four weeks of the first semester. Credit, 1.

### 591. EARLY CHILDHOOD EDUCATION MOVEMENT.

Contemporary purposes, programs, and problems of early childhood education, from an historical and philosophical perspective. A one-semester graduate seminar. Meets state requirements for Teacher Certification.

### 592. SEMINAR IN CURRICULUM DEVELOPMENT FOR EARLY CHILDHOOD EDUCATION.

Curriculum components for children in early-education programs designed to follow each field-teaching experience. Limited to students specializing in early childhood education.

## UNIVERSITY OF MASSACHUSETTS

## EDUCATION

### 593. (1), 594. (11). LABORATORY COURSE ON USING HUMAN DEVELOPMENT KNOWLEDGE IN EDUCATION

A year-long laboratory course paralleling both field-teaching experiences for students concentrating on early childhood education. Factors such as sex, environment, social status, and culture examined in terms of their relation to growth rates and patterns. Data taken from the community in which each teaching experience takes place.

### 595. ADVANCED SEMINAR IN LANGUAGE DEVELOPMENT IN EARLY CHILDHOOD EDUCATION.

The relationship between language and thought. Emphasis on contemporary language development programs in early childhood education. Includes an analysis of linguistics.

### 598. THE INDIVIDUAL AND THE ORGANIZATION OF HIGHER EDUCATION.

Analysis of the effects of institutional and organizational structure and values on individual development.

### 599. ALTERNATIVE STRUCTURES IN HIGHER EDUCATION.

Review and analysis of organizational structures of institutions of higher education; design of alternative models for governance and learning. *Credit, 4*

### 619. EDUCATION AND PUBLIC POLICY.

Selected issues and problems concerning the interaction between education and politics at the local, state, and national levels.

### 663. EDUCATION IN ASIA.

The relationship between education and society in the major nations of the Far East. The process of change in educational thought and institutions; the conflict between tradition and contemporary forces.

### 665. EDUCATION IN LATIN AMERICA.

The developmental history of the educational structures and systems of Latin America. Emphasis on the effectiveness of the various educational models. Analysis based on related case studies.

### 666. EDUCATION AND DEVELOPMENT

The relationship between the development of national and regional areas and education. Systems analysis introduced; areas for potential research projects identified.

### 668. EDUCATIONAL PATTERNS AROUND THE WORLD.

The processes and problems of educational development in selected areas throughout the world and the interrelationship between education and culture. Emphasis on cultural forces of education.

### 669. PRACTICUM IN INTERNATIONAL EDUCATION.

Supervised practical experience in various areas of international education. *Credit, 1-6.*

### 687. SPECIAL PROBLEMS IN INTERNATIONAL EDUCATION.

Independent work on special problems or in certain areas of International Education. *Credit, 1-6.*

### Human Development (Hum Dev)

### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

### 700. SPECIAL PROBLEMS IN HUMAN DEVELOPMENT

Individual study of a selected problem for qualified students. By arrangement with members of the department. *Credit, 3-6.*

### 710. SEMINAR.

Readings, reports and discussions on the current literature in the area of Human Development. *Credit, 1-3.*

### 800. MASTER'S THESIS.

Individual research.

*Credit, 6-10.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

### 570. CHILD DEVELOPMENT.

The child from the developmental point of view. Emphasis on interaction of heredity and environment on development. Prerequisites, Soc 101, Psych 101, or permission of instructor

### 572. DIRECTED LABORATORY SCHOOL OBSERVATION

Directed experience in observation techniques with laboratory school children.

Prerequisite, HUM DEV 570 or equivalent.

### 600. HUMAN DEVELOPMENT IN INFANCY.

Development of the infant from birth to age two.

Prerequisite, HUM DEV 570 or permission of instructor.

### 610. LANGUAGE AND COGNITIVE DEVELOPMENT

Language and cognition from the developmental point of view. Emphasis on the relationship between language and thought and changes in that relationship in the course of cognitive growth.

Prerequisite, HUM DEV 570 or equivalent.

### 650. RESEARCH METHODS IN HUMAN DEVELOPMENT.

Methods and techniques for studying developmental processes at various stages of the life span, from infancy to old age. Prerequisite, HUM DEV 570 or equivalent, or concurrently with HUM DEV 570.

### 660. THEORIES OF HUMAN DEVELOPMENT.

The major theories of human development. Emphasis on psychological theories and concepts. The relevance and relationship of biological, social and anthropological concepts.

Prerequisite, HUM DEV 570 or equivalent.

### 670. HUMAN DEVELOPMENT IN ADOLESCENCE AND YOUNG ADULTHOOD

Human development during the second decade of life. Emphasis on biological, psychological, and sociological aspects. Theories of adolescent development.

Prerequisite, HUM DEV 570 or equivalent, or permission of instructor. Human Development majors only.

### 675. THE GHETTO FAMILY.

Family relationships and styles of life of lower socio-economic status families. Emphasizes social and psychological factors that influence interpersonal relationships and life strategies among the poor.

Prerequisite, HD 270/570 or permission of instructor.

### 676. ALTERNATE FAMILY STYLES.

Comparative evaluation of the traditional nuclear monogamous family and alternative family structures developed in this society.

### 680. HUMAN DEVELOPMENT IN ADULTHOOD.

Human development from young adulthood through old age. A social psychological perspective of change across the adult life span.

Prerequisite, HUM DEV 270 or equivalent, or permission of instructor.

### 681. LABORATORY SCHOOL MANAGEMENT.

Principles and methods of early childhood education. Includes teaching methods and curriculum planning for two- to five-year-old children.

Prerequisites, HUM DEV 570 or equivalent.

### 682. PHILOSOPHY AND THEORIES OF EARLY CHILDHOOD EDUCATION.

Philosophy, theories, and history of early childhood education. Field trips.

Prerequisite, HUM DEV 681 or permission of instructor.

## ELECTRICAL AND COMPUTER ENGINEERING

### 683. STUDENT TEACHING IN THE LABORATORY SCHOOL.

Students plan, direct, and teach curriculum in the laboratory school under staff supervision.  
Prerequisite, HUM DEV 570 or permission of instructor.

684. INTERNSHIP IN A CHILD-SERVING PROFESSION.  
Teaching or work with normal or exceptional children, Head-start children, or the emotionally disturbed.  
Prerequisite, HUM DEV 570 or permission of instructor.

### GENERAL LISTINGS

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

700. SPECIAL PROBLEMS IN EDUCATION.  
A critical study of some problem in the educational field.  
*Credit, 1-4.*

702. INDEPENDENT STUDY. *Credit, 1-12.*

705. SEMINAR IN EDUCATION.  
An intensive analytical study of some phase of education.  
*Credit, 3-12.*

715. WORKSHOP IN EDUCATION.  
Group study of practical problems in curriculum, instruction, and administration for school personnel in service.  
*Credit, 2-6.*

900. DOCTORAL DISSERTATION. *Credit, 18.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

553. EDUCATIONAL TESTS AND MEASUREMENTS.  
The most serviceable tests for measuring achievement. Test construction, administration, scoring, and interpretation of results studied and applied to the classroom.

582. PRE-PRACTICUM IN EDUCATION.  
Practicum experience in teaching prior to Student Teaching. Includes such experiences as microteaching, "strength training," and tutoring. Required for students seeking Teacher Certification.

585. STUDENT TEACHING.  
A 16-week field experience under the tutelage of a cooperating teacher and University supervisor in an approved school system. No graduate credit given for students majoring in Education except for M.A.T. candidates.  
Prerequisite, Educ 582. *Credit, 3-12.*

616. AMERICAN SECONDARY EDUCATION.  
Learning materials and activities and their organization in various teaching fields.  
Prerequisite, an elective in Foundations of Education and Psych 793. *Credit, 2.*

685. PRACTICUM IN EDUCATION.  
Each semester a group of experimental courses will be offered dealing with practical experiences in some phases of education. *Credit, 1-6.*

686. SPECIAL PROBLEMS IN EDUCATION.  
A group of experimental courses offered each semester.

## Electrical and Computer Engineering

### GRADUATE FACULTY

LEWIS E. FRANKS, *Professor and Chairman of the Department of Electrical and Computer Engineering,*

## GRADUATE SCHOOL

B.S., Oregon State, 1952; M.S., Stanford, 1953; Ph.D., 1957.

JACK K. WOLF, *Professor and Graduate Program Director*, B.S., University of Pennsylvania, 1956; M.S., Princeton, 1957; M.A., 1958; Ph.D., 1960.

LEONARD S. BOBROW, *Associate Professor*, B.S., University of Miami, 1962; M.S., Northwestern University, 1964; Ph.D., 1968.

ROGER W. EHRLICH, *Associate Professor*, B.S., University of Rochester, 1965; M.S., Northwestern, 1967; Ph.D., 1969.

HERBERT A. HERCHENREDER, *Assistant Professor*, B.S., University of Missouri, 1951; M.S., Connecticut, 1957.

FRANCIS S. HILL, JR., *Associate Professor*, B.E., Yale, 1962; M.E., 1964; Ph.D., 1968.

CHARLES E. HUTCHINSON, *Professor*, B.S., Illinois Institute of Technology, 1957; M.S., Stanford, 1961; Ph.D., 1963.

WALTER H. KOHLER, *Assistant Professor*, B.S., Princeton, 1967; M.S., 1968; Ph.D., 1972.

ROBERT E. MCINTOSH, *Professor*, B.S., Worcester Polytechnic Institute, 1962; M.S., Harvard, 1963; Ph.D., University of Iowa, 1967.

JOHN W. MOHN, *Associate Professor*, M.E., Stevens Institute of Technology, 1941; B.S., Worcester Polytechnic Institute, 1947; M.S., Stanford, 1952.

RICHARD V. MONOPOLI, *Professor*, B.S., U.S. Naval Academy, 1952; M.S., Brown, 1960; Ph.D., Connecticut, 1965.

DAVID H. NAVON, *Professor*, B.E.E., City College of New York, 1947; M.S., New York University, 1950; Ph.D., Purdue, 1953.

DONALD E. SCOTT, *Associate Professor*, B.S., Connecticut, 1957; M.S., 1959; Ph.D., Worcester Polytechnic Institute, 1968.

G. DALE SHECKELS, *Professor*, B.S., University of Washington, 1938; M.S., Massachusetts Institute of Technology, 1940; Ph.D., Iowa State, 1955.

HAROLD S. STONE, *Professor*, B.S.E., Princeton, 1960; M.S., University of California, 1961; Ph.D., 1963.

TING-WEI TANG, *Professor*, B.S., National Taiwan University, 1957; M.S. Brown, 1961; Ph.D., 1964.

DONALD F. TOWSLEY, *Assistant Professor*, B.A. Texas, 1971; Ph.D., 1975.

SIGFRID YNGVESSON, *Associate Professor*, Teknologie Licentiat, Chalmers Institute of Technology, Sweden, 1964; Teknologie Doktor, 1968.

### ADJUNCT FACULTY

RONALD L. FANTE, B.S., University of Pennsylvania, 1958; M.S., Massachusetts Institute of Technology, 1960; Ph.D., Princeton, 1963.

OLAF E.H. RYDBECK M.S., Royal Institute of Technology, Stockholm, 1936; D.Sc., Harvard, 1940.

LESTER C. VAN ATTA, B.S., Reed College, 1927; Ph.D., Washington University, 1931.

## UNIVERSITY OF MASSACHUSETTS

### AFFILIATED FACULTY

MICHAEL A. ARBIB, *Professor of Computer and Information Science.*

CAXTON C. FOSTER, *Professor of Computer and Information Science.*

ROBERT M. GRAHAM, *Professor of Computer and Information Science.*

HENRY F. LEDGARD, *Associate Professor of Computer and Information Science.*

EDWARD M. RISEMAN, *Associate Professor of Computer and Information Science.*

CONRAD A. WOGGIN, *Professor of Computer and Information Science.*

### THE DOCTOR OF PHILOSOPHY DEGREE PROGRAM

There is no formal course requirement for the Ph.D. degree. Typical programs include approximately 24 credits of course work beyond the course requirements for the M.S. degree. Residency, dissertation, and examination requirements are described in the General Information Section of this *Bulletin*. A brochure containing detailed information on requirements for the Ph.D. degree in Electrical and Computer Engineering is available from the Departmental Graduate Committee.

### THE MASTER OF SCIENCE DEGREE PROGRAM

A student entering the M.S. degree program in Electrical and Computer Engineering is assigned to a faculty member who acts as his/her program adviser. With the approval of the program adviser, the student selects a unified program consisting of 33 or more graduate credits, normally from courses chosen from the fields of engineering, mathematics, physics and computer science. The student also has the option of selecting a program which involves the preparation of a thesis (ECE 800, 6 credits) with only 24 additional course credits required. In this case, the student selects a major thesis adviser, usually after one semester of study, and in consultation with the thesis adviser, submits a proposal for thesis research to the Departmental Graduate Committee.

A brochure containing detailed information on the requirements for the M.S. degree in Electrical and Computer Engineering is available from the Departmental Graduate Committee.

### RESEARCH IN ELECTRICAL AND COMPUTER ENGINEERING

The Electrical and Computer Engineering Department is conducting active research and has supporting academic programs in the following areas:

1. Computer Systems Engineering.
2. Communications and Signal Processing.
3. Systems and Control Theory.
4. Man-Machine Systems.
5. Solid State Devices and Microelectronics.
6. Electrodynamics and Plasma Physics.
7. Ocean Engineering.
8. Masers and Lasers.
9. Radio Astronomy and Antenna Systems.

## ELECTRICAL AND COMPUTER ENGINEERING

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 700. SPECIAL PROBLEMS.

Recent advances and current problems in a specialized field of electrical engineering.  
Prerequisite, permission of instructor.

##### 702. ALGEBRA AND CODING

An introduction to modern algebra including groups, rings, fields and ideals. Group codes, cyclic codes including random and burst error correcting codes. Applications.

Mr. Bobrow, Mr. Wolf.

##### 703. PROBABILITY AND RANDOM PROCESSES.

Elementary probability theory including random variables, p.d.f., c.d.f., generating functions, law of large numbers. Elementary stochastic process theory including covariance and power spectral density. Applications to information theory.

Mr. Bobrow, Mr. Wolf.

##### 704. STATE VARIABLE ANALYSIS.

Matrix analysis, state variables and state space techniques. Concepts of controllability and observability. Stability analysis via Liapunov's and Popov's method, phase plane and describing function.

Mr. Hutchinson, Mr. Monopoli.

##### 705. ANALYSIS OF LINEAR SYSTEMS.

Complex variables, modern systems analysis basic to network synthesis, control systems, and communication systems; including Laplace, Fourier, and  $z$  transforms and convolution.

Mr. McIntosh, Mr. Tang.

##### 706. ELECTROMAGNETIC FIELD THEORY

Microscopic and macroscopic properties of magnetic and insulating materials; gyromagnetism and the permeability tensor; reflection and refraction, skin effect; antenna analysis; relativistic electrodynamics.

Prerequisite, ECE 257 or equivalent.

Mr. McIntosh, Mr. Tang.

##### 707. MODERN SOLID-STATE ENGINEERING

Fundamental quantum mechanical principles, a basis for advanced courses in semiconductor electronics, microwave magnetics, quantum electronics, etc. Solutions of Schrodinger's equation pertinent for electrical engineers.

Prerequisite, ECE 201 or equivalent

Mr. Navon, Mr. Yngvesson.

##### 708. SIGNAL THEORY I

Unified treatment of techniques for representation of signals and signal processing operations. Emphasis on physical interpretation of vector spaces, linear operators, transform theory, and optimal design of signals.

Mr. Franks, Mr. Hill.

##### 711. ADVANCED MICROWAVE ENGINEERING.

Analysis of waveguides, gyrators, antennas, and other microwave circuit elements; electron ballistics; ionospheric reflection; and refraction, and the permittivity tensor; microwave generators; masers and lasers.

Prerequisites, ECE 294 and 706 or equivalent.

Mr. McIntosh, Mr. Yngvesson.

##### 712. INTRODUCTION TO PLASMA DYNAMICS.

Fundamentals of plasma physics: motion of a charged particle in electromagnetic fields, magnetoionic theory, the Boltzmann and Vlasov equations for plasmas, and wave propagation through a plasma medium.

Prerequisite, ECE 706.

Mr. McIntosh, Mr. Tang.

##### 713. ADVANCED PLASMA DYNAMICS.

Review of classical kinetic theory. The BBGKY hierarchy and other kinetic equations for plasmas. Applications to waves in cold and hot plasmas, plasma radiations and instabilities.

Prerequisite, ECE 712.

Mr. McIntosh, Mr. Tang.

## ELECTRICAL AND COMPUTER ENGINEERING

## GRADUATE SCHOOL

## 721. MODERN ENGINEERING MAGNETICS.

Paramagnetism, ferro- and ferrimagnetism, magnetic domains, Ising model, spin waves, ferromagnetic resonance, ferrite devices, microwave ultrasonics in magnetic materials. Prerequisite, ECE 707. Mr. McIntosh, Mr. Yngvesson.

## 722. PHYSICAL SEMICONDUCTOR ELECTRONICS.

Crystallography of solids, band theory of solids, quantum theory of electrons in a periodic lattice, dynamics of lattice vibrations, semiconductors — equilibrium and transient behavior, modern quantum electronic devices. Prerequisite, ECE 707. Mr. Navon.

## 723. PRINCIPLES OF MASERS AND LASERS.

Quantum-mechanical description of typical maser and laser materials, fundamentals of maser amplification, analysis of maser and laser devices, review of applications. Prerequisite, ECE 707. Mr. Yngvesson.

## 725. ENERGY STORAGE AND PROCESSING (OE 721).

Methods of energy generation, conversion, and control, with emphasis on the utilization for deep-sea submersible vehicles. Mr. Monopoli, Mr. Navon, Mr. Sheckels.

## 733. DIGITAL CONTROL SYSTEMS.

Pulse transfer functions and state transition analysis applied to discrete-data systems. Nonconventional sampling. Non-linear sampled data systems. Dynamic programming and computer control. Prerequisite, ECE 704. Mr. Monopoli, Mr. Hutchinson.

## 734. OPTIMUM CONTROL SYSTEMS.

Analytical design of optimum linear systems. Calculus of variations. Pontryagin's Maximum Principle, and applications to design of optimum systems. Minimum mean square estimation and control. Prerequisite, ECE 704. Mr. Hutchinson, Mr. Monopoli.

## 735. ADAPTIVE CONTROL.

The problem of system identification, performance criteria and decision-making, and the implementation of adaptive techniques. Application of adaptive techniques to aircraft flight control. Prerequisite, ECE 733, 734. Mr. Hutchinson, Mr. Monopoli.

## 736. DYNAMICS AND CONTROL OF MARINE VEHICLES (OE 752).

The equations of motion for a marine vehicle; the stability and dynamics for control. Mr. Hutchinson.

## 741. SIGNAL THEORY II.

Signal Space methods applied to random processes, giving the modern interpretation of optimum filtering, signal parameter estimation, and signal detection. Many examples of practical applications. Mr. Franks, Mr. Hill.

## 743. NAVIGATION (OE 751).

A survey of the principles of navigation. Emphasis on the information-processing involved and error analysis. Mr. Hutchinson.

## 745. INFORMATION TRANSMISSION SYSTEMS.

Practical topics in the design of data transmission systems. Modulation, coding, and multiplexing formats. Fixed and adaptive channel equalization. System performance evaluation. Prerequisite, ECE 703, or equivalent. Mr. Franks, Mr. Hill, Mr. Wolf.

## 746. STATISTICAL COMMUNICATION THEORY.

Basic theories of signal parameter estimation and signal detection. Bayes and maximum likelihood decision and estimation rules. Wiener and Kalman filters for continuous waveform estimation. Prerequisite, ECE 703 or equivalent. Mr. Franks, Mr. Hill, Mr. Wolf.

## 748. NETWORK SYNTHESIS.

A survey of practical methods for design of filter networks

Passive LC and active RC design techniques. Distributed-element filters. Variable-parameter filters. Digital filters. Prerequisite, ECE 204 or equivalent. Mr. Franks.

## 750. GRAPH THEORY AND ITS APPLICATIONS.

Fundamental concepts of graph theory including circuits, cut-sets, paths, and duality. Application to network analysis and synthesis, switching theory, variable-length and error-correcting codes, and communication networks. Mr. Bobrow.

## 751. SWITCHING AND AUTOMATA THEORY.

Homing and diagnosis of sequential machines, fault detection and diagnosis of combinatorial and sequential networks. State assignment in sequential machines, linear sequential machines, universal modules, and related decision problems. Prerequisites, ECE 510, CS 570, or equivalent. Mr. Ehrlich.

## ECE 752. OPTIMIZATION THEORY AND PRACTICE.

Mathematical formulation and techniques of optimization; constrained extremization of functions of several variables; geometric and linear programming; calculus of variations; dynamic programming; search techniques; game theory. Mr. Hill.

## 762. INTRODUCTION TO SPEECH ANALYSIS.

The acoustics of speech production and the engineering analysis techniques employed in speech processing. Mr. Thomas.

## 763. ADVANCED SPEECH PROCESSING.

Advanced studies of speech-processing techniques with emphasis on current literature in speech analysis, transmission, synthesis, and recognition by machine. Prerequisite, ECE 762. Mr. Thomas.

## 764. UNDERWATER ACOUSTICS (OE 701).

The principles, effects, and phenomena of underwater sound and its application to practical problems. Prerequisite, ECE 306, 606. Mr. Hutchinson, Mr. Thomas, Mr. Russell.

## 785. SELECTED TOPICS IN CONTROL SYSTEMS.

Topics selected from the current literature. An investigation in depth of problems relating to particular aspects of automatic control theory. Credit, 1-3.

## 786. SELECTED TOPICS IN COMMUNICATIONS.

Topics for various aspects of present interest in the field of communications with emphasis on concurrent reading of the literature. Credit, 1-3.

## 787. SELECTED TOPICS IN COMPUTER ENGINEERING.

Topics of current interest in computers, automata, and related areas. Specific topics selected from the literature. Credit, 1-3.

## 793, 794. SEMINAR IN ELECTRICAL ENGINEERING.

Presentations of current research activities and literature by faculty and graduate students. Credit, 1 each semester.

## 800. MASTER'S THESIS.

An individual theoretical and/or experimental investigation or a design problem terminating with an acceptable thesis. The research proposal is to be approved at least five months before graduation.

## 900. DOCTORAL DISSERTATION.

Credit, 18.

COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS  
(For either major or minor credit).

## 510. DIGITAL CIRCUIT THEORY.

An introduction to the theory of digital circuits stressing general techniques for the analysis and synthesis of combinational and sequential logic systems. Prerequisite, junior standing.

## UNIVERSITY OF MASSACHUSETTS

### 565. RANDOM SIGNAL THEORY.

Introduction to probability and stochastic processes. Correlation theory and its application to electrical engineering problems in communication and control systems.

Prerequisite, ECE 142.

Mr. Franks, Mr. Hutchinson, Mr. Scott.

### 566. SIGNAL PROCESSING AND COMMUNICATION SYSTEMS I.

Principles of design of modern communication systems. Mathematical description of digital and analog signals. Basic limitations of modulation techniques and information capacity of transmission systems.

Prerequisites, ECE 202, 204.

Mr. Franks, Mr. Hill.

### 567. SIGNAL PROCESSING AND COMMUNICATION SYSTEMS II.

Techniques for evaluating performance of modulation and information transmission systems. Extraction of signals from noise. Minimum error signal estimation and detection.

Prerequisites, ECE 266, 265 or permission of instructor.

Mr. Franks, Mr. Hill

### 570. SOLID STATE DEVICES.

Power rectifiers, power transistors, high frequency, high power transistors, thyristors, power circuits: regulators, inverters, converters and cyclo-converting, phase-control circuits, motor control circuits.

Prerequisites, ECE 201, 202. Mr. Navon, Mr. Yngvesson.

### 571. MICROELECTRONICS.

Principles and applications of microelectronics with particular emphasis on silicon monolithic integrated circuits. Fundamental limitations of microminiaturization, design constraints imposed by the monolithic technique, planar technology, digital and linear microcircuits.

Prerequisite, ECE 201.

Mr. Navon

### 578. DIGITAL SYSTEM DESIGN

A design-oriented approach to the structure and design of general purpose digital computers.

Prerequisite, ECE 210; Recommended, COINS 201.

Mr. Edwards, Mr. Ehrich, Mr. Glorioso.

### 587. MARINE INSTRUMENTATION.

A survey of the oceanographic parameters of interest to ocean engineers; the theory of measurement for those parameters. Typical examples of existing measuring equipment.

Mr. Hutchinson.

### 592. FEEDBACK CONTROL SYSTEMS I

Time domain and frequency domain analysis and synthesis techniques for linear continuous control systems. The relationships between these techniques.

Prerequisites, ECE 142 or permission of instructor.

Mr. Hutchinson, Mr. Monopoli, Mr. Scott.

### 593. FEEDBACK CONTROL SYSTEMS II.

The analysis of nonlinear continuous control systems and an introduction to digital control systems and optimization techniques.

Prerequisite, ECE 290.

Mr. Hutchinson, Mr. Monopoli, Mr. Scott.

### 594. MICROWAVE ENGINEERING I.

Electromagnetic theory applied to microwave propagation in waveguides and coaxial lines. Microwave circuit theory with applications to passive microwave networks.

Prerequisite, ECE 258.

Mr. McIntosh, Mr. Tang, Mr. Yngvesson.

### 595. MICROWAVE ENGINEERING II.

Continuation of ECE 594, selected topics in the areas of solid state devices, wave propagation, antennas, and plasmas.

Prerequisite, ECE 594.

Mr. McIntosh, Mr. Tang, Mr. Yngvesson.

### 598. BIOMEDICAL ENGINEERING I.

Techniques and concepts from control and communication

## ELECTRICAL AND COMPUTER ENGINEERING

theory useful in biological, medical, and psychophysical research.

Prerequisite, permission of instructor

Mr. Scott.

### 599. BIOMEDICAL ENGINEERING II.

Engineering analysis of the visual, position-motion sensing, taste and smell biological communication channels; human tracking capabilities, analog and hybrid modeling.

Prerequisite, ECE 598.

Mr. Scott.

### 606. ACOUSTICS.

The fundamentals of sound generation, propagation, and detection. Application of theory to underwater sound and human speech.

Mr. Thomas.

### 611. APPLIED NONLINEAR ANALYSIS.

The analysis of nonlinear mechanical and electrical systems. Numerical, graphical, and analytical methods used to determine the behavior of modern nonlinear devices.

Prerequisite, Math 174.

Mr. McIntosh.

### 642. NON-NUMERICAL PROCESSING

Introduction to basic mathematical and logical concepts relevant to description and manipulation of information structures such as lists, trees, and graphs.

Prerequisite, COINS 233.

Mr. Glorioso, Mr. Kohler.

### 644. PROGRAMMING STRUCTURES.

Introduction to basic structures of algorithms and programming languages. Convergence of algorithms. Introduction to logic and programming languages for description and implementation of algorithms.

Prerequisite, COINS 201.

Mr. Ehrich, Mr. Kohler

### 654. COMPUTER SYSTEMS LABORATORY III

Project laboratory in advanced computer systems engineering including designs of integrated hardware/software systems and studies of current computer techniques.

Nine laboratory hours.

Prerequisite, permission of instructor.

Staff.

### 656. INTRODUCTION TO AUTOMATA THEORY

An introduction to formal processes of computation. Computability, automata, algorithms, recursive functions. Formal systems, computing power of machines, and automata as examples of formal systems.

Prerequisite, permission of instructor

Mr. Ehrich, Mr. Kohler.

### 660. COMPUTER GRAPHICS.

Basic organization of computer-driven graphical display systems. Methods for generation and manipulation of vectors and characters for real-time display. Data structures for picture and text processing.

Prerequisites, COINS 233, ECE 642.

Mr. Ehrich, Mr. Glorioso.

### 662. SELF-ORGANIZING SYSTEMS AND PATTERN RECOGNITION.

Several aspects of self-organizing systems and pattern recognition including machine intelligence, adaptation, learning, and self-repair.

Mr. Glorioso.

### 666. ANALOG AND HYBRID COMPUTERS.

Designed for computer science or engineering students interested in the hybrid computer as a computational tool. Review of analog and digital computers and their combination.

Prerequisite, permission of instructor

Mr. Hutchinson, Mr. Monopoli.

### 668. ADVANCED SWITCHING THEORY.

Topics of contemporary interest in digital switching theory and logical design. State-of-the-art techniques in computer hardware design.

Prerequisite, ECE 510.

Mr. Stone.

## ENGLISH

### English

#### GRADUATE FACULTY

DAVID R. CLARK, *Professor and Head of the Department of English*, B.A., Wesleyan University, 1947; M.A., Yale, 1950; Ph.D., 1955.

RICHARD NOLAND, *Professor and Graduate Program Director*, B.A., Emory, 1954; M.D., 1958; M.A., Columbia, 1961; Ph.D., 1968.

TAMAS ACZEL, *Professor*, B.A., University of Budapest, 1948; M.A., 1950.

GARY L. AHO, *Associate Professor*, B.A., Portland State College, 1959; Ph.D., University of Oregon, 1966.

JEREMIAH ALLEN, *Professor and Dean of Humanities and Fine Arts*, B.A., Duke, 1947; M.A., Tufts, 1948; Ph.D., Colorado, 1956.

THOMAS L. ASHTON, *Associate Professor*, B.A., City College of New York, 1963; M.A., Columbia, 1964; Ph.D., 1969.

ROBERT E. BAGG, *Professor*, B.A., Amherst, 1957; M.A., Connecticut, 1961; Ph.D., 1965.

LEON BARRON, *Associate Professor*, B.A., Massachusetts, 1947; M.A., Minnesota, 1947; Ph.D., Harvard, 1960.

NANCY LEE BEATY, *Associate Professor*, B.A., Wellesley, 1943; M.A., Yale, 1947; Ph.D., 1956.

BERNARD BELL, *Associate Professor*, B.A., Howard University, 1962; M.A., 1966; Ph.D., Massachusetts, 1970.

NORMAND BERLIN, *Professor*, B.A., New York University, 1953; M.A., Columbia, 1956; Ph.D., California at Berkeley, 1964.

HOWARD O. BROGAN, *Commonwealth Professor*, B.A., Grinnell College, 1936; M.A., State University of Iowa, 1938; Ph.D., Yale, 1941.

GEORGE CAREY, *Associate Professor*, B.A., Middlebury, 1958; M.A., Indiana, 1962; Ph.D., 1966.

JULES CHAMETZKY, *Professor*, B.A., Brooklyn College, 1950; M.A., Minnesota, 1952; Ph.D., 1958.

DONALD S. CHENEY, *Professor*, B.A., Yale, 1954; M.A., 1957; Ph.D., 1961.

JOHN CLAYTON, *Associate Professor*, B.A., Columbia College, 1956; M.A., New York University, 1959; Ph.D., Indiana, 1966.

DAN S. COLLINS, *Associate Professor*, B.A., Pennsylvania, 1941; M.A., University of North Carolina, 1951; Ph.D., 1962.

ROBERT P. CREED, *Professor*, B.A., Swarthmore College, 1948; M.A., Harvard, 1949; Ph.D., 1956.

MARGARET CULLEY, *Assistant Professor*, B.A., Manhattanville College, 1964; M.A., Rutgers University, 1965; Ph.D., University of Michigan, 1972.

GEORGE CUOMO, *Professor*, B.A., Tufts, 1952; M.A., Indiana, 1954.

## GRADUATE SCHOOL

ARLYN DIAMOND, *Associate Professor*, B.A., California, 1961; Columbia, 1962; Ph.D., California at Berkeley, 1970.

VINCENT DIMARCO, *Associate Professor*, B.A., New York at Buffalo, 1966; M.A., Pennsylvania, 1967; Ph.D., 1972.

JOSEPH W. DONOHUE, JR., *Professor*, B.A., Johns Hopkins, 1956; M.A., Georgetown, 1961; Ph.D., Princeton, 1965.

AUDREY R. DUCKERT, *Professor*, B.A., Wisconsin, 1948; M.A., 1949; Ph.D., Radcliffe College, 1959.

LEE R. EDWARDS, *Associate Professor*, B.A., Swarthmore, 1962; M.A., California at Berkeley, 1965; Ph.D., 1969.

MICHAEL EGAN, *Associate Professor*, B.A., Witwatersrand University, 1963; M.A. Fitzwilliam College, 1965; Ph.D., 1968.

CHARLES EIOSVIK, *Assistant Professor*, B.A., University of South Dakota, 1965; M.A., 1966; Ph.D., University of Illinois, 1970.

EVERETT H. EMERSON, *Professor*, B.A., Harvard, 1948; M.A., Duke, 1949; Ph.D., Louisiana State, 1955.

KIRBY FARRELL, *Associate Professor*, B.A., Clark, 1964; M.A., Rutgers, 1968; Ph.D., 1972.

ANDREW FETLER, *Associate Professor*, B.S., Loyola, 1959; M.F.A., State University of Iowa, 1964.

JOSEPH FRANK, *Professor*, B.A., Harvard, 1939; M.A., 1947; Ph.D., 1953.

JAMES A. FREEMAN, *Associate Professor*, B.A., Amherst, 1956; Ph.D., Minnesota, 1968.

ROBERTS W. FRENCH, *Associate Professor*, B.A., Dartmouth, M.A., Yale, 1959; Ph.D., Brown, 1964.

ERNEST GALLO, *Professor*, B.A., St. John's, 1954; M.A., New York, 1957; Ph.D., 1965.

WALKER GIBSON, *Professor*, B.A., Yale, 1940; M.A., University of Iowa, 1946.

MORRIS GOLDEN, *Professor*, B.A., City College of New York, 1948; M.A., New York University, 1949; Ph.D., 1953.

RAYMOND GOZZI, *Associate Professor*, B.A., Amherst College, 1942; M.A., Columbia, 1947; Ph.D., New York University, 1957.

RICHARD HAVEN, *Professor*, B.A., Harvard, 1948; M.A., Princeton, 1952; Ph.D., 1958.

JOHN H. HICKS, *Professor*, B.A., Middlebury, 1941; M.A., Boston University, 1952; Ph.D., 1961.

PRISCILLA G. HICKS, *Assistant Professor*, B.A., Wellesley, 1948; M.A., University of Michigan, 1949; Ph.D., Boston University, 1960.

ERNEST H. HOFER, *Professor*, B.A., Brown, 1945; M.A., 1947; Ph.D., Cornell, 1959.

FLORIANA T. HOGAN, *Associate Professor*, B.S., Boston University, 1940; M.A., 1941; Ph.D., 1955.

ROBERT HOOPES, *Professor*, A.B., Cornell, 1941; A.M., Boston University, 1942; M.A., Harvard, 1948; Ph.D., 1949.

## UNIVERSITY OF MASSACHUSETTS

JOHN H. MITCHELL, *Professor*, B.S., Bowdoin, 1943; M.A., Harvard, 1947.

CHARLES MORAN, *Associate Professor*, A.B., Princeton, 1958; A.M., Brown, 1962; Ph.D., 1967.

ARTHUR B. MUSGRAVE, *Professor and Director of Fellowship Program for Journalists*, B.S., Boston University, 1951; M.S., 1951; Ph.D., Minnesota, 1961.

JOHN R. NELSON, JR., *Associate Professor*, B.A., Hamilton College, 1959; M.A., Maine, 1962; Ph.D., Oregon, 1967.

JAN NEUGEBOREN, *Associate Professor and Resident Writer*, B.A., Columbia, 1959; M.A., Indiana, 1963.

WILLIAM G. O'DONNELL, *Professor*, B.S., Massachusetts, 1938; M.A., Yale, 1940; Ph.D., 1942.

ALEX PAGE, *Professor*, B.A., Vermont, 1948; M.A., Harvard, 1949; Ph.D., 1953.

DAVID PAROISSIEN, *Associate Professor*, B.A., University of Hull, England, 1961; M.A., New Mexico Highlands University, 1965; Ph.D., California at Los Angeles, 1968.

LAWRENCE PINKHAM, *Associate Professor*, B.A., Maine, 1950; M.S., Columbia, 1951.

ARTHUR W. PLUMSTEAD, *Professor*, B.A., Western Ontario, 1955; M.A., Rochester, 1957; Ph.D., 1965.

DARIO POLITELLA, *Associate Professor*, B.A., Massachusetts, 1947; M.A., Syracuse, 1949; Ph.D., 1965.

DAVID T. PORTER, *Professor*, B.A., Hamilton, 1950; Ph.D., Rochester, 1963.

JONATHAN QUICK, *Assistant Professor*, B.A., Rutgers, 1963; M.A., Yale, 1966; Ph.D., 1968.

MEREDITH B. RAYMOND, *Associate Professor*, B.S., Bridgewater State, 1939; M.A., Middlebury, 1943; Ph.D., Boston University, 1964.

FREDERICK ROBINSON, *Assistant Professor*, B.A., University of Redlands, 1964; M.A., University of Washington, 1966; Ph.D., 1972.

SEYMOUR RUDIN, *Professor*, B.A., City College of New York, 1941; M.S., 1943; Ph.D., Cornell, 1953.

PAUL F. SAAGPAKK, *Professor*, Ph.D., Columbia, 1966.

JACK SHADOIAN, *Associate Professor*, B.A., City College of New York, 1963; M.A., Connecticut, 1965, Ph.D., 1967.

JAMES SHAW, *Lecturer and Associate Dean of the College of Arts and Sciences*, B.A., Otterbein, 1954; M.A., University of Michigan, 1957; Ph.D., 1966.

ARNOLD J. SILVER, *Associate Professor*, B.A., New York University, 1947; M.A., Columbia, 1948; Ph.D., 1958.

JOHN E. SITTER, *Associate Professor*, B.A., Harvard, 1966, Ph.D., Minnesota, 1969.

CHARLES KAY SMITH, *Assistant Professor*, B.A., Amherst, 1957.

BERNARD SPIVACK, *Professor*, B.A., Alabama, 1931; M.A., Harvard, 1932; Ph.D., Columbia, 1950.

CHARLOITE K. SPIVACK, *Professor*, B.A., New York at Albany, 1947; M.A., Cornell, 1948; Ph.D., University of Missouri, 1954.

KATHLEEN M. SWAIM, *Professor*, B.A., Gettysburg College; M.A., Penn State, 1955, M.A., Middlebury, 1963, Ph.D., Pennsylvania, 1966.

JAMES TATE, *Assistant Professor*, B.A., Kansas State College of Pittsburg, 1965; M.F.A., Iowa, 1967.

ROBERT G. TUCKER, *Associate Professor*, B.A., Amherst, 1949; M.A., Harvard, 1951; Ph.D., State University of Iowa, 1961.

## ENGLISH

FREDERICK W. TURNER, III, *Associate Professor*, B.A., Denison, 1959; M.A., Ohio, 1961; Ph.D., Pennsylvania, 1965.

JOHN C. WESTON, JR., *Professor*, M.A., Chicago, 1950; Ph.D., North Carolina, 1956.

CYNTHIA WOLFF, *Professor*, B.A., Radcliffe, 1958; Ph.D., Harvard, 1965.

MICHAEL WOLFF, *Professor*, B.A., Cambridge, 1948; M.A., St. John's, 1955; Ph.D., Princeton, 1958.

HOWARD ZIFF, *Associate Professor*, B.A., Amherst, 1952; Advanced Fellow Certificate, Columbia, 1964.

## MASTER OF FINE ARTS IN ENGLISH

This degree, based upon a two- to three-year program of 60 hours, is designed for qualified graduate students who are determined to become reputable writers of fiction, poetry or drama, and who wish to prepare themselves for the variety of positions related to the profession of writer, including the college teaching of English.

The normal standards for admission to graduate study in English apply, except that applicants for the M.F.A. must also submit supplementary original writing in fiction, poetry or drama: two short stories, or 30 to 40 pages of fiction; from 10 to 15 pages of poetry; or one full act of a play. Manuscripts should be mailed separately to the Director of the M.F.A. Program in English, Bartlett Hall, University of Massachusetts, Amherst, MA 01002.

The candidate must either pass one foreign language examination or translate a body of work from another language. He must pass an oral examination including a defense of his thesis, which should constitute a book-length manuscript of fiction, poetry or drama, of publishable quality.

The 60 hours of work are apportioned as follows: 12 hours of courses in imaginative writing; 18 hours of thesis credit, incorporated into the course structure of the credits in imaginative writing, beginning with the second semester of such studies; six hours in another appropriately related field of study; 24 hours in American and English literature and language, including at least two courses in the modern and contemporary genre of his speciality (fiction, poetry or drama), and one each in either modern or contemporary courses in the other two genres.

Application forms should be obtained from and returned to the Graduate School. Deadline for applications is March 1, although applicants are encouraged to submit manuscripts earlier.

## PH.D. FOREIGN LANGUAGE REQUIREMENTS

The Department requires proficiency in one foreign language to be demonstrated by successful completion of two graduate courses in comparative literature; or by successfully completing one graduate-level course in the area of the language chosen; or proficiency in two foreign languages, to be demonstrated by passing the standard foreign-language examinations. Transfer students must fulfill this requirement according to these standards, unless they have been certified as to language proficiency before arrival; others may have par-

tially fulfilled the requirement while earning the master's degree.

All graduate students should secure from the Department of English detailed information on requirements for the degrees of Ph.D., M.F.A., M.A.T., and M.A.

## ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### COURSES OPEN TO GRADUATE STUDENTS ONLY

#### 700. SPECIAL PROBLEMS.

For students wishing to do special work not covered by other courses. Permission of the Graduate Program Director and the instructor required. The instructor supervises and evaluates the work. *Credit, 3-12.*

#### 701. HISTORY OF THE ENGLISH LANGUAGE.

Development of the English language. Continuing as well as accomplished changes and variations in sounds, forms, and usage. Survey of dictionaries and grammar in context of teaching. *Ms. Duckert.*

#### 702. OLD ENGLISH.

Introduction to Old English.

*Mr. Creed, Ms. Duckert, Mr. Aho.*

#### 703. MIDDLE ENGLISH.

The language and documents representing the chief dialects. *R. Creed*

#### 705. OLD ENGLISH LITERATURE.

Reading of various Old English works, stressing Beowulf. Prerequisite, English 702, or equivalent.

*Mr. Creed, Ms. Duckert.*

#### 706. MIDDLE ENGLISH LITERATURE.

Representative poems, verse plays, and selected prose, exclusive of Chaucer.

Prerequisite, English 703 or equivalent.

*Ms. Diamond, Mr. DiMarco.*

#### 708. CHAUCER.

Chaucer's *Canterbury Tales* and the critical problems implicit in his works.

*Mr. DiMarco, Mr. Gallo.*

#### 709. THE WORKS OF CHAUCER'S FRENCH AND ITALIAN PERIODS.

The complaints, the dream-visions, the later short poems, Boethius, and Troilus as combinations of medieval art and thought with pre-Renaissance motifs. *Mr. Gallo.*

#### 710. HISTORICAL STUDIES IN THE LANGUAGE OF LITERATURE.

The linguistic milieu in which monuments of British and American literature were created. Emphasis on matters critical to accurate reading, e.g., semantic shifts, changes in syntax and rhyme, regional and social variations. Examination of selected works according to interests of the class.

*Ms. Duckert.*

#### 712. STUDIES IN RHETORIC AND PROSE STYLE.

Brief readings in Plato and Aristotle as well as in the "new rhetorics" of our own time. Detailed problems in the study of style: words and meanings, the implications of sentence structures, irony, metaphor, the cliché.

*Credit, 3 for two semesters. Mr. Gibson, Mr. Smith.*

#### 713. STUDIES IN FILM.

The uses of film in an English Department. The application of film terminology, theory, and aesthetics. The rhetorical elements of film and their relationship to other forms of communication. The relationship of film to print literature. Procedures for setting up film-related courses, obtaining films, and teaching film as film and as an extension of traditional literature.

## UNIVERSITY OF MASSACHUSETTS

## ENGLISH

Prerequisite, teacher of Rhetoric 180 or permission of instructor.  
Mr. Eidsvik, Mr. Harrington.

### 718. THE ENGLISH LITERARY PROFESSION.

An introduction to the professional standards, aims, and procedures of scholarship and criticism.

Mr. Kinney, J.D. Reed.

### 721. THE DEVELOPMENT OF THE ENGLISH NOVEL.

Readings in the English novel to the late 19th century, from Richardson to Conrad, with attention to some ten representative novels.

Mr. Golden, Mr. Page, Ms. Wolff.

### 730. LITERATURE OF THE 16TH CENTURY.

Christian and Humanist ideals reflected in the poetry of Skelton, Wyatt, Surrey, Sackville, Raleigh, Sidney, and Spenser.

Mr. Cheney, Mr. French, Mr. Kinney, Mr. Spivack.

### 731. THE ENGLISH BIBLE AS LITERATURE.

The several main genres of Biblical literature in their historical setting. Principles in interpretation; the literary influence of the Authorized Version.

Mr. Collins, Mr. Freeman.

### 732. SHAKESPEARE.

Close examination of Shakespearian plays representing the characteristics of his dramatic art.

Mr. Berlin, Mr. Donohue, Mr. Farrell, Mr. Jorgens, Mr. Spivack, Ms. Spivack.

### 734. ELIZABETHAN AND JACOBAN DRAMA.

Representative plays by Shakespeare's contemporaries, 1580-1642; emphasis on works by Marlowe, Jonson, Beaumont and Fletcher, and Ford.

Mr. Berlin, Ms. Spivack.

### 737. LITERATURE OF THE 17TH CENTURY.

Readings in 17th century prose and poetry from Donne to Marvell; analysis of the more significant areas of thought and style.

Ms. Beaty, Mr. Cheney, Mr. Collins, Mr. Current, Mr. Frank, Mr. Freeman, Mr. French, Mr. Harrington, Mr. Jenkins, Mr. Koehler, Mr. Shadoian.

### 738. MILTON.

The major and some of the minor works; related studies in Milton scholarship and criticism.

Ms. Beaty, Mr. Collins, Mr. Current, Mr. Freeman, Mr. French, Mr. Koehler, Ms. Swain.

### 740. LITERATURE OF THE RESTORATION AND 18TH CENTURY.

Readings in English poetry and prose from Dryden to Burns, emphasizing the major writers and including representative plays.

Mr. Barron, Mr. Golden, Mr. Leheny, Mr. Shaw, Mr. Sitter, Mr. Smith, Mr. Weston, Ms. Wolff.

### 745. LITERATURE OF THE ROMANTIC PERIOD.

Readings in the major poetry, representative essays, and selected critical writings, including Blake, Coleridge, Wordsworth, Keats, Shelley, Byron, and Hazlitt.

Mr. Ashton, Mr. Bagg, Mr. Barnard, Mr. Brogan, Mr. Haven.

### 746. LITERATURE OF THE VICTORIAN AGE.

Readings in the chief poets and prophets of the Victorian Age. Emphasis on Browning, Tennyson, Carlyle, Newman, Mill, Ruskin, Arnold, and Pater.

Mr. Keefe, Mr. Noland, Ms. Raymond, Mr. Silver, Mr. Wolff.

### 750. EARLY AMERICAN LITERATURE.

The major writers and intellectual movements in America during the 17th and 18th centuries.

Mr. Emerson, Mr. Lowance.

### 753. AMERICAN ROMANTICISM.

The development of American romanticism, under European influence, stressing Cooper, Emerson, Thoreau, Poe, Hawthorne, Whitman, and Melville.

Ms. Culley, Mr. Emerson, Mr. Gozzi, Mr. Kaplan, Mr. Matlack, Mr. McCarthy, Mr. Plumstead, Mr. Robinson.

### 755. AMERICAN REALISM.

The development of American realism from 1865 to 1914, stressing Twain, Henry James, Howells, and Henry Adams.

Ms. Culley, Mr. Gozzi, Mr. Matlack, Mr. O'Donnell, Mr. Robinson, Mr. Turner.

### 770. CONTEMPORARY DRAMA.

British and American Drama from 1950 to the present.

Mr. Rudin.

### 771. CONTEMPORARY FICTION.

British and American fiction from 1945 to the present.

Mr. Chametzky, Mr. Clayton, Mr. Hicks, Mr. Moran, Mr. Nelson.

### 772. CONTEMPORARY POETRY.

British and American poetry from 1945 to the present.

Mr. Koehler, Mr. Jenkins, Mr. Langland, Mr. Tate, Mr. Tucker.

### 774. LITERARY CRITICISM.

Critical theory and practice with emphasis on the major philosophical critics beginning with Plato and Aristotle.

Mr. Copeland, Mr. Clark, Mr. Jayne.

### 775. MODERN DRAMA.

Modern British, Irish, and American drama from 1890 to 1950. Emphasis on major figures: Shaw, Synge, O'Neill.

Mr. Aczel, Mr. Donohue, Ms. Hogan, Mr. Rudin.

### 776. MODERN FICTION.

Intensive study, including papers and oral reports of important works by Henry James, Joseph Conrad, James Joyce, D. H. Lawrence, William Faulkner and other masters of the modern novel between about 1900 and 1940.

Mr. Chametzky, Mr. Clayton, Ms. Edwards, Mr. Hicks, Mr. Quick.

### 777. MODERN POETRY.

The growth and development of modern poetry in English from 1912 to WW II, including Yeats, Stevens, Frost, Eliot, Pound, Williams; Also Cummings, L. Hughes, Moore, Ransom, Auden, Crane, Robinson. Brief Background materials out of Hopkins, Dickinson, and Hardy.

Mr. Clark, Mr. Koehler, Mr. Langland, Mr. Mariani.

### 779. MAT SUPERVISED STUDENT TEACHING.

Students registering for this course should immediately contact the MAT Program Director. Supervision is accomplished through a seminar of all enrollees, which meets by arrangement. Supervision varies for in-service candidates.

### 780. IMAGINATIVE WRITING: POETRY.

Writer's workshop with emphasis on poetry. May be repeated by candidates for the M.F.A. for a total of 12 credits.

Mr. Jenkins, Mr. Langland, Mr. Tucker.

### 781. IMAGINATIVE WRITING: PROSE.

Writer's workshop with emphasis on fiction. May be repeated by M.F.A. candidates for a total of 12 credits.

Mr. Aczel, Mr. Fetter, Mr. Neugeboren, Mr. Swados.

### 790. FOLKLORE.

Folk narrative: tale, myth, and legend in relation to written literature.

Mr. Carey, Ms. Green, Mr. Turner.

### 810 — 819. SEMINARS IN ENGLISH LITERATURE

Credit, 3 each semester.

### 820 — 829. SEMINARS IN THE ENGLISH LANGUAGE.

Credit, 3 each semester.

### 830 — 839. SEMINARS IN AMERICAN LITERATURE.

Credit, 3 each semester.

## ENTOMOLOGY

- 840 — 849. SEMINARS IN CRITICISM.  
*Credit, 3 each semester.*
- 850 — 859. SEMINARS IN EDITING.  
*Credit, 3 each semester.*
- 860 — 869. SEMINARS IN WRITING.  
*Credit, 3 each semester.*
- 870 — 879. SEMINARS IN LINGUISTICS.  
*Credit, 3 each semester.*
800. MASTER'S THESIS.  
May be repeated by M.F.A. candidates for a total of 18 credits.  
*Credit, 3-9.*
900. DOCTORAL DISSERTATION. *Credit, 18.*

### COURSE OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

634. ADVANCED TECHNICAL WRITING.  
Case studies in engineering and industrial reporting, advertising, and promotional literature, scientific journalism, and graphic techniques. Given in alternate years.  
Prerequisite, permission of instructor. Mr. Mitchell.

### RELATED COURSES

See Comparative Literature.

## Entomology

### GRADUATE FACULTY

JOHN G. STOFFOLANO, *Associate Professor and Acting Chairman of the Department of Entomology*, B.S., New York at Oneonta, 1962; M.S., Cornell, 1967; Ph.D., Connecticut, 1970.

PEDRO BARBOSA, *Assistant Professor and Graduate Program Director*, B.S., City College of New York, 1966; M.S., Massachusetts, 1969; Ph.D., 1971.

WILLIAM B. BECKER, *Professor*, B.S., New York State College of Forestry at Syracuse University, 1934; M.S., Massachusetts, 1937; Ph.D., 1945.

JOHN D. EDMAN, *Associate Professor*, B.S., Gustavus Adolphus College, 1959; M.S., Nebraska, 1961; Ph.D., Kansas State, 1964.

ADRIAN G. GENTILE, *Adjunct Associate Professor*, Doctor of Agriculture, University of Naples, 1950; M.Sc., California, 1956; Ph.D., 1966.

HENRY H. HAGEDORN, *Assistant Professor*, B.S., Wisconsin, 1965; M.S., 1966; Ph.D., California, 1970.

JOHN F. HANSON, *Professor*, B.S., Massachusetts, 1937; M.S., 1938; Ph.D., 1943.

T. MICHAEL PETERS, *Associate Professor*, B.S., Long Beach State College, 1959; M.S., Minnesota, 1961; Ph.D., 1964.

RONALD J. PROKOPY, *Associate Professor*, B.S., Cornell, 1957; Ph.D., 1964.

A candidate for the Master of Science degree in Entomology, in addition to meeting the requirements of the Graduate School must ordinarily complete the course requirements of Entomology, 655, 680, 682, and related sciences or their equivalents, plus Entomology 579 and other courses assigned by the student's adviser. Continuous registration in at least one graduate seminar is required throughout the period of residence. A thesis is usually required, but in special cases course credits in

## GRADUATE SCHOOL

the 700-800 series, including at least three credits in Ent. 700, may be substituted.

Requirements for the Doctor of Philosophy degree include the course requirements for the M.S. degree, as well as those established by the Graduate School and by the student's Guidance Committee.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

(Most graduate-level courses in the department are given on a rotating basis, subject to change on student demand.)

#### 700. SPECIAL PROBLEMS.

Research on some problem in Entomology. If submitted in lieu of a thesis, original research is expected; and two copies of a written report, approved by two members of the staff, are required by the Department. *Credit, 1-6 per semester.*

#### 705. PRINCIPLES OF PLANT PROTECTION.

Fundamentals of insecticidal action, natural factors governing insect abundance and activity, infection and disease development, chemical control, cultural practices, quarantine and eradication, host resistance and pathogen variability and weed control. Offered only at the Waltham Field Station.

#### 770. RESEARCH METHODS.

An orientation course for incoming graduate students. Stresses research principles, methods of analysis, including the use of analytical laboratory equipment, and presentation of results. *Credit, 1.*

#### 790. SEMINAR.

Reports on the current literature of entomology; special reports by resident and visiting speakers. Participation by all graduate students is expected. One class hour.

#### 823. ADVANCED BIOLOGICAL CONTROL.

The basic principles and practical application of biological control of insects. A section devoted to control of pest weeds with insects.

Prerequisite, Ent 680 or equivalent.

#### 842. ADVANCED ARTHROPOD TAXONOMY.

Classification of selected insects and insect allies, including latest methods in taxonomy and principles of classification. Prerequisite, permission of instructor. *Credit, 1-9.*

#### A. Immature stages of insects.

#### B. Minor order of insects.

Mr. Hanson.

#### C. Arthropods other than insects.

Mr. Hanson.

#### D. Other groups of insects.

#### 848. PRINCIPLES OF SYSTEMATIC ENTOMOLOGY.

The species concept; type categories; the Zoological Code. The preparation of a taxonomic paper of publication quality, including drawing, required.

Prerequisites, Ent 655.

Mr. Hanson.

#### 850. ADVANCED MEDICAL ENTOMOLOGY.

Detailed studies of insects as parasites of man and animals. Biology, vector-relationship, taxonomy, and control. Prerequisite, Ent 674 or equivalent.

#### 800. MASTER'S THESIS.

*Credit, 10.*

#### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

## UNIVERSITY OF MASSACHUSETTS

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 572. FOREST AND SHADE TREE INSECTS.

The ecology, biology and control of insects which attack shade trees, forests and forest products. A brief introduction to insects; special attention to the more important forest and shade tree insects.

Two class hours, two 2-hour laboratory periods.

*Credit, 4* Mr. Barbosa.

#### 579A. B. ANIMAL ECOLOGY.

Basic principles and concepts operative at the various levels of biological organization (organismic, population, community, and ecosystem). Topics covered: ecology and natural selection, behavioral ecology, human ecology, and current ecological problems such as pollution, overpopulation, etc. An optional 3-hour, 1-credit laboratory for an independent ecology research project.

*Credit, 3 (or 4).*

#### 595. EVOLUTION.

The course and dynamics of both inorganic and organic evolution; the implications of evolutionary concept on human philosophy, behavior, and welfare.

Mr. Hanson.

#### 611A. B. INSECT BEHAVIOR.

The specific behaviors of insects, analyzed in view of current experimental research, and used to demonstrate various neurobiological principles. An optional 3-hour, 1-credit lab for an independent research project. Lab period also includes several formal sessions.

*Credit, 3 (or 4).* Mr. Stoffolano.

#### 655 (I). CLASSIFICATION OF INSECTS.

A brief treatment of insect anatomy and principles of classification; identification of specimens (mostly adult) in some of the major groups of insects.

Three 2-hour laboratory periods.

Prerequisite, permission of instructor; Ent 126 desirable.

Mr. Hanson.

#### 657. INSECT MORPHOLOGY.

The external and internal anatomy of the major orders, with stress on phylogenetic relationships, as background for subsequent work in taxonomy and physiology of insects.

One class hour, three 2-hour laboratory periods.

Prerequisite, permission of instructor; Ent 126 desirable.

*Credit, 4* Mr. Hanson.

#### 674. MEDICAL AND VETERINARY ENTOMOLOGY.

Relationships of insects and their allies to the health of man and animals. The classification, biology, and control of these pests.

One class hour, two 2-hour laboratory periods.

Prerequisite, Ent 126 or permission of instructor.

#### 680. INSECT CONTROL.

The science of pest control. Biological control, and the need, economics, effectiveness, and hazards from insecticides are emphasized.

Prerequisite, Ent 126; Ent 579 and 682 desirable.

#### 681. INSECT PEST MANAGEMENT.

Application of the principles of insect pest management with emphasis on pest recognition, properties of available control agents and their correct use in planning control programs.

Prerequisite, Ent 680 and 126, or permission of instructor.

#### 682. INSECT PHYSIOLOGY.

Detailed consideration of the organ systems, showing their functions in nutrition, reproduction, respiration, and growth, and the relationship of physiology to behavior.

One class hour, two 2-hour laboratory periods.

Prerequisites, Ent 126, Biochem 520 and 521.

Mr. Hagedorn.

### COURSE NOT FOR MAJOR CREDIT

(No graduate credit for students majoring in Entomology)

## ENVIRONMENTAL ENGINEERING

### 560. FOOD AND STRUCTURAL PESTS.

Biology, recognition, damage, and principles of control relating to those insects and other pests which damage foods, fabrics, and buildings. A prior course in zoology or entomology desirable.

## Environmental Engineering

### GRADUATE FACULTY

(see under Civil and Chemical Engineering and Public Health for degrees, institutions, and years.)

DONALD DEAN ADRIAN, *Professor of Civil Engineering and Director of the Environmental Engineering Program.*

WILLIAM A. NASH, *Professor of Civil Engineering and Graduate Program Director.*

BERNARD B. BERGER, *Professor of Civil Engineering and Public Health and Director of Water Resources Research Center.*

JOSEPH M. COLONELL, *Professor of Civil Engineering.*

FRANCIS A. DIGIANO, *Associate Professor of Civil Engineering.*

SALVATORE R. DINARDI, *Associate Professor of Public Health.*

TSUAN H. FENG, *Professor of Civil Engineering and Agricultural Engineering.*

E. ERNEST LINDSEY, *Professor of Chemical Engineering.*

HOWARD A. PETERS, *Associate Professor of Public Health and Civil Engineering.*

The Environmental Engineering Program offers both M.S. and Ph.D. degrees. The overall objective of the Program is to prepare students for careers in engineering related to development of a better environment. This requires an understanding of water, air, and solid-waste treatment and disposal inasmuch as the processing of waste in one medium usually results in transfer of a by-product to one or both of the other media. Accordingly, the Environmental Engineering Master of Science curriculum requires each student to take a common core of fundamentals in the three media, while allowing him to pursue a subsequent speciality, in consultation with his adviser and in keeping with his career goals. The Ph.D. program has considerable flexibility to accommodate students who have been trained in various related or unrelated disciplines.

### REQUIREMENTS FOR THE MASTER'S DEGREE

#### 1. The Environmental Engineering Core.

Courses in the Core are intended to provide students from many different backgrounds with a technical foundation for more advanced environmental engi-

## ENVIRONMENTAL SCIENCES

neering courses, as well as an understanding of the institutions and policies common to control of water and air quality and land usage. The core consists of the following:

Civil Engineering 665, 670, 850, 851, and one environmental engineering laboratory course (CE 672, 673, 770, 773, 776). Total Core Credits, 11.

2. At least three courses listed in the Areas of Specialization.

Beyond the Core, environmental engineering elective courses have been conveniently grouped into three descriptive areas — systems, design, and science — each of which includes offerings in water, air and land resources. These are listed below:

Systems: CE 660, 662, 675, 764, 775, and Agricultural and Food Economics 582.

Design: CE 671, 676, 770, 771, 772, 774, Chemical Engineering 660, and Mechanical and Aerospace Engineering 577.

Science: CE 575, 672, 673, 674, 773, 776, and Public Health 632.

3. Thesis (six credits) or Master's Project (three credits).

4. Additional graduate credit courses which intensify a student's professional career goals. These are available in the fields of Engineering, Chemistry, Computer Science, Geology, Marine Science, Microbiology, Public Health, Statistics, Regional Planning, and Zoology. For example, rather than electing the more traditional environmental engineering program of study, a student may elect one reflecting an interest in environmental management by taking nine credits in Regional Planning and/or Economics.

5. Although the program is administered by the Department of Civil Engineering, individuals with a baccalaureate from accredited institutions in fields other than Civil Engineering are encouraged to apply.

All candidates from other than ECPD accredited engineering programs must take a sufficient number and distribution of courses such that the combination of their undergraduate and graduate courses will meet the Advanced Level Accreditation requirements of the Engineers Council for Professional Development. This may extend the non-engineering candidate's residency by one to three semesters.

6. All general Graduate School requirements for admission and for the degree must be met. A total of 31 credits must be earned.

## REQUIREMENTS FOR THE PH.D. DEGREE

1. Forty-eight credits of approved graduate-level course work beyond the bachelor's degree, of which two minor areas provide a minimum of 18 credits. Suitable minor areas include:

- Chemical, Biological, or Physical Science.
- Mathematics, Computer Science or Statistics.
- Chemical Engineering or Agricultural Engineering.
- Systems analysis, which may include courses offered in Industrial, Chemical, Electrical, and Mechanical Engineering.
- Public Health or Environmental Science.
- Economics, Planning, and Management.

2. There is no specific language requirement other than that which may be determined by the student's Guidance Committee. In certain cases the Guidance Committee might specify that the student's research objective might necessitate some knowledge of a lan-

guage; in other cases, course work from other schools or departments on the campus might be appropriate.

## Environmental Sciences

(Not a degree-granting program)

## GRADUATE FACULTY

WARREN LITSKY, *Commonwealth Professor and Chairman of the Department of Environmental Sciences*, B.S., Clark, 1945; M.S., Massachusetts, 1948; Ph.D., Michigan State, 1951.

HAIM B. GUNNER, *Professor and Graduate Program Director*, B.Sc., University of Toronto, 1946; M.Sc., University of Manitoba, 1948; Ph.D., Cornell, 1962.

ROBERT A. COLER, *Associate Professor*, B.A., State University of New York, 1952; M.A., 1954; Ph.D., Syracuse, 1960.

KARL DEUBERT, *Associate Professor*, Ph.D., Martin Luther University, Halle-Wittenberg, Germany, 1954.

LINDA G. LOCKWOOD, *Associate Professor*, B.S., Columbia, 1960; M.A., 1961; M.A., 1965; Ph.D., 1969.

JOHN T. REYNOLDS, *Adjunct Professor* (Professor of Biology, Clark University).

ROBERT W. WALKER, *Associate Professor*, B.S., Massachusetts, 1955; M.S., 1959; Ph.D., Michigan State, 1963.

The Department of Environmental Sciences, while offering the courses listed below, attempts to structure course sequences which are suited to the needs of individual students. As such, it encourages interaction with other departments offering related material in environmental studies. While this is not an independent degree-granting program, the M.S. and Ph.D. are offered through the Department of Plant and Soil Sciences and the M.Ed. and the Ed.D. in Environmental Sciences Education are awarded through the School of Education.

## ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

## COURSES OPEN TO GRADUATE STUDENTS ONLY

### 710, 711. GRADUATE SEMINAR IN ENVIRONMENTAL STUDIES.

Reading reports and discussions of the current literature in the area of Environmental Sciences. *Maximum credit, 6.*

### 745. MICROBIAL ECOLOGY OF THE SOIL.

The biochemistry and physiology of interactions among microorganisms in the soil environment, and their relationships with the soil environment. Lectures, discussions, and a critical review of current literature.

Prerequisite, Plant and Soil Sci 615 or permission of instructor. Mr. Gunner.

## COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

### 501. INTRODUCTORY ENVIRONMENTAL BIOLOGY.

The response of the biota to environmental stress induced by air, water, and soil pollutants.

Prerequisites, Botany 101, Zool 101, or equivalent. Three class hours, demonstrations, field trips. Mr. Gunner.

## UNIVERSITY OF MASSACHUSETTS

### 550. MICROBIAL ECOLOGY OF MARINE ENVIRONMENT.

The ecology, function, and importance of microorganisms in the marine environment including the underlying sediments, their role in the food chain and productivity of the seas and estuaries, and the factors influencing seasonal and geographical population dynamics. *Credit, 2.* Mr. Litsky.

### 602. ADVANCED POLLUTION BIOLOGY.

The measurement and evaluation of the biotic response to environmental stress of the terrestrial and aquatic biocoenoses induced by air, water and soil pollutants. *Prerequisites:* Introductory Environmental Biology or equivalent, 1 year of Introductory Chem and Zool or Botany. Two 1-hour lectures, two 3-hour laboratory, field trips, demonstrations. *Credit, 4.* Mr. Coler.

### 603. AIR POLLUTION BIOLOGY.

The biological input used for the determination of air quality criteria, including organism/environment interaction and dose/response phenomena in adapted and stressed systems. No laboratory.

### 604. RIVER POLLUTION-BIOLOGICAL SURVEY METHODS.

The chemical, physical and biological assessment of riverine ecosystems. Students conduct field surveys and present data in a final report form. *Permission of instructor required.* Mr. Coler.

### 615. MICROBIOLOGY OF THE SOIL.

Soil microorganisms; their distribution, ecology, and transformation of organic and inorganic substrates. Microbiology of the rhizosphere and the biological equilibrium. *Prerequisite:* Microbiol 250 or permission of instructor. Mr. Gunner.

### 700. SPECIAL PROBLEMS

Individual work on an assigned problem or project in the field of environmental sciences. *Credit, 1-3.*

(Master's Thesis and Doctoral Dissertation credits can be earned through the Plant and Soil Sciences Department and through the School of Education.)

## Exercise Science

### GRADUATE FACULTY

DEE W. EDINGTON, *Associate Professor, Head of the Department of Exercise Science, and Graduate Program Director*, B.S., Michigan State, 1959; M.S., Florida State, 1963; Ph.D., Michigan State, 1968.

DAVID C. BISCHOFF, *Professor of Physical Education, Associate Provost, and Dean of the School of Physical Education*, B.S., Pennsylvania State, 1952; M.Ed., North Carolina, 1953; Ph.D., Pennsylvania State, 1955.

HARRY K. CAMPNEY, JR., *Professor*, B.S., Pittsburgh, 1952; M.S., Illinois 1953; Ph.D., Iowa, 1960.

ROBERT J. JAMES, *Associate Professor*, B.S., Springfield College, 1954; M.S., 1957; B.S., Connecticut, 1964; Ph.D., Wisconsin, 1974.

WALTER P. KROLL, *Professor*, B.S., Northern Illinois, 1952; M.S., Illinois, 1953; P.E.D., Indiana, 1959.

THOMAS C. MCBRIDE, *Adjunct Professor*, A.B., Dartmouth, 1953; M.D., Vermont Medical School, 1957.

STANLEY PLAGENHOEF, *Professor*, B.S., Michigan 1949; M.S., 1951; Ph.D. 1962.

BENJAMIN RICCI, JR., *Professor*, B.S., Springfield College, 1949; M.Ed., 1950; D.P.E., 1958.

## EXERCISE SCIENCE

The Department of Exercise Science (motor integration, biomechanics, exercise biochemistry, exercise physiology, and sensorimotor dysfunction) offers programs of study leading to a Master of Science degree in Physical Education and a Doctor of Philosophy degree in Human Movement. The degree programs in Exercise Science prepares a candidate to study and apply exercise from a multidisciplinary approach.

Candidates for the M.S. and Ph.D. degrees are accepted for admission under the general regulations of the Graduate School. In addition, M.S. candidates are required to have completed courses in exercise physiology, human anatomy and kinesiology. Ph.D. candidates are required to have had two semesters of organic chemistry, a year of physics, a semester of statistics and computer programming, as well as exercise physiology, anatomy and kinesiology. Remedial work may be taken during the first year of study.

The degree requirements include 31 graduate credits for the M.S. degree and approximately 90 graduate credits for the Ph.D. degree. In both degree programs the majority of these credits are earned in exercise science courses. The credits earned in the department come from both required and elective courses in both degree programs.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

### 700. SPECIAL PROBLEMS

Individual research on topics of a special interest. *Prerequisite:* permission of instructor. *Credit, 1-6.*

### 711. INTRODUCTION TO RESEARCH IN HUMAN MOVEMENT.

The nature of research; methods of acquiring knowledge; research and social progress; general concepts concerning the scientific method. *Credit, 1.* Mr. Kroll.

### 712. DATA ANALYSIS AND INTERPRETATION IN HUMAN MOVEMENT RESEARCH

Theory and techniques involved in the analysis and interpretation of data pertinent to research in human movement. Parametric and nonparametric inference statistics. *Prerequisite:* Stat 121. Mr. Campney.

### 722. EXERCISE-PHYSIOLOGY INSTRUMENTATION THEORY.

Instrumentation theory relative to the equipment utilized in estimating parameters in exercise physiology. *Prerequisites:* Zool 135, Ex Sci 278 and 621. Mr. Ricci.

### 732. BIOMECHANICS

Physical and biological considerations applied to the teaching of motor skills. *Prerequisites:* Ex Sci 204, 205, and 631. Mr. Plagenhoef.

### 742. MOTOR INTEGRATION PRACTICUM

Theory and practice in laboratory analysis. Topics include nerve conduction, velocity, reflex latency, reaction time, and electromyographic analysis of local muscular fatigue as related to skilled and unskilled performance. *Prerequisites:* Ex Sci 204, 205, 278, 641, Zool 135. Mr. Kroll.

### 813. MEASUREMENT THEORY AND HUMAN MOVEMENT RESEARCH.

The theory of the construction of evaluative instruments in human movement. Emphasis on a critical examination of existing measurement devices. *Prerequisites:* Ex Sci 274 and 712. Mr. Campney.

## FOOD AND AGRICULTURAL ENGINEERING

823. **EXPERIMENTAL PHYSIOLOGY OF EXERCISE.**  
Experimental investigation of the physiological effects of exercise.  
Prerequisite, Ex Sci 621. Mr. Ricci.

824. **TISSUE RESPIRATORY RESPONSES TO EXERCISE.**  
Tissue respiration in response to stress conditions. Emphasis on oxidative energy production.  
Prerequisite, Ex Sci 278. Mr. Edington.

825. **EXERCISE METABOLISM.**  
The factors affecting human metabolism under exercise conditions. Emphasis on energy production and fiber types.  
Prerequisite, Ex Sci 278. Mr. Edington.

833. **FORCES AND MOMENTS OF FORCE IN HUMAN MOTION.**  
The analysis of whole body muscle action during movement and impact.  
Prerequisite, Ex Sci 732. Mr. Plagenhoef.

843. **NEUROMUSCULAR FATIGUE.**  
Analysis of fatigue and recovery processes in gross human motor activity.  
Prerequisites, Ex Sci 621, 742, 813, and Stat 561. Mr. Kroll.

844. **KINESTHESIA.**  
Anatomical and functional analysis of the kinesthetic phenomena in gross human motor activity.  
Prerequisites, Ex Sci 641, Psych 511, and Stat 581. Mr. Kroll.

899. **SEMINAR IN HUMAN MOVEMENT.**  
Topics in human movement not covered in other courses.  
*Credit, 1 per semester; Maximum credit, 6.*

800. **MASTER'S THESIS.** *Credit, 3-6.*

900. **DOCTORAL DISSERTATION.** *Credit, 18.*

**COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS**  
(For either major or minor credit)

621. **PHYSIOLOGICAL BASIS OF HUMAN PERFORMANCE.**  
Analysis and interpretation of cardiovascular-pulmonary adjustment, metabolic requirement, and heat regulation during exercise.  
Prerequisite, Ex Sci 278. Mr. Ricci.

631. **MECHANICAL ANALYSIS OF HUMAN MOTION.**  
Application of the principles of mechanics to the analysis of human motion.  
Prerequisites, Ex Sci 204 and 205. Mr. Plagenhoef.

641. **MOTOR INTEGRATION.**  
The control of muscular activity by the nervous system. Topics include basic motor-system reflexes, cross transfer, fatigue, kinesthetic sense, lateral dominance, and neuromuscular facilitation techniques.  
Prerequisites, Ex Sci 204, 205, 278, and Zool 135. Mr. Kroll.

651. **THEORY OF THERAPEUTIC EXERCISE.**  
Theory of therapeutic exercise for the mentally retarded, physically handicapped, and normal.  
Prerequisite, Ex Sci 259. Mr. James.

652. **PHYSICAL ACTIVITY AND MENTAL RETARDATION.**  
Physical activity relative to the behavior of the mentally retarded.  
Prerequisite, Ex Sci 259. Mr. James.

## GRADUATE SCHOOL

### Food and Agricultural Engineering

#### GRADUATE FACULTY

JOE T. CLAYTON, *Professor, Head of the Department of Food and Agricultural Engineering, and Graduate Program Director, B.S.A.E., Tennessee, 1949; M.S., Illinois, 1951; Ph.D., Cornell, 1962.*

TSUAN H. FENG, *Professor of Civil Engineering.*

CURTIS A. JOHNSON, *Associate Professor, B.S.A.E., Nebraska, 1940; M.S., Iowa State, 1955.*

ERNEST A. JOHNSON, *Associate Professor, B.S., Massachusetts, 1953; M.S., Purdue, 1959.*

ROBERT G. LIGHT, *Professor, B.S., Maine, 1953; M.S., Pennsylvania State, 1958.*

RICHARD E. MUDGETT, *Associate Professor, B.S.E.E., Northeastern, 1952; B.B.A., 1954; M.S. Massachusetts, 1969; Ph.D., 1974, Massachusetts Institute of Technology.*

JOHN S. NORTON, *Associate Professor, B.S., Pennsylvania State, 1948; M.S., Louisiana State, 1950.*

MICHA PELEG, *Assistant Professor, B.Sc., The Technion, Israel, 1963; M.Sc., 1967; D.Sc., 1971.*

CHOKYUN RHA, *Adjunct Associate Professor, B.S., Massachusetts Institute of Technology, 1962; M.S., 1964; M.S.Ch.E., 1966; Ph.D., 1967.*

JOHN R. ROSENAU, *Associate Professor, B.S.A., Wisconsin, 1965; B.S.M.E., 1966; Ph.D., Michigan State, 1970.*

HENRY G. SCHWARTZBERG, *Professor, B.Ch.E., Cooper Union, 1949; M.Ch.E., New York University, 1959; Ph.D., 1966.*

LESTER F. WHITNEY, *Associate Professor, B.S., Maine, 1949; M.S., Michigan State, 1951; Ph.D., 1963.*

Master of Science and Doctor of Philosophy programs in Food and Agricultural Engineering involve studies of the engineering aspects of the production, preservation, storage, processing, and distribution of food. Academic backgrounds, as well as programs of study, may differ markedly depending upon the aims of the student and the area of emphasis he or she selects. Students working in any emphasis-area must have a background in the physical and engineering sciences and have, or be prepared to acquire, a basic knowledge of the biological sciences.

Requirements for both the M.S. and Ph.D. degrees include courses offered by the Department of Food and Agricultural Engineering and courses in supporting areas, such as food science, mechanical, chemical, and civil engineering; mathematics; and the biological and microbiological sciences. A typical Ph.D. program includes approximately one-third major department offerings, one-third course work in supporting areas, and one-third dissertation. The department imposes no foreign language requirements for the doctoral degree.

## UNIVERSITY OF MASSACHUSETTS

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 700. SPECIAL PROBLEMS IN FOOD AND AGRICULTURAL ENGINEERING.

Current topics pertinent to students' interests and departmental goals. Includes analysis, experimentation, and/or literature review. The special problem culminates with an unbound written report, often of publishable quality.

*Credit, 1-6.*

##### 740. PHYSICAL PROPERTIES OF BIOLOGICAL MATERIALS.

The physical characteristics and mechanical, rheological, thermal, electrical, and optical properties of biological materials. Emphasis on the application of fundamental concepts of behavior in storage, processing, quality-evaluation and manipulation.

2 class hours, one 2-hour laboratory period.

Prerequisite, permission of instructor.

##### 756. ENGINEERING ANALYSIS OF BIOLOGICAL SYSTEMS.

Methods of mathematical modeling as a supplement to laboratory experiments. Analysis of biological problems in an engineering context, and the physical and mathematical interpretation of the results.

Prerequisite, Math 585 or approval of department.

##### 760. PHYSICAL AND PHYSIOLOGICAL RELATIONSHIPS IN ANIMAL ENVIRONMENTS.

(In cooperation with Department of Veterinary and Animal Sciences.) Functional environment contrasted to the generalized environment. The action of the environment on the animal and the reaction of the animal on the environment in terms of several parameters.

Prerequisite, permission of instructor.

##### 766. CONTROL OF HEAT AND VAPOR FLOW IN BUILDINGS AND PROCESSES

Application of mass flow theory to heat and vapor transfer. Thermal and gaseous interchange between animals and biological products and their environments. The application of instruments and controls.

Prerequisite, Mech Eng 582 or equivalent.

##### 776. ADVANCED FOOD-MACHINERY DESIGN.

Food machinery component design problems. The interrelation of the physical properties of biological material, with problems related to the food industry. A design problem is required of each student.

Prerequisite, permission of the department, or Mech Eng 283 and Math 285 or equivalents.

##### 780. BIOPHYSICS IN AGRICULTURAL ENGINEERING.

Properties of living systems in terms of the concepts of physics and engineering; the biophysical concept of the living cell; the theory of controlling regimes and biological rate processes.

Prerequisite, Food and Ag Eng 781

*Credit, 4*

##### 781. BIOLOGICAL PROCESS ENGINEERING.

Engineering analyses of thermal processing, ionizing radiation processing, microwave processing, other physical and chemical sterilization processes, and combined process sterilization.

Prerequisite, Food and Ag Eng 681.

##### 786. ADVANCED PROCESS ENGINEERING.

Engineering analyses of fermentation, recovery processes, enzyme technology, membrane technology, waste processing and utilization.

##### 791. SEMINAR.

Research methods in Food and Agricultural Engineering.

*Credit, 1.*

## FOOD AND RESOURCE ECONOMICS

##### 792. SEMINAR.

Research accomplishments in Food and Agricultural Engineering.

*Credit, 1.*

##### 891. PROFESSIONAL TOPICS IN FOOD AND AGRICULTURAL ENGINEERING

*Credit, 1 each semester. Maximum credit, 2*

##### 892. TECHNICAL TOPICS IN FOOD AND AGRICULTURAL ENGINEERING.

*Credit, 1 each semester. Maximum credit, 2.*

##### 800. MASTER'S THESIS.

*Credit, 4-8.*

##### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

##### 555. AQUACULTURAL ENGINEERING SYSTEMS (OE 591).

Rate theory and similitude in the scale-up of biological processes. Case study of biological data used in the derivation of useful engineering systems design relationships for the culture of mollusks.

##### 631. INSTRUMENTATION IN FOOD AND AGRICULTURAL ENGINEERING.

Instrumentation applied to research, covering recorders, indicators, controllers and transducers in general. Emphasis on applications and limitations.

Prerequisite, permission of instructor.

##### 665. PHYSIOLOGICAL UNIT OPERATIONS

Introduction to physiological systems, studies of thermodynamics, fluid dynamics, heat transfer and mass transfer to biological systems, concepts in biological regulatory systems and biological engineering design with specific examples.

##### 675. FOOD PROCESSING SYSTEMS ANALYSIS.

Continuous and batch processing systems for food and biological products. Flow analysis; systems analysis, scale-up, and simulation techniques. Machine operating principles, sanitary requirements, fabrication limitation and machine interactions.

Prerequisite, permission of instructor.

##### 681. ELEMENTS OF FOOD UNIT OPERATIONS

The fundamental engineering principles involved in the processing of biological materials. Emphasis on heat transfer, mass and energy balances, refrigeration, psychrometry, properties of fluids and fluid flow.

##### 684. APPLICATIONS OF FOOD ENGINEERING.

Application of engineering concepts to the processing and handling of biological materials, including evaporation, dehydration, irradiation, freeze drying, cost analysis, materials handling, manual motion, economy, and packaging.

## Food and Resource Economics

#### GRADUATE FACULTY

N. EUGENE ENGEL, *Professor and Head of the Department of Food and Resource Economics*, B.S., Nebraska, 1954; M.S., Connecticut, 1959; Ph.D. 1967.

JON M. CONRAD, *Assistant Professor and Graduate Program Director*, B.S., Wisconsin, 1968; M.A., Washington, 1970; Ph.D., Wisconsin, 1973.

P. GEOFFREY ALLEN, *Visiting Assistant Professor*, B.Sc., Nottingham, 1967; M.S., California, 1969; Ph.D., 1972

ROBERT S. BOND, *Professor of Forestry*

## FOOD AND RESOURCE ECONOMICS

ROBERT L. CHRISTENSEN, *Professor*, B.S., Michigan State, 1958; M.S., Delaware, 1960; Ph.D., North Carolina State, 1967.

BRADFORD D. CROSSMON, *Professor*, B.S., Connecticut, 1937; M.S., 1943; M.P.A., Harvard, 1949; D.P.A., 1963.

BARRY C. FIELD, *Assistant Professor*, B.S., Cornell, 1956; M.S., 1959; Ph.D., California, 1967.

JOHN H. FOSTER, *Professor*, B.S., Cornell, 1950; M.S., Purdue, 1951; Ph.D., Cornell, 1957.

ELMAR JARVESOO, *Professor*, M.S., Tartu University, Estonia, 1937; Dr. Agri. Science, University of Berlin, 1939.

EDWARD K. KNAPP, *Associate Professor*, B.S., Cornell, 1950; M.S. (Ed.), 1951; Ph.D., Michigan State, 1969.

THEODORE W. LEED, *Professor*, B.S., Ohio State, 1950; M.S., 1951; Ph.D., 1957.

DONALD R. MARION, *Associate Professor*, B.S., Cornell, 1954; M.S., 1955; Ph.D., Massachusetts, 1971.

GEORGE R. MCDOWELL, *Assistant Professor*, B.S., Rhode Island, 1961; M.S., Cornell, 1963; Ph.D., Michigan State, 1975.

BRIAN R. PAYNE, *Adjunct Assistant Professor of Forestry and Adjunct Assistant Professor of Agricultural and Food Economics*.

DAVID A. STOREY, *Professor*, B.S., Massachusetts, 1954; M.S., Purdue, 1958; Ph.D., 1960.

CLEVE E. WILLIS, *Associate Professor*, B.A., Chico State, 1965; M.S., California, 1967; Ph.D., 1972.

The Department offers both the Ph.D. and the M.S. degrees. The primary objective of the graduate program in Food and Resource Economics is the education of applied economists to meet the needs of contemporary society in the United States and other countries. Fields of interest included in the Department's program are: 1) Natural Resource and Environmental Economics, 2) International Agricultural Development Economics, and 3) Food Production and Marketing Economics.

The doctoral degree requirements of the Graduate School apply to the Ph.D. program. The student's program of study will be developed in accordance with his or her individual objectives and the required level of competence in economic theory and quantitative analytical methods established by the Department. The Ph.D. student is required to demonstrate research competency by completing an acceptable Ph.D. dissertation. No foreign language competency is required.

The general requirements established by the Graduate School also apply to the M.S. degree program. The M.S. degree candidate will earn from 6 to 9 credits in "experience activities" which include the alternatives of a 9-credit thesis or a 6- to 9-credit special problem in research, teaching, extension, or administration. No foreign language competency is required. A written qualifying examination normally is taken after the student completes the coursework.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

## GRADUATE SCHOOL

### 700. PROBLEMS IN AGRICULTURAL, FOOD, AND RESOURCE ECONOMICS.

Independent study and research on selected problems in agricultural, food, and resource economics. *Credit, 1-9.*

### 702. AGRICULTURE, NATURAL RESOURCES AND THE NATIONAL ECONOMY.

Application of welfare economics to the analysis of agricultural and other natural resources policies, the use of economic models for resources planning, and consideration of the environmental implications of agricultural and other resources programs. *Mr. Field.*

### 704. ADVANCED ANALYSIS OF FOOD MARKETING SYSTEMS.

Conceptual and normative analysis at both micro- and macro-levels of food and commodity marketing systems. Firm and group behavior, market structure, public policy implications.

### 705. RESEARCH METHODS IN AGRICULTURAL, FOOD, AND RESOURCE ECONOMICS.

Scientific method and its application. Selection, planning, and conduct of research. Formulation of models and hypotheses. Interdisciplinary considerations. Techniques commonly used and promising new approaches. Research administration.

### 721. NATURAL RESOURCE DEVELOPMENT ECONOMICS.

Economic models of natural resources use with emphasis on exhaustible resources; analysis of the role of natural resources in aggregate economic performance; dynamic characteristics of natural resources programs.

### 740. QUANTITATIVE METHODS.

Applications of micro-econometric techniques in agricultural, food, and resource economics. Emphasis on practical applications of modern methods of quantitative analysis to problems of the firm. Linear programming, transportation frameworks, and network flows. *Mr. Willis.*

### 741. ECONOMETRIC METHODS.

Introduction to econometric methods: the general linear model, nonspherical properties, generalized least squares, and estimation of systems of equations. *Mr. Willis.*

### 742. SPECIAL TOPICS IN ECONOMETRICS AND QUANTITATIVE ANALYSIS.

Seminars in non-linear and integer programming, statistical decision theory, recursive systems and causal ordering, dynamic econometric models, and other current topics. *Mr. Willis.*

### 775. ADVANCED AGRICULTURAL AND FOOD ECONOMICS.

Intensive study of the theory of the firm as it applies to agricultural and food production, including: production functions, costs functions, programming, and decision-making principles. *Mr. Conrad.*

### 799. SEMINAR.

*Credit, 1-3.*

### 800. MASTER'S THESIS.

*Credit, 3-9.*

### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

### 535. AGRICULTURAL BUSINESS MANAGEMENT.

Basic decision-making principles, management tools, analytical methods and their application to management problems of commercial farms and other agricultural firms. *Mr. Lee.*

### 546. ADVANCED MANAGEMENT OF AGRICULTURAL FIRMS.

Application of the theory of the firm and modern decision theory to management of typical agricultural businesses.

## UNIVERSITY OF MASSACHUSETTS

Plans for alternative firm adjustments analyzed, using budgeting and other methods. Mr. Crossmon.

### 561. FOOD MARKETING SYSTEMS.

Structure of food marketing systems. Operating principles, significant product characteristics, role of specialized marketing firms, government programs and policies.

Mr. Fitzpatrick.

### 646. REGIONAL COMPETITION AND MARKET INTERDEPENDENCY.

Interregional competition and interdependency in agricultural factor and product markets, in the context of aggregate demand and supply by regions as affected by spatial considerations.

Mr. Christensen.

### 652. AGRICULTURAL POLICY.

Analysis of U. S. public policies relating to the food and fiber system and the rural sector. Domestic and international considerations. Emphasis on current issues.

Mr. Storey.

### 667. FOOD MERCHANDISING.

Principles of merchandising food products; consumer demand for food; developing a competitive strategy including product line pricing, and retail merchandising decisions; current issues in food merchandising.

Mr. Leed.

### 668. FOOD DISTRIBUTION ECONOMICS.

Economic analysis of factors, internal and external to the firm, influencing sales of food firms. Emphasis on consumer concerns, public policy, and legislation in food marketing.

Mr. Marion.

### 670. WATER QUALITY ECONOMICS.

Principles for selection of welfare maximizing plans from among alternative pollution control policies and measures. Market and administrative decision making processes for pollution control.

Mr. Conrad.

### 673. RESOURCE AND CONSERVATION ECONOMICS.

An introduction to economic and institutional factors controlling land and water use. Land values, the nature of private property, social control of land use, and conservation economics.

### 676. MARINE RESOURCE ECONOMICS.

Economic analysis applied to public and private decisions about the utilization of coastal and offshore marine resources. Emphasis on current issues.

Mr. Storey.

### 681. INTERNATIONAL AGRICULTURAL DEVELOPMENT.

Economic development of low income rural economies. Relation of agriculture to national economies. Exogenous and endogenous factors in agricultural development.

Mr. Foster.

## Food Science and Nutrition

### GRADUATE FACULTY

FREDERICK J. FRANCIS, *Professor and Head of the Department of Food Science and Nutrition*, B.A., Toronto, 1946; M.A., 1948; Ph.D. Massachusetts, 1954.

FRANK E. POTTER, *Professor and Graduate Program Director*, B.S., Maine, 1942; M.S., Maryland, 1948; Ph.D., Pennsylvania State, 1955.

VIRGINIA A. BEAL, *Associate Professor*, B.S., Simmons College, 1939, M.P.H., Harvard School of Public Health, 1945.

MARK H. BERT, *Associate Professor*, B.S., Lima University, Peru, 1939; M.S., Illinois, 1948; Ph.D., 1955.

## FOOD SCIENCE AND NUTRITION

ERNEST M. BUCK, *Professor*, B.S., Connecticut, 1955; M.S., North Carolina State, 1957; Ph.D., Massachusetts, 1966.

FERGUS M. CLYDESDALE, *Professor*, B.A., Toronto, 1960, M.S., 1962; Ph.D., Massachusetts, 1966.

DAVID A. EVANS, *Associate Professor*, B.S., Pennsylvania State, 1953, M.S., 1955; Ph.D., Massachusetts, 1965.

IRVING S. FAGERSON, *Professor*, B.S., Massachusetts Institute of Technology, 1942; M.S., Massachusetts, 1948; Ph.D., 1950.

KIRBY M. HAYES, *Professor*, B.S., Massachusetts, 1947, M.S., 1949.

HERBERT O. HULTIN, *Professor*, B.S., Massachusetts Institute of Technology, 1956; M.S., 1956, Ph.D., 1959.

WARD M. HUNTING, *Associate Professor*, B.S., Houghton College, 1947; M.S., Massachusetts, 1949, Ph.D., 1963.

CARRIE R. JOHNSON, *Assistant Professor*, B.S., Kansas State, 1951; M.S., Massachusetts, 1966, Ph.D., 1975.

ROBERT E. LEVIN, *Associate Professor*, B.S., Los Angeles State, 1952, M.S., Southern California, 1954, Ph.D., California, 1963.

WASSEF W. NAWAR, *Professor*, B.S., University of Cairo, 1947, M.S., 1950, Ph.D., Illinois, 1960.

PETER L. PELLETT, *Professor and Director of Nutrition Option*, B.S., Borough Polytechnic, London, 1952, Ph.D., London School of Hygiene and Tropical Medicine, 1956.

F. MILES SAWYER, *Associate Professor*, B.S., Massachusetts Institute of Technology, 1948, M.S., California, 1951, Ph.D., 1955.

WILLARD M. WEATHERHOLTZ, *Assistant Professor*, B.S., Berea College, 1963, M.S., Virginia Polytechnic, 1966, Ph.D., 1969.

### INSTITUTE OF AGRICULTURAL AND INDUSTRIAL MICROBIOLOGY

WARREN LITSKY, *Commonwealth Professor of Environmental Sciences and Director of Agricultural and Industrial Microbiology*, B.S., Clark, 1945; M.S., Massachusetts, 1948; Ph.D., Michigan State, 1951.

ROBERT A. COLER, *Assistant Professor*, B.A., State University of New York, 1952; M.A., 1954; Ph.D., Syracuse, 1960.

HAIM B. GUNNER, *Associate Professor*, B.S., University of Toronto, 1946; M.S., University of Manitoba, 1948; Ph.D., Cornell, 1962.

ROBERT W. WALKER, *Assistant Professor*, B.S., Massachusetts, 1955; M.S., 1959; Ph.D., Michigan State, 1963.

The department offers two options: food science, and nutrition. Industrial microbiology is offered as an area of concentration for the Ph.D. degree in the Department of Food Science and Nutrition in cooperation with the Institute of Agricultural and Industrial Microbiology.

### FOOD SCIENCE OPTION

Graduate students who wish to major in food science may not be admitted to candidacy for an advanced

## FOOD SCIENCE AND NUTRITION

## GRADUATE SCHOOL

degree until such time as the undergraduate requirements in basic sciences and department courses have been met substantially. Work in the area of dairy technology is included in the offerings of the Department of Food Science and Nutrition.

All general Graduate School requirements for admission and for the degree must be met with the following additional requirements:

1. All Ph.D. candidates will offer as a minimum, 15 credits of departmental 800-level courses, three credits of seminar, and nine credits outside the department in certain courses more advanced than those recommended for undergraduate majors.

2. Competency in computer usage and programming is required of all Ph.D. candidates.

3. The Department of Food Science and Nutrition requires no foreign language competency for the doctoral degree.

4. Candidates for the M.S. degree may select one of three options, in order to fulfill the Graduate School requirements.

a. M.S. degree with thesis. Ten credits may be allowed for the thesis.

b. M.S. degree with research problem. Up to six credits may be allowed for the problem.

c. M.S. degree with course credits only.

5. Candidates for the non-thesis M.S. degree in options b. and c. above must submit at least nine credits of departmental 800-courses and two credits of seminar. The non-thesis options b. and c. are not open to candidates holding a departmental research assistantship.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

##### 700. RESEARCH PROBLEM.

Mainly for candidates for the Master of Science degree who do not write a thesis. Original research expected. Two bound copies of a written report of the study are required by the Department. *Credit, 3-6.*

##### 701. RESEARCH PROJECT.

Research on problems not related to the thesis. *Credit, 1-4.*

##### 802. ADVANCED DAIRY CHEMISTRY.

The physical, colloidal and chemical properties of milk and dairy products. The role of milk fat, salts, proteins, carbohydrates and enzyme systems.

Prerequisite, permission of instructor. *Mr. Potter.*

##### 809. MICROBIOLOGY AND FOOD PROCESSING.

Relationships of yeasts, molds, and bacteria to foods. Microbiology of refrigerated foods, mycotoxins, pectic enzymes. Characteristics and properties of organisms causing food infections and poisonings.

Two class hours; one 3-hour laboratory period.

Prerequisites, basic biochemistry and microbiology.

*Mr. Levin.*

##### 810. THERMOBACTERIOLOGY AND FOOD PROCESSING.

Bacteria of importance in spoilage of canned foods. Bacterial contamination and its control. Thermal resistance of bacteria. Heat transfer in thermally processed foods. Calculation and evaluation of sterilization processes.

Prerequisites, FS&N 809 and calculus. *Mr. Stumbo.*

##### 816. FOOD PACKAGING.

Characteristics of packaging materials as related to food product requirements. Evaluation, testing and case studies of

current food packages and products. Field trips to selected food and packaging operations.

Two class hours, one 3-hour laboratory period.

Prerequisite, FS&N 661.

*Mr. Hayes.*

##### 821. LIPID CHEMISTRY.

Composition and chemical properties of edible fats and oils. Physical characteristics — plasticity, polymorphism, melting, solidification. Technology of industrial fats — extraction, refining, hydrogenation, inter-esterification. Deteriorative reactions — oxidation, thermal degradation. Biological significance. New methods of analysis. Review of current literature.

Two class hours, one 2-hour laboratory period.

Prerequisite, permission of instructor.

*Mr. Nawar.*

##### 830. FOOD BIOCHEMISTRY.

Effects of storage and processing procedures on factors such as cellular organization, membrane deterioration, post-mortem or post-harvest protein synthesis, and enzymic control in plant and animal tissues used as food.

*Mr. Hultin.*

##### 841. ADVANCED FOOD ANALYSIS.

Instrumental methods. Infrared spectrophotometry, mass spectrometry, gas and liquid chromatography. Theory, techniques and applications.

Two class hours, one 2-hour laboratory period.

Prerequisite, permission of instructor.

*Mr. Fagerson.*

##### 850. COLORIMETRY AND APPEARANCE.

Color theory encompassing the physics and psychophysics of color matching and measurement along with the physiology of vision. Development of color solids and scales. Interpretation of reflection and transmission data. Visual and instrumental characteristics of color and appearance.

Total of 20 lecture hours and 12 laboratory hours.

Prerequisite, permission of instructor. Not open to FS&N majors.

*Credit, 2. Mr. Francis, Mr. Clydesdale.*

Two class hours and one 3-hour laboratory.

The extra lectures and laboratory are devoted to color quality changes with emphasis on foods.

*Credit, 3.*

*Mr. Francis, Mr. Clydesdale.*

##### 860. PIGMENTS IN FOODS.

Chemistry, analysis and processing implications of the anthocyanins, flavonoids, chlorophylls, carotenoids, betacyanins, meat pigments and nonenzymatic browning systems. Heavily weighted on chemistry but also includes interpretations in terms of appearance, nutritive value and general quality. Complements FS&N 850.

Two class hours, one 3-hour laboratory period.

Prerequisite, permission of instructor.

*Mr. Clydesdale, Mr. Francis.*

##### 871 (I), 872 (II). SEMINAR.

Review of current literature and research. Visiting lecturers.

One class hour.

*Credit, 1.*

##### 895. TOXICOLOGY.

Evaluation of methods used to determine safety of economically important chemicals. Mechanisms of drug disposition and drug metabolism. Discussion of regulatory toxicology.

Prerequisite, permission of instructor. *Mr. Weatherholtz.*

##### 800. MASTER'S THESIS.

*Credit, 10.*

##### 900. DOCTORAL DISSERTATION.

*Credit, 18.*

#### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

##### 558. ANIMAL PRODUCTS.

Introduction to the processing, purchasing, handling and storage of meats and other protein foods.

Two class hours, one 2-hour lecture-demonstration.

*Mr. Hayes.*

## UNIVERSITY OF MASSACHUSETTS

### 611. FOOD AND INDUSTRIAL FERMENTATIONS.

The genetics of industrial microorganisms, dairy fermentations, microbial production of protein, pesticides, nucleotides, beer, wine, vinegar, antibiotics, ergotamine and amino acids.

Prerequisites, general microbiology and biochemistry.  
Two class hours. *Credit, 2.* Mr. Levin.

### 652. FOOD CHEMISTRY I.

The chemistry of food products. Chemical, physical, and biological changes in foods at the cellular and molecular levels during storage and processing. Emphasizes water, cell structure, carbohydrates and lipids of foods.

Prerequisite, Organic Chemistry or permission of instructor.  
Mr. Hultin.

### 653. FOOD CHEMISTRY II.

The chemistry of food products. Chemical, physical and biological changes in foods at the cellular and molecular levels during storage and processing. Emphasizes food proteins, enzymes, vitamins and flavor chemistry. May be taken separately from FS&N 652.

Prerequisite, Organic Chemistry or permission of instructor.  
Mr. Nawar.

### 661. FOOD PROCESSING.

Basic principles and current technology of food processing. Blanching, thermal processing, freezing, concentration, drying and packaging. *Mr. Bluestein.*

### 662. FOOD PROCESSING LABORATORY.

Application and utilization of pilot plant equipment to illustrate principles and practice in the food industry.  
One class hour; one 4-hour laboratory period.

*Mr. Bluestein.*

### 665. UNIT OPERATIONS.

Technical principles involved in the handling and processing of milk and dairy products.  
Two class hours, one 2-hour laboratory period.

*Mr. Hankinson.*

### 666. HYGIENIC PRINCIPLES OF FOOD HANDLING.

Application of hygienic principles to the preparation, processing and handling of foods. Emphasis on training supervisory personnel. *Mr. Evans.*

### 671. ANALYSIS OF FOOD PRODUCTS

Physical, chemical, microbiological and microscopical methods. Two class hours, one 4-hour laboratory period.  
Prerequisite, analytical chemistry. *Mr. Hunting.*

### 672. OBJECTIVE ANALYTICAL METHODS AND INSTRUMENTATION.

Continuance of 671.  
Two class hours, one 4-hour laboratory period.  
Prerequisite, FS&N 671. *Mr. Hunting.*

### 674. NUTRITIONAL ASPECTS OF FOOD PROCESSING.

Effects of traditional and new methods of food processing, chemical additives and naturally occurring toxicants on the nutritional quality of food. Nutritional labelling and legal aspects.

Prerequisites, FS&N 540 or permission of instructor.  
*Mr. Sawyer.*

### 680. SPECIAL TOPICS IN WORLD FOOD TECHNOLOGY.

Selected problems in applications of food technology to solutions of world food problems in developing countries.  
Two class hours, *Credit, 2.* *Mr. Esselen.*

### 684. SENSORY EVALUATION METHODS.

An introduction to sensory measurements in the evaluation and acceptance of foods. Panel tests and their statistical interpretation; taste, odor, color, and texture measurements.  
Two class hours, one 2-hour laboratory period. *Mr. Sawyer.*

### COURSES NOT FOR MAJOR CREDIT

(No graduate credit for students in Food Science Option)

## FOOD SCIENCE AND NUTRITION

### 551. INTRODUCTORY FOOD SCIENCE.

Food manufacture, processing, distribution and spoilage problems. *Mr. Hayes.*

### 575. SURVEY OF FOOD TECHNOLOGY.

An introduction to food science, its role in world food supply, and the relationships of raw materials, processing, and finished products. Consumer issues, regulatory problems, and nutritive quality.

Two class hours; one 2-hour laboratory period.  
*Mr. Esselen, Mr. Hayes.*

## NUTRITION OPTION

The degree of Master of Science or Doctor of Philosophy may be earned in the Department by candidates who hold an accredited baccalaureate degree in natural sciences with emphasis on chemistry or biology or an accredited baccalaureate in home economics with a major in dietetics or nutrition and food. Other students must be prepared to remedy undergraduate deficiencies without earning graduate credit.

Candidates must satisfy the M.S. or Ph.D. degree requirements established by the University. The program for each candidate for the M.S. degree is designed to meet the needs and interests of the student; it includes course work in the major field and in a minor area such as physiology, food science, biochemistry, public health or food economics and either a thesis or a written report on his work on a special problem.

The program for each candidate for the Ph.D. degree is designed with sufficient flexibility to meet the needs and interests of the student; it includes course work in the major field and in areas related to the major field, a written preliminary comprehensive examination and a dissertation. The Department requires no foreign language reading competency for the Ph.D. degree.

## ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

### COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

#### 700. SPECIAL PROBLEMS.

Prerequisite, permission of department head. *Credit, 3-6.*

#### 703. ADVANCED NUTRITION — CARBOHYDRATES, LIPIDS AND AMINO ACIDS.

Metabolic role of carbohydrates, lipids, proteins and amino acids; biological oxidations, mechanisms of energy production and utilization.

Prerequisite, Biochem 520 or permission of instructor.  
*Mr. Pellett, Mr. Weatherholtz.*

#### 704. ADVANCED NUTRITION — VITAMINS.

Metabolic role of vitamins, specific functions, requirements, sources, assay methods, effects of deficiencies and excesses.  
Prerequisite, FS&N 703 or permission of instructor.

*Mr. Pellett, Mr. Weatherholtz.*

#### 705. ADVANCED NUTRITION — MINERALS.

Metabolic role of minerals, specific functions, requirements, sources, assay methods, effects of deficiencies and excesses.  
Prerequisites, FS&N 703 or permission of instructor.

*Mr. Weatherholtz.*

#### 710. SEMINAR.

Readings, reports and discussions on the current literature in the area of Food or Nutrition.

*Credit, 1 per semester; maximum credit, 3.*

## FORESTRY AND WOOD TECHNOLOGY

### 800. MASTER'S THESIS.

Individual research.

Credit, 6-10.

### 801. RESEARCH PROJECT.

Prerequisite, permission of graduate instructor. (Not thesis, for Ph.D. candidates only.)

Credit, 1-4.

### 900. DOCTORAL DISSERTATION.

Credit, 18.

### COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 540. BASIC NUTRITION.

Basic principles of human nutrition. The nutrients, i.e., energy, protein, vitamins, minerals, and water, and their chemical and physiological roles in metabolism.

Ms. Beal, Mr. Pellett, Mr. Weatherholtz.

#### 612. EXPERIMENTAL FOODS.

Fundamental principles of food quality evaluation, development of an independent research problem.

One class hour, two 3-hour laboratory periods.

Prerequisites, FS&N 251 or equivalent, Chem 160 or permission of instructor.

Ms. Davis.

#### 640. NUTRITION IN THE LIFE CYCLE.

Nutritional needs at various stages in the life cycle, i.e., pregnancy and lactation, infancy, childhood, adolescence, adult life and the aged.

Prerequisite, FS&N 240 or permission of instructor.

Ms. Beal.

#### 642. COMMUNITY NUTRITION.

Community response through its agencies and institutions, public, private, and voluntary, in providing nutrition care, services and education.

Prerequisite, FS&N 640 or permission of instructor.

Ms. Wright.

#### 643. NUTRITIONAL PROBLEMS OF THE UNITED STATES.

Examination of the factors within the United States resulting from and causing malnutrition. Will include obesity, coronary heart disease, diabetes, alcoholism, food fads and quackery, food additives and unintentional residues.

Prerequisites, FS&N 340/640 or permission of instructor.

Ms. Beal, Mr. Pellett, Mr. Weatherholtz.

#### 644. NUTRITIONAL PROBLEMS OF DEVELOPING NATIONS.

Malnutrition as it exists in developing countries and its socioeconomic background. Protein-energy malnutrition, famine, vitamin and mineral deficiency diseases, synergism between nutrition and infection and the role of international agencies in fighting malnutrition.

Prerequisites, FS&N 340/640 or permission of instructor.

Mr. Pellett.

#### 645. NUTRITION IN DISEASE.

Physiological basis for therapeutic diets in certain diseases. Current medical and nutrition literature used.

Prerequisite, FS&N 340, Biochem 220, Zool 135 or permission of instructor.

Ms. Wright.

#### 660. ADVANCED METHODS OF COMPUTERIZATION IN NUTRITION AND FOOD SERVICE.

The mathematical foundations of computations with food nutrients and recipe data. The data file structure of computerized food and nutrient accounting systems. The principle of mathematical optimization techniques and its utilization in computerized menu planning and scheduling models. Laboratory work with computer applications.

Prerequisites, FS&N 340/640, Mgt 110, Math 115 or equivalents.

Mr. Balintfy.

## GRADUATE SCHOOL

## Forestry and Wood Technology

### GRADUATE FACULTY

DONALD R. PROGULSKE, *Professor and Head of the Department of Forestry and Wildlife Management*, B.S., Massachusetts, 1950; M.S., Virginia Polytechnic Institute, 1952; Ph.D., University of Missouri, 1956.

BRAYTON F. WILSON, *Associate Professor of Forestry and Graduate Program Director in Forestry*, B.A., Harvard, 1955; M.F., 1957; Ph.D., California at Berkeley, 1961.

R. BRUCE HOADLEY, *Professor of Wood Technology and Graduate Program Director in Wood Technology*, B.S., Connecticut, 1955; M.F., Yale, 1957; D.F., 1962.

HERSCHEL G. ABBOTT, *Professor of Forestry*, B.S., Maine, 1943; M.F., Harvard, 1952; M.A., 1959.

ROBERT S. BOND, *Professor of Forestry*, B.S., Massachusetts, 1951; M.F., Yale, 1952; Ph.D., State University of New York, 1966.

CARL A. CARLOZZI, *Associate Professor of Resource Planning*, B.S., Kent State, 1955; M.A., 1957; Ph.D., Michigan, 1965.

BURNELL C. FISCHER, *Assistant Professor of Forestry*, B.S., Purdue, 1969; M.S., 1971; Ph.D., 1974.

HAROLD B. GATSLICK, *Professor of Wood Technology*, B.S., State University of N.Y., 1944; M.S., 1948; Ph.D., 1954.

WILLIAM P. MACCONNELL, *Professor of Forestry*, B.S., Massachusetts, 1943; M.F., Yale, 1948.

DONALD L. MADER, *Professor of Forestry*, B.S., State University of N.Y., 1950; M.S., Wisconsin, 1954; Ph.D., 1956.

ALAN A. MARRA, *Visiting Professor of Wood Technology*, B.S., State University of N.Y., 1940; M.S., 1942; Ph.D., University of Michigan, 1955.

JOSEPH C. MAWSON, *Assistant Professor of Forestry*, B.S., Maine, 1956; M.F., Duke, 1958; M.A., California at Berkeley, 1966.

JOHN H. NOYES, *Professor of Forestry*, B.S., Connecticut, 1937; M.F., Yale, 1939.

BRIAN PAYNE, *Adjunct Assistant Professor of Forestry*, B.S., California at Berkeley, 1961; M.F., Duke, 1962; Ph.D., California at Berkeley, 1969.

WILLIAM W. RICE, *Associate Professor of Wood Technology*, B.S., Maine, 1948; M.F., Yale, 1949; D.F., Duke, 1964.

Degrees offered are the Master of Science (with thesis and non-thesis options) and the Doctor of Philosophy.

Areas of program specialization include forest soils and ecology, physiology, silviculture, forest management, resource economics and planning, forest recreation, forest hydrology, wood science and technology, product development and processing, operations research, and marketing, with emphasis on structural elements, components, and systems for housing.

Completion of a master's level program requires from four to five semesters depending upon the stu-

## UNIVERSITY OF MASSACHUSETTS

dent's background and educational objectives; and an additional two, or more likely, three years are needed to attain the doctorate. A reading knowledge of one or more foreign languages sufficient to understand journal material may be required of doctoral students in certain areas of specialization.

An applicant's undergraduate preparation preferably should have focused on forestry, wood science and technology, engineering, planning, or a closely related field in natural resource management, conservation or natural science. Students from other backgrounds can be accommodated but longer-than-typical programs will be required to qualify for a degree which is normally based on a non-thesis program with a professional, rather than research, orientation.

### ALL COURSES CARRY 3 CREDITS UNLESS OTHERWISE SPECIFIED

#### FORESTRY COURSES OPEN TO GRADUATE STUDENTS ONLY

(For either major or minor credit)

##### 700. SPECIAL PROJECT.

Selected research problem in forestry not related to the candidate's thesis. *Credit, 2-4.*

##### 701. ADVANCED FOREST SOILS.

The relation of soils to tree growth and other environmental factors with emphasis on research methods, site-evaluation, water relationships, and fertility; laboratory and field exercises.

Prerequisite, For 524 or equivalent. *Mr. Mader.*

##### 702. AERIAL PHOTO-INTERPRETATION.

Advanced aerial photo-interpretation emphasizing the analysis of natural vegetation and land use in natural resource studies and planning.

Prerequisite, For 530 or equivalent. *Mr. MacConnell.*

##### 703. ADVANCED FOREST ECOLOGY

Methods for describing and analyzing forest ecosystem structure; effects of environmental factors on forest ecosystems; forest ecosystem processes and development.

Prerequisite, For 523 or equivalent. *Mr. Fischer.*

##### 704. ADVANCED SILVICULTURE.

Growth and reproductive characteristics and requirements of trees and forest stands as they affect silvicultural management, particularly in relation to thinning and the establishment of forest regeneration.

Prerequisites, For 523, 524, and 526, or equivalents. *Mr. Abbott, Mr. Fischer.*

##### 706. ADVANCED FOREST MENSURATION.

Regression analysis applied to stand and tree volume determination, stand growth and yield, forest site evaluation, and related measurement problems. Computer techniques used to solve some of the problems.

Prerequisites, For 525 and 534, or equivalents. *Mr. Mawson.*

##### 707. ADVANCED FOREST MANAGEMENT.

Economic evaluation of forest enterprises; appraisal of rates of return, damage, and stumpage values.

Prerequisite, For 540 or equivalent. *Mr. MacConnell.*

##### 708. MICROECONOMICS OF FORESTRY I.

Principles of microeconomics as applied to forestry problems with emphasis on marginal analysis in regard to land, labor, and capital.

Prerequisite, For 535 or equivalent. *Mr. Bond.*

##### 709. MICROECONOMICS OF FORESTRY II.

An examination of models and simulation techniques employed in forest resource use decision-making.

*Mr. Bond.*

## FORESTRY AND WOOD TECHNOLOGY

##### 791, 792 A. B. SEMINAR.

Specialized study in a selected area of forestry. *Credit, 1-3.*

##### 800. MASTER'S THESIS.

*Credit, 6-10.*

##### 900. DOCTORAL DISSERTATION

*Credit, 18.*

#### FORESTRY COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS

(For either major or minor credit)

##### 512. DENDROLOGY.

Taxonomic features, silvical characteristics, and distribution of the principal tree species of temperate North America; a description of the forests of the world, their distribution and economic importance.

Three class hours, two 2-hour laboratory periods.

*Credit, 4.* *Mr. Abbott, Mr. A.B. Cole.*

##### 523. SILVICS.

Forest ecology and tree growth as a foundation for silviculture and other uses of the forest; interactions of environment and forests; development and classification of forest communities. *Mr. Fischer.*

##### 524. FOREST SOILS.

Effects of soil properties on tree growth; relationship of soils to silviculture, harvesting, watersheds, wildlife, and range management; forest soil description, classification, and mapping. *Mr. Mader.*

##### 525. THE ELEMENTS OF FOREST MENSURATION.

The measurement of trees, stands, and forest products; field and office practice in timber-estimating and log-scaling; collection and compilation of forest inventory data.

*Mr. Mawson.*

##### 526. THE PRINCIPLES OF SILVICULTURE.

Forest culture of wood crops; regeneration and intermediate cuttings, silvicides, prescribed burning, site-treatment, slash disposal, nursery management, forest planting and direct seeding; interactions with management for water, wildlife, recreation, and esthetics.

Prerequisite, For 523. *Credit, 4.* *Mr. Fischer.*

##### 527. TREE PHYSIOLOGY.

Growth and development during the life cycle of trees, emphasizing the whole-plant approach and phenomena best-studied in trees; the physiological basis of silviculture.

Prerequisite, Botany 211 or equivalent. *Mr. Wilson.*

##### 528. FOREST HYDROLOGY.

Principles and factors controlling the hydrological cycle on forest lands. Review of forest watershed management research on the influence of soils, vegetation, and management practices on water yields and water quality. Watershed management as a part of integrated forest land management. *Mr. Mader.*

##### 529. FOREST PROTECTION.

Principles of protecting forests from fire, insects, diseases, domestic animals, wildlife, and atmospheric agencies with emphasis on the prevention and control of forest fires.

*Mr. Abbott.*

##### 531. AERIAL PHOTOGRAMMETRY.

Principles of photo-interpretation and cartography for foresters, wildlife biologists, natural-resource planners and others concerned with large land surfaces. Photo-interpretation and map making are laboratory activities. *Mr. MacConnell.*

##### 532. FOREST-TREE IMPROVEMENT.

Tree introduction, geographic variation, tree selection, vegetative propagation, controlled pollination and hybridization, seed-orchard management. *Mr. Abbott.*

##### 534. ADVANCED FOREST MENSURATION.

The theory and application of sampling techniques in forest survey and research problems including simple random,

## FRENCH

stratified, subsampling, representative, and probability sampling.  
Mr. Mawson.

### 535. FOREST ECONOMICS.

The application of economic principles to the allocation of land, labor, and capital in forest enterprises; market and pricing theory of forest products.  
Prerequisite, introductory economics.  
Mr. Bond.

### 536. FOREST RESOURCES POLICY.

Forest policy in the United States — its history and the influences and processes of forest resource policy formulation.  
Mr. Bond.

### 539. THE FOREST RESOURCES OF NORTH AMERICA.

The forest resources of North America and their management for multi-purpose economic and social benefits; regional physiography, climate, vegetation, demography, and economic base; environmental, economic, and socio-political constraints affecting management.  
Prerequisite, natural resource, regional-planning, or similar backgrounds.  
Mr. Fischer.

### 540. PRINCIPLES OF FOREST MANAGEMENT.

Multiple-use management of forest land, organization of the forest for sustained-yield management; preparation of a management plan for a 10,000-acre forest.  
Laboratory period optional for non-forestry majors.  
Prerequisite for the laboratory, For 525.

Credit, 3 or 5. Mr. MacConnell.

### 602. ECOLOGICAL PRINCIPLES IN RESOURCE PLANNING.

Analysis of ecological principles and their relationship and importance to resource planning. State and federal conservation programs chosen for critical case study.  
Prerequisite, permission of instructor.  
Mr. Carlozzi.

### WOOD TECHNOLOGY COURSES OPEN TO GRADUATE STUDENTS ONLY (For either major or minor credit)

#### 700. SPECIAL PROJECT.

Selected research problem in wood technology not related to the candidate's thesis.  
Credit, 2-4.

#### 710. CHEMICAL MODIFICATION OF WOOD.

Basic concepts and techniques concerning the chemical modification of wood; the potential and limitations or physical and chemical treatments as they affect the dimensional stability and durability of wood.  
Prerequisites, organic chemistry and Wood Tech 504.  
Mr. Gatslick.

#### 711. POLYSACCHARIDE AND LIGNIN CHEMISTRY.

The chemistry of lignin, hemicelluloses and cellulose in regard to the wood as a chemical raw material.  
Prerequisites, organic chemistry, Wood Tech 538, or equivalent.  
Mr. Marra.

#### 791, 792. SEMINAR.

Specialized study in a selected segment of wood-products marketing or wood technology.  
Credit, 1-3 each semester.

#### 800. MASTER'S THESIS.

Credit, 6-10.

#### 900. DOCTORAL DISSERTATION.

Credit, 18.

### WOOD TECHNOLOGY COURSES OPEN TO BOTH GRADUATE AND UNDERGRADUATE STUDENTS (For either major or minor credit)

#### 501. WOOD ANATOMY AND IDENTIFICATION.

A basic anatomical study of wood elements, their structural characteristics and function; identification of woods.  
Mr. Hoadley.

#### 502. PRIMARY TIMBER CONVERSION.

Survey of systems used to convert logs into lumber and allied

by-products; drying, grading and distribution of primary wood products.  
Mr. Rice.

#### 503. FOREST PRODUCTS.

A survey of the principal forest products, their manufacture and distribution.  
Mr. Gatslick.

#### 504. PROPERTIES OF WOOD.
